- 9) Engelberger reported the average MTBF for its robots as _____ hrs.
- a) 100
 - b) 200
 - c) 300
 - d) 400
- 10) Robot Intelligence refers to: _____.
- a) The ability of robots to have emotions
 - b) The physical strength of a robot
 - c) The ability of robots to learn from their environment and make decisions
 - d) The ability of robots to perform repetitive tasks
- 11) What are the characteristics of future robot tasks?
- a) Limited adaptability and flexibility
 - b) Adaptability, flexibility, and autonomous decision-making
 - c) Strict reliance on pre-programmed instructions
 - d) Slow response to changing conditions
- 12) In the service industry, robots are often used for tasks like:
- a) Manufacturing
 - b) Healthcare
 - c) Agriculture
 - d) Mining
- 13) Unmanned Ground Vehicles (UGV) are primarily designed for:
- a) Aerial surveillance
 - b) Underwater exploration
 - c) Ground-based tasks without human intervention
 - d) Space exploration
- 14) When designing a robot cell layout, what is a crucial consideration to minimize interference and optimize workflow?
- a) Maximizing machine density
 - b) Minimizing workspace separation
 - c) Optimizing robot speed
 - d) Reducing workcell size

Set **S**

Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING
Advanced Topics in Robotics (BTN02718)

Day & Date: Sunday, 19-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) Answer any two questions from each section.
 2) Figures to the right indicate full marks.
 3) Use of a non-programmable scientific calculator is allowed.
 4) Assume suitable data if necessary.

Section – I

- Q.2** a) What are the key industries currently utilizing robotics technology, and how has this adoption evolved over the past decade? **07**
 b) What is robot intelligence? Write in detail about the Hierarchical control structure in a Real-time control system as prescribed by the National Bureau of Standards. **07**
- Q.3** a) What are the different methods of Lead-through programming? Assess their merits and demerits. **07**
 b) Enlist different types of robot cell layouts. Compare and contrast the different types of robot cell layouts. **07**
- Q.4** a) Define Mobile robots and enlist the types of land-based mobile robots. Explain the key issues for the locomotion of mobile robots. **07**
 b) What is slip in the context of WMR? Model the WMR for rolling without slip on flat terrain. **07**

Section – II

- Q.5** a) Elaborate on the features of the welding robot. **08**
 b) Elaborate on the features of the spray coating robot. **06**
- Q.6** a) Prepare a checklist for workforce acceptance to assess the potential for successfully implementing robotics in plant. **06**
 b) A robot installation project has an initial cost of \$85,000 and expected annual costs for operation and maintenance are estimated to be \$24,000. The project is expected to generate revenues of \$60,000 annually for four years, at which time the project will be retired. The estimated salvage value of the robot at the end of 4 years is \$ 40,000. **08**
 i) Determine the payback period for the project.
 ii) Determine the Equivalent uniform annual cost for the project using a 25% MARR.

iii) Determine the expected Return on investment to be derived from the investment.

Evaluate by all the methods separately, whether the robot project is economically feasible.

Given: Capital recovery factor and Sinking fund factor for 4 years is given below for various interest rates.

Interest Rates (%)	Capital Recovery factor	Sinking Fund factor
20	0.3863	0.1863
25	0.4234	0.1734
30	0.4616	0.1616
35	0.5008	0.1508

Q.7 a) What are the different types of robotics training that should take place in a company? **06**

b) The cost of the robot is \$80,000 and the user company wants to establish an optimum level of spare parts inventory. The company knows which components of robot are likely to fail and it wants to build its spare parts to a stock level at which total cost of inventory plus lost total production time is minimized. When a breakdown occurs, the repair time will average two hours if the required spare part is available. If it is not available, it will lose an average of 10 hours of production while the part is being ordered and delivered. In addition, rush delivery of the part will cost \$50 per order. The company estimates that the cost of downtime is \$100 per hour. The robot operates one shift of 8 hours per day for 250 days per year. The mean time between failure is 200 hours. The cost of inventory is 20% per year of the value of spare parts in stock. The following level indicates various alternative spare parts level and corresponding probability that the robot can be repaired using parts available in stock. **08**

Spare Parts level (\$)	Pr (Coverage)	Pr (no coverage)
0	0	1
5000	0.25	0.75
10000	0.4	0.6
20000	0.65	0.35
30000	0.8	0.2
40000	0.9	0.1
80000	1	0

i) Based on the data provided, determine the optimum level of spare parts inventory to maintain.

ii) At the level of inventory determined in part (a), determine the 'availability' of the robot.

Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING
Advanced topics on 3D Printing (BTN02719)

Day & Date: Sunday, 19-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page. Answer MCQ/Objective type questions on Page No.3 only.
 3) Assume suitable data if required.
 4) Use of scientific calculator is allowed.
 5) Figure to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct answer.

14

- 1) What is the primary goal of automation in manufacturing?
 - a) Reduce workforce
 - b) Increase production speed and efficiency
 - c) Decrease product quality
 - d) Increase manual labour
- 2) Which of the following is an example of a basic automated process?
 - a) Handcrafting
 - b) 3D printing
 - c) Wood carving
 - d) Sewing by hand
- 3) What is the purpose of 3D CAD modeling in the manufacturing process?
 - a) Creating physical prototypes
 - b) Designing user interfaces
 - c) Modeling 2D graphics
 - d) Drafting blueprints
- 4) Which 3D printing technology is associated with the acronym "SLA"?
 - a) Solid Ground Curing (SGC) System
 - b) Solid Creation System
 - c) 3D Systems SLA
 - d) EOS' Stereos System
- 5) What does "SGC" stand for in 3D printing technology?
 - a) Solid Ground Curing
 - b) Solid Creation System
 - c) Stereolithography
 - d) Selective Laser Sintering
- 6) What does CAD stand for?
 - a) Computer-Aided Design
 - b) Computer-Aided Development
 - c) Computer-Activated Drawing
 - d) Computer-Appointed Diagram
- 7) In feature-based 3D CAD modeling, what are "features"?
 - a) Specific design elements with no parametric relations
 - b) Geometric shapes that cannot be edited
 - c) Parametric design elements like holes, fillets, and extrusions
 - d) 3D scans of physical objects

- 8) What is the primary goal of Rapid Tooling?
- a) To produce high-quality, long-lasting molds
 - b) To create functional prototypes quickly
 - c) To handcraft tools for manufacturing
 - d) To minimize the use of technology in tooling
- 9) Rapid Tooling is often used in which phase of product development?
- a) Conceptual design
 - b) Mass production
 - c) Market research
 - d) Distribution
- 10) Which of the following is NOT a key advantage of Rapid Tooling?
- a) Cost-effectiveness
 - b) High tool durability
 - c) Short lead times
 - d) Increased design flexibility
- 11) What does "STL" stand for in the context of 3D printing?
- a) Stereolithography
 - b) Standard Triangle Language
 - c) Structured Text Language
 - d) Solid Transition Layer
- 12) What is the primary purpose of an STL file in 3D printing?
- a) Storing color information for 3D models
 - b) Defining the dimensions of a 3D printer
 - c) Describing the geometry of a 3D object
 - d) Managing printer firmware
- 13) What is post-processing in the context of 3D printing?
- a) The initial setup of a 3D printer
 - b) The process of designing 3D models
 - c) Additional treatments or finishing Steps after 3D printing
 - d) The method of slicing 3D models for printing
- 14) Which phase of 3D printing involves post-processing?
- a) Modeling
 - b) Printing
 - c) Design
 - d) Finishing

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct answer.

14

- 1) Which of the energy resources were considered for large scale use after the oil crisis of 1973?
 - a) Conventional Sources
 - b) Non-Conventional Sources
 - c) Non-renewable sources
 - d) Primary Sources-
- 2) Which of the statements is correct about Solar Energy?
 - a) It is a renewable and conventional source of energy
 - b) It is a non-renewable and non-conventional source of energy
 - c) It is a renewable and non-conventional source of energy
 - d) It is a non-renewable source of energy
- 3) Kyoto Protocol launched in _____?
 - a) India
 - b) Japan
 - c) China
 - d) U.S.
- 4) The availability of Renewable energy sources is _____.
 - a) uncertain
 - b) constant
 - c) high
 - d) regular
- 5) Which is the Following is Environmental impact?
 - a) Soil damage
 - b) Gas leakage
 - c) Air pollution
 - d) Temperature
- 6) The only country having a full-fledged ministry for Development of New and Renewable Resources is _____.
 - a) India
 - b) Bangladesh
 - c) USA
 - d) China
- 7) Carbon Credits also called as?
 - a) Carbon
 - b) Pollution
 - c) Emission
 - d) Carbon Offset
- 8) Preferences are nothing but Choice given by person _____.
 - a) True
 - b) False
- 9) IRR stands for _____.
 - a) International Rate Recover
 - b) International Rate Return
 - c) a & b
 - d) None of the Above

**Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING**

Energy Resources, Economics and Environment (BTN02716)

Day & Date: Sunday, 19-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) Solve any two questions from each Section.
2) Assume suitable data, diagrams if required.
3) Use of scientific calculator is allowed.
4) Figures to the right indicate full marks.

Section – I

- Q.2 Solve:**
- a) Draw and Explain in detailed “Energy Flow diagram” **04**
 - b) Explain the Linkage between “Energy & Development.” **05**
 - c) What is the importance of Time value-discount rate in Economics Of? Energy? **05**
- Q.3 Solve:**
- a) Explain in detailed “Global Energy Use in India”. **04**
 - b) Explain “Life cycle energy assessment” of energy Quality. **05**
 - c) Write a short note on “Commercial Energy sources.” **05**
- Q.4 Solve:**
- a) Differentiate between Primary and Secondary Energy resources. **04**
 - b) Define & Explain the term “Kaya identity”. **05**
 - c) Explain following terms for selecting Energy Projects. **05**
 - i) Net Present Value (NPV)
 - ii) Internal Rate of Return (IRR)

Section – II

- Q.5 Solve:**
- a) How Carbon Credits performed on Global platform? Explain. **04**
 - b) Explain the term “Global Warming”. **05**
 - c) Define Pollution & Explain types of Pollution. **05**
- Q.6 Solve:**
- a) Explain “Kyoto Protocol” for Energy & Environment. **04**
 - b) Write a short note “Preferences & Utility” of energy. **05**
 - c) Write a short note on “Bioenergy”. **05**
- Q.7 Solve:**
- a) How safely Water & Land used for energy & environment? **04**
 - b) Explain “Betting on Planet Simon-Eherlich”. **05**
 - c) Write a Short note on “Future energy demand & Supply.” **05**

- 9) Which of the statements is correct about Solar Energy?
- a) It is a renewable and conventional source of energy
 - b) It is a non-renewable and non-conventional source of energy
 - c) It is a renewable and non-conventional source of energy
 - d) It is a non-renewable source of energy
- 10) Kyoto Protocol launched in _____?
- a) India
 - b) Japan
 - c) China
 - d) U.S.
- 11) The availability of Renewable energy sources is _____.
- a) uncertain
 - b) constant
 - c) high
 - d) regular
- 12) Which of the following is Environmental impact?
- a) Soil damage
 - b) Gas leakage
 - c) Air pollution
 - d) Temperature
- 13) The only country having a full-fledged ministry for Development of New and Renewable Resources is _____.
- a) India
 - b) Bangladesh
 - c) USA
 - d) China
- 14) Carbon Credits also called as?
- a) Carbon
 - b) Pollution
 - c) Emission
 - d) Carbon Offset

Energy Resources, Economics and Environment (BTN02716)

Day & Date: Sunday, 19-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct answer.

14

- 1) The only country having a full-fledged ministry for Development of New and Renewable Resources is _____.
 - a) India
 - b) Bangladesh
 - c) USA
 - d) China
- 2) Carbon Credits also called as?
 - a) Carbon
 - b) Pollution
 - c) Emission
 - d) Carbon Offset
- 3) Preferences are nothing but Choice given by person _____.
 - a) True
 - b) False
- 4) IRR stands for _____.
 - a) International Rate Recover
 - b) International Rate Return
 - c) a & b
 - d) None of the Above
- 5) Which is the First largest Thermal Power plant in India?
 - a) Meru
 - b) Everest
 - c) Himalaya
 - d) Vindhychal
- 6) How many Phases in "National Solar Mission".
 - a) 1
 - b) 4
 - c) 3
 - d) 5
- 7) Purpose of "Energy Audit" is to access the nature and extent risk of harm to Human health & Environment?
 - a) True
 - b) False
- 8) One carbon credit permit emission of One Ton of _____.
 - a) Petrol
 - b) Coal
 - c) Diesel
 - d) Co2 or GHG
- 9) What is the major problem with wind energy?
 - a) Generates energy from wind
 - b) It is a renewable source of energy
 - c) Requires large area of land.
 - d) Compact and does not require large area of land

- 10)** Which of the energy resources were considered for large scale use after the oil crisis of 1973?
- a) Conventional Sources b) Non-Conventional Sources
c) Non-renewable sources d) Primary Sources-
- 11)** Which of the statements is correct about Solar Energy?
- a) It is a renewable and conventional source of energy
b) It is a non-renewable and non-conventional source of energy
c) It is a renewable and non-conventional source of energy
d) It is a non-renewable source of energy
- 12)** Kyoto Protocol launched in _____?
- a) India b) Japan
c) China d) U.S.
- 13)** The availability of Renewable energy sources is _____.
- a) uncertain b) constant
c) high d) regular
- 14)** Which is the Following is Environmental impact?
- a) Soil damage b) Gas leakage
c) Air pollution d) Temperature

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No.3 (starting page of the Answer Book). Each question carry one mark.
 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Attempt the following single correct answer type questions. 14

- 1) Refusal to adopt and use opportunities to make changes in production _____ entrepreneurs.

a) Fabian	b) Imitative
c) Innovative	d) Drone
- 2) Individuals are motivated by psychological and economic rewards _____.

a) Pure	b) Induced
c) Motivated	d) Spontaneous
- 3) Which of the following is not a characteristic of entrepreneurship?

a) Creative activity	b) Innovation
c) Risk taking	d) Managerial training
- 4) One of the disadvantages of a franchise business for a franchisee is _____.

a) Lack of independence	b) Franchise businesses typically have a high failure rate
c) Lack of brand identity	d) Training is not normally provided by the franchisor
- 5) _____ units provide inputs to other industries.

a) Export	b) Small
c) Ancillary	d) None of these
- 6) For small scale business which type of business idea will be perfect?

a) the joint stock business	b) the sole Proprietorship business
c) the limited private business	d) the company business
- 7) At breakeven point _____.

a) Total expenses = Total revenue	b) Total expenses > Total revenue
c) Total expenses < Total revenue	d) Any of the above

Operations Research (BTN02712)

Day & Date: Monday, 20-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No.3 (starting page of the Answer Book). Each question carry one mark.
 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 3) Figures to the right indicates full marks.
 4) Draw neat-labelled diagrams wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options. 14

- 1) Operations research is the application of _____ methods to arrive at the optimal solutions to the problem.

a) economical	b) scientific
c) a and b both	d) artistic
- 2) In operations research, the _____ are prepared for situations.

a) mathematical models	b) physical models diagrammatic
c) diagrammatic models	d) None of above
- 3) Operations management can be defined as the application of _____ to a problem within a system to yield the optimal solution.

a) Suitable manpower	b) mathematical techniques, models, and tools
c) Financial operations	d) None of above
- 4) OR can evaluate only the effects of _____.

a) Personnel factors	b) Financial factors
c) Numeric and quantifiable factors	d) None of above
- 5) The objective function and constraints are functions of two types of variables, _____ variables and _____ variables.

a) Positive and negative	b) Controllable and uncontrollable
c) Strong and weak	d) None of the above
- 6) OR has a characteristic that it is done by a team of _____.

a) Scientists	b) Mathematicians
c) Academics	d) All the above

- 7) Which technique is used in finding a solution for optimizing a given objective, such as profit maximization or cost reduction under certain constraints?
- a) Queuing Theory
 - b) Waiting Line
 - c) Both a and b
 - d) Linear Programming
- 8) The Operations research technique which helps in minimizing total waiting and service costs is _____.
- a) Queuing Theory
 - b) Decision Theory
 - c) Both a and b
 - d) None of the above
- 9) In graphical representation the bounded region is known as _____ region.
- a) solution
 - b) basic solution
 - c) feasible solution
 - d) optimal
- 10) Graphical optimal value for Z can be obtained from _____.
- a) Corner points of feasible region
 - b) Corner points of the solution region
 - c) Both a and b
 - d) none of the above
- 11) In assignment problem of maximization, the objective is to maximize _____.
- a) Profit
 - b) Optimization
 - c) Cost
 - d) None of the above
- 12) With the transportation technique, the initial solution can be generated in any fashion one chooses. The only restriction is that _____.
- a) the edge constraints for supply and demand are satisfied
 - b) the solution is not degenerate
 - c) the solution must be optimal
 - d) one must use the northwest-corner method
- 13) _____ or _____ are used to "balance" an assignment or transportation problem.
- a) Destinations; sources
 - b) Units supplied; units demanded
 - c) Dummy rows; dummy columns
 - d) Large cost coefficients; small cost coefficients
- 14) The method of finding an initial solution based upon opportunity costs is called _____.
- a) the northwest corner rule
 - b) Vogel's approximation
 - c) Johansson's theorem
 - d) Flood's technique

Set **P**

Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING
Operations Research (BTN02712)

Day & Date: Monday, 20-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) Solve any two questions from each Section.
 2) Figures to right indicate full marks.
 3) Draw neat-labelled diagrams wherever necessary.

Section – I

- Q.2 a)** Evening shift resident doctors in a Govt. hospital work five consecutive days and then have two days off. Their five days of work can start on any day of the week and the schedule rotates indefinitely. The hospital requires the following minimum number of doctors working: **07**

Sunday	Monday	Tuesday	Wednesday	Thursday	Friday	Saturday
35	55	60	50	60	50	45

No more than 40 doctors can start their five working day's schedule on the same day. Formula the L.P. model to minimize the number of doctors to be employed by the hospital.

- b)** Solve by Graphical Method **07**
 Maximize $Z = 3x_1 + 4x_2$
 subject to $5x_1 + 4x_2 \leq 200$,
 $3x_1 + 5x_2 \leq 150$,
 $5x_1 + 4x_2 \geq 100$,
 $8x_1 + 4x_2 \geq 80$,
 $x_1, x_2 \geq 0$

- Q.3 a)** The captain of a cricket team has to allot five middle batting positions to five batsmen. The average runs scored by each batsman at these positions are as follows. **07**

TABLE 4.110

Batsman	Batting Position				
	I	II	III	IV	V
P	40	40	35	25	50
Q	42	30	16	25	27
R	50	48	40	60	50
S	20	19	20	18	25
T	58	60	59	55	53

Find the assignment of batsmen to positions which would give the maximum number of runs.

- b) Consider the problem of assigning five operators to five machines. The assignment costs are given below. 07

TABLE 4.130

		Operators				
		I	II	III	IV	V
Machines	A	10	5	13	15	16
	B	3	9	18	3	6
	C	10	7	2	2	2
	D	5	11	9	7	12
	E	7	9	10	4	12

Assign the operators to difference machines so that total cost is minimized.

- Q.4 a) Solve by NWCR method 07

		To				
		W ₁	W ₂	W ₃	W ₄	Supply
Factory	F ₁	14	25	45	5	6
	F ₂	65	25	35	55	8
	F ₃	35	3	65	15	16
Requirement		4	7	6	13	30 (Total)

- b) Find an initial basic feasible solution to the following transportation problem using Vogel's approximation method. 07

TABLE 3.232

		Warehouse				
		W ₁	W ₂	W ₃	W ₄	Capacity
Factory	F ₁	19	30	50	10	7
	F ₂	70	30	40	60	9
	F ₃	40	8	70	20	18
Requirement		5	8	7	14	34 (Total)

Section – II

- Q.5 a) A machine operator has to perform two operations, turning and threading, on a number of different jobs. The time required to perform these operations (in minutes) for each job is known. Determine the order in which jobs should be processed in order to minimize the total time required to turn out all the jobs. 07

Job	Time for turning (minutes)	Time for threading (minutes)
1	3	8
2	12	10
3	5	9
4	2	6
5	9	3
6	11	1

Also find the total processing time and idle times for turning and threading operations.

- b)** The milk plant at a city distributes its products by trucks, loaded at the loading dock. It has its own fleet of trucks plus trucks of a private transport company. This transport company has complained that sometime its trucks have to wait in line and thus the company loses money paid for a truck and driver that is only waiting. The company has asked the milk plant management either to go in for a second loading dock or discount prices equivalent to the waiting time. The following data are available:
 Average arrival rate (all trucks) = 3 per hour,
 Average service rate = 4 per hour
 The transport company has provided 40% of the total number of trucks.
 Assuming the rates are random according to Poisson distribution, determine.
- i) The probability that a truck has to wait
 - ii) The waiting time of a truck that waits
 - iii) The expected waiting time of company trucks per day

Q.6 a) Find critical path **07**

Task:	A	B	C	D	E	F	G	H	I
Time:	8	10	8	10	16	17	18	14	9

- b)** The utility for a network are given below. Determine the total, free, independent and interfering floats and identify the critical path. **07**
- | | | | | | | | | | | |
|-----------|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|
| Activity: | 0-1 | 1-2 | 1-3 | 2-4 | 2-5 | 3-4 | 3-6 | 4-7 | 5-7 | 6-7 |
| Duration: | 2 | 8 | 10 | 6 | 3 | 3 | 7 | 5 | 2 | 8 |

- Q.7 Write short note on any three.** **14**
- a) Demand and supply
 - b) Types of costs
 - c) Interest Types
 - d) Cash flow diagram
 - e) Introduction to inflations

Seat No.

Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING
Operations Research (BTN02712)

Day & Date: Monday, 20-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No.3 (starting page of the Answer Book). Each question carry one mark.
 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 3) Figures to the right indicates full marks.
 4) Draw neat-labelled diagrams wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options. 14

- 1) The Operations research technique which helps in minimizing total waiting and service costs is _____.
 - a) Queuing Theory
 - b) Decision Theory
 - c) Both a and b
 - d) None of the above
- 2) In graphical representation the bounded region is known as _____ region.
 - a) solution
 - b) basic solution
 - c) feasible solution
 - d) optimal
- 3) Graphical optimal value for Z can be obtained from _____.
 - a) Corner points of feasible region
 - b) Corner points of the solution region
 - c) Both a and b
 - d) none of the above
- 4) In assignment problem of maximization, the objective is to maximize _____.
 - a) Profit
 - b) Optimization
 - c) Cost
 - d) None of the above
- 5) With the transportation technique, the initial solution can be generated in any fashion one chooses. The only restriction is that _____.
 - a) the edge constraints for supply and demand are satisfied
 - b) the solution is not degenerate
 - c) the solution must be optimal
 - d) one must use the northwest-corner method
- 6) _____ or _____ are used to "balance" an assignment or transportation problem.
 - a) Destinations; sources
 - b) Units supplied; units demanded
 - c) Dummy rows; dummy columns
 - d) Large cost coefficients; small cost coefficients

- 7) The method of finding an initial solution based upon opportunity costs is called _____.
a) the northwest corner rule b) Vogel's approximation
c) Johansson's theorem d) Flood's technique
- 8) Operations research is the application of _____ methods to arrive at the optimal solutions to the problem.
a) economical b) scientific
c) a and b both d) artistic
- 9) In operations research, the _____ are prepared for situations.
a) mathematical models b) physical models diagrammatic
c) diagrammatic models d) None of above
- 10) Operations management can be defined as the application of _____ to a problem within a system to yield the optimal solution.
a) Suitable manpower
b) mathematical techniques, models, and tools
c) Financial operations
d) None of above
- 11) OR can evaluate only the effects of _____.
a) Personnel factors
b) Financial factors
c) Numeric and quantifiable factors
d) None of above
- 12) The objective function and constraints are functions of two types of variables, _____ variables and _____ variables.
a) Positive and negative
b) Controllable and uncontrollable
c) Strong and weak
d) None of the above
- 13) OR has a characteristic that it is done by a team of _____.
a) Scientists b) Mathematicians
c) Academics d) All the above
- 14) Which technique is used in finding a solution for optimizing a given objective, such as profit maximization or cost reduction under certain constraints?
a) Quailing Theory b) Waiting Line
c) Both a and b d) Linear Programming

Set **Q**

Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING
Operations Research (BTN02712)

Day & Date: Monday, 20-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) Solve any two questions from each Section.
 2) Figures to right indicate full marks.
 3) Draw neat-labelled diagrams wherever necessary.

Section – I

- Q.2 a)** Evening shift resident doctors in a Govt. hospital work five consecutive days and then have two days off. Their five days of work can start on any day of the week and the schedule rotates indefinitely. The hospital requires the following minimum number of doctors working: **07**

Sunday	Monday	Tuesday	Wednesday	Thursday	Friday	Saturday
35	55	60	50	60	50	45

No more than 40 doctors can start their five working day's schedule on the same day. Formulate the L.P. model to minimize the number of doctors to be employed by the hospital.

- b)** Solve by Graphical Method **07**
 Maximize $Z = 3x_1 + 4x_2$
 subject to $5x_1 + 4x_2 \leq 200$,
 $3x_1 + 5x_2 \leq 150$,
 $5x_1 + 4x_2 \geq 100$,
 $8x_1 + 4x_2 \geq 80$,
 $x_1, x_2 \geq 0$

- Q.3 a)** The captain of a cricket team has to allot five middle batting positions to five batsmen. The average runs scored by each batsman at these positions are as follows. **07**

TABLE 4.110

Batsman	Batting Position				
	I	II	III	IV	V
P	40	40	35	25	50
Q	42	30	16	25	27
R	50	48	40	60	50
S	20	19	20	18	25
T	58	60	59	55	53

Find the assignment of batsmen to positions which would give the maximum number of runs.

- b) Consider the problem of assigning five operators to five machines. The assignment costs are given below. 07

TABLE 4.130

		Operators				
		I	II	III	IV	V
Machines	A	10	5	13	15	16
	B	3	9	18	3	6
	C	10	7	2	2	2
	D	5	11	9	7	12
	E	7	9	10	4	12

Assign the operators to difference machines so that total cost is minimized.

- Q.4 a) Solve by NWCR method 07

		To				Supply
		W ₁	W ₂	W ₃	W ₄	
Factory	F ₁	14	25	45	5	6
	F ₂	65	25	35	55	8
	F ₃	35	3	65	15	16
Requirement		4	7	6	13	30 (Total)

- b) Find an initial basic feasible solution to the following transportation problem using Vogel's approximation method. 07

TABLE 3.232

		Warehouse				Capacity
		W ₁	W ₂	W ₃	W ₄	
Factory	F ₁	19	30	50	10	7
	F ₂	70	30	40	60	9
	F ₃	40	8	70	20	18
Requirement		5	8	7	14	34 (Total)

Section – II

- Q.5 a) A machine operator has to perform two operations, turning and threading, on a number of different jobs. The time required to perform these operations (in minutes) for each job is known. Determine the order in which jobs should be processed in order to minimize the total time required to turn out all the jobs. 07

Job	Time for turning (minutes)	Time for threading (minutes)
1	3	8
2	12	10
3	5	9
4	2	6
5	9	3
6	11	1

Also find the total processing time and idle times for turning and threading operations.

- b)** The milk plant at a city distributes its products by trucks, loaded at the loading dock. It has its own fleet of trucks plus trucks of a private transport company. This transport company has complained that sometime its trucks have to wait in line and thus the company loses money paid for a truck and driver that is only waiting. The company has asked the milk plant management either to go in for a second loading dock or discount prices equivalent to the waiting time. The following data are available:
 Average arrival rate (all trucks) = 3 per hour,
 Average service rate = 4 per hour
 The transport company has provided 40% of the total number of trucks.
 Assuming the rates are random according to Poisson distribution, determine.
- The probability that a truck has to wait
 - The waiting time of a truck that waits
 - The expected waiting time of company trucks per day

- Q.6 a)** Find critical path **07**

Task:	A	B	C	D	E	F	G	H	I
Time:	8	10	8	10	16	17	18	14	9

- b)** The utility for a network are given below. Determine the total, free, independent and interfering floats and identify the critical path. **07**

Activity:	0-1	1-2	1-3	2-4	2-5	3-4	3-6	4-7	5-7	6-7
Duration:	2	8	10	6	3	3	7	5	2	8

- Q.7 Write short note on any three.** **14**

- Demand and supply
- Types of costs
- Interest Types
- Cash flow diagram
- Introduction to inflations

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options. 14

- 1) OR has a characteristic that it is done by a team of _____.
a) Scientists
b) Mathematicians
c) Academics
d) All the above
- 2) Which technique is used in finding a solution for optimizing a given objective, such as profit maximization or cost reduction under certain constraints?
a) Quailing Theory
b) Waiting Line
c) Both a and b
d) Linear Programming
- 3) The Operations research technique which helps in minimizing total waiting and service costs is _____.
a) Queuing Theory
b) Decision Theory
c) Both a and b
d) None of the above
- 4) In graphical representation the bounded region is known as _____ region.
a) solution
b) basic solution
c) feasible solution
d) optimal
- 5) Graphical optimal value for Z can be obtained from _____.
a) Corner points of feasible region
b) Corner points of the solution region
c) Both a and b
d) none of the above
- 6) In assignment problem of maximization, the objective is to maximize _____.
a) Profit
b) Optimization
c) Cost
d) None of the above
- 7) With the transportation technique, the initial solution can be generated in any fashion one chooses. The only restriction is that _____.
a) the edge constraints for supply and demand are satisfied
b) the solution is not degenerate
c) the solution must be optimal
d) one must use the northwest-corner method

- 8) _____ or _____ are used to "balance" an assignment or transportation problem.
- a) Destinations; sources
 - b) Units supplied; units demanded
 - c) Dummy rows; dummy columns
 - d) Large cost coefficients; small cost coefficients
- 9) The method of finding an initial solution based upon opportunity costs is called _____.
- a) the northwest corner rule
 - b) Vogel's approximation
 - c) Johansson's theorem
 - d) Flood's technique
- 10) Operations research is the application of _____ methods to arrive at the optimal solutions to the problem.
- a) economical
 - b) scientific
 - c) a and b both
 - d) artistic
- 11) In operations research, the _____ are prepared for situations.
- a) mathematical models
 - b) physical models diagrammatic
 - c) diagrammatic models
 - d) None of above
- 12) Operations management can be defined as the application of _____ to a problem within a system to yield the optimal solution.
- a) Suitable manpower
 - b) mathematical techniques, models, and tools
 - c) Financial operations
 - d) None of above
- 13) OR can evaluate only the effects of _____.
- a) Personnel factors
 - b) Financial factors
 - c) Numeric and quantifiable factors
 - d) None of above
- 14) The objective function and constraints are functions of two types of variables, _____ variables and _____ variables.
- a) Positive and negative
 - b) Controllable and uncontrollable
 - c) Strong and weak
 - d) None of the above

Seat No.	
----------	--

Set **S**

Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING
Operations Research (BTN02712)

Day & Date: Monday, 20-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) Solve any two questions from each Section.
 2) Figures to right indicate full marks.
 3) Draw neat-labelled diagrams wherever necessary.

Section – I

- Q.2 a)** Evening shift resident doctors in a Govt. hospital work five consecutive days and then have two days off. Their five days of work can start on any day of the week and the schedule rotates indefinitely. The hospital requires the following minimum number of doctors working: **07**

Sunday	Monday	Tuesday	Wednesday	Thursday	Friday	Saturday
35	55	60	50	60	50	45

No more than 40 doctors can start their five working day's schedule on the same day. Formula the L.P. model to minimize the number of doctors to be employed by the hospital.

- b)** Solve by Graphical Method **07**
 Maximize $Z = 3x_1 + 4x_2$
 subject to $5x_1 + 4x_2 \leq 200$,
 $3x_1 + 5x_2 \leq 150$,
 $5x_1 + 4x_2 \geq 100$,
 $8x_1 + 4x_2 \geq 80$,
 $x_1, x_2 \geq 0$

- Q.3 a)** The captain of a cricket team has to allot five middle batting positions to five batsmen. The average runs scored by each batsman at these positions are as follows. **07**

TABLE 4.110

Batsman	Batting Position				
	I	II	III	IV	V
P	40	40	35	25	50
Q	42	30	16	25	27
R	50	48	40	60	50
S	20	19	20	18	25
T	58	60	59	55	53

Find the assignment of batsmen to positions which would give the maximum number of runs.

- b) Consider the problem of assigning five operators to five machines. The assignment costs are given below. 07

TABLE 4.130

		Operators				
		I	II	III	IV	V
Machines	A	10	5	13	15	16
	B	3	9	18	3	6
	C	10	7	2	2	2
	D	5	11	9	7	12
	E	7	9	10	4	12

Assign the operators to difference machines so that total cost is minimized.

- Q.4 a) Solve by NWCR method 07

		To				Supply
		W ₁	W ₂	W ₃	W ₄	
Factory	F ₁	14	25	45	5	6
	F ₂	65	25	35	55	8
	F ₃	35	3	65	15	16
Requirement		4	7	6	13	30 (Total)

- b) Find an initial basic feasible solution to the following transportation problem using Vogel's approximation method. 07

TABLE 3.232

		Warehouse				Capacity
		W ₁	W ₂	W ₃	W ₄	
Factory	F ₁	19	30	50	10	7
	F ₂	70	30	40	60	9
	F ₃	40	8	70	20	18
Requirement		5	8	7	14	34 (Total)

Section – II

- Q.5 a) A machine operator has to perform two operations, turning and threading, on a number of different jobs. The time required to perform these operations (in minutes) for each job is known. Determine the order in which jobs should be processed in order to minimize the total time required to turn out all the jobs. 07

Job	Time for turning (minutes)	Time for threading (minutes)
1	3	8
2	12	10
3	5	9
4	2	6
5	9	3
6	11	1

Also find the total processing time and idle times for turning and threading operations.

- b)** The milk plant at a city distributes its products by trucks, loaded at the loading dock. It has its own fleet of trucks plus trucks of a private transport company. This transport company has complained that sometime its trucks have to wait in line and thus the company loses money paid for a truck and driver that is only waiting. The company has asked the milk plant management either to go in for a second loading dock or discount prices equivalent to the waiting time. The following data are available:
 Average arrival rate (all trucks) = 3 per hour,
 Average service rate = 4 per hour
 The transport company has provided 40% of the total number of trucks.
 Assuming the rates are random according to Poisson distribution, determine.
- The probability that a truck has to wait
 - The waiting time of a truck that waits
 - The expected waiting time of company trucks per day
- Q.6 a)** Find critical path **07**
- | | | | | | | | | | |
|-------|---|----|---|----|----|----|----|----|---|
| Task: | A | B | C | D | E | F | G | H | I |
| Time: | 8 | 10 | 8 | 10 | 16 | 17 | 18 | 14 | 9 |
- b)** The utility for a network are given below. Determine the total, free, independent and interfering floats and identify the critical path. **07**
- | | | | | | | | | | | |
|-----------|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|
| Activity: | 0-1 | 1-2 | 1-3 | 2-4 | 2-5 | 3-4 | 3-6 | 4-7 | 5-7 | 6-7 |
| Duration: | 2 | 8 | 10 | 6 | 3 | 3 | 7 | 5 | 2 | 8 |
- Q.7 Write short note on any three.** **14**
- Demand and supply
 - Types of costs
 - Interest Types
 - Cash flow diagram
 - Introduction to inflations

Seat No.

Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING
Research Methodology (BTN02713)

Day & Date: Monday, 20-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.
- 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
- 3) Figures to the right indicates full marks.
- 4) Draw neat-labelled diagrams wherever necessary.
- 5) Use of log table and calculators is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options.

14

- 1) What is the main role of research in education?
 - a) To upsurge one's social status
 - b) To increase one's job prospects
 - c) To augment one's personal growth
 - d) To help an applicant in becoming a renowned educationalist
- 2) Which of the following features are considered as critical in qualitative research?
 - a) Collecting data with the help of standardized research tools
 - b) Design sampling with probability sample techniques
 - c) Collecting data with bottom-up empirical evidence
 - d) Gathering data with top-down schematic evidence
- 3) How is random sampling helpful?
 - a) Reasonably accurate
 - b) An economical method of data collection
 - c) Free from personal biases
 - d) All the above
- 4) To pursue the research, which of the following is priorly required?
 - a) Developing a research design
 - b) Formulating a research question
 - c) Deciding about the data analysis procedure
 - d) Formulating a research hypothesis
- 5) The format of thesis writing is the same as in _____.
 - a) Writing of Seminar representation
 - b) Preparation of research paper/article
 - c) A research dissertation
 - d) Presenting a workshop/conference paper

- 6) Research and Development become the index of development of the country. Which of the following reasons are true with regards to this statement?
- R&D targets human development
 - R&D can enhance people's standard of living in the country
 - R&D reflects the actual economic and social conditions being prevailed in the country
 - All the above
- 7) Which of the following does not correspond to characteristics of research?
- Research is not passive
 - Research is systematic
 - Research is not a problem-oriented
 - Research is not a process
- 8) Which of the following options are the main tasks of research in modern society?
- To learn new things
 - To keep pace with the advancement in knowledge
 - To systematically examine and critically analyse the investigations / sources with the objective
 - All the above
- 9) How to judge the depth of any research?
- By research title
 - By research duration
 - By research objectives
 - By total expenditure on research
- 10) Which of the following is not the method of Research?
- Survey
 - Historical
 - Observation
 - Philosophical
- 11) What are the core elements of a dissertation?
- Introduction; Data Collection; Data Analysis; Conclusions and Recommendations
 - Executive Summary; Literature Review; Data Gathered; Conclusions; Bibliography
 - Research Plan; Research Data; Analysis; References
 - Introduction; Literature Review; Research Methodology; Results; Discussions and Conclusions
- 12) What is the use of Factorial Analysis?
- For setting the hypotheses
 - To understand the difference between two variables
 - To understand the relationship between two variables
 - To understand the difference between various variables
- 13) The F-test:
- Is essentially a two-tailed test
 - Is essentially a one-tailed test
 - Can be one-tailed as well as two-tailed depending on the hypotheses
 - Can never be one tailed test
- 14) How can we enhance the research objective?
- By making it more valid
 - By making it more reliable
 - By making it more impartial
 - All the above

Seat No.

Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING
Research Methodology (BTN02713)

Day & Date: Monday, 20-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) Question no. 3 is compulsory in section I, and solve any two questions from the remaining. (Q. No. 2, 4 & 5)
 2) Question no. 6 is compulsory in section II, and solve any two questions from the remaining. (Q. No. 7, 8 & 9)
 3) Figures to the right indicate full marks.
 4) Draw neat-labelled diagrams wherever necessary.
 5) Use of log table and calculators is allowed.

Section – I

- | | | | |
|------------|--------------------------------------|--------------------------------------------------------|-----------|
| Q.2 | a) | Explain Selection and formulation of Research Problem. | 05 |
| | b) | Explain Design Motivation and objectives | 04 |
| Q.3 | a) | Explain Critical literature review. | 05 |
| | b) | Explain Case Study method. | 05 |
| Q.4 | a) | Explain Sampling method and Questionnaire. | 05 |
| | b) | Explain Delphi method and Brainstorming Techniques. | 04 |
| Q.5 | Write short note on any three | | 09 |
| | a) | Importance and Objectives | |
| | b) | Types of Research | |
| | c) | Importance of literature review | |
| | d) | Primary and secondary sources in literature review | |
| | e) | Interview method and Focus Group discussion | |

Section – II

- | | | | |
|------------|--------------------------------------|------------------------------------------------------------------|-----------|
| Q.6 | a) | Explain Developing a research plan. | 05 |
| | b) | Explain Laws and Theories in research design. | 05 |
| Q.7 | a) | Explain in detail diagrammatic & graphical presentation of data. | 05 |
| | b) | Define mean, median, mode, variance, and deviation. | 04 |
| Q.8 | a) | Explain regression analysis. | 05 |
| | b) | Explain Research proposal. | 04 |
| Q.9 | Write short note on any three | | 09 |
| | a) | Basic Principles & Need of research design | |
| | b) | Any two types of research designs | |
| | c) | Collection of data | |
| | d) | Types of report | |
| | e) | Structure and components of scientific reports | |

- Introduction; Data Collection; Data Analysis; Conclusions and Recommendations
 - Executive Summary; Literature Review; Data Gathered; Conclusions; Bibliography
 - Research Plan; Research Data; Analysis; References
 - Introduction; Literature Review; Research Methodology; Results; Discussions and Conclusions
- 7) What is the use of Factorial Analysis?
- For setting the hypotheses
 - To understand the difference between two variables
 - To understand the relationship between two variables
 - To understand the difference between various variables
- 8) The F-test:
- Is essentially a two-tailed test
 - Is essentially a one-tailed test
 - Can be one-tailed as well as two-tailed depending on the hypotheses
 - Can never be one tailed test
- 9) How can we enhance the research objective?
- By making it more valid
 - By making it more reliable
 - By making it more impartial
 - All the above
- 10) What is the main role of research in education?
- To upsurge one's social status
 - To increase one's job prospects
 - To augment one's personal growth
 - To help an applicant in becoming a renowned educationalist
- 11) Which of the following features are considered as critical in qualitative research?
- Collecting data with the help of standardized research tools
 - Design sampling with probability sample techniques
 - Collecting data with bottom-up empirical evidence
 - Gathering data with top-down schematic evidence
- 12) How is random sampling helpful?
- Reasonably accurate
 - An economical method of data collection
 - Free from personal biases
 - All the above
- 13) To pursue the research, which of the following is priorly required?
- Developing a research design
 - Formulating a research question
 - Deciding about the data analysis procedure
 - Formulating a research hypothesis
- 14) The format of thesis writing is the same as in ____.
- Writing of Seminar representation
 - Preparation of research paper/article
 - A research dissertation
 - Presenting a workshop/conference paper

Set **S**

Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING
Research Methodology (BTN02713)

Day & Date: Monday, 20-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) Question no. 3 is compulsory in section I, and solve any two questions from the remaining. (Q. No. 2, 4 & 5)
 2) Question no. 6 is compulsory in section II, and solve any two questions from the remaining. (Q. No. 7, 8 & 9)
 3) Figures to the right indicate full marks.
 4) Draw neat-labelled diagrams wherever necessary.
 5) Use of log table and calculators is allowed.

Section – I

- | | | | |
|------------|--------------------------------------|--------------------------------------------------------|-----------|
| Q.2 | a) | Explain Selection and formulation of Research Problem. | 05 |
| | b) | Explain Design Motivation and objectives | 04 |
| Q.3 | a) | Explain Critical literature review. | 05 |
| | b) | Explain Case Study method. | 05 |
| Q.4 | a) | Explain Sampling method and Questionnaire. | 05 |
| | b) | Explain Delphi method and Brainstorming Techniques. | 04 |
| Q.5 | Write short note on any three | | 09 |
| | a) | Importance and Objectives | |
| | b) | Types of Research | |
| | c) | Importance of literature review | |
| | d) | Primary and secondary sources in literature review | |
| | e) | Interview method and Focus Group discussion | |

Section – II

- | | | | |
|------------|--------------------------------------|------------------------------------------------------------------|-----------|
| Q.6 | a) | Explain Developing a research plan. | 05 |
| | b) | Explain Laws and Theories in research design. | 05 |
| Q.7 | a) | Explain in detail diagrammatic & graphical presentation of data. | 05 |
| | b) | Define mean, median, mode, variance, and deviation. | 04 |
| Q.8 | a) | Explain regression analysis. | 05 |
| | b) | Explain Research proposal. | 04 |
| Q.9 | Write short note on any three | | 09 |
| | a) | Basic Principles & Need of research design | |
| | b) | Any two types of research designs | |
| | c) | Collection of data | |
| | d) | Types of report | |
| | e) | Structure and components of scientific reports | |

Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING
Supply Chain Management (BTN02714)

Day & Date: Monday, 20-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:**
- 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No.3 (starting page of the Answer Book). Each question carry one mark.
 - 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 - 3) Figures to the right indicates full marks.
 - 4) Make suitable assumptions wherever necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options.

14

- 1) Which of the following is not a key driver of Supply Chain Management?
 - a) Cost Efficiency
 - b) Customer Satisfaction
 - c) Inventory Management
 - d) Centralized Decision Making
- 2) What is the primary focus of the Cycle View of Supply Chain Management?
 - a) Optimizing individual processes within the supply chain
 - b) Managing relationships with suppliers and customers
 - c) Understanding the flow of materials and information within the supply chain
 - d) Identifying and mitigating risks in the supply chain
- 3) What is the primary importance of coordination in a supply chain?
 - a) Reducing costs
 - b) Increasing inventory levels
 - c) Improving customer satisfaction
 - d) Decreasing production efficiency
- 4) The Bullwhip Effect in supply chain management refers to _____.
 - a) A sudden decrease in demand at the retail level
 - b) An increase in inventory levels throughout the supply chain
 - c) Small fluctuations in demand being magnified as they move upstream in the supply chain
 - d) Smooth and consistent flow of goods and services
- 5) What strategies can be employed to achieve coordination in a supply chain?
 - a) Centralized decision-making
 - b) Lack of information sharing
 - c) Independent actions by each member
 - d) Collaboration and information sharing among supply chain partners

- 6) What is a key consideration in developing a global supply chain strategy?
- a) Standardization of processes across all regions.
 - b) Ignoring cultural differences among global partners.
 - c) Flexibility to adapt to local market conditions.
 - d) Relying solely on domestic suppliers.
- 7) Forecasting models in inventory management are used for: _____.
- a) Estimating demand for products
 - b) Optimizing production schedules
 - c) Managing transportation routes
 - d) Tracking inventory turnover rates
- 8) Lead time in inventory management refers to: _____.
- a) The time it takes for a product to be manufactured
 - b) The time it takes for an order to be delivered after it's placed
 - c) The time it takes for a product to be sold after it's produced
 - d) The time it takes for a product to reach its expiration date
- 9) Which of the following is a symptom of poor inventory management?
- a) High turnover rate
 - b) Increased customer satisfaction
 - c) Excessive stock outs
 - d) Efficient order fulfillment
- 10) Which of the following is not a dimension of performance metrics in supply chain management?
- a) Cost
 - b) Speed
 - c) Customer satisfaction
 - d) Quantity
- 11) Measuring logistics cost and performance involves assessing which of the following aspects?
- a) Transportation costs
 - b) Inventory carrying costs
 - c) Warehousing costs
 - d) All of the above
- 12) Benchmarking the supply chain involves comparing performance metrics with: _____.
- a) Industry standards
 - b) Competitor's performance
 - c) Internal historical data
 - d) All of the above
- 13) What is a primary focus of recent trends in supply chain management?
- a) Cost reduction
 - b) Quality improvement
 - c) Both a and b
 - d) None of the above
- 14) Co-Maker ship refers to _____.
- a) Shared responsibility among supply chain partners
 - b) Sole responsibility of one partner in the supply chain
 - c) Ignoring responsibilities in the supply chain
 - d) None of the above

Finite Element Method (BTN02715)

Day & Date: Monday, 20-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No.1 is compulsory and should be solved in first 30 minutes in Answer Book Page No.3 (starting page of the Answer Book). Each question carry one mark.
 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 3) Figures to the right indicates full marks.
 4) Use of non-programmable scientific calculator is allowed.
 5) Assume suitable data if necessary

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Select the correct alternative.

14

- 1) Shape function is usually _____.
 - a) The coefficient that appears in the interpolation polynomial
 - b) Written for each individual node of finite element
 - c) Interchanged with the terminology interpolation polynomial
 - d) All of the above
- 2) If element size is reduced, number of elements _____.
 - a) increases
 - b) decreases
 - c) remains constant
 - d) gets deleted
- 3) The loading, constraints and other external effects applied to a model is _____.
 - a) Boundary conditions
 - b) Meshing
 - c) Constraining
 - d) Modeling
- 4) Preprocessing means _____.
 - a) Solving
 - b) Meshing
 - c) Result analysis
 - d) None of the above
- 5) Sum of all the natural coordinates of the node is _____.
 - a) One
 - b) Zero
 - c) Can not be predicted
 - d) none of the above
- 6) The interpolation function for a CST element is given by _____.
 - a) $U = a_1 + a_2x + a_3y$
 - b) $U = a_1 + a_2x + a_3x^2$
 - c) $U = a_1 + a_2x + a_3x^2 + a_4y$
 - d) $U = a_1 + a_2x + a_3y + a_4z$
- 7) Complex elements are defined as those elements which _____.
 - a) have higher order interpolation polynomials
 - b) have sides parallel to coordinate system
 - c) have sides parallel to coordinate system and use higher order interpolation polynomials
 - d) have polynomials with only linear and constant terms

Seat
No.

Fourth Y. (B.Tech.)(Sem - I) (New) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING
Finite Element Method (BTN02715)

Day & Date: Monday, 20-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) Answer any two questions from Section I and Section II.
 2) Figures to right indicate full marks.
 3) Use of non-programmable scientific calculator is allowed.
 4) Assume suitable data if necessary and mention it clearly.

Section – I

- Q.2 a)** Obtain solution of differential equation by using Galerkin's method. **07**

$$\frac{\partial^2 u}{\partial x^2} + u - x^2 = 0, \quad 0 \leq x \leq 1$$

Take boundary conditions as $u(0) = 0, \frac{du}{dx}(1) = 1$

- b)** Explain Simplex, Complex and Multiplex elements. **07**

- Q.3 a)** Find nodal displacement in stepped bar as shown in figure 1. **07**

Take $A_1 = 20 \text{ mm}^2, A_2 = 10 \text{ mm}^2$

$L_1 = L_2 = 100 \text{ mm}, E_1 = E_2 = 200 \times 10^3 \text{ MPa}$

Figure 1:

- b)** Explain discretization in FEM with suitable example and also brief p-refinement and h-refinement. **07**

Q.4 Attempt the following.

- a)** Prove from first principle that the displacement through 1-D pin jointed bar element with linear variation of displacement can be expressed as **06**

$u = N_i u_i + N_j u_j$ where $N_i = \frac{(x_j - x)}{L}, N_j = \frac{(x - x_i)}{L}$. Plot shape functions at node i and j

- b)** What are the properties of Stiffness matrix? Explain. **04**
c) Write a note interpolation functions. **04**

Section – II

- Q.5 a)** Calculate the value of field variable at the point $A(2.5, 2.5)$, which is located inside the triangle as shown in figure 2. **07**
 The nodal values for field variable are $U_i = 3.5, U_j = 2.2$ and $U_k = 4.4$

Figure 2:

- b)** Explain static analysis and modal analysis. **07**
- Q.6 a)** Solve the following problem for all unknowns. Impose the boundary conditions using the penalty method. Refer figure 3. **12**
 $A_1 = 900 \text{ mm}^2, A_2 = 400 \text{ mm}^2, A_3 = 200 \text{ mm}^2$
 $L_1 = 80 \text{ mm}, L_2 = 80 \text{ mm}, L_3 = 70 \text{ mm}$
 $E_1 = 70 \text{ GPa}, E_2 = 105 \text{ GPa}, E_3 = 200 \text{ GPa}$

Figure 3:

- b)** What are isoperimetric elements? **02**
- Q.7 Write a short note on (Any Three)** **14**
- Dynamic problems
 - Size and number of elements
 - Harmonic analysis
 - Axisymmetric problems and axisymmetric elements

Seat No.

Day & Date: Monday, 20-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No.1 is compulsory and should be solved in first 30 minutes in Answer Book Page No.3 (starting page of the Answer Book). Each question carry one mark.
 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 3) Figures to the right indicates full marks.
 4) Use of non-programmable scientific calculator is allowed.
 5) Assume suitable data if necessary

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Select the correct alternative.

14

- 1) Formula for Galerkin method is _____.
 - a) $\int f(x)R(x)dx = 0$
 - b) $\int R(x)dx = 0$
 - c) $R(x) = 0$
 - d) $\int R^2(x)dx = 0$
- 2) A measure of distortion of a element is _____.
 - a) Bandwidth
 - b) Damping ratio
 - c) Aspect ratio
 - d) Shape function
- 3) A problem which is not a function of a time _____.
 - a) Eigenvalue problem
 - b) Steady state problem
 - c) Transient problem
 - d) Propagation problem
- 4) The three most common cases on non-linearity are _____.
 - a) Fluttering, Geometric, Material
 - b) Material, Geometric, Contact
 - c) Material, Fluttering, plasticity
 - d) Creep, Fluttering, Contact
- 5) Shape function is usually _____.
 - a) The coefficient that appears in the interpolation polynomial
 - b) Written for each individual node of finite element
 - c) Interchanged with the terminology interpolation polynomial
 - d) All of the above
- 6) If element size is reduced, number of elements _____.
 - a) increases
 - b) decreases
 - c) remains constant
 - d) gets deleted
- 7) The loading, constraints and other external effects applied to a model is _____.
 - a) Boundary conditions
 - b) Meshing
 - c) Constraining
 - d) Modeling
- 8) Preprocessing means _____.
 - a) Solving
 - b) Meshing

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Select the correct alternative.

14

- 1) The interpolation function for a CST element is given by _____.
 a) $U = a_1 + a_2x + a_3y$ b) $U = a_1 + a_2x + a_3x^2$
 c) $U = a_1 + a_2x + a_3x^2 + a_4y$ d) $U = a_1 + a_2x + a_3y + a_4z$
- 2) Complex elements are defined as those elements which _____.
 a) have higher order interpolation polynomials
 b) have sides parallel to coordinate system
 c) have sides parallel to coordinate system and use higher order interpolation polynomials
 d) have polynomials with only linear and constant terms
- 3) Each node of beam element is having following degree of freedom _____.
 a) 3 b) 4
 c) 2 d) 1
- 4) In _____ element the value of field variable remains unchanged in the circumferential direction.
 a) 1D and 2D b) Beam
 c) Truss d) Axisymmetric
- 5) Size of shape function matrix of 2D element having 3 nodes is _____.
 a) 2×6 b) 3×3
 c) 4×6 d) 2×5
- 6) Formula for Galerkin method is _____.
 a) $\int f(x)R(x)dx = 0$ b) $\int R(x)dx = 0$
 c) $R(x) = 0$ d) $\int R^2(x)dx = 0$
- 7) A measure of distortion of a element is _____.
 a) Bandwidth b) Damping ratio
 c) Aspect ratio d) Shape function

- 8) A problem which is not a function of a time _____.
a) Eigenvalue problem b) Steady state problem
c) Transient problem d) Propagation problem
- 9) The three most common cases on non-linearity are _____.
a) Fluttering, Geometric, Material b) Material, Geometric, Contact
c) Material, Fluttering, plasticity d) Creep, Fluttering, Contact
- 10) Shape function is usually _____.
a) The coefficient that appears in the interpolation polynomial
b) Written for each individual node of finite element
c) Interchanged with the terminology interpolation polynomial

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct answer:

14

- 1) In vapour compression cycle, the expansion valve is fitted between:
 - a) compressor and condenser
 - b) evaporator and compressor
 - c) condenser and evaporator
 - d) not used in the cycle
- 2) The highest temperature during the cycle in vapour compression refrigeration system occurs after _____.
 - a) Compression
 - b) Condensation
 - c) Expansion
 - d) evaporation
- 3) The subcooling is a process of cooling the refrigerant in vapour compression system _____.
 - a) before compression
 - b) after compression
 - c) before throttling
 - d) after throttling
- 4) The temperature limits of Carnot Refrigerator are 318 K and 263 K, then the Carnot COP is: _____.
 - a) 2.7
 - b) 3.7
 - c) 4.78
 - d) 5.78
- 5) When different temperatures are to be maintained at different points, _____ evaporator systems are used.
 - a) Single
 - b) Multiple
- 6) The fluids used in the Electrolux refrigerator are _____.
 - a) water and hydrogen
 - b) ammonia and hydrogen
 - c) ammonia, water and hydrogen
 - d) None of these
- 7) The refrigerant commonly used in vapour absorption system is _____.
 - a) Water
 - b) Ammonia
 - c) R-12
 - d) Sulphur dioxide

Day & Date: Wednesday, 15-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) Solve Any Two questions from each section.
2) Figures to right indicate full marks.
3) Use of non-programmable calculator, stream tables, psychrometric chart is allowed.
4) Assume suitable data wherever necessary.

Section – I

- Q.2 a)** A refrigeration machine using R12 as refrigerant operates between the pressures 2.5 bar and 9 bar. Compression is isentropic and there is no under-cooling in the condenser. The vapour is dry saturated at the beginning of compression. Calculate i) Theoretical COP of the plant, If the actual COP is 0.65 of theoretical value, Calculate the net cooling produced in Ton of refrigeration. The refrigerant flow rate is 5 Kg per minute. Use the following property table for R12. **08**

Pressure (bar)	Saturation Temperature (°C)	hf (kJ/kg)	hg (kJ/kg)	sg (kJ/kgK)
9.0	36	70.55	201.8	0.6836
2.5	-7	29.62	184.5	0.7001

Take Cp of superated vapour = 0.64 kJ/kgK.

- b)** Explain the effect of Suction vapour superheating and subcooling of refrigerant on performance of vapour compression cycle with help of p-h plot. **06**
- Q.3 a)** Describe a refrigeration system using two stage compression with intercooling and flash gas removal serving one low temperature evaporator. Draw the sketch and show cycle on p-h diagram. **05**
- b)** Explain the thermodynamic properties of refrigerants. **05**
- c)** Explain the effect of CFCs on ozone depletion. **04**
- Q.4 a)** Derive an expression for COP of ideal vapour absorption system. **05**
- b)** Explain Linde system for liquefaction of air. **05**
- c)** Write a note on applications of cryogenics. **04**

Section – II

- Q.5 a)** On a particular day the weather forecast states that the dry bulb temperature is 37°C while the relative humidity is 50% and the barometric pressure is 101.325 KPa. Find the humidity ratio, dew point temperature and enthalpy of moist air on this day. **08**
- b)** With the help of neat sketch describe the functioning of Air washer. Plot the processes which can be obtained with the help of air washer and explain them in brief. **06**

- Q.6**
- a) What are the sources of sensible heat and latent heat loads in an air-conditioned space. **05**
 - b) Derive the relation for equivalent diameter of rectangular duct for equal velocity of air flowing through both the ducts. **05**
 - c) What are the various factors affecting human comfort? **04**
- Q.7**
- a) For a hall to be air conditioned, following conditions are given: **08**
Outdoor condition: 40°C DBT, 20°C WBT
Required comfort condition: 20°C DBT, 60% RH
Seating Capacity of hall: 1500,
Amount of outdoor air supplied: 0.3 m³/min per person
If the required condition is achieved first by adiabatic humidification and then by cooling, Estimate
 - i) the capacity of cooling coil in tonnes
 - ii) the capacity of humidifier in Kg/hr
 - b) Explain with schematic diagram Linde system for liquefaction of air. **06**

- 8) In vapour compression cycle, the expansion valve is fitted between:
a) compressor and condenser b) evaporator and compressor
c) condenser and evaporator d) not used in the cycle
- 9) The highest temperature during the cycle in vapour compression refrigeration system occurs after _____.
a) Compression b) Condensation
c) Expansion d) evaporation
- 10) The subcooling is a process of cooling the refrigerant in vapour compression system _____.
a) before compression b) after compression
c) before throttling d) after throttling
- 11) The temperature limits of Carnot Refrigerator are 318 K and 263 K, then the Carnot COP is: _____.
a) 2.7 b) 3.7
c) 4.78 d) 5.78
- 12) When different temperatures are to be maintained at different points, _____ evaporator systems are used.
a) Single b) Multiple
- 13) The fluids used in the Electrolux refrigerator are _____.
a) water and hydrogen b) ammonia and hydrogen
c) ammonia, water and hydrogen d) None of these

Section – II

- Q.5 a)** On a particular day the weather forecast states that the dry bulb temperature is 37°C while the relative humidity is 50% and the barometric pressure is 101.325 KPa. Find the humidity ratio, dew point temperature and enthalpy of moist air on this day. **08**
- b)** With the help of neat sketch describe the functioning of Air washer. Plot the processes which can be obtained with the help of air washer and explain them in brief. **06**

- Q.6**
- a) What are the sources of sensible heat and latent heat loads in an air-conditioned space. **05**
 - b) Derive the relation for equivalent diameter of rectangular duct for equal velocity of air flowing through both the ducts. **05**
 - c) What are the various factors affecting human comfort? **04**
- Q.7**
- a) For a hall to be air conditioned, following conditions are given: **08**
Outdoor condition: 40°C DBT, 20°C WBT
Required comfort condition: 20°C DBT, 60% RH
Seating Capacity of hall: 1500,
Amount of outdoor air supplied: 0.3 m³/min per person
If the required condition is achieved first by adiabatic humidification and then by cooling, Estimate
 - i) the capacity of cooling coil in tonnes
 - ii) the capacity of humidifier in Kg/hr
 - b) Explain with schematic diagram Linde system for liquefaction of air. **06**

**Fourth Y. (B.Tech.) (Sem - I) (Old) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING**

Refrigeration and Air Conditioning (197041701)

Day & Date: Wednesday, 15-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No 3 (starting page of the Answer Book). Each question carry one mark.
2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
3) Use of non-programmable calculator, steam tables, psychrometric chart is allowed.
4) Figures to the right indicates full marks.
5) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct answer:

14

- 1) The index which correlates the combined effects of air temperature, relative humidity and air velocity on the human body is known as humidity _____.
a) mean radiant temperature b) effective temperature
c) dew point temperature d) none of these
- 2) The conditioned air supplied to the room must have capacity to take up _____.
a) sensible heat load only
b) latent heat load only
c) both sensible and latent heat loads
d) none of these
- 3) When outside air is introduced for ventilation purposes, there is _____.
a) sensible heat gain
b) latent heat gain
c) both sensible as well as latent heat gain
d) none of these
- 4) A duct is said to be low velocity duct if the velocity of air in the duct is upto _____.
a) 600 m/min b) 800 m/min
c) 1200 m/min d) 1600 m/min
- 5) In vapour compression cycle, the expansion valve is fitted between:
a) compressor and condenser b) evaporator and compressor
c) condenser and evaporator d) not used in the cycle
- 6) The highest temperature during the cycle in vapour compression refrigeration system occurs after _____.
a) Compression b) Condensation
c) Expansion d) evaporation

- 7) The subcooling is a process of cooling the refrigerant in vapour compression system _____.
a) before compression b) after compression
c) before throttling d) after throttling
- 8) The temperature limits of Carnot Refrigerator are 318 K and 263 K, then the Carnot COP is: _____.
a) 2.7 b) 3.7
c) 4.78 d) 5.78
- 9) When different temperatures are to be maintained at different points, _____ evaporator systems are used.
a) Single b) Multiple
- 10) The fluids used in the Electrolux refrigerator are _____.
a) water and hydrogen b) ammonia and hydrogen
c) ammonia, water and hydrogen d) None of these
- 11) The refrigerant commonly used in vapour absorption system is _____.
a) Water b) Ammonia
c) R-12 d) Sulphur dioxide
- 12) Which of the following is an azeotrope refrigerant _____.
a) R-11 b) R-40
c) R-717 d) R-502
- 13) The difference between DBT and WBT is called as _____.
a) dry bulb depression b) wet bulb depression
c) dew point depression d) degree of saturation
- 14) During sensible cooling of air, the specific humidity _____.
a) increases b) decreases
c) remains constant d) none of these

Refrigeration and Air Conditioning (197041701)

Day & Date: Wednesday, 15-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) Solve Any Two questions from each section.
2) Figures to right indicate full marks.
3) Use of non-programmable calculator, steam tables, psychrometric chart is allowed.
4) Assume suitable data wherever necessary.

Section – I

- Q.2 a)** A refrigeration machine using R12 as refrigerant operates between the pressures 2.5 bar and 9 bar. Compression is isentropic and there is no under-cooling in the condenser. The vapour is dry saturated at the beginning of compression. Calculate i) Theoretical COP of the plant, If the actual COP is 0.65 of theoretical value, Calculate the net cooling produced in Ton of refrigeration. The refrigerant flow rate is 5 Kg per minute. Use the following property table for R12. **08**

Pressure (bar)	Saturation Temperature (°C)	hf (kJ/kg)	hg (kJ/kg)	sg (kJ/kgK)
9.0	36	70.55	201.8	0.6836
2.5	-7	29.62	184.5	0.7001

Take Cp of superated vapour = 0.64 kJ/kgK.

- b)** Explain the effect of Suction vapour superheating and subcooling of refrigerant on performance of vapour compression cycle with help of p-h plot. **06**
- Q.3 a)** Describe a refrigeration system using two stage compression with intercooling and flash gas removal serving one low temperature evaporator. Draw the sketch and show cycle on p-h diagram. **05**
- b)** Explain the thermodynamic properties of refrigerants. **05**
- c)** Explain the effect of CFCs on ozone depletion. **04**
- Q.4 a)** Derive an expression for COP of ideal vapour absorption system. **05**
- b)** Explain Linde system for liquefaction of air. **05**
- c)** Write a note on applications of cryogenics. **04**

Section – II

- Q.5 a)** On a particular day the weather forecast states that the dry bulb temperature is 37°C while the relative humidity is 50% and the barometric pressure is 101.325 KPa. Find the humidity ratio, dew point temperature and enthalpy of moist air on this day. **08**

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Multiple choice questions.

14

- 1) What is the term for the angle between the vertical axis of the steering knuckle and a line drawn through the upper and lower ball joints of the suspension system?

a) Camber	b) Caster
c) King pin inclination	d) Toe-in
- 2) Which type of brake system uses friction to slow down or stop the vehicle by pressing brake shoes against the inside of a drum?

a) Disc brake	b) Hydraulic brake system
c) Air brake system	d) Internal expanding brake
- 3) Which type of drive system transmits power to the wheels through a set of gears, providing better traction and control on slippery surfaces?

a) Torque tube drive	b) Air suspension system
c) Hybrid drive	d) Solar drive
- 4) What is the purpose of an Electronic Control Unit (ECU) in modern automobiles?

a) To steer the vehicle	b) To control the lighting system
c) To regulate engine temperature	d) To manage various vehicle functions and optimize performance
- 5) How is the stopping distance of a vehicle affected when the dynamic weight transfer increases during braking?

a) Stopping distance decreases	b) Stopping distance remains the same
c) Stopping distance increases	d) It depends on the type of brake system
- 6) What is the primary factor contributing to rolling resistance in a vehicle?

a) Air pressure in the tires	b) Road surface conditions
c) Vehicle weight distribution	d) Engine power output

- 7) When calculating the grade ability of a vehicle, which of the following factors is most critical in determining its ability to climb steep slopes?
- a) Traction and tractive effort b) Tire pressure
c) Engine displacement d) Ambient temperature
- 8) Which type of automotive clutch is best suited for high-performance sports cars and racing applications, providing rapid gear changes without the need for a clutch pedal?
- a) Single plate clutch b) Multi-plate clutch
c) Centrifugal clutch d) Electromagnetic clutch
- 9) What is the formula to determine the gear ratio when selecting gears for a transmission system?
- a) Gear Ratio = Number of teeth on the input gear / Number of teeth on the output gear
b) Gear Ratio = Output speed / Input speed
c) Gear Ratio = Torque on the output shaft / Torque on the input shaft
d) Gear Ratio = Radius of the input gear / Radius of the output gear
- 10) In an air suspension system, what component is responsible for adjusting the vehicle's ride height and providing a smooth and comfortable ride?
- a) Electronic Control Unit (ECU) b) Air compressor
c) Fuel cell d) Solar panel
- 11) Which of the following is a common function of electronic control modules (ECMs) in modern vehicles?
- a) Monitoring fuel cell efficiency
b) Controlling solar panel deployment
c) Regulating engine performance and emissions
d) Managing hybrid vehicle charging
- 12) What is the primary factor used to classify automobiles into different categories based on their intended use and design?
- a) Color and aesthetics
b) Fuel efficiency
c) Passenger capacity and cargo space
d) Engine power output
- 13) When it comes to rear axle ratios, what does a higher numerical ratio typically result in?
- a) Improved fuel efficiency b) Greater acceleration
c) Enhanced steering control d) Increased tire longevity
- 14) In the context of automotive electrical components, which device is responsible for regulating the engine's operating temperature?
- a) Electric horn b) Electric fuel gauge
c) Thermostatic coil d) Electric Speedo meter

Set **P**

Fourth Y. (B.Tech.) (Sem - I) (Old) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING
Automobile Engineering (197041702)

Day & Date: Thursday, 16-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) Answer any two questions from each section.
 2) Figures to the right indicate full marks.
 3) Assume suitable data if necessary.
 4) Use of non-programmable calculator is allowed.

Section – I

- Q.2** a) Explain rear engine rear wheel drive with neat sketch and write its advantages and disadvantages. **06**
- b) Explain parameters considered to improve performance of automobile with necessary equations. **04**
- c) Explain electric horn with neat sketch. **04**
- Q.3** a) For the typical motor car, the road resistance is given by 23 N per 1000N the air resistance by the expression $0.0827v^2$. transmission efficiency is 88 % in top speed. Car weight is 19934N when fully loaded. Calculate: **10**
- 1) The bkw required for top speed of 144km/hr.
- 2) The acceleration in m/s^2 at 48 km/hr, assuming the torque at 48 km/hr in the top gear is 25% more than at 144 km/hr.
- 3) The bkw required to drive the car up a gradient of 1 in 5 at 48 km/hr transmission efficiency 80% in bottom gear. The resistance being in n and velocity speed in km/hr and g is acceleration due to gravity = $9/81 m/s^2$
- b) Explain selection of gear ratio and rear axle ratio. **04**
- Q.4** a) Why Propeller shaft is mounted in inclined position? Explain construction and working of differential gear box. **08**
- b) Explain Wiper & side indicator circuit Electric horn. **06**

Section – II

- Q.5** a) What are types of power steering? explain any one with neat sketch. **06**
- b) Explain importance of slip angle, condition of Under steer & over steer. **08**
- Q.6** a) Give calculation of breaking force, stopping distance and dynamic weight transfer. **08**
- b) Explain Disc break with neat sketch. **06**
- Q.7** a) Explain Hotch- kiss and Torque tube drive with neat sketch. **06**
- b) Enlist Sensors and actuators used in automobile controls. **04**
- c) Explain Reaction members in suspension system with neat sketch. **04**

a) Improved fuel efficiency	b) Greater acceleration
c) Enhanced steering control	d) Increased tire longevity

- 4) In the context of automotive electrical components, which device is responsible for regulating the engine's operating temperature?

a) Electric horn	b) Electric fuel gauge
c) Thermostatic coil	d) Electric Speedo meter

- 5) What is the term for the angle between the vertical axis of the steering knuckle and a line drawn through the upper and lower ball joints of the suspension system?

a) Camber	b) Caster
c) King pin inclination	d) Toe-in

- 6) Which type of brake system uses friction to slow down or stop the vehicle by pressing brake shoes against the inside of a drum?

a) Disc brake	b) Hydraulic brake system
c) Air brake system	d) Internal expanding brake

- 7) Which type of drive system transmits power to the wheels through a set of gears, providing better traction and control on slippery surfaces?
- a) Torque tube drive
 - b) Air suspension system
 - c) Hybrid drive
 - d) Solar drive
- 8) What is the purpose of an Electronic Control Unit (ECU) in modern automobiles?
- a) To steer the vehicle
 - b) To control the lighting system
 - c) To regulate engine temperature
 - d) To manage various vehicle functions and optimize performance
- 9) How is the stopping distance of a vehicle affected when the dynamic weight transfer increases during braking?
- a) Stopping distance decreases
 - b) Stopping distance remains the same
 - c) Stopping distance increases
 - d) It depends on the type of brake system
- 10) What is the primary factor contributing to rolling resistance in a vehicle?
- a) Air pressure in the tires
 - b) Road surface conditions
 - c) Vehicle weight distribution
 - d) Engine power output
- 11) When calculating the grade ability of a vehicle, which of the following factors is most critical in determining its ability to climb steep slopes?
- a) Traction and tractive effort
 - b) Tire pressure
 - c) Engine displacement
 - d) Ambient temperature
- 12) Which type of automotive clutch is best suited for high-performance sports cars and racing applications, providing rapid gear changes without the need for a clutch pedal?
- a) Single plate clutch
 - b) Multi-plate clutch
 - c) Centrifugal clutch
 - d) Electromagnetic clutch
- 13) What is the formula to determine the gear ratio when selecting gears for a transmission system?
- a) Gear Ratio = Number of teeth on the input gear / Number of teeth on the output gear
 - b) Gear Ratio = Output speed / Input speed
 - c) Gear Ratio = Torque on the output shaft / Torque on the input shaft
 - d) Gear Ratio = Radius of the input gear / Radius of the output gear
- 14) In an air suspension system, what component is responsible for adjusting the vehicle's ride height and providing a smooth and comfortable ride?
- a) Electronic Control Unit (ECU)
 - b) Air compressor
 - c) Fuel cell
 - d) Solar panel

Set **R**

Fourth Y. (B.Tech.) (Sem - I) (Old) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING
Automobile Engineering (197041702)

Day & Date: Thursday, 16-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) Answer any two questions from each section.
 2) Figures to the right indicate full marks.
 3) Assume suitable data if necessary.
 4) Use of non-programmable calculator is allowed.

Section – I

- Q.2** a) Explain rear engine rear wheel drive with neat sketch and write its advantages and disadvantages. **06**
 b) Explain parameters considered to improve performance of automobile with necessary equations. **04**
 c) Explain electric horn with neat sketch. **04**
- Q.3** a) For the typical motor car, the road resistance is given by 23 N per 1000N the air resistance by the expression $0.0827v^2$. transmission efficiency is 88 % in top speed. Car weight is 19934N when fully loaded. Calculate: **10**
 1) The bkw required for top speed of 144km/hr.
 2) The acceleration in m/s^2 at 48 km/hr, assuming the torque at 48 km/hr in the top gear is 25% more than at 144 km/hr.
 3) The bkw required to drive the car up a gradient of 1 in 5 at 48 km/hr transmission efficiency 80% in bottom gear. The resistance being in n and velocity speed in km/hr and g is acceleration due to gravity = $9/81 m/s^2$
 b) Explain selection of gear ratio and rear axle ratio. **04**
- Q.4** a) Why Propeller shaft is mounted in inclined position? Explain construction and working of differential gear box. **08**
 b) Explain Wiper & side indicator circuit Electric horn. **06**

Section – II

- Q.5** a) What are types of power steering? explain any one with neat sketch. **06**
 b) Explain importance of slip angle, condition of Under steer & over steer. **08**
- Q.6** a) Give calculation of breaking force, stopping distance and dynamic weight transfer. **08**
 b) Explain Disc break with neat sketch. **06**
- Q.7** a) Explain Hotch- kiss and Torque tube drive with neat sketch. **06**
 b) Enlist Sensors and actuators used in automobile controls. **04**
 c) Explain Reaction members in suspension system with neat sketch. **04**

Seat No.	
----------	--

Fourth Y. (B.Tech.) (Sem - I) (Old) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING
Automobile Engineering (197041702)

Day & Date: Thursday, 16-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:**
- 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no. 03 (Starting page of the Answer Book). Each question carries one mark.
 - 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 - 3) Figures to the right indicates full marks.
 - 4) Assume suitable data if necessary.
 - 5) Use of non-programmable calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Multiple choice questions.

14

- 1) What is the primary factor contributing to rolling resistance in a vehicle?
 - a) Air pressure in the tires
 - b) Road surface conditions
 - c) Vehicle weight distribution
 - d) Engine power output
- 2) When calculating the grade ability of a vehicle, which of the following factors is most critical in determining its ability to climb steep slopes?
 - a) Traction and tractive effort
 - b) Tire pressure
 - c) Engine displacement
 - d) Ambient temperature
- 3) Which type of automotive clutch is best suited for high-performance sports cars and racing applications, providing rapid gear changes without the need for a clutch pedal?
 - a) Single plate clutch
 - b) Multi-plate clutch
 - c) Centrifugal clutch
 - d) Electromagnetic clutch
- 4) What is the formula to determine the gear ratio when selecting gears for a transmission system?
 - a) Gear Ratio = Number of teeth on the input gear / Number of teeth on the output gear
 - b) Gear Ratio = Output speed / Input speed
 - c) Gear Ratio = Torque on the output shaft / Torque on the input shaft
 - d) Gear Ratio = Radius of the input gear / Radius of the output gear
- 5) In an air suspension system, what component is responsible for adjusting the vehicle's ride height and providing a smooth and comfortable ride?
 - a) Electronic Control Unit (ECU)
 - b) Air compressor
 - c) Fuel cell
 - d) Solar panel
- 6) Which of the following is a common function of electronic control modules (ECMs) in modern vehicles?
 - a) Monitoring fuel cell efficiency
 - b) Controlling solar panel deployment
 - c) Regulating engine performance and emissions
 - d) Managing hybrid vehicle charging

- 7) What is the primary factor used to classify automobiles into different categories based on their intended use and design?
- a) Color and aesthetics
 - b) Fuel efficiency
 - c) Passenger capacity and cargo space
 - d) Engine power output
- 8) When it comes to rear axle ratios, what does a higher numerical ratio typically result in?
- a) Improved fuel efficiency
 - b) Greater acceleration
 - c) Enhanced steering control
 - d) Increased tire longevity
- 9) In the context of automotive electrical components, which device is responsible for regulating the engine's operating temperature?
- a) Electric horn
 - b) Electric fuel gauge
 - c) Thermostatic coil
 - d) Electric Speedo meter
- 10) What is the term for the angle between the vertical axis of the steering knuckle and a line drawn through the upper and lower ball joints of the suspension system?
- a) Camber
 - b) Caster
 - c) King pin inclination
 - d) Toe-in
- 11) Which type of brake system uses friction to slow down or stop the vehicle by pressing brake shoes against the inside of a drum?
- a) Disc brake
 - b) Hydraulic brake system
 - c) Air brake system
 - d) Internal expanding brake
- 12) Which type of drive system transmits power to the wheels through a set of gears, providing better traction and control on slippery surfaces?
- a) Torque tube drive
 - b) Air suspension system
 - c) Hybrid drive
 - d) Solar drive
- 13) What is the purpose of an Electronic Control Unit (ECU) in modern automobiles?
- a) To steer the vehicle
 - b) To control the lighting system
 - c) To regulate engine temperature
 - d) To manage various vehicle functions and optimize performance
- 14) How is the stopping distance of a vehicle affected when the dynamic weight transfer increases during braking?
- a) Stopping distance decreases
 - b) Stopping distance remains the same
 - c) Stopping distance increases
 - d) It depends on the type of brake system

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Objective Questions.

14

- 1) Majority of the industrial robots used in welding are built in _____ configuration.
 - a) Cylindrical
 - b) Spherical
 - c) Jointed
 - d) SC ARA
- 2) Spot welding and Arc welding are the examples of _____.
 - a) Point-to-point tasks
 - b) Continuous path tasks
 - c) Point-to-point and continuous path tasks, respectively
 - d) Continuous path task and point-to-point tasks respectively
- 3) Robot grippers for industrial robots typically employ _____ actuators.
 - a) Pneumatic
 - b) Hydraulic
 - c) Magnetic
 - d) Electric
- 4) The principle of operation of LVDT is based on the principle of variation of _____.
 - a) Self-Inductance
 - b) Mutual Inductance
 - c) Reluctance
 - d) Mutual Reluctance
- 5) The configuration for which the Jacobian matrix does not have an inverse is called a _____ configuration.
 - a) Forward
 - b) Inverse
 - c) Singular
 - d) Redundant
- 6) The aim of trajectory planning is to _____.
 - a) Determine its collision free path
 - b) Determine its time optimal path
 - c) Avoid its singularity condition
 - d) Ensure smooth variations of the robotic joint angles
- 7) Which of the following is the branch of Artificial Intelligence?
 - a) Machine Learning
 - b) Cyber forensics
 - c) Full-Stack Developer
 - d) Network Design

- 8) A production rule consists of _____.
a) A set of Rule
b) A sequence of steps
c) Set of Rule & sequence of steps
d) Arbitrary representation to problem
- 9) Fuzzy logic is usually represented as _____.
a) IF-THEN-ELSE rules
b) IF-THEN rules
c) Both IF-THEN-ELSE rules & IF-THEN rules
d) IF-ELSE- THEN rules
- 10) What's the main point of difference between human & machine intelligence?
a) Human perceive everything as a pattern while machine perceive it merely as data
b) Human have emotions
c) Human have more IQ & intellect
d) Human have sense organs
- 11) What is purpose of Axon?
a) Receptors
b) Transmitter
c) Transmission
d) Absorber
- 12) A Genetic Algorithm for optimization is most likely to succeed given _____.
a) A small population of fit and similar individuals
b) A large population of fit and similar individuals
c) A small diverse population of fit individuals
d) A large diverse population of fit individuals
- 13) The two most commonly used technologies for imaging sensors are _____.
a) RGB and HSV
b) CDD and CMOS
c) RGB and CIE
d) CCD and CMOS
- 14) _____ cameras typically find applications in laptops and mobile phones.
a) CCD
b) CMOS
c) Infrared
d) Thermal

Set P

Fourth Y. (B.Tech.) (Sem - I) (Old) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING
Robotics and Artificial Intelligence (197041703)

Day & Date: Friday, 17-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

Instructions: 1) Solve any two questions from each Section - I and Section - II.
2) Figures to the right indicates full marks.

Section – I

- Q.2** a) Write short note on Service Robots. **06**
b) Explain with neat sketch Cartesian and Jointed arm robots. **08**
- Q.3** a) Name the five different types of robots end effectors. Explain any two. **08**
b) Discuss the construction and working of stepper motors. List its applications. **06**
- Q.4** a) Enlist different controlling techniques used in Robotics and explain PID control in detail. **08**
b) Write short note on Joint Space scheme in Trajectory planning. **06**

Section – II

- Q.5** a) Explain Production Systems method of problem solving in AI. **08**
b) Explain Branch and Bound method of problem solving in AI. **06**
- Q.6** a) Explain Fuzzy Logic Architecture with neat sketch. **06**
b) Explain Crossover and Mutation terms in Genetic Algorithm. **08**
- Q.7** a) What do you understand by the term image segmentation? Discuss two techniques of image segmentation. **06**
b) What is machine vision? Explain it in context of industrial robotics. Also explain components of Machine vision system. **08**

2) Figures to the right indicates full marks.

Section – I

- Q.2** a) Write short note on Service Robots. **06**
b) Explain with neat sketch Cartesian and Jointed arm robots. **08**
- Q.3** a) Name the five different types of robots end effectors. Explain any two. **08**
b) Discuss the construction and working of stepper motors. List its applications. **06**
- Q.4** a) Enlist different controlling techniques used in Robotics and explain PID control in detail. **08**
b) Write short note on Joint Space scheme in Trajectory planning. **06**

Section – II

- Q.5** a) Explain Production Systems method of problem solving in AI. **08**
b) Explain Branch and Bound method of problem solving in AI. **06**
- Q.6** a) Explain Fuzzy Logic Architecture with neat sketch. **06**
b) Explain Crossover and Mutation terms in Genetic Algorithm. **08**
- Q.7** a) What do you understand by the term image segmentation? Discuss two techniques of image segmentation. **06**
b) What is machine vision? Explain it in context of industrial robotics. Also explain components of Machine vision system. **08**

- 9) Condition based maintenance is used in _____ maintenance.
- a) Breakdown
 - b) Predictive
 - c) Preventive
 - d) None of above
- 10) Penalty cost is included in _____.
- a) Ordering cost
 - b) Shortage cost
 - c) Holding cost
 - d) None of these
- 11) FMS Stands for _____.
- a) Failure Machine Service
 - b) Flexible Machine System
 - c) Flexible Manufacturing System
 - d) None of these
- 12) In ABC analysis C items require _____.
- a) No safety stock
 - b) Minimum safety stock
 - c) Moderate safety stock
 - d) High safety stock
- 13) Assigning specific jobs to each work center for the planning period is _____.
- a) Loading
 - b) Sequencing
 - c) Scheduling
 - d) Expediting
- 14) The capacity licensed by various regulatory agencies or government authorities is _____ capacity.
- a) Design
 - b) System
 - c) Installed
 - d) Licensed

Seat No.

Fourth Y. (B.Tech.) (Sem - I) (Old) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING
Production and Operations Management (197041706)

Day & Date: Saturday, 18-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

Instructions: 1) Solve any two questions from each Section.
 2) Figures to right indicate full marks.

Section – I

- Q.2** a) Define production/operations management. Explain types of manufacturing systems. **07**
 b) Explain aggregate planning procedure. **07**
- Q.3** a) Discuss in detail production planning and control. **07**
 b) With the help of following data project, the trend of sales for the next 3 years using least square method: **07**

Year	2017	2018	2019	2020	2021	2022
Sales (in Lakhs of rupees)	100	110	115	120	135	140

- Q.4 Write a note on: (Any Two)** **14**
 a) Investment decision and replacement analysis.
 b) Line balancing
 c) ABC analysis

Section – II

- Q.5** a) What are the objectives of inventory management? Explain types of inventory. **07**
 b) ABC corporation currently practices the following system for the procurement of an item. Number of orders placed in a year = 8, ordering cost = Rs. 750/order. Each time order quantity = 250, Carrying cost = 40% of cost per unit. Cost per unit = Rs. 40. Calculate Economic order quantity and how much money can be saved by employing EOQ. **07**
- Q.6** a) What are the objectives of value analysis? Discuss the procedure of value analysis. **07**
 b) Explain the types of Maintenance. **07**
- Q.7 Write a note on: (Any Two)** **14**
 a) Lean Manufacturing
 b) JIT
 c) Six Sigma

Seat No.

Production and Operations Management (197041706)

Day & Date: Saturday, 18-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No. 3 (starting page of the Answer Book). Each question carry one mark.
 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct answer:

14

- 1) Line balancing is commonly used in _____.
 a) Mass production b) Job production
 c) Batch production d) None of the above
- 2) Condition based maintenance is used in _____ maintenance.
 a) Breakdown b) Predictive
 c) Preventive d) None of above
- 3) Penalty cost is included in _____.
 a) Ordering cost b) Shortage cost
 c) Holding cost d) None of these
- 4) FMS Stands for _____.
 a) Failure Machine Service b) Flexible Machine System
 c) Flexible Manufacturing System d) None of these
- 5) In ABC analysis C items require _____.
 a) No safety stock b) Minimum safety stock
 c) Moderate safety stock d) High safety stock
- 6) Assigning specific jobs to each work center for the planning period is _____.
 a) Loading b) Sequencing
 c) Scheduling d) Expediting
- 7) The capacity licensed by various regulatory agencies or government authorities is _____ capacity.
 a) Design b) System
 c) Installed d) Licensed
- 8) Medium term forecasting considers a period of _____.
 a) One year or less b) One to three years
 c) More than three years d) None of these

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct answer:

14

- 1) What is/ are the objective of Value Analysis?

a) Cost reduction	b) Quality improvement
c) Time reduction	d) All of the above
- 2) _____ method of forecasting calculates rolling average for constant period.

a) Least square	b) Exponential smoothing
c) Both a & b	d) None of these
- 3) Line balancing is commonly used in _____.

a) Mass production	b) Job production
c) Batch production	d) None of the above
- 4) Condition based maintenance is used in _____ maintenance.

a) Breakdown	b) Predictive
c) Preventive	d) None of above
- 5) Penalty cost is included in _____.

a) Ordering cost	b) Shortage cost
c) Holding cost	d) None of these
- 6) FMS Stands for _____.

a) Failure Machine Service	b) Flexible Machine System
c) Flexible Manufacturing System	d) None of these
- 7) In ABC analysis C items require _____.

a) No safety stock	b) Minimum safety stock
c) Moderate safety stock	d) High safety stock
- 8) Assigning specific jobs to each work center for the planning period is _____.

a) Loading	b) Sequencing
c) Scheduling	d) Expediting
- 9) The capacity licensed by various regulatory agencies or government authorities is _____ capacity.

a) Design	b) System
c) Installed	d) Licensed

- 10)** Medium term forecasting considers a period of _____.
a) One year or less b) One to three years
c) More than three years d) None of these
- 11)** The length of time between placing an order and receipt of material is called as _____.
a) Order time b) Lead time
c) Cycle time d) Process time
- 12)** Executive opinion method of forecasting is _____.
a) Qualitative technique b) Quantitative technique
c) Both a) and b) d) None of these
- 13)** OEE in TPM means _____.
a) Overall Engine Effectiveness
b) Overall Engine Emission
c) Overall Equipment Effectiveness
d) None of these
- 14)** When the ordering cost is increased to 16 times, the EOQ will be increased to _____.
a) 2 times b) 16 times
c) 8 times d) 4 times

 3) Figures to the right indicates full marks.
 4) Assume suitable data wherever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options. 14

- 1) Which of following input for manufacturing process?

a) man material machine	b) man material management
c) man machine operator	d) none of above
- 2) product is _____ production phase in the manufacturing.

a) Final	b) Middle
c) Starting	d) none of above
- 3) Process refer to _____.

a) sequence of operation	b) Part of product engineering
c) Middle stage between raw material and final product	d) none of above
- 4) Which of the following can be categorized as mass production. Tooling

a) Jig and fixture	b) SPM
c) Gauges	d) single point cutting tool
- 5) // Symbol used in drawing to interpret.

a) Symmetry	b) Parallelity
c) Flatness	d) Position
- 6) In mass production for checking shaft which of the following gauges are used?

a) snap gauges,	b) dial gauges,
c) plug gauges,	d) slip gauges
- 7) Which of the following parameters not to be considered as cutting parameters?

a) spindle RPM	b) Speed
c) Feed	d) Depth of cut
- 8) Optimal resources utilization in manufacturing Industry It is role of _____.

a) Product Engineering	b) Process Engineering
c) Industrial Engineering	d) None of above

- 9) Drilling and reaming operation comes under the type of operations _____.
a) secondary operation b) qualifying operation
c) auxiliary operation d) none of above
- 10) To determine the basic manufacturing process is the function of _____.
a) Product Engineering b) Process Engineering
c) Design Engineering d) Industrial Engineering
- 11) Which is the following forming operations _____.
a) Broaching b) Casting
c) Drilling d) bending
- 12) Product heat treatment comes under _____.
a) auxiliary operation b) primary operation
c) secondary operation d) Critical operations
- 13) _____ of the following product is Continuous Production system.
a) sugar industry b) casting Industry
c) Automobile Industry d) Shipbuilding Industry
- 14) Type of feet required between shaft and bearing.
a) H7g6 b) H7h6
c) H7ph d) H7n6

MECHANICAL ENGINEERING
Process Engineering (197041708)

Day & Date: Saturday, 18-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) Q. No. 2 and Q. No. 6 are compulsory.
 2) Attempt any one question from the remaining in each both sections.
 3) Figures to right indicate full marks.
 4) Make suitable assumptions, if required and state them clearly.

Section – I

- Q.2** Prepare a process plan for manufacturing the component in figure 1 w.r.t data supplied there in along following lines. **14**
- Route sheet
 - Operations list indicating sequence of operation indicating machine selected, holding methods, tool specifications and machining parameter per set up
 - Gauges and or inspection methods and instruments.

- Q.3** a) Explain in brief classification of manufacturing process. **07**
 b) Distinguish. Between product and process engineering in organization. **07**
- Q.4** a) Distinguish between dimensional and geometrical tolerance with one example **07**
 b) Explains with one example different causes of workpiece variations. **07**
- Q.5** a) What is Part print analysis list different steps involved in part print analysis. **07**
 b) Explain in brief methods to control the tolerance. Stack week one example. **07**

Section – II

- Q.6** Draw the process picture sheet for any four operations for manufacturing the component in Figure w.r.t. sequence. Use standard symbols for locating whenever required. **14**

- Q.7** a) Explain in brief different aspects to be considered in feasibility study. **07**
 b) What are the various sources of information to select machine and equipment? **07**
- Q.8** a) Explain in brief. Classification of operations with one example for each operation. **07**
 b) List various objectives to be considered while selecting proper work holding devices. **07**
- Q.9** a) Explain in brief selection criteria for GPM and SPM for processing a job. **07**
 b) Explain in brief job production, mass production list common points to be considered for process sheet. **07**

Fourth Y. (B.Tech.) (Sem - I) (Old) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING
Process Engineering (197041708)

Day & Date: Saturday, 18-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No.3 (starting page of the Answer Book). Each question carry one mark.
 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 3) Figures to the right indicates full marks.
 4) Assume suitable data wherever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options. 14

- 1) In mass production for checking shaft which of the following gauges are used?

a) snap gauges,	b) dial gauges,
c) plug gauges,	d) slip gauges
- 2) Which of the following parameters not to be considered as cutting parameters?

a) spindle RPM	b) Speed
c) Feed	d) Depth of cut
- 3) Optimal resources utilization in manufacturing Industry It is role of _____.

a) Product Engineering	b) Process Engineering
c) Industrial Engineering	d) None of above
- 4) Drilling and reaming operation comes under the type of operations _____.

a) secondary operation	b) qualifying operation
c) auxiliary operation	d) none of above
- 5) To determine the basic manufacturing process is the function of _____.

a) Product Engineering	b) Process Engineering
c) Design Engineering	d) Industrial Engineering
- 6) Which is the following forming operations _____.

a) Broaching	b) Casting
c) Drilling	d) bending
- 7) Product heat treatment comes under _____.

a) auxiliary operation	b) primary operation
c) secondary operation	d) Critical operations
- 8) _____ of the following product is Continuous Production system.

a) sugar industry	b) casting Industry
c) Automobile Industry	d) Shipbuilding Industry
- 9) Type of fit required between shaft and bearing.

a) H7g6	b) H7h6
c) H7p6	d) H7n6

- 10)** Which of following input for manufacturing process?
a) man material machine b) man material management
c) man machine operator d) none of above
- 11)** product is _____ production phase in the manufacturing.
a) Final b) Middle
c) Starting d) none of above
- 12)** Process refer to _____.
a) sequence of operation
b) Part of product engineering
c) Middle stage between raw material and final product
d) none of above
- 13)** Which of the following can be categorized as mass production. Tooling
a) Jig and fixture b) SPM
c) Gauges d) single point cutting tool
- 14)** // Symbol used in drawing to interpret.
a) Symmetry b) Parallelity
c) Flatness d) Position

Set **S**

Fourth Y. (B.Tech.) (Sem - I) (Old) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING
Process Engineering (197041708)

Day & Date: Saturday, 18-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) Q. No. 2 and Q. No. 6 are compulsory.
 2) Attempt any one question from the remaining in each both sections.
 3) Figures to right indicate full marks.
 4) Make suitable assumptions, if required and state them clearly.

Section – I

- Q.2** Prepare a process plan for manufacturing the component in figure 1 w.r.t data supplied there in along following lines. **14**
- Route sheet
 - Operations list indicating sequence of operation indicating machine selected, holding methods, tool specifications and machining parameter per set up
 - Gauges and or inspection methods and instruments.

- Q.3** a) Explain in brief classification of manufacturing process. **07**
 b) Distinguish. Between product and process engineering in organization. **07**
- Q.4** a) Distinguish between dimensional and geometrical tolerance with one example **07**
 b) Explains with one example different causes of workpiece variations. **07**
- Q.5** a) What is Part print analysis list different steps involved in part print analysis. **07**
 b) Explain in brief methods to control the tolerance. Stack week one example. **07**

Section – II

- Q.6** Draw the process picture sheet for any four operations for manufacturing the component in Figure w.r.t. sequence. Use standard symbols for locating whenever required. **14**

- Q.7** a) Explain in brief different aspects to be considered in feasibility study. **07**
 b) What are the various sources of information to select machine and equipment? **07**
- Q.8** a) Explain in brief. Classification of operations with one example for each operation. **07**
 b) List various objectives to be considered while selecting proper work holding devices. **07**
- Q.9** a) Explain in brief selection criteria for GPM and SPM for processing a job. **07**
 b) Explain in brief job production, mass production list common points to be considered for process sheet. **07**

**Fourth Y. (B.Tech.) (Sem - I) (Old) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING
Finite Element Method (197041709)**

Day & Date: Saturday, 18-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No.1 is compulsory and should be solved in first 30 minutes in Answer Book Page No.3 (starting page of the Answer Book). Each question carry one mark.
2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
3) Figures to the right indicates full marks.
4) Use of non-programmable scientific calculator is allowed.
5) Assume suitable data if necessary

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Select the correct alternative.

14

- 1) Shape function is usually _____.
 - a) The coefficient that appears in the interpolation polynomial
 - b) Written for each individual node of finite element
 - c) Interchanged with the terminology interpolation polynomial
 - d) All of the above
- 2) If element size is reduced, number of elements _____.
 - a) increases
 - b) decreases
 - c) remains constant
 - d) gets deleted
- 3) The loading, constraints and other external effects applied to a model is _____.
 - a) Boundary conditions
 - b) Meshing
 - c) Constraining
 - d) Modeling
- 4) Preprocessing means _____.
 - a) Solving
 - b) Meshing
 - c) Result analysis
 - d) None of the above
- 5) Sum of all the natural coordinates of the node is _____.
 - a) One
 - b) Zero
 - c) Can not be predicted
 - d) none of the above
- 6) The interpolation function for a CST element is given by _____.
 - a) $U = a_1 + a_2x + a_3y$
 - b) $U = a_1 + a_2x + a_3x^2$
 - c) $U = a_1 + a_2x + a_3x^2 + a_4y$
 - d) $U = a_1 + a_2x + a_3y + a_4z$
- 7) Complex elements are defined as those elements which _____.
 - a) have higher order interpolation polynomials
 - b) have sides parallel to coordinate system
 - c) have sides parallel to coordinate system and use higher order interpolation polynomials
 - d) have polynomials with only linear and constant terms

**Fourth Y. (B.Tech.) (Sem - I) (Old) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING
Finite Element Method (197041709)**

Day & Date: Saturday, 18-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) Answer any two questions from Section I and Section II.
2) Figures to right indicate full marks.
3) Use of non-programmable scientific calculator is allowed.
4) Assume suitable data if necessary and mention it clearly.

Section – I

- Q.2 a)** Obtain solution of differential equation by using Galerkin's method. **07**

$$\frac{\partial^2 u}{\partial x^2} + u - x^2 = 0, \quad 0 \leq x \leq 1$$

Take boundary conditions as $u(0) = 0, \frac{du}{dx}(1) = 1$

- b)** Explain Simplex, Complex and Multiplex elements. **07**

- Q.3 a)** Find nodal displacement in stepped bar as shown in figure 1. **07**

Take $A_1 = 20 \text{ mm}^2, A_2 = 10 \text{ mm}^2$

$L_1 = L_2 = 100 \text{ mm}, E_1 = E_2 = 200 \times 10^3 \text{ MPa}$

Figure 1:

- b)** Explain discretization in FEM with suitable example and also brief p-refinement and h-refinement. **07**

Q.4 Attempt the following.

- a)** Prove from first principle that the displacement through 1-D pin jointed bar element with linear variation of displacement can be expressed as **06**

$u = N_i u_i + N_j u_j$ where $N_i = \frac{(x_j - x)}{L}, N_j = \frac{(x - x_i)}{L}$. Plot shape functions at node i and j

- b)** What are the properties of Stiffness matrix? Explain. **04**
c) Write a note interpolation functions. **04**

Section – II

- Q.5 a)** Calculate the value of field variable at the point $A(2.5, 2.5)$, which is located inside the triangle as shown in figure 2. **07**
 The nodal values for field variable are $U_i = 3.5, U_j = 2.2$ and $U_k = 4.4$

Figure 2:

- b)** Explain static analysis and modal analysis. **07**
- Q.6 a)** Solve the following problem for all unknowns. Impose the boundary conditions using the penalty method. Refer figure 3. **12**
 $A_1 = 900 \text{ mm}^2, A_2 = 400 \text{ mm}^2, A_3 = 200 \text{ mm}^2$
 $L_1 = 80 \text{ mm}, L_2 = 80 \text{ mm}, L_3 = 70 \text{ mm}$
 $E_1 = 70 \text{ GPa}, E_2 = 105 \text{ GPa}, E_3 = 200 \text{ GPa}$

Figure 3:

- b)** What are isoperimetric elements? **02**
- Q.7 Write a short note on (Any Three)** **14**
- Dynamic problems
 - Size and number of elements
 - Harmonic analysis
 - Axisymmetric problems and axisymmetric elements

Seat No.	
----------	--

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Select the correct alternative.

14

- 1) Each node of beam element is having following degree of freedom _____.
a) 3
b) 4
c) 2
d) 1
- 2) In _____ element the value of field variable remains unchanged in the circumferential direction.
a) 1D and 2D
b) Beam
c) Truss
d) Axisymmetric
- 3) Size of shape function matrix of 2D element having 3 nodes is _____.
a) 2×6
b) 3×3
c) 4×6
d) 2×5
- 4) Formula for Galerkin method is _____.
a) $\int f(x)R(x)dx = 0$
b) $\int R(x)dx = 0$
c) $R(x) = 0$
d) $\int R^2(x)dx = 0$
- 5) A measure of distortion of a element is _____.
a) Bandwidth
b) Damping ratio
c) Aspect ratio
d) Shape function
- 6) A problem which is not a function of a time _____.
a) Eigenvalue problem
b) Steady state problem
c) Transient problem
d) Propagation problem
- 7) The three most common cases on non-linearity are _____.
a) Fluttering, Geometric, Material
b) Material, Geometric, Contact
c) Material, Fluttering, plasticity
d) Creep, Fluttering, Contact
- 8) Shape function is usually _____.
a) The coefficient that appears in the interpolation polynomial
b) Written for each individual node of finite element
c) Interchanged with the terminology interpolation polynomial
d) All of the above

- 9) If element size is reduced, number of elements _____.
a) increases
b) decreases
c) remains constant
d) gets deleted
- 10) The loading, constraints and other external effects applied to a model is _____.
a) Boundary conditions
b) Meshing
c) Constraining
d) Modeling
- 11) Preprocessing means _____.
a) Solving
b) Meshing
c) Result analysis
d) None of the above
- 12) Sum of all the natural coordinates of the node is _____.
a) One
b) Zero
c) Can not be predicted
d) none of the above
- 13) The interpolation function for a CST element is given by _____.
a) $U = a_1 + a_2x + a_3y$
b) $U = a_1 + a_2x + a_3x^2$
c) $U = a_1 + a_2x + a_3x^2 + a_4y$
d) $U = a_1 + a_2x + a_3y + a_4z$
- 14) Complex elements are defined as those elements which _____.

 4) Assume suitable data if necessary and mention it clearly.

Section – I

- Q.2 a)** Obtain solution of differential equation by using Galerkin's method. **07**

$$\frac{\partial^2 u}{\partial x^2} + u - x^2 = 0, \quad 0 \leq x \leq 1$$

Take boundary conditions as $u(0) = 0, \frac{du}{dx}(1) = 1$

- b)** Explain Simplex, Complex and Multiplex elements. **07**

- Q.3 a)** Find nodal displacement in stepped bar as shown in figure 1. **07**

Take $A_1 = 20 \text{ mm}^2, A_2 = 10 \text{ mm}^2$

$L_1 = L_2 = 100 \text{ mm}, E_1 = E_2 = 200 \times 10^3 \text{ MPa}$

Figure 1:

- b)** Explain discretization in FEM with suitable example and also brief p-refinement and h-refinement. **07**

Q.4 Attempt the following.

- a)** Prove from first principle that the displacement through 1-D pin jointed bar element with linear variation of displacement can be expressed as **06**

$u = N_i u_i + N_j u_j$ where $N_i = \frac{(x_j - x)}{L}, N_j = \frac{(x - x_i)}{L}$. Plot shape functions at node i and j

- b)** What are the properties of Stiffness matrix? Explain. **04**
c) Write a note interpolation functions. **04**

Section – II

- Q.5 a)** Calculate the value of field variable at the point $A(2.5, 2.5)$, which is located inside the triangle as shown in figure 2. **07**
 The nodal values for field variable are $U_i = 3.5, U_j = 2.2$ and $U_k = 4.4$

Figure 2:

- b)** Explain static analysis and modal analysis. **07**
- Q.6 a)** Solve the following problem for all unknowns. Impose the boundary conditions using the penalty method. Refer figure 3. **12**
 $A_1 = 900 \text{ mm}^2, A_2 = 400 \text{ mm}^2, A_3 = 200 \text{ mm}^2$
 $L_1 = 80 \text{ mm}, L_2 = 80 \text{ mm}, L_3 = 70 \text{ mm}$
 $E_1 = 70 \text{ GPa}, E_2 = 105 \text{ GPa}, E_3 = 200 \text{ GPa}$

Figure 3:

- b)** What are isoperimetric elements? **02**
- Q.7 Write a short note on (Any Three)** **14**
- Dynamic problems
 - Size and number of elements
 - Harmonic analysis
 - Axisymmetric problems and axisymmetric elements

Seat No.

Fourth Y. (B.Tech.) (Sem - I) (Old) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING
Railway Systems Management (197041711)

Day & Date: Saturday, 18-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No.1 is compulsory and should be solved in first 30 minutes in Answer Book Page No.3 (starting page of the Answer Book). Each question carry one mark.
 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 3) Figures to the right indicates full marks.
 4) Use of scientific calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct answer.

14

- 1) Which signals are used in shunting operations for low-speed movement?
 - a) Semaphore Signal
 - b) Warner Signal
 - c) Starter signal
 - d) Disc signal
- 2) Weight of the passenger is categorized in _____.
 - a) sprung mass
 - b) unsprung mass
 - c) non-sprung mass
 - d) dummy mass
- 3) _____ is not a coupling used in Railway Coaches.
 - a) Screw Coupling
 - b) Side buffer coupling
 - c) Central buffer coupling
 - d) Tie coupling
- 4) Which of the following is an advantage of electric traction over other methods of traction?
 - a) Faster acceleration
 - b) No pollution problems
 - c) Better braking action
 - d) All of the above
- 5) _____ is not a part of VCC used in A/C.
 - a) Evaporator
 - b) Condenser
 - c) Compressor
 - d) Deflector
- 6) In railway the green light indicates _____.
 - a) Stop
 - b) Proceed
 - c) Proceed cautiously
 - d) None
- 7) For Fiat Bogie Break disc diameter is _____ mm.
 - a) 750
 - b) 650
 - c) 635
 - d) 640
- 8) Which of the following can be used in case of Bridge joints?
 - a) Metal flat or Bridge plate
 - b) Extra sleepers
 - c) Metal flat
 - d) Bridge plate
- 9) _____ is not a maintenance report that is recorded in Loco shade.
 - a) Loco master defect report
 - b) Component defect report
 - c) Analysis defect report
 - d) Component inspection report

- 10) _____ is not a cause of accident in Indian Railway.
- a) Negligence
 - b) Human error
 - c) Reckless pedestrians and drivers
 - d) Electrification
- 11) _____ works as primary energy absorber during accidental shock.
- a) Honeycomb absorber
 - b) Pads
 - c) Spring
 - d) None of these
- 12) _____ is not strategy of fire accidents.
- a) Prevention
 - b) Detection
 - c) Suppression
 - d) Speed
- 13) In DFC track inspection is done by _____.
- a) TRC
 - b) BFC
 - c) NFC
 - d) LFC
- 14) FOIS Means _____.
- a) Freight Operations Information Society
 - b) Freight Operations Internet System
 - c) Freight Operations Information System
 - d) None of these

Railway Systems Management (197041711)

Day & Date: Saturday, 18-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) Solve any two questions from each section.
2) Figures to right indicate full marks.
3) Assume suitable data if required.
4) Use of scientific calculator is allowed.

Section – I

- Q.2 Solve:**
- a) What are the components of air suspension in the Indian Railway? **04**
Elaborate in details.
 - b) Draw typical passenger Vehicle showing the layout of air conditioning & heating equipment. **05**
 - c) Explain in details the different parts of C.B.C coupler. **05**
- Q.3 Solve:**
- a) Write the steps of heating load calculation in 2.A.C coach. **04**
 - b) Explain with neat Sketches the Electronic power and Auxiliary Services. **05**
 - c) Write the constructional details of Traction Motors used in Indian Railway. **05**
- Q.4 Solve:**
- a) Describe all Parts of LHB Bogies in Railway. **04**
 - b) Write a short note R.M.P.U in LHB coaches. **05**
 - c) Explain in details of HOG. **05**

Section – II

- Q.5 Solve:**
- a) What are different components of Bio-Vacuum toilet system explain in detail. **04**
 - b) Write Short note on types of pollution in Indian railway. **05**
 - c) What is role of production engineers in rolling stock maintenance? Describe in details. **05**
- Q.6 Solve:**
- a) Which digital technologies used in traffic control? Explain RFID in details. **05**
 - b) What is mean by overhauling? Explain in details overhauling & periodic overhauling in diesel Locomotives. **05**
 - c) Describe in details the Green Initiatives in Indian railway sectors. **04**
- Q.7 Solve:**
- a) Write in details the Ticket reservation system in Indian Railway. **04**
 - b) What is mean by rolling stock management? Which types of rolling stock management used in Indian railway? **05**
 - c) Explain in details Human waste management used in Indian railway. **05**

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the given options.

14

- 1) The term Entrepreneur is derived from the _____ word.

a) English	b) Tamil
c) Hindi	d) French
- 2) Which of the following is the reason for business failure _____?

a) Lack of market research	b) Poor financial control
c) Poor management	d) All the above
- 3) To provide financial assistance to entrepreneurs the government has set up a number of _____.

a) financial advisors	b) financial intermediaries
c) industrial estates	d) financial institutions
- 4) _____ is the first development bank of the country.

a) ICICI	b) IDBI
c) SFC	d) IFCI
- 5) SIDBI was set up as a subsidiary of _____.

a) IDBI	b) IFCI
c) ICICI	d) SFC
- 6) Which of these is not a type of entrepreneurship?
| |
| --- |
| a) Small business entrepreneurship |
| b) Scalable entrepreneurship |
| c) Large scale entrepreneurship |
| d) Intrapreneurship |
- 7) Which of these actions of an entrepreneur will most likely result in creative destruction?
| |
| --- |
| a) Developing a new product |
| b) Taking over a competitor's business |
| c) Issuing shares to individuals and institutions |
| d) Lowering prices of your product or service |

- 8) To provide financial assistance to entrepreneurs the government has set up a number of _____.
- a) financial advisors
 - b) financial intermediaries
 - c) industrial estates
 - d) financial institutions
- 9) District industries Centers are located?
- a) in each district
 - b) in each state
 - c) only in selected districts
 - d) only in selected states
- 10) Business plan is an important _____ for an entrepreneur.
- a) Tool
 - b) Document
 - c) Vision
 - d) Mission
- 11) Entrepreneurship Development Program is helpful for: _____.
- a) First-generation entrepreneurs
 - b) Future generation entrepreneurs
 - c) Existing Entrepreneurs
 - d) None of the above
- 12) If an entrepreneur takes decisions on behalf of their enterprise, it is known as _____.
- a) Routine decisions
 - b) Strategic decisions
 - c) Organisational decisions
 - d) Personal decisions
- 13) What is the purpose of a feasibility study for starting a new venture?
- a) Exploring for potential customers
 - b) Estimate sales
 - c) To understand if there are any barriers to success
 - d) None of the above
- 14) An entrepreneur who is the owner of more than one business is called: _____.
- a) Portfolio Entrepreneur
 - b) Intrapreneur
 - c) Corporate Entrepreneur
 - d) None of the above

Fourth Y. (B.Tech.) (Sem - I) (Old) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING
Entrepreneurship Development (197041713)

Day & Date: Sunday, 19-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) Solve any two questions from the both sections.
2) Figures to the right indicate full marks.
3) Make suitable assumptions, if required and state them clearly.

Section – I

- Q.2** a) Elaborate the importance and significance of growth of entrepreneurial activity. **07**
b) Classify the entrepreneur in details. **07**
- Q.3** a) Explain in details the qualities and characteristics of entrepreneur. **07**
b) Explain Objectives of Entrepreneurship Development Programme. **07**
- Q.4** a) Explain in details importance of Role of EDP in economic development of country. **07**
b) Explain the problems faced by entrepreneur in detail. **07**

Section – II

- Q.5** a) Brief the contents of project report and its significances. **07**
b) Write a short note on “Lean canvas model”. **07**
- Q.6** a) Define SMEs. Explain the various characteristics of SMEs. **07**
b) Elaborate various business plans. **07**
- Q.7** a) Elaborate the various funding option available to entrepreneur and their support systems. **07**
b) Explain various ownership patterns. **07**

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Select the correct alternative.

14

- 1) Branding of product _____.
 - a) makes it more saleable
 - b) differentiates it from other products in the market
 - c) make it more attractive for customer
 - d) gives customer rebate on MRP.
- 2) When two separate companies or two divisions within the same company agree to place both of their respective brands on a particular product or enterprise, this arrangement is termed as: _____.
 - a) Differential Branding
 - b) Cobranding
 - c) Dual Branding
 - d) Both Cobranding and Dual Branding
- 3) As the product passes through different stages of a product life cycle, the product variety _____.
 - a) increases
 - b) decreases and then increases
 - c) remains the same
 - d) decreases
- 4) When a new product arrives in the market with higher quality, higher value and new features better than its competitors. Such products are known as _____.
 - a) Superior products
 - b) Develop superior products
 - c) Unique superior products
 - d) New products
- 5) Which of the following is not a characteristic of "Market Introduction Stage" in PLC?
 - a) Demands has to be created
 - b) Costs are low
 - c) Makes no money at this stage
 - d) Slow sales volume to start
 - e) There is little or no competition

- 6) The most important performance dimension for product development project is
- a) Time required to market the product
 - b) Time to target Customer
 - c) Time to advertise and reach consumer
 - d) Time required by seller
- 7) What does the term PLC stands for?
- a) Product life cycle
 - b) Production life cycle
 - c) Product long cycle
 - d) Production long cycle
- 8) In which of the following stages of product life cycle a company reduces sales promotion to take advantage of heavy consumer demand?
- a) Introduction
 - b) Growth
 - c) Maturity
 - d) Decline
- 9) Increased competition leads to price decrease, increasing public awareness, sales volume increase significantly are the characteristics of _____ in PLC.
- a) Mature stage
 - b) Decline stage
 - c) Growth stage
 - d) Market introduction stage
- 10) _____ includes review of sales, profit projections and cost for a new product, to find out whether it satisfied the company objective or not.
- a) Product Development
 - b) Business Analysis
 - c) Marketing Strategy
 - d) Test Marketing
- 11) The term DFA stands for: _____.
- a) Design for Management and Administration
 - b) Design for Manufacturing and Administration
 - c) Design for Assembly
 - d) Design for Management and Assembly
- 12) What does the term PDM stands for?
- a) Product Data Management
 - b) Product Database Management
 - c) Product Drawing and Manufacturing
 - d) Production Data Manufacturing
- 13) The activities of designing and producing a Packaging Container for a product are known as: _____.
- a) Purchase-sale
 - b) Presentation
 - c) Promotion
 - d) Packaging
- 14) Color and size of the product, brand and packaging are considered as _____.
- a) Chemical features of product
 - b) Physical features of product
 - c) Product designing
 - d) Product manufacture

Fourth Y. (B.Tech.) (Sem - I) (Old) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING
Business Economics (197041716)

Day & Date: Sunday, 19-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.
 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options. 14

- 1) If break-even output/quantity is 500 units and price per unit is Rs. 400, then what will be total revenue?

a) 1 Lakh	b) 2 Lakh
c) 3 Lakh	d) 4 Lakh
- 2) If Total Fixed Cost is Rs. 40,000, Price per unit is Rs. 100 and Average Variable cost is Rs. 100. Then what will be break-even output/quantity?

a) 200 units	b) 300 units
c) 400 units	d) 500 units
- 3) Economic profit includes _____.

a) Implicit and explicit cost	b) Implicit cost
c) Explicit cost	d) Opportunity cost
- 4) With increase in cost of preventive maintenance, the breakdown maintenance cost will be _____.

a) Increase	b) Decrease
c) No change	d) None from above
- 5) Cost Classification carried out on various factor like _____.

a) Resources deployed against the planned
b) Status of the Project
c) Manpower required
d) Direct & Indirect Cost
- 6) Which of the following represents the estimated value of the work actually accomplished?

a) Earned value (EV)	b) Planned value (PV)
c) Actual cost (AC)	d) Cost variance (CV)
- 7) When demand increases, the price _____.

a) Falls	b) Rises
c) No change	d) None from above

Set

Q

Fourth Y. (B.Tech.) (Sem - I) (Old) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING
Business Economics (197041716)

Day & Date: Sunday, 19-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) Question no. 2 is compulsory in section I, and solve any two questions from the remaining.
 2) Question no. 6 is compulsory in section II, and solve any two questions from the remaining.
 3) Figures to right indicate full marks.

Section – I

- | | | | |
|------------|---------------------------------|----------------------------------------------------------------------|-----------|
| Q.2 | a) | Explain Relationship between demand and supply. | 05 |
| | b) | Explain Price Elasticity of Demand. | 05 |
| Q.3 | a) | Explain Concept of Cost and difference between cost and price. | 05 |
| | b) | Explain Long run and short run costs. | 04 |
| Q.4 | a) | Explain inflation, causes and consequences and control of inflation. | 05 |
| | b) | Explain Time Value of Money. | 04 |
| Q.5 | Short Notes. (Any Three) | | |
| | a) | Major topics in Engineering Economics | 09 |
| | b) | Theory of Demand, Law of demand | |
| | c) | Break Even Analysis | |
| | d) | Cash flow diagram | |

Section – II

- | | | | |
|------------|---------------------------------|--------------------------------------------------------------|-----------|
| Q.6 | a) | Explain Engineering and economic approach. | 05 |
| | b) | Explain elementary economic analysis. | 05 |
| Q.7 | a) | Explain types of maintenance practices, cost of maintenance. | 05 |
| | b) | Explain Routine maintenance & predictive maintenance. | 04 |
| Q.8 | a) | Explain project management life cycle and its block diagram. | 05 |
| | b) | Explain technical appraisal and financial appraisal. | 04 |
| Q.9 | Short Notes. (Any Three) | | 09 |
| | a) | Break-even point in make or buy decision | |
| | b) | Preventive and breakdown maintenance | |
| | c) | Financial appraisal. | |
| | d) | Phases of value analysis | |

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options. 14

- 1) With increase in cost of preventive maintenance, the breakdown maintenance cost will be _____.
 - a) Increase
 - b) Decrease
 - c) No change
 - d) None from above
- 2) Cost Classification carried out on various factor like _____.
 - a) Resources deployed against the planned
 - b) Status of the Project
 - c) Manpower required
 - d) Direct & Indirect Cost
- 3) Which of the following represents the estimated value of the work actually accomplished?
 - a) Earned value (EV)
 - b) Planned value (PV)
 - c) Actual cost (AC)
 - d) Cost variance (CV)
- 4) When demand increases, the price _____.
 - a) Falls
 - b) Rises
 - c) No change
 - d) None from above
- 5) Relationship between price and demand is _____.
 - a) Direct
 - b) Inverse
 - c) Proportionate
 - d) Positive
- 6) What is demand curve?
 - a) Shows relationship between price and quantity supplied
 - b) Indicates the quantity demanded at each price in a series of prices
 - c) Graphs as an upward sloping line
 - d) Shows the relationship between income and spending
- 7) In the case of perfect elasticity, the demand curve is _____.
 - a) Vertical
 - b) Horizontal
 - c) Flat
 - d) Steep

- 8) An increase in supply, demand remaining constant will change the equilibrium..
- a) Causing a fall in price
 - b) Causing a backward shift in demand curve
 - c) Causing no change in price
 - d) Causing no change in income
- 9) Which one is not the type of elasticity of demand?
- a) Price
 - b) Consumer preferences
 - c) Income
 - d) Cross
- 10) Car and petrol are _____.
- a) Complimentary goods
 - b) Substitute goods
 - c) Supplementary goods
 - d) Reserve goods
- 11) When a market is in equilibrium, _____.
- a) There is no shortage and no surplus at the equilibrium price
 - b) Everyone has all they want of the commodity in question
 - c) The supply curve has the same slope as the demand curve
 - d) The number of buyers is exactly equal to the number of sellers
- 12) If break-even output/quantity is 500 units and price per unit is Rs. 400, then what will be total revenue?
- a) 1 Lakh
 - b) 2 Lakh
 - c) 3 Lakh
 - d) 4 Lakh
- 13) If Total Fixed Cost is Rs. 40,000, Price per unit is Rs. 100 and Average Variable cost is Rs. 100. Then what will be break-even output/quantity?
- a) 200 units
 - b) 300 units
 - c) 400 units
 - d) 500 units
- 14) Economic profit includes _____.
- a) Implicit and explicit cost
 - b) Implicit cost
 - c) Explicit cost
 - d) Opportunity cost

Set P

T. Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
ELECTRONICS ENGINEERING
Digital Communication (BTN04501)

Day & Date: Monday, 13-05-2024
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.
 4) Assume data wherever necessary

MCQ/Objective Type Questions

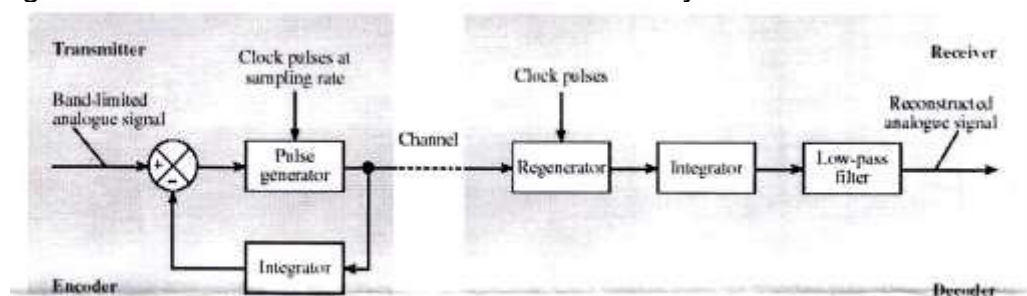

Duration: 30 Minutes

Marks:14

Q.1 Select suitable option.

14

- 1) Following is not a disadvantage of digital communication.
 - a) Binary coding
 - b) Critical synchronization requirement
 - c) Quantization noise
 - d) Presence of Jitter
- 2) Companding is used to _____.
 - a) eliminate quantizing noise in PCM
 - b) allow amplitude limiting in the PCM receivers
 - c) improve S/N ratio for small signals in PCM
 - d) Overcome impulse noise in PCM receiver
- 3) Nit - is a unit of information when base of the logarithm is _____.
 - a) 2
 - b) 10
 - c) natural
 - d) none of these
- 4) Rather than sending the absolute value of each sample, it is possible to achieve a smaller transmission bit-rate by sending the difference between consecutive samples. This is known as _____.
 - a) delta modulation
 - b) delta-sigma modulation
 - c) adaptive delta modulation
 - d) differential PCM
- 5) The figure below shows an example of a modulation system used in digital communication. What is that modulation system?

- a) PCM Modulation
- b) Delta Modulation
- c) Sigma Modulation
- d) Differential Modulation

- 6) Reversible or lossless coding is a type of coding for which the exact data can be recovered after decoding. This type of coding is used by _____.
- a) PCM encoding
 - b) Huffman encoding
 - c) Run-length encoding
 - d) Both b and c
- 7) The use of non-uniform quantization leads to _____.
- a) reduction in transmission bandwidth
 - b) increase in maximum SNR
 - c) increase in SNR for signal levels
 - d) simplification of quantization process
- 8) ASK, PSK, FSK, and QAM are examples of _____ encoding.
- a) Digital-to-digital
 - b) Digital-to-analog
 - c) Analog-to-analog
 - d) Analog-to-digital
- 9) In QAM, both phase and _____ of a carrier frequency are varied.
- a) Amplitude
 - b) Frequency
 - c) Bit rate
 - d) Baud rate
- 10) Which of the following is most affected by noise?
- a) PSK
 - b) ASK
 - c) FSK
 - d) QAM
- 11) Which of the following modulation techniques are used by modems?
- a) 16-QAM
 - b) FSK
 - c) 8-PSK
 - d) All of the above
- 12) In cyclic redundancy checking, the divisor is _____ the CRC.
- a) one bit less than
 - b) one bit more than
 - c) the same size as
 - d) none of the above
- 13) In _____ error correction, the receiver corrects errors without requesting retransmission.
- a) onward
 - b) forward
 - c) backward
 - d) none of the above
- 14) A simple parity-check code can detect _____ errors.
- a) an odd-number of
 - b) an even-number of
 - c) two
 - d) no errors

Seat No.

T. Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
ELECTRONICS ENGINEERING
Digital Communication (BTN04501)

Day & Date: Monday, 13-05-2024
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
 2) Figures to the right indicate full marks.
 3) Assume suitable data if necessary.

Section – I

Q.2 Attempt the following. (Any Four)

16

- Give the basic difference between Analog and Digital communication.
- Define non uniform Quantization.
- State the different characteristics & properties of Line coding.
- Discuss the term Power Spectra & its types & explain any one.
- The probabilities of five possible outcomes of an experiment are given as $1/2, 1/4, 1/8, 1/16, 1/16$. Determine the entropy and information rate if there are 16 outcomes per second.

Q.3 Attempt the following. (Any Two)

12

- Consider a binary input, output channel shown below.

Find $H(X)$, $H(Y)$, $H(X|Y)$, $H(Y|X)$ and $H(XY)$

- A discrete memory less source has an alphabet of seven symbols with probabilities 0.3, 0.20, 0.16, 0.14, 0.10, 0.02, 0.08 resp. Compute Huffman code for this source, calculate entropy, avg. codeword length & variance of this code.
- With suitable diagram explain ADM transmitter & receiver.

Section – II

Q.4 Attempt the following. (Any Four)

16

- What is coherent and non coherent detection? Give suitable examples.
- With suitable waveforms and equations explain ASK, FSK and PSK.
- With suitable diagram explain DSSS transmitter & receiver.
- With suitable example & diagram explain FHSS. What are its types?
- Derive an expression for coding efficiency.

Q.5 Attempt the following. (Any Two)

- a) With suitable block diagram explain QPSK. What are its advantages? What are its applications?
- b) For a (6,3) code the generator matrix G is given by.

$$G = \begin{bmatrix} 1 & 0 & 0 & 0 & 0 & 1 \\ 0 & 1 & 0 & 1 & 0 & 1 \\ 0 & 0 & 1 & 1 & 1 & 0 \end{bmatrix}$$

- i) Realize an encoder for this code
- ii) Verify that this code is signal error correcting code
- iii) If the received codeword is 0 0 0 1 1 0, find the syndrome.
- c) Explain MSK modulator and demodulator with waveform.

 - c) the same size as
 - d) none of the above
- 3) In _____ error correction, the receiver corrects errors without requesting retransmission.
 - a) onward
 - b) forward
 - c) backward
 - d) none of the above
- 4) A simple parity-check code can detect _____ errors.
 - a) an odd-number of
 - b) an even-number of
 - c) two
 - d) no errors
- 5) Following is not a disadvantage of digital communication.
 - a) Binary coding
 - b) Critical synchronization requirement
 - c) Quantization noise
 - d) Presence of Jitter
- 6) Companding is used to _____.
 - a) eliminate quantizing noise in PCM
 - b) allow amplitude limiting in the PCM receivers
 - c) improve S/N ratio for small signals in PCM
 - d) Overcome impulse noise in PCM receiver
- 7) Nit - is a unit of information when base of the logarithm is _____.
 - a) 2
 - b) 10
 - c) natural
 - d) none of these

- 8) Rather than sending the absolute value of each sample, it is possible to achieve a smaller transmission bit-rate by sending the difference between consecutive samples. This is known as _____.
- a) delta modulation b) delta-sigma modulation
c) adaptive delta modulation d) differential PCM
- 9) The figure below shows an example of a modulation system used in digital communication. What is that modulation system?

- a) PCM Modulation b) Delta Modulation
c) Sigma Modulation d) Differential Modulation
- 10) Reversible or lossless coding is a type of coding for which the exact data can be recovered after decoding. This type of coding is used by _____.
- a) PCM encoding b) Huffman encoding
c) Run-length encoding d) Both b and c
- 11) The use of non-uniform quantization leads to _____.
- a) reduction in transmission bandwidth
b) increase in maximum SNR
c) increase in SNR for signal levels
d) simplification of quantization process
- 12) ASK, PSK, FSK, and QAM are examples of _____ encoding.
- a) Digital-to-digital b) Digital-to-analog
c) Analog-to-analog d) Analog-to-digital
- 13) In QAM, both phase and _____ of a carrier frequency are varied.
- a) Amplitude b) Frequency
c) Bit rate d) Baud rate
- 14) Which of the following is most affected by noise?
- a) PSK b) ASK
c) FSK d) QAM

Seat
No.

T. Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
ELECTRONICS ENGINEERING
Digital Communication (BTN04501)

Day & Date: Monday, 13-05-2024
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
 2) Figures to the right indicate full marks.
 3) Assume suitable data if necessary.

Section – I**Q.2 Attempt the following. (Any Four)****16**

- Give the basic difference between Analog and Digital communication.
- Define non uniform Quantization.
- State the different characteristics & properties of Line coding.
- Discuss the term Power Spectra & its types & explain any one.
- The probabilities of five possible outcomes of an experiment are given as $1/2, 1/4, 1/8, 1/16, 1/16$. Determine the entropy and information rate if there are 16 outcomes per second.

Q.3 Attempt the following. (Any Two)**12**

- Consider a binary input, output channel shown below.

Find $H(X)$, $H(Y)$, $H(X|Y)$, $H(Y|X)$ and $H(XY)$

- A discrete memory less source has an alphabet of seven symbols with probabilities 0.3, 0.20, 0.16, 0.14, 0.10, 0.02, 0.08 resp. Compute Huffman code for this source, calculate entropy, avg. codeword length & variance of this code.
- With suitable diagram explain ADM transmitter & receiver.

Section – II**Q.4 Attempt the following. (Any Four)****16**

- What is coherent and non coherent detection? Give suitable examples.
- With suitable waveforms and equations explain ASK, FSK and PSK.
- With suitable diagram explain DSSS transmitter & receiver.
- With suitable example & diagram explain FHSS. What are its types?
- Derive an expression for coding efficiency.

Q.5 Attempt the following. (Any Two)

- a) With suitable block diagram explain QPSK. What are its advantages? What are its applications?
- b) For a (6,3) code the generator matrix G is given by.

$$G = \begin{bmatrix} 1 & 0 & 0 & 0 & 0 & 1 \\ 0 & 1 & 0 & 1 & 0 & 1 \\ 0 & 0 & 1 & 1 & 1 & 0 \end{bmatrix}$$

- i) Realize an encoder for this code
- ii) Verify that this code is signal error correcting code
- iii) If the received codeword is 0 0 0 1 1 0, find the syndrome.
- c) Explain MSK modulator and demodulator with waveform.

Section – I

Q.2 Attempt the following. (Any Four)

16

- Give the basic difference between Analog and Digital communication.
- Define non uniform Quantization.
- State the different characteristics & properties of Line coding.
- Discuss the term Power Spectra & its types & explain any one.
- The probabilities of five possible outcomes of an experiment are given as $1/2, 1/4, 1/8, 1/16, 1/16$. Determine the entropy and information rate if there are 16 outcomes per second.

Q.3 Attempt the following. (Any Two)

12

- Consider a binary input, output channel shown below.

Find $H(X), H(Y), H(X|Y), H(Y|X)$ and $H(XY)$

- A discrete memory less source has an alphabet of seven symbols with probabilities 0.3, 0.20, 0.16, 0.14, 0.10, 0.02, 0.08 resp. Compute Huffman code for this source, calculate entropy, avg. codeword length & variance of this code.
- With suitable diagram explain ADM transmitter & receiver.

Section – II

Q.4 Attempt the following. (Any Four)

16

- What is coherent and non coherent detection? Give suitable examples.
- With suitable waveforms and equations explain ASK, FSK and PSK.
- With suitable diagram explain DSSS transmitter & receiver.
- With suitable example & diagram explain FHSS. What are its types?
- Derive an expression for coding efficiency.

Q.5 Attempt the following. (Any Two)

- a) With suitable block diagram explain QPSK. What are its advantages? What are its applications?
- b) For a (6,3) code the generator matrix G is given by.

$$G = \begin{bmatrix} 1 & 0 & 0 & 0 & 0 & 1 \\ 0 & 1 & 0 & 1 & 0 & 1 \\ 0 & 0 & 1 & 1 & 1 & 0 \end{bmatrix}$$

- i) Realize an encoder for this code
- ii) Verify that this code is signal error correcting code
- iii) If the received codeword is 0 0 0 1 1 0, find the syndrome.
- c) Explain MSK modulator and demodulator with waveform.

- 10) The poles of the Butterworth LPF with cutoff frequency Ω_c .
- a) lie on the unit circle in s plane
 - b) lie on the RHS of s plane
 - c) lie on a circle of radius Ω_c
 - d) None of these
- 11) Which of the following is not true for IIR filters?
- a) Impulse response duration is infinite
 - b) They have poles
 - c) They give linear phase response
 - d) All of these
- 12) The FIR filter of order M gives linear phase response if _____.
- a) $h(n) < \infty$
 - b) $h(n) = h(-n)$
 - c) $h(n) = h(M - 1 - n)$
 - d) None of these
- 13) The hardware used in digital signal processor to scale down or scale up operands is _____.
- a) Barrel shifter
 - b) MAC
 - c) Multiplier
 - d) ALU
- 14) The Ideal filters are _____.
- a) Causal
 - b) Non causal
 - c) May be causal or non causal
 - d) None of these

- Instructions:** 1) All questions are compulsory.
 2) Figures to the right indicate neat marks.
 3) Assume suitable data if necessary.

Section – I

Q.2 Solve any four of the followings. 16

- a) State and prove circular time shift property of DFT of a DT signal.
- b) Compute circular convolution of the signal $x_1[n] = \{1,3,4,2\}$ & $x_2[n] = \{2,3,5,4\}$
- c) Compute 4 point DFT of the sequence $x(n) = \{1, -2, 3, 5\}$
- d) Consider the signal $x(n) = \{1, 4, 6, 2, 7, 4\}$, obtain following sequences
 - 1) $x_1(n) = x((-n))_6$
 - 2) $x_2(n) = x((n - 2))_6$
- e) Obtain the direct form realization of the system characterized by transfer function

$$H(z) = 1 + \frac{1}{2}Z^{-1} + \frac{3}{4}Z^{-2} + Z^{-3} + 2Z^{-4}$$

Q.3 Solve any two of the followings. 12

- a) Realize the IIR system given below in i. Direct form I, ii. Direct form II
 $y(n) = -y(n - 1) + 2y(n - 2) + x(n) + 2x(n - 1) + 3x(n - 2)$
- b) Obtain the output of a filter using overlap & save method whose input & impulse response are as below
 $x(n) = \{2, 1, 1, 3, 1, 4, 1, 2, 3, 4\}$ & $h(n) = \{2, 4, 3\}$
- c) Prove that the multiplication of the DFT's of two sequences is equivalent to the DFT of time domain circular convolution of two sequences.

Section – II

Q.4 Solve any four of the followings. 16

- a) What is signal flow graph? How to obtain signal flow graph for a given direct form structure? Explain with example.
- b) Draw and explain the barrel shifter block of DSP chip.
- c) Convert the analog filter to digital filter whose system function is

$$H(s) = \frac{(s + 0.2)}{(s + 0.2)^2 + 9}$$

Use bilinear transformation. Assume T = 1s.

- d) Given the desired specifications $\Omega_p, \Omega_s, \delta_1, \delta_2$ of Butterworth filter derive the relation for obtaining order N & cutoff frequency Ω_c .
- e) Explain in detail Multiply & Accumulate (MAC) unit of digital signal processor.

Q.5 Solve any two of the followings.

a) Explain bilinear transformation along with mapping between s domain & z domain in this method.

b) The desired frequency response of a low pass filter is

$$H_d(e^{j\omega}) = \begin{cases} e^{-2j\omega} & -\frac{\pi}{4} \leq \omega \leq \pi/4 \\ 0 & \frac{\pi}{4} \leq |\omega| \leq \pi \end{cases}$$

Determine $h_d(n)$. Also determine $h(n)$ using symmetric Rectangular window of length 5

c) Design a digital Butterworth filter to meet the following constraints.

$$\begin{aligned} 0.8 \leq |H(e^{j\omega})| \leq 1 & \quad 0 \leq \omega \leq 0.25\pi \\ |H(e^{j\omega})| \leq 0.2 & \quad 0.6\pi \leq \omega \leq \pi \end{aligned}$$

Using Bilinear transformation. Use $T = 1$ sec

- b) Draw and explain the barrel shifter block of DSP chip.
- c) Convert the analog filter to digital filter whose system function is

$$H(s) = \frac{(s + 0.2)}{(s + 0.2)^2 + 9}$$

Use bilinear transformation. Assume $T = 1s$.

- d) Given the desired specifications $\Omega_p, \Omega_s, \delta_1, \delta_2$ of Butterworth filter derive the relation for obtaining order N & cutoff frequency Ω_c .
- e) Explain in detail Multiply & Accumulate (MAC) unit of digital signal processor.

Q.5 Solve any two of the followings.

a) Explain bilinear transformation along with mapping between s domain & z domain in this method.

b) The desired frequency response of a low pass filter is

$$Hd(e^{j\omega}) = \begin{cases} e^{-2j\omega} & -\frac{\pi}{4} \leq \omega \leq \pi/4 \\ 0 & \frac{\pi}{4} \leq |\omega| \leq \pi \end{cases}$$

Determine $hd(n)$. Also determine $h(n)$ using symmetric Rectangular window of length 5

c) Design a digital Butterworth filter to meet the following constraints.

$$\begin{aligned} 0.8 \leq |H(e^{j\omega})| \leq 1 & \quad 0 \leq \omega \leq 0.25\pi \\ |H(e^{j\omega})| \leq 0.2 & \quad 0.6\pi \leq \omega \leq \pi \end{aligned}$$

Using Bilinear transformation. Use $T = 1$ sec

T.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
ELECTRONICS ENGINEERING
Microcontrollers (BTN04503)

Day & Date: Wednesday, 15-05-2024
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:**
- 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No. 3 (starting page of the Answer Book). Each question carry one mark.
 - 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 - 3) Figures to the right indicates full marks.
 - 4) Assume suitable data wherever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options.

14

- 1) MVI A, 00h is _____ byte instruction.

a) 3	b) 4
c) 2	d) 1
- 2) The time required to complete one memory/IO read/write operation is called as _____.

a) Instruction Cycle	b) T-state
c) Execution Cycle	d) Machine Cycle
- 3) The total amount of external code memory that can be interfaced to the 8051 is: _____.

a) 32K	b) 16K
c) 46K	d) 64K
- 4) After reset, SP register of 8051 is initialized to address _____.

a) 08H	b) 09H
c) 07H	d) 06H
- 5) In 8051 an external hardware interrupt 1 vector address is _____.

a) 000BH	b) 001BH
c) 0013H	d) 0023H
- 6) Which register is used to enable the interrupts?

a) TCON	b) IE
c) IP	d) SCON
- 7) Which signal of ADC 0808 is start the conversion?

a) ALE	b) START
c) EOC	d) SOC
- 8) Which of the following signal(s) of 8051 must be used in accessing external program ROM?

a) RD	b) WR
c) PSEN	d) both RD and WR

Set P

T.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
ELECTRONICS ENGINEERING
Microcontrollers (BTN04503)

Day & Date: Wednesday, 15-05-2024
Time: 10:00 AM To 01:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicates full marks.
3) Assume suitable data wherever needed and mention it clearly.

Section – I

Q.2 Solve any Four 16

- a) Draw and explain bus model used in the microprocessor.
- b) Compare microprocessor and microcontroller.
- c) Draw and explain memory organization in 8051.
- d) Write a 8051 program to two 16 bit numbers.
- e) Write 8051 assembly program to blink the LEDs connected to PORT B.

Q.3 Solve any Two 12

- a) Write 8051 C program to transfer the message "YES" serially at 9600 baud, 8-bit data, 1 stop bit. Do this continuously.
- b) Write an 8051 program to generate a square wave with clock period of 250ms on pin P1.0 continuously. Use Timer 1, mode 1 to create the delay. Assume XTAL = .0592 MHz.
- c) List the interrupt sources in 8051. Write their causes, flag affected, and vector address.

Section – II

Q.4 Solve Any Four 16

- a) Explain addressing modes in PIC 16F877.
- b) With block diagram Explain Timer-0 module used in PIC microcontroller.
- c) Interface a switch to P1.0 and write a program to send FFh when switch is closed and send 00h when switch is open.
- d) Explain PWM mode used in PIC microcontroller.
- e) How do you use the PORT D as PSP? Explain the different control signals and flags used in PSP communication.

Q.5 Solve Any Two 12

- a) Interface ADC 0808/09 to 8051. Write a program to covert analog voltage on channel 1 to digital.
- b) Draw and explain interfacing of 8K x 8 Data ROM to 8051. Write an assembly program to read 10 bytes starting at 2000h in external ROM.
- c) Interface two seven segment display to 8051 and write a program to display decimal values "00" to "99".

 - 4) Assume suitable data wherever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options.

14

- 1) Which of the following signal(s) of 8051 must be used in accessing external program ROM?
 - a) RD
 - b) WR
 - c) PSEN
 - d) both RD and WR
- 2) In PIC 16F877 interrupt vector is at _____ in program memory.
 - a) 000 h
 - b) 0004 h
 - c) 0040 h
 - d) 0400 h
- 3) If IRP bit of STATUS register is clear, then _____ will gets selected.
 - a) Bank 0
 - b) Bank 1
 - c) Bank 2 or 3
 - d) Bank 0 or 1
- 4) The PIC 16F877 has interrupts capability up to _____ sources.
 - a) 11
 - b) 13
 - c) 14
 - d) 16
- 5) Timer 1 of the PIC 16F877 is _____ bit, accessed as _____.
 - a) 8, timer/counter
 - b) 16, timer/counter
 - c) 8, timer
 - d) 8, counter
- 6) Which signal of ADC 0808 is specify the conversion completion?
 - a) ALE
 - b) START
 - c) EOC
 - d) SOC
- 7) Operating CCP1 module in PWM mode, PWM period can be set by writing to _____ register.
 - a) PR1
 - b) TMR2
 - c) PR2
 - d) CCP1RL
- 8) MVI A, 00h is _____ byte instruction.
 - a) 3
 - b) 4
 - c) 2
 - d) 1

Duration: 30 Minutes

Marks:14

Q.1 Select suitable option

14

- 1) OLAP is used for _____.
 a) decisions
 b) payment
 c) content management
 d) all of these
- 2) Elementary description of thing, events, activities and transactions is called _____.
 a) attributes
 b) features
 c) data
 d) all of these
- 3) What is not true about DBMS?
 a) it is software
 b) it is very costly always
 c) it acts as an interface between application program and physical data files
 d) it can update data
- 4) Who amongst below is a knowledge worker?
 a) teller in the bank
 b) billing person in the retail store
 c) chartered account in the firm
 d) none of these
- 5) Select appropriate sequence _____.
 a) database, data, knowledge, information
 b) data, database, knowledge, information
 c) data, database, information, knowledge
 d) information, database, knowledge, data
- 6) Two types of decision support systems are _____ and _____.
 a) model driven, data driven
 b) data based, information based
 c) middle, upper
 d) TPS, ERP

- 7) In _____ model, typically, the outcome of one phase acts as the input for the next phase sequentially.
- a) RAD
 - b) Waterfall
 - c) Prototyping
 - d) SDLC
- 8) Take odd man out - MS Project, MS Access, DB2, Oracle
- a) MS Project
 - b) MS Access
 - c) DB2
 - d) Oracle
- 9) A _____ is a product or outcome that is given to the client.
- a) milestone
 - b) SDLC
 - c) waterfall
 - d) none of these
- 10) As the cost of IS _____, it is substituted for labor, which is _____.
- a) increasing, increasing
 - b) decreasing, increasing
 - c) decreasing, decreasing
 - d) increasing, decreasing
- 11) A company only involved in E Commerce is called _____.
- a) brick and mortar
 - b) click and mortar
 - c) virtual organization
 - d) B2B
- 12) What for IS & IT are used in Digital Enterprises?
- a) Research
 - b) Boost employee productivity
 - c) Customer support
 - d) All of these
- 13) Take an odd man out - NEFT, IRCTC, RTGS, PayTM
- a) NEFT
 - b) IRCTC
 - c) RTGS
 - d) PayTM
- 14) Which of below is a major disadvantage of a centralized database?
- a) Expensive
 - b) Requires scheduling
 - c) Causes delays
 - d) All of these

 a) Expensive b) Requires scheduling
 c) Causes delays d) All of these
- 5) OLAP is used for _____.
 a) decisions b) payment
 c) content management d) all of these
- 6) Elementary description of thing, events, activities and transactions is called _____.
 a) attributes b) features
 c) data d) all of these
- 7) What is not true about DBMS?
 a) it is software
 b) it is very costly always
 c) it acts as an interface between application program and physical data files
 d) it can update data
- 8) Who amongst below is a knowledge worker?
 a) teller in the bank
 b) billing person in the retail store
 c) chartered account in the firm
 d) none of these

- 9) Select appropriate sequence _____.
- a) database, data, knowledge, information
 - b) data, database, knowledge, information
 - c) data, database, information, knowledge
 - d) information, database, knowledge, data
- 10) Two types of decision support systems are _____ and _____.
- a) model driven, data driven
 - b) data based, information based
 - c) middle, upper
 - d) TPS, ERP
- 11) In _____ model, typically, the outcome of one phase acts as the input for the next phase sequentially.
- a) RAD
 - b) Waterfall
 - c) Prototyping
 - d) SDLC
- 12) Take odd man out - MS Project, MS Access, DB2, Oracle
- a) MS Project
 - b) MS Access
 - c) DB2
 - d) Oracle
- 13) A _____ is a product or outcome that is given to the client.
- a) milestone
 - b) SDLC
 - c) waterfall
 - d) none of these
- 14) As the cost of IS _____, it is substituted for labor, which is _____.
- a) increasing, increasing
 - b) decreasing, increasing
 - c) decreasing, decreasing
 - d) increasing, decreasing

Set R

T.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
ELECTRONICS ENGINEERING
Information Technology and Management (BTN04513)

Day & Date: Thursday, 16-05-2024
Time: 10:00 AM To 01:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

SECTION – I

- Q.2 Solve Any Two** **12**
- a) Compare centralized and distributed databases.
 - b) To whom and how IT supports in enterprise?
 - c) With one suitable application discuss electronic content management.
- Q.3 Solve Any Four** **16**
- a) Discuss benefits of E commerce to organizations.
 - b) Evaluate data management problems and challenges.
 - c) Compare OLAP and data mining.
 - d) Describe any four models of e business.
 - e) Justify with example - IT flattens organization structure.

SECTION – II

- Q.4 Solve Any Two** **12**
- a) Explain economical impact of IS on organization.
 - b) Discuss how enterprise resource planning system is being implemented.
 - c) What are the features of modern organization? How IS helps modern organizations?
- Q.5 Solve Any Four** **16**
- a) Discuss pros and cons of waterfall SDLC model.
 - b) How IS and organization are related?
 - c) With suitable example explain de-skilling.
 - d) With suitable example explain employee privacy issue in modern organization.
 - e) With suitable example discuss project requirement specifications.

Seat No.

Set **S**

T.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
ELECTRONICS ENGINEERING
Information Technology and Management (BTN04513)

Day & Date: Thursday, 16-05-2024
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries two marks.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Assume data wherever necessary
 4) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Select suitable option**14**

- 1) Two types of decision support systems are _____ and _____.
 a) model driven, data driven
 b) data based, information based
 c) middle, upper
 d) TPS, ERP
- 2) In _____ model, typically, the outcome of one phase acts as the input for the next phase sequentially.
 a) RAD
 b) Waterfall
 c) Prototyping
 d) SDLC
- 3) Take odd man out - MS Project, MS Access, DB2, Oracle
 a) MS Project
 b) MS Access
 c) DB2
 d) Oracle
- 4) A _____ is a product or outcome that is given to the client.
 a) milestone
 b) SDLC
 c) waterfall
 d) none of these
- 5) As the cost of IS _____, it is substituted for labor, which is _____.
 a) increasing, increasing
 b) decreasing, increasing
 c) decreasing, decreasing
 d) increasing, decreasing
- 6) A company only involved in E Commerce is called _____.
 a) brick and mortar
 b) click and mortar
 c) virtual organization
 d) B2B
- 7) What for IS & IT are used in Digital Enterprises?
 a) Research
 b) Boost employee productivity
 c) Customer support
 d) All of these
- 8) Take an odd man out - NEFT, IRCTC, RTGS, PayTM
 a) NEFT
 b) IRCTC
 c) RTGS
 d) PayTM

T.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
ELECTRONICS ENGINEERING
Managerial Economics (BTN04514)

Day & Date: Thursday, 16-05-2024
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options. 14

- 1) A positive cross elasticity of demand coefficient indicates that _____.
 - a) a product is an inferior good
 - b) a product is a normal good
 - c) two products are substitute goods
 - d) two products are complementary goods
- 2) Time series patterns that repeat themselves after a period of days or weeks are called _____.
 - a) random variation
 - b) trend
 - c) cycles
 - d) seasonality
- 3) In time series, which of the following cannot be predicted?
 - a) large increases in demand
 - b) technological trends
 - c) seasonal fluctuations
 - d) random fluctuations
- 4) Short run is a period of time over which at least one factor must _____.
 - a) Remain flexible
 - b) Remain fixed
 - c) Variable
 - d) None of the above
- 5) If the short-run average variable costs of production for a firm are rising, then this indicates that _____.
 - a) average total costs are at a maximum
 - b) average fixed costs are constant
 - c) marginal costs are above average variable costs
 - d) average variable costs are below average fixed costs
- 6) Perfectly competitive firms are price takers because _____.
 - a) each firm is very large
 - b) there are no good substitutes for their goods
 - c) many other firms produce identical products
 - d) their demand curves are downward sloping
- 7) The demand curve faced by a monopolistically competitive firm is _____.
 - a) perfectly elastic
 - b) elastic
 - c) unit elastic
 - d) inelastic

- 8) "Capitalism" refers to: _____.
- a) the use of markets
 - b) government ownership of capital goods
 - c) private ownership of capital goods
 - d) private ownership of homes & cars
- 9) Macroeconomics deals with _____.
- a) The behavior of firms
 - b) Economic aggregates
 - c) The activities of individual units
 - d) The behavior of the electronics industry
- 10) The study of inflation is part of _____.
- a) Normative economics
 - b) Macroeconomics
 - c) Microeconomics
 - d) Descriptive economics
- 11) Which of the following is a determinant of demand?
- a) the price of a substitute good
 - b) the price of a complement good
 - c) the price of the good next month
 - d) all of the above
- 12) The demand curve for a normal good shift leftward if income _____ or the expected future price _____.
- a) decreases; falls
 - b) increases; rises
 - c) increases; falls
 - d) decreases; rises
- 13) A surplus occurs when the price is _____.
- a) equal to the equilibrium price
 - b) greater than the equilibrium price
 - c) less than the equilibrium price
 - d) None of the above
- 14) If two goods are complements, then _____.
- a) the cross-price elasticity of demand will be negative
 - b) the cross-price elasticity of demand will be zero
 - c) the cross-price elasticity of demand will be positive
 - d) an increase in the price of one good will increase demand for the other

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

- Q.2 Solve any Four** **16**
- a) Explain scope of managerial economics for business decision.
 - b) State the difference between Microeconomics and Macroeconomics.
 - c) Explain measuring values of market exchange.
 - d) Explain the concept Price ceilings and Price floors.
 - e) Explain the concept elasticity of demand in detail.
 - f) Explain the concept income elasticity of demand.
- Q.3 Solve any Two** **12**
- a) Explain economics contribution to managerial decision.
 - b) Explain cardinal and ordinal approach of consumer behavior.
 - c) Explain elasticities for nonlinear demand functions.

Section – II

- Q.4 Solve any Four.** **16**
- a) Describe Survey Methods for demand forecasting.
 - b) Explain linear Regression method for demand forecasting.
 - c) What is production? Explain the concept of production function.
 - d) Explain breakeven analysis. Also state the limitations of breakeven analysis.
 - e) What is market? Explain the various types of market.
 - f) Explain the concept supply side of market.
- Q.5 Solve any Two.** **12**
- a) State and explain the applications of Linear Programming Techniques.
 - b) Explain Market Structure. Also state the objectives of market structure.
 - c) Explain following costs of production:
 - i) Fixed and Variable Costs
 - ii) Total, Average, and Marginal Costs
 - iii) Short-Run and Long-Run Costs

 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the given options.

14

- 1) Which is not one of the natures of ethics?

a) Focus on human values	b) Social work
c) Branch of philosophy	d) Applies moral principles
- 2) Which of the following is a basic definition of ethics?
 - a) moral guidelines for behavior
 - b) rules for acknowledging the spirit of the law
 - c) rules or principles that define right and wrong conduct
 - d) principles for legal and moral development
- 3) Which of the following does the term Corporate Social Responsibility relate to?

a) Ethical conduct	b) Environmental practice
c) Community investment	d) All of the above
- 4) What is meant by the phrase CSR?
 - a) Corporate Social Responsibility
 - b) Company Social Responsibility
 - c) Corporate Society Responsibility
 - d) Company Society Responsibility
- 5) Ethics should guide the technology towards _____.

a) Political justice	b) Cultural justice
c) Social justice	d) None of the above
- 6) The system that is used by firms to control and direct their operations and the operations of their employees is called _____.

a) Corporate Compliance	b) Corporate Governance
c) Corporate Control	d) Corporate Directive
- 7) The hand-of-government refers to the _____.
 - a) ability of the government to interfere in business negotiations
 - b) role of corporations to be profitable within the law
 - c) effect of national politics on business decisions
 - d) impact of changing government regulations

- 8) Which of the following relating to CSR theories is correct?
- a) Institutional theory is based on the shareholder concept
 - b) Social contract is the key concept of legitimacy theory
 - c) The key concept of enlightened self-interest is stakeholder relations
 - d) Stakeholder theory requires organizations to manage community perceptions to survive
- 9) Which one of the following is not principle business ethics?
- a) Principle of universality
 - b) Principle of humanity
 - c) Principle of autonomy
 - d) Principle of dissatisfaction
- 10) Codes of conduct and codes of ethics _____.
- a) are formal statements that describe what an organization expects of its employees
 - b) become necessary only after a company has been in legal trouble
 - c) are designed for top executives and managers, not regular employees
 - d) rarely become an effective component of the ethics and compliance program
- 11) Which of the following is not one the underlying principles of the corporate governance Combined Code of Practice?
- a) Integrity
 - b) Accountability
 - c) Openness
 - d) Acceptability
- 12) Most companies begin the process of establishing organizational ethics programs by developing _____.
- a) ethics training programs
 - b) codes of conduct
 - c) ethics enforcement mechanisms
 - d) hidden agendas
- 13) The four types of social responsibility include: _____.
- a) legal, philanthropic, economic, and ethical
 - b) ethical, moral, social, and economic
 - c) philanthropic, justice, economic, and ethical
 - d) legal, moral, ethical, and economic
- 14) Global organizations must _____ their ethical guidelines so that employees know what is expected of them while working in a foreign location.
- a) clarify
 - b) provide
 - c) establish
 - d) broaden

T.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
ELECTRONICS ENGINEERING
Business Ethics (BTN04516)

Day & Date: Thursday, 16-05-2024
Time: 10:00 AM To 01:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any four **16**

- a) What do you mean by business ethics? Explain the functions of business ethics.
- b) Explain 'Normative Ethics' in management.
- c) Mention the ethical issues that arise for managers.
- d) Explain the steps for setting standards of ethical behavior.
- e) Define corporate governance. Explain the principles of corporate governance.
- f) Explain the concept of corporate social responsibility (CSR).

Q.3 Solve any two **12**

- a) Discuss various principles of ethics and its implications in the modern business world.
- b) State the difficulties involved in ethical decision making. Bring out the guidelines which help ethical decision making.
- c) Explain the need of CSR in Indian business environment.

Section – II

Q.4 Solve any four **16**

- a) Explain ethical and social issues in marketing.
- b) State and explain ethical issues in the firm-employee relationship.
- c) Explain the relation between business ethics and environmental values.
- d) Explain the business ethics for pollution control.
- e) Explain moral significance of information technology to business.
- f) Explain the role of government in business ethics.

Q.5 Solve any two **12**

- a) Explain ethical challenges of globalization.
- b) State and explain the important parameters of environmental ethics.
- c) Explain the ethical issues arising in Information technology.

Business Ethics (BTN04516)

Day & Date: Thursday, 16-05-2024
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the given options.

14

- 1) Which of the following relating to CSR theories is correct?
 - a) Institutional theory is based on the shareholder concept
 - b) Social contract is the key concept of legitimacy theory
 - c) The key concept of enlightened self-interest is stakeholder relations
 - d) Stakeholder theory requires organizations to manage community perceptions to survive
- 2) Which one of the following is not principle business ethics?
 - a) Principle of universality
 - b) Principle of humanity
 - c) Principle of autonomy
 - d) Principle of dissatisfaction
- 3) Codes of conduct and codes of ethics _____.
 - a) are formal statements that describe what an organization expects of its employees
 - b) become necessary only after a company has been in legal trouble
 - c) are designed for top executives and managers, not regular employees
 - d) rarely become an effective component of the ethics and compliance program
- 4) Which of the following is not one the underlying principles of the corporate governance Combined Code of Practice?
 - a) Integrity
 - b) Accountability
 - c) Openness
 - d) Acceptability
- 5) Most companies begin the process of establishing organizational ethics programs by developing _____.
 - a) ethics training programs
 - b) codes of conduct
 - c) ethics enforcement mechanisms
 - d) hidden agendas
- 6) The four types of social responsibility include: _____.
 - a) legal, philanthropic, economic, and ethical
 - b) ethical, moral, social, and economic
 - c) philanthropic, justice, economic, and ethical
 - d) legal, moral, ethical, and economic

- 7) Global organizations must _____ their ethical guidelines so that employees know what is expected of them while working in a foreign location.
- a) clarify
 - b) provide
 - c) establish
 - d) broaden
- 8) Which is not one of the natures of ethics?
- a) Focus on human values
 - b) Social work
 - c) Branch of philosophy
 - d) Applies moral principles
- 9) Which of the following is a basic definition of ethics?
- a) moral guidelines for behavior
 - b) rules for acknowledging the spirit of the law
 - c) rules or principles that define right and wrong conduct
 - d) principles for legal and moral development
- 10) Which of the following does the term Corporate Social Responsibility relate to?
- a) Ethical conduct
 - b) Environmental practice
 - c) Community investment
 - d) All of the above
- 11) What is meant by the phrase CSR?
- a) Corporate Social Responsibility
 - b) Company Social Responsibility
 - c) Corporate Society Responsibility
 - d) Company Society Responsibility
- 12) Ethics should guide the technology towards _____.
- a) Political justice
 - b) Cultural justice
 - c) Social justice
 - d) None of the above
- 13) The system that is used by firms to control and direct their operations and the operations of their employees is called _____.
- a) Corporate Compliance
 - b) Corporate Governance
 - c) Corporate Control
 - d) Corporate Directive
- 14) The hand-of-government refers to the _____.

 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 3) Figures to the right indicate full marks.
 4) Assume suitable data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct option from the following.

14

- 1) The main function of problem-solving agent is to _____.
 a) Solve the given problem and reach the goal
 b) Find out which sequence of action will get it to the goal state
 c) Both a & b
 d) None of the above
- 2) The "Father of Artificial Intelligence" is: _____.
 a) Alan Turing
 b) Charles Babbage
 c) John McCarthy
 d) None of the above
- 3) Which of the following are heuristic search algorithms?
 a) Best First Search Algorithm
 b) A* Search Algorithm
 c) Both a and b
 d) None of the above
- 4) Which of the following is the common language for Artificial Intelligence?
 a) Python
 b) Java
 c) Lisp
 d) PHP
- 5) Which of the following is a type of artificial intelligence agent?
 a) Learning AI Agent
 b) Simple Reflex AI Agent
 c) Goal-Based AI Agent
 d) All of the above
- 6) Which of the following are appropriate levels for a knowledge- based AI agent?
 a) Knowledge Level
 b) Logical Level
 c) Implementation Level
 d) All of the above
- 7) Decisions of Victory/Defeat are made in Game trees using which algorithm?
 a) DFS
 b) BFS
 c) Heuristic Search
 d) Min/Max Algorithm

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary.

Section – I

- Q.2 Solve any four questions. 16**
- a) Explain AO* Search Algorithm with example.
 - b) Define Artificial Intelligence and what are the Applications of AI.
 - c) State & explain different types of Agents.
 - d) Write Short note on ontologies in knowledge representation.
 - e) Differentiate Informed & Uninformed search.
- Q.3 Solve any two questions. 12**
- a) Explain the following search algorithm with example
 - 1) BFS
 - 2) A* Search
 - b) What is Knowledge based system? Explain First Order Logic in details.
 - c) State Different types of uniformed search algorithm. Explain any one in details along with advantages & disadvantages.

Section – II

- Q.4 Solve any four questions. 16**
- a) Write a note on Bayesian Network.
 - b) Explain in detail about conditional Probability.
 - c) What is elementary game theory? Explain with example.
 - d) What is Utility Theory? How it will become helpful for talking decision?
 - e) Explain in detail about streaming scenario in learning & knowledge acquisition.
- Q.5 Solve any two questions. 12**
- a) Explain Decision Tree in details with one example.
 - b) Explain Probability and Bayes' theorem along with example.
 - c) Explain in brief the scalability issues in learning & knowledge acquisition.

 4) Assume suitable data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct option from the following.

14

- 1) What are the different types of Artificial Intelligence approaches?

a) Strong Approach	b) Weak Approach
c) Applied Approach	d) All of the above
- 2) How an AI agent does interact with its environment?

a) Using sensors and perceivers	b) Using only sensors
c) Using only perceivers	d) None of the above
- 3) The correct ways to solve a problem of state-space search are?

a) Forward from the initial state	b) Backward from the goal
c) Both a and b	d) None of the above
- 4) Out of the given options, which of the following algorithms uses the least memory?

a) DFS	b) BFS
c) Both a and b are the same	d) Cannot be compared
- 5) A technique that was developed to determine whether a machine could or could not demonstrate the artificial intelligence known as the _____.

a) Boolean Algebra	b) Turing Test
c) Logarithm	d) Algorithm
- 6) How is a decision reached upon by a decision tree?

a) No test	b) Single test
c) Double test	d) Multiple sequences of test
- 7) A production rule consists of _____.

a) A set of Rule	b) A sequence of steps
c) Set of Rule & sequence of steps	d) Arbitrary representation to problem

- 8) The main function of problem-solving agent is to _____.
a) Solve the given problem and reach the goal
b) Find out which sequence of action will get it to the goal state
c) Both a & b
d) None of the above
- 9) The "Father of Artificial Intelligence" is: _____.
a) Alan Turing
b) Charles Babbage

- Instructions:**
- 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No.3 (starting page of the Answer Book). Each question carry one mark.
 - 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 - 3) Figures to the right indicate full marks.
 - 4) Assume suitable data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct option from the following.

14

- 1) Out of the given options, which of the following algorithms uses the least memory?

a) DFS	b) BFS
c) Both a and b are the same	d) Cannot be compared
- 2) A technique that was developed to determine whether a machine could or could not demonstrate the artificial intelligence known as the _____.

a) Boolean Algebra	b) Turing Test
c) Logarithm	d) Algorithm
- 3) How is a decision reached upon by a decision tree?

a) No test	b) Single test
c) Double test	d) Multiple sequences of test
- 4) A production rule consists of _____.

a) A set of Rule	b) A sequence of steps
c) Set of Rule & sequence of steps	d) Arbitrary representation to problem
- 5) The main function of problem-solving agent is to _____.

a) Solve the given problem and reach the goal	b) Find out which sequence of action will get it to the goal state
c) Both a & b	d) None of the above
- 6) The "Father of Artificial Intelligence" is: _____.

a) Alan Turing	b) Charles Babbage
c) John McCarthy	d) None of the above
- 7) Which of the following are heuristic search algorithms?

a) Best First Search Algorithm	b) A* Search Algorithm
c) Both a and b	d) None of the above

Seat No.	
-----------------	--

T.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
ELECTRONICS ENGINEERING
Artificial Intelligence (BTN04517)

Day & Date: Friday, 17-05-2024
Time: 10:00 AM To 01:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary.

Section – I

- Q.2 Solve any four questions. 16**
- a) Explain AO* Search Algorithm with example.
 - b) Define Artificial Intelligence and what are the Applications of AI.
 - c) State & explain different types of Agents.
 - d) Write Short note on ontologies in knowledge representation.
 - e) Differentiate Informed & Uninformed search.
- Q.3 Solve any two questions. 12**
- a) Explain the following search algorithm with example
 - 1) BFS
 - 2) A* Search
 - b) What is Knowledge based system? Explain First Order Logic in details.
 - c) State Different types of uniformed search algorithm. Explain any one in details along with advantages & disadvantages.

Section – II

- Q.4 Solve any four questions. 16**
- a) Write a note on Bayesian Network.
 - b) Explain in detail about conditional Probability.
 - c) What is elementary game theory? Explain with example.
 - d) What is Utility Theory? How it will become helpful for talking decision?
 - e) Explain in detail about streaming scenario in learning & knowledge acquisition.
- Q.5 Solve any two questions. 12**
- a) Explain Decision Tree in details with one example.
 - b) Explain Probability and Bayes' theorem along with example.
 - c) Explain in brief the scalability issues in learning & knowledge acquisition.

T.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
ELECTRONICS ENGINEERING
Artificial Intelligence (BTN04517)

Day & Date: Friday, 17-05-2024
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:**
- 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No.3 (starting page of the Answer Book). Each question carry one mark.
 - 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 - 3) Figures to the right indicate full marks.
 - 4) Assume suitable data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct option from the following.

14

- 1) Which of the following are appropriate levels for a knowledge- based AI agent?

a) Knowledge Level	b) Logical Level
c) Implementation Level	d) All of the above
- 2) Decisions of Victory/Defeat are made in Game trees using which algorithm?

a) DFS	b) BFS
c) Heuristic Search	d) Min/Max Algorithm
- 3) What are the different types of Artificial Intelligence approaches?

a) Strong Approach	b) Weak Approach
c) Applied Approach	d) All of the above
- 4) How an AI agent does interact with its environment?

a) Using sensors and perceivers	b) Using only sensors
c) Using only perceivers	d) None of the above
- 5) The correct ways to solve a problem of state-space search are?

a) Forward from the initial state	b) Backward from the goal
c) Both a and b	d) None of the above
- 6) Out of the given options, which of the following algorithms uses the least memory?

a) DFS	b) BFS
c) Both a and b are the same	d) Cannot be compared
- 7) A technique that was developed to determine whether a machine could or could not demonstrate the artificial intelligence known as the _____.

a) Boolean Algebra	b) Turing Test
c) Logarithm	d) Algorithm
- 8) How is a decision reached upon by a decision tree?

a) No test	b) Single test
c) Double test	d) Multiple sequences of test

- 9) A production rule consists of _____.
a) A set of Rule
b) A sequence of steps
c) Set of Rule & sequence of steps
d) Arbitrary representation to problem
- 10) The main function of problem-solving agent is to _____.
a) Solve the given problem and reach the goal
b) Find out which sequence of action will get it to the goal state
c) Both a & b
d) None of the above
- 11) The “Father of Artificial Intelligence” is: _____.
a) Alan Turing
b) Charles Babbage
c) John McCarthy
d) None of the above
- 12) Which of the following are heuristic search algorithms?
a) Best First Search Algorithm
b) A* Search Algorithm
c) Both a and b
d) None of the above
- 13) Which of the following is the common language for Artificial Intelligence?
a) Python
b) Java
c) Lisp
d) PHP
- 14) Which of the following is a type of artificial intelligence agent?
a) Learning AI Agent
b) Simple Reflex AI Agent
c) Goal-Based AI Agent
d) All of the above

2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary.

Section – I

- Q.2 Solve any four questions. 16**
- a) Explain AO* Search Algorithm with example.
 - b) Define Artificial Intelligence and what are the Applications of AI.
 - c) State & explain different types of Agents.
 - d) Write Short note on ontologies in knowledge representation.
 - e) Differentiate Informed & Uninformed search.
- Q.3 Solve any two questions. 12**
- a) Explain the following search algorithm with example
 - 1) BFS
 - 2) A* Search
 - b) What is Knowledge based system? Explain First Order Logic in details.
 - c) State Different types of uniformed search algorithm. Explain any one in details along with advantages & disadvantages.

Section – II

- Q.4 Solve any four questions. 16**
- a) Write a note on Bayesian Network.
 - b) Explain in detail about conditional Probability.
 - c) What is elementary game theory? Explain with example.
 - d) What is Utility Theory? How it will become helpful for talking decision?
 - e) Explain in detail about streaming scenario in learning & knowledge acquisition.
- Q.5 Solve any two questions. 12**
- a) Explain Decision Tree in details with one example.
 - b) Explain Probability and Bayes' theorem along with example.
 - c) Explain in brief the scalability issues in learning & knowledge acquisition.

- 10)** In the clustering algorithm the distance between cluster centroid to each object is calculated using _____ method.
- a) Euclidean distance
 - b) Clustering distance
 - c) Central distance
 - d) Cluster
- 11)** Artificial Neural Network is _____ algorithm.
- a) bio-inspired
 - b) head-inspired
 - c) human-inspired
 - d) all of above
- 12)** Dimensionality Reduction Techniques such as _____.
- a) Principle Component Analysis
 - b) Sampling
 - c) Aggregation
 - d) All
- 13)** The histogram of oriented gradients (HOG) is a feature descriptor used in computer vision and image processing for the purpose of _____.
- a) object detection
 - b) object classification
 - c) object clustering
 - d) all of above
- 14)** Numerical measure of how alike two data objects are _____.
- a) Irrelevant
 - b) Dissimilarity
 - c) Similarity
 - d) All

Time: 10:00 AM To 01:00 PM

Max. Marks: 56

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

- Q.2 Attempt the following (Any Four) 16**
- a) How data quality management is done.
 - b) List down the steps of a PCA algorithm.
 - c) What do you understand by subset selection?
 - d) What are the limitations of LDA?
 - e) What is discretization and why it is used?
- Q.3 Attempt the following (Any Two) 12**
- a) Explain in detail the four scales of measurements.
 - b) Explain Linear Discriminant Analysis (LDA) method.
 - c) Explain the three types of normalization.

Section – II

- Q.4 Attempt the following (Any Four) 16**
- a) Explain the concept of Quantization or Binning.
 - b) Explain models stacking.
 - c) What are some Stopping Criteria for k-Means Clustering?
 - d) What are the connected layers?
 - e) What is Gradient Orientation Histogram?
- Q.5 Attempt the following (Any Two) 12**
- a) Define the following terms Data, Task, Models, Features, Scalar, Vector and Spaces.
 - b) Explain how deep neural networks learning the image features.
 - c) Explain the steps of k-Means Clustering Algorithm.

 - 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 - 3) Figures to the right indicates full marks.
 - 4) Assume suitable data wherever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the given options.

14

- 1) In standardization, the features will be rescaled with _____.
 a) Mean 0 and Variance 0 b) Mean 0 and Variance 1
 c) Mean 1 and Variance 0 d) Mean 1 and Variance 1
- 2) Which of the following algorithm is most sensitive to outliers?
 a) K-means clustering algorithm b) K-medians clustering algorithm
 c) K-modes clustering algorithm d) K-medoids clustering algorithm
- 3) In the clustering algorithm the distance between cluster centroid to each object is calculated using _____ method.
 a) Euclidean distance b) Clustering distance
 c) Central distance d) Cluster
- 4) Artificial Neural Network is _____ algorithm.
 a) bio-inspired b) head-inspired
 c) human-inspired d) all of above
- 5) Dimensionality Reduction Techniques such as _____.
 a) Principle Component Analysis b) Sampling
 c) Aggregation d) All
- 6) The histogram of oriented gradients (HOG) is a feature descriptor used in computer vision and image processing for the purpose of _____.
 a) object detection b) object classification
 c) object clustering d) all of above
- 7) Numerical measure of how alike two data objects are _____.
 a) Irrelevant b) Dissimilarity
 c) Similarity d) All
- 8) Data Analysis is a process of _____.
 a) inspecting data b) cleaning data
 c) transforming data d) all of the above

- 9) Examples of Data Quality problems _____.
- a) Outliers data
 - b) Missing data
 - c) Duplicate data
 - d) All of these
- 10) What are the different types of attributes?
- a) Nominal
 - b) Ordinal
 - c) Special
 - d) All of above
- 11) Under fitting happens due to _____.
- a) fewer number of features
 - b) data has a high variance
 - c) no use of regularization
 - d) all of the above
- 12) Which Method is used for encoding the categorical variables?
- a) Label Encoder
 - b) One Hot Encoder
 - c) Category Encoder
 - d) All of the above
- 13) _____ is a category, also called supervised machine learning methods in which the data is split on two parts.
- a) Classification
 - b) Clustering
 - c) Data mining
 - d) None of the mentioned above
- 14) What is the use of the bin/binnary data structure?
- a) to have efficient insertion
 - b) to have efficient deletion
 - c) to have efficient region query
 - d) to have efficient traversal

Day & Date: Friday, 17-05-2024
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the given options.

14

- 1) What is the primary focus of Living on the edge in the context of data-driven edge with machine learning?
 - a) Managing cloud infrastructure
 - b) Bringing machine learning to the edge
 - c) Developing IoT devices
 - d) Optimizing data storage
- 2) Which of the following is NOT mentioned as a tool to get the job done in the data-driven edge environment?
 - a) IoT Greengrass
 - b) Stream Manager
 - c) TensorFlow
 - d) Apache Kafka
- 3) What is emphasized as a demand for smart home and industrial IoT?
 - a) Complexity reduction
 - b) Centralized control
 - c) Increased latency
 - d) Limited connectivity
- 4) What is IoT Greengrass primarily used for in edge ML solutions?
 - a) Data visualization
 - b) Edge device management
 - c) Cloud storage
 - d) Machine learning model training
- 5) What is the significance of checking compatibility with IoT Device Tester?
 - a) Ensures compatibility with cloud platforms
 - b) Verifies adherence to IoT standards
 - c) Tests machine learning algorithms
 - d) Evaluates network bandwidth requirements
- 6) Which aspect is NOT part of exploring the topology of the edge?
 - a) Understanding network architecture
 - b) Identifying edge computing devices
 - c) Reviewing machine learning algorithms
 - d) Analyzing data flow patterns

- 7) What is a primary concern regarding security at the edge?
- a) Network bandwidth optimization
 - b) Data encryption and integrity
 - c) Device compatibility with cloud services
 - d) Machine learning model complexity
- 8) What is the first step in connecting a sensing device at the edge?
- a) Configuring cloud synchronization
 - b) Installing IoT Greengrass
 - c) Connecting to a power source
 - d) Setting up machine learning models
- 9) What is a key advantage of creating and deploying remotely in edge computing?
- a) Minimizing network latency
 - b) Centralizing data processing
 - c) Enhancing cloud security measures
 - d) Optimizing machine learning model training
- 10) Where are logs typically stored in the cloud in edge computing environments?
- a) Local edge devices
 - b) Cloud storage services
 - c) IoT Greengrass
 - d) Machine learning libraries
- 11) What is the purpose of defining data models for IoT workloads?
- a) Optimizing cloud storage utilization
 - b) Ensuring interoperability between devices
 - c) Enhancing machine learning model accuracy
 - d) Centralizing data processing
- 12) Which factor is NOT considered when designing data patterns for the edge?
- a) Network bandwidth
 - b) Data consistency
 - c) Edge device compatibility
 - d) Cloud storage capacity
- 13) How does Stream Manager contribute to data ingestion and streaming?
- a) By optimizing machine learning model training
 - b) By ensuring data consistency and integrity
 - c) By automating device management tasks
 - d) By facilitating real-time data processing
- 14) What is the main objective of building data orchestration workflows on the edge?
- a) Minimizing cloud storage costs
 - b) Enhancing machine learning model training
 - c) Optimizing data processing efficiency
 - d) Centralizing data analytics

T.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
ELECTRONICS ENGINEERING
Industrial IoT (BTN04519)

Day & Date: Friday, 17-05-2024
Time: 10:00 AM To 01:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate.
3) Assume suitable data if required.

Section – I

Q.2 Attempt the following (Any Three) 12

- Discuss the significance of bringing machine learning to the edge in terms of data privacy and security.
- Discuss the challenges and advantages of deploying edge components remotely in edge computing.
- Explain the challenges and strategies associated with ensuring security at the edge in IoT environments.
- Evaluate the challenges associated with implementing edge ML solutions in real-world environments.

Q.3 Attempt the following (Any Two) 16

- Evaluate the impact of IoT Greengrass on optimizing data transmission to the cloud.
- Explain the importance of device connectivity in enhancing the functionality of edge computing solutions.
- Evaluate the impact of deploying ML models at the edge on enhancing real-time decision-making.

Section – II

Q.4 Attempt the following (Any Three) 12

- Analyze the impact of remote deployment on the scalability and efficiency of edge computing solutions.
- Discuss the implications of storing logs in the cloud for optimizing data analysis and troubleshooting.
- Evaluate the impact of streaming from the edge to a data lake on the cloud for enabling advanced analytics and decision-making processes.
- Discuss the significance of designing data flow patterns on the cloud for efficient data processing and consumption in IoT environments and their implications for real-time analytics.

Q.5 Attempt the following. (Any Two)

- a) Evaluate the role of designing data patterns for optimizing data flow in edge computing environments and analyze their impact on data transmission efficiency.
- b) Discuss the challenges and advantages of building data orchestration workflows on edge for enhancing real-time data processing capabilities and system reliability.
- c) Analyze the role of cloud computing in facilitating efficient data processing and consumption in IoT deployments and its impact on system performance and reliability.

Set **Q**

T.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
ELECTRONICS ENGINEERING
Industrial IoT (BTN04519)

Day & Date: Friday, 17-05-2024
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the given options.

14

- 1) What is the first step in connecting a sensing device at the edge?
 - a) Configuring cloud synchronization
 - b) Installing IoT Greengrass
 - c) Connecting to a power source
 - d) Setting up machine learning models
- 2) What is a key advantage of creating and deploying remotely in edge computing?
 - a) Minimizing network latency
 - b) Centralizing data processing
 - c) Enhancing cloud security measures
 - d) Optimizing machine learning model training
- 3) Where are logs typically stored in the cloud in edge computing environments?

a) Local edge devices	b) Cloud storage services
c) IoT Greengrass	d) Machine learning libraries
- 4) What is the purpose of defining data models for IoT workloads?
 - a) Optimizing cloud storage utilization
 - b) Ensuring interoperability between devices
 - c) Enhancing machine learning model accuracy
 - d) Centralizing data processing
- 5) Which factor is NOT considered when designing data patterns for the edge?

a) Network bandwidth	b) Data consistency
c) Edge device compatibility	d) Cloud storage capacity
- 6) How does Stream Manager contribute to data ingestion and streaming?
 - a) By optimizing machine learning model training
 - b) By ensuring data consistency and integrity
 - c) By automating device management tasks
 - d) By facilitating real-time data processing

- 7) What is the main objective of building data orchestration workflows on the edge?
- Minimizing cloud storage costs
 - Enhancing machine learning model training
 - Optimizing data processing efficiency
 - Centralizing data analytics
- 8) What is the primary focus of Living on the edge in the context of data-driven edge with machine learning?
- Managing cloud infrastructure
 - Bringing machine learning to the edge
 - Developing IoT devices
 - Optimizing data storage
- 9) Which of the following is NOT mentioned as a tool to get the job done in the data-driven edge environment?
- IoT Greengrass
 - Stream Manager
 - TensorFlow
 - Apache Kafka
- 10) What is emphasized as a demand for smart home and industrial IoT?
- Complexity reduction
 - Centralized control
 - Increased latency
 - Limited connectivity
- 11) What is IoT Greengrass primarily used for in edge ML solutions?
- Data visualization
 - Edge device management
 - Cloud storage
 - Machine learning model training
- 12) What is the significance of checking compatibility with IoT Device Tester?
- Ensures compatibility with cloud platforms
 - Verifies adherence to IoT standards
 - Tests machine learning algorithms
 - Evaluates network bandwidth requirements
- 13) Which aspect is NOT part of exploring the topology of the edge?
- Understanding network architecture
 - Identifying edge computing devices
 - Reviewing machine learning algorithms
 - Analyzing data flow patterns
- 14) What is a primary concern regarding security at the edge?
- Network bandwidth optimization
 - Data encryption and integrity
 - Device compatibility with cloud services
 - Machine learning model complexity

T.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
ELECTRONICS ENGINEERING
Industrial IoT (BTN04519)

Day & Date: Friday, 17-05-2024
Time: 10:00 AM To 01:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate.
3) Assume suitable data if required.

Section – I

Q.2 Attempt the following (Any Three) 12

- Discuss the significance of bringing machine learning to the edge in terms of data privacy and security.
- Discuss the challenges and advantages of deploying edge components remotely in edge computing.
- Explain the challenges and strategies associated with ensuring security at the edge in IoT environments.
- Evaluate the challenges associated with implementing edge ML solutions in real-world environments.

Q.3 Attempt the following (Any Two) 16

- Evaluate the impact of IoT Greengrass on optimizing data transmission to the cloud.
- Explain the importance of device connectivity in enhancing the functionality of edge computing solutions.
- Evaluate the impact of deploying ML models at the edge on enhancing real-time decision-making.

Section – II

Q.4 Attempt the following (Any Three) 12

- Analyze the impact of remote deployment on the scalability and efficiency of edge computing solutions.
- Discuss the implications of storing logs in the cloud for optimizing data analysis and troubleshooting.
- Evaluate the impact of streaming from the edge to a data lake on the cloud for enabling advanced analytics and decision-making processes.
- Discuss the significance of designing data flow patterns on the cloud for efficient data processing and consumption in IoT environments and their implications for real-time analytics.

Q.5 Attempt the following. (Any Two)

- a) Evaluate the role of designing data patterns for optimizing data flow in edge computing environments and analyze their impact on data transmission efficiency.
- b) Discuss the challenges and advantages of building data orchestration workflows on edge for enhancing real-time data processing capabilities and system reliability.
- c) Analyze the role of cloud computing in facilitating efficient data processing and consumption in IoT deployments and its impact on system performance and reliability.

Economics (BTN04506)

Day & Date: Monday, 20-05-2024
 Time: 10:00 AM To 12:00 PM

Max. Marks: 50

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 20 Minutes

Marks: 10

Q.1 Choose the correct alternatives from the options. 10

- 1) Who gives a welfare definition of economics?
 - a) Adam Smith
 - b) Alfred Marshall
 - c) Lionel Robbins
 - d) Paul Samuelson
- 2) The type of equilibrium that deals with the determination of price and quantity of only one _____.
 - a) General equilibrium
 - b) Partial equilibrium
 - c) Zero equilibrium
 - d) Pareto efficiency
- 3) Who is known as father of economics?
 - a) Adam Smith
 - b) Prof. A. Samulson
 - c) Alfred Marshall
 - d) J. R. Hicks
- 4) Macroeconomic theory deals with _____.
 - a) The behavior of firms
 - b) The activities of individual units
 - c) Economic aggregates
 - d) The behavior of the electronics industry
- 5) Which of the following market types has all firms selling products so identical that buyers do not care from which firm they buy?
 - a) Perfect competition
 - b) Oligopoly
 - c) Monopolistic competition
 - d) Monopoly
- 6) Which of the following is the best example of a natural monopoly?
 - a) owning the only licensed taxicab in town
 - b) the United States Postal Service
 - c) ownership of the only ferry across Puget Sound for twenty miles
 - d) the cable television company in your hometown
- 7) Which of the following is not a regulatory institution in Indian financial system?
 - a) RBI
 - b) CIBIL
 - c) SEBI
 - d) IRDA

- 8) Money supply increases when inflation rises in the economy _____.
- a) Increase
 - b) Decrease
 - c) No change
 - d) None of the above
- 9) Market system means: _____.
- a) Socialism
 - b) Capitalism
 - c) A place where goods are traded
 - d) All of the above
- 10) _____ is the application of knowledge which redefines the boundaries of global business.

T. Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
ELECTRONICS ENGINEERING
Stress and Coping (BTN04509)

Day & Date: Monday, 20-05-2024
 Time: 10:00 AM To 12:00 PM

Max. Marks: 50

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.
 4) Assume suitable data wherever needed & mention it clearly.

MCQ/Objective Type Questions

Duration: 20 Minutes

Marks:10

Q.1 Choose amongst the alternatives.

10

- 1) When a task appears overwhelming, it is best to _____.
 a) Put it aside till later
 b) Drink alcohol to relax
 c) Break it down into smaller task
 d) Avoid the task
- 2) The word Stress is derived from Latin word 'Stringere' which means _____.
 a) Draw tight
 b) Stimulus
 c) Force
 d) Attitude
- 3) Which of the following statements is true?
 a) The stress response is nonspecific
 b) Different kinds of stressors produce exactly the same response
 c) Different people respond to the same stressor differently
 d) All of the above
- 4) When is a person more likely to have difficulty in coping with a stressful situation?
 a) When he is over the age of fifty
 b) When he expects a positive outcome
 c) When he thinks he does not have control over the situation
 d) When he has a good social support network
- 5) Aches, shallow breathing and sweating, frequent colds are _____.
 a) Physical symptoms of stress
 b) Behavioral symptoms of stress
 c) Emotional symptoms of stress
 d) Cognitive symptoms of stress
- 6) Anxiety can cause the following moods _____.
 a) Irritable
 b) Nervous
 c) Anxious
 d) All of the above
- 7) Which of the following are the physical symptoms of anxiety?
 a) Racing heart
 b) Sweaty palms
 c) Flushed cheeks
 d) All of the above

- 8)** Which of the following is true about 'deep breathing relaxation technique'?
- a) It can be self-taught
 - b) It releases tension from the body and clears your mind
 - c) You have to do this under-water
 - d) Only '1' & '2' are true
- 9)** Which of the following are stress busters?
- a) Trying to find something funny in a difficult situation
 - b) Developing a support network
 - c) Taking a mindful walk
 - d) All of the above
- 10)** Which one is not considered as Environmental stressors?
- a) Weather
 - b) Traffic
 - c) Financial problems
 - d) Substandard housing

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct option from the following.

14

- 1) Network device HUB is _____ layer device.
 - a) Physical
 - b) Data Link
 - c) Network
 - d) Application
- 2) The MAC id 06:12:EA:4F:30:98 is _____ type.
 - a) Unicast
 - b) Multicast
 - c) Broadcast
 - d) None of these
- 3) The ARQ stands for _____.
 - a) All Repeat Queue
 - b) Automatic Repeat Request
 - c) Automatic Resolve Question
 - d) None of these
- 4) Physical or logical arrangement of network is _____.
 - a) Topology
 - b) Routing
 - c) Group
 - d) None of these
- 5) Error detection at the data link level is achieved by _____.
 - a) Bit stuffing
 - b) CRC
 - c) Frame formation
 - d) Equalization
- 6) The maximum throughput for pure ALOHA is _____ percent.
 - a) 12.2
 - b) 18.4
 - c) 36.8
 - d) None of these
- 7) The network address (MAC) or Physical address present for each node in the network is of _____ bits.
 - a) 12
 - b) 32
 - c) 64
 - d) 48
- 8) The IP address 199.155.66.63 belongs to _____.

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2024
ELECTRONICS ENGINEERING
Computer Networks (BTN04601)

Day & Date: Tuesday, 21-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
 2) Figures to the right indicate full marks.
 3) Assume suitable data wherever necessary and mention it clearly.
 4) Draw neat diagrams.

Section – I

- Q.2 Answer any four.** **16**
- a) With the help of diagram and example explain EIA232 Serial Communication Protocol.
 - b) How CRC is used to detect the error in message transmission? For given message bits “1010111101” and divisor polynomial “1101” calculate CRC.
 - c) Calculate Hamming code-word for an ASCII character - 1011010. Assume even parity during transmission.
 - d) With neat diagram discuss the stop and wait protocol in detail.
 - e) Draw frame format of IEEE 802.3 LAN and explain each field in detail.
- Q.3 Attempt any two.** **12**
- a) Explain in detail IEEE 802.15 Bluetooth Protocol.
 - b) Draw and explain ISO-OSI reference model and discuss various issues handled by the layers.
 - c) Draw frame format of IEEE 802.4 protocol and explain each field in detail.

Section – II

- Q.4 Attempt any four.** **16**
- a) Draw TCP packet format and explain its header in detail.
 - b) What are different IP address classes? Write ranges of different IP addresses. What is default network mask for IP address 10.10.10.11?
 - c) Explain IP packet Header in detail with help of diagram.
 - d) Give the difference between Virtual circuit switching and datagram switching techniques.
 - e) Differentiate between OSPF and BGP in computer networks.
- Q.5 Attempt any two.** **12**
- a) What is encapsulation and decapsulation in TCP/IP? Discuss three-way handshake in TCP.
 - b) With neat diagram explain Link State Routing in detail.
 - c) With the help of Diagram Explain Client - Server Architecture.

- 9) The MAC id 06:12:EA:4F:30:98 is _____ type.
- a) Unicast
 - b) Multicast
 - c) Broadcast
 - d) None of these
- 10) The ARQ stands for _____.
- a) All Repeat Queue
 - b) Automatic Repeat Request
 - c) Automatic Resolve Question
 - d) None of these
- 11) Physical or logical arrangement of network is _____.
- a) Topology
 - b) Routing
 - c) Group
 - d) None of these
- 12) Error detection at the data link level is achieved by _____.
- a) Bit stuffing
 - b) CRC
 - c) Frame formation
 - d) Equalization
- 13) The maximum throughput for pure ALOHA is _____ percent.
- a) 12.2
 - b) 18.4
 - c) 36.8
 - d) None of these
- 14) The network address (MAC) or Physical address present for each node in the network is of _____ bits.
- a) 12
 - b) 32
 - c) 64
 - d) 48

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2024
ELECTRONICS ENGINEERING
Computer Networks (BTN04601)

Day & Date: Tuesday, 21-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
 2) Figures to the right indicate full marks.
 3) Assume suitable data wherever necessary and mention it clearly.
 4) Draw neat diagrams.

Section – I

- Q.2 Answer any four.** **16**
- With the help of diagram and example explain EIA232 Serial Communication Protocol.
 - How CRC is used to detect the error in message transmission? For given message bits “1010111101” and divisor polynomial “1101” calculate CRC.
 - Calculate Hamming code-word for an ASCII character - 1011010. Assume even parity during transmission.
 - With neat diagram discuss the stop and wait protocol in detail.
 - Draw frame format of IEEE 802.3 LAN and explain each field in detail.
- Q.3 Attempt any two.** **12**
- Explain in detail IEEE 802.15 Bluetooth Protocol.
 - Draw and explain ISO-OSI reference model and discuss various issues handled by the layers.
 - Draw frame format of IEEE 802.4 protocol and explain each field in detail.

Section – II

- Q.4 Attempt any four.** **16**
- Draw TCP packet format and explain its header in detail.
 - What are different IP address classes? Write ranges of different IP addresses. What is default network mask for IP address 10.10.10.11?
 - Explain IP packet Header in detail with help of diagram.
 - Give the difference between Virtual circuit switching and datagram switching techniques.
 - Differentiate between OSPF and BGP in computer networks.
- Q.5 Attempt any two.** **12**
- What is encapsulation and decapsulation in TCP/IP? Discuss three-way handshake in TCP.
 - With neat diagram explain Link State Routing in detail.
 - With the help of Diagram Explain Client - Server Architecture.

Seat No.	
-------------	--

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2024
ELECTRONICS ENGINEERING
Computer Networks (BTN04601)

Day & Date: Tuesday, 21-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.
 4) Draw neat diagrams.
 5) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct option from the following.

14

- 1) TCP packets have size of header of _____ bytes.
 - a) 8 to 10 bytes
 - b) 50 to 60 bytes
 - c) 20 to 40 bytes
 - d) 20 to 60 bytes
- 2) Router can recognize and work with _____ addresses.
 - a) Data Link Layer
 - b) Physical Layer
 - c) Network Layer
 - d) Application Layer
- 3) Count to infinity problem is present _____ Routing Protocol.
 - a) Shortest Path
 - b) Distance Vector
 - c) Link State
 - d) None of these
- 4) A _____ is one endpoint of a two-way communication link between two programs running on the network.
 - a) Gateway
 - b) Semaphore
 - c) Socket
 - d) None of these
- 5) Network device HUB is _____ layer device.
 - a) Physical
 - b) Data Link
 - c) Network
 - d) Application
- 6) The MAC id 06:12:EA:4F:30:98 is _____ type.
 - a) Unicast
 - b) Multicast
 - c) Broadcast
 - d) None of these
- 7) The ARQ stands for _____.
 - a) All Repeat Queue
 - b) Automatic Repeat Request
 - c) Automatic Resolve Question
 - d) None of these
- 8) Physical or logical arrangement of network is _____.
 - a) Topology
 - b) Routing
 - c) Group
 - d) None of these

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct option from the following.

14

- 1) The maximum throughput for pure ALOHA is _____ percent.
 - a) 12.2
 - b) 18.4
 - c) 36.8
 - d) None of these
- 2) The network address (MAC) or Physical address present for each node in the network is of _____ bits.
 - a) 12
 - b) 32
 - c) 64
 - d) 48
- 3) The IP address 199.155.66.63 belongs to _____.
 - a) Class A
 - b) Class B
 - c) Class C
 - d) Class D
- 4) The data unit in transport layer in TCP/IP is called _____.
 - a) A datagram
 - b) A segment
 - c) Frame
 - d) Bit-string
- 5) Which of the following is false with respect to UDP?
 - a) Connection oriented
 - b) Unreliable
 - c) Transport layer protocol
 - d) All of the mentioned
- 6) TCP packets have size of header of _____ bytes.
 - a) 8 to 10 bytes
 - b) 50 to 60 bytes
 - c) 20 to 40 bytes
 - d) 20 to 60 bytes
- 7) Router can recognize and work with _____ addresses.
 - a) Data Link Layer
 - b) Physical Layer
 - c) Network Layer
 - d) Application Layer
- 8) Count to infinity problem is present _____ Routing Protocol.
 - a) Shortest Path
 - b) Distance Vector
 - c) Link State
 - d) None of these

- 9) A _____ is one endpoint of a two-way communication link between two programs running on the network.
- a) Gateway
 - b) Semaphore
 - c) Socket
 - d) None of these
- 10) Network device HUB is _____ layer device.
- a) Physical
 - b) Data Link
 - c) Network
 - d) Application
- 11) The MAC id 06:12:EA:4F:30:98 is _____ type.
- a) Unicast
 - b) Multicast
 - c) Broadcast
 - d) None of these
- 12) The ARQ stands for _____.
- a) All Repeat Queue
 - b) Automatic Repeat Request
 - c) Automatic Resolve Question
 - d) None of these
- 13) Physical or logical arrangement of network is _____.
- a) Topology
 - b) Routing
 - c) Group
 - d) None of these
- 14) Error detection at the data link level is achieved by _____.
- a) Bit stuffing
 - b) CRC
 - c) Frame formation
 - d) Equalization

T.Y. (B.Tech.) (Sem-II) (New) (CBCS) Examination: March/April-2024
ELECTRONICS ENGINEERING
Embedded Systems (BTN04602)

Day & Date: Friday 24-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:**
- 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 - 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 - 3) Figures to the right indicates full marks.
 - 4) Assume suitable data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) A _____ processor has large number of general purpose registers.
 - a) CICS
 - b) RISC
 - c) Both a & b
 - d) None of the above
- 2) _____ mode is used when the processor encounters an instruction that is not supported by the implementation.
 - a) Supervisor
 - b) System
 - c) Undefined
 - d) About
- 3) Let $r0=0x02020202$ and $r1 =0x00009000$. What will be the content of $r1$ after execution of instruction "LDR $r0$, [$r1$], #4"?
 - a) 0x00009000
 - b) 0x02020202
 - c) 0x00009004
 - d) 0x00008ffb
- 4) In ARM _____ exception is having the highest priority.
 - a) Reset
 - b) Supervisor
 - c) System
 - d) Interrupt request
- 5) ARM uses the thumb _____ bit instruction set to improve code density.
 - a) 32
 - b) 8
 - c) 64
 - d) 16
- 6) Let $r0=0x00000000$ and $r1=0x00000005$. What will be the content of $r0$ after execution of instruction "ADD $r0$, $r1$, $r1$, LSL #1"?
 - a) 0x00000000
 - b) 0x00000005
 - c) 0x0000000a
 - d) 0x0000000f
- 7) The ARM register _____ is the program counter.
 - a) R12
 - b) R13
 - c) R14
 - d) R15
- 8) The on-chip ADC's of LPC2148 has _____ bit resolution and _____ conversion time.
 - a) 8, 2.44 μsec
 - b) 10, 2.44 μsec
 - c) 12, 1.44 μsec
 - d) 10, 1.44 μsec

- 9) In LPC2148 the _____ register is used to select the direction of port pins P1.0 to P1.31.
- a) IOCLR1
 - b) IODIR0
 - c) PINSEL2
 - d) IODIR1
- 10) The SPI bus can operate with a _____ master device/s and with _____ slave device/s.
- a) single, one
 - b) single, one or more
 - c) two, single
 - d) two, two
- 11) Information about a task is maintained in a _____.
- a) Stack
 - b) Translation Look aside Buffer
 - c) Task Control Block
 - d) Task Condition Block
- 12) A _____ is software for controlling, receiving, and sending a byte or stream of bytes from or to device.
- a) Kernel
 - b) Shell
 - c) Processor
 - d) Device Driver
- 13) Binary, Mutual exclusion, Counting are the types of _____.
- a) Queues
 - b) Pipes
 - c) Semaphores
 - d) Mailboxes
- 14) Inter task communication can be done through _____.
- a) Mailboxes
 - b) Queues
 - c) Pipes
 - d) All of above

T.Y. (B.Tech.) (Sem-II) (New) (CBCS) Examination: March/April-2024
ELECTRONICS ENGINEERING
Embedded Systems (BTN04602)

Day & Date: Friday 24-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any four. 16

- Write an ARM assembly program to add two 32 bit numbers.
- Explain the use of R13, R14, R15 registers in ARM7.
- Explain nomenclature used for ARM processors.
- Classify and review different addressing modes of ARM7 with examples.
- Define embedded system. Explain major characteristics which differs embedded system from desktop computer.

Q.3 Solve any two. 12

- What is pipeline? Explain it with suitable example.
- Draw and explain ARM core data flow model.
- Explain hardware and software architecture of embedded system.

Section – II

Q.4 Solve any four. 16

- What is a task? Elaborate the task control box (TCB) and its data in detail.
- List out the features of LPC2148
- Explain different inter-process communication techniques.
- Define RTOS. Explain its function.
- Explain the use of IOSET and IOCLR registers in LPC2148 with example.

Q.5 Solve any two. 12

- Interface 8 LED's to LPC2148 port pins P0.2 to P0.9. Write an embedded C program to blink them alternately continuously.
- Sketch and discuss interfacing of 16*2 LCD with LPC2148.
- What is context switch or task switch? Explain with neat diagram.

- 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 - 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 - 3) Figures to the right indicates full marks.
 - 4) Assume suitable data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) The on-chip ADC's of LPC2148 has _____ bit resolution and _____ conversion time.
 - a) 8, 2.44 μsec
 - b) 10, 2.44 μsec
 - c) 12, 1.44 μsec
 - d) 10, 1.44 μsec
- 2) In LPC2148 the _____ register is used to select the direction of port pins P1.0 to P1.31.
 - a) IOCLR1
 - b) IODIR0
 - c) PINSEL2
 - d) IODIR1
- 3) The SPI bus can operate with a _____ master device/s and with _____ slave device/s.
 - a) single, one
 - b) single, one or more
 - c) two, single
 - d) two, two
- 4) Information about a task is maintained in a _____.
 - a) Stack
 - b) Translation Look aside Buffer
 - c) Task Control Block
 - d) Task Condition Block
- 5) A _____ is software for controlling, receiving, and sending a byte or stream of bytes from or to device.
 - a) Kernel
 - b) Shell
 - c) Processor
 - d) Device Driver
- 6) Binary, Mutual exclusion, Counting are the types of _____.
 - a) Queues
 - b) Pipes
 - c) Semaphores
 - d) Mailboxes
- 7) Inter task communication can be done through _____.
 - a) Mailboxes
 - b) Queues
 - c) Pipes
 - d) All of above
- 8) A _____ processor has large number of general purpose registers.
 - a) CICS
 - b) RISC
 - c) Both a & b
 - d) None of the above

- 9) _____ mode is used when the processor encounters an instruction that is not supported by the implementation.
- a) Supervisor
 - b) System
 - c) Undefined
 - d) Abort
- 10) Let $r0=0x02020202$ and $r1 =0x00009000$. What will be the content of $r1$ after execution of instruction "LDR $r0, [r1], \#4$ "?
- a) $0x00009000$
 - b) $0x02020202$
 - c) $0x00009004$
 - d) $0x00008ffb$
- 11) In ARM _____ exception is having the highest priority.
- a) Reset
 - b) Supervisor
 - c) System
 - d) Interrupt request
- 12) ARM uses the thumb _____ bit instruction set to improve code density.
- a) 32
 - b) 8
 - c) 64
 - d) 16
- 13) Let $r0=0x00000000$ and $r1=0x00000005$. What will be the content of $r0$ after execution of instruction "ADD $r0, r1, r1, LSL \#1$ "?
- a) $0x00000000$
 - b) $0x00000005$
 - c) $0x0000000a$
 - d) $0x0000000f$
- 14) The ARM register _____ is the program counter.
- a) R12
 - b) R13
 - c) R14
 - d) R15

 - c) Explain nomenclature used for ARM processors.
 - d) Classify and review different addressing modes of ARM7 with examples.
 - e) Define embedded system. Explain major characteristics which differs embedded system from desktop computer.

- Q.3 Solve any two. 12**
- a) What is pipeline? Explain it with suitable example.
 - b) Draw and explain ARM core data flow model.
 - c) Explain hardware and software architecture of embedded system.

Section – II

- Q.4 Solve any four. 16**
- a) What is a task? Elaborate the task control box (TCB) and its data in detail.
 - b) List out the features of LPC2148
 - c) Explain different inter-process communication techniques.
 - d) Define RTOS. Explain its function.
 - e) Explain the use of IOSET and IOCLR registers in LPC2148 with example.

- Q.5 Solve any two. 12**
- a) Interface 8 LED's to LPC2148 port pins P0.2 to P0.9. Write an embedded C program to blink them alternately continuously.
 - b) Sketch and discuss interfacing of 16*2 LCD with LPC2148.
 - c) What is context switch or task switch? Explain with neat diagram.

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2024
ELECTRONICS ENGINEERING
VLSI Design (BTN04603)

Day & Date: Monday, 27-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct option from the following.

14

- 1) A test bench is used _____.
 - a) Verify the functionality of a design
 - b) To generate primitives
 - c) To generate net list
 - d) None of above

- 2) When the following signal assignment statement executes at 5 ns, the new value will be assigned to signal at what time?

$$X \leq a \text{ and } b \text{ after } 5 \text{ ns};$$
 - a) 10 ns;
 - b) 10 ns + Δ
 - c) 5 ns
 - d) 5 ns + Δ

- 3) VHDL statement

$$\text{Op} \leq \text{input when } e = '1' \text{ else 'z';} \quad \text{infers}$$
 - a) 2: 1 multiplexer
 - b) Tristate buffer
 - c) Buffer
 - d) None of these

- 4) Which of the following feature can be used to specify the parameters for a component at the time of instantiation?
 - a) Generate
 - b) Attribute
 - c) Generics
 - d) Signals

- 5) The design unit used for storage of common declarations are _____.
 - a) configuration declarations
 - b) package body
 - c) package declarations
 - d) None of these

- 6) The weak 1 is represented in IEEE 1164,9 valued logic is represented by _____.
 - a) 'W'
 - b) 'H'
 - c) 'X'
 - d) 'I'

- 7) Assuming the left operand as BIT - vector, "1001010" sla 2 is _____.
 - a) "0101010"
 - b) "0101000"
 - c) "0101011"
 - d) None of these

- 8) The CPLD contains several PLD blocks and _____.
 - a) AND-OR arrays
 - b) A language compiler
 - c) Field programmable switches
 - d) A global interconnect matrix

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2024
ELECTRONICS ENGINEERING
VLSI Design (BTN04603)

Day & Date: Monday, 27-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

Instructions: 1) All questions are compulsory.
 2) Figures to the right indicate full marks.

Section – I

Q.2 Solve Any Four. **16**

- a) Write VHDL code for D flip flop with asynchronous reset.
- b) Explain with suitable example different forms of wait statement. What is the significance of wait for 0 ns?
- c) Explain the transport and inertial delays in VHDL.
- d) Write VHDL code for 4:1 multiplexer.
- e) Consider A= "100", B= "101" and C ="011101" obtain following
 - i) C sra 3
 - ii) C ror 2
 - iii) (A & B) and C
 - iv) not B xor A

Q.3 Solve Any Two. **12**

- a) What are the major differences between VHDL functions and VHDL Procedures? Write VHDL function for adding two 4 bit numbers.
- b) Write VHDL code for Full adder. Also write the test bench for testing it.
- c) Write VHDL code for a Mealy FSM to detect the sequence 110 at the input. It should produce output z equal to 1 whenever the sequence is detected on input x.

Section – II

Q.4 Solve Any Four. **16**

- a) Differentiate between CPLD and FPGA.
- b) Draw RTL simulation flow and explain the steps in simulation.
- c) Draw and Explain synthesis process in brief.
- d) Derive a CMOS complex gate for following logic functions.

$$f = \overline{x_1} + (\overline{x_2} \overline{x_3})$$
- e) Explain the operation of CMOS inverter along with the transfer characteristics.

Q.5 Solve Any Two. **12**

- a) Draw and Explain Xilinx Spartan 4000 FPGA architecture.
- b) Draw and explain the architecture of product term allocator and macrocell for XC 9500 CPLD. What maximum number of product terms can be combined and steered to one macrocell?
- c) Draw and explain the schematic arrangement for testing sequential circuits.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct option from the following.

14

- 1) CMOS logic consists of _____.
 - a) pull up network
 - b) pull down network
 - c) both a) and b)
 - d) None of above
- 2) A single pattern that may be interpreted as a result of all the applied tests in testing is _____.
 - a) MIC
 - b) PRBSG
 - c) SIC
 - d) Signature
- 3) Which of the following method is used for testing the sequential circuit?
 - a) Random tests
 - b) Scan path technique
 - c) Path sensitizing technique
 - d) All of these
- 4) Input of synthesis process are _____.
 - a) RTL VHDL description
 - b) Circuit constraints and attributes design
 - c) Technology library
 - d) All of above
- 5) A test bench is used _____.
 - a) Verify the functionality of a design
 - b) To generate primitives
 - c) To generate net list

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.
 4) Assume suitable data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Select suitable option.

14

- 1) In _____ image we notice that the components of histogram are concentrated on the low side on intensity scale.
 - a) bright
 - b) dark
 - c) colorful
 - d) all of the above
- 2) Which one of the edge detection mask is of size 2x2 mask?
 - a) Prewitt
 - b) Sobel
 - c) Robert
 - d) None
- 3) Which segmentation algorithm groups pixels or sub region into larger regions based on predefined criteria?
 - a) Region growing
 - b) Region splitting and Merging
 - c) K-means
 - d) None
- 4) Advantages of image transform include: _____.
 - a) Conservation of energy
 - b) Energy Compaction
 - c) Speed of Processing
 - d) All above
- 5) Image enhancement traditionally included _____.
 - a) Smoothing
 - b) Sharpening
 - c) Degradation
 - d) Both a) and b)
- 6) In a binary image, total no of intensity levels are: _____.
 - a) 8
 - b) 2
 - c) 256
 - d) 4
- 7) A perceptual attribute of light which measures total energy is _____.
 - a) Hue
 - b) Brightness
 - c) Saturation
 - d) None
- 8) _____ Counting the number of direction change (in counterclockwise) between 2 adjacent elements of the code.
 - a) The second difference of a chain code

- Instructions:** 1) All questions are compulsory.
 2) Figures to the right indicate full marks.
 3) Assume data wherever necessary

Section – I

Q.2 Attempt Any Four. **16**

- a) Consider the image segment shown.
 3 1 2 1(q)
 2 2 0 2
 1 2 1 1
 (p) 1 0 1 2
 Let $V = \{0, 1\}$ and compute the lengths of the shortest 4, 8 and m – path between p and q. If a particular path does not exist between these two points, explain why.
- b) Differentiate between low pass and high pass filters.
 c) Define image smoothing and sharpening.
 d) Give the mask used for high boost filtering.
 e) Write a note on median filter.

Q.3 Attempt Any Two. **12**

- a) Explain with necessary diagrams Histogram Equalization.
 b) Describe various image transformation techniques in spatial domain.
 c) What do you mean by digital image processing? Discuss the different application areas of digital image processing.

Section – II

Q.4 Attempt Any Four. **16**

- a) What is shape number? Draw all shapes of order 8 along with 4 directional chain code and shape number.
 b) Explain the process of edge detection using gradient operators.
 c) Define data compression, entropy, and relative data redundancy and compression ratio.
 d) Differentiate between lossless and lossy compression
 e) Write a mask of sobel operator, prewitt operator and laplacian operator.

Q.5 Attempt Any Two. **12**

- a) What is role of representation in DIP? Discuss different approaches for representation process.
 b) Explain how compression is achieved in transform coding and explain about DCT.
 c) Explain region spilt and merge segmentation technique. How does it overcome the problem of region splitting?

Q.1 Select suitable option.

14

- 1) _____ Counting the number of direction change (in counterclockwise) between 2 adjacent elements of the code.
 - a) The second difference of a chain code
 - b) The third difference of a chain code
 - c) The first difference of a chain code
 - d) None of above
- 2) _____ view a coordinate (x,y) as a complex number (x = real part and y = imaginary part) then apply the Fourier transform to a sequence of boundary points.
 - a) Fourier descriptor
 - b) Laplace descriptor
 - c) Regional descriptor
 - d) None
- 3) The city block distance between P & Q is defined as _____ where (x,y) & (s, t) are co-ordinates of P and Q respectively.
 - a) $\{[(x-s)^2+(y-t)^2]^{1/2}$
 - b) $\{[(x-s)^2 + (y -t)^2]$
 - c) $|x-s| + |y-t|$
 - d) None of these
- 4) _____ represent an object boundary by a connected sequence of straight line segments of specified length and direction.
 - a) hex codes
 - b) chain codes
 - c) binary codes
 - d) None of these
- 5) The sum of cosines and sines coefficient multiplied is _____.
 - a) Fourier series
 - b) Fourier transform
 - c) Fast Fourier series
 - d) Fast Fourier transform
- 6) Digital video is sequence of _____.
 - a) pixels
 - b) Frames
 - c) matrix
 - d) Coordinates
- 7) Image compression comprised of _____.
 - a) encoder
 - b) decoder
 - c) frames
 - d) both a and b

- 8) In _____ image we notice that the components of histogram are concentrated on the low side on intensity scale.

 1 2 1 1
 (p) 1 0 1 2
 Let $V = \{0, 1\}$ and compute the lengths of the shortest 4, 8 and m – path between p and q. If a particular path does not exist between these two points, explain why.
- b) Differentiate between low pass and high pass filters.
 c) Define image smoothing and sharpening.
 d) Give the mask used for high boost filtering.
 e) Write a note on median filter.

Q.3 Attempt Any Two. **12**

- a) Explain with necessary diagrams Histogram Equalization.
 b) Describe various image transformation techniques in spatial domain.
 c) What do you mean by digital image processing? Discuss the different application areas of digital image processing.

Section – II

Q.4 Attempt Any Four. **16**

- a) What is shape number? Draw all shapes of order 8 along with 4 directional chain code and shape number.
 b) Explain the process of edge detection using gradient operators.
 c) Define data compression, entropy, and relative data redundancy and compression ratio.
 d) Differentiate between lossless and lossy compression
 e) Write a mask of sobel operator, prewitt operator and laplacian operator.

Q.5 Attempt Any Two. **12**

- a) What is role of representation in DIP? Discuss different approaches for representation process.
 b) Explain how compression is achieved in transform coding and explain about DCT.
 c) Explain region spilt and merge segmentation technique. How does it overcome the problem of region splitting?

Seat No.

Set **S**

T.Y. (B.Tech.) (Sem-II) (New) (CBCS) Examination: March/April-2024
ELECTRONICS ENGINEERING
Image Processing (BTN04609)

Day & Date: Wednesday, 29-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
 2) Figures to the right indicate full marks.
 3) Assume data wherever necessary

Section – I

Q.2 Attempt Any Four. **16**

- a) Consider the image segment shown.
 3 1 2 1(q)
 2 2 0 2
 1 2 1 1
 (p) 1 0 1 2
 Let $V = \{0, 1\}$ and compute the lengths of the shortest 4, 8 and m – path between p and q. If a particular path does not exist between these two points, explain why.
- b) Differentiate between low pass and high pass filters.
 c) Define image smoothing and sharpening.
 d) Give the mask used for high boost filtering.
 e) Write a note on median filter.

Q.3 Attempt Any Two. **12**

- a) Explain with necessary diagrams Histogram Equalization.
 b) Describe various image transformation techniques in spatial domain.
 c) What do you mean by digital image processing? Discuss the different application areas of digital image processing.

Section – II

Q.4 Attempt Any Four. **16**

- a) What is shape number? Draw all shapes of order 8 along with 4 directional chain code and shape number.
 b) Explain the process of edge detection using gradient operators.
 c) Define data compression, entropy, and relative data redundancy and compression ratio.
 d) Differentiate between lossless and lossy compression
 e) Write a mask of sobel operator, prewitt operator and laplacian operator.

Q.5 Attempt Any Two. **12**

- a) What is role of representation in DIP? Discuss different approaches for representation process.
 b) Explain how compression is achieved in transform coding and explain about DCT.
 c) Explain region spilt and merge segmentation technique. How does it overcome the problem of region splitting?

T.Y. (BTech) (Sem-II) (New) (CBCS) Examination: March/April-2024
ELECTRONICS ENGINEERING
Operating Systems (BTN04605)

Day & Date: Friday, 31-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.
 4) Assume data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct answers.**14**

- 1) In Unix, which system call creates the new process?
 - a) Fork
 - b) Create
 - c) New
 - d) None of the mentioned
- 2) A process is selected from the _____ queue by the _____ scheduler, to be executed.
 - a) blocked, short term
 - b) wait, long term
 - c) ready, short term
 - d) ready, long term
- 3) Response time is: _____.
 - a) the total time taken from the submission time till the completion time.
 - b) the total time taken from the submission time till the first response is produced.
 - c) the total time taken from submission time till the response is output.
 - d) None of these.
- 4) Termination of the process terminates _____.
 - a) first thread of the process
 - b) first two threads of the process
 - c) all threads within the process
 - d) no thread within the process
- 5) A parent process calling _____ system call will be suspended until children processes terminate.
 - a) fork
 - b) wait
 - c) exit
 - d) exec
- 6) Semaphore is a/an _____ to solve the critical section problem.
 - a) hardware for a system
 - b) special program for a system
 - c) integer variable
 - d) None of these
- 7) Which type of operating system is designed to manage a network of computers?
 - a) Simple batch system
 - b) Multiprogramming system
 - c) Time sharing system
 - d) Distributed operating system

Seat No.

T.Y. (BTech) (Sem-II) (New) (CBCS) Examination: March/April-2024
ELECTRONICS ENGINEERING
Operating Systems (BTN04605)

Day & Date: Friday, 31-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
 2) Figures to the right indicate full marks.
 3) Assume data wherever necessary.

Section – I

Q.2 Attempt Any Four: 16

- a) Describe the characteristics and importance of a real-time operating system in applications demanding immediate and deterministic responses.
- b) Explain the concept of system call in an operating system. Discuss its purpose, the types of system calls.
- c) Explain the structure and content of the Process Control Block and its role in managing and maintaining process-related information.
- d) What is operating system? Explain the different services provided by operating system.
- e) Define the critical section problem and its significance in concurrent programming, emphasizing the need for mutual exclusion.

Q.3 Attempt Any Two: 12

- a) Consider the following set of processes, with the length of the CPU burst time given in milliseconds.

Process	Burst Time	Arrival Time
P1	15	0
P2	6	2
P3	7	3
P4	5	5

- How will these processes be scheduled according to FCFS scheduling algorithm? Compute the average waiting time and average turnaround time.
- b) Describe different models of threading, such as many-to-one, one-to-one, and many-to-many threading models, highlighting their advantages and drawbacks.
- c) Explain in detail the shared memory system of interprocess communication.

Section – II

- Q.4 Attempt Any Four:** **16**
- a) Compare between internal and external fragmentation.
 - b) What is Banker's algorithm in OS? How Banker's algorithm is helpful in deciding safe sequence of process execution?
 - c) Consider page reference string 6, 7, 8, 9, 6, 7, 1, 6, 7, 8, 9, 1, 7, 9, Find out the number of page faults if 3-page frames are provided in case of least recently used page replacement mechanism.
 - d) Elaborate necessary conditions to produce deadlock in operating systems.
 - e) What is segmentation and types of segmentation in operating systems? What is segmentation table? Elaborate advantages of segmentation in OS.
- Q.5 Attempt Any Two:** **12**
- a) Describe terms associated with memory control
 - 1) Logical address
 - 2) Virtual address space
 - 3) Physical address and
 - 4) Physical address spaceDiscuss paging related to operating system.
 - b) Discuss following methods used to keep track of free space in the storage.
 - 1) Bitmap method
 - 2) Linked list and
 - 3) grouping and counting.Specify advantages and disadvantages of free space management techniques.
 - c) Why is memory management required? Discuss first fit, best fit and worst fit memory allocation approaches along with their advantages.

- 7) In contiguous allocation _____.
- a) each file must occupy a set of contiguous blocks on the disk
 - b) each file is a linked list of disk blocks
 - c) all the pointers to scattered blocks are placed together in one location
 - d) none of the mentioned
- 8) In Unix, which system call creates the new process?
- a) Fork
 - b) Create
 - c) New
 - d) None of the mentioned
- 9) A process is selected from the _____ queue by the _____ scheduler, to be executed.
- a) blocked, short term
 - b) wait, long term
 - c) ready, short term
 - d) ready, long term
- 10) Response time is: _____.
- a) the total time taken from the submission time till the completion time.
 - b) the total time taken from the submission time till the first response is produced.
 - c) the total time taken from submission time till the response is output.
 - d) None of these.
- 11) Termination of the process terminates _____.
- a) first thread of the process
 - b) first two threads of the process
 - c) all threads within the process
 - d) no thread within the process
- 12) A parent process calling _____ system call will be suspended until children processes terminate.
- a) fork
 - b) wait
 - c) exit
 - d) exec
- 13) Semaphore is a/an _____ to solve the critical section problem.
- a) hardware for a system
 - b) special program for a system
 - c) integer variable
 - d) None of these
- 14) Which type of operating system is designed to manage a network of computers?
- a) Simple batch system
 - b) Multiprogramming system

 - 4) Assume data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct answers.**14**

- 1) Which of the following condition is required for a deadlock to be possible?
 - a) mutual exclusion
 - b) a process may hold allocated resources while awaiting assignment of other resources
 - c) no resource can be forcibly removed from a process holding it
 - d) all the mentioned
- 2) Every address generated by the CPU is divided into two parts. They are _____.
 - a) frame bit & page number
 - b) page number & page offset
 - c) page offset & frame bit
 - d) frame offset & page offset
- 3) Program always deals with _____.
 - a) logical address
 - b) absolute address
 - c) physical address
 - d) relative address
- 4) In contiguous allocation _____.
 - a) each file must occupy a set of contiguous blocks on the disk
 - b) each file is a linked list of disk blocks
 - c) all the pointers to scattered blocks are placed together in one location
 - d) none of the mentioned
- 5) In Unix, which system call creates the new process?
 - a) Fork
 - b) Create
 - c) New
 - d) None of the mentioned
- 6) A process is selected from the _____ queue by the _____ scheduler, to be executed.
 - a) blocked, short term
 - b) wait, long term
 - c) ready, short term

- 7) Response time is: _____.
 - a) the total time taken from the submission time till the completion time.
 - b) the total time taken from the submission time till the first response is produced.
 - c) the total time taken from submission time till the response is output.
 - d) None of these.

- 8) Termination of the process terminates _____.
a) first thread of the process
b) first two threads of the process
c) all threads within the process
d) no thread within the process
- 9) A parent process calling _____ system call will be suspended until children processes terminate.
a) fork
b) wait
c) exit
d) exec
- 10) Semaphore is a/an _____ to solve the critical section problem.
a) hardware for a system
b) special program for a system
c) integer variable
d) None of these
- 11) Which type of operating system is designed to manage a network of computers?
a) Simple batch system
b) Multiprogramming system
c) Time sharing system
d) Distributed operating system
- 12) Physical memory is broken into fixed-sized blocks called _____.
a) frames
b) pages
c) backing store
d) none of the mentioned
- 13) The number of resources requested by a process _____.
a) must always be less than the total number of resources available in the system
b) must always be equal to the total number of resources available in the system
c) must not exceed the total number of resources available in the system
d) must exceed the total number of resources available in the system
- 14) To create a file _____.
a) allocate the space in file system
b) make an entry for new file in directory
c) allocate the space in file system & make an entry for new file in directory
d) none of the mentioned

T.Y. (B.Tech.) (Sem - II) (New)(CBCS) Examination: March/April – 2024
ELECTRONICS ENGINEERING
AI/ML -Machine Learning (BTN04612)

Day & Date: Monday, 03-06-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) Which of the following is NOT a step in the machine learning workflow?

a) Data preprocessing	b) Model evaluation
c) Model deployment	d) Data visualization
- 2) What is Unsupervised learning?
 - a) Learning with a strict teacher
 - b) Learning without any guidance
 - c) Learning from labeled data
 - d) Learning from unlabeled data
- 3) What is the purpose of a confusion matrix in classification?
 - a) To confuse the model during training
 - b) To visualize the dataset
 - c) To evaluate the performance of a classification model
 - d) To create additional features
- 4) Which of the following evaluation metrics is typically used for classification problems?

a) Mean Absolute Error (MAE)	b) Root Mean Squared Error (RMSE)
c) Accuracy	d) R-squared (R^2)
- 5) In k-Nearest Neighbors (KNN) classification, what does "k" represent?
 - a) The number of features
 - b) The number of classes
 - c) The number of neighbors to consider
 - d) The number of iterations
- 6) In K-means clustering, what does "K" represent?

a) The number of features	b) The number of clusters
c) The number of data points	d) The number of iterations
- 7) The principle underlying the Market Basket Analysis is known as _____.

a) Association rule	b) Bisecting rule
c) k-means	d) Bayes' theorem

- 8) Early detection of mental disorders using machine learning and data science: diagnosing clinical depression, bipolar disorder, anxiety are applications of ML in:
- a) Image Detection
 - b) Medical Diagnosis
 - c) Learning Language
 - d) Stock Analysis
- 9) Single-layer perceptron is able to deal with _____.
- a) linearly separable data
 - b) non-linearly separable data
 - c) linearly inseparable data
 - d) none of the above
- 10) Which of the following is NOT a common type of machine learning?
- a) Supervised Learning
 - b) Unsupervised Learning
 - c) Reinforcement Learning
 - d) Deterministic Learning
- 11) What is the primary difference between binary and multiclass classification?
- a) Binary has two classes, while multiclass has more than two classes
 - b) Binary classification is unsupervised, while multiclass is supervised
 - c) Binary classification uses regression techniques
 - d) Multiclass classification uses clustering algorithms
- 12) Which of the following is an example of a regression problem?
- a) Predicting whether an email is spam or not
 - b) Identifying the objects in an image
 - c) Predicting the price of a house based on its features
 - d) Grouping customers into different segments
- 13) Which of the following will be Euclidean distance between the two data points A(4,3) and B(2,3)?
- a) 1
 - b) 2
 - c) 4
 - d) 8
- 14) What is a feedforward neural network?
- a) A network where information travels in both directions
 - b) A network with multiple hidden layers
 - c) A network where information flows in one direction, from input to output
 - d) A network with recurrent connections

Set **P**

T.Y. (B.Tech.) (Sem - II) (New)(CBCS) Examination: March/April – 2024
ELECTRONICS ENGINEERING
AI/MI -Machine Learning (BTN04612)

Day & Date: Monday, 03-06-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
 2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any four.

16

- a) What are the characteristics that distinguish machine learning tasks from traditional programming tasks?
- b) What is significance of K in KNN Classifier? You are using the K-NN algorithm to classify a new data point in a dataset with 'k' set to 3. The three nearest neighbors to the new data point are as follows, along with their class labels:
 Neighbor 1: Class A
 Neighbor 2: Class B
 Neighbor 3: Class A
 Calculate the predicted class for the new data point using majority voting.
- c) Define Confidence, Support parameters and calculate the same for following associations
 Milk =>Bread
 {Bread, Cheese}=>Juice

Transaction ID	Items Purchased
1	Bread, Cheese, Egg, Juice
2	Bread, Cheese, Juice
3	Bread, Milk, Yogurt
4	Bread, Juice, Milk
5	Cheese, Juice, Milk

- d) What are steps in developing Machine Learning Model?
- e) You have the following dataset representing the number of hours (in hours) that a group of students spent studying for an exam:8,10,12,7,9
 Calculate the following statistical parameters:
 Mean (Average):9.2
 Median:9
 Range: 5
 Standard Deviation 1.72
- f) What is the difference between feature construction and feature extraction, providing examples of scenarios where each would be more advantageous.

Q.3 Solve any two.

- a) Suppose you are working on a medical diagnosis task, where you have developed a binary classification model to detect the presence or absence of a certain disease based on patient data. The disease is rare, affecting only 2% of the population. You have evaluated your model and obtained the following confusion matrix:

		Actual	
		Positive	Negative
Predicted	Positive	80	10
	Negative	5	905

Calculate the following performance metrics for your model:

Accuracy

Precision

Recall

F1-score

Provide interpretations for each metric's value in the context of this medical diagnosis task

- b) In a machine learning project, the developed ML model predicts the price of houses based on various features such as square footage, number of bedrooms, and neighborhood. Your dataset contains 500 samples, and you want to evaluate your model's performance using cross-validation. Explain briefly what cross-validation is and why it is important in machine learning.
You decide to use k-fold cross-validation with $k = 5$. Describe the process of performing k-fold cross-validation on your dataset, including the steps involved and how the dataset is divided.
What are the benefits of using k-fold cross-validation over a simple train-test split?
- c) With the help of suitable block diagram discuss how Reinforcement learning can be used for developing ML Model.

Section – II**Q.4 Solve any four.**

16

- a) Draw the simple structure of McCulloch Pitts Neuron Model (MP Neuron)?
- b) Discuss the steps followed in Backpropagation algorithm.
- c) What are different activation functions in ANN?
- d) Discuss the characteristics of following clustering techniques.
 - Partitioning methods
 - Hierarchical methods
 - Density-based methods
- e) Discuss the steps followed in K means clustering. How to decide value of K?
- f) Compare between Supervised and Unsupervised machine learning with reference to following points
 - i) Definition
 - ii) Training Data
 - iii) Evaluation
 - iv) Examples

Q.5 Solve any two

- a) Describe the key features and functionalities of an effective email spam filter. Include a discussion on how machine learning algorithms can be employed to enhance the accuracy of spam detection.
- b) Why AND, OR Gate problems are called Linearly separable and XOR is called as linearly inseparable problem for its Neural Network implementation? Which logic gate is represented by the following Neural Network Design.

- c) Discuss apriori algorithm and explain how it can be used for association rule learning.

T.Y. (B.Tech.) (Sem - II) (New)(CBCS) Examination: March/April – 2024
ELECTRONICS ENGINEERING
AI/ML -Machine Learning (BTN04612)

Day & Date: Monday, 03-06-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the given options. 14

- 1) Early detection of mental disorders using machine learning and data science: diagnosing clinical depression, bipolar disorder, anxiety are applications of ML in:

a) Image Detection	b) Medical Diagnosis
c) Learning Language	d) Stock Analysis
- 2) Single-layer perceptron is able to deal with _____.

a) linearly separable data	b) non-linearly separable data
c) linearly inseparable data	d) none of the above
- 3) Which of the following is NOT a common type of machine learning?

a) Supervised Learning	b) Unsupervised Learning
c) Reinforcement Learning	d) Deterministic Learning
- 4) What is the primary difference between binary and multiclass classification?

a) Binary has two classes, while multiclass has more than two classes	b) Binary classification is unsupervised, while multiclass is supervised
c) Binary classification uses regression techniques	d) Multiclass classification uses clustering algorithms
- 5) Which of the following is an example of a regression problem?

a) Predicting whether an email is spam or not	b) Identifying the objects in an image
c) Predicting the price of a house based on its features	d) Grouping customers into different segments
- 6) Which of the following will be Euclidean distance between the two data points A(4,3) and B(2,3)?

a) 1	b) 2
c) 4	d) 8
- 7) What is a feedforward neural network?

a) A network where information travels in both directions	b) A network with multiple hidden layers
c) A network where information flows in one direction, from input to output	d) A network with recurrent connections

- 8) Which of the following is NOT a step in the machine learning workflow?
- a) Data preprocessing
 - b) Model evaluation
 - c) Model deployment
 - d) Data visualization
- 9) What is Unsupervised learning?
- a) Learning with a strict teacher
 - b) Learning without any guidance
 - c) Learning from labeled data
 - d) Learning from unlabeled data
- 10) What is the purpose of a confusion matrix in classification?
- a) To confuse the model during training
 - b) To visualize the dataset
 - c) To evaluate the performance of a classification model
 - d) To create additional features
- 11) Which of the following evaluation metrics is typically used for classification problems?
- a) Mean Absolute Error (MAE)
 - b) Root Mean Squared Error (RMSE)
 - c) Accuracy
 - d) R-squared (R^2)
- 12) In k-Nearest Neighbors (KNN) classification, what does "k" represent?
- a) The number of features
 - b) The number of classes
 - c) The number of neighbors to consider
 - d) The number of iterations
- 13) In K-means clustering, what does "K" represent?
- a) The number of features
 - b) The number of clusters
 - c) The number of data points
 - d) The number of iterations
- 14) The principle underlying the Market Basket Analysis is known as _____.
- a) Association rule
 - b) Bisecting rule
 - c) k-means
 - d) Bayes' theorem

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct options.

14

- 1) Who is the father of Machine Learning?
 - a) Geoffrey Everest Hinton
 - b) Geoffrey Hill
 - c) Geoffrey Chaucer
 - d) None of the above
- 2) Which is FALSE regarding regression?
 - a) It may be used for interpretation
 - b) It is used for prediction
 - c) It discovers causal relationships
 - d) It relates inputs to outputs
- 3) Reinforcement learning is _____.
 - a) Supervised Learning
 - b) Unsupervised Learning
 - c) Award-Based Learning
 - d) None of above
- 4) Which ONE of the following are regression tasks?
 - a) Predict the age of a person
 - b) Predict the country from where the person comes from
 - c) Predict whether the price of petroleum will increase tomorrow
 - d) Predict whether a document is related to science
- 5) What is over fitting?
 - a) Poor result in Training and poor result in test
 - b) Great result in Training and poor result in test
 - c) Great result in Training and Great result in test
 - d) Poor result in Training and Great result in test
- 6) Which one of the following statements is TRUE for a Decision Tree?
 - a) Decision tree is only suitable for the classification problem statement
 - b) In a decision tree, the entropy of a node decreases as we go down a decision tree
 - c) In a decision tree, entropy determines purity
 - d) Decision tree can only be used for only numeric valued and continuous attributes
- 7) Which of the following is the centroid-based clustering method?
 - a) K-means clustering
 - b) DBSCAN clustering
 - c) Hierarchical clustering
 - d) KNN Algorithm

- 8) Which of the following statement is TRUE about the Association rule method?
- a) It determines how strongly or how weakly two objects are connected
 - b) It determines the relation between two objects
 - c) Relation between particular objects
 - d) Relation between frequent item set
- 9) The most widely used metrics and tools to access a classification model are ____.
- a) Confusion Matrix
 - b) Cost Sensitive accuracy
 - c) Area under the ROC curve
 - d) All of the above
- 10) What is back propagation?
- a) It is another name given to the curvy function in the Perceptron
 - b) It is the transmission of error back through the network to allow weights to be adjusted so that the network can learn
 - c) It is another name given to the curvy function in the Perceptron
 - d) None of the above
- 11) What is Perceptron?
- a) A single layer feed-forward neural network with pre-processing
 - b) A neural network that contains feedback
 - c) A double layer auto-associative neural network
 - d) An auto-associative neural network
- 12) Applications of NN (Neural Network).
- a) Risk management
 - b) Data validation
 - c) Sales forecasting
 - d) All of the above
- 13) When performing regression or classification which of the following is the correct way to preprocess the data?
- a) Normalize the data ---PCA---Training
 - b) PCA---Normalize PCA output---Training
 - c) Normalize the data---PCA---Normalize PCA output---Training
 - d) None of the above
- 14) Bayes rule can be used for: _____.
- a) Solving queries
 - b) Increasing complexity
 - c) Answering probabilistic query
 - d) Decreasing complexity

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April – 2024
ELECTRONICS ENGINEERING
Data Science Machine Learning (BTN04613)

Day & Date: Monday, 03-06-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
 2) Figures to the right indicates full marks.

Section – I

- Q.2 Solve any Four:** **16**
- a) What is Machine Learning? Explain with two Examples.
 - b) Explain the K-Nearest Neighbor Algorithm with example?
 - c) What is Feature? Explain the Feature Extraction technique of ML?
 - d) Explain the Different Characteristics of Machine Learning Task?
 - e) Explain the Assessing Performance of Regression.
- Q.3 Attempt any Two.** **12**
- a) What are all the databases we are using in ML?
 - b) What is Reinforcement Learning? Explain with Examples.
 - c) What is Over-fitting and under-fitting? Explain with examples.

Section – II

- Q.4 Attempt any Four.** **16**
- a) What are Neural network Elements? Explain Basic Perceptron?
 - b) List the difference between Supervised and Unsupervised Machine learning?
 - c) Write a note on Deep learning.
 - d) Write a note on DBSCAN.
 - e) Explain Hierarchical Clustering Technique of ML.
- Q.5 Attempt any Two.** **12**
- a) Explain Back-propagation algorithm of ANN.
 - b) Explain Virtual Personal Assistant.
 - c) What is the Association rule in ML? Explain with an example.

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April – 2024
ELECTRONICS ENGINEERING
Data Science Machine Learning (BTN04613)

Day & Date: Monday, 03-06-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct options. 14

- 1) Which of the following statement is TRUE about the Association rule method?
 - a) It determines how strongly or how weakly two objects are connected
 - b) It determines the relation between two objects
 - c) Relation between particular objects
 - d) Relation between frequent item set
- 2) The most widely used metrics and tools to access a classification model are _____.
 - a) Confusion Matrix
 - b) Cost Sensitive accuracy
 - c) Area under the ROC curve
 - d) All of the above
- 3) What is back propagation?
 - a) It is another name given to the curvy function in the Perceptron
 - b) It is the transmission of error back through the network to allow weights to be adjusted so that the network can learn
 - c) It is another name given to the curvy function in the Perceptron
 - d) None of the above
- 4) What is Perceptron?
 - a) A single layer feed-forward neural network with pre-processing
 - b) A neural network that contains feedback
 - c) A double layer auto-associative neural network
 - d) An auto-associative neural network
- 5) Applications of NN (Neural Network).
 - a) Risk management
 - b) Data validation
 - c) Sales forecasting
 - d) All of the above
- 6) When performing regression or classification which of the following is the correct way to preprocess the data?
 - a) Normalize the data ---PCA---Training
 - b) PCA---Normalize PCA output---Training
 - c) Normalize the data---PCA---Normalize PCA output---Training
 - d) None of the above
- 7) Bayes rule can be used for: _____.
 - a) Solving queries
 - b) Increasing complexity
 - c) Answering probabilistic query
 - d) Decreasing complexity

- 8) Who is the father of Machine Learning?
a) Geoffrey Everest Hinton b) Geoffrey Hill
c) Geoffrey Chaucer d) None of the above
- 9) Which is FALSE regarding regression?
a) It may be used for interpretation b) It is used for prediction
c) It discovers causal relationships d) It relates inputs to outputs
- 10) Reinforcement learning is _____.
a) Supervised Learning b) Unsupervised Learning
c) Award-Based Learning d) None of above
- 11) Which ONE of the following are regression tasks?
a) Predict the age of a person
b) Predict the country from where the person comes from
c) Predict whether the price of petroleum will increase tomorrow
d) Predict whether a document is related to science
- 12) What is over fitting?
a) Poor result in Training and poor result in test
b) Great result in Training and poor result in test
c) Great result in Training and Great result in test
d) Poor result in Training and Great result in test
- 13) Which one of the following statements is TRUE for a Decision Tree?
a) Decision tree is only suitable for the classification problem statement
b) In a decision tree, the entropy of a node decreases as we go down a decision tree
c) In a decision tree, entropy determines purity
d) Decision tree can only be used for only numeric valued and continuous attributes
- 14) Which of the following is the centroid-based clustering method?
a) K-means clustering b) DBSCAN clustering
c) Hierarchical clustering d) KNN Algorithm

 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct options

14

- 1) What is the main advantage of using cloud computing over traditional data centers?

a) Cost-effectiveness	b) Higher performance
c) Increased security	d) Greater control

- 2) Which of the following is an example of an Infrastructure as a Service (IaaS) offering?

a) Amazon EC2	b) Amazon S3
c) Amazon RDS	d) Amazon SNS

- 3) What is the term used to describe the ability to automatically scale computing resources based on demand?

a) Elasticity	b) Scalability
c) Virtualization	d) Agility

- 4) Which term is used to describe the practice of running multiple virtual machines on a single physical server?

a) Elasticity	b) Scalability
c) Virtualization	d) Agility

- 5) What is the AWS root user in Identity and Access Management (IAM)?

a) The primary administrator of an AWS account	
b) A user with restricted access to AWS services	
c) A temporary user created for specific tasks	
d) A user with read-only access to AWS resources	

- 6) Which AWS service is used for temporary access to AWS resources with limited permissions?

a) Amazon S3	b) AWS CLI
c) AWS STS	d) Amazon RDS

- 7) What does VPC stand for in the context of AWS?
a) Virtual Public Cloud b) Virtual Private Cloud
c) Virtual Provisioning Center d) Virtual Processing Cluster
- 8) What is a subnet in AWS VPC?
a) A virtual machine within a VPC
b) A group of VPC instances
c) A range of IP addresses in a VPC
d) A virtual network within a VPC
- 9) What does EC2 stand for in the context of AWS?
a) Elastic Computing Cloud b) Elastic Container Cloud
c) Elastic Compute Cloud d) Elastic Cache Cloud
- 10) What factors contribute to the pricing of EC2 instances?
a) Instance type, instance size, and data transfer
b) Number of VPCs, subnet size, and storage capacity
c) Availability zones, security groups, and IAM policies
d) Operating system, database engine, and web server software
- 11) What is Elastic Load Balancer (ELB) in AWS?
a) A service for automatically scaling EC2 instances
b) A managed service for distributing incoming application traffic
c) A tool for monitoring performance metrics of AWS resources
d) A database service for storing and retrieving data
- 12) What is the best practice for using Elastic Load Balancer (ELB) in AWS?
a) Deploying a single ELB for all applications and services
b) Allocating a static IP address for the ELB
c) Using SSL/TLS termination at the EC2 instances
d) Enabling access logs for ELB only during maintenance periods
- 13) What does S3 stand for in the context of AWS?
a) Simple Storage Service b) Secure Storage System
c) Structured Storage Solution d) Scalable Storage Service
- 14) How can you create a bucket in Amazon S3?
a) Using the AWS CLI only
b) Using the AWS Management Console or AWS CLI
c) Creating a bucket is not possible in S3
d) Contacting AWS support to create a bucket

IoT Cloud Platform (BTN04614)

Day & Date: Monday, 03-06-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

Instructions: 1) All questions are compulsory.
 2) Figures to the right indicates full marks.

Section – I

- Q.2 Attempt any THREE. 12**
- a) What is the history of cloud computing and how has it evolved over time?
 - b) Explain the basic concepts of AWS and its key services.
 - c) How can you access AWS services and what is the AWS overview?
 - d) What is the AWS root user? Why is it important to understand the root user account?

- Q.3 Attempt any TWO. 16**
- a) What are IAM policies? Explain the different types of policies available in IAM and how they are used to control user access to AWS resources.
 - b) How can IAM be used to implement least privilege access in AWS? Explain the concept of least privilege access and how it can be implemented using IAM policies and roles.
 - c) What is NAT in VPC? Explain how NAT gateways can be used to enable outbound internet traffic for resources within a private subnet.

Section – II

- Q.4 Attempt any THREE 12**
- a) What is the Elastic Compute Cloud (EC2) and how does it work?
 - b) How is the pricing structure for EC2 instances determined?
 - c) Explain the lifecycle of an EC2 instance?
 - d) What are some best practices for effectively configuring and managing ELB?

- Q.5 Attempt any TWO 16**
- a) What are the different storage classes available in S3 and how do they differ in terms of durability, availability, and cost?
 - b) How does CloudWatch Logs integrate with ELB and how can it be utilized for troubleshooting and analysis?
 - c) What connect is ClassicLink in VPC? Explain how ClassicLink can be used to EC2 instances in VPC to instances in the EC2-Classic platform.

- a) What is the history of cloud computing and how has it evolved over time?
 - b) Explain the basic concepts of AWS and its key services.
 - c) How can you access AWS services and what is the AWS overview?
 - d) What is the AWS root user? Why is it important to understand the root user account?

- Q.3 Attempt any TWO. 16**
- a) What are IAM policies? Explain the different types of policies available in IAM and how they are used to control user access to AWS resources.
 - b) How can IAM be used to implement least privilege access in AWS? Explain the concept of least privilege access and how it can be implemented using IAM policies and roles.
 - c) What is NAT in VPC? Explain how NAT gateways can be used to enable outbound internet traffic for resources within a private subnet.

Section – II

- Q.4 Attempt any THREE 12**
- a) What is the Elastic Compute Cloud (EC2) and how does it work?
 - b) How is the pricing structure for EC2 instances determined?
 - c) Explain the lifecycle of an EC2 instance?
 - d) What are some best practices for effectively configuring and managing ELB?

- Q.5 Attempt any TWO 16**
- a) What are the different storage classes available in S3 and how do they differ in terms of durability, availability, and cost?
 - b) How does CloudWatch Logs integrate with ELB and how can it be utilized for troubleshooting and analysis?
 - c) What connect is ClassicLink in VPC? Explain how ClassicLink can be used to EC2 instances in VPC to instances in the EC2-Classic platform.

Set **R**

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2024
ELECTRONICS ENGINEERING
IoT Cloud Platform (BTN04614)

Day & Date: Monday, 03-06-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct options**14**

- 1) What is Elastic Load Balancer (ELB) in AWS?
 - a) A service for automatically scaling EC2 instances
 - b) A managed service for distributing incoming application traffic
 - c) A tool for monitoring performance metrics of AWS resources
 - d) A database service for storing and retrieving data
- 2) What is the best practice for using Elastic Load Balancer (ELB) in AWS?
 - a) Deploying a single ELB for all applications and services
 - b) Allocating a static IP address for the ELB
 - c) Using SSL/TLS termination at the EC2 instances
 - d) Enabling access logs for ELB only during maintenance periods
- 3) What does S3 stand for in the context of AWS?
 - a) Simple Storage Service
 - b) Secure Storage System
 - c) Structured Storage Solution
 - d) Scalable Storage Service
- 4) How can you create a bucket in Amazon S3?
 - a) Using the AWS CLI only
 - b) Using the AWS Management Console or AWS CLI
 - c) Creating a bucket is not possible in S3
 - d) Contacting AWS support to create a bucket
- 5) What is the main advantage of using cloud computing over traditional data centers?
 - a) Cost-effectiveness
 - b) Higher performance
 - c) Increased security
 - d) Greater control
- 6) Which of the following is an example of an Infrastructure as a Service (IaaS) offering?
 - a) Amazon EC2
 - b) Amazon S3
 - c) Amazon RDS
 - d) Amazon SNS
- 7) What is the term used to describe the ability to automatically scale computing resources based on demand?
 - a) Elasticity
 - b) Scalability
 - c) Virtualization
 - d) Agility

- 8) Which term is used to describe the practice of running multiple virtual machines on a single physical server?
- a) Elasticity
 - b) Scalability
 - c) Virtualization
 - d) Agility
- 9) What is the AWS root user in Identity and Access Management (IAM)?
- a) The primary administrator of an AWS account
 - b) A user with restricted access to AWS services
 - c) A temporary user created for specific tasks
 - d) A user with read-only access to AWS resources
- 10) Which AWS service is used for temporary access to AWS resources with limited permissions?
- a) Amazon S3
 - b) AWS CLI
 - c) AWS STS
 - d) Amazon RDS
- 11) What does VPC stand for in the context of AWS?
- a) Virtual Public Cloud
 - b) Virtual Private Cloud
 - c) Virtual Provisioning Center
 - d) Virtual Processing Cluster
- 12) What is a subnet in AWS VPC?
- a) A virtual machine within a VPC
 - b) A group of VPC instances
 - c) A range of IP addresses in a VPC
 - d) A virtual network within a VPC
- 13) What does EC2 stand for in the context of AWS?
- a) Elastic Computing Cloud
 - b) Elastic Container Cloud
 - c) Elastic Compute Cloud
 - d) Elastic Cache Cloud
- 14) What factors contribute to the pricing of EC2 instances?
- a) Instance type, instance size, and data transfer
 - b) Number of VPCs, subnet size, and storage capacity
 - c) Availability zones, security groups, and IAM policies
 - d) Operating system, database engine, and web server software

Set **R**

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2024
ELECTRONICS ENGINEERING
IoT Cloud Platform (BTN04614)

Day & Date: Monday, 03-06-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

Instructions: 1) All questions are compulsory.
 2) Figures to the right indicates full marks.

Section – I

- Q.2 Attempt any THREE. 12**
- a) What is the history of cloud computing and how has it evolved over time?
 - b) Explain the basic concepts of AWS and its key services.
 - c) How can you access AWS services and what is the AWS overview?
 - d) What is the AWS root user? Why is it important to understand the root user account?

- Q.3 Attempt any TWO. 16**
- a) What are IAM policies? Explain the different types of policies available in IAM and how they are used to control user access to AWS resources.
 - b) How can IAM be used to implement least privilege access in AWS? Explain the concept of least privilege access and how it can be implemented using IAM policies and roles.
 - c) What is NAT in VPC? Explain how NAT gateways can be used to enable outbound internet traffic for resources within a private subnet.

Section – II

- Q.4 Attempt any THREE 12**
- a) What is the Elastic Compute Cloud (EC2) and how does it work?
 - b) How is the pricing structure for EC2 instances determined?
 - c) Explain the lifecycle of an EC2 instance?
 - d) What are some best practices for effectively configuring and managing ELB?

- Q.5 Attempt any TWO 16**
- a) What are the different storage classes available in S3 and how do they differ in terms of durability, availability, and cost?
 - b) How does CloudWatch Logs integrate with ELB and how can it be utilized for troubleshooting and analysis?
 - c) What connect is ClassicLink in VPC? Explain how ClassicLink can be used to EC2 instances in VPC to instances in the EC2-Classical platform.

ELECTRONICS ENGINEERING**

Advanced Communication Engineering (BTN04701)

Day & Date: Wednesday, 15-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer bookpage no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct option from the following.

14

- 1) A microwave junction is supposed to be matched at all ports if in the S matrix _____.
 - a) all the diagonal elements are zero
 - b) all the diagonal elements are equal but not zero
 - c) all the diagonal elements are complex
 - d) is Hermitian
- 2) The cut-off frequency of a waveguide depends on _____.
 - a) Dimensions of a waveguide
 - b) The dielectric property of the medium
 - c) Wave mode
 - d) All
- 3) Fading effect due to variation in the transmission medium is more effective at _____.

a) Low frequency	b) High frequency
c) Medium frequency	d) None
- 4) Radar principle is used in _____.

a) detection of aircraft	b) burglar alarms
c) garage door openers	d) all of the above
- 5) GaAs FET is prefer to _____.

a) lower frequency	b) higher frequency
c) both a and b	d) none of above
- 6) The speed at which axial electric field due to signal advances in a TWT is equal to _____.
 - a) speed of light
 - b) (speed of light) (helix pitch helix circumference)
 - c) (speed of light) (helix pitch) (helix circumference)
 - d) (speed of light) (helix circumference helix pitch)

Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section – I

- Q.2 Attempt the following (Any Two) 12**
- a) Show how TWT generates oscillations using slow wave structure.
 - b) Describe in detail the principles of the following terms Gunn Effect, high field domain, two valley theory and three valley theory.
 - c) Derive the radar range equation. Write radar performance factors.
- Q.3 Attempt the following (Any Four) 16**
- a) “Conventional devices have limitations at the high microwave frequencies”. Justify the statement.
 - b) Explain the function of circulator.
 - c) Derive scattering matrix for H plane Tee junction. Discuss different cases.
 - d) Explain basic principle of radar system.
 - e) Compare CW Doppler radar and FM-CW radar.

Section – II

- Q.4 Attempt the following (Any Two) 12**
- a) Explain in detail Attitude and Orbit control system (AOCS) and power subsystem.
 - b) Draw the block diagram of earth station and explain in detail.
 - c) Explain construction and working of edge emitting double heterojunction LED.
- Q.5 Attempt the following (Any Four) 16**
- a) What is meant by geostationary satellite?
 - b) Explain in detail orbital effects in communication system performance?
 - c) Explain in detail launch and launch vehicles.
 - d) Comparison of single mode, multimode step index and graded index optical fiber.
 - e) Derive numerical aperture for step index fiber.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct option from the following.

14

- 1) A satellite link uses different frequencies for receiving and transmitting in order to _____.
 - a) avoid interference from terrestrial microwave links
 - b) avoid interference between its powerful transmitted signal and weak in coming signal
 - c) minimise free-space losses
 - d) maximise antenna gain
- 2) Geosynchronous communication satellites travel around the earth in circular orbits with a forward speed of about _____ km/h.
 - a) 11200
 - b) 36000
 - c) 0
 - d) 22800
- 3) In satellite communication, highly directional antennas are used to _____.
 - a) direct the spot beam to a particular region of space on Earth
 - b) strengthen the beam to overcome the cosmic noise
 - c) make corrections in change of polarisation of the beam
 - d) select a particular channel in transmission and reception
- 4) Low-orbit satellites are not used for communications because they _____.
 - a) produce sonic booms
 - b) do not provide 24 hour/ day contact to the users on Earth
 - c) heat up and melt
 - d) none
- 5) The traffic-handling capacity of an Earth station on the uplink depends on _____.
 - a) its EIRP
 - b) satellite antenna gain
 - c) noise associated with the satellite
 - d) all of the above
- 6) The angle between incident ray & normal to the plane is _____.
 - a) Angle of reflection
 - b) Angle of incident
 - c) Angle of coefficient
 - d) None of these

- Show how TWT generates oscillations using slow wave structure.
 - Describe in detail the principles of the following terms Gunn Effect, high field domain, two valley theory and three valley theory.
 - Derive the radar range equation. Write radar performance factors.
- Q.3 Attempt the following (Any Four) 16**
- “Conventional devices have limitations at the high microwave frequencies”. Justify the statement.
 - Explain the function of circulator.
 - Derive scattering matrix for H plane Tee junction. Discuss different cases.
 - Explain basic principle of radar system.
 - Compare CW Doppler radar and FM-CW radar.

Section – II

- Q.4 Attempt the following (Any Two) 12**
- Explain in detail Attitude and Orbit control system (AOCS) and power subsystem.
 - Draw the block diagram of earth station and explain in detail.
 - Explain construction and working of edge emitting double heterojunction LED.
- Q.5 Attempt the following (Any Four) 16**
- What is meant by geostationary satellite?
 - Explain in detail orbital effects in communication system performance?
 - Explain in detail launch and launch vehicles.
 - Comparison of single mode, multimode step index and graded index optical fiber.
 - Derive numerical aperture for step index fiber.

**Fourth Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
ELECTRONICS ENGINEERING
Power Electronics (BTN04702)**

Day & Date: Thursday, 16-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no. 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if required.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct option from the following.

14

- 1) R-C snubber is used in parallel with the thyristor to _____.
a) reduce dv/dt across it b) protect against di/dt
c) protect over current d) trigger thyristor
- 2) Thyristor is a _____.
a) DC switch b) bilateral device
c) latch proof device d) voltage controlled device
- 3) Inductor is connected in series with thyristor to _____.
a) reduce dv/dt across it b) protect against di/dt
c) protect over voltage d) trigger thyristor
- 4) PIV for single phase full bridge controlled rectifier is _____.
a) $2V_m$ b) V_m
c) $3V_m$ d) $4V_m$
- 5) In a three-phase half wave controlled rectifier, if the input frequency is 50 Hz, then output ripple frequency will be _____.
a) 150 Hz b) 300 Hz
c) 100 Hz d) 200 Hz
- 6) In Three phase full controlled bridge rectifier PIV across any thyristor is _____.
a) $\sqrt{2} V_m$ b) $\sqrt{3} V_m$
c) V_m d) $\sqrt{3} V_{LL}$
- 7) A three phase semi converter will require _____ number of SCRs and _____ number of diodes.
a) 6, 6 b) 3, 3
c) 12, 12 d) 4, 4
- 8) A Step down chopper has input voltage of 80V & duty cycle is 25% then output voltage will be _____.
a) 200 b) 320
c) 16 d) 20

- 9) Class A and Class B choppers _____.
a) Two quadrant converters b) Three quadrant converters
c) Single quadrant converters d) None
- 10) The number of thyristors required for single phase bridge type cycloconverters _____.
a) 8 b) 6
c) 4 d) 2
- 11) Cycloconverter is a combination of _____.
a) Positive and negative converter
b) Two positive converter
c) Two negative converter
d) None
- 12) In speed control of AC motor generally actual speed will be compared with _____.
a) reference speed b) rated speed
c) rated current d) load resistance
- 13) The harmonic present in a Three Phase bridge wave inverter are _____.
a) All even harmonic b) All odd harmonic
c) Even & odd harmonic d) All odd harmonic expects triples
- 14) Square wave PWM technique allows _____.
a) Voltage & harmonics control b) only harmonics control
c) only voltage control d) only frequency control

Fourth Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
ELECTRONICS ENGINEERING
Power Electronics (BTN04702)

Day & Date: Thursday, 16-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
 2) Figures to the right indicate full marks.
 3) Assume suitable data if required.

Section – I

Q.2 Answer the following (Any four). 16

- a) With suitable circuit diagram elaborate how to protect SCR from high di/dt and high dv/dt .
- b) Explain working of electronic crowbar circuit with suitable circuit diagram.
- c) Derive an expression of average dc output voltage for single phase semiconverter with resistive load. Sketch associated waveforms for $\alpha = 60^\circ$.
- d) A single phase fully controlled rectifier is operated from 120V, 50Hz supply. Determine average load for delay angles of 0° and 90° , assuming continuous load current. Also calculate required peak voltage of each thyristor and output ripple frequency.
- e) Derive an exp for Average voltage for three phase semiconverter with resistive load. Sketch associated waveforms for $\alpha = 90^\circ$.

Q.3 Answer the Following (Any two). 12

- a) What is commutation? How commutation takes place in class A and class C commutation technique. Sketch associated waveforms.
- b) Justify motor can be controlled with help of four quadrant converter. Derive an expression for circulating current of dual converter.
- c) Design microcontroller based firing scheme for three phase fully controlled rectifiers.

Section – II

Q.4 Answer the following (Any four).**16**

- a) Explain working of step down chopper and derive an expression for output voltage, duty cycle and effective input resistance.
- b) What is cycloconverter? How AC to AC conversion takes place in single phase bridge type 5:1 cycloconverter with resistive load. Sketch associated waveforms.
- c) Prove that $I_n = \left(\frac{Fr}{nFch}\right)^2$ Justify for chopper circuit "Resonance frequency is always less than chopping frequency".
- d) How to vary output voltage of inverter using single pulse modulation technique. How it eliminates n^{th} harmonic component from output voltage.
- e) Design single phase full bridge inverter to provide 100 V, 1KHz AC output voltage across 20Ω resistive load. Calculate.
 - i) DC value of input voltage
 - ii) RMS voltage of fundamental component
 - iii) First five harmonics of output voltage

Q.5 Answer the Following (Any two).**12**

- a) With an appropriate power diagram discuss working principle of three phase bridge inverter using 120° conduction mode, feeding star connected purely resistive load. Draw associated line and phase voltage using mathematical analysis.
- b) Draw a block diagram of microcontroller based speed control of four quadrant AC drive and explain its working.
- c) Elaborate the process of commutation of main thyristor in Morgans chopper with associated voltage and current waveform.

 3) Figures to the right indicates full marks.
 4) Assume suitable data whenever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options.

14

- 1) Small scale fading describes the _____ fluctuations of the amplitude, phases of signal.
 - a) Rapid
 - b) Slow
 - c) Instantaneous
 - d) Different
- 2) _____ range covers maximum geographical range of all.
 - a) Transmission
 - b) Detection
 - c) Interference
 - d) Handover
- 3) Training Sequence and Equalization are solutions for _____ interference.
 - a) inter symbol
 - b) co channel
 - c) adjacent channel
 - d) Noise
- 4) Why neighboring stations are assigned different group of channels in cellular system?
 - a) To minimize interference
 - b) To minimize area
 - c) To maximize throughput
 - d) To maximize capacity of each cell
- 5) What is a cell in cellular system?
 - a) A small geographical area
 - b) A group of subscribers
 - c) A group of cells
 - d) A large group of mobile systems
- 6) For a cellular system, if there are N cells and each cell is allocated k channel. What is the total number of available radio channels, S ?
 - a) $S = k * N$
 - b) $S = k / N$
 - c) $S = N / k$
 - d) $S = k^N$
- 7) _____ are used to resolve and combine multipath components.
 - a) Equalizer
 - b) Registers
 - c) RAKE receiver
 - d) Frequency divider

- 8) Which of below is true for a Walsh Code?
a) They are orthogonal
b) They are used in CDMA
c) Their Inner Product with self is maximum
d) All of above
- 9) In IEEE 802.11 DSSS spreading is achieved using _____.
a) Walsh Code
b) Training sequence
c) Barker Sequence
d) None of above
- 10) Agent discovery & solicitation terms are associated with _____ layer.
a) mobile network
b) mobile IP
c) Transport
d) all of above
- 11) In a IEEE 802.11 MAC packet structure, first two bytes are _____.
a) frame control
b) duration ID
c) preamble
d) sequence number
- 12) A Bluetooth network is called _____.
a) Wireless Network
b) WAN
c) Piconet
d) LAN
- 13) A wireless network interface controller can work in _____.
a) infrastructure mode
b) ad-hoc mode
c) both infrastructure mode and ad-hoc mode
d) none of the mentioned
- 14) What is the access point (AP) in wireless LAN?
a) device that allows wireless devices to connect to a wired network
b) wireless devices itself
c) both device that allows wireless devices to connect to a wired network and wireless devices itself
d) none of the mentioned

Day & Date: Friday, 17-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All question are compulsory.
 2) Figures to right indicate full marks.

Section – I

Q.2 Solve any four **16**

- a) How signal spreading is achieved using FHSS?
- b) Explain what an "Operating System" is. Give at least 3 examples of popular modern operating systems and the devices where they're found.
- c) CSMA/CD MAC is used in wired network but it fails in wireless network. Justify the statement.
- d) With suitable diagram explain GSM time frame of 4.615 ms and a time slot of 577 μ S
- e) With suitable example discuss effect of Δ on handoff.

Q.3 Solve any two **12**

- a) Justify the statement "cell splitting, cell sectoring and Microcell zone technique can increase user capacity".
- b) With suitable diagram explain a typical sequence of events that take place for a mobile originated call.
- c) Base Station uses the reverse link channels in IS95, describe that channels in brief.

Section – II

Q.4 Solve any four **16**

- a) What are the requirements for a Mobile IP?
- b) With suitable example explain master, slave, parked & standby modes.
- c) Define mobile computing. Describe mobile computing function.
- d) Describe ad-hoc architecture for WLAN.
- e) What is agent solicitation? Why it is required?

Q.5 Solve any two **12**

- a) Specify the radio transmission with DSSS PHY frame structure for IEEE 802.11
- b) Explain with example - Data transfer on SCO and ACL links for Bluetooth.
- c) With suitable diagram explain how a packet is sent from a fixed node to a mobile node which is presently in foreign network.

Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
ELECTRONICS ENGINEERING
Mobile Technology (BTN04703)

Day & Date: Friday, 17-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:**
- 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No.3 (starting page of the Answer Book). Each question carry one mark.
 - 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 - 3) Figures to the right indicates full marks.
 - 4) Assume suitable data whenever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options.

14

- 1) In a IEEE 802.11 MAC packet structure, first two bytes are _____.
 - a) frame control
 - b) duration ID
 - c) preamble
 - d) sequence number
- 2) A Bluetooth network is called _____.
 - a) Wireless Network
 - b) WAN
 - c) Piconet
 - d) LAN
- 3) A wireless network interface controller can work in _____.
 - a) infrastructure mode
 - b) ad-hoc mode
 - c) both infrastructure mode and ad-hoc mode
 - d) none of the mentioned
- 4) What is the access point (AP) in wireless LAN?
 - a) device that allows wireless devices to connect to a wired network
 - b) wireless devices itself
 - c) both device that allows wireless devices to connect to a wired network and wireless devices itself
 - d) none of the mentioned
- 5) Small scale fading describes the _____ fluctuations of the amplitude, phases of signal.
 - a) Rapid
 - b) Slow
 - c) Instantaneous
 - d) Different
- 6) _____ range covers maximum geographical range of all.
 - a) Transmission
 - b) Detection
 - c) Interference
 - d) Handover
- 7) Training Sequence and Equalization are solutions for _____ interference.
 - a) inter symbol
 - b) co channel
 - c) adjacent channel
 - d) Noise

- 8) Why neighboring stations are assigned different group of channels in cellular system?
- To minimize interference
 - To minimize area
 - To maximize throughput
 - To maximize capacity of each cell
- 9) What is a cell in cellular system?
- A small geographical area
 - A group of subscribers
 - A group of cells
 - A large group of mobile systems
- 10) For a cellular system, if there are N cells and each cell is allocated k channel. What is the total number of available radio channels, S ?
- $S = k * N$
 - $S = k / N$
 - $S = N / k$
 - $S = k^N$
- 11) _____ are used to resolve and combine multipath components.
- Equalizer
 - Registers
 - RAKE receiver
 - Frequency divider
- 12) Which of below is true for a Walsh Code?
- They are orthogonal
 - They are used in CDMA
 - Their Inner Product with self is maximum
 - All of above
- 13) In IEEE 802.11 DSSS spreading is achieved using _____.
- Walsh Code
 - Training sequence
 - Barker Sequence
 - None of above
- 14) Agent discovery & solicitation terms are associated with _____ layer.
- mobile network
 - mobile IP
 - Transport
 - all of above

Seat No.

Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
ELECTRONICS ENGINEERING
Mobile Technology (BTN04703)

Day & Date: Friday, 17-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All question are compulsory.
2) Figures to right indicate full marks.

Section – I

Q.2 Solve any four **16**

- a) How signal spreading is achieved using FHSS?
- b) Explain what an "Operating System" is. Give at least 3 examples of popular modern operating systems and the devices where they're found.
- c) CSMA/CD MAC is used in wired network but it fails in wireless network. Justify the statement.
- d) With suitable diagram explain GSM time frame of 4.615 ms and a time slot of 577 μ S
- e) With suitable example discuss effect of Δ on handoff.

Q.3 Solve any two **12**

- a) Justify the statement "cell splitting, cell sectoring and Microcell zone technique can increase user capacity".
- b) With suitable diagram explain a typical sequence of events that take place for a mobile originated call.
- c) Base Station uses the reverse link channels in IS95, describe that channels in brief.

Section – II

Q.4 Solve any four **16**

- a) What are the requirements for a Mobile IP?
- b) With suitable example explain master, slave, parked & standby modes.
- c) Define mobile computing. Describe mobile computing function.
- d) Describe ad-hoc architecture for WLAN.
- e) What is agent solicitation? Why it is required?

Q.5 Solve any two **12**

- a) Specify the radio transmission with DSSS PHY frame structure for IEEE 802.11
- b) Explain with example - Data transfer on SCO and ACL links for Bluetooth.
- c) With suitable diagram explain how a packet is sent from a fixed node to a mobile node which is presently in foreign network.

CMOS VLSI Design (BTN04706)

Day & Date: Saturday, 18-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:**
- 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No.3 (Starting page of the Answer Book). Each question carry one mark.
 - 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 - 3) Figures to the right indicates full marks.
 - 4) Assume suitable data whenever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options.

14

- 1) The majority carriers of p-type semiconductor are: _____.
 - a) Holes
 - b) Negative ions
 - c) Electrons
 - d) Positive ions
- 2) The low voltage on the gate of p-MOSFET forms: _____.
 - a) Channel of negative carriers
 - b) Channel is not formed
 - c) Channel is clipped
 - d) Channel of positive carriers
- 3) The n-MOSFET is working as accumulation mode when: _____.
 - a) Gate is applied with positive voltage
 - b) Gate is grounded
 - c) Gate is applied with negative voltage
 - d) Gate is connected to source
- 4) If p-transistor is conducting and has small voltage between source and drain, then it is said to work in _____.
 - a) linear region
 - b) saturation region
 - c) non saturation resistive region
 - d) cut-off region
- 5) If both the transistors are in saturation, then they act as _____.
 - a) current source
 - b) voltage source
 - c) divider
 - d) buffer
- 6) In CMOS inverter, transistor is a switch having _____.
 - a) infinite on resistance
 - b) finite on resistance
 - c) buffer
 - d) infinite off resistance
- 7) CMOS inverter has _____ output impedance.
 - a) low
 - b) high
 - c) very high
 - d) none of the mentioned
- 8) In CMOS logic circuit the n-MOS transistor acts as: _____.
 - a) Load
 - b) Pull up network
 - c) Pull down network
 - d) Not used in CMOS circuits

- 9) Why the PUN is constructed using PMOS devices?
- a) PMOS transistors produce "strong zeros"
 - b) PMOS transistors produce "strong ones"
 - c) PMOS transistors produce "high impedance"
 - d) None of the mentioned
- 10) In the positive latch, the D input is selected when clock is _____, and the output is held (using feedback) when clock is _____.
- a) Low, high
 - b) High, high
 - c) Low, low
 - d) High, low
- 11) A stored value remains valid as long as the supply voltage is applied to the circuit, hence the name _____.
- a) Static
 - b) Dynamic
 - c) flip-flop
 - d) Latch
- 12) What is the standard form of C^2MOS ?
- a) Common CMOS Register
 - b) CMOS Clocked Register
 - c) Clocked CMOS Register
 - d) None of these
- 13) In Differential Cascade Voltage Switch Logic (or DCVSL), the pull-down networks PDN1 and PDN2 use NMOS devices and are _____.
- a) mutually not exclusive
 - b) PDN1 and PDN2 turn ON at the same time
 - c) mutually exclusive Both
 - d) Both PDN1 and PDN2 turn OFF at the same time
- 14) When the pass transistor pulls a node high, the output only charges up to _____.
- a) $V_{DD} - V_{Tn}$.
 - b) $V_{DD} + V_{Tn}$.
 - c) $V_{DD} - V_{Tp}$.
 - d) $V_{DD} + V_{Tp}$.

Set **P**

Fourth Y. (B.Tech.) (Sem - I) (New)(CBCS) Examination: March/April-2024
ELECTRONICS ENGINEERING
CMOS VLSI Design (BTN04706)

Day & Date: Saturday, 18-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

Instructions: 1) All questions are compulsory.
 2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any four questions. 16

- Draw the MOS Diffusion Capacitance Model and Explain the effective capacitance.
- Explain Switching Characteristics of CMOS Inverter in detail.
- Explain Static and dynamic power Dissipation. Derive an expression for total power dissipation.
- Implement Ratioed Logic 2 input Nand Gate and justify the implementation.
- How Dynamic CMOS Logic is used in CMOS Design explain using example?

Q.3 Solve any two questions. 12

- Design and comment on number of transistors and power dissipation of Static CMOS 2 input Nor Gate and Ratioed Logic 2 input Nor Gate.
- Discuss the any two approaches to be used to reduce delays in large fan-in circuits.
- Synthesis $F = D + A \cdot (B + C)$ using complementary CMOS logic and justify it.

Section – II

Q.4 Solve any four questions. 16

- What is transmission gate? How it is used to implement Latch.
- What is bistability Principle? How it is used to design Logic Devices explain using example?
- What is clock skew and clock jitter? What are the reasons of clock skew and jitter?
- Explain timing classification in interconnect design.
- Explain ALU in detail. How it is implemented?

Q.5 Solve any two questions. 12

- Implement Master-Slave Edge-Triggered Register using transmission gates. Comment on transmission gates ON and OFF and output of the logic.
- Explain briefly Plesiochronous interconnect and Asynchronous interconnect.
- What is multiplexer based latch? Explain the use of multiplexer based latch to implement D Latch.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the given options.

14

- 1) What is primary objective of the software development process?
 - a) Generating user documentation
 - b) Meeting customer requirements
 - c) Reducing development costs
 - d) Enhancing project timelines
- 2) What is the primary goal of the Time Boxing model?
 - a) Minimizing development costs
 - b) Maximizing customer involvement
 - c) Controlling project duration
 - d) Improving code quality
- 3) Why is involving end-users in the requirement gathering process important?
 - a) To reduce project costs
 - b) To avoid documenting requirements
 - c) To complete the requirement process quickly
 - d) To get insights into the system's intended use and needs
- 4) What does a use case diagram represent in software engineering?
 - a) The flow of data in the system
 - b) The functionalities and interactions of the system with its users
 - c) The system's database structure
 - d) The system's performance metrics
- 5) Which design principle encourages extending the functionality of a software module without modifying its source code?

a) Open Closed Principle	b) Coupling
c) Cohesion	d) Functional Design
- 6) Which design level focuses on refining the high-level design and making it more detailed and specific?

a) Conceptual Design	b) High-Level Design
c) Detailed Design	d) Technical Design

- 7) In design, what is the significance of "coupling"?
- a) It refers to the strength of the relationship between software components
 - b) It refers to how well a component performs its intended function
 - c) It refers to the number of functions within a software component
 - d) It refers to the number of software components
- 8) What type of testing examines the software from the user's perspective without knowledge of its internal structure?
- a) Black-box testing
 - b) White-box testing
 - c) Functional testing
 - d) System testing
- 9) What is the primary goal of software testing?
- a) To find and fix bugs in the software
 - b) To design the software architecture
 - c) To write the initial code for the software
 - d) To create software documentation
- 10) What is the focus of "quality planning" in project management?
- a) Identifying project risks
 - b) Planning for quality throughout the project
 - c) Identifying project requirements
 - d) Planning for project staffing
- 11) In project management, what does "staffing" primarily involve?
- a) Allocating tasks to team members
 - b) Setting the project budget
 - c) Defining the project scope
 - d) Identifying potential risks
- 12) What does APM stand for in project management?
- a) Agile Project Management
 - b) Advanced Project Metrics
 - c) Automated Project Management
 - d) Associated Project Methodology
- 13) What is a fundamental aspect of Agile methodologies like Scrum?
- a) Extensive upfront planning
 - b) Fixed scope and requirements
 - c) Iterative cycles of work and continuous feedback
 - d) Linear progression of project phases
- 14) Which toolkit is often utilized to enhance project management efficiency and effectiveness?
- a) Gantt Chart
 - b) APM Toolkit
 - c) RACI Matrix
 - d) SWOT Analysis

Seat No.

Fourth. Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
ELECTRONICS ENGINEERING
Software Engineering (BTN04708)

Day & Date: Saturday, 18-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) Solve any two question from the both sections.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary.

Section – I

Q.2 Solve any four. 16

- What is Software Engineering? Explain the steps involved in Software Development Life Cycle.
- How time boxing model is useful in Software Development explain with help of Example
- How Software Requirement specification (SRS) document is important in Software Development explain with help of Characteristics of SRS.
- With the help of Use case diagram explain Online commerce business model.
- Explain the role of software architecture in the development of complex software systems. Discuss the key responsibilities and goals of software architects.
- Explain the "Open Closed Principle" in software design and why it's essential for creating flexible and extensible software?

Q.3 Solve any two. 12

- The Training Institute is in process of developing new student management software from Company PQR. With the help of Use case diagram explain Module of Student enrollment in the Course.
- Explain the concept of "component and connector view" in software architecture and why it's important to visualize how different parts of the software connect.
- With the help of example and neat diagram explain how Prototype Model is used in software development.

Section – II

Q.4 Solve any four. 16

- What are the levels of Testing and illustrate its importance at every level?
- Explain the concepts of black-box testing and white-box testing.
- Differentiate Between Procedural and Quantitative Approaches of Quality Planning.
- Discuss risk management planning in software engineering projects. Explain the process of identifying, analyzing, and mitigating risks throughout the project lifecycle.
- How the "iterative project management life cycle" works and why it is beneficial for managing projects.
- Explain the role of the "APM Toolkit" in Agile Project Management and how it helps in managing projects efficiently.

Q.5 Solve any two.

- a) What are Test Cases and Test Criteria. Prepare the test cases used for testing of User Authentication Page.
- b) You are working as Software Development Team member illustrate with help of example following Terminologies used in the Agile Project Management
 - i) Sprint
 - ii) Sprint review
 - iii) Scrum Master
 - iv) Backlog
 - v) Sprint retrospective
 - vi) Product Owner
- c) With help of example explain Project management process.

 - c) Automated Project Management
 - d) Associated Project Methodology
- 3) What is a fundamental aspect of Agile methodologies like Scrum?
 - a) Extensive upfront planning
 - b) Fixed scope and requirements
 - c) Iterative cycles of work and continuous feedback
 - d) Linear progression of project phases
- 4) Which toolkit is often utilized to enhance project management efficiency and effectiveness?

a) Gantt Chart	b) APM Toolkit
c) RACI Matrix	d) SWOT Analysis
- 5) What is primary objective of the software development process?
 - a) Generating user documentation
 - b) Meeting customer requirements
 - c) Reducing development costs
 - d) Enhancing project timelines
- 6) What is the primary goal of the Time Boxing model?
 - a) Minimizing development costs
 - b) Maximizing customer involvement
 - c) Controlling project duration
 - d) Improving code quality

- 7) Why is involving end-users in the requirement gathering process important?
- a) To reduce project costs
 - b) To avoid documenting requirements
 - c) To complete the requirement process quickly
 - d) To get insights into the system's intended use and needs
- 8) What does a use case diagram represent in software engineering?

Set **P**

Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
ELECTRONICS ENGINEERING
AI Applications (BTN04710)

Day & Date: Sunday, 19-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page No 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.
 4) Assume data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) The main tasks of an AI agent are _____.
 - a) Input and Output
 - b) Moment and Humanly Actions
 - c) Perceiving, thinking, and acting on the environment
 - d) None of the above
- 2) The main function of problem-solving agent is to _____.
 - a) Solve the given problem and reach the goal
 - b) Find out which sequence of action will get it to the goal state.
 - c) Both a & b
 - d) None of these
- 3) The inference engine works on _____.

a) Forward Chaining	b) Backward Chaining
c) Both A and B	d) None of these
- 4) Web Crawler is an example of _____.

a) Intelligent Agent	b) Problem-solving Agent
c) Simple reflex Agent	d) Model-based Agent
- 5) The component of an Expert system is _____.

a) Knowledge Base	b) Inference Engine
c) User Interface	d) All of these
- 6) Which of the given statement is true for Conditional Probability?
 - a) Conditional Probability gives 100% accurate results.
 - b) Conditional Probability can be applied to a single event.
 - c) Conditional Probability has no effect or relevance on independent events.
 - d) None of the above.
- 7) The probabilistic reasoning depends upon _____.

a) Estimation	b) Observations
c) Likelihood	d) All of these

Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
ELECTRONICS ENGINEERING
AI Applications (BTN04710)

Day & Date: Sunday, 19-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any four. **16**

- a) State & Explain different types of Intelligent Agents.
- b) Explain Relaxation Labelling Methods in brief.
- c) Explain Man Vs Computers in brief.
- d) Explain in brief Computer Vision Representation.
- e) Explain Model based object Recognition in brief.

Q.3 Solve any two. **12**

- a) Explain the major components of Intelligent System.
- b) Explain the Features of an Expert System and Existing expert systems in brief.
- c) Explain the Basic architecture of an Expert system

Section – II

Q.4 Solve any four **16**

- a) Explain the Language Models of NLP in brief.
- b) Explain the Information Retrieval and Information Extraction in short.
- c) Explain the Structure Grammars, Syntactic Analysis (Parsing) in short.
- d) Discuss the Robotic Perception in brief.
- e) Explain the Passive Reinforcement Learning in brief.

Q.5 Solve any two. **12**

- a) Explain the Speech Recognition and Machine Translation in NLP in detail.
- b) Explain the Robotic Software Architectures in brief.
- c) Discuss the Active Reinforcement in detail.

 4) Assume data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) Who is known as the -Father of AI"?
 - a) Fisher Ada
 - b) Alan Turing
 - c) John McCarthy
 - d) Allen Newell
- 2) Which term describes the common-sense of the judgmental part of problem-solving?
 - a) Values-based
 - b) Critical
 - c) Analytical
 - d) Heuristic
- 3) Artificial Intelligence is about _____.
 - a) Playing a game on Computer
 - b) Making a machine Intelligent
 - c) Programming on Machine with your own Intelligence
 - d) Putting your intelligence in Machine.
- 4) An AI agent perceives and acts upon the environment using _____.
 - a) Sensors
 - b) Perceiver
 - c) Actuators
 - d) Both a and c
- 5) Which AI technique enables the computers to understand the associations and relationships between objects and events?
 - a) Heuristic Processing
 - b) Cognitive Science
 - c) Relative Symbolism
 - d) Pattern Matching
- 6) A technique that was developed to determine whether a machine could or could not demonstrate the artificial intelligence known as the _____.
 - a) Boolean Algebra
 - b) Turing Test
 - c) Logarithm
 - d) Algorithm
- 7) If a robot is able to change its own trajectory as per the external conditions, then the robot is considered as the _____.
 - a) Mobile
 - b) Non-Servo
 - c) Open Loop
 - d) Intelligent

- 8) The main tasks of an AI agent are _____.
a) Input and Output
b) Moment and Humanly Actions
c) Perceiving, thinking, and acting on the environment
d) None of the above
- 9) The main function of problem-solving agent is to _____.
a) Solve the given problem and reach the goal
b) Find out which sequence of action will get it to the goal state.
c) Both a & b
d) None of these
- 10) The inference engine works on _____.
a) Forward Chaining b) Backward Chaining
c) Both A and B d) None of these
- 11) Web Crawler is an example of _____.
a) Intelligent Agent b) Problem-solving Agent
c) Simple reflex Agent d) Model-based Agent
- 12) The component of an Expert system is _____.
a) Knowledge Base b) Inference Engine
c) User Interface d) All of these
- 13) Which of the given statement is true for Conditional Probability?
a) Conditional Probability gives 100% accurate results.
b) Conditional Probability can be applied to a single event.
c) Conditional Probability has no effect or relevance on independent events.
d) None of the above.
- 14) The probabilistic reasoning depends upon _____.
a) Estimation b) Observations
c) Likelihood d) All of these

Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
ELECTRONICS ENGINEERING
AI Applications (BTN04710)

Day & Date: Sunday, 19-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any four. 16

- State & Explain different types of Intelligent Agents.
- Explain Relaxation Labelling Methods in brief.
- Explain Man Vs Computers in brief.
- Explain in brief Computer Vision Representation.
- Explain Model based object Recognition in brief.

Q.3 Solve any two. 12

- Explain the major components of Intelligent System.
- Explain the Features of an Expert System and Existing expert systems in brief.
- Explain the Basic architecture of an Expert system

Section – II

Q.4 Solve any four 16

- Explain the Language Models of NLP in brief.
- Explain the Information Retrieval and Information Extraction in short.
- Explain the Structure Grammars, Syntactic Analysis (Parsing) in short.
- Discuss the Robotic Perception in brief.
- Explain the Passive Reinforcement Learning in brief.

Q.5 Solve any two. 12

- Explain the Speech Recognition and Machine Translation in NLP in detail.
- Explain the Robotic Software Architectures in brief.
- Discuss the Active Reinforcement in detail.

- 8) Web Crawler is an example of _____.
a) Intelligent Agent b) Problem-solving Agent
c) Simple reflex Agent d) Model-based Agent
- 9) The component of an Expert system is _____.
a) Knowledge Base b) Inference Engine
c) User Interface d) All of these
- 10) Which of the given statement is true for Conditional Probability?
a) Conditional Probability gives 100% accurate results.
b) Conditional Probability can be applied to a single event.
c) Conditional Probability has no effect or relevance on independent events.
d) None of the above.
- 11) The probabilistic reasoning depends upon _____.
a) Estimation b) Observations
c) Likelihood d) All of these
- 12) Who is known as the -Father of AI" ?
a) Fisher Ada b) Alan Turing
c) John McCarthy d) Allen Newell
- 13) Which term describes the common-sense of the judgmental part of problem-solving?
a) Values-based b) Critical
c) Analytical d) Heuristic
- 14) Artificial Intelligence is about _____.
a) Playing a game on Computer
b) Making a machine Intelligent
c) Programming on Machine with your own Intelligence
d) Putting your intelligence in Machine.

AI Applications (BTN04710)

Day & Date: Sunday, 19-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:**
- 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page No 03 (Starting page of the Answer Book). Each question carries one mark.
 - 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 - 3) Figures to the right indicates full marks.
 - 4) Assume data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) Which of the given statement is true for Conditional Probability?
 - a) Conditional Probability gives 100% accurate results.
 - b) Conditional Probability can be applied to a single event.
 - c) Conditional Probability has no effect or relevance on independent events.
 - d) None of the above.
- 2) The probabilistic reasoning depends upon _____.
 - a) Estimation
 - b) Observations
 - c) Likelihood
 - d) All of these
- 3) Who is known as the -Father of AI"?
 - a) Fisher Ada
 - b) Alan Turing
 - c) John McCarthy
 - d) Allen Newell
- 4) Which term describes the common-sense of the judgmental part of problem-solving?
 - a) Values-based
 - b) Critical
 - c) Analytical
 - d) Heuristic
- 5) Artificial Intelligence is about _____.
 - a) Playing a game on Computer
 - b) Making a machine Intelligent
 - c) Programming on Machine with your own Intelligence
 - d) Putting your intelligence in Machine.
- 6) An AI agent perceives and acts upon the environment using _____.
 - a) Sensors
 - b) Perceiver
 - c) Actuators
 - d) Both a and c
- 7) Which AI technique enables the computers to understand the associations and relationships between objects and events?
 - a) Heuristic Processing
 - b) Cognitive Science
 - c) Relative Symbolism
 - d) Pattern Matching

- Explain the Speech Recognition and Machine Translation in NLP in detail.
- Explain the Robotic Software Architectures in brief.
- Discuss the Active Reinforcement in detail.

- 7) A _____ can be considered as a functional or departmental data warehouse of a smaller size and a more specific type than the overall company data warehouse.
- a) Warehouse
 - b) Database
 - c) Data mart
 - d) Data Table
- 8) Which of the following is not a component of Relational Marketing?
- a) Organization
 - b) BI and Data Mining
 - c) Technology
 - d) Fund
- 9) What is Six Sigma?
- a) a letter in the Greek alphabet that statisticians use to measure process variability
 - b) a methodology aimed at reducing the number of defects in a business process
 - c) a methodology aimed at reducing the amount of variability in a business process
 - d) a methodology aimed at measuring the amount of variability in a business process
- 10) Which of the following is not a stage in "Lifetime of a Customer"
- a) Acquisition
 - b) Cross/Up Selling
 - c) Bargaining
 - d) Retention
- 11) Which term refers to the process of presenting data in a visual format to facilitate understanding and decision-making?
- a) Business Intelligence
 - b) Data Visualization
 - c) Data Analysis
 - d) Report Generation
- 12) Which of the following is False for Supply Chain
- a) It is network of connected and interdependent organizational units
 - b) Strong Coordination is required
 - c) It improves flow of materials if it is effective
 - d) Suppliers are given priority
- 13) Which of the following is not an optimization model?
- a) Extra Capacity
 - b) Maximum Fixed Cost
 - c) Backlogging
 - d) Multiple Plants
- 14) Which type of models are commonly used for logistics planning to determine the most cost-effective distribution routes and schedules?
- a) Descriptive models
 - b) Predictive models
 - c) Optimization models
 - d) Diagnostic models

Data Science- Business Intelligence (BTN04712)

Day & Date: Sunday, 19-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

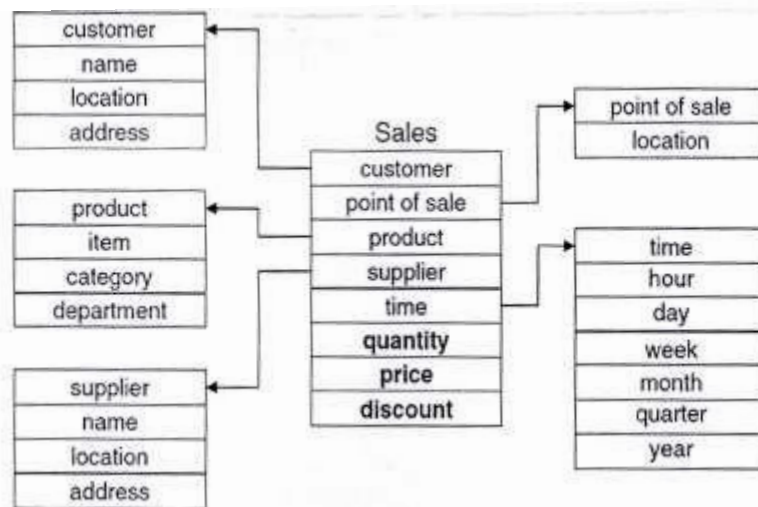

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt Any Four.

16

- What is decision support system (DSS)? Explain representation of DSS in brief.
- What is data mining? List the real life application of data mining.
- Explain importance of effective & timely decision.
- What is ETL? Explain the process of extraction, transformation and loading of data in Data warehouse.
- What are dimension tables? What are Fact Tables? What is the schema in the following diagram? Identify the fact tables and dimension tables in this schema.

Q.3 Attempt Any Two.

12

- Explain the role of mathematical model in business intelligence.
- What is system? Explain a closed cycle marketing system with feedback effects.
- Explain the process of data mining with suitable diagram.

Section – II

Q.4 Attempt Any Four.

16

- What is a performance measurement system? How does it work?
- What is relational marketing? Describe the main stages during the customer lifetime with suitable diagram.
- Explain the concept of supply chain optimization and its significance in logistics.
- Describe any 4 types of charts used for visualization in BI.
- Describe the term market basket analysis in context to relational marketing.

Q.5 Attempt Any Two.

- a) What is Salesforce management? Elaborate decision processes in Salesforce management.
- b) Describe tactical planning and extra capacity in context to optimization models for logistic planning.
- c) What is meant by Business Performance Management (BPM)? List and briefly describe the four phases of the business performance management cycle.

 4) Assume suitable data wherever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options.

14

- 1) When considering AWS cost optimization, what is the process of choosing the most cost-effective pricing model for a service?
 - a) Cost forecasting
 - b) Cost allocation
 - c) Cost analysis
 - d) Cost optimization
- 2) What factor should be considered when selecting an AWS region for hosting data that must comply with specific regulatory requirements?
 - a) Network latency
 - b) Cost optimization
 - c) Data sovereignty
 - d) Scalability
- 3) Which AWS service enables the automatic scaling of compute capacity based on traffic and demand?
 - a) Amazon CloudFront
 - b) AWS Lambda
 - c) Amazon Auto Scaling
 - d) Amazon Route 53
- 4) What is the primary objective of the Performance Efficiency pillar in the AWS Well-Architected Framework?
 - a) Minimizing costs
 - b) Ensuring high availability
 - c) Achieving optimal system performance
 - d) Maximizing security
- 5) Which AWS Well-Architected Framework pillar focuses on the ability to recover from infrastructure or service failures and dynamically scale to meet demand?
 - a) Security
 - b) Cost Optimization
 - c) Reliability
 - d) Performance Efficiency
- 6) What is the primary goal of Cost Optimization in the AWS Well-Architected Framework?
 - a) Achieving the highest performance possible
 - b) Minimizing costs without considering performance
 - c) Reducing complexity at all costs
 - d) Reducing costs while maintaining or improving performance

- 7) Which pillar of the AWS Well-Architected Framework emphasizes the importance of creating a well-structured and accountable team to manage cloud resources effectively?
- a) Operational Excellence
 - b) Organization
 - c) Prepare
 - d) Operate
- 8) In the AWS Well-Architected Framework, the Evolve pillar is focused on:
- a) Preparing for cloud migration
 - b) Continuous improvement and innovation
 - c) Compliance and governance
 - d) Initial setup and configuration
- 9) What is the primary objective of Detection in cloud security?
- a) Preventing all security incidents
 - b) Identifying security threats and vulnerabilities
 - c) Managing access to cloud resources
 - d) Protecting data at rest
- 10) In cloud security, Infrastructure Protection focuses on:
- a) Managing user access
 - b) Protecting the physical data centers
 - c) Detecting and responding to security incidents
 - d) Protecting the cloud infrastructure from attacks and vulnerabilities
- 11) What does Foundations address within the AWS Well-Architected Framework for Reliability?
- a) Building the architectural base for workloads
 - b) Managing changes to the workload
 - c) Monitoring workload performance
 - d) Handling operational issues
- 12) What aspect of Reliability in the AWS Well-Architected Framework focuses on maintaining system stability during changes or updates?
- a) Foundations
 - b) Workload Architecture
 - c) Change Management
 - d) Failure Management
- 13) In the context of the AWS Well-Architected Framework, what is the primary objective of Workload Architecture for ensuring Reliability?
- a) Defining an architectural blueprint for workloads
 - b) Managing changes to the workload
 - c) Assessing system failures
 - d) Addressing performance bottlenecks
- 14) What is the primary goal of performance efficiency in cloud financial management?
- a) Minimizing upfront costs
 - b) Maximizing resource utilization
 - c) Reducing security risks
 - d) Enhancing vendor lock-in

Set **P**

Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
ELECTRONICS ENGINEERING
IOT- Architecting IOT Solutions (BTN04714)

Day & Date: Sunday, 19-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

Instructions: 1) All question are compulsory.
 2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any THREE. **12**

- a) Describe the general architecture of AWS.
- b) What are the best practices for achieving Security in a cloud architecture according to the AWS Well-Architected Framework?
- c) Explain the key design principles associated with Operational Excellence in the AWS Well-Architected Framework.
- d) What are some key design principles that AWS follows in its framework?

Q.3 Attempt any TWO. **16**

- a) Discuss the fundamental components of the AWS architecture, emphasizing their roles and interactions in a typical cloud environment.
- b) How can the AWS Well-Architected Framework assist organizations in balancing the trade-offs between different pillars, such as security versus cost optimization?
- c) What are some common challenges that organizations may face when striving for Operational Excellence in cloud operations, and how can they overcome these challenges?

Section – II

Q.4 Attempt any THREE. **12**

- a) Describe the key strategies and measures for protecting the infrastructure in a cloud environment. What are some common infrastructure protection techniques?
- b) Explain how workload architecture plays a crucial role in achieving reliability in a cloud environment. What are some architectural best practices?
- c) What is the significance of Identity and Access Management (IAM) in cloud security, and how does it contribute to a secure cloud environment?
- d) Explain the process of resource selection in achieving Performance Efficiency within the cloud. What factors should organizations consider when selecting resources for their workloads?

Q.5 Attempt any TWO.

- a) Share best practices for practicing cloud financial management and maintaining a culture of expenditure and usage awareness within an organization's cloud operations.
- b) Provide real-world examples of organizations that have successfully achieved high reliability in their cloud-based systems. What strategies and practices did they implement to achieve this?
- c) How can organizations leverage security monitoring and auditing tools to enhance their cloud security posture and detect potential threats?

Seat No.

Set **Q**

Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
ELECTRONICS ENGINEERING
IOT- Architecting IOT Solutions (BTN04714)

Day & Date: Sunday, 19-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:**
- 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.
 - 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 - 3) Figures to the right indicates full marks.
 - 4) Assume suitable data wherever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options.

14

- 1) In the AWS Well-Architected Framework, the Evolve pillar is focused on:
 - a) Preparing for cloud migration
 - b) Continuous improvement and innovation
 - c) Compliance and governance
 - d) Initial setup and configuration
- 2) What is the primary objective of Detection in cloud security?
 - a) Preventing all security incidents
 - b) Identifying security threats and vulnerabilities
 - c) Managing access to cloud resources
 - d) Protecting data at rest
- 3) In cloud security, Infrastructure Protection focuses on:
 - a) Managing user access
 - b) Protecting the physical data centers
 - c) Detecting and responding to security incidents
 - d) Protecting the cloud infrastructure from attacks and vulnerabilities
- 4) What does Foundations address within the AWS Well-Architected Framework for Reliability?
 - a) Building the architectural base for workloads
 - b) Managing changes to the workload
 - c) Monitoring workload performance
 - d) Handling operational issues
- 5) What aspect of Reliability in the AWS Well-Architected Framework focuses on maintaining system stability during changes or updates?

a) Foundations	b) Workload Architecture
c) Change Management	d) Failure Management

- 6) In the context of the AWS Well-Architected Framework, what is the primary objective of Workload Architecture for ensuring Reliability?
- a) Defining an architectural blueprint for workloads
 - b) Managing changes to the workload
 - c) Assessing system failures
 - d) Addressing performance bottlenecks
- 7) What is the primary goal of performance efficiency in cloud financial management?
- a) Minimizing upfront costs
 - b) Maximizing resource utilization
 - c) Reducing security risks
 - d) Enhancing vendor lock-in
- 8) When considering AWS cost optimization, what is the process of choosing the most cost-effective pricing model for a service?
- a) Cost forecasting
 - b) Cost allocation
 - c) Cost analysis
 - d) Cost optimization
- 9) What factor should be considered when selecting an AWS region for hosting data that must comply with specific regulatory requirements?
- a) Network latency
 - b) Cost optimization
 - c) Data sovereignty
 - d) Scalability
- 10) Which AWS service enables the automatic scaling of compute capacity based on traffic and demand?
- a) Amazon CloudFront
 - b) AWS Lambda
 - c) Amazon Auto Scaling
 - d) Amazon Route 53
- 11) What is the primary objective of the Performance Efficiency pillar in the AWS Well-Architected Framework?
- a) Minimizing costs
 - b) Ensuring high availability
 - c) Achieving optimal system performance
 - d) Maximizing security
- 12) Which AWS Well-Architected Framework pillar focuses on the ability to recover from infrastructure or service failures and dynamically scale to meet demand?
- a) Security
 - b) Cost Optimization
 - c) Reliability
 - d) Performance Efficiency
- 13) What is the primary goal of Cost Optimization in the AWS Well-Architected Framework?
- a) Achieving the highest performance possible
 - b) Minimizing costs without considering performance
 - c) Reducing complexity at all costs
 - d) Reducing costs while maintaining or improving performance
- 14) Which pillar of the AWS Well-Architected Framework emphasizes the importance of creating a well-structured and accountable team to manage cloud resources effectively?
- a) Operational Excellence
 - b) Organization
 - c) Prepare
 - d) Operate

Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
ELECTRONICS ENGINEERING
IOT- Architecting IOT Solutions (BTN04714)

Day & Date: Sunday, 19-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

Instructions: 1) All question are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any THREE. 12

- a) Describe the general architecture of AWS.
- b) What are the best practices for achieving Security in a cloud architecture according to the AWS Well-Architected Framework?
- c) Explain the key design principles associated with Operational Excellence in the AWS Well-Architected Framework.
- d) What are some key design principles that AWS follows in its framework?

Q.3 Attempt any TWO. 16

- a) Discuss the fundamental components of the AWS architecture, emphasizing their roles and interactions in a typical cloud environment.
- b) How can the AWS Well-Architected Framework assist organizations in balancing the trade-offs between different pillars, such as security versus cost optimization?
- c) What are some common challenges that organizations may face when striving for Operational Excellence in cloud operations, and how can they overcome these challenges?

Section – II

Q.4 Attempt any THREE. 12

- a) Describe the key strategies and measures for protecting the infrastructure in a cloud environment. What are some common infrastructure protection techniques?
- b) Explain how workload architecture plays a crucial role in achieving reliability in a cloud environment. What are some architectural best practices?
- c) What is the significance of Identity and Access Management (IAM) in cloud security, and how does it contribute to a secure cloud environment?
- d) Explain the process of resource selection in achieving Performance Efficiency within the cloud. What factors should organizations consider when selecting resources for their workloads?

Q.5 Attempt any TWO.

- a) Share best practices for practicing cloud financial management and maintaining a culture of expenditure and usage awareness within an organization's cloud operations.
- b) Provide real-world examples of organizations that have successfully achieved high reliability in their cloud-based systems. What strategies and practices did they implement to achieve this?
- c) How can organizations leverage security monitoring and auditing tools to enhance their cloud security posture and detect potential threats?

Fourth Y. (B.Tech.) (Sem - I) (Old) (CBCS) Examination: March/April-2024
ELECTRONICS ENGINEERING
Power Electronics (197047701)

Day & Date: Wednesday, 15-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.
 4) Assume suitable data if required.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) Choose the correct statement _____.
 - a) Thyristor is a voltage-controlled device
 - b) Thyristor current controlled device
 - c) Thyristor is a Unipolar device
 - d) Thyristor is a latch proof device
- 2) R-C snubber is used in parallel with the thyristor to _____.
 - a) reduce dv/dt across it
 - b) protect against di/dt
 - c) protect over current
 - d) trigger thyristor
- 3) Class C commutation is _____ technique.
 - a) complementary commutation
 - b) load commutation
 - c) current commutation technique
 - d) resonant pulse commutation
- 4) The average ON state current of SCR is 10A for firing angle of 60° , The average ON slate current for firing angle of 0° will be _____.
 - a) Less than 10A
 - b) 5A
 - c) More than 10A
 - d) 0
- 5) A single phase fully controlled bridge rectifier is connected to a balanced 50 Hz single phase ac source. Output ripple frequency will be _____.
 - a) 100 Hz
 - b) 150 Hz
 - c) 50 Hz
 - d) 200 Hz
- 6) Three phase fully controlled rectifier converts _____.
 - a) Single phase AC to DC
 - b) DC to three phase AC
 - c) Three phase AC to DC
 - d) DC to DC
- 7) A three-phase semi converter will require _____ number of SCRs and _____ of diodes.
 - a) 6, 6
 - b) 3, 3
 - c) 12, 12
 - d) 4, 4

Seat No.

Set P

Fourth Y. (B.Tech.) (Sem - I) (Old) (CBCS) Examination: March/April-2024
ELECTRONICS ENGINEERING
Power Electronics (197047701)

Day & Date: Wednesday, 15-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
 2) Figures to the right indicate full marks.
 3) Assume suitable data if required.

Section – I**Q.2 Solve any four 16**

- a) Why thyristor is called as latching device? Explain two transistor analogy of SCR?
- b) Explain the various mechanisms by which thyristors may be turn on.
- c) Derive an exp for Avg output voltage for single phase fully controlled rectifier with resistive load. Draw associated waveforms.
- d) With suitable circuit diagram explain operation of three phase dual converter.
- e) A three-phase semi converter is operated from 3phase 400V 50Hz mains supply and delivers power to sufficiently large inductive load having resistance of 10Ω . If it is required that average output voltage should be 50% of maximum possible voltage. Calculate
 - i) Firing angle
 - ii) Power delivered to load
 - iii) PIV

Q.3 Solve any two 12

- a) Explain operation of three phase fully controlled rectifier with highly inductive load. Derive an expression for average load voltage. Draw voltage waveform for $\alpha = 60^\circ$
- b) Derive an exp for Average voltage and RMS Voltage for single phase semi converter with resistive load. Sketch associated waveforms.
- c) What do you meant by forced commutation? How commutation takes place in class B resonant pulse commutation technique. Sketch associated waveforms.

Section – II**Q.4 Solve any four 16**

- a) Describe the principle of step-up chopper. Derive an expression for the average output voltage in terms of input dc voltage & duty cycle.
- b) What is cycloconverter? Explain operation of single-phase bridge type cycloconverter. The frequency is $f_0/f_s = 1/4$. Sketch associated waveforms.
- c) What is cyclomultiplier? Design 1:5 single phase cyclomultiplier.
- d) Explain operation of single-phase half bridge voltage source inverter with resistive load. Draw associated waveforms and derive an expression of RMS output voltage.
- e) With neat circuit diagram and appropriate waveforms explain working of basic parallel inverter with resistive load.

Q.5 Solve any two

- a) What is Voltage commutation? How process of commutation takes place in voltage commutated chopper with associated voltage and current waveform as a function of time.
- b) Explain working of 120° conduction mode, three phase bridge inverter feeding star connected purely resistive load. Draw associated line and phase voltage.
- c) With suitable block diagram describe the working of speed control of DC drive using fuzzy logic controller.

 3) Figures to the right indicates full marks.
 4) Assume suitable data if required.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) A Step-down chopper has input voltage of 80V & duty cycle is 25% then output voltage will _____.
 a) 200
 b) 320
 c) 16
 d) 20
- 2) In _____ chopper load current is always positive and load voltage is positive or negative
 a) Class C
 b) Class D
 c) Class F
 d) Both a & b
- 3) The single-phase bridge type cycloconverter uses _____ number of SCRs.
 a) 4
 b) 8
 c) 6
 d) 16
- 4) In single phase 3:1 bridge type cycloconverter, output frequency is _____.
 a) $f_o = 3 \times f_s$
 b) $f_o = f_s/3$
 c) $f_o = f_s$
 d) $f_o = 6 \times f_s$
- 5) In speed control of AC motor generally actual speed will be compared with _____.
 a) reference speed
 b) rated speed
 c) rated current
 d) load resistance
- 6) In _____ inverter output frequency is depends of commutating component and load parameters.
 a) Parallel
 b) Series
 c) modified parallel inverter
 d) None
- 7) A single-phase bridge inverter has de input voltage $V_s = 50$ V. Then amplitude of square wave is _____.
 a) 50V
 b) 25V
 c) 100V
 d) $50/\sqrt{2}$

- 8) Choose the correct statement _____.
- a) Thyristor is a voltage-controlled device
 - b) Thyristor current controlled device
 - c) Thyristor is a Unipolar device
 - d) Thyristor is a latch proof device
- 9) R-C snubber is used in parallel with the thyristor to _____.
- a) reduce dv/dt across it
 - b) protect against di/dt
 - c) protect over current
 - d) trigger thyristor
- 10) Class C commutation is _____ technique.
- a) complementary commutation
 - b) load commutation
 - c) current commutation technique
 - d) resonant pulse commutation
- 11) The average ON state current of SCR is 10A for firing angle of 60° , The average ON state current for firing angle of 0° will be _____.
- a) Less than 10A
 - b) 5A
 - c) More than 10A
 - d) 0
- 12) A single phase fully controlled bridge rectifier is connected to a balanced 50 Hz single phase ac source. Output ripple frequency will be _____.
- a) 100 Hz
 - b) 150 Hz
 - c) 50 Hz
 - d) 200 Hz
- 13) Three phase fully controlled rectifier converts _____.
- a) Single phase AC to DC
 - b) DC to three phase AC
 - c) Three phase AC to DC
 - d) DC to DC
- 14) A three-phase semi converter will require _____ number of SCRs and _____ of diodes.
- a) 6, 6
 - b) 3, 3
 - c) 12, 12
 - d) 4, 4

Set **Q**

Fourth Y. (B.Tech.) (Sem - I) (Old) (CBCS) Examination: March/April-2024
ELECTRONICS ENGINEERING
Power Electronics (197047701)

Day & Date: Wednesday, 15-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
 2) Figures to the right indicate full marks.
 3) Assume suitable data if required.

Section – I

Q.2 Solve any four **16**

- a) Why thyristor is called as latching device? Explain two transistor analogy of SCR?
- b) Explain the various mechanisms by which thyristors may be turn on.
- c) Derive an exp for Avg output voltage for single phase fully controlled rectifier with resistive load. Draw associated waveforms.
- d) With suitable circuit diagram explain operation of three phase dual converter.
- e) A three-phase semi converter is operated from 3phase 400V 50Hz mains supply and delivers power to sufficiently large inductive load having resistance of 10Ω . If it is required that average output voltage should be 50% of maximum possible voltage. Calculate
 - i) Firing angle
 - ii) Power delivered to load
 - iii) PIV

Q.3 Solve any two **12**

- a) Explain operation of three phase fully controlled rectifier with highly inductive load. Derive an expression for average load voltage. Draw voltage waveform for $\alpha = 60^\circ$
- b) Derive an exp for Average voltage and RMS Voltage for single phase semi converter with resistive load. Sketch associated waveforms.
- c) What do you meant by forced commutation? How commutation takes place in class B resonant pulse commutation technique. Sketch associated waveforms.

Section – II

Q.4 Solve any four **16**

- a) Describe the principle of step-up chopper. Derive an expression for the average output voltage in terms of input dc voltage & duty cycle.
- b) What is cycloconverter? Explain operation of single-phase bridge type cycloconverter. The frequency is $f_0/f_s = 1/4$. Sketch associated waveforms.
- c) What is cyclomultiplier? Design 1:5 single phase cyclomultiplier.
- d) Explain operation of single-phase half bridge voltage source inverter with resistive load. Draw associated waveforms and derive an expression of RMS output voltage.
- e) With neat circuit diagram and appropriate waveforms explain working of basic parallel inverter with resistive load.

Q.5 Solve any two

- a) What is Voltage commutation? How process of commutation takes place in voltage commutated chopper with associated voltage and current waveform as a function of time.
- b) Explain working of 120° conduction mode, three phase bridge inverter feeding star connected purely resistive load. Draw associated line and phase voltage.
- c) With suitable block diagram describe the working of speed control of DC drive using fuzzy logic controller.

Fourth Y. (B.Tech.) (Sem - I) (Old) (CBCS) Examination: March/April-2024
ELECTRONICS ENGINEERING
Power Electronics (197047701)

Day & Date: Wednesday, 15-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.
 4) Assume suitable data if required.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) In single phase 3:1 bridge type cycloconverter, output frequency is _____.
 - a) $f_o = 3 \times f_s$
 - b) $f_o = f_s/3$
 - c) $f_o = f_s$
 - d) $f_o = 6 \times f_s$
- 2) In speed control of AC motor generally actual speed will be compared with _____.
 - a) reference speed
 - b) rated speed
 - c) rated current
 - d) load resistance
- 3) In _____ inverter output frequency is depends of commutating component and load parameters.
 - a) Parallel
 - b) Series
 - c) modified parallel inverter
 - d) None
- 4) A single-phase bridge inverter has de input voltage $V_s = 50$ V. Then amplitude of square wave is _____.
 - a) 50V
 - b) 25V
 - c) 100V
 - d) $50/\sqrt{2}$
- 5) Choose the correct statement _____.
 - a) Thyristor is a voltage-controlled device
 - b) Thyristor current controlled device
 - c) Thyristor is a Unipolar device
 - d) Thyristor is a latch proof device
- 6) R-C snubber is used in parallel with the thyristor to _____.
 - a) reduce dv/dt across it
 - b) protect against di/dt
 - c) protect over current
 - d) trigger thyristor
- 7) Class C commutation is _____ technique.
 - a) complementary commutation
 - b) load commutation
 - c) current commutation technique
 - d) resonant pulse commutation

- 8) The average ON state current of SCR is 10A for firing angle of 60° , The average ON state current for firing angle of 0° will be _____.
a) Less than 10A b) 5A
c) More than 10A d) 0
- 9) A single phase fully controlled bridge rectifier is connected to a balanced 50 Hz single phase ac source. Output ripple frequency will be _____.
a) 100 Hz b) 150 Hz
c) 50 Hz d) 200 Hz
- 10) Three phase fully controlled rectifier converts _____.
a) Single phase AC to DC b) DC to three phase AC
c) Three phase AC to DC d) DC to DC
- 11) A three-phase semi converter will require _____ number of SCRs and _____ of diodes.
a) 6, 6 b) 3, 3
c) 12, 12 d) 4, 4
- 12) A Step-down chopper has input voltage of 80V & duty cycle is 25% then output voltage will _____.
a) 200 b) 320
c) 16 d) 20
- 13) In _____ chopper load current is always positive and load voltage is positive or negative
a) Class C b) Class D
c) Class F d) Both a & b
- 14) The single-phase bridge type cycloconverter uses _____ number of SCRs.
a) 4 b) 8
c) 6 d) 16

 4) Assume data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) When there is the _____ voltage across the gate terminal, then the device shows enhanced conductivity.

a) Minimum	b) Maximum
c) Zero	d) None of these
- 2) As source drain voltage decrease, channel depth _____.

a) decreases	b) increases
c) logarithmically increases	d) exponentially increases
- 3) Gate area can be given as _____.

a) L/W	b) $L * W$
c) $2L/W$	d) $L/2W$
- 4) The overall delay is _____ to the relative resistance r .

a) Directly Proportional	b) Inversely Proportional
c) Exponentially proportional	d) Not dependent
- 5) Increase in switching speed _____ the noise problems.

a) increases	b) decreases
c) remains same	d) none of these
- 6) To design 4 input NOR Gate using CMOS Logic _____ number of Transistors are required if input signal is available in double rail format.

a) 4	b) 8
c) 6	d) 10
- 7) To design 4 input NAND Gate using Ratioed Logic _____ number of Transistors are required if inputs are available in double rail format.

a) 5	b) 7
c) 6	d) 8

- 8) A stored value remains valid as long as supply voltage is applied to the circuit is known as _____ storage device.
- a) Dynamic
 - b) Bistable
 - c) Static
 - d) none of these
- 9) A synchronizer is actually a special case of an _____.
- a) Arbiter
 - b) PLL
 - c) Router
 - d) none of these
- 10) The amount of time the input signal should be stable before the clock edge occurs is called as _____.
- a) Dynamic time
 - b) Static time
 - c) Hold Time
 - d) Setup time
- 11) A major advantage of _____ structure is that it allows for late design changes.
- a) Mesh
 - b) Grid
 - c) Star
 - d) Ring
- 12) PLLs are also used to perform _____ of communication between chips.
- a) Synchronization
 - b) Storage
 - c) Denying
 - d) Normalization
- 13) For synchronous circuits to solve the clock related to problem _____ is/are the solutions
- a) Clock Distribution
 - b) Use synchronizers and Arbiters
 - c) use PLL
 - d) All of these
- 14) With 3 bit select lines _____ operations can be performed by ALU.
- a) 8
 - b) 12
 - c) 10
 - d) 14

CMOSVLSI Design (197047702)

Day & Date: Thursday, 16-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
 2) Figures to the right indicate full marks.
 3) Draw neat diagrams.
 4) Assume suitable data if necessary.

Section – I

Q.2 Solve any four: **16**

- a) With the help of diagram discuss construction and working of n-MOS also calculate value of β for given parameters of n-MOS transistor designed using Si as W / L ratio is 1.75, oxide layer thickness is 2.30 nm, the electron mobility is 160 sq. cm/V sec. The threshold voltage is 0.6V. The Si specific permittivity is 7 and permittivity of free space is 8.85×10^{-14} F/cm.
- b) Why technology scaling is used and how it is achieved in MOS transistor design?
- c) Draw and Explain CMOS inverter in detail and discuss transfer characteristics.
- d) How ratioed Logic is used in CMOS Design explain using example?
- e) What is pass transistor? How it is used in designing CMOS Logic Gate using example explain?

Q.3 Solve any two: **12**

- a) Briefly explain in detail accumulation, depletion and inversion modes in MOS transistors.
- b) Calculate total power dissipation in CMOS inverter for frequency 20 MHz with Static power dissipation of 30 μ W, $V_{DD} = 3.3$ V and $C = 30$ fF
- c) Design 2 input XNOR gate using CMOS Logic and comment on number of transistors required to implement it.

Section – II

Q.4 Solve any four: **16**

- a) What is bi-stability Principle? How it is used to design Latch explain using example?
- b) What is multiplexer-based latch? Explain the use of multiplexer to implement Latch?
- c) How PLL is used for clock synchronization with help of diagram explain.
- d) What is clock skew and clock jitter in circuits?
- e) Draw ALU and explain in detail.

Q.5 Solve any two: **12**

- a) Explain operating principle of True single phase clocked register (TSPCR) with help of diagram.
- b) Explain timing classification in interconnect design.
- c) With the help of Diagram explain Static RAM implementation.

**Fourth Y. (B.Tech.) (Sem-I) (Old) (CBCS) Examination: March/April-2024
ELECTRONICS ENGINEERING
CMOSVLSI Design (197047702)**

Day & Date: Thursday, 16-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no. 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) To design 4 input NOR Gate using CMOS Logic _____ number of Transistors are required if input signal is available in double rail format.

a) 4	b) 8
c) 6	d) 10

- 2) To design 4 input NAND Gate using Ratioed Logic _____ number of Transistors are required if inputs are available in double rail format.

a) 5	b) 7
c) 6	d) 8

- 3) A stored value remains valid as long as supply voltage is applied to the circuit is known as _____ storage device.

a) Dynamic	b) Bistable
c) Static	d) none of these

- 4) A synchronizer is actually a special case of an _____.

a) Arbiter	b) PLL
c) Router	d) none of these

- 5) The amount of time the input signal should be stable before the clock edge occurs is called as _____.

a) Dynamic time	b) Static time
c) Hold Time	d) Setup time

- 6) A major advantage of _____ structure is that it allows for late design changes.

a) Mesh	b) Grid
c) Star	d) Ring

- 7) PLLs are also used to perform _____ of communication between chips.

a) Synchronization	b) Storage
c) Denying	d) Normalization

- 8) For synchronous circuits to solve the clock related to problem _____ is/are the solutions
- a) Clock Distribution
 - b) Use synchronizers and Arbiters
 - c) use PLL
 - d) All of these
- 9) With 3 bit select lines _____ operations can be performed by ALU.
- a) 8
 - b) 12
 - c) 10
 - d) 14
- 10) When there is the _____ voltage across the gate terminal, then the device shows enhanced conductivity.
- a) Minimum
 - b) Maximum
 - c) Zero
 - d) None of these
- 11) As source drain voltage decrease, channel depth _____.
- a) decreases
 - b) increases
 - c) logarithmically increases
 - d) exponentially increases
- 12) Gate area can be given as _____
- a) L/W
 - b) $L * W$
 - c) $2L/W$
 - d) $L/2W$
- 13) The overall delay is _____ to the relative resistance r .
- a) Directly Proportional
 - b) Inversely Proportional
 - c) Exponentially proportional
 - d) Not dependent
- 14) Increase in switching speed _____ the noise problems.
- a) increases
 - b) decreases
 - c) remains same
 - d) none of these

Set **S**

Fourth Y. (B.Tech.) (Sem-I) (Old) (CBCS) Examination: March/April-2024
ELECTRONICS ENGINEERING
CMOSVLSI Design (197047702)

Day & Date: Thursday, 16-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
 2) Figures to the right indicate full marks.
 3) Draw neat diagrams.
 4) Assume suitable data if necessary.

Section – I

Q.2 Solve any four: **16**

- With the help of diagram discuss construction and working of n-MOS also calculate value of β for given parameters of n-MOS transistor designed using Si as W / L ratio is 1.75, oxide layer thickness is 2.30 nm, the electron mobility is 160 sq. cm/V sec. The threshold voltage is 0.6V. The Si specific permittivity is 7 and permittivity of free space is 8.85×10^{-14} F/cm.
- Why technology scaling is used and how it is achieved in MOS transistor design?
- Draw and Explain CMOS inverter in detail and discuss transfer characteristics.
- How ratioed Logic is used in CMOS Design explain using example?
- What is pass transistor? How it is used in designing CMOS Logic Gate using example explain?

Q.3 Solve any two: **12**

- Briefly explain in detail accumulation, depletion and inversion modes in MOS transistors.
- Calculate total power dissipation in CMOS inverter for frequency 20 MHz with Static power dissipation of 30 μ W, $V_{DD} = 3.3$ V and $C = 30$ fF
- Design 2 input XNOR gate using CMOS Logic and comment on number of transistors required to implement it.

Section – II

Q.4 Solve any four: **16**

- What is bi-stability Principle? How it is used to design Latch explain using example?
- What is multiplexer-based latch? Explain the use of multiplexer to implement Latch?
- How PLL is used for clock synchronization with help of diagram explain.
- What is clock skew and clock jitter in circuits?
- Draw ALU and explain in detail.

Q.5 Solve any two: **12**

- Explain operating principle of True single phase clocked register (TSPCR) with help of diagram.
- Explain timing classification in interconnect design.
- With the help of Diagram explain Static RAM implementation.

Fourth Y. (B.Tech.) (Sem-I) (Old) (CBCS) Examination: March/April-2024
ELECTRONICS ENGINEERING
Mobile Technology (197047703)

Day & Date: Friday, 17-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.
 4) Assume data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) Maximum worldwide users for mobile services are on _____ network.
 - a) CDMA
 - b) CDMA 2000
 - c) IEEE 802.11
 - d) GSM
- 2) _____ range covers maximum geographical range of all.
 - a) Transmission
 - b) Detection
 - c) Interference
 - d) Handover
- 3) Which of the following is responsible for managing and allocating radio frequencies in a cellular network?
 - a) Base Station Controller (BSC)
 - b) Mobile Station (MS)
 - c) Mobile Switching Center (MSC)
 - d) Frequency Allocation Table (FAT)
- 4) In a FHSS time spent on each channel is _____ time.
 - a) dwell
 - b) channel
 - c) hop
 - d) stay in
- 5) What is the purpose of a control channel in a cellular network?
 - a) To carry user data during calls or data sessions
 - b) To provide synchronization and signaling information
 - c) To encrypt voice and data transmissions
 - d) To allocate frequencies for each cell
- 6) In a typical GSM network three zones and base station forms _____.
 - a) super zone
 - b) sector
 - c) cell
 - d) cluster
- 7) In GSM a system which allows MSC to communicate with other networks like PSTN & ISDN is _____.
 - a) BSS
 - b) OSS
 - c) GSS
 - d) NSS

- 8) What is the primary use case of Ad hoc mode in WLAN?
- a) Home wireless networks
 - b) Enterprise wireless networks
 - c) Temporary network setup in conferences or events
 - d) Public Wi-Fi hotspots
- 9) In GSM when transmitted as half rate, user data is mapped at same slot but in _____ frame
- a) duplicate
 - b) half
 - c) alternate
 - d) double
- 10) What is the typical range of Ad hoc mode in WLAN?
- a) Few meters
 - b) Few hundred meters
 - c) Few kilometers
 - d) Depends on the transmit power of the devices
- 11) In IEEE 802.11 DSSS spreading is achieved using _____.
- a) Walsh Code
 - b) Training sequence
 - c) Barker Sequence
 - d) none of above
- 12) A Bluetooth operates at _____ band
- a) 2.4 GHz
 - b) 2 GHz
 - c) 620 MHz
 - d) 56 MHz
- 13) Agent discovery & solicitation terms are associated with _____ layer
- a) mobile network
 - b) mobile IP
 - c) transport
 - d) all of above
- 14) In IEEE 802.11 MAC packet structure, first two bytes are _____.
- a) frame control
 - b) duration ID
 - c) preamble
 - d) sequence number

Fourth Y. (B.Tech.) (Sem-I) (Old) (CBCS) Examination: March/April-2024
ELECTRONICS ENGINEERING
Mobile Technology (197047703)

Day & Date: Friday, 17-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section – I

Q.2 Solve any two: **12**

- a) What is microcell zone concept? With suitable example show how it improves capacity in a cellular system.
- b) How Walsh code are generated in IS95. What is its role in forward link and reverse link?
- c) Describe TCH/FS, SACCH & FACCH channel coding in GSM signal processing.

Q.3 Solve any four: **16**

- a) Justify how cell sectoring can increase user capacity?
- b) With suitable example discuss effect of Δ on handoff.
- c) Discuss long code generation and its use in CDMA forward & reverse channels.
- d) Explain FHSS transmitter & receiver.
- e) What is co channel interference? How it can be combated?

Section – II

Q.4 Solve any two: **12**

- a) With suitable diagrams explain any four WATM access scenarios.
- b) With suitable diagram explain basic DFWMAC-DCF using CSMA/CA.
- c) Draw & explain how Bluetooth Piconet & Scatternet are formed.

Q.5 Solve any four: **16**

- a) Explain IP packet delivery to a mobile node using tunnel.
- b) Draw & explain in short - agent solicitation packet in mobile IP.
- c) Explain power management in an ad-hoc network.
- d) Explain IP in IP encapsulation.
- e) Explain why reverse tunneling is required in mobile network layer.

Internet of Things (197047704)**

Day & Date: Saturday, 18-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:**
- 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.
 - 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 - 3) Figures to the right indicates full marks.
 - 4) Assume suitable data whenever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options.

14

- 1) In LPC1768 _____ pin select register is used to configure port pins P0.0 to P0.15.

a) PINSEL2	b) IODIR2
c) PINSEL0	d) PINSEL1
- 2) Second highest priority' exception in ARM Cortex-M3 processor is _____.

a) Reset	b) Hard fault
c) Bus fault	d) NMI
- 3) MQTT is an implementation of _____ model.

a) Message Oriented Middleware	b) RESTful
c) Both a and b	d) None of the above
- 4) CoAP is a _____.

a) Physical layer protocol	b) Service layer protocol
c) Application layer protocol	d) Network layer protocol
- 5) In RESTful model REST stands for _____.

a) Representational State Transfer
b) Resourceful Sensor Transfer
c) Resourceful State Transport
d) None of these
- 6) Modulation scheme followed by IEEE 802.15.4 standard is /are _____.

a) BPSK	b) QPSK
c) DSSS	d) all of these
- 7) _____ Cloud infrastructure is made available to the general public.

a) Public	b) Private
c) Hybrid	d) None of the above
- 8) WBAN stands for: _____.

a) Wireless Buffer Area Networks	b) Wired Body Area Networks
c) Wireless Body Area Networks	d) Wired Buffer Area Networks

Day & Date: Saturday, 18-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All question are compulsory.
2) Figures to right indicate full marks.
3) Assume suitable data whenever necessary.

Section – I

Q.2 Solve any four **16**

- a) List the device platform communication protocols, network communication protocols and network backbone protocols used in IoT.
- b) Discuss security function group components in functional view in IoT reference architecture
- c) What are the examples of security issues for which use cases are required in IoT?
- d) Write short notes on Cortex-M3 processor registers.
- e) What is significance of exceptions and interrupt in embedded application development?

Q.3 Solve any two **12**

- a) With a neat diagram illustrate the four layer architectural framework developed by CISCO for a city.
- b) Draw a use case diagram for creating authentication code using SHA1 algorithm.
- c) Illustrate ARM Cortex-M3 processor architecture in detail with a neat diagram.

Section – II

Q.4 Solve any four **16**

- a) List down and discuss in brief different wireless personal area network standards.
- b) Discuss with neat diagram the Bluetooth single mode architectural stack.
- c) Discuss with neat diagram the MQTT publish-subscribe model and topology.
- d) Discuss the architecture of MQTT protocol.
- e) Define cloud. List down and discuss five essential characteristics of cloud.

Q.5 Solve any two **12**

- a) With neat diagram illustrate the differences in management of cloud models.
- b) Discuss the architecture of CoAP protocol stack.
- c) Elaborate with neat diagram Zigbee packet format and addressing.

Q.1 Choose the correct alternatives from the options.

14

- 1) WBAN stands for: _____.
 - a) Wireless Buffer Area Networks
 - b) Wired Body Area Networks
 - c) Wireless Body Area Networks
 - d) Wired Buffer Area Networks
- 2) _____ allows the consumer to use the provider's applications running on a Cloud infrastructure.
 - a) SaaS
 - b) PaaS
 - c) IaaS
 - d) None of the above
- 3) After the execution of following ARM instruction the content of R2 register will be _____. RSB R2, R2, R2, LSL #3
 - a) $R3 * 7$
 - b) $R2 * 7$
 - c) $R3 * 8$
 - d) $R2 * 8$
- 4) In ARM Cortex M3 processor Nested Vectored Interrupt Controller (NVIC) supports _____.
 - a) Nested interrupt
 - b) Vectored interrupt
 - c) Dynamic priority
 - d) All of above
- 5) ARM Cortex-M3 processor supports _____ interfaces.
 - a) Code memory buses
 - b) System bus
 - c) Private peripheral bus
 - d) All of above
- 6) What is the value of R1 after MVN R1, #7 is executed?
 - a) 0x00000007
 - b) 0xFFFFFFFF8
 - c) 0xFFFFFFFFE
 - d) 0xFFFFFFFFC
- 7) What is IoT?
 - a) network of physical objects embedded with sensors
 - b) network of virtual objects
 - c) network of objects in the ring structure
 - d) network of sensors

- 8) In LPC1768 _____ pin select register is used to configure port pins P0.0 to P0.15.
- | | |
|------------|------------|
| a) PINSEL2 | b) IODIR2 |
| c) PINSEL0 | d) PINSEL1 |
- 9) Second highest priority' exception in ARM Cortex-M3 processor is _____.
- | | |
|--------------|---------------|
| a) Reset | b) Hard fault |
| c) Bus fault | d) NMI |
- 10) MQTT is an implementation of _____ model.
- | | |
|--------------------------------|----------------------|
| a) Message Oriented Middleware | b) RESTful |
| c) Both a and b | d) None of the above |
- 11) CoAP is a _____.
- | | |
|-------------------------------|---------------------------|
| a) Physical layer protocol | b) Service layer protocol |
| c) Application layer protocol | d) Network layer protocol |
- 12) In RESTful model REST stands for _____.
- | |
|------------------------------------|
| a) Representational State Transfer |
| b) Resourceful Sensor Transfer |
| c) Resourceful State Transport |
| d) None of these |
- 13) Modulation scheme followed by IEEE 802.15.4 standard is /are _____.
- | | |
|---------|-----------------|
| a) BPSK | b) QPSK |
| c) DSSS | d) all of these |
- 14) _____ Cloud infrastructure is made available to the general public.
- | | |
|-----------|----------------------|
| a) Public | b) Private |
| c) Hybrid | d) None of the above |

Fourth Y. (B.Tech.)(Sem - I)(Old) (CBCS) Examination: March/April - 2024
ELECTRONICS ENGINEERING
Internet of Things (197047704)

Day & Date: Saturday, 18-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All question are compulsory.
2) Figures to right indicate full marks.
3) Assume suitable data whenever necessary.

Section – I

Q.2 Solve any four **16**

- a) List the device platform communication protocols, network communication protocols and network backbone protocols used in IoT.
- b) Discuss security function group components in functional view in IoT reference architecture
- c) What are the examples of security issues for which use cases are required in IoT?
- d) Write short notes on Cortex-M3 processor registers.
- e) What is significance of exceptions and interrupt in embedded application development?

Q.3 Solve any two **12**

- a) With a neat diagram illustrate the four layer architectural framework developed by CISCO for a city.
- b) Draw a use case diagram for creating authentication code using SHA1 algorithm.
- c) Illustrate ARM Cortex-M3 processor architecture in detail with a neat diagram.

Section – II

Q.4 Solve any four **16**

- a) List down and discuss in brief different wireless personal area network standards.
- b) Discuss with neat diagram the Bluetooth single mode architectural stack.
- c) Discuss with neat diagram the MQTT publish-subscribe model and topology.
- d) Discuss the architecture of MQTT protocol.
- e) Define cloud. List down and discuss five essential characteristics of cloud.

Q.5 Solve any two **12**

- a) With neat diagram illustrate the differences in management of cloud models.
- b) Discuss the architecture of CoAP protocol stack.
- c) Elaborate with neat diagram Zigbee packet format and addressing.

Fourth Y. (B.Tech.) (Sem - I) (Old) (CBCS) Examination: March/April-2024
ELECTRONICS ENGINEERING
Internet of Things (197047704)

Day & Date: Saturday, 18-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:**
- 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.
 - 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 - 3) Figures to the right indicates full marks.
 - 4) Assume suitable data whenever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options.

14

- 1) In ARM Cortex M3 processor Nested Vectored Interrupt Controller (NVIC) supports _____.
 a) Nested interrupt
 b) Vectored interrupt
 c) Dynamic priority
 d) All of above
- 2) ARM Cortex-M3 processor supports _____ interfaces.
 a) Code memory buses
 b) System bus
 c) Private peripheral bus
 d) All of above
- 3) What is the value of R1 after MVN R1, #7 is executed?
 a) 0x00000007
 b) 0xFFFFFFFF8
 c) 0xFFFFF8FE
 d) 0xFFFFF8FC
- 4) What is IoT?
 a) network of physical objects embedded with sensors
 b) network of virtual objects
 c) network of objects in the ring structure
 d) network of sensors
- 5) In LPC1768 _____ pin select register is used to configure port pins P0.0 to P0.15.
 a) PINSEL2
 b) IODIR2
 c) PINSEL0
 d) PINSEL1
- 6) Second highest priority' exception in ARM Cortex-M3 processor is _____.
 a) Reset
 b) Hard fault
 c) Bus fault
 d) NMI
- 7) MQTT is an implementation of _____ model.
 a) Message Oriented Middleware
 b) RESTful
 c) Both a and b
 d) None of the above
- 8) CoAP is a _____.
 a) Physical layer protocol
 b) Service layer protocol
 c) Application layer protocol
 d) Network layer protocol

- 9) In RESTful model REST stands for _____.
a) Representational State Transfer
b) Resourceful Sensor Transfer
c) Resourceful State Transport
d) None of these
- 10) Modulation scheme followed by IEEE 802.15.4 standard is /are _____.
a) BPSK
b) QPSK
c) DSSS
d) all of these
- 11) _____ Cloud infrastructure is made available to the general public.
a) Public
b) Private
c) Hybrid
d) None of the above
- 12) WBAN stands for: _____.
a) Wireless Buffer Area Networks
b) Wired Body Area Networks
c) Wireless Body Area Networks
d) Wired Buffer Area Networks
- 13) _____ allows the consumer to use the provider's applications running on a Cloud infrastructure.
a) SaaS
b) PaaS
c) IaaS
d) None of the above
- 14) After the execution of following ARM instruction the content of R2 register will be _____. RSB R2, R2, R2, LSL #3
a) $R3 * 7$
b) $R2 * 7$
c) $R3 * 8$
d) $R2 * 8$

 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.
 4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the given options. 14

- 1) When _____ contacts are actuated, they interrupt the power supply through them.
 - a) normally open type
 - b) normally closed type
 - c) both a and b
 - d) None of the above
- 2) _____ is doping process whereby dopant ions are introduced into the material of interest to change its property.
 - a) Etching
 - b) Ion Implantation
 - c) Diffusion
 - d) Evaporation
- 3) A _____ is a solid cylinder or disk that fits snugly into a larger cylinder and moves under fluid pressure.
 - a) Screw
 - b) Compressor
 - c) Piston
 - d) Rod
- 4) MEMS stand for _____.
 - a) Micro Electromechanical system
 - b) Mini Electromechanical system
 - c) Micro Electrical Mechanical system
 - d) Mini Electrical Mechanical system
- 5) _____ is process, in which impure material is added to a material of interest.
 - a) Etching
 - b) Implantation
 - c) Doping
 - d) Evaporation
- 6) Actuators are interfaced with _____ card of the PLC.
 - a) Memory
 - b) Input
 - c) Output
 - d) Power
- 7) _____ is/are thermal energy measurement sensor.
 - a) Infrared sensors
 - b) Thermocouples
 - c) Semiconductor temperature sensors
 - d) All of the above

- 8) _____ is a material removal method.
- a) Surface micromachining b) Micro stereo Lithography
c) LIGA d) None of the above
- 9) Closed loop control systems are
- i) More stable than open loop systems
ii) More complex to design than open loop systems
- a) Both i) and ii) are true b) i) is true and ii) is false
c) i) is false and ii) is true d) Both i) and ii) are false
- 10) Which control system does not have a stability problem?
- a) Open loop system b) Closed loop system
c) Both a) and b) d) None of the above
- 11) In an open loop control system _____.
- a) Output is independent of control input
b) Output is dependent on control input
c) Only system parameters have effect on the control output
d) None of the above
- 12) A sensor, for an input of 12V gives a digital output of a word of 10 bits. Resolution approximately is _____.
- a) 0.0417 V b) 0.0217 V
c) 0.0117 V d) None of the above
- 13) A controller is essentially _____.
- a) Sensor b) Clipper
c) Comparator d) Amplifier
- 14) DC motor speed control can be achieved using _____.
- a) PWM b) Frequency modulation
c) Amplitude modulation d) None of the above

Max. Marks: 56

- Instructions:** 1) Attempt any two question from the both sections.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary.

Section – I

- Q.2 Solve any four. 16**
- a) Define mechatronics. List some of the application of Mechatronics.
 - b) Explain in detail the adaptive control system.
 - c) What is the process stages involved in mechatronics system design?
 - d) What are the key elements of Mechatronics system?
 - e) How displacement can be measured using LVDT?
- Q.3 Solve any two. 12**
- a) With suitable example explain Microprocessor based controllers in mechatronics.
 - b) Write a short note on: Light sensor, proximity switches.
 - c) Explain the types of pressure valve

Section – II

- Q.4 Solve any four. 16**
- a) How to control the speed of stepper motor?
 - b) What are the different stages in designing a mechatronics system, explain in detail?
 - c) How Gear trains are used to transfer and transform rotational motion.
 - d) Draw and explain the mechanisms of Ratchet and Pawl.
 - e) List down the differences between traditional design approach and mechatronics approach.
- Q.5 Solve any two. 12**
- a) Explain automatic car park barriers.
 - b) Illustrate the working of CAMs of different shapes.
 - c) Design a mechatronics system for an automatic Car Park Systems?

 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.
 4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the given options.

14

- 1) Actuators are interfaced with _____ card of the PLC.
 - a) Memory
 - b) Input
 - c) Output
 - d) Power
- 2) _____ is/are thermal energy measurement sensor.
 - a) Infrared sensors
 - b) Thermocouples
 - c) Semiconductor temperature sensors
 - d) All of the above
- 3) _____ is a material removal method.
 - a) Surface micromachining
 - b) Micro stereo Lithography
 - c) LIGA
 - d) None of the above
- 4) Closed loop control systems are
 - i) More stable than open loop systems
 - ii) More complex to design than open loop systems
 - a) Both i) and ii) are true
 - b) i) is true and ii) is false
 - c) i) is false and ii) is true
 - d) Both i) and ii) are false
- 5) Which control system does not have a stability problem?
 - a) Open loop system
 - b) Closed loop system
 - c) Both a) and b)
 - d) None of the above
- 6) In an open loop control system _____.
 - a) Output is independent of control input
 - b) Output is dependent on control input
 - c) Only system parameters have effect on the control output
 - d) None of the above
- 7) A sensor, for an input of 12V gives a digital output of a word of 10 bits. Resolution approximately is _____.
 - a) 0.0417 V
 - b) 0.0217 V
 - c) 0.0117 V
 - d) None of the above

- 8) A controller is essentially _____.
a) Sensor
b) Clipper
c) Comparator
d) Amplifier
- 9) DC motor speed control can be achieved using _____.
a) PWM
b) Frequency modulation
c) Amplitude modulation
d) None of the above
- 10) When _____ contacts are actuated, they interrupt the power supply through them.
a) normally open type
b) normally closed type
c) both a and b
d) None of the above
- 11) _____ is doping process whereby dopant ions are introduced into the material of interest to change its property.
a) Etching
b) Ion Implantation
c) Diffusion
d) Evaporation
- 12) A _____ is a solid cylinder or disk that fits snugly into a larger cylinder and moves under fluid pressure.
a) Screw
b) Compressor
c) Piston
d) Rod
- 13) MEMS stand for _____.
a) Micro Electromechanical system
b) Mini Electromechanical system
c) Micro Electrical Mechanical system
d) Mini Electrical Mechanical system
- 14) _____ is process, in which impure material is added to a material of interest.
a) Etching
b) Implantation
c) Doping
d) Evaporation

Fourth Y. (B.Tech.) (Sem-I) (Old) (CBCS) Examination: March/April-2024
ELECTRONICS ENGINEERING
Mechatronics (197047708)

Day & Date: Sunday, 19-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) Attempt any two question from the both sections.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary.

Section – I

- Q.2 Solve any four. 16**
- a) Define mechatronics. List some of the application of Mechatronics.
 - b) Explain in detail the adaptive control system.
 - c) What is the process stages involved in mechatronics system design?
 - d) What are the key elements of Mechatronics system?
 - e) How displacement can be measured using LVDT?
- Q.3 Solve any two. 12**
- a) With suitable example explain Microprocessor based controllers in mechatronics.
 - b) Write a short note on: Light sensor, proximity switches.
 - c) Explain the types of pressure valve

Section – II

- Q.4 Solve any four. 16**
- a) How to control the speed of stepper motor?
 - b) What are the different stages in designing a mechatronics system, explain in detail?
 - c) How Gear trains are used to transfer and transform rotational motion.
 - d) Draw and explain the mechanisms of Ratchet and Pawl.
 - e) List down the differences between traditional design approach and mechatronics approach.
- Q.5 Solve any two. 12**
- a) Explain automatic car park barriers.
 - b) Illustrate the working of CAMs of different shapes.
 - c) Design a mechatronics system for an automatic Car Park Systems?

Fourth. Y. (B.Tech.) (Sem-I) (Old) (CBCS) Examination: March/April-2024
ELECTRONICS ENGINEERING

Database Management Systems (197047709)

Day & Date: Sunday, 19-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the given options.

14

- 1) What is a database?
 - a) A collection of unorganized data
 - b) A structured collection of related data
 - c) A single file containing text-based information
 - d) A presentation software for data visualization

- 2) Which of the following is a primary key in a relational database?
 - a) Any attribute with unique values
 - b) An attribute that can be null
 - c) A combination of attributes that uniquely identifies a record
 - d) An attribute used for sorting records

- 3) What is SQL used for in database management?
 - a) Defining data structures
 - b) Performing complex calculations
 - c) Storing and managing data
 - d) Creating graphics and images

- 4) Which SQL command is used to retrieve data from a database?

a) SELECT	b) UPDATE
c) DELETE	d) INSERT

- 5) What is a foreign key in a relational database?
 - a) A key used for encryption
 - b) An attribute that uniquely identifies a record
 - c) An attribute that references the primary key of another table
 - d) A key used for indexing purposes

- 6) Which normalization form eliminates partial dependency?
 - a) First Normal Form (1NF)
 - b) Second Normal Form (2NF)
 - c) Third Normal Form (3NF)
 - d) Boyce-Codd Normal Form (BCNF)

- 7) What does the acronym ACID stand for in the context of database transactions?
- a) Atomicity, Consistency, Isolation, Durability
 - b) Accuracy, Completeness, Integrity, Durability
 - c) Association, Consistency, Isolation, Durability
 - d) Atomicity, Completeness, Inclusion, Durability
- 8) Which type of join returns all rows from both tables?
- a) INNER JOIN
 - b) LEFT JOIN
 - c) RIGHT JOIN
 - d) FULL OUTER JOIN
- 9) In a relational database, what is a trigger?
- a) A type of constraint
 - b) A set of instructions to perform an action
 - c) A type of index
 - d) A virtual table
- 10) What is the purpose of an index in a database table?
- a) To enforce data integrity
 - b) To store large binary objects
 - c) To speed up data retrieval
 - d) To create relationships between tables
- 11) Which of the following is NOT a data manipulation command in SQL?
- a) INSERT
 - b) UPDATE
 - c) DELETE
 - d) CREATE
- 12) What is the purpose of a primary key in a database table?
- a) To establish relationships between tables
 - b) To provide a unique identifier for each record
 - c) To control access to the table
 - d) To improve query performance
- 13) Which SQL clause is used to filter the results of a query?
- a) FROM
 - b) WHERE
 - c) GROUP BY
 - d) JOIN
- 14) Which type of relationship between tables is represented by a diamond shape in an entity relationship diagram (ERD)?
- a) One-to-One
 - b) One-to-Many
 - c) Many-to-One
 - d) Many-to-Many

ELECTRONICS ENGINEERING
Database Management Systems (197047709)

Day & Date: Sunday, 19-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All question are compulsory.
2) Figures to the right indicate full marks.

Section – I

- Q.2 Attempt any THREE** **12**
- a) Explain any Four SQL Commands syntax with Example.
 - b) What is weak entity and strong entity?
 - c) Explain the concept of cardinality with proper E-R diagram.
 - d) What are the five main functions of a database administrator?
- Q.3 Attempt any TWO.** **16**
- a) Discuss the basic issues in the design of an ER database schema.
 - b) In SQL; explain the terms with syntax and examples. CREATE, ALTER, DROP, UPDATE
 - c) What are the drawbacks of using a file system? How DBMS overcomes that? Explain

Section – II

- Q.4 Attempt any THREE.** **12**
- a) What is BCNF. Explain with an example
 - b) Explain the following terms with a diagram; primary indexing and clustering indexing.
 - c) Explain B+ tree with an example and how insertion works.
 - d) Explain deadlock detection and recovery.
- Q.5 Attempt any TWO.** **16**
- a) Explain Locks. Illustrate Time Stamp-based protocols and Validation based protocols.
 - b) Explain in details Static Hashing, and Dynamic Hashing with proper examples.
 - c) Write a short note on - Functional dependency theory.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) In PID controller _____ parameter is responsible for oscillation.

a) KP	b) KD
c) PO	d) KI
- 2) Selection of the suitable actuations principle depends on:

a) Requirement forces	b) Amount of motion needed
c) Accuracy	d) All of the above
- 3) _____ is used to control the operations of electro-mechanical devices especially in tough and hazardous industrial environments.

a) Microprocessor	b) PLC
c) Microcontroller	d) None of the above
- 4) _____ converts the physical quantity such as the force or displacement into an equivalent electrical signal in the form of voltage or current.

a) Sensors	b) Actuators
c) Transducers	d) Amplifiers
- 5) A mechanism that converts any source of energy into action is called _____.

a) Sensor	b) Actuator
c) LEDs	d) All the above
- 6) _____ is/are thermal energy measurement sensor.

a) Infrared sensors	b) Thermocouples
c) Semiconductor temperature sensors	d) All of the above
- 7) Closed loop control systems are _____.

i) More stable than open loop systems.	b) i is true and ii is false
ii) More complex to design than open loop systems.	d) Both i and ii are false
a) Both i and ii are true	
c) i is false and ii is true	

- 8) Which control system does not have a stability problem?
a) Open loop system b) Closed loop system
c) Both a and b d) None of the above
- 9) A sensor, for an input of 12V gives a digital output of a word of 10 bits. Resolution approximately is _____.
a) 0.0417 V b) 0.0217 V
c) 0.0117 V d) None of the above
- 10) A controller is essentially _____.
a) Sensor b) Clipper
c) Comparator d) Amplifier
- 11) DC motor speed control can be achieved using _____.
a) PWM b) Frequency modulation
c) Amplitude modulation d) None of these
- 12) Cam converts _____ to _____.
a) force, energy
b) rotary motion, oscillatory motion
c) kinetic energy, potential energy
d) potential energy, kinetic energy
- 13) Gear trains are mechanisms which are very widely used to transfer and transform _____.
a) rotational motion b) kinetic energy
c) potential energy d) force
- 14) The minimum increment in input to which the sensor can respond is referred to as _____.
a) Accuracy b) Efficiency
c) Resolution d) Speed

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary.

Section – I

- Q.2 Attempt Any Four. 16**
- a) What are the key elements of Mechatronics system?
 - b) Explain in detail the adaptive control system.
 - c) What are different parameters used to decide the performance of sensors?
 - d) How linear cylinder can be used to produce rotation?
 - e) Write a short note on process control valve.
- Q.3 Attempt Any Two. 12**
- a) How directional control spool and poppet valves operates?
 - b) How displacement can be measured using LVDT?
 - c) Write a short note on: Light sensor, proximity switches.

Section – II

- Q.4 Attempt Any Four. 16**
- a) Draw and explain the mechanisms of Ratchet and Pawl.
 - b) List down the differences between traditional design approach and mechatronics approach.
 - c) Draw and explain the working of Belt drives.
 - d) Write a short note on relays and solenoids.
 - e) Explain the speed control of stepper motor.
- Q.5 Attempt Any Two. 12**
- a) Define the factors to be considered for selection of motor drive systems.
 - b) Explain hardware components in digital camera.
 - c) Draw and explain hydraulic power supply.

- 2) A sensor, for an input of 12V gives a digital output of a word of 10 bits. Resolution approximately is _____.
 - a) 0.0417 V
 - b) 0.0217 V
 - c) 0.0117 V
 - d) None of the above
- 3) A controller is essentially _____.
 - a) Sensor
 - b) Clipper
 - c) Comparator
 - d) Amplifier
- 4) DC motor speed control can be achieved using _____.
 - a) PWM
 - b) Frequency modulation
 - c) Amplitude modulation
 - d) None of these
- 5) Cam converts _____ to _____.
 - a) force, energy
 - b) rotary motion, oscillatory motion
 - c) kinetic energy, potential energy
 - d) potential energy, kinetic energy
- 6) Gear trains are mechanisms which are very widely used to transfer and transform _____.
 - a) rotational motion
 - b) kinetic energy
 - c) potential energy
 - d) force
- 7) The minimum increment in input to which the sensor can respond is referred to as _____.
 - a) Accuracy
 - b) Efficiency
 - c) Resolution
 - d) Speed
- 8) In PID controller _____ parameter is responsible for oscillation.
 - a) KP
 - b) KD
 - c) PO
 - d) KI

- 9) Selection of the suitable actuations principle depends on:
a) Requirement forces b) Amount of motion needed
c) Accuracy d) All of the above
- 10) _____ is used to control the operations of electro-mechanical devices especially in tough and hazardous industrial environments.
a) Microprocessor b) PLC
c) Microcontroller d) None of the above
- 11) _____ converts the physical quantity such as the force or displacement into an equivalent electrical signal in the form of voltage or current.
a) Sensors b) Actuators
c) Transducers d) Amplifiers
- 12) A mechanism that converts any source of energy into action is called _____.
a) Sensor b) Actuator
c) LEDs d) All the above
- 13) _____ is/are thermal energy measurement sensor.
a) Infrared sensors
b) Thermocouples
c) Semiconductor temperature sensors
d) All of the above
- 14) Closed loop control systems are _____.
i) More stable than open loop systems.
ii) More complex to design than open loop systems.
a) Both i and ii are true b) i is true and ii is false
c) i is false and ii is true d) Both i and ii are false

Fourth Y. (B.Tech.) (Sem-II) (New) (CBCS) Examination: March/April-2024
ELECTRONICS ENGINEERING
Mechatronics (BTN04807)

Day & Date: Thursday, 09-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary.

Section – I

- Q.2 Attempt Any Four. 16**
- a) What are the key elements of Mechatronics system?
 - b) Explain in detail the adaptive control system.
 - c) What are different parameters used to decide the performance of sensors?
 - d) How linear cylinder can be used to produce rotation?
 - e) Write a short note on process control valve.
- Q.3 Attempt Any Two. 12**
- a) How directional control spool and poppet valves operates?
 - b) How displacement can be measured using LVDT?
 - c) Write a short note on: Light sensor, proximity switches.

Section – II

- Q.4 Attempt Any Four. 16**
- a) Draw and explain the mechanisms of Ratchet and Pawl.
 - b) List down the differences between traditional design approach and mechatronics approach.
 - c) Draw and explain the working of Belt drives.
 - d) Write a short note on relays and solenoids.
 - e) Explain the speed control of stepper motor.
- Q.5 Attempt Any Two. 12**
- a) Define the factors to be considered for selection of motor drive systems.
 - b) Explain hardware components in digital camera.
 - c) Draw and explain hydraulic power supply.

Seat No.

Fourth Y. (B.Tech.) (Sem-II) (New) (CBCS) Examination: March/April-2024
ELECTRONICS ENGINEERING
Mechatronics (BTN04807)

Day & Date: Thursday, 09-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.
 4) Assume data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) DC motor speed control can be achieved using _____.
 a) PWM
 b) Frequency modulation
 c) Amplitude modulation
 d) None of these
- 2) Cam converts _____ to _____.
 a) force, energy
 b) rotary motion, oscillatory motion
 c) kinetic energy, potential energy
 d) potential energy, kinetic energy
- 3) Gear trains are mechanisms which are very widely used to transfer and transform _____.
 a) rotational motion
 b) kinetic energy
 c) potential energy
 d) force
- 4) The minimum increment in input to which the sensor can respond is referred to as _____.
 a) Accuracy
 b) Efficiency
 c) Resolution
 d) Speed
- 5) In PID controller _____ parameter is responsible for oscillation.
 a) KP
 b) KD
 c) PO
 d) KI
- 6) Selection of the suitable actuations principle depends on:
 a) Requirement forces
 b) Amount of motion needed
 c) Accuracy
 d) All of the above
- 7) _____ is used to control the operations of electro-mechanical devices especially in tough and hazardous industrial environments.
 a) Microprocessor
 b) PLC

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the given options.

14

- 1) Which of the following is a potential benefit of cloud computing?
 - a) Limited scalability
 - b) High upfront costs
 - c) On-demand resource provisioning
 - d) Increased hardware maintenance
- 2) What is a common challenge associated with cloud computing?
 - a) Improved data security
 - b) Reduced flexibility
 - c) Decreased accessibility
 - d) Vendor lock-in
- 3) What is a key advantage of containerization technology compared to traditional virtualization with hypervisors?
 - a) Higher level of isolation between applications
 - b) Lower overhead and faster startup times
 - c) Easier migration of virtual machines between hosts
 - d) Greater compatibility with legacy operating systems
- 4) What design principle advocates for the duplication of critical components and services across multiple geographic regions to ensure high availability and fault tolerance in cloud systems?
 - a) Single point of failure
 - b) Redundancy
 - c) Scalability
 - d) Elasticity
- 5) Which architectural principle emphasizes the use of loosely coupled components and services to maximize flexibility and scalability in cloud applications?
 - a) Monolithic architecture
 - b) Microservices architecture
 - c) Client-server architecture
 - d) Peer-to-peer architecture
- 6) Which challenge of cloud computing refers to the potential risk of data breaches or unauthorized access to sensitive information?
 - a) Vendor lock-in
 - b) Compliance issues
 - c) Data security concerns
 - d) Limited customization options

- 7) In which service model does the service provider manage the underlying infrastructure, while users have control over the deployed applications and configuration settings?
- a) Infrastructure as a Service (IaaS)
 - b) Platform as a Service (PaaS)
 - c) Software as a Service (SaaS)
 - d) Function as a Service (FaaS)
- 8) What is the role of API Gateway in the AWS serverless architecture described in the case study?
- a) Storing and retrieving data
 - b) Processing data streams in real-time
 - c) Managing HTTP endpoints and routes for serverless functions
 - d) Performing authentication and authorization tasks
- 9) In Function as a Service (FaaS) model, how are functions deployed and executed?
- a) On dedicated virtual machines
 - b) In containers managed by Kubernetes
 - c) In response to specific events or triggers
 - d) On physical servers in data centers
- 10) What is one of the primary concerns regarding cloud security?
- a) Decreased accessibility
 - b) Increased control over data
 - c) Data breaches and unauthorized access
 - d) Reduced cost of security measures
- 11) What is one of the primary goals of cloud service management?
- a) Maximizing upfront costs
 - b) Minimizing resource utilization
 - c) Ensuring optimal performance and availability
 - d) Increasing manual intervention in resource provisioning
- 12) What role does the Cloud Gateway play in IoT architecture?
- a) It collects and preprocesses data from IoT devices
 - b) It stores all the data generated by IoT devices
 - c) It analyzes data in real-time and triggers actions
 - d) It provides a secure connection between IoT devices and the cloud
- 13) What is the purpose of the Edge Computing layer in IoT architecture?
- a) It processes data closer to the IoT devices, reducing latency
 - b) It stores historical data for long-term analysis
 - c) It provides a graphical user interface for data visualization
 - d) It manages device authentication and access control
- 14) Which type of hypervisor runs directly on the physical hardware of a host system, allowing multiple operating systems to run concurrently on top of it?
- a) Type 1 hypervisor
 - b) Type 2 hypervisor
 - c) Kernel-based hypervisor
 - d) Hosted hypervisor

Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

- Q.2 Solve any three. 12**
- a) Name two characteristics that differentiate cloud computing from traditional computing models.
 - b) Define and describe the concept of "private cloud."
 - c) Briefly discuss one security measure employed in cloud computing.
 - d) What are the advantages of containerisation for application deployment in the cloud?
 - e) What are the three primary cloud service models? Explain.
- Q.3 Solve any one. 08**
- a) Describe the role of hypervisors and containers in virtualisation technologies, highlighting their respective advantages and use cases in cloud computing environments.
 - b) Discuss the benefits of cloud adoption for businesses, citing examples of cost efficiency, scalability, and flexibility, while addressing potential challenges and proposing mitigation strategies.
- Q.4 Compare and contrast Infrastructure as a Service (IaaS), Platform as a Service (PaaS) and Software as a Service (SaaS) models in cloud computing, highlighting their key features and use cases. 08**

Section – II

- Q.5 Solve any three. 12**
- a) What is the primary concern of cloud security?
 - b) Give an example of a cloud cost optimization strategy.
 - c) Explain the importance of IoT data management.
 - d) Give an examples of an IoT application in smart cities. Discuss.
 - e) Discuss case study - AWS serverless – Lambda
- Q.6 Solve any one. 08**
- a) Explain the concept of cloud service management and optimization. Discuss the key components and processes involved in managing cloud services efficiently.
 - b) Define IoT and cloud computing. Discuss the relationship between these two technologies and how they complement each other in modern computing environments.
- Q.7 What is Cloud-native application architecture? Explain benefits of Cloud-Native Application Architecture. 08**

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the given options.

14

- 1) What is one of the primary goals of cloud service management?
 - a) Maximizing upfront costs
 - b) Minimizing resource utilization
 - c) Ensuring optimal performance and availability
 - d) Increasing manual intervention in resource provisioning
- 2) What role does the Cloud Gateway play in IoT architecture?
 - a) It collects and preprocesses data from IoT devices
 - b) It stores all the data generated by IoT devices
 - c) It analyzes data in real-time and triggers actions
 - d) It provides a secure connection between IoT devices and the cloud
- 3) What is the purpose of the Edge Computing layer in IoT architecture?
 - a) It processes data closer to the IoT devices, reducing latency
 - b) It stores historical data for long-term analysis
 - c) It provides a graphical user interface for data visualization
 - d) It manages device authentication and access control
- 4) Which type of hypervisor runs directly on the physical hardware of a host system, allowing multiple operating systems to run concurrently on top of it?

a) Type 1 hypervisor	b) Type 2 hypervisor
c) Kernel-based hypervisor	d) Hosted hypervisor
- 5) Which of the following is a potential benefit of cloud computing?
 - a) Limited scalability
 - b) High upfront costs
 - c) On-demand resource provisioning
 - d) Increased hardware maintenance
- 6) What is a common challenge associated with cloud computing?

a) Improved data security	b) Reduced flexibility
c) Decreased accessibility	d) Vendor lock-in

- 7) What is a key advantage of containerization technology compared to traditional virtualization with hypervisors?
- a) Higher level of isolation between applications
 - b) Lower overhead and faster startup times
 - c) Easier migration of virtual machines between hosts
 - d) Greater compatibility with legacy operating systems
- 8) What design principle advocates for the duplication of critical components and services across multiple geographic regions to ensure high availability and fault tolerance in cloud systems?
- a) Single point of failure
 - b) Redundancy
 - c) Scalability
 - d) Elasticity
- 9) Which architectural principle emphasizes the use of loosely coupled components and services to maximize flexibility and scalability in cloud applications?
- a) Monolithic architecture
 - b) Microservices architecture
 - c) Client-server architecture
 - d) Peer-to-peer architecture
- 10) Which challenge of cloud computing refers to the potential risk of data breaches or unauthorized access to sensitive information?
- a) Vendor lock-in
 - b) Compliance issues
 - c) Data security concerns
 - d) Limited customization options
- 11) In which service model does the service provider manage the underlying infrastructure, while users have control over the deployed applications and configuration settings?
- a) Infrastructure as a Service (IaaS)
 - b) Platform as a Service (PaaS)
 - c) Software as a Service (SaaS)
 - d) Function as a Service (FaaS)
- 12) What is the role of API Gateway in the AWS serverless architecture described in the case study?
- a) Storing and retrieving data
 - b) Processing data streams in real-time
 - c) Managing HTTP endpoints and routes for serverless functions
 - d) Performing authentication and authorization tasks
- 13) In Function as a Service (FaaS) model, how are functions deployed and executed?
- a) On dedicated virtual machines
 - b) In containers managed by Kubernetes
 - c) In response to specific events or triggers
 - d) On physical servers in data centers
- 14) What is one of the primary concerns regarding cloud security?
- a) Decreased accessibility
 - b) Increased control over data

Fourth Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: March/April-2024
ELECTRONICS ENGINEERING
Cloud Computing (BTN04808)

Day & Date: Thursday, 09-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.
 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the given options. 14

- 1) Which challenge of cloud computing refers to the potential risk of data breaches or unauthorized access to sensitive information?
 - a) Vendor lock-in
 - b) Compliance issues
 - c) Data security concerns
 - d) Limited customization options
- 2) In which service model does the service provider manage the underlying infrastructure, while users have control over the deployed applications and configuration settings?
 - a) Infrastructure as a Service (IaaS)
 - b) Platform as a Service (PaaS)
 - c) Software as a Service (SaaS)
 - d) Function as a Service (FaaS)
- 3) What is the role of API Gateway in the AWS serverless architecture described in the case study?
 - a) Storing and retrieving data
 - b) Processing data streams in real-time
 - c) Managing HTTP endpoints and routes for serverless functions
 - d) Performing authentication and authorization tasks
- 4) In Function as a Service (FaaS) model, how are functions deployed and executed?
 - a) On dedicated virtual machines
 - b) In containers managed by Kubernetes
 - c) In response to specific events or triggers
 - d) On physical servers in data centers
- 5) What is one of the primary concerns regarding cloud security?
 - a) Decreased accessibility
 - b) Increased control over data
 - c) Data breaches and unauthorized access
 - d) Reduced cost of security measures

- 6) What is one of the primary goals of cloud service management?
- a) Maximizing upfront costs
 - b) Minimizing resource utilization
 - c) Ensuring optimal performance and availability
 - d) Increasing manual intervention in resource provisioning
- 7) What role does the Cloud Gateway play in IoT architecture?
- a) It collects and preprocesses data from IoT devices
 - b) It stores all the data generated by IoT devices
 - c) It analyzes data in real-time and triggers actions
 - d) It provides a secure connection between IoT devices and the cloud
- 8) What is the purpose of the Edge Computing layer in IoT architecture?
- a) It processes data closer to the IoT devices, reducing latency
 - b) It stores historical data for long-term analysis
 - c) It provides a graphical user interface for data visualization
 - d) It manages device authentication and access control
- 9) Which type of hypervisor runs directly on the physical hardware of a host system, allowing multiple operating systems to run concurrently on top of it?
- a) Type 1 hypervisor
 - b) Type 2 hypervisor
 - c) Kernel-based hypervisor
 - d) Hosted hypervisor
- 10) Which of the following is a potential benefit of cloud computing?
- a) Limited scalability
 - b) High upfront costs
 - c) On-demand resource provisioning
 - d) Increased hardware maintenance
- 11) What is a common challenge associated with cloud computing?
- a) Improved data security
 - b) Reduced flexibility
 - c) Decreased accessibility
 - d) Vendor lock-in
- 12) What is a key advantage of containerization technology compared to traditional virtualization with hypervisors?
- a) Higher level of isolation between applications
 - b) Lower overhead and faster startup times
 - c) Easier migration of virtual machines between hosts
 - d) Greater compatibility with legacy operating systems
- 13) What design principle advocates for the duplication of critical components and services across multiple geographic regions to ensure high availability and fault tolerance in cloud systems?
- a) Single point of failure
 - b) Redundancy
 - c) Scalability
 - d) Elasticity
- 14) Which architectural principle emphasizes the use of loosely coupled components and services to maximize flexibility and scalability in cloud applications?
- a) Monolithic architecture
 - b) Microservices architecture
 - c) Client-server architecture
 - d) Peer-to-peer architecture

Fourth Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: March/April-2024
ELECTRONICS ENGINEERING
Cloud Computing (BTN04808)

Day & Date: Thursday, 09-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

- Q.2 Solve any three. 12**
- a) Name two characteristics that differentiate cloud computing from traditional computing models.
 - b) Define and describe the concept of "private cloud."
 - c) Briefly discuss one security measure employed in cloud computing.
 - d) What are the advantages of containerisation for application deployment in the cloud?
 - e) What are the three primary cloud service models? Explain.
- Q.3 Solve any one. 08**
- a) Describe the role of hypervisors and containers in virtualisation technologies, highlighting their respective advantages and use cases in cloud computing environments.
 - b) Discuss the benefits of cloud adoption for businesses, citing examples of cost efficiency, scalability, and flexibility, while addressing potential challenges and proposing mitigation strategies.
- Q.4 Compare and contrast Infrastructure as a Service (IaaS), Platform as a Service (PaaS) and Software as a Service (SaaS) models in cloud computing, highlighting their key features and use cases. 08**

Section – II

- Q.5 Solve any three. 12**
- a) What is the primary concern of cloud security?
 - b) Give an example of a cloud cost optimization strategy.
 - c) Explain the importance of IoT data management.
 - d) Give an examples of an IoT application in smart cities. Discuss.
 - e) Discuss case study - AWS serverless – Lambda
- Q.6 Solve any one. 08**
- a) Explain the concept of cloud service management and optimization. Discuss the key components and processes involved in managing cloud services efficiently.
 - b) Define IoT and cloud computing. Discuss the relationship between these two technologies and how they complement each other in modern computing environments.
- Q.7 What is Cloud-native application architecture? Explain benefits of Cloud-Native Application Architecture. 08**

Fourth Y. (B.Tech.) (Sem-II) (New) (CBCS) Examination: March/April-2024
ELECTRONICS ENGINEERING
Electronic Instrumentation (BTN04802)

Day & Date: Saturday, 11-05-2024
 Time: 03:00 PM To 05:00 PM

Max. Marks: 50

- Instructions:**
- 1) Q. No. 1 is compulsory and should be solved in first 20 minutes in Answer Book Page No.3 (starting page of the Answer Book). Each question carry one mark.
 - 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 - 3) Figures to the right indicates full marks.
 - 4) Assume suitable data if required.

MCQ/Objective Type Questions

Duration: 20 Minutes

Marks: 10

Q.1 Choose the correct alternatives from the options. 10

- 1) According to ISO, the quality system is the organizational structure, responsibilities, procedures, processes, and resources for implementing quality management.
 - a) True
 - b) False
- 2) Which of the following must not be a characteristic of a quality system?
 - a) It must be well-understood
 - b) Products or services actually do satisfy customer expectations
 - c) Emphasis on problem prevention
 - d) It must be ineffective
- 3) A single channel data system consists of a signal conditioner, A/D converter and a buffer.
 - a) True
 - b) False
- 4) In single channel data acquisition system, the output of the buffer circuitry is _____.
 - a) analog
 - b) mixed
 - c) zero
 - d) digital
- 5) Data loggers are used _____.
 - a) to store data
 - b) to process data
 - c) to manipulate data
 - d) none of above
- 6) Wave analyzers are used in the frequency range of _____.
 - a) VHF
 - b) UHF
 - c) lower RF
 - d) higher RF
- 7) In FFT Spectrum Analyzer, FFT stands for _____.
 - a) Frequency Fourier Transform
 - b) Fast Fourier Transmission
 - c) Frequency Fourier Transmission
 - d) Fast Fourier Transform

Fourth Y. (B.Tech.) (Sem-II) (New) (CBCS) Examination: March/April-2024
ELECTRONICS ENGINEERING
Electronic Instrumentation (BTN04802)

Day & Date: Saturday, 11-05-2024
Time: 03:00 PM To 05:00 PM

Max. Marks: 40

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if required.

Section – I

- Q.2 Solve any two. 08**
- a) Draw the block diagram of function generator and explain method of producing sine wave.
 - b) Explain basic working principle of digital voltmeter.
 - c) Explain the various types of systematic errors encountered in measurements.
- Q.3 Solve any two 12**
- a) Explain operation of data generator with suitable block diagram.
 - b) With suitable diagram explain LCD display. Compare LED and LCD display.
 - c) What is static error? Explain different types of static errors.

Section – II

- Q.4 Solve any two. 08**
- a) Draw the Quality Loop and label all the segments.
 - b) Explain operation of basic single channel DAS with suitable block diagram.
 - c) Describe operation of Logic Analyzer with suitable block diagram.
- Q.5 Solve any two 12**
- a) What is meant by Total Quality Management? What are the basic principles? Explain the underlying steps to Total Quality Management.
 - b) What is DAS? Explain working of multichannel DAS with suitable block diagram.
 - c) Explain with help of suitable block diagram the working of FET spectrum analyzer.

- 9) In single channel data acquisition system, the output of the buffer circuitry is _____.
- | | |
|-----------|------------|
| a) analog | b) mixed |
| c) zero | d) digital |
- 10) Data loggers are used _____.
- | | |
|-----------------------|--------------------|
| a) to store data | b) to process data |
| c) to manipulate data | d) none of above |

- Instructions:**
- 1) Q. No. 1 is compulsory and should be solved in first 20 minutes in Answer Book Page No.3 (starting page of the Answer Book). Each question carry one mark.
 - 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 - 3) Figures to the right indicates full marks.
 - 4) Assume suitable data if required.

MCQ/Objective Type Questions

Duration: 20 Minutes

Marks: 10

Q.1 Choose the correct alternatives from the options.

10

- 1) In 7 segment display, how many LEDs are used?
 - a) 8
 - b) 7
 - c) 10
 - d) 9
- 2) Error is expressed as _____.
 - a) absolute error
 - b) relative error
 - c) % error
 - d) % accuracy
- 3) According to ISO, the quality system is the organizational structure, responsibilities, procedures, processes, and resources for implementing quality management.
 - a) True
 - b) False
- 4) Which of the following must not be a characteristic of a quality system?
 - a) It must be well-understood
 - b) Products or services actually do satisfy customer expectations
 - c) Emphasis on problem prevention
 - d) It must be ineffective
- 5) A single channel data system consists of a signal conditioner, A/D converter and a buffer.
 - a) True
 - b) False
- 6) In single channel data acquisition system, the output of the buffer circuitry is _____.
 - a) analog
 - b) mixed
 - c) zero
 - d) digital
- 7) Data loggers are used _____.
 - a) to store data
 - b) to process data
 - c) to manipulate data
 - d) none of above
- 8) Wave analyzers are used in the frequency range of _____.
 - a) VHF
 - b) UHF
 - c) lower RF
 - d) higher RF

- 9)** In FFT Spectrum Analyzer, FFT stands for _____.
- a) Frequency Fourier Transform
 - b) Fast Fourier Transmission
 - c) Frequency Fourier Transmission
 - d) Fast Fourier Transform
- 10)** In liquid crystal displays, the liquid crystal exhibits properties of _____.
- a) Liquid
 - b) Solids
 - c) Gases
 - d) Both (a) and (b)

 - 3) Figures to the right indicates full marks.
 - 4) Assume suitable data whenever necessary.

MCQ/Objective Type Questions

Duration: 20 Minutes

Marks: 10

Q.1 Choose the correct alternatives from the options. 10

- 1) What is the primary focus of cyber security?

a) Protecting physical assets	b) Protecting digital assets
c) Enhancing network speed	d) Promoting online anonymity
- 2) Which group of hackers typically aims to exploit vulnerabilities for personal gain?

a) White-hats	b) Black-hats
c) Grey-hats	d) Blue-hats
- 3) What is the main purpose of phishing attacks?

a) Stealing physical belongings	b) Extracting sensitive information
c) Distributing malware	d) Disrupting network connectivity
- 4) What term describes the process of analyzing suspicious emails to identify phishing attempts?

a) Email filtering	b) Email authentication
c) Email tracing	d) Email forensics
- 5) Which type of malware disguises itself as legitimate software?

a) Virus	b) Worm
c) Trojan	d) Spyware
- 6) What is the function of a firewall in network security?

a) Encrypting data transmissions	b) Blocking unauthorized access
c) Analyzing network traffic	d) Enhancing network speed
- 7) What is the primary goal of attacking cloud computing systems?
 - a) Extracting sensitive data
 - b) Disrupting online services
 - c) Modifying network configurations
 - d) Exploiting hardware vulnerabilities
- 8) What technology is commonly used to secure wireless networks?

a) MAC filtering	b) IP addressing
c) Port forwarding	d) Subnet masking

- 9)** Which cryptographic technique involves converting plaintext into ciphertext?
- a) Decryption
 - b) Hashing
 - c) Salting
 - d) Encryption
- 10)** What is the purpose of salting in cryptography?
- a) Enhancing encryption speed
 - b) Increasing decryption complexity
 - c) Strengthening password security
 - d) Accelerating hash computation

 - c) Enhancing network speed
 - d) Promoting online anonymity
- 4) Which group of hackers typically aims to exploit vulnerabilities for personal gain?
 - a) White-hats
 - b) Black-hats
 - c) Grey-hats
 - d) Blue-hats
- 5) What is the main purpose of phishing attacks?
 - a) Stealing physical belongings
 - b) Extracting sensitive information
 - c) Distributing malware
 - d) Disrupting network connectivity
- 6) What term describes the process of analyzing suspicious emails to identify phishing attempts?
 - a) Email filtering
 - b) Email authentication
 - c) Email tracing
 - d) Email forensics
- 7) Which type of malware disguises itself as legitimate software?
 - a) Virus
 - b) Worm
 - c) Trojan
 - d) Spyware
- 8) What is the function of a firewall in network security?
 - a) Encrypting data transmissions
 - b) Blocking unauthorized access
 - c) Analyzing network traffic
 - d) Enhancing network speed

- 9)** What is the primary goal of attacking cloud computing systems?
- a) Extracting sensitive data
 - b) Disrupting online services
 - c) Modifying network configurations
 - d) Exploiting hardware vulnerabilities
- 10)** What technology is commonly used to secure wireless networks?
- a) MAC filtering
 - b) IP addressing
 - c) Port forwarding
 - d) Subnet masking

Fourth Y. (B.Tech.) (Sem-II) (New) (CBCS) Examination: March/April-2024
ELECTRONICS ENGINEERING
Cyber Security (BTN04804)

Day & Date: Saturday, 11-05-2024
Time: 03:00 PM To 05:00 PM

Max. Marks: 40

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section – I

- Q.2 Attempt any five.** **20**
- a) Explain the difference between black-hat and white-hat hackers.
 - b) Describe the methodology used by black-hat attackers.
 - c) How can individuals protect themselves from phishing attacks?
 - d) Discuss the types of malware and methods for defense against them.
 - e) Analyze a phishing email and identify its characteristics.
 - f) Explain the importance of encryption in cyber security and describe common encryption techniques used to secure data.

Section – II

- Q.3 Attempt any five.** **20**
- a) Outline the basics of network design and discuss how networks can be attacked.
 - b) Explain the concept of firewall setup and its importance in network security with reference to a case study.
 - c) Describe the process of attacking and defending cloud computing.
 - d) Discuss the standards and security measures involved in setting up a wireless network.
 - e) Analyze the importance of encryption and decryption in cryptography.
 - f) Explain the concept of network tapping and its implications for network security.

Seat No.	
-----------------	--

Fourth Y. (B.Tech.) (Sem-II) (New) (CBCS) Examination: March/April-2024
ELECTRONICS ENGINEERING
Cyber Security (BTN04804)

Day & Date: Saturday, 11-05-2024
Time: 03:00 PM To 05:00 PM

Max. Marks: 50

- Instructions:**
- 1) Q. No. 1 is compulsory and should be solved in first 20 minutes in Answer Book Page No.3 (starting page of the Answer Book). Each question carry one mark.
 - 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 - 3) Figures to the right indicates full marks.
 - 4) Assume suitable data whenever necessary.

MCQ/Objective Type Questions

Duration: 20 Minutes

Marks: 10

Q.1 Choose the correct alternatives from the options.

10

- 1) What is the main purpose of phishing attacks?
a) Stealing physical belongings b) Extracting sensitive information
c) Distributing malware d) Disrupting network connectivity
- 2) What term describes the process of analyzing suspicious emails to identify phishing attempts?
a) Email filtering b) Email authentication
c) Email tracing d) Email forensics
- 3) Which type of malware disguises itself as legitimate software?
a) Virus b) Worm
c) Trojan d) Spyware
- 4) What is the function of a firewall in network security?
a) Encrypting data transmissions b) Blocking unauthorized access
c) Analyzing network traffic d) Enhancing network speed
- 5) What is the primary goal of attacking cloud computing systems?
a) Extracting sensitive data
b) Disrupting online services
c) Modifying network configurations
d) Exploiting hardware vulnerabilities
- 6) What technology is commonly used to secure wireless networks?
a) MAC filtering b) IP addressing
c) Port forwarding d) Subnet masking
- 7) Which cryptographic technique involves converting plaintext into ciphertext?
a) Decryption b) Hashing
c) Salting d) Encryption

- 8)** What is the purpose of salting in cryptography?
- a) Enhancing encryption speed
 - b) Increasing decryption complexity
 - c) Strengthening password security
 - d) Accelerating hash computation
- 9)** What is the primary focus of cyber security?
- a) Protecting physical assets
 - b) Protecting digital assets
 - c) Enhancing network speed
 - d) Promoting online anonymity
- 10)** Which group of hackers typically aims to exploit vulnerabilities for personal gain?
- a) White-hats
 - b) Black-hats
 - c) Grey-hats
 - d) Blue-hats

Advanced Communication Engineering (197047801)

Day & Date: Thursday, 09-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume data wherever necessary

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) Which one of the following also called 'rat race'?
 - a) E plane tee
 - b) H plane tee
 - c) Magic tee
 - d) Hybrid ring
- 2) Radar principle is used in _____.
 - a) detection of aircraft
 - b) burglar alarms
 - c) garage door openers
 - d) all of the above
- 3) GaAs FET is preferred to _____.
 - a) lower frequency
 - b) higher frequency
 - c) both a and b
 - d) none of above
- 4) Which of the following is not used as a microwave mixer or detector?
 - a) PIN diode
 - b) Crystal diode
 - c) Schottky barrier diode
 - d) Backward diode
- 5) The speed at which axial electric field due to signal advances in a TWT is equal to _____.
 - a) speed of light
 - b) (speed of light) (helix pitch helix circumference)
 - c) (speed of light) (helix pitch) (helix circumference)
 - d) (speed of light) (helix circumference helix pitch)
- 6) If r_v is reflection coefficient and VSWR is voltage standing wave ratio, then _____.
 - a) $\rho_v = \frac{VSWR - 1}{VSWR + 1}$
 - b) $|\rho_v| = \frac{VSWR - 1}{VSWR + 1}$
 - c) $\rho_v = \frac{VSWR + 1}{VSWR - 1}$
 - d) $|\rho_v| = \frac{VSWR + 1}{VSWR - 1}$

- 7) The different access methods which permit many satellite users to operate in parallel through a single transponder without interfering with each other as _____.
- a) Frequency Division Multiple Access (FDMA)
 - b) Time Division Multiple Access (TDMA)
 - c) Code Division Multiple Access (CDMA)
 - d) All of the above
- 8) A satellite link uses different frequencies for receiving and transmitting in order to _____.
- a) avoid interference from terrestrial microwave links
 - b) avoid interference between its powerful transmitted signal and weak incoming signal
 - c) minimize free-space losses
 - d) maximize antenna gain
- 9) Geosynchronous communication satellites travel around the earth in circular orbits with a forward speed of about _____ km/h.
- a) 11200
 - b) 36000
 - c) 0
 - d) 22800
- 10) In satellite communication, highly directional antennas are used to _____.
- a) direct the spot beam to a particular region of space on Earth
 - b) strengthen the beam to overcome the cosmic noise
 - c) make corrections in change of polarization of the beam
 - d) select a particular channel in transmission and reception
- 11) Low-orbit satellites are not used for communications because they _____.
- a) produce sonic booms
 - b) do not provide 24 hour/ day contact to the users on Earth
 - c) heat up and melt
 - d) none
- 12) The traffic-handling capacity of an Earth station on the uplink depends on _____.
- a) its EIRP
 - b) satellite antenna gain
 - c) noise associated with the satellite
 - d) all of the above
- 13) The angle between incident ray & normal to the plane is _____.
- a) Angle of reflection
 - b) Angle of Incident
 - c) Angle of coefficient
 - d) None of these
- 14) In second generation, wavelength of multimode fiber is _____.
- a) 1310 nm
 - b) 850 nm
 - c) 1420 nm
 - d) 1550 nm

Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

- Q.2 Attempt any Two** **12**
- a) Derive Hull cut off voltage equation for a magnetron.
 - b) Describe in detail the principles of the following terms Gunn Effect, high field domain, two valley theory and three valley theory.
 - c) Derive the radar range equation. Write radar performance factors.
- Q.3 Attempt any Four** **16**
- a) What are the advantages of microwave frequencies over low frequency?
 - b) Explain the function of circulator.
 - c) Derive the S matrix for H plane tee.
 - d) Explain basic principle of radar system.
 - e) Compare CW Doppler radar and FM-CW radar.

Section – II

- Q.4 Attempt any Two** **12**
- a) Explain in detail Attitude and Orbit control system (AOCS) and power subsystem.
 - b) Draw the block diagram of earth station and explain in detail.
 - c) Explain construction and working of edge emitting double heterojunction LED.
- Q.5 Attempt any Four** **16**
- a) What is meant by geostationary satellite?
 - b) Explain in detail orbital effects in communication system performance.
 - c) Explain in detail launch and launch vehicles.
 - d) Comparison of single mode, multimode step index and graded index optical fiber.
 - e) Derive numerical aperture for step index fiber.

Audio Video Systems (197047802)

Day & Date: Friday 10-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) What causes reverberation?

a) Diffraction	b) Frequency
c) Reflection	d) Refraction
- 2) What is the complete audible range for a human ear?

a) 20 to 20,000 HZ	b) 30 to 30,000 HZ
c) 20 to 25,000 HZ	d) 60 to 60,000 HZ
- 3) Why is a picture frame projected twice on the screen?

a) To strengthen the image	b) To have good focusing
c) To eliminate flicker	d) To have good resolution
- 4) Aspect ratio for width to height for a TV picture frame is _____.

a) 1:1	b) 2:1
c) 4:3	d) 5:1
- 5) Nyquist's frequency of sampling is _____ times the highest frequency present in the base band signal.

a) 1	b) 2
c) 4	d) 8
- 6) About I and Q terms used in NTSC, Q stands for _____.

a) quality	b) quadrature
c) quantity	d) quantum
- 7) R-Y signal changes phase in PAL on alternate lines by _____.

a) 45 degree	b) 90 degree
c) 180 degree	d) 270 degree
- 8) Which type of system is the PA system in audio devices?

a) Electro-magnetic	b) Electro-dynamic
c) Electro-acoustic	d) Piezo-electric

Set **P**

Fourth Y. (B.Tech.) (Sem-II) (Old) (CBCS) Examination: March/April-2024
ELECTRONICS ENGINEERING
Audio Video Systems (197047802)

Day & Date: Friday 10-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
 2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any Four of the following questions. 16

- Illustrate with neat diagram optical sound recording.
- If the velocity of sound at 0 degree Celsius is 332m/s, calculate
 - Velocity at 20°C
 - wavelength for sound of 400Hz at 20°C
- With a neat diagram discuss additive & subtractive colour theory.
- Give the comparison between Interlace scanning & Progressive scanning in detail.
- Discuss advantages of digital television.

Q.3 Attempt any Two of the following questions. 12

- Discuss with a neat block diagram generalized colour TV Transmitter.
- Discuss the terms acoustics, reverberation, absorption coefficient of sound.
- From the data calculate the Colour Subcarrier for Weighted parameters.

Colour	White	Yellow	Cyan	Green	Magenta	Red	Blue	Black
B-Y	0	-0.438	+0.148	-0.29	+0.29	-0.148	+0.4388	0
R-Y	0	+0.096	-0.614	-0.51	+0.517	+0.614	-0.096	0

Section – II

Q.4 Attempt any Four of the following questions. 16

- Discuss musical instrument digital interface (MIDI) and its role.
- Calculate audio file size, if audio is recorded a 5-minute CD-quality audio (at 16 bit depth) with a sample rate of 44.1 kHz.
- Discuss the MPEG audio encoder with suitable block diagram.
- Give the difference between lossless & lossy compression techniques.
- Compare headphones and headset.

Q.5 Attempt any Two of the following questions. 12

- Define virtual reality; also discuss its different forms & applications.
- Discuss bit allocation algorithm for MPEG-1 Layer 1 and Layer 2.
- Discuss different image data types and their file formats.

Seat No.

Fourth Y. (B.Tech.) (Sem-II) (Old) (CBCS) Examination: March/April-2024
ELECTRONICS ENGINEERING
Audio Video Systems (197047802)

Day & Date: Friday 10-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) Which type of system is the PA system in audio devices?
 - a) Electro-magnetic
 - b) Electro-dynamic
 - c) Electro-acoustic
 - d) Piezo-electric
- 2) In optical playback process, returning beam is reflected from the flat surface and represents the digit _____ & amp; there is only a little reflection from a pit, and it represents _____.
 - a) one, zero
 - b) zero, one
 - c) one, one
 - d) zero, zero
- 3) _____ is an audio file format.
 - a) mpeg-3
 - b) tiff
 - c) jpeg
 - d) gif
- 4) The MIDI standard specifies how many channels?
 - a) 16
 - b) 24
 - c) 32
 - d) 40
- 5) What is the full form of Hi - Fi?
 - a) Highest fidelity
 - b) High fidelity
 - c) Huge fidelity
 - d) High frequency
- 6) During Compression Audio and Video, each frame is divided into small grids, called picture elements or _____.
 - a) Pixels
 - b) Mega Pixels
 - c) Frame
 - d) Packets
- 7) What are the applications of Virtual Reality?
 - a) Education
 - b) Business
 - c) video game
 - d) All of above
- 8) What causes reverberation?
 - a) Diffraction
 - b) Frequency
 - c) Reflection
 - d) Refraction
- 9) What is the complete audible range for a human ear?
 - a) 20 to 20,000 HZ
 - b) 30 to 30,000 HZ
 - c) 20 to 25,000 HZ
 - d) 60 to 60,000 HZ

- 10)** Why is a picture frame projected twice on the screen?
a) To strengthen the image b) To have good focusing
c) To eliminate flicker d) To have good resolution
- 11)** Aspect ratio for width to height for a TV picture frame is _____.
a) 1:1 b) 2:1
c) 4:3 d) 5:1
- 12)** Nyquist's frequency of sampling is _____ times the highest frequency present in the base band signal.
a) 1 b) 2
c) 4 d) 8
- 13)** About I and Q terms used in NTSC, Q stands for _____.
a) quality b) quadrature
c) quantity d) quantum
- 14)** R-Y signal changes phase in PAL on alternate lines by _____.
a) 45 degree b) 90 degree
c) 180 degree d) 270 degree

Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) The PLC is used in _____.
 - a) machine tools
 - b) automated assembly equipment
 - c) moulding and extrusion machines
 - d) all of the above
- 2) Ladder logic programming consists primarily of _____.
 - a) virtual relay contacts and coils
 - b) logic gate symbols with connecting lines
 - c) function blocks with connecting lines
 - d) text-based code
 - e) Hieroglyphics
- 3) In PLC programming, a retentive function is one that _____.
 - a) defaults to the "on" state
 - b) comes last in the program
 - c) defaults to the "off" state
 - d) is not reset after a power cycle
- 4) The _____ of metals is a function of temperature and increases with increasing temperature.
 - a) Coefficient of material
 - b) Resistance
 - c) Conductivity
 - d) Kappa
- 5) Noise reduction techniques should be utilized to avoid interfering voltages that might be otherwise generated in the system.
 - a) True
 - b) False
- 6) The objective of process control is to keep key process operating parameters within narrow bounds of the _____.
 - a) Reference value
 - b) Spot
 - c) Pith
 - d) Inception point

- 7) The most popular language for PLCs is _____.
- a) Ladder diagram b) C++
c) OOP+ d) VHDL
- 8) Very often relays and valves are connected to very often relays and valves are connected to _____.
- a) Input modules b) Output modules
c) Any of these d) None of the above
- 9) PLCs that have a fixed amount of I/O capability built into the unit are known as PLCs that have a fixed amount of I/O capability built into the unit are known as _____.
- a) Rack PLCs b) Monolithic PLCs
c) Modular PLCs d) None of these
- 10) Voltage to current converter is also called as _____.
- a) Current series positive feedback amplifier
b) Voltage series negative feedback amplifier
c) Current series negative feedback amplifier
d) Voltage series positive feedback amplifier
- 11) Which of the following application uses voltage to current converter?
- a) Low voltage dc and ac voltmeter
b) Diode match finding
c) Light emitting diode
d) All of the mentioned
- 12) Which of the following is not of importance when a conveyor is designed?
- a) Type of industry where the conveyor is being used
b) Type of material being carried by the conveyor
c) Cost
d) Length of travel of the conveyor
- 13) What do you mean by 'Conveyor control'?
- a) Controlling the material flow, according to conveyor speed, to reduce power consumption
b) Controlling the conveyor speed, according to material flow, manually
c) Controlling the material flow, according to conveyor speed manually or using feedback drives
d) Controlling the conveyor speed, according to material flow to, reduce power consumption
- 14) Based on how binary information is entered or shifted out, shift registers are classified into _____ categories.
- a) 2 b) 3
c) 4 d) 5

Seat No.	
-----------------	--

Set P

Fourth Y. (B.Tech.) (Sem-II) (Old) (CBCS) Examination: March/April-2024
ELECTRONICS ENGINEERING
PLC and Industrial Controllers (197047805)

Day & Date: Saturday, 11-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section – I

- Q.2 Attempt any four of the following questions. 16**
- a) Draw and explain the ladder diagrams of basic gates, using two inputs.
 - b) State advantages of PLC's over hard-wired relays.
 - c) Compare between PC and PLC.
 - d) Explain Latching with suitable example.
 - e) Draw and explain delay ON and delay OFF timers in PLC.
- Q.3 Attempt any two of the following questions. 12**
- a) State & explain the shift register with ladder diagram.
 - b) What is Central heating system? Explain in detail.
 - c) Draw and explain applications of internal relay used in PLC.

Section – II

- Q.4 Attempt any four of the following questions. 16**
- a) What is P controller? Explain with mathematical model.
 - b) Write short note on temperature sensors.
 - c) Compare between hydraulic actuation system, pneumatic actuators.
 - d) Explain the working of pressure sensor with suitable example.
 - e) Compare between PI & PD controller
- Q.5 Attempt any two of the following questions. 12**
- a) What is actuators? Explain the working of directional control valves in detail.
 - b) Compare between I to V, V to I converter for floating load and grounded load in detail.
 - c) Explain the advantages, disadvantages of PI, PD & PID controllers.

- 6) What do you mean by 'Conveyor control'?
- Controlling the material flow, according to conveyor speed, to reduce power consumption
 - Controlling the conveyor speed, according to material flow, manually
 - Controlling the material flow, according to conveyor speed manually or using feedback drives
 - Controlling the conveyor speed, according to material flow to, reduce power consumption
- 7) Based on how binary information is entered or shifted out, shift registers are classified into _____ categories.
- 2
 - 3
 - 4
 - 5
- 8) The PLC is used in _____.
- machine tools
 - automated assembly equipment
 - moulding and extrusion machines
 - all of the above
- 9) Ladder logic programming consists primarily of _____.
- virtual relay contacts and coils
 - logic gate symbols with connecting lines
 - function blocks with connecting lines
 - text-based code
 - Hieroglyphics
- 10) In PLC programming, a retentive function is one that _____.
- defaults to the "on" state
 - comes last in the program
 - defaults to the "off" state
 - is not reset after a power cycle
- 11) The _____ of metals is a function of temperature and increases with increasing temperature.
- Coefficient of material
 - Resistance
 - Conductivity
 - Kappa
- 12) Noise reduction techniques should be utilized to avoid interfering voltages that might be otherwise generated in the system.
- True
 - False
- 13) The objective of process control is to keep key process operating parameters within narrow bounds of the _____.
- Reference value
 - Spot
 - Pith
 - Inception point
- 14) The most popular language for PLCs is _____.
- Ladder diagram
 - C++
 - OOP+
 - VHDL

- a) What is P controller? Explain with mathematical model.
 - b) Write short note on temperature sensors.
 - c) Compare between hydraulic actuation system, pneumatic actuators.
 - d) Explain the working of pressure sensor with suitable example.
 - e) Compare between PI & PD controller
- Q.5 Attempt any two of the following questions. 12**
- a) What is actuators? Explain the working of directional control valves in detail.
 - b) Compare between I to V, V to I converter for floating load and grounded load in detail.
 - c) Explain the advantages, disadvantages of PI, PD & PID controllers.

Fourth Y. (B.Tech.) (Sem-II) (Old) (CBCS) Examination: March/April-2024
ELECTRONICS ENGINEERING
PLC and Industrial Controllers (197047805)

Day & Date: Saturday, 11-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.
 4) Assume data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) The objective of process control is to keep key process operating parameters within narrow bounds of the _____.
 a) Reference value b) Spot
 c) Pith d) Inception point
- 2) The most popular language for PLCs is _____.
 a) Ladder diagram b) C++
 c) OOP+ d) VHDL
- 3) Very often relays and valves are connected to very often relays and valves are connected to _____.
 a) Input modules b) Output modules
 c) Any of these d) None of the above
- 4) PLCs that have a fixed amount of I/O capability built into the unit are known as PLCs that have a fixed amount of I/O capability built into the unit are known as _____.
 a) Rack PLCs b) Monolithic PLCs
 c) Modular PLCs d) None of these
- 5) Voltage to current converter is also called as _____.
 a) Current series positive feedback amplifier
 b) Voltage series negative feedback amplifier
 c) Current series negative feedback amplifier
 d) Voltage series positive feedback amplifier
- 6) Which of the following application uses voltage to current converter?
 a) Low voltage dc and ac voltmeter
 b) Diode match finding
 c) Light emitting diode
 d) All of the mentioned

- 7) Which of the following is not of importance when a conveyor is designed?
- a) Type of industry where the conveyor is being used
 - b) Type of material being carried by the conveyor
 - c) Cost
 - d) Length of travel of the conveyor
- 8) What do you mean by 'Conveyor control'?
- a) Controlling the material flow, according to conveyor speed, to reduce power consumption
 - b) Controlling the conveyor speed, according to material flow, manually
 - c) Controlling the material flow, according to conveyor speed manually or using feedback drives
 - d) Controlling the conveyor speed, according to material flow to, reduce power consumption
- 9) Based on how binary information is entered or shifted out, shift registers are classified into _____ categories.
- a) 2
 - b) 3
 - c) 4
 - d) 5
- 10) The PLC is used in _____.
- a) machine tools
 - b) automated assembly equipment
 - c) moulding and extrusion machines
 - d) all of the above
- 11) Ladder logic programming consists primarily of _____.
- a) virtual relay contacts and coils
 - b) logic gate symbols with connecting lines
 - c) function blocks with connecting lines
 - d) text-based code
 - e) Hieroglyphics
- 12) In PLC programming, a retentive function is one that _____.
- a) defaults to the "on" state
 - b) comes last in the program
 - c) defaults to the "off" state
 - d) is not reset after a power cycle
- 13) The _____ of metals is a function of temperature and increases with increasing temperature.
- a) Coefficient of material
 - b) Resistance
 - c) Conductivity
 - d) Kappa
- 14) Noise reduction techniques should be utilized to avoid interfering voltages that might be otherwise generated in the system.
- a) True
 - b) False

Set S

Fourth Y. (B.Tech.) (Sem-II) (Old) (CBCS) Examination: March/April-2024
ELECTRONICS ENGINEERING
PLC and Industrial Controllers (197047805)

Day & Date: Saturday, 11-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section – I

- Q.2 Attempt any four of the following questions. 16**
- a) Draw and explain the ladder diagrams of basic gates, using two inputs.
 - b) State advantages of PLC's over hard-wired relays.
 - c) Compare between PC and PLC.
 - d) Explain Latching with suitable example.
 - e) Draw and explain delay ON and delay OFF timers in PLC.
- Q.3 Attempt any two of the following questions. 12**
- a) State & explain the shift register with ladder diagram.
 - b) What is Central heating system? Explain in detail.
 - c) Draw and explain applications of internal relay used in PLC.

Section – II

- Q.4 Attempt any four of the following questions. 16**
- a) What is P controller? Explain with mathematical model.
 - b) Write short note on temperature sensors.
 - c) Compare between hydraulic actuation system, pneumatic actuators.
 - d) Explain the working of pressure sensor with suitable example.
 - e) Compare between PI & PD controller
- Q.5 Attempt any two of the following questions. 12**
- a) What is actuators? Explain the working of directional control valves in detail.
 - b) Compare between I to V, V to I converter for floating load and grounded load in detail.
 - c) Explain the advantages, disadvantages of PI, PD & PID controllers.

Fourth Y (B.Tech.) (Sem-II) (Old) (CBCS) Examination: March/April-2024
ELECTRONICS ENGINEERING
Data Analytics (197047806)

Day & Date: Saturday, 11-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.
 4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) Distance functions are highly sensitive to _____.
 a) data distribution b) dimensionality
 c) data type d) all of these
- 2) Two types of collaborative filtering are _____ & _____ based.
 a) person, people b) attribute, class
 c) supervised, unsupervised d) none of these
- 3) Which of below is not an advantage of data integration?
 a) faster query processing b) dependency
 c) complex query processing d) high volume data processing
- 4) Data points that are inconsistent with the remaining data distribution are often _____.
 a) scalable b) noisy
 c) clean d) mean
- 5) Which of below is disadvantage of star schema?
 a) unoptimized b) more joins between the tables
 c) more storage space d) all of these
- 6) A bank loan officer wants to decide a particular customer applying for a loan is risky or safe. Which model he shall use?
 a) decision tree b) Naive Bayes classifier
 c) artificial neural network d) all of these
- 7) The two tiers of data warehouse architectures are _____.
 a) client, DW server b) client, metadata
 c) DW server, metadata d) metadata, DW server

- 8) Interquartile range is the _____ quartile subtracted from the _____ quartile.
- a) second, third
 - b) third, forth
 - c) first, forth
 - d) first, third
- 9) ML is the study of computer algorithms that _____.
- a) improve automatically through experience
 - b) learns from explicit rules
 - c) finds obvious relations in data
 - d) all of these
- 10) If $A = \text{Entropy}(2+, 3-)$ and $B = \text{Entropy}(3-, 2+)$, then _____.
- a) $A = B$
 - b) $A > B$
 - c) $B > A$
 - d) insufficient data
- 11) Take the odd man out: Lp norm, Jaccord index, dynamic time warping, window-based methods
- a) Lp norm
 - b) Jaccord index
 - c) dynamic time warping
 - d) window based methods
- 12) Which of below is a dimension reduction technique?
- a) axis rotation
 - b) PCA
 - c) SVD
 - d) all of these
- 13) Which of below is quantitative data?
- a) pin code
 - b) age
 - c) address
 - d) all of these
- 14) If data set is completely homogeneous, then _____.
- a) all data has same class
 - b) impurity is zero
 - c) entropy is zero
 - d) all of these

P

Fourth Y (B.Tech.) (Sem-II) (Old) (CBCS) Examination: March/April-2024
ELECTRONICS ENGINEERING
Data Analytics (197047806)

Day & Date: Saturday, 11-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
 2) Figures to the right indicate full marks.
 3) Assume suitable data if necessary.

Section – I

Q.2 Solve any two

12

- a) Forecasting gold rates can help investors to decide when to buy (or sell) the commodity. Gold rate depends upon five quantitative features - price of other precious metal, price of crude oil, stock exchange performance, bonds price, and currency exchange rate. Past data of 10,000 records containing five features and gold price is available. Describe a data analytic system which can predict gold rate given the features. Give detailed steps of the system designed.
- b) Data set given: 10, 8, 20, 15, 17. Normalize it to {0 to 1} and {1 to 4} using min-max normalization.
- c) Bank ABC wish to buy machine learning based software to decide whether to grant a business loan to customer or not. Bank already has complete data of past 20,000 records which consists of the features/attributes and correct outcome for each record. Design a scheme to check the performance of the software to be bought based on various performance parameters. Also evaluate the Type I and Type II errors associated.

Q.3 Solve any four.

16

- a) With suitable example compare different types of feature subset selection.
- b) With suitable example compare Euclidean distance and Manhattan distance.
- c) With suitable example show how to calculate Jaccard Index for binary set data.
- d) With two real life examples, describe how data mining is useful for business applications.
- e) With suitable examples compare – structured, semi-structured and unstructured data.

Section – II

Q.4 Solve any two.

12

- a) Given below training data, using linear regression analysis method -
- Predict price of the house with age 28 years
 - Calculate residual error for houses with age 20 years

Age of House (x)	Price of House (\$, 000) (y)
10	350
15	250
20	300
20	240
25	225

- b) With suitable example describe how a Naïve Bayes classifier can be used for prediction of class of a data record.
- c) Compare OLTP and OLAP

Q.5 Solve any four.

16

- Compare supervised learning and unsupervised learning
- What are advantages and disadvantages of K Means Clustering?
- Describe any four data warehouse access tools.
- With suitable example, explain Snowflake schema.
- Compare linear regression and classification with suitable examples.

- e) With suitable examples compare – structured, semi-structured and unstructured data.

Section – II

Q.4 Solve any two.

12

- a) Given below training data, using linear regression analysis method -
- Predict price of the house with age 28 years
 - Calculate residual error for houses with age 20 years

Age of House (x)	Price of House (\$, 000) (y)
10	350
15	250
20	300
20	240
25	225

- b) With suitable example describe how a Naïve Bayes classifier can be used for prediction of class of a data record.
- c) Compare OLTP and OLAP

Q.5 Solve any four.

16

- Compare supervised learning and unsupervised learning
- What are advantages and disadvantages of K Means Clustering?
- Describe any four data warehouse access tools.
- With suitable example, explain Snowflake schema.
- Compare linear regression and classification with suitable examples.

Fourth Y. (B.Tech.) (Sem-II) (Old) (CBCS) Examination: March/April-2024
ELECTRONICS ENGINEERING
Computer Architecture (197047809)

Day & Date: Monday, 13-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.
 4) Assume data wherever necessary

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) Computer organization deals with _____.
 - a) The sizes of data types that are supported.
 - b) The sizes of data types and the types of operations that are supported
 - c) The types of operations
 - d) Interfaces to peripheral devices
- 2) In I/O mapped I/O _____.
 - a) The I/O devices and the memory share the same address space
 - b) The I/O devices have a separate address space
 - c) The memory and I/O devices have an associated address space
 - d) A part of the memory is specifically set aside for the I/O operation
- 3) In IEEE 32-bit representations, the mantissa of the fraction is said to occupy _____ bits.

a) 24	b) 23
c) 20	d) 16
- 4) The 32 bit representation of the decimal number is called as _____.

a) Double-precision	b) Single-precision
c) Extended format	d) None of the mentioned
- 5) The method of synchronising the processor with the I/O device in which the device sends a signal when it is ready is?

a) Exceptions	b) Signal handling
c) Interrupts	d) DMA
- 6) Overflow may occur while adding _____.
 - a) When two numbers are added that have large magnitudes and the same sign
 - b) When two numbers are added that have small magnitudes and the same sign
 - c) When two numbers are added that have large magnitudes and the different sign
 - d) When two numbers are added that have small magnitudes and the different sign

Fourth Y. (B.Tech.) (Sem-II) (Old) (CBCS) Examination: March/April-2024
ELECTRONICS ENGINEERING
Computer Architecture (197047809)

Day & Date: Monday, 13-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

Instructions: 1) All questions are compulsory.
 2) Figures to the right indicate full marks.

Section – I

- Q.2 Attempt any four.** **16**
- a) Draw and describe the working of system bus model of a computer system.
 - b) Explain floating point number representation in detail.
 - c) Explain normalized scientific notation with suitable example.
 - d) Explain different addressing modes in ARC RISC processor.
 - e) Explain memory hierarchy in a computer system.
- Q.3 Attempt any two.** **12**
- a) Represent $(107.15)_{10}$ in a floating point representation with a sign bit, a 8-bit exponent, and 23 bits mantissa in a normalized notation in base 2.
 - b) Draw and explain a serial multiplier for 4 bit multiplication.
 - c) Write the ARC processor assembly program with meaning of each instruction for addition of two eight bit numbers

Section – II

- Q.4 Attempt any four.** **16**
- a) Explain the processor performance equation.
 - b) Explain overcoming data hazards with dynamic scheduling.
 - c) Explain challenges of parallel processing.
 - d) Explain multiprocessor cache coherence.
 - e) Explain basic compiler techniques for exposing instruction level parallelism.
- Q.5 Attempt any two.** **12**
- a) Explain five implementation techniques which change at a dramatic pace.
 - b) What is instruction level parallelism? Explain data hazards.
 - c) Explain the impact of time, volume, commoditization on a cost of computing system.

 - 3) Figures to the right indicates full marks.
 - 4) Assume data wherever necessary

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) A type of parallelism that uses micro architectural techniques.

a) instructional	b) bit level
c) bit based	d) increasing
- 2) MIPS stands for?

a) Mandatory Instructions/sec	b) Millions of Instructions/sec
c) Most of Instructions/sec	d) Many Instructions / sec
- 3) Several instructions execution simultaneously in _____.

a) processing	b) multitasking
c) serial processing	d) parallel processing
- 4) The main objective in building the multi-microprocessor is _____.

a) greater throughput	b) enhanced fault tolerance
c) greater throughput and enhanced fault tolerance	d) none of the mentioned
- 5) An interface between the user or an application program, and the system resources are _____.

a) microprocessor	b) microcontroller
c) multi-microprocessor	d) operating system
- 6) An operating system provides _____.

a) hardware and software resource management	b) input/output management
c) memory management	d) all of the mentioned
- 7) Computer architecture deals with _____.

a) The sizes of data types that are supported.	b) The sizes of data types and the types of operations that are supported
c) The types of operations	d) Interfaces to peripheral devices

- 8) Computer organization deals with _____
- a) The sizes of data types that are supported.
 - b) The sizes of data types and the types of operations that are supported
 - c) The types of operations
 - d) Interfaces to peripheral devices
- 9) In I/O mapped I/O _____.

 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) What is Artificial Intelligence?
 - a) Artificial Intelligence is a field that aims to make humans more intelligent
 - b) Artificial Intelligence is a field that aims to improve the security
 - c) Artificial Intelligence is a field that aims to develop intelligent machines
 - d) Artificial Intelligence is a field that aims to mine the data
- 2) Who is the inventor of Artificial Intelligence?
 - a) Geoffrey Hinton
 - b) Andrew Ng
 - c) John McCarthy
 - d) Jurgen Schmidhuber
- 3) Which of the following is not the commonly used programming language for Artificial Intelligence?
 - a) Perl
 - b) Java
 - c) PROLOG
 - d) LISP
- 4) What does the Bayesian network provide?
 - a) Partial description of the domain
 - b) Complete description of the problem
 - c) Complete description of the domain
 - d) None of the mentioned
- 5) The component of an Expert system is _____.
 - a) Knowledge Base
 - b) Inference Engine
 - c) User Interface
 - d) All of the above
- 6) Among the given options, which is not the required property of Knowledge representation?
 - a) Inferential Efficiency
 - b) Inferential Adequacy
 - c) Representational Verification
 - d) Representational Adequacy
- 7) First order logic Statements contains _____.
 - a) Predicate and Preposition
 - b) Subject and an Object
 - c) Predicate and Subject
 - d) None of the above

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

- Q.2 Solve any four questions. 16**
- a) Define Artificial Intelligence & List applications of AI & explain with detail?
 - b) Which are the types of intelligent agents? Explain goal-based agent with neat diagram.
 - c) Explain A* algorithm in detail.
 - d) What are the different issues in knowledge representation?
 - e) Describe the frame representation techniques of KR with example.
- Q.3 Solve any two questions. 12**
- a) Write the note on first order logic. Explain with the example.
 - b) Explain state space approach for solving any AI Problem with example.
 - c) Elaborate and explain the approaches & goals of Artificial Intelligence.

Section – II

- Q.4 Solve any four questions. 16**
- a) Explain the probability & Bayes theorem along with example.
 - b) Write a case study on the past, present and future of AI.
 - c) Write a note on utility theory.
 - d) Elaborate Q-Learning explain with example.
 - e) Write a note on statistical learning.
- Q.6 Solve any two questions. 12**
- a) Differentiate between supervised learning and unsupervised learning.
 - b) What is the Bayesian network? Explain with examples.
 - c) Explain constraint satisfaction problem in detail with one example.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) Which of the given element improve the performance of AI agent so that it can make better decisions?
 - a) Changing Element
 - b) Performance Element
 - c) Learning Element
 - d) None of the above
- 2) Wumpus World is a classic problem, best example of _____.
 - a) Single player Game
 - b) Two player Game
 - c) Reasoning with Knowledge
 - d) Knowledge based Game
- 3) _____ is/are the well-known Expert System/s for medical diagnosis systems.
 - a) MYSIN
 - b) CADUCEUS
 - c) DENDRAL
 - d) SMH.PAL
- 4) Which algorithm is used in the Game tree to make decisions of Win/Lose?
 - a) Heuristic Search Algorithm
 - b) DFS/BFS algorithm
 - c) Greedy Search Algorithm
 - d) Min/Max algorithm
- 5) Which of the following is the practical example of reinforcement learning?
 - a) House pricing prediction
 - b) Market basket analysis
 - c) Text classification
 - d) Driverless cars
- 6) If we have variables $x_1, x_2, x_3, \dots, x_n$, then the probabilities of a different combination of x_1, x_2, x_3 , are known as?
 - a) Table of conditional probabilities
 - b) Causal Component
 - c) Actual numbers
 - d) Joint probability distribution
- 7) Natural language processing has two subfields, namely: _____.
 - a) algorithmic and heuristic
 - b) time and motion
 - c) understanding and generation
 - d) symbolic and numeric
- 8) What is Artificial Intelligence?
 - a) Artificial Intelligence is a field that aims to make humans more intelligent

 - d) symbolic and numeric
- 5) What is Artificial Intelligence?
 - a) Artificial Intelligence is a field that aims to make humans more intelligent
 - b) Artificial Intelligence is a field that aims to improve the security
 - c) Artificial Intelligence is a field that aims to develop intelligent machines
 - d) Artificial Intelligence is a field that aims to mine the data
- 6) Who is the inventor of Artificial Intelligence?
 - a) Geoffrey Hinton
 - b) Andrew Ng
 - c) John McCarthy
 - d) Jurgen Schmidhuber
- 7) Which of the following is not the commonly used programming language for Artificial Intelligence?
 - a) Perl
 - b) Java
 - c) PROLOG
 - d) LISP

- 8) What does the Bayesian network provide?
a) Partial description of the domain
b) Complete description of the problem
c) Complete description of the domain
d) None of the mentioned
- 9) The component of an Expert system is _____.
a) Knowledge Base b) Inference Engine
c) User Interface d) All of the above
- 10) Among the given options, which is not the required property of Knowledge representation?
a) Inferential Efficiency b) Inferential Adequacy
c) Representational Verification d) Representational Adequacy
- 11) First order logic Statements contains _____.
a) Predicate and Preposition b) Subject and an Object
c) Predicate and Subject d) None of the above
- 12) Which of the given element improve the performance of AI agent so that it can make better decisions?
a) Changing Element b) Performance Element
c) Learning Element d) None of the above
- 13) Wumpus World is a classic problem, best example of _____.
a) Single player Game b) Two player Game
c) Reasoning with Knowledge d) Knowledge based Game
- 14) _____ is/are the well-known Expert System/s for medical diagnosis systems.
a) MYSIN b) CADUCEUS
c) DENDRAL d) SMH.PAL

T.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
COMPUTER SCIENCE AND ENGINEERING
Artificial Intelligence (BTN03501)

Day & Date: Monday, 13-05-2024
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

Instructions: 1) All questions are compulsory.
 2) Figures to the right indicate full marks.

Section – I

- Q.2 Solve any four questions. 16**
- a) Define Artificial Intelligence & List applications of AI & explain with detail?
 - b) Which are the types of intelligent agents? Explain goal-based agent with neat diagram.
 - c) Explain A* algorithm in detail.
 - d) What are the different issues in knowledge representation?
 - e) Describe the frame representation techniques of KR with example.
- Q.3 Solve any two questions. 12**
- a) Write the note on first order logic. Explain with the example.
 - b) Explain state space approach for solving any AI Problem with example.
 - c) Elaborate and explain the approaches & goals of Artificial Intelligence.

Section – II

- Q.4 Solve any four questions. 16**
- a) Explain the probability & Bayes theorem along with example.
 - b) Write a case study on the past, present and future of AI.
 - c) Write a note on utility theory.
 - d) Elaborate Q-Learning explain with example.
 - e) Write a note on statistical learning.
- Q.6 Solve any two questions. 12**
- a) Differentiate between supervised learning and unsupervised learning.
 - b) What is the Bayesian network? Explain with examples.
 - c) Explain constraint satisfaction problem in detail with one example.

Set **S**

T.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
COMPUTER SCIENCE AND ENGINEERING
Artificial Intelligence (BTN03501)

Day & Date: Monday, 13-05-2024
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) Among the given options, which is not the required property of Knowledge representation?
 - a) Inferential Efficiency
 - b) Inferential Adequacy
 - c) Representational Verification
 - d) Representational Adequacy
- 2) First order logic Statements contains _____.
 - a) Predicate and Preposition
 - b) Subject and an Object
 - c) Predicate and Subject
 - d) None of the above
- 3) Which of the given element improve the performance of AI agent so that it can make better decisions?
 - a) Changing Element
 - b) Performance Element
 - c) Learning Element
 - d) None of the above
- 4) Wumpus World is a classic problem, best example of _____.
 - a) Single player Game
 - b) Two player Game
 - c) Reasoning with Knowledge
 - d) Knowledge based Game
- 5) _____ is/are the well-known Expert System/s for medical diagnosis systems.
 - a) MYSIN
 - b) CADUCEUS
 - c) DENDRAL
 - d) SMH.PAL
- 6) Which algorithm is used in the Game tree to make decisions of Win/Lose?
 - a) Heuristic Search Algorithm
 - b) DFS/BFS algorithm
 - c) Greedy Search Algorithm
 - d) Min/Max algorithm
- 7) Which of the following is the practical example of reinforcement learning?
 - a) House pricing prediction
 - b) Market basket analysis
 - c) Text classification
 - d) Driverless cars
- 8) If we have variables $x_1, x_2, x_3, \dots, x_n$, then the probabilities of a different combination of x_1, x_2, x_3 , are known as?
 - a) Table of conditional probabilities
 - b) Causal Component
 - c) Actual numbers
 - d) Joint probability distribution

- 9) Natural language processing has two subfields, namely: _____.
- a) algorithmic and heuristic
 - b) time and motion
 - c) understanding and generation
 - d) symbolic and numeric
- 10) What is Artificial Intelligence?
- a) Artificial Intelligence is a field that aims to make humans more intelligent
 - b) Artificial Intelligence is a field that aims to improve the security
 - c) Artificial Intelligence is a field that aims to develop intelligent machines
 - d) Artificial Intelligence is a field that aims to mine the data
- 11) Who is the inventor of Artificial Intelligence?
- a) Geoffrey Hinton
 - b) Andrew Ng
 - c) John McCarthy
 - d) Jurgen Schmidhuber
- 12) Which of the following is not the commonly used programming language for Artificial Intelligence?
- a) Perl
 - b) Java
 - c) PROLOG
 - d) LISP
- 13) What does the Bayesian network provide?
- a) Partial description of the domain
 - b) Complete description of the problem
 - c) Complete description of the domain

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03. Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the given options.

14

- 1) What is an operating system?
 - a) Interface between the hardware and application programs
 - b) Collection of programs that manages hardware resources
 - c) System service provider to the application programs
 - d) All of the mentioned

- 2) _____ Scheduler controls the degree of multi-programming.
 - a) Medium term scheduler
 - b) Long term scheduler
 - c) Short term scheduler
 - d) None of these

- 3) Process can be described as _____ if spends more time doing I/O than computations.
 - a) CPU-Bound process
 - b) I/O- bound Process
 - c) Cooperating process
 - d) None of these

- 4) In multilevel feedback queue scheduling algorithm: _____.
 - a) a process can move to a different classified ready queue
 - b) classification of ready queue is permanent
 - c) processes are not classified into groups
 - d) none of the mentioned

- 5) FCFS algorithm is non-preemptive in nature, that is, once CPU time has been allocated to a process, other processes can get CPU time only after the current process has finished. This property of FCFS scheduling leads to the situation called _____.
 - a) Convoy Effect
 - b) Common Effect
 - c) Belady's Effect
 - d) Aging Effect

- 6) A process can be _____.
 - a) Single threaded
 - b) Multi-threaded
 - c) Both single and multi-threaded
 - d) None of these

- 7) The processes that are residing in main memory and are ready and waiting to execute are kept on a list called _____.
 - a) Job Queue
 - b) Ready Queue
 - c) Execution Queue
 - d) Process queue

- 8) If all processes I/O bound, the ready queue will almost always be _____ and the short term Scheduler will have a _____ to do.
- a) full, little
 - b) full, lot
 - c) empty, little
 - d) empty, lot
- 9) The segment of code in which the process may change common variables, update tables, write into files is known as: _____
- a) Entry Section
 - b) Remainder Section
 - c) Exit section
 - d) Critical section
- 10) The _____ algorithm selects the request with the least seek time from the current head position.
- a) FCFS Disk Scheduling
 - b) SSTF Disk Scheduling
 - c) SCAN Scheduling
 - d) C-SCAN Scheduling
- 11) What is/are the requirement/s for the solution to critical section problem?
- a) Mutual Exclusion
 - b) Progress
 - c) Bounded Waiting
 - d) All of the above
- 12) The wait-for graph is a deadlock detection algorithm that is applicable when ____.
- a) all resources have a single instance
 - b) all resources have multiple instances
 - c) no resources available in the system
 - d) both a and b
- 13) Thrashing _____.
- a) is a natural consequence of virtual memory systems
 - b) can always be avoided by swapping
 - c) always occurs on large computers
 - d) is a high paging activity
- 14) The _____ is the time for the disk arm to move the heads to the cylinder containing the desired sector.
- a) Seek Time
 - b) Rotational Latency
 - c) Bandwidth
 - d) None of these

 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

Instructions: 1) All Questions are compulsory.
 2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any three. **12**

- a) Explain Scheduling criteria in detail.
- b) What are the different states of processes during its lifetime, explain in detail with diagram.
- c) Write a note on Semaphore.
- d) What is thread? Why it is called as lightweight process? Differentiate User thread and Kernel Thread.

Q.3 Answer any one.

- a) Consider, Processes along with their Burst Time and Arrival Time. Calculate Average Waiting Time, Average Turn Around Time, using Priority Scheduling Algorithm (Non- Preemptive). All processes arrived at time 0ms. **08**
 Low Number Indicates High Priority

Process	Burst Time	Priority
P1	10	1
P2	5	0
P3	6	2
P4	3	4
P5	2	3

- i) Draw Gantt Chart
 - ii) Calculate Average waiting Time
 - iii) Calculate Average Turnaround Time
 - iv) Also find number of context switches.
- b) How synchronization can be achieved for Reader-Writer problem using semaphore. Write structure of Reader and Writer process.

Q.4 Explain different types of schedulers in detail. Draw queuing diagram and state different types of queues used by processes during execution. How different scheduler selects processes from these queues for execution. **08**

Section – II

Q.5 Solve any Three.

12

- a) What are the four necessary conditions for deadlock to occur in the system.
- b) Explain importance of virtual memory with example.
- c) Consider the following segment table

Segment	Base	Length	Logical Address
0	219	600	0430
1	2300	14	110
2	90	100	2500
3	1327	580	3400

What are the physical addresses for the given logical addresses?

- d) Write a note on SCAN Disk Scheduling.

Q.6 Answer Any one

08

- a) Consider the following page reference string
7, 0, 1, 2, 0, 3, 0, 4, 2, 3, 0, 3, 2, 1, 2, 0, 1, 7, 0, 1
How many page fault would occur for the following page replacement algorithm?

- a) LRU
- b) FIFO
- c) Optimal

Consider number of frames = 3. Which algorithm gives minimum page fault?

- b) Consider the following snapshot of a system.

Process	Allocation			Max			Available		
	A	B	C	A	B	C	A	B	C
P0	0	1	0	7	5	3	3	3	2
P1	2	0	0	3	2	2			
P2	3	0	2	9	0	2			
P3	2	1	1	2	2	2			
P4	0	0	2	4	3	3			

Answer the following questions using Bankers algorithm:

- 1) What is the content of *Need* Matrix?
- 2) Is the system in safe state?
- 3) If request from process P1 arrives for (1,0,2) can the request be granted immediately?

Q.7 What is Page fault? What are the steps performed by Operating system to handle the page fault?

What are the physical addresses for the given logical addresses?

- d) Write a note on SCAN Disk Scheduling.

Q.6 Answer Any one

08

- a) Consider the following page reference string
 7, 0, 1, 2, 0, 3, 0, 4, 2, 3, 0, 3, 2, 1, 2, 0, 1, 7, 0, 1
 How many page fault would occur for the following page replacement algorithm?

- a) LRU
 b) FIFO
 c) Optimal

Consider number of frames = 3. Which algorithm gives minimum page fault?

- b) Consider the following snapshot of a system.

Process	Allocation			Max			Available		
	A	B	C	A	B	C	A	B	C
P0	0	1	0	7	5	3	3	3	2
P1	2	0	0	3	2	2			
P2	3	0	2	9	0	2			
P3	2	1	1	2	2	2			
P4	0	0	2	4	3	3			

Answer the following questions using Bankers algorithm:

- 1) What is the content of *Need* Matrix?
- 2) Is the system in safe state?
- 3) If request from process P1 arrives for (1,0,2) can the request be granted immediately?

Q.7 What is Page fault? What are the steps performed by Operating system to handle the page fault?

08

- 8) Thrashing _____.
- a) is a natural consequence of virtual memory systems
 - b) can always be avoided by swapping
 - c) always occurs on large computers
 - d) is a high paging activity
- 9) The _____ is the time for the disk arm to move the heads to the cylinder containing the desired sector.
- a) Seek Time
 - b) Rotational Latency
 - c) Bandwidth
 - d) None of these
- 10) What is an operating system?
- a) Interface between the hardware and application programs
 - b) Collection of programs that manages hardware resources
 - c) System service provider to the application programs
 - d) All of the mentioned
- 11) _____ Scheduler controls the degree of multi-programming.
- a) Medium term scheduler
 - b) Long term scheduler
 - c) Short term scheduler
 - d) None of these
- 12) Process can be described as _____ if spends more time doing I/O than computations.
- a) CPU-Bound process
 - b) I/O- bound Process
 - c) Cooperating process
 - d) None of these
- 13) In multilevel feedback queue scheduling algorithm: _____.
- a) a process can move to a different classified ready queue
 - b) classification of ready queue is permanent
 - c) processes are not classified into groups
 - d) none of the mentioned
- 14) FCFS algorithm is non-preemptive in nature, that is, once CPU time has been allocated to a process, other processes can get CPU time only after the current process has finished. This property of FCFS scheduling leads to the situation called _____.
- a) Convoy Effect
 - b) Common Effect
 - c) Belady's Effect
 - d) Aging Effect

Seat
No.Set **S**

T.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
COMPUTER SCIENCE & ENGINEERING
Operating Systems (BTN03502)

Day & Date: Tuesday, 14-05-2024
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

Instructions: 1) All Questions are compulsory.
 2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any three. **12**

- a) Explain Scheduling criteria in detail.
- b) What are the different states of processes during its lifetime, explain in detail with diagram.
- c) Write a note on Semaphore.
- d) What is thread? Why it is called as lightweight process? Differentiate User thread and Kernel Thread.

Q.3 Answer any one.

- a) Consider, Processes along with their Burst Time and Arrival Time. Calculate Average Waiting Time, Average Turn Around Time, using Priority Scheduling Algorithm (Non- Preemptive). All processes arrived at time 0ms. **08**
 Low Number Indicates High Priority

Process	Burst Time	Priority
P1	10	1
P2	5	0
P3	6	2
P4	3	4
P5	2	3

- i) Draw Gantt Chart
 - ii) Calculate Average waiting Time
 - iii) Calculate Average Turnaround Time
 - iv) Also find number of context switches.
- b) How synchronization can be achieved for Reader-Writer problem using semaphore. Write structure of Reader and Writer process.

Q.4 Explain different types of schedulers in detail. Draw queuing diagram and state different types of queues used by processes during execution. How different scheduler selects processes from these queues for execution. **08**

Section – II

12

Q.5 Solve any Three.

- a) What are the four necessary conditions for deadlock to occur in the system.
- b) Explain importance of virtual memory with example.
- c) Consider the following segment table

Segment	Base	Length	Logical Address
0	219	600	0430
1	2300	14	110
2	90	100	2500
3	1327	580	3400

What are the physical addresses for the given logical addresses?

- d) Write a note on SCAN Disk Scheduling.

Q.6 Answer Any one

08

- a) Consider the following page reference string
7, 0, 1, 2, 0, 3, 0, 4, 2, 3, 0, 3, 2, 1, 2, 0, 1, 7, 0, 1
How many page fault would occur for the following page replacement algorithm?

- a) LRU
- b) FIFO
- c) Optimal

Consider number of frames = 3. Which algorithm gives minimum page fault?

- b) Consider the following snapshot of a system.

Process	Allocation			Max			Available		
	A	B	C	A	B	C	A	B	C
P0	0	1	0	7	5	3	3	3	2
P1	2	0	0	3	2	2			
P2	3	0	2	9	0	2			
P3	2	1	1	2	2	2			
P4	0	0	2	4	3	3			

Answer the following questions using Bankers algorithm:

- 1) What is the content of *Need* Matrix?
- 2) Is the system in safe state?
- 3) If request from process P1 arrives for (1,0,2) can the request be granted immediately?

Q.7 What is Page fault? What are the steps performed by Operating system to handle the page fault?

08

- 9) Consider two statements for two-phase locking protocol
S1 : In growing phase a transaction may obtain locks
S2 : In growing phase a transaction may not release any lock
- a) Both S1 and S2 are true b) Only S1 is true
c) Only S2 is true d) Both S1 and S2 are false
- 10) Which of the log is not in transaction state?
- a) Start b) Write
c) Rollback d) Commit
- 11) Check-points are used for _____.
- a) transaction recovery
b) transaction concurrency control
c) designing serializable schedule
d) designing optimized query
- 12) For the B+ tree, following is true _____
- a) Each non-leaf node has between $\lceil n/2 \rceil$ to n^2 children
b) Each non-leaf node has between $\lceil n/2 \rceil$ to $\lceil n/4 \rceil$ children
c) Each non-leaf node has between $\lceil n/2 \rceil$ to children
d) Each non-leaf node has same number of children
- 13) Which of the following scenarios lead to a non-recoverable schedule?
- a) A transaction writes a data item after it is read by an uncommitted transaction
b) A transaction reads a data item after it is read by an uncommitted transaction
c) A transaction reads a data item after it is written by a committed transaction
d) A transaction reads a data item after it is written by an uncommitted transaction
- 14) In a two-phase locking protocol, a transaction _____ downgrade a write lock to a read lock,
- a) cannot, in the growing phase only
b) can, under all circumstances
c) can, in the shrinking phase only
d) cannot, under any circumstances

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

- Q.2 Attempt any three. 12**
- a) What are the functions of Database Administrator?
 - b) Write a short note on Nested subqueries with example.
 - c) Give the comparison of BCNF and 3NF, which one is desirable and why?
 - d) Explain different Aggregate operations in SQL.
 - e) Explain different string operations in SQL with example.
- Q.3 Attempt any two. 16**
- a) Explain Extended Relational Algebra operation.
 - b) What is the concept of canonical cover? How to compute it? Give, example.
 - c) What is key? Explain Different Keys in relational model.

Section – II

- Q.4 Attempt any three 12**
- a) Write a short note on Bitmap indices.
 - b) Explain in detail the concept of Conflict serializability with example.
 - c) Explain the concept of recoverability with recoverable schedule.
 - d) Explain validation based protocol with example.
 - e) Write a short note on Buffer management in Recovery system.
- Q.5 Attempt any two. 16**
- a) Explain the distinction between closed and open hashing. Discuss merits of both techniques in database applications.
 - b) Explain in detail B⁺ tree file organization with an example.
 - c) Explain deferred database modifications and Immediate database modifications with example.

a) 0
b) 1
c) 2
d) 3
- 9) Which of the problems cannot be solved by backtracking method?
a) n-queen problem
b) subset sum problem
c) Hamiltonian circuit problem
d) travelling salesman problem
- 10) Backtracking algorithm is implemented by constructing a tree of choices called as _____.
a) State-space tree
b) State-chart tree
c) Node tree
d) Backtracking tree
- 11) The problem of placing n queens in a chessboard such that no two queens attack each other is called as _____.
a) n-queen problem
b) eight queens puzzle
c) four queens puzzle
d) 1-queen problem
- 12) Problems that can be solved in polynomial time are known as _____.
a) Intractable
b) Tractable
c) Decision
d) Complete
- 13) Halting problem is an example for _____.
a) decidable problem
b) undecidable problem
c) complete problem
d) trackable problem
- 14) Which of the following is/are property/properties of a dynamic programming problem?
a) Evolutionary Approach
b) Require More Time
c) Optimal Substructure & Overlapping Subproblems
d) Greedy Approach

Design and Analysis of Algorithm (BTN03504)

Day & Date: Thursday, 16-05-2024
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

Instructions: 1) All questions are compulsory.
 2) Figures to the right indicate full marks.

Section – I**Q.2 Attempt any Three: 12**

- Define algorithm, State different criteria for algorithms.
- Write a short note on binary search and explain recursive binary search algorithm.
- Sort the following sequence using merge sort
38, 27, 43, 3, 9, 82, 10, 15, 21, 7
- Write a control abstraction for subset paradigm using greedy method.

Q.3 Attempt any One: 08

- Explain time and space complexity of an algorithm with examples in detail.
- Find optimal merge pattern for the file of length:
28, 32, 12, 5, 84, 53, 91, 35, 3, 11

Q.4 Explain Knapsack problem with following example. Find an optimal solution to the, knapsack problem with 08

$N=3, m=20, (p_1, p_2, p_3) = (25, 24, 15) (w_1, w_2, w_3) = (18, 15, 10)$

Section – II**Q.5 Attempt any Three: 12**

- Explain Hamilton cycle with example.
- Differentiate between tractable and intractable problem.
- Explain halting problem.
- Generate the set $S_i, 0 \leq i \leq 3$, for following knapsack instance with $n = 3, (p_1, p_2, p_3) = (1, 2, 5)$ and $(w_1, w_2, w_3) = (2, 3, 4)$ and $m = 6$. Find optimal solution using dynamic programming.

Q.6 Attempt any One: 08

- Find minimum cost path from s to t multistage graph using forward approach.

- Write note on:
 - Graph Coloring
 - P, NP, NP-Complete

Q.7 Find all pair shortest path using Dynamic programming.

 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.
 4) Assume data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) The traveling salesman problem involves visiting each city how many times?

a) 0	b) 1
c) 2	d) 3
- 2) Which of the problems cannot be solved by backtracking method?

a) n-queen problem	b) subset sum problem
c) Hamiltonian circuit problem	d) travelling salesman problem
- 3) Backtracking algorithm is implemented by constructing a tree of choices called as _____.

a) State-space tree	b) State-chart tree
c) Node tree	d) Backtracking tree
- 4) The problem of placing n queens in a chessboard such that no two queens attack each other is called as _____.

a) n-queen problem	b) eight queens puzzle
c) four queens puzzle	d) 1-queen problem
- 5) Problems that can be solved in polynomial time are known as _____.

a) Intractable	b) Tractable
c) Decision	d) Complete
- 6) Halting problem is an example for _____.

a) decidable problem	b) undecidable problem
c) complete problem	d) trackable problem
- 7) Which of the following is/are property/properties of a dynamic programming problem?
 - a) Evolutionary Approach
 - b) Require More Time
 - c) Optimal Substructure & Overlapping Subproblems
 - d) Greedy Approach
- 8) If for an algorithm time complexity is given by $O(1)$ then complexity of it is _____.

a) Constant	b) Polynomial
c) Exponential	d) None of the mentioned

- 9) An algorithm is _____.
- a) A piece of code to be execute
 - b) A loosely written code to make final code
 - c) A step by step procedure to solve problem
 - d) All of the above
- 10) An algorithm that calls itself directly or indirectly is known as _____.
- a) Sub algorithm
 - b) Recursion
 - c) Polish notation
 - d) Traversal algorithm
- 11) The complexity of Binary search algorithm is _____.
- a) $O(n)$
 - b) $O(\log n)$
 - c) $O(n^2)$
 - d) $O(\log n^2)$
- 12) Dijkstra's Algorithm cannot be applied on _____.
- a) Directed and weighted graphs
 - b) Graphs having negative weight function
 - c) Unweighted graphs
 - d) Undirected and unweighted graphs
- 13) You are given a knapsack that can carry a maximum weight of 60. There are 4 items with weights {20, 30, 40, 70} and values {70, 80, 90, 200}. What is the maximum value of the items you can carry using the 0/1 knapsack?
- a) 160
 - b) 200
 - c) 170
 - d) 90
- 14) Floyd Warshall's Algorithm is used for solving _____.
- a) All pair shortest path problems
 - b) Single Source shortest path problems
 - c) Network flow problems
 - d) Sorting problems

Time: 10:00 AM To 01:00 PM

Max. Marks: 56

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any Three: **12**

- a) Define algorithm, State different criteria for algorithms.
- b) Write a short note on binary search and explain recursive binary search algorithm.
- c) Sort the following sequence using merge sort
38, 27, 43, 3, 9, 82, 10, 15, 21, 7
- d) Write a control abstraction for subset paradigm using greedy method.

Q.3 Attempt any One: **08**

- a) Explain time and space complexity of an algorithm with examples in detail.
- b) Find optimal merge pattern for the file of length:
28, 32, 12, 5, 84, 53, 91, 35, 3, 11

Q.4 Explain Knapsack problem with following example. Find an optimal solution to the, knapsack problem with
N=3, m=20, (p₁, p₂, p₃) = (25, 24, 15) (w₁, w₂, w₃) = (18, 15, 10)

Section – II

Q.5 Attempt any Three: **12**

- a) Explain Hamilton cycle with example.
- b) Differentiate between tractable and intractable problem.
- c) Explain halting problem.
- d) Generate the set S_i, 0 ≤ i ≤ 3, for following knapsack instance with
n = 3, (p₁, p₂, p₃) = (1, 2, 5) and (w₁, w₂, w₃) = (2, 3, 4) and m = 6.
Find optimal solution using dynamic programming.

Q.6 Attempt any One: **08**

- a) Find minimum cost path from s to t multistage graph using forward approach.

- b) Write note on:
 - i) Graph Coloring
 - ii) P, NP, NP-Complete

Q.7 Find all pair shortest path using Dynamic programming.

- 8) The complexity of Binary search algorithm is _____.
- a) $O(n)$
 - b) $O(\log n)$
 - c) $O(n^2)$
 - d) $O(\log n^2)$
- 9) Dijkstra's Algorithm cannot be applied on _____.
- a) Directed and weighted graphs
 - b) Graphs having negative weight function
 - c) Unweighted graphs
 - d) Undirected and unweighted graphs
- 10) You are given a knapsack that can carry a maximum weight of 60. There are 4 items with weights {20, 30, 40, 70} and values {70, 80, 90, 200}. What is the maximum value of the items you can carry using the 0/1 knapsack?
- a) 160
 - b) 200
 - c) 170
 - d) 90
- 11) Floyd Warshall's Algorithm is used for solving _____.
- a) All pair shortest path problems
 - b) Single Source shortest path problems
 - c) Network flow problems
 - d) Sorting problems
- 12) The traveling salesman problem involves visiting each city how many times?
- a) 0
 - b) 1
 - c) 2
 - d) 3
- 13) Which of the problems cannot be solved by backtracking method?
- a) n-queen problem
 - b) subset sum problem
 - c) Hamiltonian circuit problem
 - d) travelling salesman problem
- 14) Backtracking algorithm is implemented by constructing a tree of choices called as _____.
- a) State-space tree
 - b) State-chart tree
 - c) Node tree
 - d) Backtracking tree

Seat
No.

T.Y. (B Tech) (Sem - I) (New) (CBCS) Examination: March/April-2024
COMPUTER SCIENCE & ENGINEERING
Design and Analysis of Algorithm (BTN03504)

Day & Date: Thursday, 16-05-2024
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

Instructions: 1) All questions are compulsory.
 2) Figures to the right indicate full marks.

Section – I**Q.2 Attempt any Three: 12**

- Define algorithm, State different criteria for algorithms.
- Write a short note on binary search and explain recursive binary search algorithm.
- Sort the following sequence using merge sort
38, 27, 43, 3, 9, 82, 10, 15, 21, 7
- Write a control abstraction for subset paradigm using greedy method.

Q.3 Attempt any One: 08

- Explain time and space complexity of an algorithm with examples in detail.
- Find optimal merge pattern for the file of length:
28, 32, 12, 5, 84, 53, 91, 35, 3, 11

Q.4 Explain Knapsack problem with following example. Find an optimal solution to the, knapsack problem with 08

$N=3, m=20, (p_1, p_2, p_3) = (25, 24, 15) (w_1, w_2, w_3) = (18, 15, 10)$

Section – II**Q.5 Attempt any Three: 12**

- Explain Hamilton cycle with example.
- Differentiate between tractable and intractable problem.
- Explain halting problem.
- Generate the set $S_i, 0 \leq i \leq 3$, for following knapsack instance with $n = 3, (p_1, p_2, p_3) = (1, 2, 5)$ and $(w_1, w_2, w_3) = (2, 3, 4)$ and $m = 6$. Find optimal solution using dynamic programming.

Q.6 Attempt any One: 08

- Find minimum cost path from s to t multistage graph using forward approach.

- Write note on:
 - Graph Coloring
 - P, NP, NP-Complete

Q.7 Find all pair shortest path using Dynamic programming.

T.Y. (B Tech) (Sem - I) (New) (CBCS) Examination: March/April-2024
COMPUTER SCIENCE & ENGINEERING
Design and Analysis of Algorithm (BTN03504)

Day & Date: Thursday, 16-05-2024
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.
 4) Assume data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) You are given a knapsack that can carry a maximum weight of 60. There are 4 items with weights {20, 30, 40, 70} and values {70, 80, 90, 200}. What is the maximum value of the items you can carry using the 0/1 knapsack?

a) 160	b) 200
c) 170	d) 90
- 2) Floyd Warshall's Algorithm is used for solving _____.
 - a) All pair shortest path problems
 - b) Single Source shortest path problems
 - c) Network flow problems
 - d) Sorting problems
- 3) The traveling salesman problem involves visiting each city how many times?

a) 0	b) 1
c) 2	d) 3
- 4) Which of the problems cannot be solved by backtracking method?

a) n-queen problem	b) subset sum problem
c) Hamiltonian circuit problem	d) travelling salesman problem
- 5) Backtracking algorithm is implemented by constructing a tree of choices called as _____.

a) State-space tree	b) State-chart tree
c) Node tree	d) Backtracking tree
- 6) The problem of placing n queens in a chessboard such that no two queens attack each other is called as _____.

a) n-queen problem	b) eight queens puzzle
c) four queens puzzle	d) 1-queen problem
- 7) Problems that can be solved in polynomial time are known as _____.

a) Intractable	b) Tractable
c) Decision	d) Complete

- 8) Halting problem is an example for _____.
a) decidable problem b) undecidable problem
c) complete problem d) trackable problem
- 9) Which of the following is/are property/properties of a dynamic programming problem?
a) Evolutionary Approach
b) Require More Time
c) Optimal Substructure & Overlapping Subproblems
d) Greedy Approach
- 10) If for an algorithm time complexity is given by $O(1)$ then complexity of it is _____.
a) Constant b) Polynomial
c) Exponential d) None of the mentioned
- 11) An algorithm is _____.
a) A piece of code to be execute
b) A loosely written code to make final code
c) A step by step procedure to solve problem
d) All of the above
- 12) An algorithm that calls itself directly or indirectly is known as _____.
a) Sub algorithm b) Recursion
c) Polish notation d) Traversal algorithm
- 13) The complexity of Binary search algorithm is _____.
a) $O(n)$ b) $O(\log n)$
c) $O(n^2)$ d) $O(\log n^2)$
- 14) Dijkstra's Algorithm cannot be applied on _____.
a) Directed and weighted graphs
b) Graphs having negative weight function
c) Unweighted graphs
d) Undirected and unweighted graphs

Set **S**

T.Y. (B Tech) (Sem - I) (New) (CBCS) Examination: March/April-2024
COMPUTER SCIENCE & ENGINEERING
Design and Analysis of Algorithm (BTN03504)

Day & Date: Thursday, 16-05-2024
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

Instructions: 1) All questions are compulsory.
 2) Figures to the right indicate full marks.

Section – I**Q.2 Attempt any Three: 12**

- Define algorithm, State different criteria for algorithms.
- Write a short note on binary search and explain recursive binary search algorithm.
- Sort the following sequence using merge sort
38, 27, 43, 3, 9, 82, 10, 15, 21, 7
- Write a control abstraction for subset paradigm using greedy method.

Q.3 Attempt any One: 08

- Explain time and space complexity of an algorithm with examples in detail.
- Find optimal merge pattern for the file of length:
28, 32, 12, 5, 84, 53, 91, 35, 3, 11

Q.4 Explain Knapsack problem with following example. Find an optimal solution to the, knapsack problem with 08

$N=3, m=20, (p_1, p_2, p_3) = (25, 24, 15) (w_1, w_2, w_3) = (18, 15, 10)$

Section – II**Q.5 Attempt any Three: 12**

- Explain Hamilton cycle with example.
- Differentiate between tractable and intractable problem.
- Explain halting problem.
- Generate the set $S_i, 0 \leq i \leq 3$, for following knapsack instance with $n = 3, (p_1, p_2, p_3) = (1, 2, 5)$ and $(w_1, w_2, w_3) = (2, 3, 4)$ and $m = 6$. Find optimal solution using dynamic programming.

Q.6 Attempt any One: 08

- Find minimum cost path from s to t multistage graph using forward approach.

- Write note on:
 - Graph Coloring
 - P, NP, NP-Complete

Q.7 Find all pair shortest path using Dynamic programming.

COMPUTER SCIENCE & ENGINEERING
Reinforcement Learning (BTN03512)

Day & Date: Friday, 17-05-2024
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.
 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct answer.

14

- 1) _____ is all about making decisions sequentially.
 - a) Supervised learning
 - b) Unsupervised learning
 - c) Reinforcement learning
 - d) None of these
- 2) _____ Reinforcement is defined as when an event, occurs due to a particular behavior.
 - a) Negative
 - b) Positive
 - c) Neutral
 - d) None of these
- 3) In reinforcement learning current situation of agent is called _____.
 - a) Action
 - b) State
 - c) Reward
 - d) Signal
- 4) Temporal Difference Learning in machine learning is a method to learn how to predict a quantity that depends on _____ of a given signal.
 - a) Past values
 - b) Future values
 - c) Current values
 - d) All of the above
- 5) The model with possibility with their probabilities is called _____.
 - a) Distribution model
 - b) Sample model
 - c) Environment
 - d) Planned model
- 6) The learner and decision maker is called _____.
 - a) Agent
 - b) Environment
 - c) State
 - d) Model
- 7) In MDP future state depends on _____.
 - a) Current state
 - b) Past state
 - c) Future and Past state
 - d) None of the above
- 8) Return in a some over a finite number of terms is called _____.
 - a) Continuous task
 - b) Episodic task
 - c) Reward
 - d) Goal

Day & Date: Friday, 17-05-2024
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

Instructions: 1) All questions are compulsory.
 2) Figures to the right indicate full marks.

Section – I

- Q.2 Solve any four. 16**
- a) Explain elements of reinforcement learning with diagram.
 - b) Explain Epsilon greedy method in detail.
 - c) Explain returns and episodes in detail.
 - d) What is MDP? Explain its tuples.
 - e) Explain exploration and exploitation dilemma in reinforcement learning.
- Q.3 Attempt the following. (Any Two) 12**
- a) Explain the of K-armed bandit problem with example
 - b) Explain 10 armed test bed in detail with diagram.
 - c) Explain agent-environment interface in detail.

Section – II

- Q.4 Attempt the following. (Any Four) 16**
- a) Explain value iteration method in detail.
 - b) Explain value iteration method.
 - c) Explain policy evaluation in detail.
 - d) Describe optimality of TD (0).
 - e) Explain Asynchronous dynamic programming in detail.
- Q.5 Attempt the following (Any Two) 12**
- a) Derive the bellman equation to find optimal policy and optimal value function.
 - b) Explain in detail SARSA: On policy TD control.
 - c) Explain models and planning in detail.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct answer.

14

- 1) Return in a some over a finite number of terms is called _____.
 - a) Continuous task
 - b) Episodic task
 - c) Reward
 - d) Goal
- 2) Sum of the reward sequence is defined by _____.
 - a) G_t
 - b) q^*
 - c) $V(A_t)$
 - d) None of these
- 3) Return is the _____.
 - a) Sum of tasks
 - b) Sum of rewards
 - c) Sum of action
 - d) Sum of state
- 4) Value function takes an account of _____ state and reward.
 - a) Future
 - b) Past
 - c) Current
 - d) None of these
- 5) Which of the following is/are property/properties of a dynamic programming problem?
 - a) Optimal substructure
 - b) Overlapping sub problems
 - c) Greedy approach
 - d) Both optimal substructure and Overlapping sub problems
- 6) TD learning is a combination of _____.
 - a) Monte Carlo and dynamic programming
 - b) MDP and Monte Carlo
 - c) MDP and Dynamic programming
 - d) All of these
- 7) Prioritized sweeping is a _____ technique.
 - a) Model based
 - b) Model free
 - c) Sample based
 - d) Experienced
- 8) _____ is all about making decisions sequentially.
 - a) Supervised learning
 - b) Unsupervised learning
 - c) Reinforcement learning
 - d) None of these

- 9) _____ Reinforcement is defined as when an event, occurs due to a particular behavior.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options. 14

- 1) How to handle the missing values in the dataset?
 - a) dropping the missing rows & columns
 - b) Replace with some values
 - c) Compute with mean/mode/median value
 - d) All of above
- 2) Which of the following is true about outliers?
 - a) Data points that deviate a lot from normal
 - b) can reduce the accuracy of model
 - c) a & b
 - d) None of these
- 3) What are the different types of variables?

a) Nominal	b) Ordinal
c) Quantitative	d) All of above
- 4) Data that summarize all observations in a category are called _____ data.

a) frequency	b) summarized
c) raw	d) none of these
- 5) What is the meaning of Mean?

a) average	b) sum
c) difference	d) none of these
- 6) Metrics to measure Central Tendency _____.

a) Mean	b) Mode
c) Median	d) All of above
- 7) What does NumPy stand for?

a) Numerical Python	b) Natural Python
c) Numeric Program	d) Nonlinear Python
- 8) Which of the following is used to find the indices of the maximum and minimum elements in a NumPy array?

a) argmax() and argmin()	b) max() and min()
c) amax() and amin()	d) None of these

- 9) `import numpy as np`
`a = np.array([[1, 2], [3, 4]])`
`print(a.ndim)`
a) 0
b) 1
c) 2
d) 3
- 10) Dataframe object is value mutable.
a) True
b) False
- 11) Amongst which of the following is / are not correct to access individual item from dataframe 'df'.
a) `df.iat[2,2]`
b) `df.loc[2,2]`
c) `df.at[2,2]`
d) `df[0,0]`
- 12) Which of the following library is used to plot the graph in python?
a) Numpy
b) Pandas
c) Matplotlib
d) All of above
- 13) Which is the correct command to install Matplotlib?
a) `pip install matplotlib`
b) `pip install matplotlib.pz`
c) `pip install matplotlib.*`
d) All of the above
- 14) Which function is used to create a histogram in Seaborn?
a) `sns.lineplot()`
b) `sns.scatterplot()`
c) `sns.histplot()`
d) `sns.barplot()`

-----	---

T.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
COMPUTER SCIENCE & ENGINEERING
Data Preprocessing & Visualization (BTN03513)

Day & Date: Friday, 17-05-2024
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

Instructions: 1) All questions are compulsory.
 2) Figures to the right indicate full marks.

Section – I

- Q.2 Attempt the following (Any Three) 12**
- a) What are the Different types of Variable?
 - b) Explain the types of Hypothesis with example.
 - c) What is Scatter plot? Draw the Positive and Negative relationship.
 - d) Define the terms ndim, shape, size, dtype with syntax.

- Q.3 Attempt the following (Any Two) 16**
- a) What are the Metrics of Central Tendency with example
 - b) How to convert text to numbers and numbers to text with example.
 - c) From the given array: `array([0,1,2,3,4,5,6,7,8,9])` Write a Python code for
 - 1) Display first five element
 - 2) Element after index 5
 - 3) Middle subarray
 - 4) Display last 2 element
 - 5) Display only even element
 - 6) Display only odd elements

Section – II

- Q.4 Attempt the following (Any Three). 12**
- a) Explain the operations on data in pandas in detail.
 - b) How to handle missing values in Pandas, explain with example.
 - c) What is Data Visualization, identify the design principles of data visualization.
 - d) Define Matplotlib and List out the libraries for plotting the graph, explain any one in detail with syntax.

- Q.5 Answer the following (Any Two) 16**
- a) What are the steps to combine dataset using append, concat & Merge, join in pandas.
 - b) Explain Different types of operations on string in pandas.
 - c) Write the Python code to draw the Bar Chart, Histogram using Matplotlib and Seaborn.

T.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
COMPUTER SCIENCE & ENGINEERING
Data Preprocessing & Visualization (BTN03513)

Day & Date: Friday, 17-05-2024
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.
 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options.

14

- 1) Which of the following is used to find the indices of the maximum and minimum elements in a NumPy array?
 - a) `argmax()` and `argmin()`
 - b) `max()` and `min()`
 - c) `amax()` and `amin()`
 - d) None of these
- 2) `import numpy as np`
`a = np.array([[1, 2], [3, 4]])`
`print(a.ndim)`
 - a) 0
 - b) 1
 - c) 2
 - d) 3
- 3) Dataframe object is value mutable.
 - a) True
 - b) False
- 4) Amongst which of the following is / are not correct to access individual item from dataframe 'df'.
 - a) `df.iat[2,2]`
 - b) `df.loc[2,2]`
 - c) `df.at[2,2]`
 - d) `df[0,0]`
- 5) Which of the following library is used to plot the graph in python?
 - a) Numpy
 - b) Pandas
 - c) Matplotlib
 - d) All of above
- 6) Which is the correct command to install Matplotlib?
 - a) `pip install matplotlib`
 - b) `pip install matplotlib.pz`
 - c) `pip install matplotlib.*`
 - d) All of the above
- 7) Which function is used to create a histogram in Seaborn?
 - a) `sns.lineplot()`
 - b) `sns.scatterplot()`
 - c) `sns.histplot()`
 - d) `sns.barplot()`
- 8) How to handle the missing values in the dataset?
 - a) dropping the missing rows & columns
 - b) Replace with some values
 - c) Compute with mean/mode/median value
 - d) All of above

- 9) Which of the following is true about outliers?
- a) Data points that deviate a lot from normal
 - b) can reduce the accuracy of model
 - c) a & b
 - d) None of these
- 10) What are the different types of variables?
- a) Nominal
 - b) Ordinal
 - c) Quantitative
 - d) All of above
- 11) Data that summarize all observations in a category are called _____ data.
- a) frequency
 - b) summarized
 - c) raw
 - d) none of these
- 12) What is the meaning of Mean?
- a) average
 - b) sum
 - c) difference
 - d) none of these
- 13) Metrics to measure Central Tendency _____.
- a) Mean
 - b) Mode
 - c) Median
 - d) All of above
- 14) What does NumPy stand for?
- a) Numerical Python
 - b) Natural Python
 - c) Numeric Program
 - d) Nonlinear Python

MCQ/Objective Type Questions

Duration: 20 Minutes

Marks: 10

Q.1 Choose the correct alternatives from the options. 10

- 1) Who gives a welfare definition of economics?

a) Adam Smith	b) Alfred Marshall
c) Lionel Robbins	d) Paul Samuelson
- 2) The type of equilibrium that deals with the determination of price and quantity of only one _____.

a) General equilibrium	b) Partial equilibrium
c) Zero equilibrium	d) Pareto efficiency
- 3) Who is known as father of economics?

a) Adam Smith	b) Prof. A. Samulson
c) Alfred Marshall	d) J. R. Hicks
- 4) Macroeconomic theory deals with _____.

a) The behavior of firms	b) The activities of individual units
c) Economic aggregates	d) The behavior of the electronics industry
- 5) Which of the following market types has all firms selling products so identical that buyers do not care from which firm they buy?

a) Perfect competition	b) Oligopoly
c) Monopolistic competition	d) Monopoly
- 6) Which of the following is the best example of a natural monopoly?

a) owning the only licensed taxicab in town	b) the United States Postal Service
c) ownership of the only ferry across Puget Sound for twenty miles	d) the cable television company in your hometown
- 7) Which of the following is not a regulatory institution in Indian financial system?

a) RBI	b) CIBIL
c) SEBI	d) IRDA

- 8) Money supply increases when inflation rises in the economy _____.
- a) Increase
 - b) Decrease
 - c) No change
 - d) None of the above
- 9) Market system means: _____.
- a) Socialism
 - b) Capitalism
 - c) A place where goods are traded

- 4) When is a person more likely to have difficulty in coping with a stressful situation?
 - a) When he is over the age of fifty
 - b) When he expects a positive outcome
 - c) When he thinks he does not have control over the situation
 - d) When he has a good social support network

- 5) Aches, shallow breathing and sweating, frequent colds are _____.
 - a) Physical symptoms of stress
 - b) Behavioral symptoms of stress
 - c) Emotional symptoms of stress
 - d) Cognitive symptoms of stress

- 6) Anxiety can cause the following moods _____.
 - a) Irritable
 - b) Nervous
 - c) Anxious
 - d) All of the above

- 7) Which of the following are the physical symptoms of anxiety?
 - a) Racing heart
 - b) Sweaty palms
 - c) Flushed cheeks
 - d) All of the above

- 8) Which of the following is true about 'deep breathing relaxation technique'?
- a) It can be self-taught
 - b) It releases tension from the body and clears your mind
 - c) You have to do this under-water
 - d) Only '1' & '2' are true
- 9) Which of the following are stress busters?
- a) Trying to find something funny in a difficult situation
 - b) Developing a support network
 - c) Taking a mindful walk
 - d) All of the above
- 10) Which one is not considered as Environmental stressors?
- a) Weather
 - b) Traffic
 - c) Financial problems
 - d) Substandard housing

Set P

T. Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
COMPUTER SCIENCE AND ENGINEERING
Stress and Coping (BTN03509)

Day & Date: Monday, 20-05-2024
Time: 10:00 AM To 12:00 PM

Max. Marks: 40

Instructions: 1) Attempt any four questions from Q. no 2 to Q. no 7.
2) Figures to the right indicate full marks.

- Q.2** Explain in detail the various personality sources of stress. Explain Type A and Type B Personality factors causing stress. **10**
- Q.3** What do you mean by Stress? Describe the current & Historical status of stress in India. **10**
- Q.4** Comment on psychological & behavioral consequences of stress in brief. **10**
- Q.5** Explain various coping styles to deal with stress. **10**
- Q.6** Describe positive and negative effects of stress with examples. **10**
- Q.7** Discuss the nature of stress response. **10**

- 8) Which of the following statements is true?
- a) The stress response is nonspecific
 - b) Different kinds of stressors produce exactly the same response
 - c) Different people respond to the same stressor differently
 - d) All of the above
- 9) When is a person more likely to have difficulty in coping with a stressful situation?
- a) When he is over the age of fifty
 - b) When he expects a positive outcome
 - c) When he thinks he does not have control over the situation
 - d) When he has a good social support network
- 10) Aches, shallow breathing and sweating, frequent colds are _____.
- a) Physical symptoms of stress
 - b) Behavioral symptoms of stress
 - c) Emotional symptoms of stress
 - d) Cognitive symptoms of stress

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) Software implementation using PL introduces a new domain called _____.
 a) Application Domain b) PL Domain
 c) Execution Domain d) Program generator Domain
- 2) In an absolute loading scheme, which loader function is accomplished by loader?
 a) Reallocation b) Allocation
 c) Linking d) Loading
- 3) A compiler is any language translator which is not an _____.
 a) preprocessor b) language migratory
 c) detranslator d) assembler
- 4) Forward reference table (FRT) is arranged like?
 a) Stack b) Queue
 c) Linked list d) Double lined list
- 5) Yaac is a second phase of compiler which generates _____ parser.
 a) LRLA b) LALR
 c) Pass 2 d) Pass 1
- 6) A _____ is a software which bridges a specification or execution gap.
 a) Semantic gap b) Linker
 c) Language Processor d) Loader
- 7) Instructions which won't appear in the object program are called as _____.
 a) Redundant instructions b) Exceptions
 c) Comments d) Assembler Directives
- 8) Type-2 grammar is known as _____.
 a) Context free grammar b) Phase structure grammar
 c) Context Sensitive grammar d) None of the above
- 9) The expansion of nested macro calls follows _____.
 a) FIFO rule b) LIFO rule
 c) LILO rule d) priority rule

- 10) The translator which perform macro expansion is called a _____.
- a) Macro processor
 - b) Macro pre-processor
 - c) Micro pre-processor
 - d) assembler
- 11) _____ is a popular intermediate code in non-optimizing compilers.
- a) Triples and quadruples
 - b) Indirect triple
 - c) Parse tree
 - d) Postfix string
- 12) A grammar that produces more than one parse tree for some sentence is called as _____.
- a) Ambiguous
 - b) Unambiguous
 - c) Regular
 - d) All of these
- 13) Storage mapping is done by _____.
- a) OS
 - b) Compiler
 - c) Linker
 - d) Loader
- 14) Which of the following system software always resides in the main memory?
- a) Text Editor
 - b) Assembler
 - c) Linker
 - d) Loader

 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer bookpage no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) Type-2 grammar is known as _____.
 a) Context free grammar b) Phase structure grammar
 c) Context Sensitive grammar d) None of the above
- 2) The expansion of nested macro calls follows _____.
 a) FIFO rule b) LIFO rule
 c) LIFO rule d) priority rule
- 3) The translator which perform macro expansion is called a _____.
 a) Macro processor b) Macro pre-processor
 c) Micro pre-processor d) assembler
- 4) _____ is a popular intermediate code in non-optimizing compilers.
 a) Triples and quadruples b) Indirect triple
 c) Parse tree d) Postfix string
- 5) A grammar that produces more than one parse tree for some sentence is called as _____.
 a) Ambiguous b) Unambiguous
 c) Regular d) All of these
- 6) Storage mapping is done by _____.
 a) OS b) Compiler
 c) Linker d) Loader
- 7) Which of the following system software always resides in the main memory?
 a) Text Editor b) Assembler
 c) Linker d) Loader
- 8) Software implementation using PL introduces a new domain called _____.
 a) Application Domain b) PL Domain
 c) Execution Domain d) Program generator Domain
- 9) In an absolute loading scheme, which loader function is accomplished by loader?
 a) Reallocation b) Allocation
 c) Linking d) Loading

Set Q

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2024
COMPUTER SCIENCE AND ENGINEERING
System Programming (BTN03601)

Day & Date: Tuesday, 21-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

- Q.2 Attempt any three** **12**
- a) Explain A simple assembly scheme in detail.
 - b) Explain design of a two pass assembler in detail.
 - c) Explain Language processor development tools in detail.
 - d) Explain Design of Macro preprocessor in detail.
- Q.3 Answer any two.** **16**
- a) Explain Elements of assembly language programming in detail.
 - b) Define Macro and Macro call. Explain Micro Expansion in detail.
 - c) Explain Fundamentals of Language Processing.

Section – II

- Q.4 Attempt any three.** **12**
- a) Explain Static and dynamic memory allocation.
 - b) Explain design of a linker in detail.
 - c) Explain Absolute loader in detail.
 - d) Explain Memory allocation in block structured languages.
- Q.5 Answer any two.** **16**
- a) Explain Design of direct linking loader in detail.
 - b) Explain Self-relocating programs in detail.
 - c) Explain General loader scheme in detail.

 - a) Text Editor
 - b) Assembler
 - c) Linker
 - d) Loader
- 5) Software implementation using PL introduces a new domain called _____.
 - a) Application Domain
 - b) PL Domain
 - c) Execution Domain
 - d) Program generator Domain
- 6) In an absolute loading scheme, which loader function is accomplished by loader?
 - a) Reallocation
 - b) Allocation
 - c) Linking
 - d) Loading
- 7) A compiler is any language translator which is not an _____.
 - a) preprocessor
 - b) language migratory
 - c) detranslator
 - d) assembler
- 8) Forward reference table (FRT) is arranged like?
 - a) Stack
 - b) Queue
 - c) Linked list
 - d) Double lined list
- 9) Yaac is a second phase of compiler which generates _____ parser.
 - a) LRLA
 - b) LALR
 - c) Pass 2
 - d) Pass 1

- 10) A _____ is a software which bridges a specification or execution gap.
- a) Semantic gap
 - b) Linker
 - c) Language Processor
 - d) Loader
- 11) Instructions which won't appear in the object program are called as _____.
- a) Redundant instructions
 - b) Exceptions
 - c) Comments
 - d) Assembler Directives
- 12) Type-2 grammar is known as _____.
- a) Context free grammar
 - b) Phase structure grammar
 - c) Context Sensitive grammar
 - d) None of the above
- 13) The expansion of nested macro calls follows _____.
- a) FIFO rule
 - b) LIFO rule
 - c) LILO rule
 - d) priority rule
- 14) The translator which perform macro expansion is called a _____.
- a) Macro processor
 - b) Macro pre-processor
 - c) Micro pre-processor

Day & Date: Friday, 24-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer bookpage no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) What is IoT?
 - a) network of physical objects embedded with sensors
 - b) network of virtual objects
 - c) network of objects in the ring structure
 - d) network of sensors
- 2) _____ IEEE standard is available for ethernet.
 - a) 802.11
 - b) 802.3
 - c) 802.16
 - d) 802.15
- 3) Who coined the term "Internet of Things"?
 - a) Edward Jameson
 - b) John Wright
 - c) Kevin Aston
 - d) George Garton
- 4) Which of the following is not an IoT device?
 - a) Tablet
 - b) Laptop
 - c) Arduino
 - d) Table
- 5) _____ layer is responsible for sending IP datagrams from source to destination network.
 - a) Network
 - b) Link
 - c) Transport
 - d) Applications
- 6) MQTT stands for _____.
 - a) Message Queue Transport Telemetry
 - b) Message Queue Telemetry Transport
 - c) Management Queue Transport Telemetry
 - d) Management Queue Telemetry Transport
- 7) A Level _____ IoT system has single node that performs sensing and/or actuation, stores data, performs analysis and host the application.
 - a) 3
 - b) 2
 - c) 1
 - d) 4

- 8) Device identity management means _____.
- a) identifying a device
 - b) registering a device for actions after identifying
 - c) assigning unique identify to the device
 - d) All of the options
- 9) _____ are used for sensing things and devices.
- a) Sensors
 - b) Actuators
 - c) RFID
 - d) None of these
- 10) Devices which monitors and tracks the temperature and gives temperature's measurement as an electrical signal are termed _____ sensors.
- a) optical
 - b) temperature
 - c) speed
 - d) pressure
- 11) An electric actuator uses electrical energy, is usually actuated by a motor that converts electrical energy into mechanical torque.
- a) Pneumatic Actuators
 - b) Mechanical Actuators
 - c) Electrical Actuators
 - d) All
- 12) _____ is a standards-based wireless technology developed to enable low-cost, low-power wireless machine-to-machine (M2M) and internet of things (IoT) networks.
- a) Sensor
 - b) Actuator
 - c) RFID
 - d) Zigbee
- 13) Internet of Things _____ is the special considerations required to protect the information of individuals from exposure in the IoT environment.
- a) privacy
 - b) security
 - c) protection
 - d) none of these
- 14) REST stands for _____.
- a) Representational State Transport
 - b) Representational State Transfer
 - c) Representational Side Transfer
 - d) Reserved State Transfer

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) An electric actuator uses electrical energy, is usually actuated by a motor that converts electrical energy into mechanical torque.

a) Pneumatic Actuators	b) Mechanical Actuators
c) Electrical Actuators	d) All

- 2) _____ is a standards-based wireless technology developed to enable low-cost, low-power wireless machine-to-machine (M2M) and internet of things (IoT) networks.

a) Sensor	b) Actuator
c) RFID	d) Zigbee

- 3) Internet of Things _____ is the special considerations required to protect the information of individuals from exposure in the IoT environment.

a) privacy	b) security
c) protection	d) none of these

- 4) REST stands for _____.

a) Representational State Transport	b) Representational State Transfer
c) Representational Side Transfer	d) Reserved State Transfer

- 5) What is IoT?

a) network of physical objects embedded with sensors	b) network of virtual objects
c) network of objects in the ring structure	d) network of sensors

- 6) _____ IEEE standard is available for ethernet.

a) 802.11	b) 802.3
c) 802.16	d) 802.15

- 7) Who coined the term "Internet of Things"?

a) Edward Jameson	b) John Wright
c) Kevin Aston	d) George Garton

- 8) Which of the following is not an IoT device?
- a) Tablet
 - b) Laptop
 - c) Arduino
 - d) Table
- 9) _____ layer is responsible for sending IP datagrams from source to destination network.
- a) Network

 - b) security
 - c) protection
 - d) none of these
- 9) REST stands for _____.
- a) Representational State Transport
 - b) Representational State Transfer
 - c) Representational Side Transfer
 - d) Reserved State Transfer
- 10) What is IoT?
- a) network of physical objects embedded with sensors
 - b) network of virtual objects
 - c) network of objects in the ring structure
 - d) network of sensors
- 11) _____ IEEE standard is available for ethernet.
- a) 802.11
 - b) 802.3
 - c) 802.16
 - d) 802.15
- 12) Who coined the term "Internet of Things"?
- a) Edward Jameson
 - b) John Wright
 - c) Kevin Aston
 - d) George Garton
- 13) Which of the following is not an IoT device?
- a) Tablet
 - b) Laptop
 - c) Arduino
 - d) Table
- 14) _____ layer is responsible for sending IP datagrams from source to destination network.
- a) Network
 - b) Link
 - c) Transport
 - d) Applications

Set S

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2024
COMPUTER SCIENCE AND ENGINEERING
Internet of Things (BTN03602)

Day & Date: Friday, 24-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any three of the following. 12

- a) What are the different characteristics of IOT?
- b) Describe layers and design standards used in IOT architecture.
- c) Describe M2M Communication used in IOT.
- d) Elaborate different types of sensors used in IOT.

Q.3 Solve any two 16

- a) Describe Physical Design of IoT and logical design of IOT.
- b) What are the different applications of IOT?
- c) What are different communication technologies used in IOT?

Section – II

Q.4 Solve any three. 12

- a) Describe constrained application protocols used in IOT.
- b) Elaborate bluetooth and its low energy profile used in IOT.
- c) How Security and Vulnerabilities applied to IOT applications
- d) Describe value creation in the IoT.

Q.5 Solve any two 16

- a) Describe representational state transfer architecture used in IOT
- b) Describe Business model and business model innovation for IoT.
- c) Elaborate IoT Privacy in detail.

Seat No.	
-------------	--

T.Y. (B.Tech.) (Sem - II) (New)(CBCS) Examination: March/April – 2024
COMPUTER SCIENCE AND ENGINEERING
Software Engineering (BTN03603)

Day & Date: Monday, 27-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer bookpage no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct option from the following. 14

- 1) A primary goal of software engineering is to improve the _____ and to increase the productivity and job satisfaction of software engineers.

a) Quality of software product	b) Satisfaction of product
c) Flexibility	d) None of these

- 2) The property of software in which software product may be adapted to changes of specifications.

a) Maintainability	b) Flexibility
c) Testability	d) Portability

- 3) Agile Project Management support which of the following?
 - a) Regular adaptation to changing circumstances, including changing requirements
 - b) Constant collaboration in project teams and with clients
 - c) Iterative development processes
 - d) All of the mentioned

- 4) In CMM which level is focusing on documentation of the standard guidelines and procedures, also defects are removed by using a number of review methods?

a) Repeatable level	b) Managed level
c) Defined level	d) Optimizing level

- 5) In system modelling, which model depicts a system's static nature?

a) Data Model	b) Structural Model
c) Context Model	d) Behavioural Model

- 6) What is the major drawback of the Spiral Model?
 - a) Higher amount of risk analysis
 - b) Doesn't work well for smaller projects
 - c) Additional functionalities are added later on
 - d) Strong approval and documentation control

- 7) Which one isn't an approach to estimate the cost of the software?

a) Heuristic	b) Empirical
c) Critical	d) Analytical

T.Y. (B.Tech.) (Sem - II) (New)(CBCS) Examination: March/April – 2024
COMPUTER SCIENCE AND ENGINEERING
Software Engineering (BTN03603)

Day & Date: Monday, 27-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All question are compulsory.
 2) Figures to the right indicate full marks.

Section – I

- Q.2 Attempt any Three. 12**
- What do you mean by conceptual design and technical design?
 - How components and connectors of Architectural view are used? Describe with example.
 - Elaborate the coupling with its types.
 - State the Objectives of Software Engineering Model.
- Q.3 Attempt any One. 08**
- Compare and contrast Data Flow Diagram and entity relationship diagram. Draw DFD for railway reservation system.
 - Summarize the needs of SRS. How good SRS reduce development cost explain with example?
- Q.4 Compulsory Question 08**
- Identify the SDLC model for a given scenario and describe it in detail.
 “Aman got a contract to develop a project for ABC-company. He required cross functional teams, which working simultaneously on various areas, Also team should focused on quick responses to change and continuous development.”

Section – II

- Q.5 Answer any three. 12**
- Compare between Agile and Scrum.
 - Explain Black-Box testing.
 - Explain Iterative project management life cycle.
 - Elaborate the terms Inspection and Audit in project planning and management.
- Q.6 Attempt Any One 08**
- Identify the risk management tasks and describe with real-time example.
 - Elaborate Adaptive project management life cycle.
- Q.7 Compulsory Question 08**
- Why there is a need of capability maturity model in software engineering?
 Describe the CMM with neat diagram.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct option from the following.

14

- 1) In what type of coupling, the complete data structure is passed from one module to another?

a) Control Coupling	b) Stamp Coupling
c) External Coupling	d) Content Coupling
- 2) When can black-box testing be started?

a) After Requirement	b) After Design
c) After Installation	d) After Programming
- 3) Engineering design activities consists of which of the following?
 - a) Studying the SRS
 - b) Producing new models of the problem
 - c) Product design models
 - d) All of the mentioned
- 4) Detailed design stage includes which of the following activity?
 - a) Generate candidate architectures
 - b) Evaluate candidate architecture
 - c) Finalize Design
 - d) None of the mentioned
- 5) Which of the following is Risk control activity?

a) Risk analysis	b) Risk prioritization
c) Risk identification	d) Risk resolution
- 6) The "Time Boxing" of a scrum process is called _____.

a) Process	b) Sprint
c) Event	d) Cycle
- 7) Adaptive Software Development has which of the following three framework activities?
 - a) Speculation, collaboration, learning
 - b) Analysis, design, coding
 - c) Requirements gathering, adaptive cycle planning, iterative development
 - d) All of the mentioned

- 8) A primary goal of software engineering is to improve the _____ and to increase the productivity and job satisfaction of software engineers.
- a) Quality of software product
 - b) Satisfaction of product
 - c) Flexibility
 - d) None of these
- 9) The property of software in which software product may be adapted to changes of specifications.
- a) Maintainability

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2024
COMPUTER SCIENCE AND ENGINEERING
Cloud Computing (BTN03606)

Day & Date: Wednesday, 29-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer bookpage no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the options and rewrite the sentence. 14

- 1) Offering virtualized resources (computation, storage and communication) on demand is known as _____.
 a) Software as a Service (SaaS)
 b) Platform as a Service (PaaS)
 c) Infrastructure as a Service (IaaS)
 d) None of the above
- 2) Which of the following is/are desired feature(s) of a cloud?
 a) per-usage metering and billing b) elasticity
 c) self-service d) all of the mentioned
- 3) _____ is the most complete cloud computing service model in which the computing hardware and software, as well as solution itself, are provided by a vendor as a complete service offering.
 a) Infrastructure-as-a-Service b) Software-as-a-Service
 c) Platform-as-a-Service d) None of these
- 4) The movement of a virtual machine from one physical host to another while being powered on is called _____.
 a) hot migration b) cold migration
 c) live storage migration d) None of these
- 5) Virtual machines (VM) can be provisioned by using which of the following options?
 a) by manually installing an operating system
 b) by using a preconfigured VM template
 c) by cloning an existing VM
 d) All of these
- 6) The fundamental unit of virtualized client in an IaaS deployment is called a _____.
 a) pod b) silos
 c) workload d) None of these

- 7) Which of the following is/are complementary and enabling technologies for open source cloud tools, which play an invaluable role in infrastructure as a service and in building private, public, and hybrid cloud architecture?
- a) Eucalyptus
 - b) Open-Nebula
 - c) Both of these
 - d) None of these
- 8) _____ clouds have the advantage of keeping in-house the core business operations by relying on the existing IT infrastructure and reducing the burden of maintaining it once the cloud has been set up.
- a) Public
 - b) Private
 - c) Both of these
 - d) None of these
- 9) _____ enables on-the-fly integration of local computational environments (data centers, grids) and public cloud services.
- a) Autonomic cloudbursting
 - b) Autonomic cloudbridging
 - c) Autonomic latency
 - d) None of these
- 10) In the CometCloud architecture for autonomic cloudbursts, the _____ layer provides the basic framework for application development and management.
- a) infrastructure
 - b) service
 - c) programming
 - d) None of these
- 11) The model with the least built-in security is the _____ model, where everything that involves software of any kind is the customer's problem.
- a) SaaS
 - b) PaaS
 - c) IaaS
 - d) All of these
- 12) In order to evaluate the risks in any cloud deployment, which of the following analysis need to be performed?
- a) Determine which resources are being planned to be moved to the cloud
 - b) Determine the sensitivity of the resource to risk
 - c) Determine the risk associated with the particular cloud type for a resource
 - d) All of these
- 13) _____ refers to the ability of a cloud provider to deliver software as-a-service solutions to multiple client organizations (or tenants) from a single, shared instance of the software.
- a) Multithreading
 - b) Multiprogramming
 - c) Multi-tenancy
 - d) None of these
- 14) SLA stands for _____.
- a) Server-Level Agreement
 - b) Service-Level Agreement
 - c) Server-Linked Agreement
 - d) Special-Level Agreement

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2024
COMPUTER SCIENCE AND ENGINEERING
Cloud Computing (BTN03606)

Day & Date: Wednesday, 29-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

- Q.2 Solve Any Three. 12**
- a) Explain the challenges and risks that must be considered to take good advantage of cloud computing.
 - b) Write a short note on Virtual Machine Life Cycle.
 - c) Explain the types of clouds based on deployment models.
 - d) List and explain in short the SaaS characteristics.

- Q.3 Solve Any Two. 16**
- a) Describe in detail the different techniques of Virtual Machine Migration.
 - b) Explain the different cloud computing services in detail.
 - c) Describe pods, aggregation and silos using a suitable example and diagram.

Section – II

- Q.4 Solve Any Three. 12**
- a) Write a short note on Autonomic Cloudbursting using CometCloud.
 - b) Describe in short the data privacy and security issues.
 - c) Write a short note on Brokered cloud storage access.
 - d) Explain in short the Aneka Resource Provisioning Service.

- Q.5 Solve Any Two. 16**
- a) Explain in detail the CometCloud architecture with a neat diagram.
 - b) With the help of a suitable reference model, explain the Security service boundary in cloud computing
 - c) Explain in detail the Jurisdictional Issues raised by Virtualization and Data Location.

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2024
COMPUTER SCIENCE AND ENGINEERING
Cloud Computing (BTN03606)

Day & Date: Wednesday, 29-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer bookpage no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the options and rewrite the sentence. 14

- 1) _____ clouds have the advantage of keeping in-house the core business operations by relying on the existing IT infrastructure and reducing the burden of maintaining it once the cloud has been set up.
 - a) Public
 - b) Private
 - c) Both of these
 - d) None of these
- 2) _____ enables on-the-fly integration of local computational environments (data centers, grids) and public cloud services.
 - a) Autonomic cloudbursting
 - b) Autonomic cloudbridging
 - c) Autonomic latency
 - d) None of these
- 3) In the CometCloud architecture for autonomic cloudbursts, the _____ layer provides the basic framework for application development and management.
 - a) infrastructure
 - b) service
 - c) programming
 - d) None of these
- 4) The model with the least built-in security is the _____ model, where everything that involves software of any kind is the customer's problem.
 - a) SaaS
 - b) PaaS
 - c) IaaS
 - d) All of these
- 5) In order to evaluate the risks in any cloud deployment, which of the following analysis need to be performed?
 - a) Determine which resources are being planned to be moved to the cloud
 - b) Determine the sensitivity of the resource to risk
 - c) Determine the risk associated with the particular cloud type for a resource
 - d) All of these
- 6) _____ refers to the ability of a cloud provider to deliver software as-a-service solutions to multiple client organizations (or tenants) from a single, shared instance of the software.
 - a) Multithreading
 - b) Multiprogramming
 - c) Multi-tenancy
 - d) None of these
- 7) SLA stands for _____.
 - a) Server-Level Agreement
 - b) Service-Level Agreement
 - c) Server-Linked Agreement
 - d) Special-Level Agreement

- 8) Offering virtualized resources (computation, storage and communication) on demand is known as _____.
- a) Software as a Service (SaaS)
 - b) Platform as a Service (PaaS)
 - c) Infrastructure as a Service (IaaS)
 - d) None of the above
- 9) Which of the following is/are desired feature(s) of a cloud?
- a) per-usage metering and billing
 - b) elasticity
 - c) self-service
 - d) all of the mentioned
- 10) _____ is the most complete cloud computing service model in which the computing hardware and software, as well as solution itself, are provided by a vendor as a complete service offering.
- a) Infrastructure-as-a-Service
 - b) Software-as-a-Service
 - c) Platform-as-a-Service
 - d) None of these
- 11) The movement of a virtual machine from one physical host to another while being powered on is called _____.
- a) hot migration
 - b) cold migration
 - c) live storage migration
 - d) None of these
- 12) Virtual machines (VM) can be provisioned by using which of the following options?
- a) by manually installing an operating system
 - b) by using a preconfigured VM template
 - c) by cloning an existing VM
 - d) All of these
- 13) The fundamental unit of virtualized client in an IaaS deployment is called a _____.
- a) pod
 - b) silos
 - c) workload
 - d) None of these
- 14) Which of the following is/are complementary and enabling technologies for open source cloud tools, which play an invaluable role in infrastructure as a service and in building private, public, and hybrid cloud architecture?
- a) Eucalyptus
 - b) Open-Nebula
 - c) Both of these
 - d) None of these

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2024
COMPUTER SCIENCE AND ENGINEERING
Cloud Computing (BTN03606)

Day & Date: Wednesday, 29-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

- Q.2 Solve Any Three. 12**
- a) Explain the challenges and risks that must be considered to take good advantage of cloud computing.
 - b) Write a short note on Virtual Machine Life Cycle.
 - c) Explain the types of clouds based on deployment models.
 - d) List and explain in short the SaaS characteristics.
- Q.3 Solve Any Two. 16**
- a) Describe in detail the different techniques of Virtual Machine Migration.
 - b) Explain the different cloud computing services in detail.
 - c) Describe pods, aggregation and silos using a suitable example and diagram.

Section – II

- Q.4 Solve Any Three. 12**
- a) Write a short note on Autonomic Cloudbursting using CometCloud.
 - b) Describe in short the data privacy and security issues.
 - c) Write a short note on Brokered cloud storage access.
 - d) Explain in short the Aneka Resource Provisioning Service.
- Q.5 Solve Any Two. 16**
- a) Explain in detail the CometCloud architecture with a neat diagram.
 - b) With the help of a suitable reference model, explain the Security service boundary in cloud computing
 - c) Explain in detail the Jurisdictional Issues raised by Virtualization and Data Location.

Set **R**

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2024
COMPUTER SCIENCE AND ENGINEERING
Cloud Computing (BTN03606)

Day & Date: Wednesday, 29-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer bookpage no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the options and rewrite the sentence. 14

- 1) The model with the least built-in security is the _____ model, where everything that involves software of any kind is the customer's problem.
 - a) SaaS
 - b) PaaS
 - c) IaaS
 - d) All of these
- 2) In order to evaluate the risks in any cloud deployment, which of the following analysis need to be performed?
 - a) Determine which resources are being planned to be moved to the cloud
 - b) Determine the sensitivity of the resource to risk
 - c) Determine the risk associated with the particular cloud type for a resource
 - d) All of these
- 3) _____ refers to the ability of a cloud provider to deliver software as-a-service solutions to multiple client organizations (or tenants) from a single, shared instance of the software.
 - a) Multithreading
 - b) Multiprogramming
 - c) Multi-tenancy
 - d) None of these
- 4) SLA stands for _____.
 - a) Server-Level Agreement
 - b) Service-Level Agreement
 - c) Server-Linked Agreement
 - d) Special-Level Agreement
- 5) Offering virtualized resources (computation, storage and communication) on demand is known as _____.
 - a) Software as a Service (SaaS)
 - b) Platform as a Service (PaaS)
 - c) Infrastructure as a Service (IaaS)
 - d) None of the above
- 6) Which of the following is/are desired feature(s) of a cloud?
 - a) per-usage metering and billing
 - b) elasticity
 - c) self-service
 - d) all of the mentioned

- 7) _____ is the most complete cloud computing service model in which the computing hardware and software, as well as solution itself, are provided by a vendor as a complete service offering.
- a) Infrastructure-as-a-Service b) Software-as-a-Service
c) Platform-as-a-Service d) None of these
- 8) The movement of a virtual machine from one physical host to another while being powered on is called _____.
- a) hot migration b) cold migration
c) live storage migration d) None of these
- 9) Virtual machines (VM) can be provisioned by using which of the following options?
- a) by manually installing an operating system
b) by using a preconfigured VM template
c) by cloning an existing VM
d) All of these
- 10) The fundamental unit of virtualized client in an IaaS deployment is called a _____.
- a) pod b) silos
c) workload d) None of these
- 11) Which of the following is/are complementary and enabling technologies for open source cloud tools, which play an invaluable role in infrastructure as a service and in building private, public, and hybrid cloud architecture?
- a) Eucalyptus b) Open-Nebula
c) Both of these d) None of these
- 12) _____ clouds have the advantage of keeping in-house the core business operations by relying on the existing IT infrastructure and reducing the burden of maintaining it once the cloud has been set up.
- a) Public b) Private
c) Both of these d) None of these
- 13) _____ enables on-the-fly integration of local computational environments (data centers, grids) and public cloud services.
- a) Autonomic cloudbursting b) Autonomic cloudbridging
c) Autonomic latency d) None of these
- 14) In the CometCloud architecture for autonomic cloudbursts, the _____ layer provides the basic framework for application development and management.
- a) infrastructure b) service
c) programming d) None of these

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose correct alternative.

14

- 1) In DES algorithm, if input of an s-box is 110010 then we look for _____ row of s-box to obtain output.

a) 0	b) 1
c) 2	d) 3
- 2) Which of the following(s) is (are) block cipher _____?

a) DES	b) AES
c) RC5	d) All of above
- 3) Use Caesar's Cipher to decipher the text: HQFUBSWHG WHAW.

a) ABANDONED LOCK	b) ENCRYPTED TEXT
c) ABANDONED TEXT	d) ENCRYPTED LOCK
- 4) Which of the following algorithm is not used for asymmetric key cryptography?

a) RSA	b) Diffie- Hellman
c) Electronic code book algorithm	d) None of mentioned
- 5) Matthew and Richard wish to communicate using symmetric cryptography but do not have a prearranged secret key. What algorithm might they use to resolve this situation?

a) DES	b) AES
c) Diffie-Hellman	d) 3-DES
- 6) Hash Function can be used for _____.

a) To create one way password file
b) Intrusion detection
c) Virus detection
d) All of these
- 7) An algorithm that is used to produce an open-ended sequence of bits is referred to as a PRNG _____.

a) SHA	b) PRNG
c) TRNG	d) PRF
- 8) The Digital Signature Standard (DSS) is an NIST standard that uses the _____.

a) Public key	b) Private key
c) SHA	d) None of above

- 9) The Digital Signature Algorithm (DSA) is based on the difficulty of computing _____.
- a) discrete logarithms
 - b) continuous logarithms
 - c) probability
 - d) none of above
- 10) An alternative authentication technique involves the use of secret key to generate a small fixed-size block of data, known as _____ or MAC.
- a) checksum
 - b) cryptographic checksum
 - c) coding
 - d) filtering
- 11) The authentication scheme CMAC indicates _____.
- a) Clock MAC
 - b) Cipher-based MAC
 - c) Caesar MAC
 - d) None of above
- 12) _____ incorporates tools for developing a public-key trust model and public key certificate management.
- a) S/MIME
 - b) PGP
 - c) IPsec
 - d) None of above
- 13) _____ is a specification used by email providers for cryptographically signing email messages on behalf of the source domain.
- a) PGP
 - b) S/MIME
 - c) DKIM
 - d) None of above
- 14) In IPsec the term SPD indicates _____.
- a) Security Policy Database
 - b) Security Private Database
 - c) Service Provider Database
 - d) Service Policy Database

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2024
COMPUTER SCIENCE AND ENGINEERING
Network Security (BTN03608)

Day & Date: Wednesday, 29-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt Any Three. 12

- Using rail fence transposition technique write encryption message for the plaintext "Solapur university solapur"
- Explain the term randomness and unpredictability with respect to random number generation.
- Explain steps in diffie Hellman Key exchange algorithm with diagram.
- Differentiate between stream cipher vs block cipher.

Q.3 Attempt Any Two. 16

- Describe RSA algorithm with the help of mathematical notations and example.
- Construct the playfair matrix with the key "occurrence" and use it to encrypt the message "The enemy must be stopped at all costs".
- Explain Logic of implementation SHA-512.

Section – II

Q.4 Attempt Any Three. 12

- Describe ESP of IPSec.
- Write a note on: DKIM (Domain Keys Identified Mail).
- Draw and explain DAA (Data Authentication Algorithm).
- Explain Wireless Security.

Q.5 Attempt Any Two. 16

- What is S/MIME? Explain. Describe S/MIME functionality and Messages.
- Describe in detail DSS (Digital Signature Standard).
- Write and explain Extensible Authentication Protocol in detail.

- 9) Which of the following(s) is (are) block cipher _____?
- a) DES
 - b) AES
 - c) RC5
 - d) All of above
- 10) Use Caesar's Cipher to decipher the text: HQFUBSWHG WHAW.
- a) ABANDONED LOCK
 - b) ENCRYPTED TEXT
 - c) ABANDONED TEXT
 - d) ENCRYPTED LOCK

Principles of Management: Practicing Ethics, Responsibility, Management
(BTN03609)

Day & Date: Friday, 31-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 40

Instructions: 1) All questions are compulsory.
2) Figures to the right indicates full marks.

- Q.2 Answer Any Two. 10**
- a) What is engineering ethics?
 - b) What are the different types of Inquiries made in solving ethical problems?
 - c) Explain what are Moral Dilemmas.
- Q.3 Answer Any Two. 10**
- a) Define the terms:
 - i) Profession and main criteria for profession.
 - ii) Professional and Professionalism.
 - b) Explain engineers as experiments.
 - c) Write a note on
 - i) Public Spirited Virtues
 - ii) Proficiency Virtue
- Q.4 Answer Any Two. 10**
- a) Differentiate renewable resources and non-renewable resources.
 - b) Explain the fellowships for higher studies & research in New and Renewable Energy.
 - c) What are the impacts of climate change on water resources based on reliable data and information?
- Q.5 Answer Any Two. 10**
- a) Explain Munasinghe's Approach to Sustainable Development.
 - b) Explain the objective of Good Governance in Sustainable Development.
 - c) What is a Corporate Governance? Explain sustainability framework of corporate governance.

- 8)** What are different types of renewable resources?
- a) Sun
 - b) Wind
 - c) Water
 - d) All of the above
- 9)** _____ refers to the description of the meaning of concepts, principles and issues related to engineering ethics.
- a) Conceptual Inquiry
 - b) Descriptive Inquiry
 - c) Normative Inquiry
 - d) None of the above
- 10)** _____ is a structured system of processes by which companies and corporations are directed and controlled.
- a) Sustainable development
 - b) Corporate governance

(BTN03609)

Day & Date: Friday, 31-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 50

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 20 Minutes

Marks: 10

Q.1 Multiple Choice Questions.

10

- 1) _____ is a field that identifies resource use, measures and communicates costs of a company's or national economic impact on the environment.
 - a) Environment
 - b) Sustainability
 - c) Environmental accounting
 - d) None of the above
- 2) _____ refers to the condition where the doubt lies in whether the action refers to good or bad.
 - a) Vagueness
 - b) Conflicting reasons
 - c) Disagreement
 - d) None of the above
- 3) A person who saves someone or something from any danger is called a _____.
 - a) Savior
 - b) Guardian
 - c) Game Player
 - d) Social Servant
- 4) The virtues which represent the coordination among team members which means working successfully with other professionals _____.
 - a) Proficiency Virtue
 - b) Ethics
 - c) Teamwork Virtue
 - d) Work Ethics
- 5) What are different types of renewable resources?
 - a) Sun
 - b) Wind
 - c) Water
 - d) All of the above
- 6) _____ refers to the description of the meaning of concepts, principles and issues related to engineering ethics.
 - a) Conceptual Inquiry
 - b) Descriptive Inquiry
 - c) Normative Inquiry
 - d) None of the above
- 7) _____ is a structured system of processes by which companies and corporations are directed and controlled.
 - a) Sustainable development
 - b) Corporate governance
 - c) Trustworthiness
 - d) None of the above
- 8) The capacity to understand and act on moral reasons is called as _____.
 - a) Accountability
 - b) Social Responsibility
 - c) Obligation
 - d) All of the above

- 9) _____ which deals with the problems of Individuals, Professionals and companies.
- | | |
|--------------------|------------------|
| a) Macro-ethics | b) Micro-ethics |
| c) Sense of ethics | d) None of these |
- 10) _____ means that information should be provided in easily understandable forms and media; that it should be freely available and directly accessible to those who will be affected by governance policies and practices.
- | | |
|-------------------|------------------|
| a) Responsiveness | b) Participation |
| c) Efficiency | d) Transparency |

MCQ/Objective Type Questions

Duration: 20 Minutes

Marks:10

Q.1 Choose the correct alternatives from the given options. 10

- 1) Which of the following statements about the marginal cost is true?
 - a) When there is an increase in the marginal cost, the production possibility curve is concave to the origin
 - b) When there is an increase in the marginal cost, the production possibility curve is convex to the origin
 - c) When there is an increase in the marginal cost, the production possibility curve is similar the origin
 - d) None of the above
- 2) Resources have _____ uses.

a) Limited	b) Unlimited
c) Alternative	d) Particular
- 3) Who was the Governor of RBI?

a) David Warner	b) Sir Phillip Smith
c) James Watson	d) Shashikanta Das
- 4) Human resource management emphasis _____.

a) Development of people	b) Punishment of people
c) Adoption of people	d) None of these
- 5) The branch of economics that deals with the allocation of resources is _____.

a) Econometrics	b) Macroeconomics
c) Microeconomics	d) None of the above
- 6) Production planning is essential for _____.

a) Inventory management	b) Quality management
c) Supply management	d) All of the above
- 7) _____ is the probability of a product operating efficiently within an estimated time frame.

a) Reliability	b) Durability
c) Serviceability	d) Performance
- 8) Lower order of Maslow Hierarchy of needs theory is _____.

a) Safety needs	b) Esteem needs
c) Self- Actualization needs	d) Physiological needs

- 9) When the size of an organization increases, the functions under production control should _____.
- a) Get more decentralized
 - b) Get more centralized
 - c) Stay the same
 - d) None of the above

Section – I

- Q.2 Solve Any Two. 10**
- a) Write an account on geomorphic (geological) hazards.
 - b) How can SWOT analysis help in effective management of disasters?
 - c) What do you mean by hazard zoning? Explain.
- Q.3 Solve Any One. 10**
- a) Discuss the types of disaster, giving suitable example.
 - b) Which things we need to consider for the selection of sites for industries and residential buildings? Explain.

Section – II

- Q.4 Solve Any Two. 10**
- a) List the principles of disaster preparedness. Explain any one in detail.
 - b) After disaster, which are the essential services should be made functional on a priority basis according to you?
 - c) Define all the objectives of disaster recovery.
- Q.5 Solve Any One. 10**
- a) List and explain steps of disaster preparedness.
 - b) Discuss major medium and long term recovery aspects with example.

T. Y. (B.Tech.) (Sem-II) (New) (CBCS) Examination: March/April-2024
COMPUTER SCIENCE AND ENGINEERING
Disaster Management (BTN03611)

Day & Date: Friday, 31-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 50

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.
 4) Assume suitable data wherever needed & mention it clearly.

MCQ/Objective Type Questions

Duration: 20 Minutes

Marks: 10

Q.1 Choose the correct alternatives from the options. 10

- 1) _____ Phase starts after the immediate threat to human life has subsided.

a) Recovery	b) Preparedness
c) Response	d) Mitigation
- 2) Which of the following is not a biological disaster?

a) Epidemics	b) Food poisoning
c) Pest attacks	d) Mine fire
- 3) Arson is _____ type disaster.

a) Technological	b) Chemical
c) Geological	d) Social
- 4) A _____ is a situation having the potential to cause damage or harm.

a) Risk	b) Vulnerability
c) Hazard	d) Disaster
- 5) _____ Hazards cause harm to the humans as also the environment and property.

a) Social	b) Chemical
c) Biological	d) Physical
- 6) _____ happens when groups of people panic and run to save their lives from real or assumed danger.

a) Blasts	b) Stampedes
c) Arson	d) Power outages
- 7) Providing food, water and medical help activity belongs to _____ phase of disaster management.

a) Response	b) Preparedness
c) Recovery	d) Mitigation
- 8) Establishments and rehabilitation activity belongs to _____ phase of disaster management.

a) Response	b) Preparedness
c) Recovery	d) Mitigation

- 9)** Early warning systems, evacuation strategies belong to _____ phase of disaster management.
- | | |
|-------------|-----------------|
| a) Response | b) Preparedness |
| c) Recovery | d) Mitigation |
- 10)** An example of an anthropogenic disaster is _____.
- | | |
|--------------------|------------------------|
| a) a road accident | b) an earth tremor |
| c) a landslide | d) a volcanic eruption |

T.Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: March/April - 2024
COMPUTER SCIENCE AND ENGINEERING
Natural Language Processing (BTN03612)

Day & Date: Monday 03-06-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) What is the field of Natural Language Processing (NLP)?
 - a) Computer Science
 - b) Artificial Intelligence
 - c) Linguistics
 - d) All of the mentioned
- 2) NLP is concerned with the interactions between computers and human (natural) languages.
 - a) True
 - b) False
 - c) Can't say
 - d) None of these
- 3) What is the main challenge/s of NLP?
 - a) Handling Ambiguity of Sentences
 - b) Handling Tokenization
 - c) Handling POS-Tagging
 - d) All of the mentioned
- 4) Modern NLP algorithms are based on machine learning, especially statistical machine learning.
 - a) True
 - b) False
 - c) Can't say
 - d) None of these
- 5) Choose from the following areas where NLP can be useful.
 - a) Automatic Text Summarization
 - b) Automatic Question-Answering Systems
 - c) Information Retrieval
 - d) All of the mentioned
- 6) Which of the following includes major tasks of NLP?
 - a) Automatic Summarization
 - b) Discourse Analysis
 - c) Machine Translation
 - d) All of the mentioned
- 7) What is Coreference Resolution?
 - a) Anaphora Resolution
 - b) Given a sentence or larger chunk of text, determine which words ("mentions") refer to the same objects ("entities")
 - c) All of the mentioned
 - d) None of the mentioned

- 8) What is Machine Translation?
- a) Converts one human language to another
 - b) Converts human language to machine language
 - c) Converts any human language to English
 - d) Converts Machine language to human language
- 9) What is Morphological Segmentation?
- a) Does Discourse Analysis
 - b) Separate words into individual morphemes and identify the class of the morphemes
 - c) Is an extension of propositional logic
 - d) None of the mentioned
- 10) Given a stream of text, Named Entity Recognition determines which pronoun maps to which noun?
- a) False
 - b) True
 - c) Can't say
 - d) None of the mentioned
- 11) Parts-of-Speech tagging determines _____.
- a) part-of-speech for each word dynamically as per meaning of the sentence
 - b) part-of-speech for each word dynamically as per sentence structure
 - c) all part-of-speech for a specific word given as input
 - d) all of the mentioned
- 12) IR (information Retrieval) and IE (Information Extraction) are the two same thing.
- a) True
 - b) False
 - c) Can't say
 - d) None of these
- 13) In linguistic morphology _____ is the process for reducing inflected words to their root form.
- a) Rooting
 - b) Stemming
 - c) Text-Proofing
 - d) Both Rooting & Stemming
- 14) What is full form of NLP?
- a) Natural Language Processing
 - b) Nature Language Processing
 - c) Natural Language Process
 - d) Natural Language pages

Natural Language Processing (BTN03612)

Day & Date: Monday 03-06-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any Three. 12

- a) Explain Biology of speech processing in detail.
- b) Explain Word-Net application in Query Expansion.
- c) Write a short note on Wiktionary.
- d) Explain Hybrid of Rule based and Probabilistic parsing.
- e) Explain the concept of Arguments and Adjuncts.

Q.3 Attempt any Two. 16

- a) Explain the steps of NLP with example.
- b) What is Semantic Role? Explain different Semantic Roles with example.
- c) Explain Parsing Algorithms in detail.

Section – II

Q.4 Attempt any Three. 12

- a) Explain Phonetics in detail.
- b) What is morphology? Explain Morphology Fundamentals in detail.
- c) Explain Dependency Parsing in detail.
- d) Describe HMM and Speech Recognition.
- e) Describe Robust and Scalable Machine Translation.

Q.5 Attempt any Two. 16

- a) Explain Morphological diversity of Indian Languages.
- b) Explain Semantic Role Extraction in detail.
- c) Explain Sentiment Analysis in detail.

 - a) Offline machine learning model
 - b) Deep Learning model
 - c) Online machine Learning model
 - d) None of these
- 2) _____ is a form of AI that enables a system to learn from data rather than through explicit programming.

a) Deep Learning	b) Collective intelligence
c) Machine Learning	d) None of this
- 3) Supervised learning and unsupervised clustering both require at least one.

a) Output attribute	b) Input attribute
c) Hidden attribute	d) none
- 4) Relational database is an example of _____.

a) Semi-structured data	b) Structured data
c) Unstructured data	d) none
- 5) _____ function performs the rendering and uses a grayscale color map.

a) plt.show()	b) show()
c) imshow()	d) imread()
- 6) Which of following steps are required to apply machine learning technique to support business strategy?
 - a) What is the business problem you are trying to solve
 - b) When are the hidden data resources that you can take advantage
 - c) How can you prepare to get your data
 - d) all
- 7) _____ determines how well a machine learning algorithm performs in a supervised prediction or an unsupervised optimization problem.

a) cost function	b) evaluation function
c) both	d) none

Set **P**

T.Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: March/April - 2024
COMPUTER SCIENCE AND ENGINEERING
Machine Learning (BTN03613)

Day & Date: Monday, 03-06-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

Instructions: 1) All questions are compulsory.
 2) Figures to the right indicate full marks.

Section – I

- Q.2 Attempt any Four** **16**
- a) Define Machine Learning Explain Lear verging the power of machine learning.
 - b) Write at least four differences between Supervised learning and unsupervised learning.
 - c) Write a short note on Data preparation.
 - d) Explain tying machine learning methods to outcome.
 - e) Write differences between data mining and machine learning.
- Q.3 Attempt any One.** **06**
- a) Exploring the world of Probabilities
 - b) Write a short note on Machine Learning Cycle.
- Q.4 Attempt the following** **06**
- Explain Exploring cost function.

Section – II

- Q.5 Attempt any Four** **16**
- a) Explain the term avoiding sample bias and Leakage Trap.
 - b) Explain the term underfitting and overfitting.
 - c) Explain Learning curves using cross validation.
 - d) Explain the future of machine learning as case study.
 - e) Explain Averaging model.
- Q.6 Attempt any One** **06**
- a) Explain Learning as Optimization.
 - b) Explain the use of machine learning in Recommending Products and Movies.
- Q.7 Attempt the following.** **06**
- Explain the following term:
- a) Training
 - b) Testing
 - c) Validating

Seat No.	
----------	--

T.Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: March/April - 2024
COMPUTER SCIENCE AND ENGINEERING
Machine Learning (BTN03613)

Day & Date: Monday, 03-06-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:**
- 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.
 - 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 - 3) Figures to the right indicates full marks.
 - 4) Assume suitable data wherever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) In Python _____ package offers all the functionality needed to create and manipulate matrices.

a) scipy	b) numpy
c) none	d) sklearn
- 2) It may surprise you to know that you can get even better results by _____ models together.

a) hypothesis space	b) averaging
c) stacking	d) none
- 3) The process goes on repetitively until there are no more chunks. Chunks can be small (depending on core memory), and the process is called _____.

a) mini-batch learning	b) learning model
c) linear regression	d) none
- 4) _____ are display in which you plot the performance of one or more machine learning algorithms with respect to the quantity of data they use for training.

a) Learning curves	b) Under fitting
c) Overfitting	d) None
- 5) _____ Algorithm is used to remove redundant data, outliers and other no useful data.

a) Bayesian	b) Dimensionality reduction
c) Association	d) Clustering
- 6) _____ ways improves machine learning model.

a) error curve method	b) Testing multiple model
c) SDLC Model	d) None
- 7) _____ is a phenomena of observing results that are systematically prejudiced due to faulty assumptions.

a) Bais	b) Variance
c) Mode	d) None

- 8) Machine Learning enables models to train on data sets once deployed do not change is called as _____.
a) Offline machine learning model
b) Deep Learning model
c) Online machine Learning model
d) None of these
- 9) _____ is a form of AI that enables a system to learn from data rather than through explicit programming.
a) Deep Learning
b) Collective intelligence
c) Machine Learning
d) None of this
- 10) Supervised learning and unsupervised clustering both require at least one.
a) Output attribute
b) Input attribute
c) Hidden attribute
d) none
- 11) Relational database is an example of _____.
a) Semi-structured data
b) Structured data
c) Unstructured data
d) none
- 12) _____ function performs the rendering and uses a grayscale color map.
a) plt.show()
b) show()
c) imshow()
d) imread()
- 13) Which of following steps are required to apply machine learning technique to support business strategy?
a) What is the business problem you are trying to solve
b) When are the hidden data resources that you can take advantage
c) How can you prepare to get your data
d) all
- 14) _____ determines how well a machine learning algorithm performs in a supervised prediction or an unsupervised optimization problem.
a) cost function
b) evaluation function
c) both
d) none

 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) Which of the following is a class of computer threat?

a) DoS attack	b) Phishing
c) Stalking	d) Soliciting
- 2) Many Cyber Crimes comes under Indian Penal Code Which one of the following is an example?
 - a) Sending Threatening message by Email
 - b) Forgery of Electronic Record
 - c) Bogus Website
 - d) All of above
- 3) Which word best fits with this definition - officials set up a perimeter around a crime scene?

a) Civilian	b) Math
c) Law enforcement	d) Police officer
- 4) "When an attacker is able to eavesdrop on network traffic and identify the MAC address of a computer with network privileges." Which type of Wireless network threat would you classify this under?

a) Identity Theft	b) Man in the middle attack
c) Network Injection	d) Accidental Association
- 5) Digital Signature Certificate is _____ requirement under various applications.

a) Statutory	b) Legislative
c) Governmental	d) Voluntary
- 6) A _____ is a means of access to a program that bypasses security mechanism.

a) Proxy	b) Backdoor
c) Virus	d) Trojan
- 7) Assessing Computer without prior authorization is a cyber crime that comes under _____.

a) Section 65	b) Section 66
c) Section 68	d) Section 70

- 8) Which of the following is the hacking approach where cyber-criminals design fake websites or pages for tricking or gaining additional traffic?
- a) Website-Duplication
 - b) Mimicking
 - c) Spamming
 - d) Pharming
- 9) DoS is abbreviated as ____.
- a) Denial of Service
 - b) Distribution of Server
 - c) Distribution of Service
 - d) Denial of Server
- 10) Identify among the following which is used to avoid browser-based hacking ____.
- a) Adware remover in browser
 - b) Incognito mode in the browser
 - c) Anti-malware in browser
 - d) Remote browser access
- 11) Which of the below malware types permits the hackers to access administrative controls and do nearly everything he wants with the infected systems?
- a) RATs
 - b) Worms
 - c) Rootkits
 - d) Botnets
- 12) Which of the following method is recommended to develop latent fingerprints on human skin?
- a) Ninhydrin Method
 - b) Amido Black Method
 - c) Silver-Iodine Plate Transfer Method
 - d) DFO Method
- 13) CCFP stands for?
- a) Cyber Certified Forensics Professional
 - b) Certified Cyber Forensics Professional
 - c) Certified Cyber Forensics Program
 - d) Certified Cyber Forensics Product
- 14) What is the Primary Objective of Digital Forensic for Business and Industry?
- a) Availability of service
 - b) Continuity of operation
 - c) Prosecution
 - d) Security

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section – I

- Q.2 Solve any four. 16**
- a) Write a note on Cyber Defamation
 - b) Write a note on Cyber stalking.
 - c) What is proxy server? What are the purpose of proxy server?
 - d) What are the functions of backdoors?
 - e) Write a note on Digital Signature.

- Q.3 Solve any two. 12**
- a) Explain in details Password Cracking.
 - b) What are the Key Amendments to IT Rules, 2021?
 - c) Explain the term.
 - i) Worms
 - ii) Software Keyloggers
 - iii) Trojan Horses
 - iv) Backdoors

Section – II

- Q.4 Solve any four. 16**
- a) Write scenario of Digital Forensic.
 - b) Explain Cyber forensics and Digital Evidence.
 - c) Explain different toolkits for hand held device forensic.
 - d) What are the security issues associated with social networking sites?
 - e) List the well-known tools with “counter forensic features”.

- Q.5 Solve any two. 12**
- a) Explain relevance of OSI 7 layer model to computer forensic.
 - b) Explain in detail data mining in cyber forensic.
 - c) Write a short note on:
 - i) Hand held device
 - ii) Network technologies

Set R

T.Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: March/April - 2024
COMPUTER SCIENCE AND ENGINEERING
Cyber Forensic (BTN03614)

Day & Date: Monday, 03-06-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section – I

- Q.2 Solve any four. 16**
- a) Write a note on Cyber Defamation
 - b) Write a note on Cyber stalking.
 - c) What is proxy server? What are the purpose of proxy server?
 - d) What are the functions of backdoors?
 - e) Write a note on Digital Signature.

- Q.3 Solve any two. 12**
- a) Explain in details Password Cracking.
 - b) What are the Key Amendments to IT Rules, 2021?
 - c) Explain the term.
 - i) Worms
 - ii) Software Keyloggers
 - iii) Trojan Horses
 - iv) Backdoors

Section – II

- Q.4 Solve any four. 16**
- a) Write scenario of Digital Forensic.
 - b) Explain Cyber forensics and Digital Evidence.
 - c) Explain different toolkits for hand held device forensic.
 - d) What are the security issues associated with social networking sites?
 - e) List the well-known tools with “counter forensic features”.

- Q.5 Solve any two. 12**
- a) Explain relevance of OSI 7 layer model to computer forensic.
 - b) Explain in detail data mining in cyber forensic.
 - c) Write a short note on:
 - i) Hand held device
 - ii) Network technologies

Seat No.	
----------	--

Set **S**

T.Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: March/April - 2024
COMPUTER SCIENCE AND ENGINEERING
Cyber Forensic (BTN03614)

Day & Date: Monday, 03-06-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) A _____ is a means of access to a program that bypasses security mechanism.

a) Proxy	b) Backdoor
c) Virus	d) Trojan
- 2) Assessing Computer without prior authorization is a cyber crime that comes under _____.

a) Section 65	b) Section 66
c) Section 68	d) Section 70
- 3) Which of the following is the hacking approach where cyber-criminals design fake websites or pages for tricking or gaining additional traffic?

a) Website-Duplication	b) Mimicking
c) Spamming	d) Pharming
- 4) DoS is abbreviated as _____.

a) Denial of Service	b) Distribution of Server
c) Distribution of Service	d) Denial of Server
- 5) Identify among the following which is used to avoid browser-based hacking _____.

a) Adware remover in browser	b) Incognito mode in the browser
c) Anti-malware in browser	d) Remote browser access
- 6) Which of the below malware types permits the hackers to access administrative controls and do nearly everything he wants with the infected systems?

a) RATs	b) Worms
c) Rootkits	d) Botnets
- 7) Which of the following method is recommended to develop latent fingerprints on human skin?

a) Ninhydrin Method	b) Amido Black Method
c) Silver-Iodine Plate Transfer Method	d) DFO Method

- 8) CCFP stands for?
a) Cyber Certified Forensics Professional
b) Certified Cyber Forensics Professional
c) Certified Cyber Forensics Program
d) Certified Cyber Forensics Product
- 9) What is the Primary Objective of Digital Forensic for Business and Industry?
a) Availability of service
b) Continuity of operation
c) Prosecution
d) Security
- 10) Which of the following is a class of computer threat?
a) DoS attack
b) Phishing
c) Stalking
d) Soliciting
- 11) Many Cyber Crimes comes under Indian Penal Code Which one of the following is an example?
a) Sending Threatening message by Email
b) Forgery of Electronic Record
c) Bogus Website
d) All of above
- 12) Which word best fits with this definition - officials set up a perimeter around a crime scene?
a) Civilian
b) Math
c) Law enforcement
d) Police officer
- 13) "When an attacker is able to eavesdrop on network traffic and identify the MAC address of a computer with network privileges." Which type of Wireless network threat would you classify this under?
a) Identity Theft
b) Man in the middle attack
c) Network Injection
d) Accidental Association
- 14) Digital Signature Certificate is _____ requirement under various applications.
a) Statutory
b) Legislative
c) Governmental
d) Voluntary

Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
COMPUTER SCIENCE AND ENGINEERING
Software Testing and Quality Assurance (BTN03701)

Day & Date: Wednesday, 15-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.
 4) Assume data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) What allows different projects to use the same source files at the same time?
 - a) Version Control
 - b) Access control
 - c) CM Process
 - d) Version Control and Access control
- 2) Identify among the following which is not a type of incremental testing approach?

a) Big Bang	b) Top-down
c) Bottom-up	d) Functional incrimination
- 3) Boundary value analysis belongs to?

a) White Box Testing	b) Black Box Testing
c) White Box & Black Box Testing	d) None of the mentioned
- 4) Which of the following are types of code review?
 - a) Code walkthrough
 - b) Code inspection
 - c) Code walkthrough & Code inspection
 - d) None
- 5) Which requirements are the foundation from which quality is measured?

a) Hardware	b) Software
c) Programmers	d) None of the mentioned
- 6) Which, in general, is the least required skill of a good tester?
 - a) Being diplomatic
 - b) Able to write software
 - c) Having good attention to detail
 - d) Able to be relied on

**Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
COMPUTER SCIENCE AND ENGINEERING
Software Testing and Quality Assurance (BTN03701)**

Day & Date: Wednesday, 15-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume data wherever necessary.

Section – I

- Q.2 Answer any four questions. 16**
- a) What is the defect life cycle in STLC?
 - b) Explain the benefits of Beta and Gamma testing.
 - c) What are the criteria used for requirement testing?
 - d) What is Defect management Process?
 - e) What is Sandwich testing and explain the advantages and disadvantages of Sandwich testing?

- Q.3 Answer any two questions. 12**
- a) Elaborate top-down approach for integration testing.
 - b) Summarize the software development life cycle during testing.
 - c) What is regression testing and stress testing with example?

Section – II

- Q.4 Answer any four questions. 16**
- a) Explain CMM quality standards.
 - b) Explain Software Quality Dilemma.
 - c) What is automation test? Explain benefits of automation testing.
 - d) What is difference between QA, QC and Software Testing?
 - e) Short Note on: Test Case Organization and Tracking.

- Q.5 Answer any two questions. 12**
- a) Briefly explain Selenium tool and its usage in functional testing of web applications.
 - b) Describe SQA Processes and Product characteristics in SQA.
 - c) Explain Random testing in automation.

 - 4) Assume data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) Acceptance testing is also known as _____.
 - a) Grey box testing
 - b) White box testing
 - c) Alpha Testing
 - d) Beta Testing
- 2) Testing done without planning and Documentation is called _____.
 - a) Unit testing
 - b) Regression testing
 - c) Ad-hoc testing
 - d) None of the mentioned
- 3) Which of the following is not a SQA plan for a project?
 - a) Evaluations to be performed
 - b) Amount of technical work
 - c) Audits and reviews to be performed
 - d) Documents to be produced by the SQA group
- 4) What is the first step of QA?
 - a) Development of standards
 - b) Identification of customer need
 - c) Servicing
 - d) Material control
- 5) Selenium tests _____.
 - a) DOS applications
 - b) Browser-based applications
 - c) GUI applications
 - d) None of the above
- 6) Select the component which is NOT part of Selenium suite.
 - a) Selenium IDE
 - b) Selenium RC
 - c) Selenium Grid
 - d) Selenium Web
- 7) Which of the following is not a maturity level in CMM?
 - a) Design
 - b) Repeatable
 - c) Managed
 - d) Optimizing

- 8) What allows different projects to use the same source files at the same time?
- a) Version Control
 - b) Access control
 - c) CM Process
 - d) Version Control and Access control
- 9) Identify among the following which is not a type of incremental testing approach?
- a) Big Bang

Day & Date: Thursday, 16-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct option from the following. 14

- 1) In the expression, position = initial + rate * 60, how many operator tokens will get generated?

a) 4	b) 3
c) 6	d) 7
- 2) For specification of tokens _____ can be used.

a) Stack	b) regular expression
c) finite automata	d) queue
- 3) The role of lexical analyzer can be stated as _____.

a) Generate tokens	b) generate parse tree
c) Separate out blacks	d) both a and c
- 4) _____ is the least powerful bottom up parser.

a) SLR	b) LALR
c) Canonical LR	d) All of these
- 5) Consider the Given grammar:
G: S → aBCd, B → b, C → c Then FOLLOW (C) will contain _____.

a) a	b) b
c) c	d) d
- 6) In S attributed definition, the node can get the attributes from its _____.

a) Parent node	b) left sibling
c) right sibling	d) both a and b
e) all of these	
- 7) The bottom up evaluation of expression is done using _____.

a) array	b) linked list
c) Stack	d) queue

- 8) In the activation record, the details of callee procedure are stored in _____ field.
- a) temporaries
 - b) control link
 - c) access link
 - d) machine status
- 9) Collecting all free memory towards one end of memory block is called _____.
- a) Allocation
 - b) De allocation
 - c) Compaction
 - d) Conservation
- 10) The 3-address code has _____ addresses in one instruction.
- a) Exactly 3
 - b) At least 3
 - c) At most 3
 - d) all of these
- 11) Filling up the blank spaces after 3 address code generation in conditional statements is called _____.
- a) Forwarding
 - b) Back patching
 - c) Loop unrolling
 - d) none of these
- 12) The target code generation is based on various issues like _____.
- a) Register allocation
 - b) Instruction cost
 - c) Code generation from DAGs
 - d) both a and b
- 13) _____ is the only optional phase in compilation process.
- a) Lexical analysis
 - b) Semantic analysis
 - c) Code generation
 - d) Code optimization
- 14) Loop optimization can be done in which of the following ways?
- a) Code motion
 - b) Induction variable elimination
 - c) Loop unrolling
 - d) all of these

Set P

Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
COMPUTER SCIENCE AND ENGINEERING
Compiler Construction (BTN03702)

Day & Date: Thursday, 16-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary and mention it clearly.

Section – I

- Q.2 Attempt any Four. 16**
- a) Write a short note on compiler construction tools.
 - b) Explain roles of a lexical analyzer.
 - c) Explain Left factoring with example.
 - d) Explain bottom up evaluation of synthesized attributes.
 - e) Explain Operator precedence parser with example.
- Q.3 Attempt the following questions. 12**
- a) Explain recognition of tokens with example.
 - b) Explain SLR parser with example.

Section – II

- Q.4 Attempt any Four. 16**
- a) Explain symbol table management in detail.
 - b) Explain issues in design of code generator in detail.
 - c) Differentiate between static and stack allocation in detail.
 - d) Explain 3 address code generation for case statement.
 - e) Explain data flow equations with example.
- Q.5 Attempt the following questions. 12**
- a) Explain partitioning of basic blocks with example.
 - b) Explain various optimization techniques in detail.

Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
COMPUTER SCIENCE AND ENGINEERING
Compiler Construction (BTN03702)

Day & Date: Thursday, 16-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.
 4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct option from the following. 14

- 1) In the activation record, the details of callee procedure are stored in _____ field.

a) temporaries	b) control link
c) access link	d) machine status
- 2) Collecting all free memory towards one end of memory block is called _____.

a) Allocation	b) De allocation
c) Compaction	d) Conservation
- 3) The 3-address code has _____ addresses in one instruction.

a) Exactly 3	b) At least 3
c) At most 3	d) all of these
- 4) Filling up the blank spaces after 3 address code generation in conditional statements is called _____.

a) Forwarding	b) Back patching
c) Loop unrolling	d) none of these
- 5) The target code generation is based on various issues like _____.

a) Register allocation	
b) Instruction cost	
c) Code generation from DAGs	
d) both a and b	
- 6) _____ is the only optional phase in compilation process.

a) Lexical analysis	b) Semantic analysis
c) Code generation	d) Code optimization
- 7) Loop optimization can be done in which of the following ways?

a) Code motion
b) Induction variable elimination
c) Loop unrolling
d) all of these

 - c) Code generation
 - d) Code optimization
- 4) Loop optimization can be done in which of the following ways?
 - a) Code motion
 - b) Induction variable elimination
 - c) Loop unrolling
 - d) all of these
- 5) In the expression, position = initial + rate * 60, how many operator tokens will get generated?
 - a) 4
 - b) 3
 - c) 6
 - d) 7
- 6) For specification of tokens _____ can be used.
 - a) Stack
 - b) regular expression
 - c) finite automata
 - d) queue
- 7) The role of lexical analyzer can be stated as _____.
 - a) Generate tokens
 - b) generate parse tree
 - c) Separate out blacks
 - d) both a and c

- 8) _____ is the least powerful bottom up parser.
- a) SLR
 - b) LALR
 - c) Canonical LR
 - d) All of these
- 9) Consider the Given grammar:
G: $S \rightarrow aBCd$, $B \rightarrow b$, $C \rightarrow c$ Then FOLLOW (C) will contain _____
- a) a
 - b) b
 - c) c
 - d) d
- 10) In S attributed definition, the node can get the attributes from its _____.
- a) Parent node
 - b) left sibling
 - c) right sibling
 - d) both a and b
 - e) all of these
- 11) The bottom up evaluation of expression is done using _____
- a) array
 - b) linked list
 - c) Stack
 - d) queue
- 12) In the activation record, the details of callee procedure are stored in _____ field.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) K means and K-medoids are example of which type of clustering method?
 - a) Hierarchical
 - b) Partition
 - c) Probabilistic
 - d) None of the above
- 2) Indicate which is/are a method of clustering _____.
 - a) linkage method
 - b) split and merge
 - c) both a and b
 - d) neither a nor b
- 3) Which of the following statement is true about Business Intelligence?
 - a) BI convert raw data into meaningful information
 - b) BI has a direct impact on organization's strategic, tactical and operational business decisions.
 - c) BI tools perform data analysis and create reports, summaries, dashboards, maps, graphs, and charts
 - d) All of the above
- 4) Business intelligence equips enterprises to gain business advantage from data.
 - a) TRUE
 - b) FALSE
- 5) DSS stands for _____.
 - a) Definite Support System
 - b) Decision Support System
 - c) Defining Support System
 - d) Derived Support System
- 6) Match the sequence of DSS development _____.
 - a) Requirements, Analysis, Planning, Design, implementation, Delivery
 - b) Analysis, Requirements, Planning, Design, Implementation, Delivery
 - c) Requirements, Planning, Analysis, Design, Implementation, Delivery
 - d) Requirements, Planning, Design, Analysis, Implementation, Delivery
- 7) The term _____ indicates the whole set of interrelated activities involved in designing, implementing and using data warehouse.
 - a) Data Warehousing
 - b) Data Repository

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) Data can be store, retrieve and updated in _____.
 - a) SMTOP
 - b) FTP
 - c) OLAP
 - d) OLTP
- 2) The classification of the data mining system involves _____.
 - a) Machine learning
 - b) Database technology
 - c) Information Science
 - d) All of the above
- 3) If the coefficient of determination is a positive value, then the regression equation _____.
 - a) must have a positive slope
 - b) must have a negative slope
 - c) could have either a positive or a negative slope
 - d) must have a positive intercept
- 4) The most learning models benefit from a preventive standardization of the data is also called as _____.
 - a) Normalization
 - b) Extraction
 - c) Sampling
 - d) Transformation
- 5) According to forward search scheme, also referred as _____.
 - a) top-down
 - b) trade off
 - c) bottom-up
 - d) None
- 6) _____ analysis, in which the properties of each single attribute of a dataset are investigated.
 - a) bivariate
 - b) multivariate
 - c) both a and b
 - d) Univariate
- 7) A _____ is definitely the most intuitive graphical representation of the relationship between two numerical attributes.
 - a) Scatter plot
 - b) Loses plot
 - c) Quantile-Quantile plot
 - d) Level Curves
- 8) K means and K-medoids are example of which type of clustering method?
 - a) Hierarchical

 - b) multivariate
 - c) both a and b
 - d) Univariate
- 9) A _____ is definitely the most intuitive graphical representation of the relationship between two numerical attributes.
- a) Scatter plot
 - b) Loses plot
 - c) Quantile-Quantile plot
 - d) Level Curves
- 10) K means and K-medoids are example of which type of clustering method?
- a) Hierarchical
 - b) Partition
 - c) Probabilistic
 - d) None of the above
- 11) Indicate which is/are a method of clustering _____.
- a) linkage method
 - b) split and merge
 - c) both a and b
 - d) neither a nor b
- 12) Which of the following statement is true about Business Intelligence?
- a) BI convert raw data into meaningful information
 - b) BI has a direct impact on organization's strategic, tactical and operational business decisions.
 - c) BI tools perform data analysis and create reports, summaries, dashboards, maps, graphs, and charts
 - d) All of the above
- 13) Business intelligence equips enterprises to gain business advantage from data.
- a) TRUE
 - b) FALSE
- 14) DSS stands for _____.
- a) Definite Support System
 - b) Decision Support System
 - c) Defining Support System
 - d) Derived Support System

Set **S**

**Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
COMPUTER SCIENCE & ENGINEERING
Business Intelligence (BTN03706)**

Day & Date: Friday, 17-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

- Q.2 Attempt any three of the following** **12**
- What is role of Mathematical Model in decision making? Describe the benefits of a Business intelligence system.
 - How Data mining process provide useful knowledge to decision makers? Explain with neat diagram.
 - Explain OLAP.
 - Write a short note on Data exploration.
- Q.3 Attempt any one of the following.** **08**
- Draw architecture of business intelligence system and explain the components of business intelligence system.
 - What do you mean by Data validation? Explain techniques used for data validation.
- Q.4 Define Decision system. Describe the phases of Decision-making process in detail.** **08**

Section – II

- Q.5 Attempt any four of the following.** **16**
- Describe the purpose of Regression models and list the types of regression.
 - Write a short note on Neural Network.
 - Why exponential smoothing models are used?
 - Explain Autoregressive model.
 - Define clustering. Explain any one clustering technique.
- Q.6 Attempt any one of the following** **06**
- Define Time series. How evaluation and analysis of time series take place?
 - Explain Apriori algorithm & general association rules.
- Q.7 Explain any two marketing models with real time example of each.** **06**

Seat
No.

Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
COMPUTER SCIENCE AND ENGINEERING
Data Mining (BTN03707)

Day & Date: Friday, 17-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the given options. 14

- 1) Which of the following refers to the problem of finding abstracted patterns (or structures) in the unlabeled data?
 - a) Supervised learning
 - b) Unsupervised learning
 - c) Hybrid learning
 - d) Reinforcement learning
- 2) Which one of the following refers to querying the unstructured textual data?
 - a) Information access
 - b) Information update
 - c) Information retrieval
 - d) Information manipulation
- 3) Which of the following can be considered as the correct process of Data Mining?
 - a) Infrastructure, Exploration, Analysis, Interpretation, Exploitation
 - b) Exploration, Infrastructure, Analysis, Interpretation, Exploitation
 - c) Exploration, Infrastructure, Interpretation, Analysis, Exploitation
 - d) Exploration, Infrastructure, Analysis, Exploitation, Interpretation
- 4) Which of the following is an essential process in which the intelligent methods are applied to extract data patterns?
 - a) Warehousing
 - b) Data Mining
 - c) Text Mining
 - d) Data Selection
- 5) What is KDD in data mining?
 - a) Knowledge Discovery Database
 - b) Knowledge Discovery Data
 - c) Knowledge Data definition
 - d) Knowledge data house
- 6) What are the functions of Data Mining?
 - a) Association and correctional analysis classification
 - b) Prediction and characterization
 - c) Cluster analysis and Evolution analysis
 - d) All of the above

- 7) Which one of the following statements about the K-means clustering is incorrect?
- The goal of the k-means clustering is to partition (n) observation into (k) clusters
 - K-means clustering can be defined as the method of quantization
 - The nearest neighbor is the same as the K-means
 - All of the above
- 8) The following given statement can be considered as the examples of _____. Suppose one wants to predict the number of newborns according to the size of storks' population by performing supervised learning.
- Structural equation modeling
 - Clustering
 - Regression
 - Classification
- 9) Which of the following statement is true about the classification?
- It is a measure of accuracy
 - It is a subdivision of a set
 - It is the task of assigning a classification
 - None of the above
- 10) Which of the following can be considered as the classification or mapping of a set or class with some predefined group or classes?
- | | |
|-----------------------|--------------------------|
| a) Data set | b) Data Characterization |
| c) Data Sub Structure | d) Data Discrimination |
- 11) The analysis performed to uncover the interesting statistical correlation between associated attributes value pairs are known as the _____.
- | | |
|--------------------------|--------------------------|
| a) Mining of association | b) Mining of correlation |
| c) Mining of clusters | d) All of the above |
- 12) Which one of the following can be defined as the data object which does not comply with the general behavior (or the model of available data)?
- | | |
|------------------------|----------------------|
| a) Evaluation Analysis | b) Outliner Analysis |
| c) Classification | d) Prediction |
- 13) Which one of the following statements is not correct about the data cleaning?
- It refers to the process of data cleaning
 - It refers to the transformation of wrong data into correct data
 - It refers to correcting inconsistent data
 - All of the above
- 14) The issues like efficiency, scalability of data mining algorithms comes under _____.
- Performance issues
 - Diverse data type issues
 - Mining methodology and user interaction
 - All of the above

Seat No.

**Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
COMPUTER SCIENCE AND ENGINEERING
Data Mining (BTN03707)**

Day & Date: Friday, 17-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any Three. 12

- Summarize the KDD process in detail.
- Compare supervise and unsupervised machine learning.
- Elaborate Histogram with example.
- How data transformation is achieved using normalization?

Q.3 Attempt any Two. 16

- Suppose a group of 12 sales price records has been sorted as follows
5, 10, 11, 13, 15, 35, 50, 55, 72, 92, 204, 215
Partition them into three bins by each of the following methods:
 - equal-frequency (equal-depth) partitioning
 - equal-width partitioning
 - clustering
- Apply Apriori Algorithm in Data Mining for the following dataset. Consider threshold support level of over 50 percent.

Transaction ID	Rice	Pulse	Oil	Milk	Apple
t1	1	1	1	0	0
t2	0	1	1	1	0
t3	0	0	0	1	1
t4	1	1	0	1	0
t5	1	1	1	0	1
t6	1	1	1	1	1

- What are the major tasks involved in data preprocessing?

Section – II

Q.4 Attempt any Three. 12

- How are structure, content and usage dealt with in web mining?
- State the difference Between Data Mining and Web Mining.
- Explain Text Mining in Data Mining.
- Discuss - Challenges of Outlier Detection in Data Mining.

Q.5 Attempt any Two. 16

- Illustrate the Partition algorithm with example.
- What do you mean by Web Crawler? Elaborate the process of Web Crawler. List the names of web crawlers used by various search engines.
- Elaborate the types of outliers. Identify an outlier using clustering-based outlier detection method with suitable example.

 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) What is meant by transparency in a distributed system?
 - a) The system is invisible to the end users
 - b) The system is easy to see and understand
 - c) The system hides its complexity from the users and applications
 - d) The system is transparent in terms of cost and pricing
- 2) The local operating system on the server machine passes the incoming packets to the _____.
 - a) client stub
 - b) server stub
 - c) client operating system
 - d) client process
- 3) Which of the following is an example of a distributed computing framework commonly used for big data processing?
 - a) Microsoft Excel
 - b) Apache Hadoop
 - c) Microsoft Word
 - d) Adobe Photoshop
- 4) What is the CAP theorem in distributed systems?
 - a) It describes the characteristics of a good consistency in a distributed environment.
 - b) It states that a distributed system cannot simultaneously guarantee Consistency, Availability, and Partition tolerance.
 - c) It is a theorem about the behavior of distributed systems under high load.
 - d) It is a theorem about cryptography in distributed systems
- 5) In a distributed database system, what is data fragmentation?
 - a) Breaking data into smaller pieces for efficient storage and retrieval
 - b) Encrypting data to protect it from unauthorized access
 - c) Creating multiple copies of the data for redundancy
 - d) Combining data from different sources into a single database

- 6) What is a load balancer in a distributed system?
- a) A device or software component that evenly distributes network traffic across multiple servers or resources to ensure high availability and reliability.
 - b) A component that synchronizes the clocks of all computers in the network.
 - c) A tool for measuring the network bandwidth.
 - d) A firewall that protects the network from external threats.
- 7) What is a distributed consensus algorithm used to achieve fault tolerance in a distributed system?
- a) SQL
 - b) NoSQL
 - c) Blockchain
 - d) Docker
- 8) Which of the following is a key characteristic of a distributed system?
- a) Centralized control
 - b) Limited scalability
 - c) Low fault tolerance
 - d) Decentralized control
- 9) Which communication model is commonly used in distributed systems to facilitate inter-process communication?
- a) Synchronous communication
 - b) Asynchronous communication
 - c) Serial communication
 - d) Parallel communication
- 10) If a is the event of sending a message and b is the event of receiving a message then which condition is not satisfied by Happened-before relation?
- a) $a \rightarrow b$
 - b) If $a \rightarrow b$, $b \rightarrow c$, then $a \rightarrow c$
 - c) $a \rightarrow a$
 - d) None of the mentioned
- 11) In a distributed system, what is the role of a naming service?
- a) It assigns names to processes and resources in a consistent manner.
 - b) It manages the distribution of software updates.
 - c) It ensures that all processes run on the same machine.
 - d) It is responsible for load balancing.
- 12) What is the purpose of a distributed file system?
- a) To organize files on a single server
 - b) To store files across multiple servers for fault tolerance and scalability
 - c) To encrypt files during transmission
 - d) To compress files for efficient storage
- 13) What is a primary benefit of using distributed systems?
- a) Lower cost
 - b) Centralized control
 - c) Improved fault tolerance
 - d) Simplicity of management
- 14) _____ is not possible in distributed file system.
- a) File replication
 - b) Migration
 - c) Client interface
 - d) Remote access

Set **P**

Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
COMPUTER SCIENCE AND ENGINEERING
Distributed Systems (BTN03708)

Day & Date: Friday, 17-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

Instructions: 1) All questions are compulsory.
 2) Figures to the right indicate full marks.

Section – I

- Q.2 Attempt any three of the following. 12**
- a) Compare distributed systems with network operating system?
 - b) With diagram explain workstation-server model of distributed systems
 - c) What is process migration? List the steps involved in process migration.
 - d) With example illustrate the implementation of logical clocks using counters.
- Q.3 Attempt any one of the following. 08**
- a) What is non-idempotent routine? Give examples of idempotent and non-idempotent routines.
 - b) How does message passing differ from shared memory in distributed systems? Explain in detail.
- Q.4 What is a Remote Procedure Call (RPC)? How does RPC work? What are the components of an RPC system? What is the purpose of the stub in RPC? 08**

Section – II

- Q.5 Attempt any three of the following. 12**
- a) What is Distributed Mutual Exclusion, and why is it important in distributed systems?
 - b) Explain with diagram Richard Agarwala's algorithm for achieving Distributed Mutual Exclusion,
 - c) What are the trade-offs and performance considerations when choosing a specific Distributed Mutual Exclusion algorithm for a distributed system?
 - d) What is the difference between centralized and distributed deadlock detection?
- Q.6 Attempt any one of the following. 08**
- a) What are the key challenges in designing and implementing a Distributed File System?
 - b) Discuss the relative advantages and disadvantages of using full file caching and block caching models for the data caching mechanism of a distributed file system.
- Q.7 Explain the algorithms used for the implementation of Distributed shared memory. 08**

Seat No.

**Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
COMPUTER SCIENCE AND ENGINEERING
Distributed Systems (BTN03708)**

Day & Date: Friday, 17-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) Which of the following is a key characteristic of a distributed system?
 - a) Centralized control
 - b) Limited scalability
 - c) Low fault tolerance
 - d) Decentralized control
- 2) Which communication model is commonly used in distributed systems to facilitate inter-process communication?
 - a) Synchronous communication
 - b) Asynchronous communication
 - c) Serial communication
 - d) Parallel communication
- 3) If a is the event of sending a message and b is the event of receiving a message then which condition is not satisfied by Happened-before relation?
 - a) $a \rightarrow b$
 - b) If $a \rightarrow b$, $b \rightarrow c$, then $a \rightarrow c$
 - c) $a \rightarrow a$
 - d) None of the mentioned
- 4) In a distributed system, what is the role of a naming service?
 - a) It assigns names to processes and resources in a consistent manner.
 - b) It manages the distribution of software updates.
 - c) It ensures that all processes run on the same machine.
 - d) It is responsible for load balancing.
- 5) What is the purpose of a distributed file system?
 - a) To organize files on a single server
 - b) To store files across multiple servers for fault tolerance and scalability
 - c) To encrypt files during transmission
 - d) To compress files for efficient storage
- 6) What is a primary benefit of using distributed systems?
 - a) Lower cost
 - b) Centralized control
 - c) Improved fault tolerance
 - d) Simplicity of management
- 7) _____ is not possible in distributed file system.
 - a) File replication
 - b) Migration
 - c) Client interface
 - d) Remote access

- 8) What is meant by transparency in a distributed system?
- a) The system is invisible to the end users
 - b) The system is easy to see and understand
 - c) The system hides its complexity from the users and applications
 - d) The system is transparent in terms of cost and pricing
- 9) The local operating system on the server machine passes the incoming packets to the _____.
- a) client stub
 - b) server stub
 - c) client operating system
 - d) client process
- 10) Which of the following is an example of a distributed computing framework commonly used for big data processing?
- a) Microsoft Excel
 - b) Apache Hadoop
 - c) Microsoft Word
 - d) Adobe Photoshop
- 11) What is the CAP theorem in distributed systems?
- a) It describes the characteristics of a good consistency in a distributed environment.
 - b) It states that a distributed system cannot simultaneously guarantee Consistency, Availability, and Partition tolerance.
 - c) It is a theorem about the behavior of distributed systems under high load.
 - d) It is a theorem about cryptography in distributed systems
- 12) In a distributed database system, what is data fragmentation?
- a) Breaking data into smaller pieces for efficient storage and retrieval
 - b) Encrypting data to protect it from unauthorized access
 - c) Creating multiple copies of the data for redundancy
 - d) Combining data from different sources into a single database
- 13) What is a load balancer in a distributed system?
- a) A device or software component that evenly distributes network traffic across multiple servers or resources to ensure high availability and reliability.
 - b) A component that synchronizes the clocks of all computers in the network.
 - c) A tool for measuring the network bandwidth.
 - d) A firewall that protects the network from external threats.
- 14) What is a distributed consensus algorithm used to achieve fault tolerance in a distributed system?
- a) SQL
 - b) NoSQL
 - c) Blockchain
 - d) Docker

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) In a distributed system, what is the role of a naming service?
 - a) It assigns names to processes and resources in a consistent manner.
 - b) It manages the distribution of software updates.
 - c) It ensures that all processes run on the same machine.
 - d) It is responsible for load balancing.
- 2) What is the purpose of a distributed file system?
 - a) To organize files on a single server
 - b) To store files across multiple servers for fault tolerance and scalability
 - c) To encrypt files during transmission
 - d) To compress files for efficient storage
- 3) What is a primary benefit of using distributed systems?

a) Lower cost	b) Centralized control
c) Improved fault tolerance	d) Simplicity of management
- 4) _____ is not possible in distributed file system.

a) File replication	b) Migration
c) Client interface	d) Remote access
- 5) What is meant by transparency in a distributed system?
 - a) The system is invisible to the end users
 - b) The system is easy to see and understand
 - c) The system hides its complexity from the users and applications
 - d) The system is transparent in terms of cost and pricing
- 6) The local operating system on the server machine passes the incoming packets to the _____.

a) client stub	b) server stub
c) client operating system	d) client process
- 7) Which of the following is an example of a distributed computing framework commonly used for big data processing?

a) Microsoft Excel	b) Apache Hadoop
c) Microsoft Word	d) Adobe Photoshop

- 8) What is the CAP theorem in distributed systems?
- a) It describes the characteristics of a good consistency in a distributed environment.
 - b) It states that a distributed system cannot simultaneously guarantee Consistency, Availability, and Partition tolerance.
 - c) It is a theorem about the behavior of distributed systems under high load.
 - d) It is a theorem about cryptography in distributed systems
- 9) In a distributed database system, what is data fragmentation?
- a) Breaking data into smaller pieces for efficient storage and retrieval
 - b) Encrypting data to protect it from unauthorized access
 - c) Creating multiple copies of the data for redundancy
 - d) Combining data from different sources into a single database
- 10) What is a load balancer in a distributed system?
- a) A device or software component that evenly distributes network traffic across multiple servers or resources to ensure high availability and reliability.
 - b) A component that synchronizes the clocks of all computers in the network.
 - c) A tool for measuring the network bandwidth.
 - d) A firewall that protects the network from external threats.
- 11) What is a distributed consensus algorithm used to achieve fault tolerance in a distributed system?
- a) SQL
 - b) NoSQL
 - c) Blockchain
 - d) Docker
- 12) Which of the following is a key characteristic of a distributed system?
- a) Centralized control
 - b) Limited scalability
 - c) Low fault tolerance
 - d) Decentralized control

 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) A TPS is commonly known as, _____.
 a) Trained Processing System b) Transaction Processing System
 c) Trainee presentable System d) None of the above
- 2) The _____ can help you choose a product.
 a) office automation system
 b) management information system
 c) transaction processing system
 d) decision support system
- 3) Information systems that are developed in response to corporate business initiative are _____.
 a) Marketing Information System
 b) Management Information System
 c) Strategic Information System
 d) None of these
- 4) A Strategic Management Information System offers _____.
 a) Business intelligence b) Organization flow
 c) Process enhancement d) Process flow
- 5) Which of the following is an ethical way for organizations to handle a MIS?
 a) Hire the best private security to protect the information.
 b) Place a sign in the office that all hackers will be prosecuted.
 c) Place the MIS behind a firewall and protect it from hackers.
 d) Place a big sign in front that says they have a protected MIS system.
- 6) _____ is the first step in system development life cycle.
 a) Planning b) Designing
 c) Analysis d) Implementation

- 7) The information of MIS comes from the boot _____ source.
- a) Internal
 - b) External
 - c) Superficial
 - d) Internal and external
- 8) Which type of infrastructure service stores and manages corporate data and provides capabilities for analyzing the data?
- a) Networking
 - b) Telecommunication
 - c) Data Management
 - d) VOIP
- 9) Business intelligence (BI) is a broad category of application programs which includes _____.
- a) Decision Support
 - b) Data mining
 - c) OLAP
 - d) All of the mentioned
- 10) _____ is the practice and precautions taken to protect valuable information from unauthorized access, recording, disclosure or destruction.
- a) Network Security
 - b) Database Security
 - c) Information Security
 - d) Physical Security
- 11) ERP supports _____ currency Value.
- a) Multiple
 - b) Single
 - c) Two
 - d) Five
- 12) Which dimension of e-commerce enables commerce beyond the boundaries of the country?
- a) Richness
 - b) Interactivity
 - c) Global reach
 - d) Ubiquity
- 13) Which of the following is not a current application of m-commerce?
- a) Phone Zagat
 - b) Red Laser
 - c) JoJo Contactless Payment Service
 - d) Zynga Farmer Exchange
- 14) During a DoS attack, the regular traffic on the target _____ will be either dawdling down or entirely interrupted.
- a) Network
 - b) System
 - c) Website
 - d) Router

Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
COMPUTER SCIENCE AND ENGINEERING
Management Information System (BTN03709)

Day & Date: Friday, 17-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any Four. 16

- What is Management Information Systems? Explain its characteristics.
- Explain System for Collaboration & Social business.
- Explain the concept of Strategic Information System.
- What are major problem areas in information System?
- How MIS supports to the management in Organization?

Q.3 Attempt any Two. 12

- Explain in detail FIVE Moral dimensions of the Information Age.
- Explain in detail Tools and technologies for collaboration and social business.
- What are different application of MIS in Various functional areas?

Section – II

Q.4 Attempt any Four. 16

- What is IT infrastructure & explain its components?
- Explain in detail Firewall.
- Explain tools of Security Management.
- Explain M-Commerce in details.
- List and describe problem of traditional file environment.

Q.5 Attempt any Two. 12

- Explain in detail Contemporary Software Platform Trends.
- Explain E-commerce business Model.
- What are the principles technologies and standards for wireless networking & Internet access?

2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any Four. 16

- What is Management Information Systems? Explain its characteristics.
- Explain System for Collaboration & Social business.
- Explain the concept of Strategic Information System.
- What are major problem areas in information System?
- How MIS supports to the management in Organization?

Q.3 Attempt any Two. 12

- Explain in detail FIVE Moral dimensions of the Information Age.
- Explain in detail Tools and technologies for collaboration and social business.
- What are different application of MIS in Various functional areas?

Section – II

Q.4 Attempt any Four. 16

- What is IT infrastructure & explain its components?
- Explain in detail Firewall.
- Explain tools of Security Management.
- Explain M-Commerce in details.
- List and describe problem of traditional file environment.

Q.5 Attempt any Two. 12

- Explain in detail Contemporary Software Platform Trends.
- Explain E-commerce business Model.
- What are the principles technologies and standards for wireless networking & Internet access?

Seat No.

**Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
COMPUTER SCIENCE AND ENGINEERING
Management Information System (BTN03709)**

Day & Date: Friday, 17-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) ERP supports _____ currency Value.
 - a) Multiple
 - b) Single
 - c) Two
 - d) Five

- 2) Which dimension of e-commerce enables commerce beyond the boundaries of the country?
 - a) Richness
 - b) Interactivity
 - c) Global reach
 - d) Ubiquity

- 3) Which of the following is not a current application of m-commerce?
 - a) Phone Zagat
 - b) Red Laser
 - c) JoJo Contactless Payment Service
 - d) Zynga Farmer Exchange

- 4) During a DoS attack, the regular traffic on the target _____ will be either dawdling down or entirely interrupted.
 - a) Network
 - b) System
 - c) Website
 - d) Router

- 5) A TPS is commonly known as, _____.
 - a) Trained Processing System
 - b) Transaction Processing System
 - c) Trainee presentable System
 - d) None of the above

- 6) The _____ can help you choose a product.
 - a) office automation system
 - b) management information system
 - c) transaction processing system
 - d) decision support system

- 7) Information systems that are developed in response to corporate business initiative are _____.
 - a) Marketing Information System
 - b) Management Information System
 - c) Strategic Information System
 - d) None of these

- 8) A Strategic Management Information System offers _____.
- a) Business intelligence
 - b) Organization flow
 - c) Process enhancement
 - d) Process flow
- 9) Which of the following is an ethical way for organizations to handle a MIS?
- a) Hire the best private security to protect the information.
 - b) Place a sign in the office that all hackers will be prosecuted.
 - c) Place the MIS behind a firewall and protect it from hackers.
 - d) Place a big sign in front that says they have a protected MIS system.
- 10) _____ is the first step in system development life cycle.
- a) Planning
 - b) Designing
 - c) Analysis
 - d) Implementation
- 11) The information of MIS comes from the boot _____ source.
- a) Internal
 - b) External
 - c) Superficial
 - d) Internal and external
- 12) Which type of infrastructure service stores and manages corporate data and provides capabilities for analyzing the data?
- a) Networking
 - b) Telecommunication
 - c) Data Management
 - d) VOIP
- 13) Business intelligence (BI) is a broad category of application programs which includes _____.
- a) Decision Support
 - b) Data mining
 - c) OLAP
 - d) All of the mentioned
- 14) _____ is the practice and precautions taken to protect valuable information from unauthorized access, recording, disclosure or destruction.
- a) Network Security
 - b) Database Security
 - c) Information Security
 - d) Physical Security

Instructions: 1) All questions are compulsory.
 2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any Four. **16**

- a) What is Management Information Systems? Explain its characteristics.
- b) Explain System for Collaboration & Social business.
- c) Explain the concept of Strategic Information System.
- d) What are major problem areas in information System?
- e) How MIS supports to the management in Organization?

Q.3 Attempt any Two. **12**

- a) Explain in detail FIVE Moral dimensions of the Information Age.
- b) Explain in detail Tools and technologies for collaboration and social business.
- c) What are different application of MIS in Various functional areas?

Section – II

Q.4 Attempt any Four. **16**

- a) What is IT infrastructure & explain its components?
- b) Explain in detail Firewall.
- c) Explain tools of Security Management.
- d) Explain M-Commerce in details.
- e) List and describe problem of traditional file environment.

Q.5 Attempt any Two. **12**

- a) Explain in detail Contemporary Software Platform Trends.
- b) Explain E-commerce business Model.
- c) What are the principles technologies and standards for wireless networking & Internet access?

- 8) HDFS stores data in a distributed manner, the data can be processed in parallel on a ____ of nodes.
- a) Cluster
 - b) Data Node
 - c) Master Node
 - d) None of the mentioned above
- 9) Apache Cassandra is a massively scalable open source _____ database.
- a) SQL
 - b) NoSQL
 - c) NewSQL
 - d) All
- 10) The data model available within MongoDB allows us to represent _____.
- a) Hierarchical relationships
 - b) Able to handle complex structures
 - c) Both a and b
 - d) None of the mentioned above
- 11) A record in MongoDB is a _____.
- a) Document
 - b) Table
 - c) Application
 - d) None of the mentioned above
- 12) In order to interact with HDFS, a command line interface named _____ is provided.
- a) HDFS Shell
 - b) DFS Shell
 - c) K Shell
 - d) FS Shell
- 13) The MapReduce framework is responsible for processing one or more pieces of data and producing the output results as _____.
- a) Maptask
 - b) Task execution
 - c) Mapper
 - d) All of the mentioned above
- 14) NoSQL is not a _____.
- a) Relational database
 - b) Network database
 - c) Communication set
 - d) None of the mentioned above

Set **P**

Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
COMPUTER SCIENCE & ENGINEERING
Big Data Analytics (BTN03711)

Day & Date: Saturday, 18-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
 2) Figures to the right indicate full marks.
 3) Assume suitable data if necessary.

Section – I

- Q.2 Attempt any four of the following questions. 16**
- What are different challenges with Big data?
 - Write a short note on Big data stack.
 - What are different ways/issues to deal unstructured data?
 - Write short note on Data Science. Give different responsibilities of a Data Scientist.
 - Explain YARN architecture in detail.
- Q.3 Attempt any two of the following questions. 12**
- What is Digital Data? Explain different types of Digital data.
 - What is Hadoop and explain its components in detail.
 - Short note on NoSQL and NewSQL database and give its difference with RDBMS.

Section – II

- Q.4 Attempt any four of the following questions. 16**
- Write MongoDB query for an objective given below.
 Create a collection “food” and insert 5 documents into the food collection by “_id” and “fruits” array.
 Check these documents are present in food collection.
 Find that document from food collection where “grapes” is present in 2nd index position of the fruit array.
 - Explain different features of Cassandra in detail.
 - Explain Hive User defined Function with example.
 - Give different key features of Pig.
 - Explain Counter and Alter command in Cassandra.
- Q.5 Attempt any two of the following questions. 12**
- Explain different CRUD operations in MongoDB with examples.
 - Write HQL (HIVE QUERY LANGUAGE) queries along with its syntax for the following.
 - Create a table named student having fields.
 {Rollno, name, year, department}
 - Insert the data of three students from text file using LOAD statement.
 - Add three partitions to the table and rename them to SY, TY, and Final year.
 - Drop a partition Final year from the table.
 - Give word count example using Pig.

 - c) Application
 - d) None of the mentioned above
- 5) In order to interact with HDFS, a command line interface named _____ is provided.
 - a) HDFS Shell
 - b) DFS Shell
 - c) K Shell
 - d) FS Shell
- 6) The MapReduce framework is responsible for processing one or more pieces of data and producing the output results as _____.
 - a) Maptask
 - b) Task execution
 - c) Mapper
 - d) All of the mentioned above
- 7) NoSQL is not a _____.
 - a) Relational database
 - b) Network database
 - c) Communication set
 - d) None of the mentioned above
- 8) Data that does not conform to a data model or data schema is known as _____.
 - a) Structured data
 - b) Unstructured data
 - c) Semi-structured data
 - d) All

- 9) _____ involves the simultaneous execution of multiple sub-tasks that collectively comprise a larger task.
- a) Parallel data processing
 - b) Single channel processing
 - c) Multi data processing
 - d) None of the mentioned above
- 10) Amongst which of the following is/are the cloud deployment models?
- a) Public Cloud
 - b) Private Cloud
 - c) Hybrid Cloud
 - d) All of the mentioned
- 11) MongoDB support cross platform and is written in _____ language.
- a) Python
 - b) C++
 - c) R
 - d) Java
- 12) _____ is the supporting physical infrastructure is fundamental to the operation and scalability of big data architecture.
- a) Redundant physical infrastructure
 - b) Integrated System
 - c) Integrated Database
 - d) All of the mentioned above
- 13) Amongst which of the following is / are correct?
- a) Hive is a relational database that supports SQL queries.
 - b) Pig is a relational database that supports SQL queries.
 - c) Both a and b
 - d) None of the mentioned above
- 14) Apache Hive is a data _____ infrastructure that is built on top of the Hadoop platform.

 - d) Give different key features of Pig.
 - e) Explain Counter and Alter command in Cassandra.
- Q.5 Attempt any two of the following questions. 12**
- a) Explain different CRUD operations in MongoDB with examples.
 - b) Write HQL (HIVE QUERY LANGUAGE) queries along with its syntax for the following.
 - a) Create a table named student having fields.
 {Rollno, name, year, department}
 - b) Insert the data of three students from text file using LOAD statement.
 - c) Add three partitions to the table and rename them to SY, TY, and Final year.
 - d) Drop a partition Final year from the table.
 - c) Give word count example using Pig.

Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
COMPUTER SCIENCE AND ENGINEERING
Deep Learning (BTN03713)

Day & Date: Sunday 19-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:**
- 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 - 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 - 3) Figures to the right indicates full marks.
 - 4) Assume data wherever necessary

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) What does LSTM stand for?
 - a) Long Short Term Memory
 - b) Least Squares Term Memory
 - c) Least Square Time Mean
 - d) Long Short Threshold Memory
- 2) Which of the following functions can be used as an activation function in the output layer if we wish to predict the probabilities of n classes (p_1, p_2, \dots, p_n) such that sum of p over all n equals to 1?

a) Softmax	b) ReLu
c) Sigmoid	d) Tanh
- 3) Dimensionality reduction does _____.

a) reduce computational time	b) may lead to some data loss
c) remove redundant feature	d) all
- 4) K-fold cross-validation is _____.

a) linear in K	b) quadratic in K
c) cubic in K	d) exponential in K
- 5) What is the best Neural Network Model for Temporal Data?

a) Recurrent Neural Network	b) Convolution Neural Networks
c) Temporal Neural Networks	d) Multi-Layer perceptions
- 6) De-noising and Contractive are examples of _____.

a) Auto encoders	b) Convolution Neural Networks
c) Recurrent Neural Networks	d) None
- 7) The reuse of a pre-trained model on a new problem is known as _____.

a) Learning rate	b) Bias
c) Variance	d) Transfer learning

Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
COMPUTER SCIENCE AND ENGINEERING
Deep Learning (BTN03713)

Day & Date: Sunday 19-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

Instructions: 1) All questions are compulsory.
 2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any four **16**

- a) Write differences between LOOCV and K fold cross validation.
- b) Assume we have two variables, P and Q and we wish to find their relation. A line of equation tell us that $P = mQ + c$. Suppose the samples of the variables P and Q are available to us. Is it possible to apply linear regression to this data to estimate the values of m and c ? Justify your answers.
- c) Assume a simple deep learning model with 3 neurons and inputs= 1,2,3 The weights to the input neurons are 4,5 and 8 respectively. Assume the activation function is a linear constant value of 2. calculate the output?
- d) Enlist the different platform for deep learning.
- e) Write differences between underfitting and overfitting.

Q.3 Attempt any one **06**

- a) What is drawback of RNN? How t is overcome by LSTM. Explain it in details.
- b) Discuss different types of hyper parameter.

Q.4 Attempt the following **06**

Explain different types of activation functions.

Section – II

Q.5 Attempt any four **16**

- a) Explain Siamese Networks.
- b) Explain Metric Learning.
- c) Explain denoising auto encoder.
- d) Write short note on Bidirectional LSTM.
- e) Explain the use of auto encoder in dimensionality reduction & classification.

Q.6 Attempt any one. **06**

- a) Define Transfer Learning. Explain in detail.
- b) Explain SGD optimizer for CNNs.

Q.7 Attempt the following **06**

Write a short note on RNN Topologies.

Seat No.

 4) Assume data wherever necessary

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) CNN is mostly used when there is an?
 - a) structured data
 - b) unstructured data
 - c) Both A and B
 - d) None of the above
- 2) After training a neural network, you observe a large gap between the training accuracy (100%) and the test accuracy (42%). Which of the following methods is commonly used to reduce this gap?
 - a) Generative adversarial network
 - b) Sigmoid function
 - c) RMSProp Optimizer
 - d) Dropout
- 3) Which of the following statement is true regarding dropout?
 - 1) Dropout gives a way to approximate by combining many different architectures
 - 2) Dropout demands high learning rates
 - 3) Dropout can help preventing overfitting
 - a) Both 1 and 2
 - b) Both 1 and 3
 - c) Both 2 and 3
 - d) All 1, 2 and 3
- 4) IN Neural Network The input from Input layer is then feed into the _____.
 - a) Input layer
 - b) Output layer
 - c) Hidden layer
 - d) None of these
- 5) _____ computes the output volume by computing dot product between all filters and image patch.
 - a) Input Layer
 - b) Convolution Layer
 - c) Activation Function Layer
 - d) Pooling Layer
- 6) _____ Types of transfer learning.
 - a) Inductive transfer learning
 - b) Transductive transfer learning
 - c) Both A and B
 - d) none of the above
- 7) The rate at which cost changes with respect to weight or bias is called _____.
 - a) Derivative
 - b) Gradient
 - c) Rate of change
 - d) Loss

- 8) What does LSTM stand for?
a) Long Short Term Memory
b) Least Squares Term Memory
c) Least Square Time Mean
d) Long Short Threshold Memory
- 9) Which of the following functions can be used as an activation function in the output layer if we wish to predict the probabilities of n classes (p_1, p_2, \dots, p_n) such that sum of p over all n equals to 1?
a) Softmax
b) ReLu
c) Sigmoid
d) Tanh

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) _____ refers to the ability to turn your data useful for business.
 - a) Velocity
 - b) Variety
 - c) Value
 - d) None of the above
- 2) Which of the following is a measure of how well a machine learning model is able to make predictions on new data?
 - a) Accuracy
 - b) Precision
 - c) Recall
 - d) All of the above
- 3) In descriptive statistics, data from the entire population or a sample is summarized with _____.
 - a) Decimal descriptor
 - b) Numerical descriptor
 - c) Integer descriptor
 - d) All of the above
- 4) The Process of describing the data that is huge and complex to store and process is known as _____.
 - a) Analytics mining
 - b) Big Data
 - c) Data cleaning
 - d) None of the above
- 5) Amongst which of the following is / are the types of predictive analytics techniques?
 - a) Predictive models
 - b) Descriptive models
 - c) Decision models
 - d) All of the mentioned above
- 6) Machine learning in predictive analytics uses to enable computers to learn without being explicitly programmed by building algorithms that can receive _____ and use statistics to predict an output.
 - a) Input data
 - b) Output data
 - c) Process data
 - d) All of the mentioned above
- 7) Which of the following is not a major data analysis approaches?
 - a) Business Intelligence
 - b) Predictive Intelligence
 - c) Data Mining
 - d) Text Analytics

- 8) Data Analysis is a process of?
a) Inspecting
b) Data transforming
c) Data Cleaning
d) All of the above
- 9) Predictive analytics uses statistics and _____ to determine future performance.
a) Algorithmic Techniques
b) Modeling Techniques
c) System development and design Techniques
d) None of the mentioned above
- 10) Organizations are turning to predictive analytics to increase their bottom line and competitive advantage.
a) True
b) False
- 11) Which of the following is a technique used to extract meaningful insights from data sets that are too large or complex to be processed by traditional data processing tools?
a) Business Intelligence
b) Machine Learning
c) Artificial Intelligence
d) Data Science
- 12) What could be the possible reason(s) for producing two different dendrograms using an agglomerative clustering algorithm for the same dataset?
a) Proximity function used
b) data points used
c) Variables used
d) All of Above
- 13) Which of the following clustering requires merging approach?
a) Partitional
b) Hierarchical
c) Naive Bayes
d) none of the mentioned
- 14) Which attribute selection measure is used in the ID3 algorithm?
a) Gini Index
b) Entropy
c) Information Gain
d) Chi-square

 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) Which of the following is a technique used to extract meaningful insights from data sets that are too large or complex to be processed by traditional data processing tools?
 - a) Business Intelligence
 - b) Machine Learning
 - c) Artificial Intelligence
 - d) Data Science
- 2) What could be the possible reason(s) for producing two different dendrograms using an agglomerative clustering algorithm for the same dataset?
 - a) Proximity function used
 - b) data points used
 - c) Variables used
 - d) All of Above
- 3) Which of the following clustering requires merging approach?
 - a) Partitional
 - b) Hierarchical
 - c) Naive Bayes
 - d) none of the mentioned
- 4) Which attribute selection measure is used in the ID3 algorithm?
 - a) Gini Index
 - b) Entropy
 - c) Information Gain
 - d) Chi-square
- 5) _____ refers to the ability to turn your data useful for business.
 - a) Velocity
 - b) Variety
 - c) Value
 - d) None of the above
- 6) Which of the following is a measure of how well a machine learning model is able to make predictions on new data?
 - a) Accuracy
 - b) Precision
 - c) Recall
 - d) All of the above
- 7) In descriptive statistics, data from the entire population or a sample is summarized with _____.
 - a) Decimal descriptor
 - b) Numerical descriptor
 - c) Integer descriptor
 - d) All of the above
- 8) The Process of describing the data that is huge and complex to store and process is known as _____.
 - a) Analytics mining
 - b) Big Data
 - c) Data cleaning
 - d) None of the above

- 9) Amongst which of the following is / are the types of predictive analytics techniques?
- a) Predictive models
 - b) Descriptive models
 - c) Decision models
 - d) All of the mentioned above
- 10) Machine learning in predictive analytics uses to enable computers to learn without being explicitly programmed by building algorithms that can receive _____ and use statistics to predict an output.
- a) Input data
 - b) Output data
 - c) Process data
 - d) All of the mentioned above
- 11) Which of the following is not a major data analysis approaches?
- a) Business Intelligence
 - b) Predictive Intelligence
 - c) Data Mining
 - d) Text Analytics
- 12) Data Analysis is a process of?
- a) Inspecting
 - b) Data transforming
 - c) Data Cleaning
 - d) All of the above
- 13) Predictive analytics uses statistics and _____ to determine future performance.
- a) Algorithmic Techniques
 - b) Modeling Techniques
 - c) System development and design Techniques
 - d) None of the mentioned above
- 14) Organizations are turning to predictive analytics to increase their bottom line and competitive advantage.
- a) True
 - b) False

Seat No.

Set R

Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
COMPUTER SCIENCE AND ENGINEERING
Predictive Analytics (BTN03715)

Day & Date: Sunday 19-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

- Q.2 Attempt any four. 16**
- a) What is Predictive Analytics? Explain Advantages and strategies of predictive Analytics.
 - b) Explain Target marketing with example.
 - c) Explain complexities in searching data.
 - d) Explain Big Data.
 - e) Write a short note on: Surveying Marketplace.
- Q.3 Attempt any two. 12**
- a) Explain recommender system.
 - b) Differentiating Business Intelligence from Big-Data Analytics.
 - c) How to start predictive analytics project.

Section – II

- Q.4 Attempt any four. 16**
- a) Explain categorizing model.
 - b) How to Find Association in data items.
 - c) Explain algorithm for generating decision trees.
 - d) Explain principal component analysis.
 - e) Explain Ensemble methods.
- Q.5 Attempt any two. 12**
- a) Explain K-means clustering algorithm.
 - b) Explain Decision tree with example.
 - c) Explain Healthcare analytics case studies: Google flu trends, Cancer survivability predictors.

UI/UX Technology (BTN03719)

Day & Date: Monday, 20-05-2024
 Time: 03:00 PM To 05:00 PM

Max. Marks: 50

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 20 Minutes

Marks:10

Q.1 Choose the correct alternatives from the given options. 10

- 1) Inline styles are written within the _____ attribute.
 - a) style
 - b) css
 - c) stylesheet
 - d) Both a and b
- 2) Which of the following is the correct use of the strcmp() function in PHP?
 - a) The strcmp() function is used to compare the strings excluding case
 - b) The strcmp() function is used to compare the uppercase strings
 - c) The strcmp() function is used to compare the lowercase strings
 - d) The strcmp() function is used to compare the strings including case
- 3) Which of the following is correct about JavaScript?
 - a) JavaScript is an Object-Based language
 - b) JavaScript is Assembly-language
 - c) JavaScript is an Object-Oriented language
 - d) JavaScript is a High-level language
- 4) Which of the following variables takes precedence over the others if the names are the same?
 - a) Global variable
 - b) The local element
 - c) The two of the above
 - d) None of the above
- 5) What does PSD stand for?
 - a) Photoshop Shopping document
 - b) Photoshop Document
 - c) Photoshop Digital
 - d) Photoshop Shopping Digital
- 6) Which of the following command is used to install create-react-app?
 - a) npm install -g create-react-app
 - b) npm install create-react-app
 - c) npm install -f create-react-app
 - d) install -g create-react-app

- 7) Which of the following keyword is used to create a class inheritance in React?
- | | |
|------------|-------------|
| a) Create | b) Inherits |
| c) Extends | d) This |
- 8) What does ES6 stand for?
- | | |
|---------------------|------------------|
| a) ECMAScript 6 | b) ECMA 6 |
| c) ECMAJavaScript 6 | d) EJavaScript 6 |
- 9) Which of the following command is used to start a REPL session?
- | | |
|-----------------|--------------------|
| a) \$ node | b) \$ node start |
| c) \$ node repl | d) \$ node console |
- 10) Which of the following is used for concatenation in PHP?
- | | |
|-------------|-----------------|
| a) + (plus) | b) * (Asterisk) |
| c) . (dot) | d) append() |

- d) Define the following terms with respect to Open Source and Free Software Licensing.
 - i) Attribution
 - ii) Share Alike
- e) Briefly Explain the Academic Free License.
- f) What are the negative effects of Open Source and Free Software Licensing?

Q.2 Attempt any two of the following.

20

- a) State and explain issues with Copyrights and Patents with indicative examples.
- b) State the benefits of Open Source Software Licensing. Explain how Community Enforcement of Open Source and Free Software Licenses works with an example.
- c) Write a detail note on Multiple and Cross Licensing.

Fourth Y. (B.Tech.) (Sem-I) (Old) (CBCS) Examination: March/April-2024
COMPUTER SCIENCE AND ENGINEERING
Distributed Systems (197043701)

Day & Date: Wednesday, 15-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.
 4) Assume data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) Which activity deals with the process of deciding which process should be assigned to which processor?

a) Process Allocation	b) Process migration
c) Threads allocation	d) None of these
- 2) Which of the following refers to the degree of tolerance against errors and component failures in a system?

a) Portability	b) Reliability
c) Maintainability	d) Scalability
- 3) _____ model consists of several workstations interconnected by a communication network.

a) Minicomputer	b) Processor pool
c) Workstation	d) Hybrid
- 4) Following is one of the feature of message passing systems?

a) Maintainability	b) Durability
c) Economy	d) Correctness
- 5) In _____ representation of encoding and decoding the message data only contain program objects.

a) untagged	b) system
c) tagged	d) All
- 6) The _____ handles transmission of messages across the network between client and server.

a) Server Stub	b) RPC Runtime
c) Client stub	d) Server
- 7) _____ requires each node to read the other node's clock value.

a) Process synchronization	b) Event synchronization
c) Clock synchronization	d) All

Set P

**Fourth Y. (B.Tech.) (Sem-I) (Old) (CBCS) Examination: March/April-2024
COMPUTER SCIENCE AND ENGINEERING
Distributed Systems (197043701)**

Day & Date: Wednesday, 15-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section – I

- Q.2 Attempt any three of the following. 12**
- a) Describe mini computer model used in distributed systems.
 - b) What are the different protocols used in distributed systems?
 - c) How encoding and decoding of message data in message passing system?
 - d) What is thread? Describe any one thread model.
- Q.3 Attempt any one of the following. 08**
- a) What are different issues in designing distributed system?
 - b) What are the desirable features for good process migration?
- Q.4 Explain marshalling arguments and results in RPC. 08**

Section – II

- Q.5 Attempt any three of the following. 12**
- a) Explain Suzuki-Kasami algorithm used in mutual exclusion.
 - b) What are the different issues in deadlock detection and resolution?
 - c) Describe Lamport's algorithm used in distributed mutual exclusion.
 - d) Explain the architecture of distributed file systems.
- Q.6 Attempt any one of the following. 08**
- a) Explain deadlock handling strategies in distributed system in detail.
 - b) What are different design issues of distributed file system?
- Q.7 Describe architecture and motivation of distributed shared memory. 08**

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) Who defined a new relation called happened -before relation in partial ordering of events?
 - a) Lamport
 - b) Lambort
 - c) Lambfort
 - d) Lamport
- 2) In distributed file system, _____ is mapping between logical and physical objects.
 - a) naming
 - b) client interfacing
 - c) migration
 - d) heterogeneity
- 3) In _____ only one process at a time is allowed into its critical section, among all processes that have critical sections for the same resource.
 - a) Synchronization
 - b) mutual Exclusion
 - c) Deadlock
 - d) starvation
- 4) _____ is employed in DFS to reduce delays in the accessing of data.
 - a) Naming
 - b) Optimizing
 - c) Caching
 - d) None of these
- 5) DSM means _____.
 - a) Data Shared memory
 - b) Distinct shared memory
 - c) Distributed shared mutants
 - d) Distributed shared memory
- 6) In the central server algorithm, a central server maintains all the _____.
 - a) shared data
 - b) shared services
 - c) complex data
 - d) isolated data
- 7) The _____ model provides the virtual address space that is shared among all nodes in a distributed system.
 - a) shared service
 - b) shared memory
 - c) shared data
 - d) shared resource
- 8) Which activity deals with the process of deciding which process should be assigned to which processor?

Fourth Y. (B.Tech.) (Sem-I) (Old) (CBCS) Examination: March/April-2024
COMPUTER SCIENCE AND ENGINEERING
Machine Learning (197043702)

Day & Date: Thursday, 16-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

Instructions: 1) All questions are compulsory.
 2) Figures to the right indicate full marks.

Section – I

- Q.2 Attempt any FOUR. 16**
- a) Write differences between machine learning and data mining.
 - b) Write short note on Searching for the best hyper parameters.
 - c) Write a short note on Data preparation.
 - d) Explain tying machine learning methods to outcome.
 - e) Explain the term choosing right error or Score Metric.
- Q.3 Attempt any ONE. 06**
- a) Exploring the world of Probabilities.
 - b) Write a short note on Machine Learning Cycle.
- Q.4 Attempt the following. 06**
- Explain Exploring cost function.

Section – II

- Q.5 Attempt any FOUR. 16**
- a) Explain Leave one out cross validation.
 - b) Write differences between LOOC and K-fold cross validation.
 - c) Explain Learning curves using cross validation.
 - d) Explain the discovering the Incredible perceptron.
 - e) Explain Averaging model.
- Q.6 Attempt any ONE. 06**
- a) Explain Learning as Optimization.
 - b) Write a short note on following application of machine learning.
 - a) classifying images
 - b) scoring opinions and sentiments
 - c) Recommending product and movies
- Q.7 Attempt the following. 06**
- Explain the following term:
- a) Training
 - b) Testing
 - c) Validating

**Fourth Y. (B.Tech.) (Sem-I) (Old) (CBCS) Examination: March/April-2024
COMPUTER SCIENCE AND ENGINEERING
Machine Learning (197043702)**

Day & Date: Thursday, 16-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumption (if necessary and state them clearly)

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) _____ Algorithm would make sense.
 - a) Clustering
 - b) Bayesian
 - c) Association
 - d) none
- 2) _____ determines how well a machine learning algorithm performs in a supervised prediction or an unsupervised optimization problem.
 - a) cost function
 - b) evaluation function
 - c) Both a and b
 - d) None
- 3) _____ Algorithm is used to remove redundant data, outliers and other no useful data.
 - a) Bayesian
 - b) Dimensionality reduction
 - c) Association
 - d) Clustering
- 4) _____ ways improve machine learning model.
 - a) Error curve method
 - b) Testing multiple model
 - c) SDLC Model
 - d) none
- 5) The process goes on repetitively until there are no more chunks. Chunks can be small (depending on core memory), and the process is called _____.
 - a) mini-batch learning
 - b) learning model
 - c) linear regression
 - d) none
- 6) _____ can lead to poor performance of machine learning model.
 - a) Under fitting
 - b) Over fitting
 - c) Both a and b
 - d) none
- 7) _____ uses the branching structure to illustrate the result o decision.
 - a) Bayesian
 - b) Decision Tree
 - c) Association
 - d) Clustering
- 8) _____ method is used to avoid over fitting.
 - a) Bayesian
 - b) Regularization
 - c) Rule based machine learning
 - d) Dimensionality reduction

Fourth Y. (B.Tech.) (Sem-I) (Old) (CBCS) Examination: March/April-2024
COMPUTER SCIENCE AND ENGINEERING
Modern Database System (197043703)

Day & Date: Friday 17-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) The architecture of distributed database system is greatly influenced by _____.
 - a) Networking
 - b) Parallelism
 - c) Distribution of Data
 - d) All of the above
- 2) In Transaction server _____.
 - a) Client machines ship transaction to server systems
 - b) Requests are made by clients to servers using SQL
 - c) Server ships the information to clients
 - d) All of the above
- 3) _____ protocol provides less overhead on READ operation.
 - a) Majority Protocol
 - b) Quorum Consensus Protocol
 - c) Primary Copy Protocol
 - d) Biased Protocol
- 4) Which of the following is not a characteristic of a data warehouse?
 - a) contains historical data
 - b) designed for decision support
 - c) stores data in normalized tables
 - d) promotes data redundancy
- 5) _____ fragmentation splits the relation by assigning each tuple of relation R into one or more fragments.
 - a) Horizontal
 - b) Vertical
 - c) Mixed
 - d) Data
- 6) A heterogeneous distributed database is _____.
 - a) The same DBMS is used at different location and data are not distributed across all nodes.
 - b) The same DBMS is used at different location and data are distributed across all nodes.
 - c) A different DBMS is used at different location and data are not distributed across all nodes.
 - d) A different DBMS is used at different location and data are distributed across all nodes

- 7) In Object Oriented Databases, Nesting can be done using function _____ to create a multiset of particular attribute.
- a) Aggregate
 - b) group by
 - c) order by
 - d) Collect
- 8) Data mining is best described as the process of _____.
- a) identifying patterns in data
 - b) deducing relationships in data
 - c) representing data
 - d) simulating trends in data
- 9) Which of the following is not a NoSQL database?
- a) SQL Server
 - b) MongoDB
 - c) Cassandra
 - d) None
- 10) A global locking system is required in _____.
- a) shared disk architecture
 - b) Shared Nothing architecture
 - c) Shared-memory Architecture
 - d) None of these
- 11) MongoDB has been adopted as _____ software by a number of major websites and service.
- a) frontend
 - b) backend
 - c) proprietary
 - d) All of the mentioned
- 12) Schema which has more than one fact table is called as _____.
- a) Star schema
 - b) Star-snowflake schema
 - c) Constellation
 - d) None of these
- 13) Point out the wrong statement:
- a) Hadoop's processing capabilities are huge and its real advantage lies in the ability to process terabytes & petabytes of data.
 - b) Hadoop uses a programming model called "MapReduce", all the programs should confirm to this model in order to work on Hadoop platform.
 - c) The programming model, MapReduce, used by Hadoop is difficult to write and test
 - d) All of the mentioned
- 14) MongoDB uses a _____ lock that allows concurrent read access to a database but exclusive write access to a single write operation.
- a) readers
 - b) readers-writer
 - c) writer
 - d) None of the mentioned

Set **P**

Fourth Y. (B.Tech.) (Sem-I) (Old) (CBCS) Examination: March/April-2024
COMPUTER SCIENCE AND ENGINEERING
Modern Database System (197043703)

Day & Date: Friday 17-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

Instructions: 1) All questions are compulsory.
 2) Figures to the right indicate full marks.

Section – I

- Q.2 Attempt any Three.** **12**
- a) List and compare different partitioning techniques.
 - b) What are different issues in designing a Data Server?
 - c) How deadlock is handled in distributed database systems?
 - d) How ranking operation can be performed on database?
 - e) List and explain 4 methods of OLAP implementation.
- Q.3 Attempt any one.** **08**
- a) Define Data Warehouse and Data Mining? Explain KDD process in detail.
 - b) In Distributed Transaction which protocol is used to ensure Atomicity?
 Explain the protocol in detail.
- Q.4 Attempt the following.** **08**
- Explain Brewer's CAP Theorem in detail.

Section – II

- Q.5 Attempt any Three.** **12**
- a) Describe characteristics of MongoDB.
 - b) Explain Type inheritance with example.
 - c) Differentiate between object oriented DBMS and Object relational DBMS.
 - d) Explain external Sort merge in detail.
 - e) With the help of diagram, explain steps in query processing.
- Q.6 Attempt any one.** **08**
- a) Explain Hadoop Distributed File System (HDFS) Architecture with diagram.
 - b) List Characteristics of NoSql. Also define Key-value store and Document Database.
- Q.7 Attempt the following.** **08**
- In Object oriented database, structured type can have *methods*. With example, write declaration, body of method and also explain how this method can be invoked on instance of Type.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) Which of the following is true about IoT?
 - a) The term things in IoT refers to anything and everything in day to day life
 - b) IoT has greater transparency, control and performance
 - c) Both a and b
 - d) None of the above
- 2) IoT is based on _____ technology.

a) Hardware	b) Software
c) None	d) Both of these
- 3) The M2M is _____ scalable than IOT.

a) Highly	b) Less
c) Very high	d) None of the above
- 4) Which one is an example for M2M?

a) Remote monitoring	b) Smart cities
c) Smart agriculture	d) All of the above
- 5) Which one of the following protocols is lightweight?

a) IP	b) HTTP
c) MQTT	d) CoAP
- 6) Which of the following protocols does not exist at the data link layer?

a) ZigBee Smart Energy	b) LoRaWAN
c) Ethernet	d) MQTT
- 7) Which layer protocol is CoAP?

a) Control layer	b) Transport layer
c) Service layer	d) Application layer
- 8) In RFID tags, the tags are _____.

a) Active	b) Passive
c) Active or passive	d) None of the above

- 9) ZigBee solutions are aimed at smart objects and sensors that have _____ needs.
- a) low bandwidth and low power
 - b) high bandwidth and low power
 - c) low bandwidth and high power
 - d) high bandwidth and high power
- 10) What is full form of LoRa?
- a) Level Range Radio
 - b) Low Range Radio
 - c) Long Range Radio
 - d) None
- 11) Xively is _____.
- a) PaaS
 - b) IaaS
 - c) DaaS
 - d) SaaS
- 12) The new cloud computing paradigm uses _____ for data collection, storage and computing.
- a) Localization
 - b) ICT
 - c) XaaS
 - d) All of the above
- 13) Process of identifying any individual _____.
- a) Auditing
 - b) Authorization
 - c) Authentication
 - d) Accounting
- 14) Which is not a functional component of security?
- a) Authentication
 - b) Authorization
 - c) Trust and reputation
 - d) Threat analysis

Set P

Fourth Y. (B. Tech.) (Sem-I) (Old) (CBCS) Examination: March/April-2024
COMPUTER SCIENCE AND ENGINEERING
Internet of Things (197043707)

Day & Date: Saturday, 18-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

- Q.2 Solve any Three of the following. 12**
- a) Explain IoT enabling technologies in brief.
 - b) Write a note on M2M system architecture.
 - c) Draw and explain architecture for connecting WSN nodes.
 - d) Explain various uses of actuators in IoT.
- Q.3 Solve any Two. 16**
- a) Explain Level-1 and level-2 of IoT deployment template with example.
 - b) Define the concept of M2M system and explain the requirements for it.
 - c) Explain RFID Technology in detail.

Section – II

- Q.4 Solve any Three. 12**
- a) Explain UART protocol.
 - b) Write a note on Constrained Application Protocol (CoAP).
 - c) Explain virtualization in cloud computing.
 - d) Write a note on security requirements in IoT.
- Q.5 Solve any Two. 16**
- a) Write a note on RESTful APIs.
 - b) Write a note on IoT cloud based services using Xively.
 - c) Draw layered attacker model and explain solutions for mitigating the attacks on layers.

Seat No.

Fourth Y. (B. Tech.) (Sem-I) (Old) (CBCS) Examination: March/April-2024
COMPUTER SCIENCE AND ENGINEERING
Internet of Things (197043707)

Day & Date: Saturday, 18-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) In RFID tags, the tags are _____.
 - a) Active
 - b) Passive
 - c) Active or passive
 - d) None of the above
- 2) ZigBee solutions are aimed at smart objects and sensors that have _____ needs.
 - a) low bandwidth and low power
 - b) high bandwidth and low power
 - c) low bandwidth and high power
 - d) high bandwidth and high power
- 3) What is full form of LoRa?
 - a) Level Range Radio
 - b) Low Range Radio
 - c) Long Range Radio
 - d) None
- 4) Xively is _____.
 - a) PaaS
 - b) IaaS
 - c) DaaS
 - d) SaaS
- 5) The new cloud computing paradigm uses _____ for data collection, storage and computing.
 - a) Localization
 - b) ICT
 - c) XaaS
 - d) All of the above
- 6) Process of identifying any individual _____.
 - a) Auditing
 - b) Authorization
 - c) Authentication
 - d) Accounting
- 7) Which is not a functional component of security?
 - a) Authentication
 - b) Authorization
 - c) Trust and reputation
 - d) Threat analysis
- 8) Which of the following is true about IoT?
 - a) The term things in IoT refers to anything and everything in day to day life
 - b) IoT has greater transparency, control and performance
 - c) Both a and b
 - d) None of the above

- 9) IoT is based on _____ technology.
- a) Hardware
 - b) Software
 - c) None
 - d) Both of these
- 10) The M2M is _____ scalable than IOT.
- a) Highly
 - b) Less
 - c) Very high
 - d) None of the above
- 11) Which one is an example for M2M?
- a) Remote monitoring
 - b) Smart cities
 - c) Smart agriculture
 - d) All of the above
- 12) Which one of the following protocols is lightweight?
- a) IP
 - b) HTTP
 - c) MQTT
 - d) CoAP
- 13) Which of the following protocols does not exist at the data link layer?
- a) ZigBee Smart Energy
 - b) LoRaWAN
 - c) Ethernet
 - d) MQTT
- 14) Which layer protocol is CoAP?
- a) Control layer
 - b) Transport layer
 - c) Service layer
 - d) Application layer

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) Which of the following protocols does not exist at the data link layer?

a) ZigBee Smart Energy	b) LoRaWAN
c) Ethernet	d) MQTT
- 2) Which layer protocol is CoAP?

a) Control layer	b) Transport layer
c) Service layer	d) Application layer
- 3) In RFID tags, the tags are _____.

a) Active	b) Passive
c) Active or passive	d) None of the above
- 4) ZigBee solutions are aimed at smart objects and sensors that have _____ needs.

a) low bandwidth and low power	b) high bandwidth and low power
c) low bandwidth and high power	d) high bandwidth and high power
- 5) What is full form of LoRa?

a) Level Range Radio	b) Low Range Radio
c) Long Range Radio	d) None
- 6) Xively is _____.

a) PaaS	b) IaaS
c) DaaS	d) SaaS
- 7) The new cloud computing paradigm uses _____ for data collection, storage and computing.

a) Localization	b) ICT
c) XaaS	d) All of the above
- 8) Process of identifying any individual _____.

a) Auditing	b) Authorization
c) Authentication	d) Accounting

- 9) Which is not a functional component of security?
- a) Authentication
 - b) Authorization
 - c) Trust and reputation
 - d) Threat analysis
- 10) Which of the following is true about IoT?
- a) The term things in IoT refers to anything and everything in day to day life
 - b) IoT has greater transparency, control and performance
 - c) Both a and b
 - d) None of the above

Software Testing and Quality Assurance (197043708)

Day & Date: Saturday, 18-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.
 4) Assume data wherever necessary.
 5) Figures must be drawn wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) Which is non-functional software testing?
 - a) Unit testing
 - b) Block box testing
 - c) Performance testing
 - d) Regression testing
- 2) Which term is used to define testing?
 - a) Evaluating deliverable to find errors
 - b) Finding broken code
 - c) A stage of all projects
 - d) None of the above
- 3) Effective testing will reduce _____ cost.
 - a) Maintenance
 - b) Design
 - c) Coding
 - d) Documentation
- 4) Which requirements are the foundation from which quality is measured?
 - a) Hardware
 - b) Software
 - c) Programmers
 - d) None of the mentioned
- 5) In which environment we can performed the Alpha testing?
 - a) User's end
 - b) Developer's end
 - c) User's and developer's end
 - d) None of the above
- 6) What are the types of requirements?
 - a) Availability
 - b) Reliability
 - c) Usability
 - d) All of the mentioned
- 7) White box testing is not called as _____.
 - a) Glass box testing
 - b) Closed box testing
 - c) Open box testing
 - d) Clear box testing
- 8) Which of the following is not an appraisal cost in SQA?
 - a) Inter-process inspection
 - b) Maintenance
 - c) Quality planning
 - d) Testing

Software Testing and Quality Assurance (197043708)**

Day & Date: Saturday, 18-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

- Q.2 Attempt any Four** **16**
a) What is testing? List and explain the types of testing approaches.
b) Compare Mistake, Error and defect.
c) Explain Black box testing and white box testing in detail.
d) Describe Proposal review process.
e) Explain System testing.
- Q.3 Attempt any One** **06**
a) List and explain different developing testing methodologies.
b) Elaborate top-down approach for integration testing.
- Q.4 Attempt the following.** **06**
Explain Sandwich testing with a neat diagram.

Section – II

- Q.5 Attempt any Four** **16**
a) Explain in detail Bug Life Cycle.
b) Explain Software Quality Dilemma.
c) Explain in detail test case organization.
d) Explain various testing tools of Software testing.
e) Summarize the benefits of automation & tools.
- Q.6 Attempt any One.** **06**
a) Describe Reporting Bugs-Getting your Bugs fixed in test planning.
b) Write a short note on ISO 9000 Quality Standards.
- Q.7 Attempt the following.** **06**
Describe SQA Processes and Product characteristics in SQA.

Seat No.

 5) Figures must be drawn wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) Which of the following is not an appraisal cost in SQA?

a) Inter-process inspection	b) Maintenance
c) Quality planning	d) Testing
- 2) Inspections and testing are what kinds of Quality Costs?

a) Prevention	b) Internal Failure
c) External Failure	d) Appraisal
- 3) Identify the stage in which test cases are designed?

a) Test planning	b) Test configuration
c) Test specification	d) Test recording
- 4) Which of the following testing is related to the boundary value analysis?
 - a) White box and black box testing
 - b) White-box testing
 - c) Black box testing
 - d) None of the above
- 5) Software mistakes during coding are known as _____.

a) Errors	b) Failures
c) Bugs	d) Defects
- 6) Quality also can be looked at in terms of user satisfaction which includes _____.
 - a) A compliant product
 - b) Good quality output
 - c) Delivery within budget and schedule
 - d) All of the mentioned
- 7) Which of the following testing is also called Acceptance testing?

a) Beta testing	b) White-box testing
c) Grey box testing	d) Alpha testing
- 8) Which is non-functional software testing?

a) Unit testing	b) Block box testing
c) Performance testing	d) Regression testing

- 9) Which term is used to define testing?
- a) Evaluating deliverable to find errors
 - b) Finding broken code
 - c) A stage of all projects
 - d) None of the above
- 10) Effective testing will reduce _____ cost.
- a) Maintenance
 - b) Design

c) Quality planning	d) Testing
- 4) Inspections and testing are what kinds of Quality Costs?

a) Prevention	b) Internal Failure
c) External Failure	d) Appraisal
- 5) Identify the stage in which test cases are designed?

a) Test planning	b) Test configuration
c) Test specification	d) Test recording
- 6) Which of the following testing is related to the boundary value analysis?

a) White box and black box testing
b) White-box testing
c) Black box testing
d) None of the above
- 7) Software mistakes during coding are known as _____.

a) Errors	b) Failures
c) Bugs	d) Defects
- 8) Quality also can be looked at in terms of user satisfaction which includes _____.

a) A compliant product
b) Good quality output
c) Delivery within budget and schedule
d) All of the mentioned

Set S

Final Y. (B.Tech.) (Sem - I) (Old) (CBCS) Examination: March/April-2024
COMPUTER SCIENCE AND ENGINEERING
Software Testing and Quality Assurance (197043708)

Day & Date: Saturday, 18-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

- Q.2 Attempt any Four** **16**
- a) What is testing? List and explain the types of testing approaches.
 - b) Compare Mistake, Error and defect.
 - c) Explain Black box testing and white box testing in detail.
 - d) Describe Proposal review process.
 - e) Explain System testing.
- Q.3 Attempt any One** **06**
- a) List and explain different developing testing methodologies.
 - b) Elaborate top-down approach for integration testing.
- Q.4 Attempt the following.** **06**
- Explain Sandwich testing with a neat diagram.

Section – II

- Q.5 Attempt any Four** **16**
- a) Explain in detail Bug Life Cycle.
 - b) Explain Software Quality Dilemma.
 - c) Explain in detail test case organization.
 - d) Explain various testing tools of Software testing.
 - e) Summarize the benefits of automation & tools.
- Q.6 Attempt any One.** **06**
- a) Describe Reporting Bugs-Getting your Bugs fixed in test planning.
 - b) Write a short note on ISO 9000 Quality Standards.
- Q.7 Attempt the following.** **06**
- Describe SQA Processes and Product characteristics in SQA.

Seat No.	
----------	--

Fourth Y. (B.Tech.) (Sem-I) (Old) (CBCS) Examination: March/April-2024
COMPUTER SCIENCE AND ENGINEERING
Adhoc and Sensor Networks (197043709)

Day & Date: Saturday, 18-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.
 4) Assume data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) In _____, the chance of collision can be reduced if a station senses the medium before trying to use it.

a) MA	b) CSMA
c) FDMA	d) CDMA
- 2) In _____ collision are avoided through the use of three strategies: the interface space, the contention window, and acknowledgement.

a) CSMA/CA	b) CSMA/CD
c) Either a or b	d) Both a and b
- 3) In the _____ method, a station needs to make a reservation before sending data. Time is divided into intervals.

a) Reservation	b) Polling
c) Taken passing	d) None
- 4) A key characteristics of a WSN is its ability of self-mange is called _____.

a) Scalability	b) Predictability
c) Adaptability	d) None
- 5) _____ is responsible for configuration and reconfiguration of sensor nodes to establish or maintain network connectivity.

a) task management plane	b) Power management plane
c) connection management plane	d) None of these
- 6) Sensor Network in _____.

a) Heterogeneous system consisting of tiny sensors	b) Homogeneous system used in wireless
c) Very important for security	d) All of the mentioned
- 7) WSN nodes cooperatively organize the network using distributed algorithms and protocols this principle is called _____.

a) Mac protocol	b) routing protocol
c) Self-organization	d) none of these

Seat No.

Set

P

Fourth Y. (B.Tech.) (Sem-I) (Old) (CBCS) Examination: March/April-2024
COMPUTER SCIENCE AND ENGINEERING
Adhoc and Sensor Networks (197043709)

Day & Date: Saturday, 18-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
 2) Figures to the right indicate full marks.
 3) Assume suitable data if necessary.

Section – I

Q.2 Answer any four questions. 16

- a) What is the main purpose of the MAC layer and why is this challenging in networks with shared media?
- b) What are the advantages and disadvantages of contention-free and contention-based medium access strategies?
- c) Explain the concept of directed diffusion.
- d) Discuss on various challenges of wireless sensor networks.
- e) Discuss the characteristic requirements of WSN.

Q.3 Answer any two questions. 12

- a) Sketch the architecture of Sensor Node Structure and explain the function of the units.
- b) Explain the design approaches and performance of S-MAC protocol.
- c) Compare a proactive routing protocol such as DSDV with a reactive protocol such as DSR with respect to overheads and route optimality.

Section – II

Q.4 Answer any four questions. 16

- a) List some hardware platforms for WSN with their features
- b) Explain Passive power conservation mechanism using Power Aware Multi access Protocol with Signaling (PAMAS).
- c) Explain the difference between external and internal time synchronization.
- d) Name two concrete scenarios or applications where localization is required.
- e) What are the design goals of a Transport Layer Protocol in Ad hoc networks?

Q.5 Answer any two questions. 12

- a) Discuss all Active Power Conservation Mechanisms in WSN.
- b) Discuss the differences and similarities in the design of the TPSN and the LTS synchronization protocols.
- c) Discuss IMote Node Architecture used in Wireless sensor network.

 3) Figures to the right indicates full marks.
 4) Assume data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) _____ node acts as interface between WSN and internet.
 - a) Sink
 - b) sensor node
 - c) link node
 - d) None of these
- 2) To A packet in Transmission Control Protocol (TCP) is called as _____.
 - a) Transmitted slots
 - b) packets
 - c) Segments
 - d) None of above
- 3) Following are data centric routing:
 - a) SPIN
 - b) Directed diffusion
 - c) Rumor routing
 - d) All of above
- 4) DSDV & OLSR are:
 - a) Proactive routing discovery
 - b) Reactive routing
 - c) None
 - d) Both
- 5) Which layer is responsible for reliable data delivery required by the application layer?
 - a) Application layer
 - b) transport layer
 - c) data link layer
 - d) none of these
- 6) _____ is the core of WSN which collects data from sensors.
 - a) Controller
 - b) Processor
 - c) Trans-receiver
 - d) Power Amplifier
- 7) In IEEE 802.11 network, different BSS are connected by _____.
 - a) AP
 - b) STA
 - c) DSS
 - d) All of above
- 8) In _____, the chance of collision can be reduced if a station senses the medium before trying to use it.
 - a) MA
 - b) CSMA
 - c) FDMA
 - d) CDMA

- 9) In ____ collision are avoided through the use of three strategies: the interface space, the contention window, and acknowledgement.
- a) CSMA/CA

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct Answer:**14**

- 1) Which of the following statement is true about Business Intelligence?
 - a) BI convert raw data into meaningful information.
 - b) BI has a direct impact on organization's strategic, tactical and operational business decisions.
 - c) BI tools perform data analysis and create reports, summaries, dashboards, maps, graphs, and charts.
 - d) All of the above
- 2) Tactical models are used mainly by middle managers to assist in allocating and controlling the organization's resources. (State True/False).
 - a) True
 - b) False
- 3) Simple exponential smoothing model, also called as _____.
 - a) White model
 - b) Black model
 - c) Brown model
 - d) None of the mentioned
- 4) _____ is an observation which contains either very low value or very high value in comparison to other observed values.
 - a) Outlier
 - b) Independent Variable
 - c) Dependent Variable
 - d) Numerical Variable
- 5) Which of the following is/are Benefits of Dimensional Modelling?
 - a) Faster Data Retrieval
 - b) Better Understandability
 - c) Extensibility
 - d) All of the mentioned
- 6) Which of the following components is/are present in Business Intelligence architecture?
 - a) Data sources
 - b) Data warehouses and data marts
 - c) Business intelligence methodologies
 - d) All of the mentioned
- 7) A reduced representation of the data set that is much smaller in volume but yet produce the same analytical results is called _____.
 - a) Data validation
 - b) Data reduction
 - c) Data exploration
 - d) Data transformation

- 8) Clickstream analysis deals with _____ mining in the taxonomy of web mining analysis.
- | | |
|-------------------|---------------------|
| a) Content mining | b) Structure mining |
| c) Usage mining | d) Text mining |
- 9) _____ is the bridge between data warehouse and decision support application.
- | | |
|-----------------|-----------------|
| a) Logical data | b) Complex data |
| c) Nominal data | d) Metadata |
- 10) A time series component, _____ can be positive or negative depending on whether the time series exhibits an increasing long term pattern or a decreasing long term pattern.
- | | |
|--------------|-------------|
| a) Seasonal | b) Trend |
| c) Irregular | d) Cyclical |
- 11) A decision is _____ if it is based on well-defined and recurring decision-making procedure.
- | | |
|-------------------------------|---------------------------|
| a) Structured Decisions | b) Unstructured Decisions |
| c) Semi-structured decisions. | d) None of the mentioned |
- 12) Apriori algorithm uses a _____ approach, for finding Association rules in a database that contains transactions.
- | | |
|-------------|--------------------------|
| a) Top-down | b) Bottom-up |
| c) Both | d) None of the mentioned |
- 13) The purpose of _____ is to gain insight from the purchases made by customers in order to extract useful knowledge to plan marketing actions.
- | | |
|-------------------------|---------------------------|
| a) Clickstream analysis | b) Text mining |
| c) Purchase analysis | d) Market basket analysis |
- 14) _____ is an oriented graph consisting of nodes, which in the biological analogy represent neurons, connected by arcs, which corresponds to dendrites and synapses.

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

- Q.2 Attempt any Three** **12**
- a) Compare and contrast the OLTP and OLAP.
 - b) What is the role of mathematical models in business intelligence?
 - c) Illustrate the components of Business Intelligence Architecture with neat diagram.
 - d) Elaborate the development of decision support system.
- Q.3 Attempt any One.** **08**
- a) How data validation takes place in Business Intelligence? Describe with example.
 - b) What is Data Warehouse Schema? Differentiate between Star schema and snowflake schema.
- Q.4 Attempt the following** **08**
- Illustrate the Bivariate analysis and its types. Also elaborate Numerical-Numerical Bivariate analysis with appropriate example.

Section – II

- Q.5 Attempt any Three** **12**
- a) Describe the components of Salesforce management.
 - b) Elaborate Apriori algorithm.
 - c) Elaborate clustering method.
 - d) Write a short note on classification tree.
- Q.6 Attempt any One.** **08**
- a) Describe Linear Regression and types of linear regression.
 - b) What is Hierarchical clustering? Describe working of Agglomerative Hierarchical clustering with example.
- Q.7 Attempt the following** **08**
- How time-series analysis works? Describe its components.

 - c) Dependent Variable
 - d) Numerical Variable
- 12) Which of the following is/are Benefits of Dimensional Modelling?
- a) Faster Data Retrieval
 - b) Better Understandability
 - c) Extensibility
 - d) All of the mentioned
- 13) Which of the following components is/are present in Business Intelligence architecture?
- a) Data sources
 - b) Data warehouses and data marts
 - c) Business intelligence methodologies
 - d) All of the mentioned
- 14) A reduced representation of the data set that is much smaller in volume but yet produce the same analytical results is called _____.
- a) Data validation
 - b) Data reduction
 - c) Data exploration
 - d) Data transformation

-------------	--

Fourth Y. (B.Tech.) (Sem - I) (Old) (CBCS) Examination: March/April-2024
COMPUTER SCIENCE AND ENGINEERING
Business Intelligence (197043710)

Day & Date: Sunday, 19-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

Instructions: 1) All questions are compulsory.
 2) Figures to the right indicate full marks.

Section – I

- Q.2 Attempt any Three** **12**
- a) Compare and contrast the OLTP and OLAP.
 - b) What is the role of mathematical models in business intelligence?
 - c) Illustrate the components of Business Intelligence Architecture with neat diagram.
 - d) Elaborate the development of decision support system.
- Q.3 Attempt any One.** **08**
- a) How data validation takes place in Business Intelligence? Describe with example.
 - b) What is Data Warehouse Schema? Differentiate between Star schema and snowflake schema.
- Q.4 Attempt the following** **08**
- Illustrate the Bivariate analysis and its types. Also elaborate Numerical-Numerical Bivariate analysis with appropriate example.

Section – II

- Q.5 Attempt any Three** **12**
- a) Describe the components of Salesforce management.
 - b) Elaborate Apriori algorithm.
 - c) Elaborate clustering method.
 - d) Write a short note on classification tree.
- Q.6 Attempt any One.** **08**
- a) Describe Linear Regression and types of linear regression.
 - b) What is Hierarchical clustering? Describe working of Agglomerative Hierarchical clustering with example.
- Q.7 Attempt the following** **08**
- How time-series analysis works? Describe its components.

Set **R**

Fourth Y. (B.Tech.) (Sem - I) (Old) (CBCS) Examination: March/April-2024
COMPUTER SCIENCE AND ENGINEERING
Business Intelligence (197043710)

Day & Date: Sunday, 19-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct Answer:**14**

- 1) A decision is _____ if it is based on well-defined and recurring decision-making procedure.
 - a) Structured Decisions
 - b) Unstructured Decisions
 - c) Semi-structured decisions.
 - d) None of the mentioned
- 2) Apriori algorithm uses a _____ approach, for finding Association rules in a database that contains transactions.
 - a) Top-down
 - b) Bottom-up
 - c) Both
 - d) None of the mentioned
- 3) The purpose of _____ is to gain insight from the purchases made by customers in order to extract useful knowledge to plan marketing actions.
 - a) Clickstream analysis
 - b) Text mining
 - c) Purchase analysis
 - d) Market basket analysis
- 4) _____ is an oriented graph consisting of nodes, which in the biological analogy represent neurons, connected by arcs, which corresponds to dendrites and synapses.
 - a) Neural networks
 - b) Regression
 - c) Classification
 - d) Clustering
- 5) Which of the following statement is true about Business Intelligence?
 - a) BI convert raw data into meaningful information.
 - b) BI has a direct impact on organization's strategic, tactical and operational business decisions.
 - c) BI tools perform data analysis and create reports, summaries, dashboards, maps, graphs, and charts.
 - d) All of the above
- 6) Tactical models are used mainly by middle managers to assist in allocating and controlling the organization's resources. (State True/False).
 - a) True
 - b) False
- 7) Simple exponential smoothing model, also called as _____.
 - a) White model
 - b) Black model
 - c) Brown model
 - d) None of the mentioned

- 8) _____ is an observation which contains either very low value or very high value in comparison to other observed values.
- a) Outlier
 - b) Independent Variable
 - c) Dependent Variable
 - d) Numerical Variable
- 9) Which of the following is/are Benefits of Dimensional Modelling?
- a) Faster Data Retrieval
 - b) Better Understandability
 - c) Extensibility
 - d) All of the mentioned
- 10) Which of the following components is/are present in Business Intelligence architecture?
- a) Data sources
 - b) Data warehouses and data marts
 - c) Business intelligence methodologies
 - d) All of the mentioned
- 11) A reduced representation of the data set that is much smaller in volume but yet produce the same analytical results is called _____.
- a) Data validation
 - b) Data reduction
 - c) Data exploration
 - d) Data transformation
- 12) Clickstream analysis deals with _____ mining in the taxonomy of web mining analysis.
- a) Content mining
 - b) Structure mining
 - c) Usage mining
 - d) Text mining
- 13) _____ is the bridge between data warehouse and decision support application.
- a) Logical data
 - b) Complex data
 - c) Nominal data
 - d) Metadata
- 14) A time series component, _____ can be positive or negative depending on whether the time series exhibits an increasing long term pattern or a decreasing long term pattern.
- a) Seasonal
 - b) Trend
 - c) Irregular
 - d) Cyclical

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives. 14

- 1) The problem of finding hidden structure in unlabeled data is called _____.
 a) Supervised learning b) Unsupervised learning
 c) Reinforcement learning d) none of these
- 2) Some telecommunication company wants to segment their customer into distinct groups in order to send appropriate subscription offer, this is an example of _____.
 a) Supervised learning b) Data extraction
 c) Serration d) Unsupervised learning
- 3) Self-organizing maps are example of _____.
 a) Unsupervised learning b) supervised learning
 c) Reinforcement learning d) Missing data imputation
- 4) Assume you want to perform supervised learning and to predict number of newborns according to size of strokes population _____.
 a) Classification b) Regression
 c) Clustering d) Grouping
- 5) Classification is _____.
 a) a subdivision of set of example into number of classes
 b) a measure of accuracy, of the classification of a concept that is given by a certain theory
 c) a task of assigning a classification to a set of examples
 d) All of above
- 6) Cluster is _____.
 a) Group of similar objects that differ significantly from other object
 b) Operation on database to transform or simplify data in order to prepare it for machine learning algorithms
 c) Symbolic representation of facts or ideas from which information can potentially be extracted
 d) all of above

Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

- Q.2 Attempt any Three. 12**
- a) What is data mining?
 - b) Explain classic problems in machine learning that are highly related to data mining.
 - c) Summarize the KDD process in detail?
 - d) Elaborate Histogram with example.
- Q.3 Attempt any Two. 16**
- a) Define each of the following data mining functionalities: characterization, discrimination, association and correlation analysis, classification, regression, clustering, and outlier analysis. Give examples of each data mining functionality, using a real-life database that you are familiar with.
 - b) Explain with an example Bayesian classification.
 - c) Why data need to be Preprocess?

Section – II

- Q.4 Attempt any Three. 12**
- a) What is cluster analysis?
 - b) Explain Sampling algorithm.
 - c) Explain Text mining hierarchy in detail.
 - d) Compare Data Mining and Web Mining.
- Q.5 Attempt any Two. 16**
- a) Illustrate the Partition algorithm with example.
 - b) What do you mean by Web Crawler? Elaborate the process of Web Crawler. List the names of web crawlers used by various search engines. Elaborate the types of outliers.
 - c) Identify an outlier using clustering-based outlier detection method with suitable example.

- 7) What does FP growth algorithm do?
a) It mines all frequent patterns through pruning rules with lesser support
b) It mines all frequent patterns through pruning rules with higher support
c) It mines all frequent patterns by constructing a FP tree
d) All of the above
- 8) The problem of finding hidden structure in unlabeled data is called _____.
a) Supervised learning b) Unsupervised learning
c) Reinforcement learning d) none of these
- 9) Some telecommunication company wants to segment their customer into distinct groups in order to send appropriate subscription offer, this is an example of _____.
a) Supervised learning b) Data extraction

Q.2 Attempt Any Three. 12

- What is new in management information systems?
- How information systems are transforming Business?
- How information systems impact on organizations?
- What are the challenges posed by strategic information systems?
- Elaborate relationship among ethical, social, political issues in an information society.

Q.3 Attempt Any Two. 16

- Describe organizations and its features in detail.
- Describe tools and technologies used for collaboration and social business.
- Elaborate challenges to the protection individual privacy and intellectual property.

Section – II

Q.4 Attempt Any Three. 12

- Describe components of IT Infrastructure.
- What are the major capabilities of database management systems?
- Describe different tools of Security Management.
- What are the different features of e-commerce?
- Describe auditing in IT Security.

Q.5 Attempt Any Two. 16

- Describe different types of networks.
- What are the contemporary software platform trends used in IT infrastructure?
- Describe role of M-commerce in business & its applications.

 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) Cloud computing services consists of _____ type of services.
 - a) IaaS
 - b) SaaS
 - c) PaaS
 - d) All of the options
- 2) _____ platforms include hardware, software and management services to support a firm's website including web hosting services, routers and or cabling and wireless equipments.
 - a) Internet
 - b) System management
 - c) Data management
 - d) Mainframe
- 3) Linux Perhaps the most well-known _____ software is Linux, an operating system related to Unix.
 - a) close source
 - b) open source
 - c) system
 - d) None of these
- 4) E-Commerce stands for _____.
 - a) Electrical Commerce
 - b) Entertainment Commerce
 - c) Electronic Commerce
 - d) All of the above
- 5) _____ are goods that can be delivered over a digital network.
 - a) Physical goods
 - b) Normal goods
 - c) Logical goods
 - d) Digital goods
- 6) _____ electronic commerce involves retailing products and services to individual shoppers.
 - a) Business-to-Consumer (B2C)
 - b) Business-to-Business (B2B)
 - c) Consumer-to-Consumer (C2C)
 - d) All of the above
- 7) In _____ mobile phones and handhelds are being used for mobile bill payment, banking and trading.
 - a) E-Commerce
 - b) M-Commerce
 - c) Both
 - d) None of these

Fourth Y. (B.Tech.) (Sem-II) (Old) (CBCS) Examination: March/April-2024
COMPUTER SCIENCE AND ENGINEERING
Management Information System (197043801)

Day & Date: Thursday 09-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt Any Three. 12

- What is new in management information systems?
- How information systems are transforming Business?
- How information systems impact on organizations?
- What are the challenges posed by strategic information systems?
- Elaborate relationship among ethical, social, political issues in an information society.

Q.3 Attempt Any Two. 16

- Describe organizations and its features in detail.
- Describe tools and technologies used for collaboration and social business.
- Elaborate challenges to the protection individual privacy and intellectual property.

Section – II

Q.4 Attempt Any Three. 12

- Describe components of IT Infrastructure.
- What are the major capabilities of database management systems?
- Describe different tools of Security Management.
- What are the different features of e-commerce?
- Describe auditing in IT Security.

Q.5 Attempt Any Two. 16

- Describe different types of networks.
- What are the contemporary software platform trends used in IT infrastructure?
- Describe role of M-commerce in business & its applications.

Seat No.

Fourth Y. (B.Tech.) (Sem-II) (Old) (CBCS) Examination: March/April-2024
COMPUTER SCIENCE AND ENGINEERING
Management Information System (197043801)

Day & Date: Thursday 09-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) E-Commerce stands for _____.
 a) Electrical Commerce b) Entertainment Commerce
 c) Electronic Commerce d) All of the above
- 2) _____ are goods that can be delivered over a digital network.
 a) Physical goods b) Normal goods
 c) Logical goods d) Digital goods
- 3) _____ electronic commerce involves retailing products and services to individual shoppers.
 a) Business-to-Consumer (B2C)
 b) Business-to-Business (B2B)
 c) Consumer-to-Consumer (C2C)
 d) All of the above
- 4) In _____ mobile phones and handhelds are being used for mobile bill payment, banking and trading.
 a) E-Commerce b) M-Commerce
 c) Both d) None of these
- 5) Following is one of the components of MIS _____.
 a) management b) procedure
 c) outcome d) analysis
- 6) The back bone of any organization is _____.
 a) employee b) information
 c) management d) capital
- 7) An _____ is a stable, formal social structure that takes resource from the environment and processes them to produce outputs.
 a) Union b) Association
 c) Organization d) None of these
- 8) _____ are also called as standard operating procedure in an organization.
 a) Politics b) Culture
 c) Management d) Routines

- 9) _____ refers to the principles of right and wrong that individuals, acting as free moral agents, use to make choice to guide their behaviours.
- a) Ethics
 - b) Human Rights
 - c) Laws
 - d) Obligations
- 10) _____ can take information about people from many disparate resources such as employee applications, telephone records, customer listing.
- a) NOVA
 - b) NORA
 - c) NOPA
 - d) NOSA
- 11) In IT infrastructure consists of a set of _____ and software applications that are required to operate the entire enterprise.
- a) Perceptual devices
 - b) Logical devices
 - c) Physical devices
 - d) Virtual devices
- 12) Cloud computing services consists of _____ type of services.
- a) IaaS
 - b) SaaS
 - c) PaaS
 - d) All of the options

Marks:14

Q.1 Choose the correct alternatives from the options. 14

- 1) The DES Algorithm Cipher System consists of _____ rounds (iterations) each with a round key.

a) 12	b) 18
c) 9	d) 6
- 2) What is $11 \pmod 7$ and $-11 \pmod 7$?

a) 4 and 5	b) 4 and 4
c) 5 and 3	d) 4 and -4
- 3) Another name for Message authentication codes is _____.

a) cryptographic codebreak	b) cryptographic code sum
c) cryptographic checksum	d) cryptographic check break
- 4) DES follows

a) Hash Algorithm	b) Caesars Cipher
c) Feistel Cipher Structure	d) SP Networks
- 5) In RSA, $\Phi(n) =$ _____ in terms of p and q

a) $(p)/(q)$	b) $(p)(q)$
c) $(p-1)(q-1)$	d) $(p+1)(q+1)$
- 6) Caesar Cipher is an example of _____.

a) Poly-alphabetic Cipher	b) Mono-alphabetic Cipher
c) Multi-alphabetic Cipher	d) Bi-alphabetic Cipher
- 7) Which of the following is not a type of symmetric-key cryptography technique?

a) Caesar cipher	b) Data encryption standard (des)
c) Diffie hellman cipher	d) Playfair cipher

Max. Marks: 56

Instructions: 1) All questions are compulsory.
 2) Figures to the right indicate full marks.

Section – I

- Q.2 Answer any three** **12**
- a) What is symmetric key cryptography? Explain Fiestel cipher structure.
 - b) Explain RSA algorithm and Perform encryption and decryption using RSA with $p=7$, $q=11$, $e=7$, $m=9$
 - c) Explain Message Authentication code in detail with diagram.
 - d) Illustrate the working of Digital Signature standard with diagram.
- Q.3 Attempt any one question** **08**
- a) What are the principles of Public key Cryptosystem in Information Security? Explain Diffie-Hellman key exchange with example.
 - b) What is hash function? What is difference between hash code and MAC? State requirements for hash function.
- Q.4** Explain the working of DES with neat diagram. **08**

Section – II

- Q.5 Attempt any Three questions** **12**
- a) What is distributed consensus? Explain proof of stake in detail.
 - b) What is mean by Email security? Explain PGP.
 - c) What do you mean by blockchain? Explain Blockchain Merkle Tree.
 - d) What is cyber crime? explain ways to investigate cyber crime.
- Q.6 Answer any One** **08**
- a) What is blockchain Mining? Explain it in detail.
 - b) What are the cyber security standards? Explain in detail any four.
- Q.7** What is IP security? Explain IP security Architecture in detail. **08**

Seat No.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the options.

14

- 1) In tunnel mode, IPsec protects the _____.
 - a) Entire IP packet
 - b) IP header
 - c) IP payload
 - d) IP trailer
- 2) Which component is included in IP security?
 - a) Authentication Header (AH)
 - b) Encapsulating Security Payload (ESP)
 - c) Internet Key Exchange (IKE)
 - d) All of the mentioned
- 3) Pretty good privacy (PGP) is used in _____.
 - a) Browser security
 - b) Email security
 - c) FTP security
 - d) WiFi security
- 4) What does a block in a Blockchain have?
 - a) Header & Digital ledger
 - b) Bitcoins & Input
 - c) Transactions & Bitcoins
 - d) Header & Transaction
- 5) _____ receive verify, gather and execute transactions.
 - a) Miner nodes
 - b) Smart Contract
 - c) Light wallets
 - d) Ethereum full node
- 6) What is Blockchain?
 - a) A currency
 - b) A ledger
 - c) A type of currency
 - d) A distributed ledger on a peer-to-peer network
- 7) IPsec is designed to provide security at the _____.
 - a) Transport layer
 - b) Network layer
 - c) Application layer
 - d) Session layer
- 8) The DES Algorithm Cipher System consists of _____ rounds (iterations) each with a round key.
 - a) 12
 - b) 18
 - c) 9
 - d) 6

- 9) What is $11 \bmod 7$ and $-11 \bmod 7$?
a) 4 and 5
b) 4 and 4
c) 5 and 3
d) 4 and -4
- 10) Another name for Message authentication codes is _____.
a) cryptographic codebreak
b) cryptographic code sum
c) cryptographic checksum
d) cryptographic check break
- 11) DES follows
a) Hash Algorithm
b) Caesars Cipher
c) Feistel Cipher Structure
d) SP Networks
- 12) In RSA, $\Phi(n) =$ _____ in terms of p and q
a) $(p)/(q)$
b) $(p)(q)$
c) $(p-1)(q-1)$
d) $(p+1)(q+1)$
- 13) Caesar Cipher is an example of _____.
a) Poly-alphabetic Cipher
b) Mono-alphabetic Cipher
c) Multi-alphabetic Cipher
d) Bi-alphabetic Cipher

- a) What are the principles of Public key Cryptosystem in Information Security? Explain Diffie-Hellman key exchange with example.
 - b) What is hash function? What is difference between hash code and MAC? State requirements for hash function.
- Q.4** Explain the working of DES with neat diagram. **08**

Section – II

- Q.5 Attempt any Three questions** **12**
- a) What is distributed consensus? Explain proof of stake in detail.
 - b) What is mean by Email security? Explain PGP.
 - c) What do you mean by blockchain? Explain Blockchain Merkle Tree.
 - d) What is cyber crime? explain ways to investigate cyber crime.
- Q.6 Answer any One** **08**
- a) What is blockchain Mining? Explain it in detail.
 - b) What are the cyber security standards? Explain in detail any four.
- Q.7** What is IP security? Explain IP security Architecture in detail. **08**

----------	--

**Fourth Y (B.Tech.) (Sem-II) (Old) (CBCS) Examination: March/April-2024
COMPUTAR SCIENCE & ENGINEERING
Bigdata Analytics (197043805)**

Day & Date: Saturday 11-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No.3 (starting page of the Answer Book). Each question carry one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives.

14

- 1) _____ characteristic of data explains the spikes in data.
 - a) Veracity
 - b) Validity
 - c) Variability
 - d) Volatility
- 2) Point out the correct statement.
 - a) Hadoop do need specialized hardware to process the data
 - b) Hadoop 2.0 allows live stream processing of real-time data
 - c) In the Hadoop programming framework output files are divided into lines or records
 - d) None of the mentioned
- 3) Hadoop is a framework that works with a variety of related tools. Common cohorts include _____.
 - a) MapReduce, Hive and HBase
 - b) MapReduce, MySQL and Google Apps
 - c) MapReduce, Hummer and Iguana
 - d) MapReduce, Heron and Trumpet
- 4) In Apache Cassandra, there is master-client architecture.
 - a) True
 - b) False
- 5) Consider the following statements:

Statement 1: The Job Tracker is hosted inside the master and it receives the job execution request from the client.

Statement 2: Task tracker is the MapReduce component on the slave machine as there are multiple slave machines.

 - a) Only statement 1 is true
 - b) Only statement 2 is true
 - c) Both statements are true
 - d) Both statements are false
- 6) The number of maps in MapReduce is usually driven by the total size of _____.
 - a) Inputs
 - b) Outputs
 - c) Tasks
 - d) None of the mentioned

- 7) MongoDB adheres to _____ and _____ traits of CAP theorem.
- Consistency and Availability
 - Consistency and Partition
 - Availability and Partition
 - None of these
- 8) Consider the pseudo-code for MapReduce's WordCount example (not shown here). Let's now assume that you want to determine the frequency of phrases consisting of 3 words each instead of determining the frequency of single words. Which part of the (pseudo-)code do you need to adapt?
- Only map()
 - Only reduce()
 - map() and reduce()
 - The code does not have to be changed
- 9) Which of the following is NOT a property of Cassandra?
- ACID operations
 - Decentralized deployments
 - Simple Transactions
 - Supports every type of data
- 10) Which of the following command is correct when we want to fetch documents from a collection for "only those employees whose salary is either 8500 or 10000"?
- `db.employees.find.sort({"salary":{"$in":[8500,1000]}})`
 - `db.employees.find({"salary":{"$in":[8500,1000]}})`
 - `db.employees.find({"salary":{"$in:[8500,1000]}})`
 - `db.employees.find({"salary":{"$in:{8500,1000}}})`
- 11) _____ is Data warehousing tool.
- Jaspersoft studio
 - Cassandra
 - Pig
 - Hive
- 12) The interactive mode of Pig is _____.
- CQLSH
 - HQL
 - GRUNT
 - CDBSH
- 13) Hive is used to query _____ data built on top of hadoop.
- Unstructured data
 - Structured data
 - Semi-structured
 - Any type of data
- 14) Apache Pig is _____.
- a high-level data flow tool
 - a low-level data processing tool
 - a data warehousing tool
 - a report generation tool

Seat No.

Set **P**

Fourth Y (B.Tech.) (Sem-II) (Old) (CBCS) Examination: March/April-2024
COMPUTAR SCIENCE & ENGINEERING
Bigdata Analytics (197043805)

Day & Date: Saturday 11-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
 2) Figures to the right indicate full marks.
 3) Assume suitable data if necessary.

Section – I

Q.2 Attempt any Three of the following questions. 12

- a) Categorize the following words into structured, unstructured and semi-structured category
 Email, MS Access, Images, Database, chat conversations, Facebook, Videos, XML, Twitter msg, OLTP systems.
- b) State CAP theorem. Define three terminologies of CAP.
- c) Explain In-Memory Analytics and In-Database processing.
- d) Demonstrate Anatomy of File-write operation in Hadoop with diagram.
- e) Place the following into basket of SQL and NOSQL:
 Relational, Distributed, Vertically scalable, ACID properties, horizontal scaling, CouchDB, JSON data, Pre-defined schema, MySQL, Avoids Join operations

Q.3 Attempt any One. 08

- a) With diagram explain the Big data Stack in detail.
- b) Explain the MapReduce programming workflow with diagram.

Q.4 What is Big Data Analytics? Explain all the characteristics of Big Data. 08

Section – II

Q.5 Attempt any Three of the following questions. 12

- a) List four important differences between RDBMS and Mongo DB.
- b) Write the queries for the following in MongoDB.
 - a) Create the collection "**accounts**" with documents having "Acc_id", "Acc_bal" and "Acc_type" Acc_type is 'S' for saving type and 'C' for current type accounts
 - b) Group on "Acc_id" and compute the average of the "Acc_bal" and determine the max "Acc_bal" for each group.
- c) What is KEYSPACE in Cassandra? Explain with example.
- d) Illustrate the use of important data types with example in Apache Pig: bytearray, tuple, bag and map.
- e) Demonstrate the use of following operators in Pig Latin with example:
 - a) LOAD
 - b) ORDER BY
 - c) FILTER
 - d) UNION

Q.6 Attempt any One.

08

- a) Explain replication, auto sharding, updating information In-place and implementation of cursor in MongoDB.
- b) List & explain the features of Cassandra.

Q.7 Draw the architecture of Hive and explain its components.

08

Set **Q**

Fourth Y (B.Tech.) (Sem-II) (Old) (CBCS) Examination: March/April-2024
COMPUTAR SCIENCE & ENGINEERING
Bigdata Analytics (197043805)

Day & Date: Saturday 11-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
 2) Figures to the right indicate full marks.
 3) Assume suitable data if necessary.

Section – I

Q.2 Attempt any Three of the following questions. 12

- a) Categorize the following words into structured, unstructured and semi-structured category
 Email, MS Access, Images, Database, chat conversations, Facebook, Videos, XML, Twitter msg, OLTP systems.
- b) State CAP theorem. Define three terminologies of CAP.
- c) Explain In-Memory Analytics and In-Database processing.
- d) Demonstrate Anatomy of File-write operation in Hadoop with diagram.
- e) Place the following into basket of SQL and NOSQL:
 Relational, Distributed, Vertically scalable, ACID properties, horizontal scaling, CouchDB, JSON data, Pre-defined schema, MySQL, Avoids Join operations

Q.3 Attempt any One. 08

- a) With diagram explain the Big data Stack in detail.
- b) Explain the MapReduce programming workflow with diagram.

Q.4 What is Big Data Analytics? Explain all the characteristics of Big Data. 08

Section – II

Q.5 Attempt any Three of the following questions. 12

- a) List four important differences between RDBMS and Mongo DB.
- b) Write the queries for the following in MongoDB.
 - a) Create the collection "**accounts**" with documents having "Acc_id", "Acc_bal" and "Acc_type" Acc_type is 'S' for saving type and 'C' for current type accounts
 - b) Group on "Acc_id" and compute the average of the "Acc_bal" and determine the max "Acc_bal" for each group.
- c) What is KEYSPACE in Cassandra? Explain with example.
- d) Illustrate the use of important data types with example in Apache Pig: bytearray, tuple, bag and map.
- e) Demonstrate the use of following operators in Pig Latin with example:
 - a) LOAD
 - b) ORDER BY
 - c) FILTER
 - d) UNION

Q.6 Attempt any One.

- a) Explain replication, auto sharding, updating information In-place and implementation of cursor in MongoDB.
- b) List & explain the features of Cassandra.

Q.7 Draw the architecture of Hive and explain its components.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives.

14

- 1) _____ is Data warehousing tool.

a) Jaspersoft studio	b) Cassandra
c) Pig	d) Hive
- 2) The interactive mode of Pig is _____.

a) CQLSH	b) HQL
c) GRUNT	d) CDBSH
- 3) Hive is used to query _____ data built on top of hadoop.

a) Unstructured data	b) Structured data
c) Semi-structured	d) Any type of data
- 4) Apache Pig is _____.

a) a high-level data flow tool
b) a low-level data processing tool
c) a data warehousing tool
d) a report generation tool
- 5) _____ characteristic of data explains the spikes in data.

a) Veracity	b) Validity
c) Variability	d) Volatility
- 6) Point out the correct statement.

a) Hadoop do need specialized hardware to process the data
b) Hadoop 2.0 allows live stream processing of real-time data
c) In the Hadoop programming framework output files are divided into lines or records
d) None of the mentioned
- 7) Hadoop is a framework that works with a variety of related tools. Common cohorts include _____.

 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.
 4) Make suitable assumptions (if necessary and state them clearly).

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct Answer.

14

- 1) The Bag-of-Words approach _____.
 - a) keeps word order, keeps word multiplicity
 - b) keeps word order, disregards word multiplicity
 - c) disregards word order, disregards word multiplicity
 - d) disregards word order, keeps word multiplicity
- 2) Which is a model of measuring the incidence of known words?
 - a) A low weight in TF-IDF
 - b) A high weight in TF-IDF
 - c) A corpus
 - d) A bag of words
- 3) What is Coreference Resolution?
 - a) Anaphora Resolution
 - b) Given a sentence or larger chunk of text, determine which words ("mentions") refer to the same objects ("entities")
 - c) All of the mentioned
 - d) None of the mentioned
- 4) Which function would you use to retrieve the list of unique words?
 - a) fit_tranform()
 - b) CountVectorizer()
 - c) get_feature_names()
 - d) download()
- 5) What is Morphological Segmentation?
 - a) Does Discourse Analysis
 - b) Separate words into individual morphemes and identify the class of the morphemes
 - c) Is an extension of propositional logic
 - d) None of the mentioned
- 6) Which is the most useful metric from VADER for sentiment analysis?
 - a) Negative
 - b) Positivity
 - c) Intensity
 - d) Compound
- 7) Which are python libraries used in NLP?
 - a) pandas
 - b) spacy
 - c) nltk
 - d) All of above

- 8) Which step is the process of breaking down documents into smaller units of analysis?
- a) Ngrams
 - b) Tokenization
 - c) Stopwords
 - d) Corpus
- 9) WordNet refers to ____.
- a) A machine-readable thesaurus, and aspects of a dictionary
 - b) A hierarchically organized lexical database
 - c) Is a lexical database of semantic relations between words
 - d) All of above
- 10) Which are included in named entity recognition?
- a) Currency
 - b) Time and dates
 - c) Nouns
 - d) All of above
- 11) What are the Challenges in Word Sense Disambiguation (WSD)? Tick which is (FALSE) from the statements given below.
- a) Completely different algorithm might be needed for different applications
 - b) To decide the sense of the word because different senses can be very closely related
 - c) The problem of Inter-judge variance as the WSD systems are generally tested by having their results on a task compared against the task of human beings
 - d) Words can be easily divided into discrete sub-meanings
- 12) How do we get from NLP text analysis to stock price correlation?
- a) Convert parts of speech to categorical variables
 - b) Transform some NLP results into features
 - c) Recognize some named entities
 - d) All of above
- 13) NLP can be useful for ____.
- a) Automatic Text Summarization
 - b) Automatic Question-Answering Systems
 - c) Information Retrieval
 - d) All of the mentioned
- 14) Identify Semantic role or participant - **agent** from the below sentence.
"The boy kicked the ball"
- a) the boy
 - b) kicked
 - c) the
 - d) the ball

 3) Figures to the right indicates full marks.
 4) Make suitable assumptions (if necessary and state them clearly).

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct Answer.

14

- 1) Which step is the process of breaking down documents into smaller units of analysis?
 - a) Ngrams
 - b) Tokenization
 - c) Stopwords
 - d) Corpus
- 2) WordNet refers to _____.
 - a) A machine-readable thesaurus, and aspects of a dictionary
 - b) A hierarchically organized lexical database
 - c) Is a lexical database of semantic relations between words
 - d) All of above
- 3) Which are included in named entity recognition?
 - a) Currency
 - b) Time and dates
 - c) Nouns
 - d) All of above
- 4) What are the Challenges in Word Sense Disambiguation (WSD)? Tick which is (FALSE) from the statements given below.
 - a) Completely different algorithm might be needed for different applications
 - b) To decide the sense of the word because different senses can be very closely related
 - c) The problem of Inter-judge variance as the WSD systems are generally tested by having their results on a task compared against the task of human beings
 - d) Words can be easily divided into discrete sub-meanings
- 5) How do we get from NLP text analysis to stock price correlation?
 - a) Convert parts of speech to categorical variables
 - b) Transform some NLP results into features
 - c) Recognize some named entities
 - d) All of above

- 6) NLP can be useful for _____
- a) Automatic Text Summarization
 - b) Automatic Question-Answering Systems
 - c) Information Retrieval
 - d) All of the mentioned
- 7) Identify Semantic role or participant - **agent** from the below sentence.
"The boy kicked the ball"
- a) the boy
 - b) kicked
 - c) the
 - d) the ball
- 8) The Bag-of-Words approach _____.
- a) keeps word order, keeps word multiplicity
 - b) keeps word order, disregards word multiplicity
 - c) disregards word order, disregards word multiplicity
 - d) disregards word order, keeps word multiplicity
- 9) Which is a model of measuring the incidence of known words?
- a) A low weight in TF-IDF
 - b) A high weight in TF-IDF
 - c) A corpus
 - d) A bag of words
- 10) What is Coreference Resolution?
- a) Anaphora Resolution
 - b) Given a sentence or larger chunk of text, determine which words ("mentions") refer to the same objects ("entities")
 - c) All of the mentioned
 - d) None of the mentioned
- 11) Which function would you use to retrieve the list of unique words?
- a) `fit_transform()`
 - b) `CountVectorizer()`
 - c) `get_feature_names()`
 - d) `download()`
- 12) What is Morphological Segmentation?
- a) Does Discourse Analysis
 - b) Separate words into individual morphemes and identify the class of the morphemes
 - c) Is an extension of propositional logic
 - d) None of the mentioned
- 13) Which is the most useful metric from VADER for sentiment analysis?
- a) Negative
 - b) Positivity
 - c) Intensity
 - d) Compound
- 14) Which are python libraries used in NLP?
- a) pandas
 - b) spacy
 - c) nltk
 - d) All of above

Set

Q

Fourth Y. (B.Tech.) (Sem-II) (Old) (CBCS) Examination: March/April-2024
COMPUTAR SCIENCE & ENGINEERING
Natural Language Programming (197043806)

Day & Date: Saturday 11-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
 2) Figures to the right indicate full marks.
 3) Make suitable assumptions (if necessary and state them clearly).

Section – I

- Q.2 Attempt any Four** **16**
- a) What is Natural Language Processing?
 - b) Differentiate between Machine Learning and NLP
 - c) Explain Arg-Max Computation with suitable example.
 - d) What do you mean by metaphre in NLP? Discuss their uses.
 - e) Write a short note on WordNet.
- Q.3 Attempt any One** **06**
- a) What is Morphology? Explain Morphology paradigm, Morphology classes with example.
 - b) Explain Semantic Roles with example.
- Q.4 Explain Word Sense Disambiguation (WSD) in detail.** **06**

Section – II

- Q.5 Attempt any Four.** **16**
- a) Explain Top-dawn parsing.
 - b) Explain Sentiment Analysis with example.
 - c) Define the term Precision, Recall, F-Score.
 - d) What do you mean by Scope Ambiguity and Attachment Ambiguity resolution?
 - e) Explain Text Entailment with example.
- Q.6 Attempt any One** **06**
- a) Explain HMM in detail.
 - b) Explain Viterbi algorithm.
- Q.7 Enlist applications of NLP. Explain any one in detail.** **06**

Seat No.	
----------	--

Fourth Y. (B.Tech.) (Sem-II) (Old) (CBCS) Examination: March/April-2024
COMPUTAR SCIENCE & ENGINEERING
Natural Language Programming (197043806)

Day & Date: Saturday 11-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:**
- 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 - 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 - 3) Figures to the right indicates full marks.
 - 4) Make suitable assumptions (if necessary and state them clearly).

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct Answer.

14

- 1) What are the Challenges in Word Sense Disambiguation (WSD)? Tick which is (FALSE) from the statements given below.
 - a) Completely different algorithm might be needed for different applications
 - b) To decide the sense of the word because different senses can be very closely related
 - c) The problem of Inter-judge variance as the WSD systems are generally tested by having their results on a task compared against the task of human beings
 - d) Words can be easily divided into discrete sub-meanings
- 2) How do we get from NLP text analysis to stock price correlation?
 - a) Convert parts of speech to categorical variables
 - b) Transform some NLP results into features
 - c) Recognize some named entities
 - d) All of above
- 3) NLP can be useful for _____.
 - a) Automatic Text Summarization
 - b) Automatic Question-Answering Systems
 - c) Information Retrieval
 - d) All of the mentioned
- 4) Identify Semantic role or participant - **agent** from the below sentence. "The boy kicked the ball"

a) the boy	b) kicked
c) the	d) the ball
- 5) The Bag-of-Words approach _____.
 - a) keeps word order, keeps word multiplicity
 - b) keeps word order, disregards word multiplicity
 - c) disregards word order, disregards word multiplicity
 - d) disregards word order, keeps word multiplicity

- 6) Which is a model of measuring the incidence of known words?
a) A low weight in TF-IDF b) A high weight in TF-IDF
c) A corpus d) A bag of words
- 7) What is Coreference Resolution?
a) Anaphora Resolution
b) Given a sentence or larger chunk of text, determine which words ("mentions") refer to the same objects ("entities")
c) All of the mentioned
d) None of the mentioned
- 8) Which function would you use to retrieve the list of unique words?
a) fit_transform() b) CountVectorizer()
c) get_feature_names() d) download()
- 9) What is Morphological Segmentation?
a) Does Discourse Analysis
b) Separate words into individual morphemes and identify the class of the morphemes
c) Is an extension of propositional logic
d) None of the mentioned
- 10) Which is the most useful metric from VADER for sentiment analysis?
a) Negative b) Positivity
c) Intensity d) Compound
- 11) Which are python libraries used in NLP?
a) pandas b) spacy
c) nltk d) All of above
- 12) Which step is the process of breaking down documents into smaller units of analysis?
a) Ngrams b) Tokenization
c) Stopwords d) Corpus
- 13) WordNet refers to _____.
a) A machine-readable thesaurus, and aspects of a dictionary
b) A hierarchically organized lexical database
c) Is a lexical database of semantic relations between words
d) All of above

 4) Assume data wherever necessary

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the options. 14

- 1) Which of the following is not a type of cloud?

a) Private	b) Public
c) Protected	d) Hybrid
- 2) Which delivery model is an example of a cloud computing environment that provides users access to virtual machines?

a) Platform as a Service	b) Software as a Service
c) Application as a Service	d) Infrastructure as a Service
- 3) The term "hybrid cloud" refers to?
 - a) Private cloud
 - b) Public cloud
 - c) Combination of Public and Private cloud
 - d) None
- 4) Which of the following is an example of the cloud?

a) Amazon Web Services (AWS)	b) Dropbox
c) Cisco WebEx	d) All of the above
- 5) _____ is type 1 hypervisor.

a) KVM	b) Lynx Secure
c) Virtual Server 2005 R2	d) Wind River Simics
- 6) Which of the following are the features of cloud computing?

a) Security	b) Availability
c) Large Network Access	d) All of the mentioned
- 7) Data should be _____ and _____ in an _____ form for security purpose.

a) Transferred, stored, decrypted	b) Stored, encrypted, transferred
c) Transferred, stored, encrypted	d) None of these
- 8) Azure Storage plays the same role in Azure that _____ plays in Amazon Web Services.

a) S3	b) EC2
c) EC3	d) S2

- 9) Which one of the following cloud concepts is related to sharing and pooling the resources?
- a) Polymorphism
 - b) Virtualization
 - c) Abstraction
 - d) None of the mentioned
- 10) Point out the correct statement:
- a) A client can request access to a cloud service from any location
 - b) A cloud has multiple application instances and directs requests to an instance based on conditions
 - c) Computers can be partitioned into a set of virtual machines with each machine being assigned a workload
 - d) All of the mentioned
- 11) Which of the following software can be used to implement load balancing?
- a) Apache mod_balancer
 - b) Apache mod_proxy_balancer
 - c) F6's BigIP
 - d) All of the mentioned
- 12) Point out the wrong statement.
- a) Internet consumes roughly 1 percent of the world's total power
 - b) The cost advantages of cloud computing have enabled new software vendors to create productivity applications
 - c) A client can provision computer resources without the need for interaction with cloud service provider personnel
 - d) None of the mentioned
- 13) Cloud computing is a _____ system and it is necessarily unidirectional in nature.
- a) stateless
 - b) stateful
 - c) reliable
 - d) all of the mentioned
- 14) Which of the following is an edge-storage or content-delivery system that caches data in different physical locations?
- a) Amazon Relational Database Service
 - b) Amazon Simple DB
 - c) Amazon Cloud front
 - d) Amazon Associates Web Services

Set R

Fourth Y. (B.Tech.) (Sem-II) (Old) (CBCS) Examination: March/April-2024
COMPUTER SCIENCE AND ENGINEERING
Cloud Computing (197043807)

Day & Date: Monday, 13-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume data wherever necessary.

Section – I

- Q.2 Attempt any Three. 12**
a) Define the term cloud computing. Discuss its history in brief.
b) Differentiate between public cloud and private cloud.
c) What is Private cloud? Explain characteristics of private cloud.
d) What are the benefits of Openstack?
- Q.3 Attempt any One. 08**
a) Give difference between Private Cloud deployment models-Cloudstack and Openstack.
b) Explain the components of Google Cloud Architecture.
- Q.4 Explain cloud service models with suitable diagram. 08**

Section – II

- Q.5 Attempt any Three. 12**
a) What are the challenges in Cloud Computing in terms of Application Security?
b) Explain insecure interfaces and APIs. Discuss shared technology issues.
c) Explain how cloud computing is useful in business environment.
d) Explain migration paths for cloud.
- Q.6 Attempt any One. 08**
a) How data loss or leakage occur in cloud computing. What are its remediations?
b) List and discuss various current issues of cloud computing leading to future research directions.
- Q.7 What are the selection criteria for cloud deployment? 08**

Seat No.	
----------	--

Fourth Y. (B.Tech.) (Sem-II) (Old) (CBCS) Examination: March/April-2024
COMPUTER SCIENCE AND ENGINEERING
Cloud Computing (197043807)

Day & Date: Monday, 13-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.
 4) Assume data wherever necessary

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the options. 14

- 1) Which of the following are the features of cloud computing?
 - a) Security
 - b) Availability
 - c) Large Network Access
 - d) All of the mentioned
- 2) Data should be _____ and _____ in an _____ form for security purpose.
 - a) Transferred, stored, decrypted
 - b) Stored, encrypted, transferred
 - c) Transferred, stored, encrypted
 - d) None of these
- 3) Azure Storage plays the same role in Azure that _____ plays in Amazon Web Services.
 - a) S3
 - b) EC2
 - c) EC3
 - d) S2
- 4) Which one of the following cloud concepts is related to sharing and pooling the resources?
 - a) Polymorphism
 - b) Virtualization
 - c) Abstraction
 - d) None of the mentioned
- 5) Point out the correct statement:
 - a) A client can request access to a cloud service from any location
 - b) A cloud has multiple application instances and directs requests to an instance based on conditions
 - c) Computers can be partitioned into a set of virtual machines with each machine being assigned a workload
 - d) All of the mentioned
- 6) Which of the following software can be used to implement load balancing?
 - a) Apache mod_balancer
 - b) Apache mod_proxy_balancer
 - c) F6's BigIP
 - d) All of the mentioned

- 7) Point out the wrong statement.
- a) Internet consumes roughly 1 percent of the world's total power
 - b) The cost advantages of cloud computing have enabled new software vendors to create productivity applications
 - c) A client can provision computer resources without the need for interaction with cloud service provider personnel
 - d) None of the mentioned
- 8) Cloud computing is a _____ system and it is necessarily unidirectional in nature.
- a) stateless
 - b) stateful
 - c) reliable
 - d) all of the mentioned
- 9) Which of the following is an edge-storage or content-delivery system that caches data in different physical locations?
- a) Amazon Relational Database Service
 - b) Amazon Simple DB
 - c) Amazon Cloud front
 - d) Amazon Associates Web Services
- 10) Which of the following is not a type of cloud?
- a) Private
 - b) Public
 - c) Protected
 - d) Hybrid
- 11) Which delivery model is an example of a cloud computing environment that provides users access to virtual machines?
- a) Platform as a Service
 - b) Software as a Service
 - c) Application as a Service
 - d) Infrastructure as a Service
- 12) The term "hybrid cloud" refers to?
- a) Private cloud
 - b) Public cloud
 - c) Combination of Public and Private cloud
 - d) None
- 13) Which of the following is an example of the cloud?
- a) Amazon Web Services (AWS)
 - b) Dropbox
 - c) Cisco WebEx
 - d) All of the above
- 14) _____ is type 1 hypervisor.
- a) KVM
 - b) Lynx Secure
 - c) Virtual Server 2005 R2
 - d) Wind River Simics

Seat No.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) _____ is a recommended Model for Pattern Recognition in Unlabelled Data.
 - a) Shallow Neural Networks
 - b) Auto encoders
 - c) RNN
 - d) CNN
- 2) What is the method to overcome the Decay of Information through time in RNN known as?
 - a) Back Propagation
 - b) Gradient Descent
 - c) Activation
 - d) Gating
- 3) De-noising and Contractive are examples of _____.
 - a) Shallow Neural Networks
 - b) Auto encoders
 - c) Convolution Neural Networks
 - d) Recurrent Neural Networks
- 4) Auto encoders cannot be used for Dimensionality Reduction.
 - a) False
 - b) True
- 5) What will happen when we will increase the machine learning model complexity?
 - a) bias increases
 - b) bias decreases
 - c) variance increases
 - d) variance decreases
- 6) _____ is an example of hyper parameters
 - a) Learning rate
 - b) Loss function
 - c) Under-fitting
 - d) All a, b, c
- 7) What will happen to our machine learning model if the number of features is more than the number of data elements in our dataset?
 - a) It will be in under-fitting
 - b) It will not work
 - c) It will be in overfitting
 - d) It will not be affected

Time: 03:00 PM To 06:00 PM

Max. Marks: 56

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

- Q.2 Attempt Any Four. 16**
- a) Write differences between LOOCV and K fold cross validation.
 - b) Explain architectural design.
 - c) Explain cost function in detail.
 - d) Enlist different deep learning software libraries.
 - e) What is regularization, explain its different method.
- Q.3 Attempt Any One. 06**
- a) Explain RNN and CNN in details.
 - b) Explain LSTM in details.
- Q.4 Attempt the following. 06**
- Explain any four activation function.

Section – II

- Q.5 Attempt Any Four. 16**
- a) Explain computer Vision.
 - b) Define Metric Learning, explain it in details.
 - c) Write different applications of auto encoder.
 - d) Explain RCNNs with Keras.
 - e) Explain the use of auto encoder in dimensionality reduction & classification.
- Q.6 Attempt Any One. 06**
- a) Explain transfer learning.
 - b) Explain Deep learning optimizers.
- Q.7 Attempt the following. 06**
- Explain SGD optimizer for CNNs.

Seat No.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) _____ computes the output volume by computing dot product between all filters and image patch.

a) Input Layer	b) Convolution Layer
c) Activation Function Layer	d) Pool Layer
- 2) _____ is a pooling operation that selects the maximum element from the region of the feature map covered by the filter.

a) Max Pooling	b) Average Pooling
c) Global pooling	d) None of these
- 3) The rate at which cost changes with respect to weight or bias is called _____.

a) Derivative	b) Gradient
c) Rate of Change	d) Loss
- 4) Recurrent Neural Networks are best suited for Text Processing.

a) True	b) False
---------	----------
- 5) Which of the following functions can be used as an activation function in the output layer if we wish to predict the probabilities of n classes (p_1, p_2, \dots, p_k) such that sum of p over all n equals to 1?

a) Softmax	b) ReLu
c) Sigmoid	d) Tanh

- 6) The red curve below denotes training accuracy with respect to each epoch in a deep learning algorithm. Both the green and blue curves denote validation accuracy. Which of these indicate overfitting?

- a) Green Curve
b) Blue Curve
c) None
d) Red curve
- 7) What does LSTM stand for?
a) Long Short Term Memory
b) Least Squares Term Memory
c) Least Square Time Mean
d) Long Short Threshold Memory
- 8) _____ is a recommended Model for Pattern Recognition in Unlabelled Data.
a) Shallow Neural Networks
b) Auto encoders
c) RNN
d) CNN
- 9) What is the method to overcome the Decay of Information through time in RNN known as?
a) Back Propagation
b) Gradient Descent
c) Activation
d) Gating
- 10) De-noising and Contractive are examples of _____.
a) Shallow Neural Networks
b) Auto encoders
c) Convolution Neural Networks
d) Recurrent Neural Networks
- 11) Auto encoders cannot be used for Dimensionality Reduction.
a) False
b) True
- 12) What will happen when we will increase the machine learning model complexity?
a) bias increases
b) bias decreases
c) variance increases
d) variance decreases
- 13) _____ is an example of hyper parameters
a) Learning rate
b) Loss function
c) Under-fitting
d) All a, b, c
- 14) What will happen to our machine learning model if the number of features is more than the number of data elements in our dataset?

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) Total flux passing through closed surface held in magnetic field is _____.
 - a) Infinity
 - b) Zero
 - c) Unity
 - d) None of the above
- 2) Magnetic flux density is relation of _____.
 - a) Current & area
 - b) area & its direction
 - c) Magnetic flux & area
 - d) None of the above
- 3) The γ is known as _____.
 - a) Propagation constant
 - b) Attenuation constant
 - c) Absolute constant
 - d) None of the above
- 4) An Electric field of dipole varies _____.
 - a) $1/r$
 - b) $1/r^2$
 - c) $1/r^3$
 - d) None
- 5) A point charge $(+)Q \dots C$ is 10 cm from second point charge of $(-)Q \dots C$, the direction of the force on each charge is _____.
 - a) Away from each other
 - b) Towards each other
 - c) from the mid-point
 - d) None
- 6) For lossless transmission line _____.
 - a) $R = 0, G = 0$
 - b) $G = 0, \alpha = \beta$
 - c) $R = 0, G = 0, \beta = 0$
 - d) All of the above
- 7) Identify the correct Statement
 - a) $\bar{a}x \cdot \bar{a}x = 1$
 - b) $\bar{a}x \cdot \bar{a}y = 0$
 - c) both a & b
 - d) None of the above
- 8) An Example of Vector field is _____.
 - a) Electric Potential
 - b) Temp Distribution
 - c) Magnetic field Intensity
 - d) All of the above
- 9) Significance of Gauss law is _____.
 - a) Non-existence of monopole
 - b) existence of Source & sink
 - c) Both a & b
 - d) None

- 10) Identify which of the following is the unit of magnetic Potential?
a) Weber
b) Weber/m
c) Tesla
d) Weber⁻¹
- 11) Stokes theorem is _____.
a) $\int Hdl = I$
b) $\int Hdl = \int (\nabla \times H) \times ds$
c) $\int Hdl = \int (\nabla \times H) \cdot ds$
d) None
- 12) Velocity of electromagnetic wave in free space is _____.
a) 1.5×10^8 m/s
b) 3×10^8 m/s
c) 2×10^8 m/s
d) None of these
- 13) Current through capacitor is called _____.
a) J
b) J_d
c) $J + J_d$
d) Cannot say
- 14) Maxwell's equations involve _____.
a) Charge density
b) Current density
c) Magnetic intensity
d) All of these

T. Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Electromagnetic Field Theory (BTN06501)

Day & Date: Monday, 13-05-2024
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

Instructions: 1) All questions are compulsory.
 2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any four. **16**

- Derive an expression for current carrying conductor in magnetic fields.
- Transform $A = 7\bar{a}_r + 5\bar{a}_\theta + 3\bar{a}_\phi$ at point $P(3, 45^\circ, 45^\circ)$ into Cartesian.
- If $V = 60 \sin \theta / r^2 \dots V$ in free space at point $P(r = 1m, \theta = 45^\circ, \phi = 60^\circ)$
 Calculate
 - V
 - E
- State and explain Ampere circuital law of magneto statics.
- Point Charge $300\mu C$ located at $(1, -1, -3)m$ experiences the force $\bar{F}_1 = 8\bar{a}_x - 8\bar{a}_y + 4\bar{a}_z(N)$ due to point charge Q_2 at $(3, -3, -2)m$. Determine Q_2 .

Q.3 Attempt any two. **12**

- Derive the equation for \bar{E} due to infinite volume charge
- Derive a Boundary conditions for Magneto static fields.
- Evaluate both sides of Divergence theorem for the field $D = 2xy\bar{a}_x + x^2\bar{a}_y \dots C/m^2$ & rectangular parallel pipe bounded by plane. $X = 0$ & $X = 1$; $Y = 0$ & $Y = 2$; $Z = 0$ & $Z = 3$

Section – II

Q.4 Attempt any four. **16**

- A coil has conductivity $\sigma = 10^{-3}$, relative permeability $\epsilon_r = 2.5$. Find conduction current & displacement current density for $E = 6 \times 10^6 \sin(9 \times 10^9 t)$
- Derive an expression for modification of wave equation for sinusoidal time variations.
- Derive Maxwell equation in point and integral form of time varying field.
- Find Skin depth δ at frequency of 1.6 MHz in aluminum where $\sigma = 38.2 \text{ mho/m}$ & $\mu_r = 1$.
- Derive an expression for reflection coefficient with reference to transmission line.

Q.5 Attempt any two.

a)

Find the following Parameters from smith Chart.

- i) VSWR
 - ii) Reflection Coefficient
 - iii) Input impedance
- b)** Show that power flow for plane wave is given by $E \times H$.
- c)** Open wire telephone line has $R = 10 \text{ ohm/km}$, $L = 0.004 \text{ H/Km}$, $C = 0.008 \times 10^{-6} \text{ f/km}$ & $G = 0.4 \times 10^{-6} \text{ Ohm/km}$. Determine Z_0 , α , β at 1 KHZ.

ELECTRONICS & TELECOMMUNICATION ENGINEERING
Electromagnetic Field Theory (BTN06501)

Day & Date: Monday, 13-05-2024
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) An Example of Vector field is _____.
 - a) Electric Potential
 - b) Temp Distribution
 - c) Magnetic field Intensity
 - d) All of the above
- 2) Significance of Gauss law is _____.
 - a) Non-existence of monopole
 - b) existence of Source & sink
 - c) Both a & b
 - d) None
- 3) Identify which of the following is the unit of magnetic Potential?
 - a) Weber
 - b) Weber/m
 - c) Tesla
 - d) Weber⁻¹
- 4) Stokes theorem is _____.
 - a) $\int Hdl = I$
 - b) $\int Hdl = \int (\nabla \times H) \cdot ds$
 - c) $\int Hdl = \int (\nabla \times H) \cdot ds$
 - d) None
- 5) Velocity of electromagnetic wave in free space is _____.
 - a) 1.5×10^8 m/s
 - b) 3×10^8 m/s
 - c) 2×10^8 m/s
 - d) None of these
- 6) Current through capacitor is called _____.
 - a) J
 - b) J_d
 - c) $J + J_d$
 - d) Cannot say
- 7) Maxwell's equations involve _____.
 - a) Charge density
 - b) Current density
 - c) Magnetic intensity
 - d) All of these
- 8) Total flux passing through closed surface held in magnetic field is _____.
 - a) Infinity
 - b) Zero
 - c) Unity
 - d) None of the above
- 9) Magnetic flux density is relation of _____.
 - a) Current & area
 - b) area & its direction
 - c) Magnetic flux & area
 - d) None of the above

- 10) The γ is known as ____.
- a) Propagation constant b) Attenuation constant
c) Absolute constant d) None of the above
- 11) An Electric field of dipole varies ____.
- a) $1/r$ b) $1/r^2$
c) $1/r^3$ d) None
- 12) A point charge $(+)Q \dots C$ is 10 cm from second point charge of $(-)Q \dots C$, the direction of the force on each charge is ____.
- a) Away from each other b) Towards each other
c) from the mid-point d) None
- 13) For lossless transmission line ____.
- a) $R = 0, G = 0$ b) $G = 0, \alpha = \beta$
c) $R = 0, G = 0, \beta = 0$ d) All of the above
- 14) Identify the correct Statement
- a) $\bar{a}x \cdot \bar{a}x = 1$ b) $\bar{a}x \cdot \bar{a}y = 0$
c) both a & b d) None of the above

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 MCQs/ Objective type questions**14**

- 1) The internal RAM memory of the 8051 is:
 - a) 32 bytes
 - b) 64 bytes
 - c) 128 bytes
 - d) 256 bytes
- 2) This program code will be executed continuously:
 STAT: MOV A, #01h
 JNZ STAT
 - a) True
 - b) False
- 3) Data transfer from I/O to external data memory can only be done with the MOVX command.
 - a) True
 - b) False
- 4) MOV A, @R1 will:
 - a) copy R1 to the Accumulator
 - b) copy the Accumulator to R1
 - c) copy the contents of memory whose address is in R1 to Accumulator
 - d) copy the contents of Accumulator to memory whose address is in R1
- 5) When the 8051 is reset and the \overline{EA} line is HIGH, the program counter points to the first program instruction in the _____.
 - a) Internal code memory
 - b) External code memory
 - c) Internal data memory
 - d) External data memory
- 6) The total external data memory that can be interfaced to the 8051 is _____.
 - a) 32 Kbytes
 - b) 64 Kbytes
 - c) 128 Kbytes
 - d) 256 Kbytes
- 7) Which of the following instructions will load the value 35H into the high byte of timer 0?
 - a) MOV TH0,#35h
 - b) MOV TH0,35h
 - c) MOV T0,#35h
 - d) MOV T0,35h

Time: 10:00 AM To 01:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any four of the following. 16

- Draw architecture/ schematic of 8051. Explain function of each block in detail.
- Explain different groups of Instruction Set in 8051.
- Write ALP to insert a delay of 1ms using registers.
- Compare between Assembly Language and C-programming language.
- Explain PSW register in 8051.

Q.3 Solve any two of the following. 12

- Draw and explain the External Memory Interfacing with 8051. Attach 4KB RAM. Also find the starting and end address.
- Write ALP to interface the 4×4 matrix keyboard with 8051.
- Write in details the Timers, and associated registers in 8051.

Section – II

Q.4 Solve any four of the following. 16

- Explain the advantages of PIC over microcontroller.
- Explain the Architecture of PIC 16F877A.
- Explain the different PORTS available in PIC 16F877A.
- Write a short note on
 - OPTION_REG register
 - STATUS register in PIC 16F877A
- Write a short note on
 - WDT
 - CCP module

Q.5 Solve any two of the following. 12

- What is Configuration word? Explain the bit format in that.
- What is Interrupt? List out the Low order and high priority Interrupts in PIC 16F877A.
- Explain the serial communication using USART.

 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 MCQs/ Objective type questions**14**

- 1) How many clock pulses are confined by each machine cycle of Peripheral-Interface Controllers?

a) 4	b) 8
c) 12	d) 16
- 2) Where is the result stored after an execution of increment and decrement operations over the special - purpose registers in PIC?

a) File Register	b) Working Register
c) Both a & b	d) None of the above
- 3) What is the purpose of a special function register SPBRG in USART?

a) To control the operation associated with baud rate generation	b) To control an oscillator frequency
c) To control or prevent the false bit transmission of 9 th bitr.	d) All of the above
- 4) PIC microcontrollers consist of _____ timers, out of which _____ is a 16-bit timer.

a) 3, Timer 1	b) 3, Timer 0
c) 2, Timer 2	d) 3, Timer 3
- 5) The internal RAM memory of the 8051 is:

a) 32 bytes	b) 64 bytes
c) 128 bytes	d) 256 bytes
- 6) This program code will be executed continuously:
 STAT: MOV A, #01h
 JNZ STAT

a) True	b) False
---------	----------
- 7) Data transfer from I/O to external data memory can only be done with the MOVX command.

a) True	b) False
---------	----------

- 8) MOV A, @R1 will:
- copy R1 to the Accumulator
 - copy the Accumulator to R1
 - copy the contents of memory whose address is in R1 to Accumulator
 - copy the contents of Accumulator to memory whose address is in R1
- 9) When the 8051 is reset and the \overline{EA} line is HIGH, the program counter points to the first program instruction in the _____.
- Internal code memory
 - External code memory
 - Internal data memory
 - External data memory
- 10) The total external data memory that can be interfaced to the 8051 is _____
- 32 Kbytes
 - 64 Kbytes
 - 128 Kbytes
 - 256 Kbytes
- 11) Which of the following instructions will load the value 35H into the high byte of timer 0?
- MOV TH0,#35h
 - MOV TH0,35h
 - MOV T0,#35h
 - MOV T0,35h
- 12) The contents of the accumulator after this operation
MOV A,#0BH
ANL A,#2CH
will be _____.
- 11010111
 - 11011010
 - 00001000
 - 00101000
- 13) Which operational feature of PIC allows it to reset especially when the power supply drops the voltage below 4V?
- Built-in Power-on-reset
 - Brown-out reset
 - Both a & b
 - None of the above
- 14) Which flags are more likely to get affected in status registers by Arithmetic and Logical Unit (ALU) of PIC 16 CXX on the basis of instructions execution?
- Carry (C) Flags
 - Zero (Z) Flags
 - Digit Carry (DC) Flags
 - All of the above

T. Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Microcontrollers and Applications (BTN06502)

Day & Date: Tuesday, 14-05-2024
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

Instructions: 1) All questions are compulsory.
 2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any four of the following. 16

- a) Draw architecture/ schematic of 8051. Explain function of each block in detail.
- b) Explain different groups of Instruction Set in 8051.
- c) Write ALP to insert a delay of 1ms using registers.
- d) Compare between Assembly Language and C-programming language.
- e) Explain PSW register in 8051.

Q.3 Solve any two of the following. 12

- a) Draw and explain the External Memory Interfacing with 8051. Attach 4KB RAM. Also find the starting and end address.
- b) Write ALP to interface the 4×4 matrix keyboard with 8051.
- c) Write in details the Timers, and associated registers in 8051.

Section – II

Q.4 Solve any four of the following. 16

- a) Explain the advantages of PIC over microcontroller.
- b) Explain the Architecture of PIC 16F877A.
- c) Explain the different PORTS available in PIC 16F877A.
- d) Write a short note on
 - i) OPTION_REG register
 - ii) STATUS register in PIC 16F877A
- e) Write a short note on
 - i) WDT
 - ii) CCP module

Q.5 Solve any two of the following. 12

- a) What is Configuration word? Explain the bit format in that.
- b) What is Interrupt? List out the Low order and high priority Interrupts in PIC 16F877A.
- c) Explain the serial communication using USART.

Seat No.

Set **S**

T. Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Microcontrollers and Applications (BTN06502)

Day & Date: Tuesday, 14-05-2024
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 MCQs/ Objective type questions**14**

- 1) The total external data memory that can be interfaced to the 8051 is ____
 - a) 32 Kbytes
 - b) 64 Kbytes
 - c) 128 Kbytes
 - d) 256 Kbytes
- 2) Which of the following instructions will load the value 35H into the high byte of timer 0?
 - a) MOV TH0,#35h
 - b) MOV TH0,35h
 - c) MOV T0,#35h
 - d) MOV T0,35h
- 3) The contents of the accumulator after this operation
 MOV A,#0BH
 ANL A,#2CH
 will be _____.
 - a) 11010111
 - b) 11011010
 - c) 00001000
 - d) 00101000
- 4) Which operational feature of PIC allows it to reset especially when the power supply drops the voltage below 4V?
 - a) Built-in Power-on-reset
 - b) Brown-out reset
 - c) Both a & b
 - d) None of the above
- 5) Which flags are more likely to get affected in status registers by Arithmetic and Logical Unit (ALU) of PIC 16 CXX on the basis of instructions execution?
 - a) Carry (C) Flags
 - b) Zero (Z) Flags
 - c) Digit Carry (DC) Flags
 - d) All of the above
- 6) How many clock pulses are confined by each machine cycle of Peripheral-Interface Controllers?
 - a) 4
 - b) 8
 - c) 12
 - d) 16
- 7) Where is the result stored after an execution of increment and decrement operations over the special - purpose registers in PIC?
 - a) File Register
 - b) Working Register
 - c) Both a & b
 - d) None of the above

- 8) What is the purpose of a special function register SPBRG in USART?
- a) To control the operation associated with baud rate generation
 - b) To control an oscillator frequency
 - c) To control or prevent the false bit transmission of 9th bitr.
 - d) All of the above
- 9) PIC microcontrollers consist of _____ timers, out of which _____ is a 16-bit timer.
- a) 3, Timer 1
 - b) 3, Timer 0
 - c) 2, Timer 2
 - d) 3, Timer 3
- 10) The internal RAM memory of the 8051 is:
- a) 32 bytes
 - b) 64 bytes
 - c) 128 bytes
 - d) 256 bytes
- 11) This program code will be executed continuously:
STAT: MOV A, #01h
JNZ STAT
- a) True
 - b) False
- 12) Data transfer from I/O to external data memory can only be done with the MOVX command.
- a) True
 - b) False
- 13) MOV A, @R1 will:
- a) copy R1 to the Accumulator
 - b) copy the Accumulator to R1
 - c) copy the contents of memory whose address is in R1 to Accumulator
 - d) copy the contents of Accumulator to memory whose address is in R1
- 14) When the 8051 is reset and the \overline{EA} line is HIGH, the program counter points to the first program instruction in the _____.
- a) Internal code memory
 - b) External code memory
 - c) Internal data memory
 - d) External data memory

T. Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Microcontrollers and Applications (BTN06502)

Day & Date: Tuesday, 14-05-2024
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
 2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any four of the following. 16

- a) Draw architecture/ schematic of 8051. Explain function of each block in detail.
- b) Explain different groups of Instruction Set in 8051.
- c) Write ALP to insert a delay of 1ms using registers.
- d) Compare between Assembly Language and C-programming language.
- e) Explain PSW register in 8051.

Q.3 Solve any two of the following. 12

- a) Draw and explain the External Memory Interfacing with 8051. Attach 4KB RAM. Also find the starting and end address.
- b) Write ALP to interface the 4×4 matrix keyboard with 8051.
- c) Write in details the Timers, and associated registers in 8051.

Section – II

Q.4 Solve any four of the following. 16

- a) Explain the advantages of PIC over microcontroller.
- b) Explain the Architecture of PIC 16F877A.
- c) Explain the different PORTS available in PIC 16F877A.
- d) Write a short note on
 - i) OPTION_REG register
 - ii) STATUS register in PIC 16F877A
- e) Write a short note on
 - i) WDT
 - ii) CCP module

Q.5 Solve any two of the following. 12

- a) What is Configuration word? Explain the bit format in that.
- b) What is Interrupt? List out the Low order and high priority Interrupts in PIC 16F877A.
- c) Explain the serial communication using USART.

- 9) The disadvantage of FIR filter _____.
- a) FIR filter with exact linear phase can be easily designed
 - b) FIR filter can be realized in both recursive and non recursive structure
 - c) FIR filters are free from limit cycle oscillation
 - d) Memory requirement and execution time are high
- 10) The impulse response of ideal filter is _____.
- a) Causal
 - b) Non causal
 - c) Non causal and finite
 - d) None
- 11) Properties of Butterworth low pass filter is given by _____.
- a) The poles of Butterworth filter lies on a circle
 - b) The poles of Butterworth filter lies outside on a circle
 - c) The poles of Butterworth filter lies inside on a circle
 - d) None
- 12) The mapping of bilinear transformation is _____.
- a) many to many mapping
 - b) many to one mapping
 - c) one to one mapping
 - d) None
- 13) A cascade of simple FIR filter results in _____.
- a) improved high pass frequency response
 - b) improved low pass frequency response
 - c) improved linear phase
 - d) None
- 14) For Direct form I realization we require _____.
- a) $M+N+1$ multiplication
 - b) $M+N$ addition
 - c) $M+N+1$ memory location
 - d) All of the above

Set P

T.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Digital Signal Processing (BTN06503)

Day & Date: Wednesday, 15-05-2024
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
 2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any four **16**

- a) Find cross correlation of sequence
 $x(n) = \{1, 2, 1, 1, -1\}$ and $y(n) = \{1, 1, 2, 1\}$
- b) Check whether the following systems are stable or not
 i) $y(n) = x(n)u(n)$ ii) $h(n) = \left(\frac{1}{2}\right)^n u(n)$
- c) Determine DFT of a sequence $x(n)$ if $x(n) = \{3, 5, 2, 3\}$.
- d) List the properties of DFT & explain circular convolution properties of DFT.
- e) Calculate 4-point DFT values of the sequence $\cos(n * \pi/2)$ using DIT, FFT Algorithm.

Q.3 Attempt any two **12**

- a) Find DFT of the sequence $x(n) = \{1, 2, 3, 4, 4, 3, 2, 1\}$ using FFT algorithm.
- b) Find linear convolution Using overlap add method, of the following sequence
 $x(n) = \{3, 0, -2, 0, 2, 1, 0, -2, -1, 0, 4, 6, 7\}$ $h(n) = \{2, 2, 1\}$
- c) Find circular convolution of two finite duration sequence
 $x(n) = \{1, -1, -6, 3, -1, 5\}$ $h(n) = \{1, 2, 3, 1\}$

Section – II

Q.4 Attempt any Four **16**

- a) Explain windowing technique for designing FIR filter?
- b) What is warping effect? What is its effect on magnitude and phase response?
- c) For analog transfer function

$$H(s) = \frac{2}{(s+1)(s+2)}$$

Determine $H(Z)$ using impulse invariant transformation with $T=1$ sec.

- d) Determine FIR filter coefficients for direct form, structure whose lattice coefficients
 Are $k_1 = \frac{1}{3}$; $k_2 = \frac{1}{2}$; $k_3 = \frac{1}{5}$

Q.5 Attempt any two

- a) For analog transfer function

$$H(s) = \frac{2}{(s+5)(s+3)}$$

Determine $H(Z)$ using Bilinear transformation with $T=1$ sec.

- b) Design seven coefficients FIR LPF using frequency sampling method with following specifications

$$H_d(e^{jw}) = e^{-j(N-1)w/2} \quad \text{for } 0 \leq w \leq \pi/2$$

$$= 0 \quad \text{for } \pi/2 \leq w \leq \pi$$

- c) Explain the application of DSP in radar signal processing.

 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) For impulse response of FIR filter to satisfy for constant group delay, the phase is given by _____.
 - a) $\theta(w) = -aw$
 - b) $\theta(w) = aw$
 - c) $\theta(w) = \beta - aw$
 - d) $\theta(w) = 0$
- 2) The disadvantage of FIR filter _____.
 - a) FIR filter with exact linear phase can be easily designed
 - b) FIR filter can be realized in both recursive and non recursive structure
 - c) FIR filters are free from limit cycle oscillation
 - d) Memory requirement and execution time are high
- 3) The impulse response of ideal filter is _____.
 - a) Causal
 - b) Non causal
 - c) Non causal and finite
 - d) None
- 4) Properties of Butterworth low pass filter is given by _____.
 - a) The poles of Butterworth filter lies on a circle
 - b) The poles of Butterworth filter lies outside on a circle
 - c) The poles of Butterworth filter lies inside on a circle
 - d) None
- 5) The mapping of bilinear transformation is _____.
 - a) many to many mapping
 - b) many to one mapping
 - c) one to one mapping
 - d) None
- 6) A cascade of simple FIR filter results in _____.
 - a) improved high pass frequency response
 - b) improved low pass frequency response
 - c) improved linear phase
 - d) None
- 7) For Direct form I realization we require _____.
 - a) $M+N+1$ multiplication
 - b) $M+N$ addition
 - c) $M+N+1$ memory location
 - d) All of the above
- 8) A mathematical operation that closely resembles convolution is _____.
 - a) Correlation
 - b) Folding
 - c) Multiplication
 - d) None of the above

- 9) $X(0)$ value of 5 point sequence $x(n)=\{2\ 3\ 4\ 5\ 3\ 5\}$ is _____.
a) 21 b) 22
c) 17 d) None
- 10) Circular time shift of a sequence is equivalent to _____.
a) Multiplication of the sequence $x(n)$ with complex exponential.
b) Multiplication of the sequence $X(k)$ with complex exponential.
c) Multiplication of the sequence $x(n)$ with exponential factor.
d) None
- 11) Overlap save algorithm uses overlap for _____.
a) Output Sequence b) Input Sequence
c) Both Input & Output Sequence d) Adds the overlapped output
- 12) The size of input data blocks in overlap add method is _____.
a) L b) $L+M$
c) $L+M+1$ d) $L+M-1$
- 13) For DIF, FFT algorithm _____.
a) Input sequence is in natural order
b) Input sequence is in bit reversal order
c) Output sequence is in natural order
d) Both Input & Output sequence are in bit reversal order
- 14) Bit reversal is required for which algorithm from following _____.
a) DIT b) DIF
c) Both a and b d) None

Set **S**

T.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Digital Signal Processing (BTN06503)

Day & Date: Wednesday, 15-05-2024
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) For DIF, FFT algorithm _____.
 - a) Input sequence is in natural order
 - b) Input sequence is in bit reversal order
 - c) Output sequence is in natural order
 - d) Both Input & Output sequence are in bit reversal order
- 2) Bit reversal is required for which algorithm from following _____.
 - a) DIT
 - b) DIF
 - c) Both a and b
 - d) None
- 3) For impulse response of FIR filter to satisfy for constant group delay, the phase is given by _____.
 - a) $\theta(w) = -aw$
 - b) $\theta(w) = aw$
 - c) $\theta(w) = \beta - aw$
 - d) $\theta(w) = 0$
- 4) The disadvantage of FIR filter _____.
 - a) FIR filter with exact linear phase can be easily designed
 - b) FIR filter can be realized in both recursive and non recursive structure
 - c) FIR filters are free from limit cycle oscillation
 - d) Memory requirement and execution time are high
- 5) The impulse response of ideal filter is _____.
 - a) Causal
 - b) Non causal
 - c) Non causal and finite
 - d) None
- 6) Properties of Butterworth low pass filter is given by _____.
 - a) The poles of Butterworth filter lies on a circle
 - b) The poles of Butterworth filter lies outside on a circle
 - c) The poles of Butterworth filter lies inside on a circle
 - d) None
- 7) The mapping of bilinear transformation is _____.
 - a) many to many mapping
 - b) many to one mapping
 - c) one to one mapping
 - d) None

- 8) A cascade of simple FIR filter results in _____.
a) improved high pass frequency response
b) improved low pass frequency response
c) improved linear phase
d) None
- 9) For Direct form I realization we require _____.
a) $M+N+1$ multiplication
b) $M+N$ addition
c) $M+N+1$ memory location
d) All of the above
- 10) A mathematical operation that closely resembles convolution is _____.
a) Correlation
b) Folding
c) Multiplication
d) None of the above
- 11) $X(0)$ value of 5 point sequence $x(n)=\{2\ 3\ 4\ 5\ 3\ 5\}$ is _____.
a) 21
b) 22
c) 17
d) None
- 12) Circular time shift of a sequence is equivalent to _____.
a) Multiplication of the sequence $x(n)$ with complex exponential.
b) Multiplication of the sequence $X(k)$ with complex exponential.
c) Multiplication of the sequence $x(n)$ with exponential factor.
d) None
- 13) Overlap save algorithm uses overlap for _____.
a) Output Sequence
b) Input Sequence
c) Both Input & Output Sequence
d) Adds the overlapped output
- 14) The size of input data blocks in overlap add method is _____.
a) L
b) $L+M$
c) $L+M+1$
d) $L+M-1$

Set **S**

T.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Digital Signal Processing (BTN06503)

Day & Date: Wednesday, 15-05-2024
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
 2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any four **16**

- a) Find cross correlation of sequence
 $x(n) = \{1, 2, 1, 1, -1\}$ and $y(n) = \{1, 1, 2, 1\}$
- b) Check whether the following systems are stable or not
 i) $y(n) = x(n)u(n)$ ii) $h(n) = \left(\frac{1}{2}\right)^n u(n)$
- c) Determine DFT of a sequence $x(n)$ if $x(n) = \{3, 5, 2, 3\}$.
- d) List the properties of DFT & explain circular convolution properties of DFT.
- e) Calculate 4-point DFT values of the sequence $\cos(n * \pi/2)$ using DIT, FFT Algorithm.

Q.3 Attempt any two **12**

- a) Find DFT of the sequence $x(n) = \{1, 2, 3, 4, 4, 3, 2, 1\}$ using FFT algorithm.
- b) Find linear convolution Using overlap add method, of the following sequence
 $x(n) = \{3, 0, -2, 0, 2, 1, 0, -2, -1, 0, 4, 6, 7\}$ $h(n) = \{2, 2, 1\}$
- c) Find circular convolution of two finite duration sequence
 $x(n) = \{1, -1, -6, 3, -1, 5\}$ $h(n) = \{1, 2, 3, 1\}$

Section – II

Q.4 Attempt any Four **16**

- a) Explain windowing technique for designing FIR filter?
- b) What is warping effect? What is its effect on magnitude and phase response?
- c) For analog transfer function

$$H(s) = \frac{2}{(s+1)(s+2)}$$

Determine $H(Z)$ using impulse invariant transformation with $T=1$ sec.

- d) Determine FIR filter coefficients for direct form, structure whose lattice coefficients
 Are $k_1 = \frac{1}{3}$; $k_2 = \frac{1}{2}$; $k_3 = \frac{1}{5}$

Q.5 Attempt any two

12

- a) For analog transfer function

$$H(s) = \frac{2}{(s+5)(s+3)}$$

Determine $H(Z)$ using Bilinear transformation with $T=1$ sec.

- b) Design seven coefficients FIR LPF using frequency sampling method with following specifications

$$H_d(e^{jw}) = e^{-j(N-1)w/2} \quad \text{for } 0 \leq w \leq \pi/2$$

$$= 0 \quad \text{for } \pi/2 \leq w \leq \pi$$

- c) Explain the application of DSP in radar signal processing.

 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives.**14**

- 1) Cross elasticity of demand between tea and sugar is _____.
 - a) Positive
 - b) Zero
 - c) Infinity
 - d) Negative
- 2) Two major functions of a Managerial Economist are _____ and _____.
 - a) Decision-making Forward Planning
 - b) Forecasting, Planning
 - c) Revenue generation, Marketing
 - d) Staff recruitment, Salary planning
- 3) Implicit costs are _____.
 - a) Equal to total fixed costs
 - b) Comprised entirely of variable costs
 - c) "payments" for self-employed resources
 - d) Always greater in the short run than in the long run
- 4) Which is/are determinants of Supply?
 - a) Price of the Commodity
 - b) State of Technology
 - c) Cost of Production
 - d) All the above
- 5) The horizontal demand curve for a commodity shows that its demand is _____.
 - a) Perfectly elastic
 - b) Highly elastic
 - c) Perfectly inelastic
 - d) Moderately elastic
- 6) The elasticity of demand for a product will be higher _____.
 - a) The more available are substitutes for that product
 - b) The more its buyers demand loyalty
 - c) The more the product is considered a necessity by its buyers
 - d) All of the above
- 7) Demand for a commodity is elastic when it has _____.
 - a) Only one use
 - b) Uses which cannot be postponed
 - c) Many uses
 - d) Uses very essential for the consumer

- 8) _____ means an attempt to determine the factors affecting the demand of a commodity or service and to measure such factors and their influences.
- a) Demand planning
 - b) Demand forecasting
 - c) Demand analysis
 - d) Demand estimation
- 9) The utility may be defined as _____.
- a) The desire for a commodity
 - b) The usefulness of a commodity
 - c) The necessity of a commodity
 - d) The power of a commodity to satisfy wants
- 10) Perfect competition is characterized by _____.
- a) Large number of buyers and sellers
 - b) Homogeneous product
 - c) Free entry and exit of firms
 - d) All the above
- 11) Variable costs are _____.
- a) sunk costs
 - b) multiplied by fixed costs
 - c) costs that change with the level of production
 - d) defined as the change in total cost resulting from the production of an additional unit of output
- 12) The reason the marginal cost curve eventually increases as output increases for the typical firm is because _____.
- a) of diseconomies of scale
 - b) of minimum efficient scale
 - c) of the law of diminishing returns
 - d) normal profit exceeds economic
- 13) Product differentiation is an important feature of _____.
- a) Perfect competition
 - b) Monopolistic competition
 - c) Monopoly
 - d) None of these
- 14) Opportunity cost means _____.
- a) The accounting cost minus the marginal benefit
 - b) The highest-valued alternative forgone
 - c) The monetary costs of an activity
 - d) The accounting cost minus the marginal cost

ELECTRONICS & TELECOMMUNICATION ENGINEERING
Managerial Economics (BTN06511)**

Day & Date: Thursday, 16-05-2024
Time: 10:00 AM To 01:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any Four questions. 16

- a) Discuss scope and nature of Managerial Economist.
- b) How is Managerial economics different from traditional economic?
- c) Explain the following terms
 - i) Demand ii) Supply
 - iii) Price ceiling iv) Market Equilibrium
- d) Explain the price - demand relationship with suitable examples.
- e) Explain the concept of Income elasticity of demand.

Q.3 Attempt any Two questions. 12

- a) What are the chief characteristics of Managerial Economics?
- b) What is Market Equilibrium? Explain the changes of demand and supply on Market Equilibrium.
- c) Explain the concept of Elasticity of demand in detail.

Section – II

Q.4 Attempt any Four questions: 16

- a) What is demand forecasting? What are the factors affecting demand forecasting?
- b) Describe survey methods of demand forecasting.
- c) Explain the following costs of production
 - i) Explicit and Implicit costs ii) Short run and Long run cost
- d) Explain the degree of competition in market.
- e) Explain Linear regression method of demand forecasting.

Q.5 Attempt any Two questions: 12

- a) Draw and explain break even analysis curve. What is profit margin of safety?
- b) Explain in details various costs involved in production.
- c) What is market? Explain various types of market structures with examples.

Q.1 MCQ / Objective type questions 14

- 1) The PERT in project management means program evaluation and _____ technique.

a) resource	b) reconciliation
c) reconsideration	d) review
- 2) Which of the following is (are) project(s)?
 - a) building a new house
 - b) creating a new computer software
 - c) launching a new product for a business
 - d) All of the above
- 3) In which of the following project phases is the project schedule developed?

a) Conceptual	b) Planning
c) Implementation	d) Design
- 4) The entire process of a project may be considered to be made up on number of sub process placed in different stage called the _____.
 - a) Technical key resources
 - b) Work key structure
 - c) Work Breakdown Structure (WBS).
 - d) None of the above
- 5) Network models have advantage in terms of project _____.

a) Planning	b) Scheduling
c) Controlling	d) All of these
- 6) A set of feasible solution to a Linear Programming Problem is _____.

a) convex	b) polygon
c) triangle	d) bold

- 7) Which of the following strategies means that the impact of the risk will be reduced?
- a) Avoidance strategies
 - b) Minimization strategies
 - c) Contingency plans
 - d) All of the mentioned
- 8) Graphical method, simplex method, and transportation method are concerned with _____.
- a) Break-even analysis
 - b) Value analysis
 - c) Linear programming
 - d) Queueing theory
- 9) OR uses models to help the management to determine its _____.
- a) Policies
 - b) Actions
 - c) Both a and b
 - d) None of the above
- 10) An assignment problem is solved to minimize the total processing time of four jobs (1, 2, 3 and 4) on four different machines such that each job is processed exactly by one machine and each machine processes exactly one job. The minimum total processing time is found to be 500 minutes. Due to a change in design, the processing time of job 4 on each machine has increased by 20 minutes. The revised minimum total processing time will be _____ minutes.
- a) 500
 - b) 580
 - c) 520
 - d) 600
- 11) Which of the following technique emphasizes transportation cost in the determination of facility location?
- a) Location rating factor technique
 - b) Transportation technique
 - c) Centre-of-gravity technique
 - d) Both (b) and (c)
- 12) Group replacement policy is most suitable for _____.
- a) Trucks
 - b) Infant machines
 - c) Street light bulbs
 - d) New cars
- 13) Replacement is said to be necessary if _____.
- a) Failure rate is increasing
 - b) Failure cost is increasing
 - c) Failure probability is increasing
 - d) Any of these
- 14) Which statement characterizes standard form of a linear programming problem?
- a) Constraints are given by inequalities of any type
 - b) Constraints are given by a set of linear equations
 - c) Constraints are given only by inequalities of \geq type
 - d) Constraints are given only by inequalities of \leq type

T. Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Project Management and Operation Research (BTN06512)

Day & Date: Thursday, 16-05-2024
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
 2) Figures to the right indicate full marks.
 3) Assume suitable data wherever needed & mention it clearly.

Section – I

- Q.2 Solve any Four** **16**
- a) What is a project? State the characteristics of the project.
 - b) Explain the concept of top-down and bottom-up budgeting techniques.
 - c) Explain the significance of networking and scheduling in project management.
 - d) What are the steps involved in dealing with the risks? Discuss in detail.
 - e) What is the significance of risk management? What are the categories of risk?
- Q.3 Solve any Two** **12**
- a) What is the work breakdown structure? List out the tasks involved in constructing a house and draw its work breakdown structure.
 - b) With the help of an example, explain GANTT chart and PERT chart.
 - c) What are the common project risks and how to prevent them? Explain in detail.

Section – II

- Q.4 Solve any Four** **16**
- a) With an example describe the mathematical and iconic model in OR.
 - b) State the limitations of Linear Programming Problem.
 - c) Discuss different categories of replacement problems.
 - d) Why is replacement of items required? Distinguish between individual replacement and group replacement policies.
 - e) Explain the procedure for making location decisions.
- Q.5 Solve any Two:** **12**
- a) What are the three scientific methods used in Operation Research? Explain in detail.
 - b)
 - i) What are the advantages of the Linear Programming approach?
 - ii) A small manufacturer employs 5 skilled men and 10 semi-skilled men and makes an article in two qualities, a deluxe model and an ordinary model. The making of a deluxe model requires 2 hrs work by a skilled man and 2 hrs work by a semi-skilled man. The ordinary model requires 1 hr work by a skilled man and 3 hrs work by a semi-skilled man. By union rules no man can work more than 8 hrs per day. The manufacturer's clear profit of the deluxe model is Rs. 10/- and of the ordinary model is Rs. 8/-. Formulate the model of the problem.

- c) Suggest optimum Assignment of 4 workers A, B, C, D to 4 jobs I, II III, IV. The time taken by different workers in completing the different jobs is given below.

	Jobs			
Workers	I	II	III	IV
A	8	10	12	16
B	11	11	15	8
C	9	6	5	14
D	15	4	9	7

**T. Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Project Management and Operation Research (BTN06512)**

Day & Date: Thursday, 16-05-2024
Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:**
- 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries two marks.
 - 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 - 3) Figures to the right indicate full marks.
 - 4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 MCQ / Objective type questions**14**

- 1) Graphical method, simplex method, and transportation method are concerned with _____.

a) Break-even analysis	b) Value analysis
c) Linear programming	d) Queueing theory
- 2) OR uses models to help the management to determine its _____.

a) Policies	b) Actions
c) Both a and b	d) None of the above
- 3) An assignment problem is solved to minimize the total processing time of four jobs (1, 2, 3 and 4) on four different machines such that each job is processed exactly by one machine and each machine processes exactly one job. The minimum total processing time is found to be 500 minutes. Due to a change in design, the processing time of job 4 on each machine has increased by 20 minutes. The revised minimum total processing time will be _____ minutes.

a) 500	b) 580
c) 520	d) 600
- 4) Which of the following technique emphasizes transportation cost in the determination of facility location?

a) Location rating factor technique	b) Transportation technique
c) Centre-of-gravity technique	d) Both (b) and (c)
- 5) Group replacement policy is most suitable for _____.

a) Trucks	b) Infant machines
c) Street light bulbs	d) New cars
- 6) Replacement is said to be necessary if _____.

a) Failure rate is increasing	b) Failure cost is increasing
c) Failure probability is increasing	d) Any of these

- 7) Which statement characterizes standard form of a linear programming problem?
a) Constraints are given by inequalities of any type
b) Constraints are given by a set of linear equations
c) Constraints are given only by inequalities of \geq type
d) Constraints are given only by inequalities of \leq type
- 8) The PERT in project management means program evaluation and _____ technique.
a) resource
b) reconciliation
c) reconsideration
d) review
- 9) Which of the following is (are) project(s)?
a) building a new house
b) creating a new computer software
c) launching a new product for a business
d) All of the above
- 10) In which of the following project phases is the project schedule developed?
a) Conceptual
b) Planning
c) Implementation
d) Design
- 11) The entire process of a project may be considered to be made up on number of sub process placed in different stage called the _____.
a) Technical key resources
b) Work key structure
c) Work Breakdown Structure (WBS).
d) None of the above
- 12) Network models have advantage in terms of project _____.
a) Planning
b) Scheduling
c) Controlling
d) All of these
- 13) A set of feasible solution to a Linear Programming Problem is _____.
a) convex
b) polygon
c) triangle
d) bold
- 14) Which of the following strategies means that the impact of the risk will be reduced?
a) Avoidance strategies
b) Minimization strategies
c) Contingency plans
d) All of the mentioned

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) _____ is managing any area of business, whether it is production, marketing, accounting, human resources or any other functions constitute a whole range of activities covering formal and informal means of planning, implementing and control.

a) Business Decisions	b) Business Ethics
c) Business Situations	d) Business Ethics Management
- 2) _____ is development that meets the needs of the present without compromising the ability of future generations to meet their own needs.

a) Accountability	b) Sustainability
c) Globalization	d) All of these
- 3) _____ are moral philosophy or ethics concerned with criteria of what is morally rights and wrong.

a) Normative Ethical Theories	b) Descriptive Ethics Theories
c) Traditional Ethics Theories	d) All of these
- 4) Model of ethical decision-making seek to represent things _____.

a) The different stages in decision-making	b) The different influences on that process
c) Both a and b	d) None of these
- 5) Which is a stage of Ethical Decision Making?

a) Make Moral Judgement	b) Individual Factors
c) Situational Factors	d) All of these
- 6) What is full form of CSR?

a) Corporate Social Reporting	b) Corporate Social Research
c) Corporate Social Responsibility	d) None of these
- 7) Which responsibility makes corporations to do what is right and fair even when they are not compelled to do so by the legal framework?

a) Ethical Responsibility	b) Legal Responsibility
c) Philanthropic Responsibility	d) Economic Responsibility

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) _____ the application of rules and procedures to people in a consistent and avoiding arbitrarily decision-making and without discrimination on bases other than merit.
 - a) Discrimination
 - b) Employees Privacy
 - c) Right and Duties
 - d) Due Process and Lay off
- 2) The claim that employees should also have a certain degree influence on their tasks, their job environmental and their company goals that is a _____.
 - a) Discrimination
 - b) Employee Privacy
 - c) Right to participation
 - d) Due Process and Lay off
- 3) CSO stands for what?
 - a) Civil Society Organization
 - b) Consumer Society Organization
 - c) Central Statistics Office
 - d) None of these
- 4) _____ seek to punish the target company for its actions. Therefore, rather than communicating displeasure, the boycotters actively seek to cause the firm harm, usually by aiming for significant erosion of sales.
 - a) Instrumental Boycotts
 - b) Catalytic Boycott
 - c) Expressive Boycott
 - d) Punitive Boycott
- 5) Customer is stakeholder of organization.
 - a) True
 - b) False
- 6) _____ is the long-term maintenance of the system according to environmental and economical and Social consideration.
 - a) Security
 - b) Sustainability
 - c) Business Ethics
 - d) None of above
- 7) Functions of Civil Society are _____.
 - a) Protection
 - b) Monitoring
 - c) Social Cohesion
 - d) All of above

- Instructions:**
- 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No. 3 (starting page of the Answer Book). Each question carry one mark.
 - 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 - 3) Figures to the right indicates full marks.
 - 4) Assume suitable data wherever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) _____ seek to punish the target company for its actions. Therefore, rather than communicating displeasure, the boycotters actively seek to cause the firm harm, usually by aiming for significant erosion of sales.

a) Instrumental Boycotts	b) Catalytic Boycott
c) Expressive Boycott	d) Punitive Boycott
- 2) Customer is stakeholder of organization.

a) True	b) False
---------	----------
- 3) _____ is the long-term maintenance of the system according to environmental and economical and Social consideration.

a) Security	b) Sustainability
c) Business Ethics	d) None of above
- 4) Functions of Civil Society are _____.

a) Protection	b) Monitoring
c) Social Cohesion	d) All of above
- 5) _____ is managing any area of business, whether it is production, marketing, accounting, human resources or any other functions constitute a whole range of activities covering formal and informal means of planning, implementing and control.

a) Business Decisions	b) Business Ethics
c) Business Situations	d) Business Ethics Management
- 6) _____ is development that meets the needs of the present without compromising the ability of future generations to meet their own needs.

a) Accountability	b) Sustainability
c) Globalization	d) All of these
- 7) _____ are moral philosophy or ethics concerned with criteria of what is morally rights and wrong.

a) Normative Ethical Theories	b) Descriptive Ethics Theories
c) Traditional Ethics Theories	d) All of these

- 8) Model of ethical decision-making seek to represent things _____.
a) The different stages in decision-making
b) The different influences on that process
c) Both a and b
d) None of these
- 9) Which is a stage of Ethical Decision Making?
a) Make Moral Judgement b) Individual Factors
c) Situational Factors d) All of these
- 10) What is full form of CSR?
a) Corporate Social Reporting b) Corporate Social Research
c) Corporate Social Responsibility d) None of these
- 11) Which responsibility makes corporations to do what is right and fair even when they are not compelled to do so by the legal framework?
a) Ethical Responsibility b) Legal Responsibility
c) Philanthropic Responsibility d) Economic Responsibility
- 12) _____ the application of rules and procedures to people in a consistent and avoiding arbitrarily decision-making and without discrimination on bases other than merit.
a) Discrimination b) Employees Privacy
c) Right and Duties d) Due Process and Lay off
- 13) The claim that employees should also have a certain degree influence on their tasks, their job environmental and their company goals that is a _____.
a) Discrimination b) Employee Privacy
c) Right to participation d) Due Process and Lay off
- 14) CSO stands for what?
a) Civil Society Organization b) Consumer Society Organization
c) Central Statistics Office d) None of these

T. Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Business Ethics (BTN06514)

Day & Date: Thursday, 16-05-2024
Time: 10:00 AM To 01:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever needed and mention it clearly.

Section – I

- Q.2 Solve any four of the following. 16**
- a) Explain Sustainability - a key Context for Business Ethics.
 - b) Explain the need of business ethics.
 - c) Illustrate the methods of assessing ethical performance.
 - d) What are key features of Corporate?
 - e) Explain code of ethics with some practical examples.
- Q.3 Solve any two of the following. 12**
- a) Explain the components of business ethics management.
 - b) What is stakeholder theory of firm?
 - c) Explain in detail Normative Ethical Theories.

Section – II

- Q.4 Solve any four of the following. 16**
- a) Explain the ethical issues in firm-employee relationship.
 - b) Explain the functions of CSO.
 - c) Write a short note on marketing & consumer.
 - d) List & explain the ethical issues in CSO.
 - e) Write a short note on globalization-business government relation.
- Q.5 Answer any two questions. 12**
- a) Explain the concept of Data identity and security.
 - b) Explain the Ethics of pollution control.
 - c) What are Ethical challenges of globalization?

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternative from the options.

14

- 1) Which of the following search technique has AND/OR graph theory?

a) Greedy Best First Search	b) A*
c) AO*	d) None of these
- 2) What are the types of entities covered in Ontology

a) Physical and abstract objects	b) time and locations
c) Actions and events	d) All
- 3) Propositional Logic has _____ output.

a) Either True or False	b) Both True and False
c) Quantitative Value	d) None
- 4) Which of the following statement can be represented using the universal quantifier?

a) All bird fly	b) Some bird fly
c) Rohan is intelligent	d) Some men drink coffee
- 5) Which of the following cannot be handled by an intelligent agent

a) Learning	b) Decision Making
c) Uncertainties	d) None of these
- 6) "All bird fly" which of the following is referred as predicate in given sentence?

a) bird	b) fly
c) All	d) None of these
- 7) Probability always lies between?

a) 0 and 1	b) 0 and 100
c) 0 and infinity	d) -infinity to +infinity
- 8) Decision making involves utility theory?

a) Yes	b) No
c) Not always	d) None of above
- 9) Which of these is the best learning model suitable for an observable environment?

a) Supervised	b) Unsupervised
c) Both a & b	d) None

- 10)** AI is study of _____ Agents.
- a) Omniscience
 - b) Rational
 - c) Autonomy
 - d) None of these
- 11)** Which of following has task fully observable environment _____.
- a) Chess Game
 - b) Taxi Driver
 - c) Medicine Diagnosis
 - d) None of these
- 12)** In regards with informed search which statement is not TRUE?
- a) It has domain knowledge
 - b) It will increase the time complexity
 - c) it uses heuristic function
 - d) Greedy Best First Search Algorithm is type of informed search
- 13)** Which is an actuator in AI CAR agent application?
- a) Object detection sensor
 - b) Temperature sensor
 - c) Wheel Drive
 - d) None of these
- 14)** Which of the following best describes learning where the agent must also learn what to do
- a) Passive
 - b) Active
 - c) Unsupervised
 - d) All of these
