Design of Steel Structures (BTN01501)

Day & Date: Monday, 13-05-2024
Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:**
- 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 - 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 - 3) Figures to the right indicates full marks.
 - 4) Assume suitable data if necessary and mention it clearly before the solution.
 - 5) Draw the appropriate sketches wherever necessary.
 - 6) Use of IS 800-2007 and IS 875 are allowed, but not allowed for MCQ (Q.No.1)

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the given options.

14

- 1) The structural advantage of using steel as a structural material is _____.
 - a) Small weight to strength
 - b) Speed of erection
 - c) Speed of dismantling
 - d) Scrap value
- 2) What is the value of constant 'k' to calculate throat thickness in fillet weld if the angle between fusion faces is 110° ?
 - a) 0.6
 - b) 0.65
 - c) 0.55
 - d) 0.75
- 3) As per IS 800 purlins are designed as a _____.
 - a) Simply supported beams
 - b) Cantilever beams
 - c) Continuous beams
 - d) Compression member
- 4) Tacking bolts should have a pitch in line not exceeding _____.
 - a) $32t$ or 300 mm whichever is least for plates
 - b) 600 mm for compression members
 - c) 1000 mm for tension members
 - d) All the above is correct
- 5) The self-weight of a roof truss (N/m^2) may be obtained by _____.
 - a) $(L + 5)5$
 - b) $(L/3 + 5)10$
 - c) $(L - 5)5$
 - d) $(L/3 - 5)10$
- 6) Steel is an alloy which mainly contains _____.
 - a) iron and silica
 - b) iron and sulfur
 - c) iron and carbon
 - d) iron and sodium
- 7) The slenderness ratio of lacing flat is limited to _____.
 - a) 350
 - b) 145
 - c) 180
 - d) 250

- 8) What is the difference between end and edge distance?
- a) Edge distance is measured parallel to direction of stress, while end distance is measured perpendicular to direction of stress.
 - b) Edge distance is measured parallel to direction of stress, while end distance is measured parallel to direction of stress.
 - c) Edge distance is measured perpendicular to direction of stress, while end distance is measured perpendicular to direction of stress.
 - d) Edge distance is measured perpendicular to direction of stress, while end distance is measured parallel to direction of stress.
- 9) Minimum edge distance and end distance for rolled, machine flame cut is ____.
- a) 1.7 x hole diameter
 - b) 1.2 x hole diameter
 - c) 1.5 x hole diameter
 - d) 2.0 x hole diameter
- 10) What is the efficiency of joint when strength of bolt per pitch length is 60kN and strength of plate per pitch length is 150kN?
- a) 25%
 - b) 30%
 - c) 35%
 - d) 40%
- 11) The shape factor in plastic method of analysis depends upon ____.
- a) Yield stress of the material
 - b) Hinge length
 - c) Geometry of the section
 - d) Redistribution of moments
- 12) Which of the following is not a serviceability criteria?
- a) Deflection
 - b) Ponding
 - c) Vibration
 - d) Fatigue
- 13) For the block shear failure of a tension member, the failure occurs along a path through the connection involving ____.
- a) Tension on the two perpendicular planes
 - b) Shear on the two perpendicular planes
 - c) Tension on one plane and shear on the other perpendicular plane
 - d) Tension on the plane of connection and compression on the other perpendicular plane
- 14) The effective length of a compression member of length L held in position at both ends but not restrained in direction, is ____.
- a) L
 - b) 0.67 L
 - c) 0.85L
 - d) 1.5L

T.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
CIVIL ENGINEERING
Design of Steel Structures (BTN01501)

Day & Date: Monday, 13-05-2024
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

- Instructions:** 1) Q.2 and Q.6 are compulsory and solve any 2 questions from each section.
 2) Figures to the right indicates full marks.
 3) Assume suitable data if necessary and mention it clearly before solution.
 4) Draw the appropriate sketches wherever necessary.
 5) Use of IS 800-2007 and IS 875 are allowed, but not allowed for MCQ

Section – I

- Q.2** a) Explain the limit state of strength and limit state of serviceability. **05**
 b) Explain complete, partial and over complete collapse. **05**
- Q.3** Determine the tensile capacity of the section shown in figure for following data **09**
 Diameter of bolt = 16 mm
 Number of bolts = 6
 Pitch of bolt = 40 mm
 Edge distance of bolts = 30 mm
 Grade of bolt = 4.6
 Grade of Steel Fe 410

Angles are placed on the opposite side of 12 mm thick gusset plate (tack bolted)

- Q.4** Design a single angle discontinuous strut to carry a factored axial load of 65 kN. **09**
 The length of strut is 3.0 m between intersections. It is connected to 12 mm thick gusset plate by 20 mm diameter 4.6 grade bolts.
 Use steel of grade Fe 410.
- Q.5** Design a built up laced steel column 10 m long to carry a factored axial load of **09**
 1080 kN. The column is restrained in position but not restrained against rotation at both the ends. Provide a single lacing system with bolted connections. The design should confirm to specifications of IS 800-2007. Design the column with two channels placed back to back. Also design a suitable single lacing system. Assume steel of grade Fe 410 and bolts of grade 4.6

Section – II

- Q.6** Find the shape factor for following sections. **10**
a) Square of side 'a' with its diagonal parallel to zz-axis
b) Circular section
- Q.7** A simply supported steel beam of span 4 m effective span is laterally supported throughout. The loads supported by the beam comprise of uniformly distributed service live load of 40kN. (inclusive of self-weight) Adopting Fe410 grade steel, design the simply supported beam according to the specifications of IS 800-2007. **09**
- Q.8** Design an I section purlin for industrial building supporting GI sheet roof for the following data. **09**
Spacing of trusses = 4.5m
Span of truss = 12 m
Spacing of purlins = 1.4 m
Inclination of main rafter to horizontal = 26.565°
Weight of GI sheets = 171 N/m^2
Wind load = 1.2 kN/m^2
Grade of steel Fe 410
- Q.9** A column ISHB 300 @ 577 N/m carries an axial compressive factored load of 1000KN. Design a suitable welded gusset base. The base rests on M20 grade concrete pedestal. **09**

CIVIL ENGINEERING

Design of Steel Structures (BTN01501)

Day & Date: Monday, 13-05-2024
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
- 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
- 3) Figures to the right indicates full marks.
- 4) Assume suitable data if necessary and mention it clearly before the solution.
- 5) Draw the appropriate sketches wherever necessary.
- 6) Use of IS 800-2007 and IS 875 are allowed, but not allowed for MCQ (Q.No.1)

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the given options.

14

- 1) What is the difference between end and edge distance?
 - a) Edge distance is measured parallel to direction of stress, while end distance is measured perpendicular to direction of stress.
 - b) Edge distance is measured parallel to direction of stress, while end distance is measured parallel to direction of stress.
 - c) Edge distance is measured perpendicular to direction of stress, while end distance is measured perpendicular to direction of stress.
 - d) Edge distance is measured perpendicular to direction of stress, while end distance is measured parallel to direction of stress.
- 2) Minimum edge distance and end distance for rolled, machine flame cut is _____.
 - a) 1.7 x hole diameter
 - b) 1.2 x hole diameter
 - c) 1.5 x hole diameter
 - d) 2.0 x hole diameter
- 3) What is the efficiency of joint when strength of bolt per pitch length is 60kN and strength of plate per pitch length is 150kN?
 - a) 25%
 - b) 30%
 - c) 35%
 - d) 40%
- 4) The shape factor in plastic method of analysis depends upon _____.
 - a) Yield stress of the material
 - b) Hinge length
 - c) Geometry of the section
 - d) Redistribution of moments
- 5) Which of the following is not a serviceability criteria?
 - a) Deflection
 - b) Ponding
 - c) Vibration
 - d) Fatigue

- 6) For the block shear failure of a tension member, the failure occurs along a path through the connection involving _____.
- a) Tension on the two perpendicular planes
 - b) Shear on the two perpendicular planes
 - c) Tension on one plane and shear on the other perpendicular plane
 - d) Tension on the plane of connection and compression on the other perpendicular plane
- 7) The effective length of a compression member of length L held in position at both ends but not restrained in direction, is _____.
- a) L
 - b) $0.67 L$
 - c) $0.85L$
 - d) $1.5L$
- 8) The structural advantage of using steel as a structural material is _____.
- a) Small weight to strength
 - b) Speed of erection
 - c) Speed of dismantling
 - d) Scrap value
- 9) What is the value of constant 'k' to calculate throat thickness in fillet weld if the angle between fusion faces is 110° ?
- a) 0.6
 - b) 0.65
 - c) 0.55
 - d) 0.75
- 10) As per IS 800 purlins are designed as a _____.
- a) Simply supported beams
 - b) Cantilever beams
 - c) Continuous beams
 - d) Compression member
- 11) Tacking bolts should have a pitch in line not exceeding _____.
- a) $32 t$ or 300 mm whichever is least for plates
 - b) 600 mm for compression members
 - c) 1000 mm for tension members
 - d) All the above is correct
- 12) The self-weight of a roof truss (N/m^2) may be obtained by _____.
- a) $(L + 5)5$
 - b) $(L/3 + 5)10$
 - c) $(L - 5)5$
 - d) $(L/3 - 5)10$
- 13) Steel is an alloy which mainly contains _____.
- a) iron and silica
 - b) iron and sulfur
 - c) iron and carbon
 - d) iron and sodium

- Q.5** Design a built up laced steel column 10 m long to carry a factored axial load of **09**
1080 kN. The column is restrained in position but not restrained against rotation at both the ends. Provide a single lacing system with bolted connections. The design should confirm to specifications of IS 800-2007. Design the column with two channels placed back to back. Also design a suitable single lacing system. Assume steel of grade Fe 410 and bolts of grade 4.6

Section – II

- Q.6** Find the shape factor for following sections. **10**
a) Square of side 'a' with its diagonal parallel to zz-axis
b) Circular section
- Q.7** A simply supported steel beam of span 4 m effective span is laterally supported throughout. The loads supported by the beam comprise of uniformly distributed service live load of 40kN. (inclusive of self-weight) Adopting Fe410 grade steel, design the simply supported beam according to the specifications of IS 800-2007. **09**
- Q.8** Design an I section purlin for industrial building supporting GI sheet roof for the following data. **09**
Spacing of trusses = 4.5m
Span of truss = 12 m
Spacing of purlins = 1.4 m
Inclination of main rafter to horizontal = 26.565°
Weight of GI sheets = 171 N/m^2
Wind load = 1.2 kN/m^2
Grade of steel Fe 410
- Q.9** A column ISHB 300 @ 577 N/m carries an axial compressive factored load of 1000KN. Design a suitable welded gusset base. The base rests on M20 grade concrete pedestal. **09**

T.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
CIVIL ENGINEERING
Geotechnical Engineering (BTN01502)

Day & Date: Tuesday, 14-05-2024
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.
 4) Assume suitable data, if required and state it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the given options.

14

- 1) The Three phase soil system consists of _____.
 a) Soil, water and air b) Solids, semi-solids and water
 c) Soil, semi-solids and water d) Solids water and air
- 2) The purpose of using sand in sand replacement method is _____.
 a) To determine the density of sand
 b) To determine the density of soil
 c) To determine the volume of site hole
 d) To determine the weight of excavated soil
- 3) Which of the following methods is used for the determination of *in situ* density of soils?
 a) sand replacement method b) core cutter method
 c) rubber balloon method d) all of these
- 4) A soil mass has a liquid limit of 45 % plasticity index of 25% and a natural moisture content of 15%. The soil is in a state of _____.
 a) solid b) plastic
 c) semi – solid d) liquid
- 5) Darcy's law is applicable if a soil is _____.
 a) incompressible b) homogeneous
 c) isotropic d) all of these
- 6) The critical exit gradient for the seepage of water out of a soil is _____.
 a) $\frac{G - 1}{1 - e'}$ b) $\frac{G - 1}{1 + e'}$
 c) $\frac{G + 1}{1 - e'}$ d) $\frac{G + 1}{1 + e'}$
- 7) If the angle of shearing resistance for a backfill $\phi = 35^\circ$, the coefficient of active earth pressure as per Rankine's theory is _____.
 a) 0.27 b) 0.33
 c) 0.53 d) 3

- 8) The main advantage of triaxial compression test is _____.
a) Failure takes place on weakest plane
b) Complete control over drainage conditions
c) Stress distribution on failure plane is uniform
d) All of these
- 9) If specific gravity of soil solids of a soil having optimum moisture content 16.5% and maximum dry density 15.7 kN/m^3 is 2.65, void ratio at optimum moisture content is _____.
a) 0.588
b) 0.655
c) 0.788
d) 0.888
- 10) Select the incorrect statement _____.
a) Relative compaction is the same as relative density
b) As the compaction is increased the optimum water content increases
c) Zero air void line and 100 % saturation line are identical
d) The shear strength of soil always increases with an increase in compaction
- 11) Which of the earth pressure coefficient is minimum?
a) Passive
b) Active
c) At rest
d) None of these
- 12) For 50% degree of consolidation time factor is _____.
a) 0.1963
b) 0.382
c) 4
d) 1
- 13) For a retaining wall of height 3 m with cohesion less backfill of $\phi = 35^\circ$ the distance of resultant earth pressure above the base of wall is _____.
a) 0.33 m
b) 1.33 m
c) 1 m
d) 1.5 m
- 14) In compaction of soil, the water content at which we get maximum density is called _____.
a) Minimum water content
b) Maximum water content
c) Optimum moisture content
d) None of these

T.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
CIVIL ENGINEERING
Geotechnical Engineering (BTN01502)

Day & Date: Tuesday, 14-05-2024
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

- Instructions:** 1) Q. No. 2 is compulsory and Q. No. 6 is compulsory.
 2) Attempts any two questions from the remaining questions of each section.
 3) Figures to the right indicates full marks.
 4) Assume additional data, if required and state it clearly.

Section – I

- Q.2 Answer any four questions. 08**
- a) Define coefficient of curvature and coefficient of uniformity.
 - b) Write Coulomb's equation of shear strength.
 - c) Define Degree of saturation and air content
 - d) Enlist uses of flow net.
 - e) Define Quick sand Condition.
- Q.3 a) Enlist various soil consistency Indices. Explain any one in detail. 05**
b) Flow net is developed for a concrete weir. Related data is as below: 05
- 1) Total head causing seepage - 8m
 - 2) Length of weir - 80m
 - 3) No. of potential drops - 8
 - 4) No. of flow channels - 4
 - 5) Coefficient of permeability of foundation soil is - 6.4×10^{-5} cm/sec
- Determine the seepage loss in cubic metres per day per meter length of weir.
- Q.4 a) Porosity of soil sample is 30%, and specific gravity of its particle is 2.65. 05**
 Calculate its void ratio, dry unit weight, saturated unit weight, and submerged unit weight. Also calculate the bulk unit weight of soil, if its degree of saturation is 70%.
- b) Derive the equation of Coefficient of permeability by falling head method. 05**
- Q.5 a) Derive the equation of inclination of failure plane. 05**
b) Triaxial test was conducted on a $C - \phi$ soil, the chamber pressure was 05
 250kPa and failure occurred at an additional axial pressure of 350kPa. If failure plane makes an angle of 52° with horizontal, find the shear parameters for this soil.

Section – II

Q.6 Answer any four questions. 08

- Differentiate Light and heavy compaction
- What are the assumptions of Rankine's theory?
- Differentiate between normally consolidated & over consolidated soils.
- Enlist the coefficient of earth pressure of various types of earth pressure.
- Differentiate between compaction & consolidation.

Q.7 a) Describe the heavy proctor compaction test for determining compaction properties of soil. 05

- b) A proctor compaction test was conducted on a soil sample and the following observations were made: 05**

Water content %	8	11.5	14.5	17.5	19.5	21.5
Mass of wet soil (kg)	1.70	1.90	2	1.98	1.95	1.92

The volume of the mould used was 950 ml. Make necessary calculations and plot the compaction curve and obtain the maximum dry density and optimum water content.

Q.8 a) Draw the e-log p curve and discuss the salient features of it. 05

- b) How many days would be required by a clay stratum 5 m thick draining at both ends with an average value of coefficient of consolidation equal to $50 \times 10^{-4} \text{ cm}^2/\text{sec}$ to attain 50% of its ultimate settlement? 05**

Q.9 a) Differentiate in detail between Rankine & columb theory of earth pressure. 05

- b) A retaining wall 5 m high supports a cohesionless backfill with $\Phi = 32^\circ$, $\gamma = 19 \text{ kN/m}^3$ with horizontal top, flush with the top of the wall. The backfill carries a surcharge of 15 kN/m^2 . If the wall is moving away from the backfill compute the total pressure on the wall & its point of application. 05**

- 8) The Three phase soil system consists of _____.
- a) Soil, water and air b) Solids, semi-solids and water
c) Soil, semi-solids and water d) Solids water and air
- 9) The purpose of using sand in sand replacement method is _____.
- a) To determine the density of sand
b) To determine the density of soil
c) To determine the volume of site hole
d) To determine the weight of excavated soil
- 10) Which of the following methods is used for the determination of *in situ* density of soils?
- a) sand replacement method b) core cutter method
c) rubber balloon method d) all of these
- 11) A soil mass has a liquid limit of 45 % plasticity index of 25% and a natural moisture content of 15%. The soil is in a state of _____.
- a) solid b) plastic
c) semi – solid d) liquid
- 12) Darcy's law is applicable if a soil is _____.
- a) incompressible b) homogeneous
c) isotropic d) all of these
- 13) The critical exit gradient for the seepage of water out of a soil is _____.
- a) $\frac{G - 1}{1 - e'}$ b) $\frac{G - 1}{1 + e'}$
c) $\frac{G + 1}{1 - e'}$ d) $\frac{G + 1}{1 + e'}$
- 14) If the angle of shearing resistance for a backfill $\phi = 35^\circ$, the coefficient of active earth pressure as per Rankine's theory is _____.
- a) 0.27 b) 0.33
c) 0.53 d) 3

CIVIL ENGINEERING**

Highway and Tunnel Engineering (BTN01503)

Day & Date: Wednesday, 15-05-2024
Time: 10:00 AM To 01:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume additional data if required and mention it clearly.

Section – I

Q.2 Solve any two questions. 14

- a) Design speed of highway is 80 kmph. There is a horizontal curve of radius 200 m on a certain locality. Safe limit of transverse coefficient of friction is 0.15.
i) Calculate the super elevation required to maintain this speed.
ii) If the maximum super elevation of 0.07 is not to be exceeded, calculate the maximum allowable speed on this horizontal curve as it is not possible to increase the radius.
- b) What is highway alignment? Discuss different factor affecting the highway Alignment.
- c) What is SSD? Explain PIVE theory in SSD.

Q.3 Solve any two questions. 14

- a) Write a Detailed note on "Significance of CBR & plate load test on sub grade soil".
- b) Define camber. State its importance. Explain different type of camber.
- c) Write a short note on:
i) Geosynthetic material in highway construction
ii) Softening point and ductility test on bitumen

Section – II

Q.4 Solve any two questions.

14

- a) What is the factor to be considered in the design of the flexible pavement? Discuss Significance of each.
- b) Determine the warping stresses at interior, edge and corner of 25 cm thick cement Concrete pavement with transverse joints at 5.0 m interval and longitudinal joints at 3.6 m intervals. The modulus of sub grade reaction K is 6.9 kg/cm^3 and radius of loaded area is 15 cm. Assume temperature differential during day to be 0.6°C per cm slab Thickness (for warping stress at interior and edge) and maximum temperature Differential of 0.4°C per cm slab thickness during the night (for warping stress at the Corner). Assume $e = 10 \times 10^{-6}$ per $^\circ\text{C}$, $E = 3 \times 10^5 \text{ kg/cm}^2$, $\mu = 0.15$. Use Bradbury chart Given in Figure-I.

Fig-I

- c) Define Radius of Relative stiffness. Find out radius of relative stiffness of 15 cm thickness cement concrete slab from following data
 $E = 210000 \text{ Kg/cm}^2$, Poisson's ratio = 0.13, $K = 3 \text{ Kg/cm}^2$

Q.5 Solve any two questions.

14

- a) What is highway drainage? How it is achieved? State its effects.
- b) State method of tunnel in soft rock. Explain with sketch any one method in details.
- c) What is tunnel lining? How and why, it is done?

**T.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
CIVIL ENGINEERING**

Highway and Tunnel Engineering (BTN01503)

Day & Date: Wednesday, 15-05-2024
Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No 3 (starting page of the Answer Book). Each question carry one mark.
2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options.

14

- 1) The study on weathering action on road aggregate, which one of the following tests is carried out _____.
 - a) Abrasion test
 - b) Crushing Test
 - c) Impact Test
 - d) Soundness Test
- 2) The thickness of road surface depends upon the _____.
 - a) Type of traffic
 - b) Type of the material
 - c) Intensity of traffic
 - d) All of the above
- 3) Failure in flexible pavement is due to failure of _____.
 - (I) Sub grade
 - (II) Base course
 - (III) Wearing course
 - a) (I) and (II)
 - b) (I) and (III)
 - c) (II) and (III)
 - d) (I), (II) and (III)
- 4) The maximum spacing of contraction joint in rigid pavement is _____.
 - a) 2.5 m
 - b) 3.5 m
 - c) 4.5 m
 - d) 5.5 m
- 5) In which one of the following joint, dowel bars are provided in cement concrete pavement?
 - a) Expansion joint
 - b) Longitudinal joint
 - c) Construction Joint
 - d) None of the above
- 6) In order to maintain desired shape of the tunnel the cross section of the tunnel must be checked at a regular interval of _____.
 - a) 2 m to 3 m
 - b) 4 m to 6 m
 - c) 5 m to 7 m
 - d) 8 m to 15 m
- 7) The process of removal rock protrusions by hammering immediately after the blasting is known as _____.
 - a) Mucking
 - b) Skimming
 - c) Trimming
 - d) Scaling

CIVIL ENGINEERING**

Highway and Tunnel Engineering (BTN01503)

Day & Date: Wednesday, 15-05-2024
Time: 10:00 AM To 01:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume additional data if required and mention it clearly.

Section – I

Q.2 Solve any two questions. 14

- a) Design speed of highway is 80 kmph. There is a horizontal curve of radius 200 m on a certain locality. Safe limit of transverse coefficient of friction is 0.15.
- Calculate the super elevation required to maintain this speed.
 - If the maximum super elevation of 0.07 is not to be exceeded, calculate the maximum allowable speed on this horizontal curve as it is not possible to increase the radius.
- b) What is highway alignment? Discuss different factor affecting the highway Alignment.
- c) What is SSD? Explain PIVE theory in SSD.

Q.3 Solve any two questions. 14

- a) Write a Detailed note on "Significance of CBR & plate load test on sub grade soil".
- b) Define camber. State its importance. Explain different type of camber.
- c) Write a short note on:
- Geosynthetic material in highway construction
 - Softening point and ductility test on bitumen

Section – II

Q.4 Solve any two questions.

14

- a) What is the factor to be considered in the design of the flexible pavement? Discuss Significance of each.
- b) Determine the warping stresses at interior, edge and corner of 25 cm thick cement Concrete pavement with transverse joints at 5.0 m interval and longitudinal joints at 3.6 m intervals. The modulus of sub grade reaction K is 6.9 kg/cm^3 and radius of loaded area is 15 cm. Assume temperature differential during day to be 0.6°C per cm slab Thickness (for warping stress at interior and edge) and maximum temperature Differential of 0.4°C per cm slab thickness during the night (for warping stress at the Corner). Assume $e = 10 \times 10^{-6}$ per $^\circ\text{C}$, $E = 3 \times 10^5 \text{ kg/cm}^2$, $\mu = 0.15$. Use Bradbury chart Given in Figure-I.

Fig-I

- c) Define Radius of Relative stiffness. Find out radius of relative stiffness of 15 cm thickness cement concrete slab from following data
 $E = 210000 \text{ Kg/cm}^2$, Poisson's ratio = 0.13, $K = 3 \text{ Kg/cm}^2$

Q.5 Solve any two questions.

14

- a) What is highway drainage? How it is achieved? State its effects.
- b) State method of tunnel in soft rock. Explain with sketch any one method in details.
- c) What is tunnel lining? How and why, it is done?

- 9) Which one of the following equipment is used to ensure the pavement unevenness index?
a) Bump Integrator b) Odometer
c) Network survey vehicles d) None of the above
- 10) For the calculation of stopping sight distance the reaction time of the driver may be taken as _____.
a) 2.5 second b) 5 second
c) 7.5 second d) 10 second
- 11) In CBR test the value of CBR is calculated at _____.
a) 2.5 mm penetration
b) 5.0 mm penetration
c) 7.5 mm penetration
d) Both 2.5 mm and 5.0 mm penetration
- 12) The study on weathering action on road aggregate, which one of the following tests is carried out _____.
a) Abrasion test b) Crushing Test
c) Impact Test d) Soundness Test
- 13) The thickness of road surface depends upon the _____.
a) Type of traffic b) Type of the material
c) Intensity of traffic d) All of the above
- 14) Failure in flexible pavement is due to failure of _____.
(I) Sub grade
(II) Base course
(III) Wearing course
a) (I) and (II) b) (I) and (III)
c) (II) and (III) d) (I), (II) and (III)

3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and state it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 MCQ /Objective type question paper

14

- 1) The constant value attained by the infiltration capacity, after the soil profile gets saturated, depends on _____.
a) permeability of soil b) infiltration rate
c) Rainfall intensity d) None of them
- 2) A line joining places of equal rainfall, is called a _____.
a) hyetograph b) isobar
c) isotherm d) isohyet
- 3) The S-curve is used _____.
a) to develop synthetic unit hydrograph
b) to derive unit hydrograph of a complex storm
c) to convert the unit hydrograph of any given duration into a unit hydrograph of any other desired duration
d) to estimate the peak flow of a basin from the given storm
- 4) Fern leaf catchment, when compared with fan shaped catchments, will have _____.
a) longer streams
b) shorter streams
c) almost equally long streams
d) longer or shorter streams, depending upon the particular catchment
- 5) In mean section method _____.
a) the elemental strip is taken between two verticals
b) mean depth is taken as the average of the depths in the two verticals
c) width of the strip is distance b between the two verticals
d) all of these
- 6) The flood discharges for a number of years have been observed at a certain weir. The peak flood values for each successive years have been listed for analysis, from this available data. The series so formed is called _____.
a) annual series b) complete series
c) partial duration series d) extreme value series

- 7) The line joining the static water levels in several wells, excavated through a confined aquifer, is known as the: _____.
- a) cone of depression b) piezometric surface
c) perched water table d) hypsometric curve
- 8) A stream which contributes runoff to groundwater is known as _____.
a) influent stream b) effluent stream
c) perennial stream d) Ephemeral stream
- 9) Par-Tapi-Narmada river link is part of _____.
a) Himalayan component b) Peninsular
c) Both a and b d) none of these
- 10) The method of growing crops on ridges, running on the sides of water ditches, is known as _____.
a) flood irrigation b) furrow irrigation
c) check-irrigation d) none-of-them
- 11) An irrigation project is classified as a major project, when the cultural command involved in the project, is more than _____.
a) 2,000 hectares b) 5,000 hectares
c) 10,000 hectares d) none of the above
- 12) If the intensity of irrigation for Kharif is 45% and that for Rabi is 60%; then the annual intensity of irrigation, is _____.
a) 60% b) 100%
c) 105% d) none of them
- 13) The moisture held by a well-drained soil against gravity drainage, by the force of surface tension between the soil grains and water drops; is called _____.
a) field capacity water b) hygroscopic water
c) capillary water d) water of adhesion
- 14) Preconstruction measure for control of sedimentation in reservoir includes _____.
a) Construction of check dams
b) Erosion control and soil conservation
c) Mechanical stirring of sediments
d) Removal of post flood water

**T.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
CIVIL ENGINEERING**

Hydrology and Water Resources Engineering (BTN01504)

Day & Date: Thursday, 16-05-2024
Time: 10:00 AM To 01:00 PM

Max. Marks: 56

- Instructions:** 1) Question no. 2 is compulsory in section I, and solve any two questions from the remaining. (Q. No. 3, 4 & 5)
2) Question no. 6 is compulsory in section II, and solve any two questions from the remaining. (Q. No. 7, 8 & 9)
3) Figures to the right indicate full marks.
4) Assume suitable data wherever needed and mention it clearly.

Section – I

- Q.2** a) Enlist different methods of measurement of rainfall and explain any one with neat sketch with its advantages and disadvantages. **04**
b) The data pertaining to a stream gauging operation at gauging site are given below. The rating equation of current meter is $V = 0.51 N_s + 0.03$ m/s. where N_s = revolutions per second. Calculate the discharge in the stream. **06**

Distance from left water edge (m)	0	2	3	5	7	9	11	12
Depth (m)	0	1.1	2.0	2.5	2.0	1.7	1.0	0
Revolutions of current meter kept at 0.6 depth	0	39	58	112	90	45	30	0
Duration of observation (s)	0	100	100	150	150	100	100	0

- Q.3** a) Explain different parameters affecting the site selection for stream gauging. **04**
b) A Raingauge station D was in operative for part of a month during which storm occurs. The storm rainfall recorded in the three surrounding stations A, B and C were 8.5, 6.7 and 9 cm respectively, if the annual average rainfall for the stations are 75, 84, 70 and 90 cm respectively. Estimate the storm rainfall at station. **05**
- Q.4** a) Enlist the assumptions made in the steady flow condition to a well penetrating in confined aquifers and derive expression of it. **04**
b) The storm over a catchment 50 km^2 was having the following intensity 35 mm/hr. for 1 hr., 75 mm/hr. for 2 hr., 32 mm/hr. for 1 hr., The infiltration rate of the catchment area is as follows. 25% area $\phi = 10 \text{ mm/hr.}$, 50% area $\phi = 12 \text{ mm/hr.}$, and Remaining area is impervious. Find the runoff. **05**

- Q.5 a)** Define Unit Hydrograph and explain the concept of S - curve hydrograph with a neat sketch. **04**
- b)** An unconfined aquifer has a thickness 30 m. A completely 20 cm diameter well in this aquifer is pumped at a rate of 35 lit/s. the drawdown measured in two observation wells located at distances of 10 m and 100 m from the well are 7.5 m and 0.5 m respectively. Determine the average hydraulic conductivity of the aquifer. At what distance from the well the drawdown is insignificant? **05**

Section – II

- Q.6 a)** Explain the problems in water resources developments in country and Maharashtra state. **05**
- b)** Discuss the suitability and construction features of Kolhapur type weir for irrigation. **05**
- Q.7 a)** Explain percolation tank with neat sketch. **03**
- b)** Table below gives a necessary data about the crops, their duty and area under each crop, commanded by a canal, taking off from a storage reservoir. Taking a time factor for a canal to be 10/20. Calculate the discharge required at the head of the canal. Also determine design discharge, if capacity factor of a canal is 0.9. **06**

Crop	Base Period	Area (hectares)	Duty at the head of canal (ha/cumec)
Sugarcane (yearly)	320	800	580
Overlap of sugarcane in hot weather	90	140	580
Wheat (Rabbi)	120	700	1600
Bajara (Kharif)	120	600	2000
Vegetable (Hot weather)	120	360	600

- Q.8 a)** Define the terms field capacity, wilting point and optimum water content. **03**
- b)** Enlist and explain the different erosion control measures which are effective in preventing and delaying sediment deposition in reservoirs. **06**
- Q.9 a)** Explain the benefits of use of Remote Sensing and Geographic Information Systems in Water Shed management. **03**
- b)** After how many days will you supply water to soil in order to ensure irrigation of given crop if, field capacity of soil is 26%, permanent wilting point 14%, dry density of soil 1.3 g/cc. assume daily consumptive use of water for the given crop 10 mm and effective root zone depth 70 cm and readily available moisture to crop is 80% of available moisture. **06**

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 MCQ /Objective type question paper

14

- 1) A stream which contributes runoff to groundwater is known as _____.
a) influent stream b) effluent stream
c) perennial stream d) Ephemeral stream
- 2) Par-Tapi-Narmada river link is part of _____.
a) Himalayan component b) Peninsular
c) Both a and b d) none of these
- 3) The method of growing crops on ridges, running on the sides of water ditches, is known as _____.
a) flood irrigation b) furrow irrigation
c) check-irrigation d) none-of-them
- 4) An irrigation project is classified as a major project, when the cultural command involved in the project, is more than _____.
a) 2,000 hectares b) 5,000 hectares
c) 10,000 hectares d) none of the above
- 5) If the intensity of irrigation for Kharif is 45% and that for Rabi is 60%; then the annual intensity of irrigation, is _____.
a) 60% b) 100%
c) 105% d) none of them
- 6) The moisture held by a well-drained soil against gravity drainage, by the force of surface tension between the soil grains and water drops; is called _____.
a) field capacity water b) hygroscopic water
c) capillary water d) water of adhesion
- 7) Preconstruction measure for control of sedimentation in reservoir includes _____.
a) Construction of check dams
b) Erosion control and soil conservation
c) Mechanical stirring of sediments
d) Removal of post flood water

- 8) The constant value attained by the infiltration capacity, after the soil profile gets saturated, depends on _____.
- a) permeability of soil b) infiltration rate
c) Rainfall intensity d) None of them
- 9) A line joining places of equal rainfall, is called a _____.
- a) hyetograph b) isobar
c) isotherm d) isohyet
- 10) The S-curve is used _____.
- a) to develop synthetic unit hydrograph
b) to derive unit hydrograph of a complex storm
c) to convert the unit hydrograph of any given duration into a unit hydrograph of any other desired duration
d) to estimate the peak flow of a basin from the given storm
- 11) Fern leaf catchment, when compared with fan shaped catchments, will have _____.
- a) longer streams
b) shorter streams
c) almost equally long streams
d) longer or shorter streams, depending upon the particular catchment
- 12) In mean section method _____.
- a) the elemental strip is taken between two verticals
b) mean depth is taken as the average of the depths in the two verticals
c) width of the strip is distance b between the two verticals
d) all of these
- 13) The flood discharges for a number of years have been observed at a certain weir. The peak flood values for each successive years have been listed for analysis, from this available data. The series so formed is called _____.
- a) annual series b) complete series
c) partial duration series d) extreme value series

Revolutions of current meter kept at 0.6 depth	0	39	58	112	90	45	30	0
Duration of observation (s)	0	100	100	150	150	100	100	0

- Q.3** a) Explain different parameters affecting the site selection for stream gauging. **04**
b) A Rain gauge station D was in operative for part of a month during which storm occurs. The storm rainfall recorded in the three surrounding stations A, B and C were 8.5, 6.7 and 9 cm respectively, if the annual average rainfall for the stations are 75, 84, 70 and 90 cm respectively. Estimate the storm rainfall at station. **05**
- Q.4** a) Enlist the assumptions made in the steady flow condition to a well penetrating in confined aquifers and derive expression of it. **04**
b) The storm over a catchment 50 km^2 was having the following intensity 35 mm/hr. for 1 hr., 75 mm/hr. for 2 hr., 32 mm/hr. for 1 hr., The infiltration rate of the catchment area is as follows. 25% area $\phi = 10 \text{ mm/hr.}$, 50% area $\phi = 12 \text{ mm/hr.}$, and Remaining area is impervious. Find the runoff. **05**

- Q.5 a)** Define Unit Hydrograph and explain the concept of S - curve hydrograph with a neat sketch. **04**
- b)** An unconfined aquifer has a thickness 30 m. A completely 20 cm diameter well in this aquifer is pumped at a rate of 35 lit/s. the drawdown measured in two observation wells located at distances of 10 m and 100 m from the well are 7.5 m and 0.5 m respectively. Determine the average hydraulic conductivity of the aquifer. At what distance from the well the drawdown is insignificant? **05**

Section – II

- Q.6 a)** Explain the problems in water resources developments in country and Maharashtra state. **05**
- b)** Discuss the suitability and construction features of Kolhapur type weir for irrigation. **05**
- Q.7 a)** Explain percolation tank with neat sketch. **03**
- b)** Table below gives a necessary data about the crops, their duty and area under each crop, commanded by a canal, taking off from a storage reservoir. Taking a time factor for a canal to be 10/20. Calculate the discharge required at the head of the canal. Also determine design discharge, if capacity factor of a canal is 0.9. **06**

Crop	Base Period	Area (hectares)	Duty at the head of canal (ha/cumec)
Sugarcane (yearly)	320	800	580
Overlap of sugarcane in hot weather	90	140	580
Wheat (Rabbi)	120	700	1600
Bajara (Kharif)	120	600	2000
Vegetable (Hot weather)	120	360	600

- Q.8 a)** Define the terms field capacity, wilting point and optimum water content. **03**
- b)** Enlist and explain the different erosion control measures which are effective in preventing and delaying sediment deposition in reservoirs. **06**
- Q.9 a)** Explain the benefits of use of Remote Sensing and Geographic Information Systems in Water Shed management. **03**
- b)** After how many days will you supply water to soil in order to ensure irrigation of given crop if, field capacity of soil is 26%, permanent wilting point 14%, dry density of soil 1.3 g/cc. assume daily consumptive use of water for the given crop 10 mm and effective root zone depth 70 cm and readily available moisture to crop is 80% of available moisture. **06**

**T.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
CIVIL ENGINEERING**

Hydrology and Water Resources Engineering (BTN01504)

Day & Date: Thursday, 16-05-2024
Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and state it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 MCQ /Objective type question paper

14

- 1) An irrigation project is classified as a major project, when the cultural command involved in the project, is more than _____.
 - a) 2,000 hectares
 - b) 5,000 hectares
 - c) 10,000 hectares
 - d) none of the above
- 2) If the intensity of irrigation for Kharif is 45% and that for Rabi is 60%; then the annual intensity of irrigation, is _____.
 - a) 60%
 - b) 100%
 - c) 105%
 - d) none of them
- 3) The moisture held by a well-drained soil against gravity drainage, by the force of surface tension between the soil grains and water drops; is called _____.
 - a) field capacity water
 - b) hygroscopic water
 - c) capillary water
 - d) water of adhesion
- 4) Preconstruction measure for control of sedimentation in reservoir includes _____.
 - a) Construction of check dams
 - b) Erosion control and soil conservation
 - c) Mechanical stirring of sediments
 - d) Removal of post flood water
- 5) The constant value attained by the infiltration capacity, after the soil profile gets saturated, depends on _____.
 - a) permeability of soil
 - b) infiltration rate
 - c) Rainfall intensity
 - d) None of them
- 6) A line joining places of equal rainfall, is called a _____.
 - a) hyetograph
 - b) isobar
 - c) isotherm
 - d) isohyet
- 7) The S-curve is used _____.
 - a) to develop synthetic unit hydrograph
 - b) to derive unit hydrograph of a complex storm
 - c) to convert the unit hydrograph of any given duration into a unit hydrograph of any other desired duration
 - d) to estimate the peak flow of a basin from the given storm

- 8) Fern leaf catchment, when compared with fan shaped catchments, will have _____.
- a) longer streams
 - b) shorter streams
 - c) almost equally long streams
 - d) longer or shorter streams, depending upon the particular catchment
- 9) In mean section method _____.
- a) the elemental strip is taken between two verticals
 - b) mean depth is taken as the average of the depths in the two verticals
 - c) width of the strip is distance b between the two verticals
 - d) all of these
- 10) The flood discharges for a number of years have been observed at a certain weir. The peak flood values for each successive years have been listed for analysis, from this available data. The series so formed is called _____.
- a) annual series
 - b) complete series
 - c) partial duration series
 - d) extreme value series
- 11) The line joining the static water levels in several wells, excavated through a confined aquifer, is known as the: _____.
- a) cone of depression
 - b) piezometric surface
 - c) perched water table
 - d) hypsometric curve
- 12) A stream which contributes runoff to groundwater is known as _____.
- a) influent stream
 - b) effluent stream
 - c) perennial stream
 - d) Ephemeral stream
- 13) Par-Tapi-Narmada river link is part of _____.
- a) Himalayan component
 - b) Peninsular
 - c) Both a and b
 - d) none of these
- 14) The method of growing crops on ridges, running on the sides of water ditches, is known as _____.
- a) flood irrigation
 - b) furrow irrigation
 - c) check-irrigation
 - d) none-of-them

Hydrology and Water Resources Engineering (BTN01504)

Day & Date: Thursday, 16-05-2024
Time: 10:00 AM To 01:00 PM

Max. Marks: 56

- Instructions:** 1) Question no. 2 is compulsory in section I, and solve any two questions from the remaining. (Q. No. 3, 4 & 5)
2) Question no. 6 is compulsory in section II, and solve any two questions from the remaining. (Q. No. 7, 8 & 9)
3) Figures to the right indicate full marks.
4) Assume suitable data wherever needed and mention it clearly.

Section – I

- Q.2** a) Enlist different methods of measurement of rainfall and explain any one with neat sketch with its advantages and disadvantages. **04**
b) The data pertaining to a stream gauging operation at gauging site are given below. The rating equation of current meter is $V = 0.51 N_s + 0.03$ m/s. where N_s = revolutions per second. Calculate the discharge in the stream. **06**

Distance from left water edge (m)	0	2	3	5	7	9	11	12
Depth (m)	0	1.1	2.0	2.5	2.0	1.7	1.0	0
Revolutions of current meter kept at 0.6 depth	0	39	58	112	90	45	30	0
Duration of observation (s)	0	100	100	150	150	100	100	0

- Q.3** a) Explain different parameters affecting the site selection for stream gauging. **04**
b) A Raingauge station D was in operative for part of a month during which storm occurs. The storm rainfall recorded in the three surrounding stations A, B and C were 8.5, 6.7 and 9 cm respectively, if the annual average rainfall for the stations are 75, 84, 70 and 90 cm respectively. Estimate the storm rainfall at station. **05**
- Q.4** a) Enlist the assumptions made in the steady flow condition to a well penetrating in confined aquifers and derive expression of it. **04**
b) The storm over a catchment 50 km^2 was having the following intensity **05**
35 mm/hr. for 1 hr., 75 mm/hr. for 2 hr., 32 mm/hr. for 1 hr.,
The infiltration rate of the catchment area is as follows.
25% area $\phi = 10 \text{ mm/hr.}$, 50% area $\phi = 12 \text{ mm/hr.}$, and Remaining area is impervious. Find the runoff.

- Q.5 a)** Define Unit Hydrograph and explain the concept of S - curve hydrograph with a neat sketch. **04**
- b)** An unconfined aquifer has a thickness 30 m. A completely 20 cm diameter well in this aquifer is pumped at a rate of 35 lit/s. the drawdown measured in two observation wells located at distances of 10 m and 100 m from the well are 7.5 m and 0.5 m respectively. Determine the average hydraulic conductivity of the aquifer. At what distance from the well the drawdown is insignificant? **05**

Section – II

- Q.6 a)** Explain the problems in water resources developments in country and Maharashtra state. **05**
- b)** Discuss the suitability and construction features of Kolhapur type weir for irrigation. **05**
- Q.7 a)** Explain percolation tank with neat sketch. **03**
- b)** Table below gives a necessary data about the crops, their duty and area under each crop, commanded by a canal, taking off from a storage reservoir. Taking a time factor for a canal to be 10/20. Calculate the discharge required at the head of the canal. Also determine design discharge, if capacity factor of a canal is 0.9. **06**

Crop	Base Period	Area (hectares)	Duty at the head of canal (ha/cumec)
Sugarcane (yearly)	320	800	580
Overlap of sugarcane in hot weather	90	140	580
Wheat (Rabbi)	120	700	1600
Bajara (Kharif)	120	600	2000
Vegetable (Hot weather)	120	360	600

- Q.8 a)** Define the terms field capacity, wilting point and optimum water content. **03**
- b)** Enlist and explain the different erosion control measures which are effective in preventing and delaying sediment deposition in reservoirs. **06**
- Q.9 a)** Explain the benefits of use of Remote Sensing and Geographic Information Systems in Water Shed management. **03**
- b)** After how many days will you supply water to soil in order to ensure irrigation of given crop if, field capacity of soil is 26%, permanent wilting point 14%, dry density of soil 1.3 g/cc. assume daily consumptive use of water for the given crop 10 mm and effective root zone depth 70 cm and readily available moisture to crop is 80% of available moisture. **06**

- 8) The moisture held by a well-drained soil against gravity drainage, by the force of surface tension between the soil grains and water drops; is called _____.
a) field capacity water b) hygroscopic water
c) capillary water d) water of adhesion
- 9) Preconstruction measure for control of sedimentation in reservoir includes _____.
a) Construction of check dams
b) Erosion control and soil conservation
c) Mechanical stirring of sediments
d) Removal of post flood water
- 10) The constant value attained by the infiltration capacity, after the soil profile gets saturated, depends on _____.
a) permeability of soil b) infiltration rate
c) Rainfall intensity d) None of them
- 11) A line joining places of equal rainfall, is called a _____.
a) hyetograph b) isobar
c) isotherm d) isohyet
- 12) The S-curve is used _____.
a) to develop synthetic unit hydrograph
b) to derive unit hydrograph of a complex storm
c) to convert the unit hydrograph of any given duration into a unit hydrograph of any other desired duration
d) to estimate the peak flow of a basin from the given storm
- 13) Fern leaf catchment, when compared with fan shaped catchments, will have _____.
a) longer streams
b) shorter streams
c) almost equally long streams
d) longer or shorter streams, depending upon the particular catchment
- 14) In mean section method _____.
a) the elemental strip is taken between two verticals
b) mean depth is taken as the average of the depths in the two verticals
c) width of the strip is distance b between the two verticals
d) all of these

Design of Concrete Structures - I (BTN01505)

Day & Date: Friday, 17-05-2024
Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:**
- 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No. 3 (starting page of the Answer Book).
 - 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 - 3) Figures to the right indicates full marks.
 - 4) Assume suitable data wherever needed and mention it clearly.
 - 5) While solving MCQ, IS 456-2000 is not allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

- Q.1 Choose the correct alternatives from the given options. 14**
- 1) As per IS 456, the reinforcement in column should not be less than _____. **01**
 - a) 0.5% and not more than 5% of cross-sectional area
 - b) 0.6% and not more than 6% of cross-sectional area
 - c) 0.7% and not more than 7% of cross-sectional area
 - d) 0.8% and not more than 8% of cross-sectional area
 - 2) A part of the slab may be considered as the flange of the T beam if _____. **01**
 - a) Flange has adequate reinforcement transverse to beam
 - b) It is built integrally with the beam
 - c) It is effectively bonded together with the beam
 - d) All the above
 - 3) An R.C.C. beam without shear reinforcement may develop cracks in its bottom inclined roughly to the horizontal at _____. **01**
 - a) 25 degree
 - b) 35 degree
 - c) 45 degree
 - d) 55 degree
 - 4) The effective cover of beam depends on _____. **01**
 - a) Diameter of main reinforcement
 - b) Grade of reinforcing steel
 - c) Width of beam
 - d) All of these
 - 5) In a simply supported slab, alternate bars are curtailed at _____. **01**
 - a) 1/4th of the span
 - b) 1/5th of the span
 - c) 1/6th of the span
 - d) 1/7th of the span
 - 6) A short column of size 250mm×350mm is provided with longitudinal reinforcement of diameter 20mm and the diameter of tie is 8mm. According to IS 456:2000, the maximum spacing between two ties is _____. **01**
 - a) 200 mm
 - b) 350 mm
 - c) 300 mm
 - d) 250 mm

**T.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
CIVIL ENGINEERING**

Design of Concrete Structures - I (BTN01505)

Day & Date: Friday, 17-05-2024
Time: 10:00 AM To 01:00 PM

Max. Marks: 56

- Instructions:**
- 1) Question No. 2 and 6 is compulsory.
 - 2) Solve any two questions from the remaining questions of each section.
 - 3) Use of IS 456:2000 and non-programmable calculator is allowed.
 - 4) Figure to the right indicates full marks.
 - 5) Assume additional suitable data if necessary and state it clearly.
 - 6) Draw neat sketch of reinforcement details.

Section – I

- Q.2** A roof of clear dimensions 4.5 m × 6m supported on walls of 230mm thickness, with corners are held down. All the four edges of the slab are discontinuous. Design the slab, if the beam is carrying a live load of 4 kN/m². Use M 20 & Fe 415 steel. **10**
- Q.3** Design the simply supported rectangular beam of 250 mm width to carry live load of 26 kN/m. The clear span is 4 m and bearing at each end is 230 mm. Use M20, Fe 500. **09**
- Q.4** A doubly reinforced beam 250 mm × 500 mm is provided with 3 bars of 16 mm diameter as compression steel with an effective cover of 50 mm and 4 bars of 20 mm diameter as tensile steel. Determine ultimate moment if M20 and Fe 500 grade steel. **09**
- Q.5** Calculate the ultimate flexural strength of T beam section having following sectional properties: **09**
 Width of flange = 1200 mm
 Depth of flange = 120 mm
 Width of rib = 300 mm
 Effective depth = 600 mm
 Area of tensile steel = 8 bars of 25 mm diameter
 Materials: M20, Fe 415

Section – II

- Q.6** Design a continuous reinforced concrete beam of rectangular section to support a dead load of 10 kN/m and live load of 12 kN/m over the 3 spans of effective length 6 m which are simply supported at the end. Use M 20 concrete and Fe 415 steel. **10**
- Q.7** Determine reinforcement required for a beam size 300 mm × 600 mm subjected to factored bending moment of 80 kNm, factored shear force 70 kN and factored torsional moment of 40 kNm. Use M20 concrete and Fe500 steel. **09**

- Q.8** A short column 400 mm × 400 mm is provided with 3-16 mm diameter. The length of column is 2.25 m. It is effectively held in position at both the ends & restrained against rotation at other end. Find ultimate load of the column. Use M20 & Fe 415. **09**
- Q.9** Design a circular column subjected to a working load of 1600 kN. The unsupported length of column is 3.5 m which is effectively held in position at both ends but not restrained against rotation. Use M25 concrete and Fe 415 steel. **09**

CIVIL ENGINEERING**

Design of Concrete Structures - I (BTN01505)

Day & Date: Friday, 17-05-2024
Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:**
- 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No. 3 (starting page of the Answer Book).
 - 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 - 3) Figures to the right indicates full marks.
 - 4) Assume suitable data wherever needed and mention it clearly.
 - 5) While solving MCQ, IS 456-2000 is not allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

- Q.1 Choose the correct alternatives from the given options.** **14**
- 1) In a simply supported slab, alternate bars are curtailed at _____. **01**
 - a) $1/4^{\text{th}}$ of the span
 - b) $1/5^{\text{th}}$ of the span
 - c) $1/6^{\text{th}}$ of the span
 - d) $1/7^{\text{th}}$ of the span
 - 2) A short column of size 250mm×350mm is provided with longitudinal reinforcement of diameter 20mm and the diameter of tie is 8mm. According to IS 456:2000, the maximum spacing between two ties is _____. **01**
 - a) 200 mm
 - b) 350 mm
 - c) 300 mm
 - d) 250 mm
 - 3) The length of torsion reinforcement in two way slab is provided as _____. **01**
 - a) Shorter span/4
 - b) Shorter span/5
 - c) Shorter span/8
 - d) Shorter span/10
 - 4) An RCC beam of 200mm×300mm effective is subjected to factored shear force 30 kN. The maximum nominal shear stress is _____. **01**
 - a) 0.5 N/mm^2
 - b) 0.6 N/mm^2
 - c) 0.7 N/mm^2
 - d) 0.8 N/mm^2
 - 5) As per IS 456, the reinforcement in column should not be less than _____. **01**
 - a) 0.5% and not more than 5% of cross-sectional area
 - b) 0.6% and not more than 6% of cross-sectional area
 - c) 0.7% and not more than 7% of cross-sectional area
 - d) 0.8% and not more than 8% of cross-sectional area
 - 6) A part of the slab may be considered as the flange of the T beam if _____. **01**
 - a) Flange has adequate reinforcement transverse to beam
 - b) It is built integrally with the beam
 - c) It is effectively bonded together with the beam
 - d) All the above
 - 7) An R.C.C. beam without shear reinforcement may develop cracks in its bottom inclined roughly to the horizontal at _____. **01**
 - a) 25 degree
 - b) 35 degree
 - c) 45 degree
 - d) 55 degree

- 8) The effective cover of beam depends on _____. 01
a) Diameter of main reinforcement
b) Grade of reinforcing steel
c) Width of beam
d) All of these
- 9) A flanged beam is having the following dimension: width of flange, $b_f = 1000\text{mm}$ depth of flange, $D_f = 125\text{mm}$, width of web, $b_w = 250\text{ mm}$ and overall depth of beam, $D = 250\text{ mm}$. The concrete grade is M20 and the grade of reinforcing steel is Fe415. The clear cover is 25 mm. The moment of resistance the section is _____. 02
a) 95.891 kNm b) 127.854 kNm
c) 159.818 kNm d) 191.781 kNm
- 10) A concrete column is reinforced with 4 bars of 20mm diameter. Determine the design axial load carrying capacity of a column of size 400mm × 400mm. Consider M20 grade concrete, Fe415 grade and column is perfectly axially loaded. 02
a) 2420 kN b) 2020 kN
c) 1610 kN d) 1210 kN
- 11) A rectangular section 300mm×700mm overall dimension. 30mm effective cover to compression and tension steel, is reinforced with 2 bars of 20mm and 4 bars of 20mm diameter respectively. Grade Fe415 and M25. Then the depth of neutral axis will be _____. 02
a) 105 mm b) 83 mm
c) 74 mm d) 93 mm

**T.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
CIVIL ENGINEERING**

Design of Concrete Structures - I (BTN01505)

Day & Date: Friday, 17-05-2024
Time: 10:00 AM To 01:00 PM

Max. Marks: 56

- Instructions:**
- 1) Question No. 2 and 6 is compulsory.
 - 2) Solve any two questions from the remaining questions of each section.
 - 3) Use of IS 456:2000 and non-programmable calculator is allowed.
 - 4) Figure to the right indicates full marks.
 - 5) Assume additional suitable data if necessary and state it clearly.
 - 6) Draw neat sketch of reinforcement details.

Section – I

- Q.2** A roof of clear dimensions 4.5 m × 6m supported on walls of 230mm thickness, with corners are held down. All the four edges of the slab are discontinuous. Design the slab, if the beam is carrying a live load of 4 kN/m². Use M 20 & Fe 415 steel. **10**
- Q.3** Design the simply supported rectangular beam of 250 mm width to carry live load of 26 kN/m. The clear span is 4 m and bearing at each end is 230 mm. Use M20, Fe 500. **09**
- Q.4** A doubly reinforced beam 250 mm × 500 mm is provided with 3 bars of 16 mm diameter as compression steel with an effective cover of 50 mm and 4 bars of 20 mm diameter as tensile steel. Determine ultimate moment if M20 and Fe 500 grade steel. **09**
- Q.5** Calculate the ultimate flexural strength of T beam section having following sectional properties: **09**
 Width of flange = 1200 mm
 Depth of flange = 120 mm
 Width of rib = 300 mm
 Effective depth = 600 mm
 Area of tensile steel = 8 bars of 25 mm diameter
 Materials: M20, Fe 415

Section – II

- Q.6** Design a continuous reinforced concrete beam of rectangular section to support a dead load of 10 kN/m and live load of 12 kN/m over the 3 spans of effective length 6 m which are simply supported at the end. Use M 20 concrete and Fe 415 steel. **10**
- Q.7** Determine reinforcement required for a beam size 300 mm × 600 mm subjected to factored bending moment of 80 kNm, factored shear force 70 kN and factored torsional moment of 40 kNm. Use M20 concrete and Fe500 steel. **09**

- Q.8** A short column $400 \text{ mm} \times 400 \text{ mm}$ is provided with 3-16 mm diameter. The length of column is 2.25 m. It is effectively held in position at both the ends & restrained against rotation at other end. Find ultimate load of the column. Use M20 & Fe 415. **09**
- Q.9** Design a circular column subjected to a working load of 1600 kN. The unsupported length of column is 3.5 m which is effectively held in position at both ends but not restrained against rotation. Use M25 concrete and Fe 415 steel. **09**

T.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
CIVIL ENGINEERING

Design of Concrete Structures - I (BTN01505)

Day & Date: Friday, 17-05-2024
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:**
- 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No. 3 (starting page of the Answer Book).
 - 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 - 3) Figures to the right indicates full marks.
 - 4) Assume suitable data wherever needed and mention it clearly.
 - 5) While solving MCQ, IS 456-2000 is not allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

- Q.1 Choose the correct alternatives from the given options. 14**
- 1) An R.C.C. beam without shear reinforcement may develop cracks in its bottom inclined roughly to the horizontal at _____. 01
 - a) 25 degree
 - b) 35 degree
 - c) 45 degree
 - d) 55 degree
 - 2) The effective cover of beam depends on _____. 01
 - a) Diameter of main reinforcement
 - b) Grade of reinforcing steel
 - c) Width of beam
 - d) All of these
 - 3) In a simply supported slab, alternate bars are curtailed at _____. 01
 - a) $1/4^{\text{th}}$ of the span
 - b) $1/5^{\text{th}}$ of the span
 - c) $1/6^{\text{th}}$ of the span
 - d) $1/7^{\text{th}}$ of the span
 - 4) A short column of size 250mm×350mm is provided with longitudinal reinforcement of diameter 20mm and the diameter of tie is 8mm. According to IS 456:2000, the maximum spacing between two ties is _____. 01
 - a) 200 mm
 - b) 350 mm
 - c) 300 mm
 - d) 250 mm
 - 5) The length of torsion reinforcement in two way slab is provided as _____. 01
 - a) Shorter span/4
 - b) Shorter span/5
 - c) Shorter span/8
 - d) Shorter span/10
 - 6) An RCC beam of 200mm×300mm effective is subjected to factored shear force 30 kN. The maximum nominal shear stress is _____. 01
 - a) 0.5 N/mm²
 - b) 0.6 N/mm²
 - c) 0.7 N/mm²
 - d) 0.8 N/mm²
 - 7) As per IS 456, the reinforcement in column should not be less than _____. 01
 - a) 0.5% and not more than 5% of cross-sectional area
 - b) 0.6% and not more than 6% of cross-sectional area
 - c) 0.7% and not more than 7% of cross-sectional area
 - d) 0.8% and not more than 8% of cross-sectional area

- 8) A part of the slab may be considered as the flange of the T beam if _____. **01**
- a) Flange has adequate reinforcement transverse to beam
 - b) It is built integrally with the beam
 - c) It is effectively bonded together with the beam
 - d) All the above
- 9) A concrete column is reinforced with 4 bars of 20mm diameter. Determine the design axial load carrying capacity of a column of size 400mm × 400mm. Consider M20 grade concrete, Fe415 grade and column is perfectly axially loaded. **02**
- a) 2420 kN
 - b) 2020 kN
 - c) 1610 kN
 - d) 1210 kN
- 10) A rectangular section 300mm×700mm overall dimension. 30mm effective cover to compression and tension steel, is reinforced with 2 bars of 20mm and 4 bars of 20mm diameter respectively. Grade Fe415 and M25. Then the depth of neutral axis will be _____. **02**
- a) 105 mm
 - b) 83 mm
 - c) 74 mm
 - d) 93 mm
- 11) A flanged beam is having the following dimension: width of flange, $b_f = 1000\text{mm}$ depth of flange, $D_f = 125\text{mm}$, width of web, $b_w = 250\text{ mm}$ and overall depth of beam, $D = 250\text{ mm}$. The concrete grade is M20 and the grade of reinforcing steel is Fe415. The clear cover is 25 mm. The moment of resistance the section is _____. **02**
- a) 95.891 kNm
 - b) 127.854 kNm
 - c) 159.818 kNm
 - d) 191.781 kNm

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options.

14

- 1) What is the quantity of wastewater required if water supply is 200 lpcd?
 - a) 160 lpcd
 - b) 140 lpcd
 - c) 135 lpcd
 - d) 150 lpcd
- 2) Which of the following is correct sequence?
 - a) Screening > Distribution > Aeration > Landfill
 - b) Screening > Sedimentation > Aeration > Landfill
 - c) Sedimentation > Aeration > Screening > Landfill
 - d) Aeration > Sedimentation > Landfill > Distribution
- 3) Which of the following are not the sources of wastewater?
 - a) Chimney
 - b) Kitchen
 - c) Bathroom
 - d) All of the above
- 4) In composting method by trenching, trenches of _____ m length are excavated.
 - a) 4 – 10
 - b) 7 – 12
 - c) 10 – 20
 - d) Above 20
- 5) Controlled tipping method of disposal of refuse requires an area of _____ m²/c/yr.
 - a) 0.1 – 0.3
 - b) 0.3 – 0.5
 - c) 0.5 – 1.0
 - d) 1.0 – 1.2
- 6) Which type of pollutant does Ozone belong to?
 - a) Primary
 - b) Secondary
 - c) Natural
 - d) None of the above
- 7) The coning plume from the stacks is observed in _____ type of atmosphere.
 - a) Stable
 - b) Unstable
 - c) Inversion
 - d) Neutral
- 8) Quantity of wastewater flowing through sewers in dry season is known as _____.
 - a) WWF
 - b) DWF
 - c) Storm water flow
 - d) Sullage

Seat No.

Day & Date: Saturday, 18-05-2024
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

- Instructions:** 1) Question no. 2 is compulsory in section - I, and solve any two questions from the remaining.
 2) Question no. 6 is compulsory in section - II, and solve any two questions from the remaining.
 2) Figures to right indicate full marks.
 3) Assume suitable data wherever necessary and mention it clearly.
 4) Use of non-programmable calculator is allowed.

Section – I

- Q.2** a) Draw complete and neat sketch of Activated Sludge treatment plant and discuss each part. **07**
 b) Define the following with equations: **03**
 i) Mean Cell Residence Time
 ii) F/M ratio
- Q.3** a) Design a completely mixed ASP for following data: **06**
 i) Wastewater flow = 20 MLd
 ii) Influent BOD = 200 mg/Lit
 iii) Effluent BOD = 25 mg/Lit
 iv) MLSS = 2000 mg/Lit
 v) F/M = 0.2
 vi) SVI = 80 ml/gm
 vii) Sludge age = 10 days
 Assume any missing data appropriately.
 b) What is Chemical Oxygen Demand? Differentiate between Chemical Oxygen Demand and Biochemical Oxygen Demand. **03**
- Q.4** a) Explain Trickling filter with the help of a diagram. **06**
 b) Differentiate between Vermicomposting and Indore Method of composting. **03**
- Q.5** a) Determine Ultimate BOD & BOD₃. If the BOD₅ is 200 mg/lit at 20°C, assuming the deoxygenation constant as 0.25/day. **06**
 b) Explain Moving Bed Biofilm Reactor with a neat diagram. **03**

Section – II

- Q.6** a) Discuss the oxygen sag analysis with the help of a diagram. **04**
 b) A stream, saturated with DO has flow of 1.3 m³/s, BOD of 4 mg/L and rate constant of 0.25 per day. It receives an effluent discharge of 0.35 m³/s. Having BOD 20 mg/L, DO 5 mg/L and rate constant 0.13 per day. The average velocity of flow of the stream is 0.15 m/s. Calculate the DO deficit at point 20 km & 40 km downstream. Assume that the temperature is 20°C throughout and BOD is measured at 5 days. Take saturation DO at 20°C as 9.17 mg/L. **06**

- Q.7** a) With the help of a diagram, explain cyclone Precipitator. **05**
b) Discuss the sources of Air pollution with the help of a diagram. **04**
- Q.8** a) Illustrate the functioning of Indore method of composting with the help of a diagram. **05**
b) Explain the conveyance system of solid waste. **04**
- Q.9** **Discuss the following:** **09**
a) Electrostatic Precipitator
b) Sludge drying Bed
c) MBBR

- 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No. 3 (starting page of the Answer Book). Each question carry one mark.
 - 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 - 3) Figures to the right indicates full marks.
 - 4) Assume suitable data wherever necessary and state it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options. 14

- 1) Quantity of wastewater flowing through sewers in dry season is known as _____.
 - a) WWF
 - b) DWF
 - c) Storm water flow
 - d) Sullage
- 2) _____ sewer collects sewage directly from houses.
 - a) Trunk
 - b) Lateral
 - c) Sub main
 - d) House
- 3) Pick out the odd one from the following.
 - a) Sutro weir
 - b) Parshall flume
 - c) Proportional flow weir
 - d) V - notch
- 4) RBC and Trickling filters are examples of _____ process.
 - a) Suspended growth process
 - b) Anaerobic process
 - c) Attached growth process
 - d) All of the above
- 5) Maximum population that can be served by using septic tank is _____.
 - a) 100
 - b) 200
 - c) 250
 - d) 300
- 6) Organic loading adopted for low-rate trickling filter is _____ g/d/m³.
 - a) 80 to 320
 - b) 800 to 3200
 - c) 500 to 1000
 - d) 5000 to 10000
- 7) _____ is ultimate disposal option considered in Municipal Solid (MSW) waste management.
 - a) Landfill
 - b) Incineration
 - c) Composting
 - d) Open burning
- 8) What is the quantity of wastewater required if water supply is 200 lpcd?
 - a) 160 lpcd
 - b) 140 lpcd
 - c) 135 lpcd
 - d) 150 lpcd
- 9) Which of the following is correct sequence?
 - a) Screening > Distribution > Aeration > Landfill
 - b) Screening > Sedimentation > Aeration > Landfill
 - c) Sedimentation > Aeration > Screening > Landfill
 - d) Aeration > Sedimentation > Landfill > Distribution

T. Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
CIVIL ENGINEERING
Environmental Engineering – II (BTN01506)

Day & Date: Saturday, 18-05-2024
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No. 3 (starting page of the Answer Book). Each question carry one mark.
 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 3) Figures to the right indicates full marks.
 4) Assume suitable data wherever necessary and state it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options.

14

- 1) RBC and Trickling filters are examples of _____ process.
 - a) Suspended growth process
 - b) Anaerobic process
 - c) Attached growth process
 - d) All of the above
- 2) Maximum population that can be served by using septic tank is _____.
 - a) 100
 - b) 200
 - c) 250
 - d) 300
- 3) Organic loading adopted for low-rate trickling filter is _____ g/d/m³.
 - a) 80 to 320
 - b) 800 to 3200
 - c) 500 to 1000
 - d) 5000 to 10000
- 4) _____ is ultimate disposal option considered in Municipal Solid (MSW) waste management.
 - a) Landfill
 - b) Incineration
 - c) Composting
 - d) Open burning
- 5) What is the quantity of wastewater required if water supply is 200 lpcd?
 - a) 160 lpcd
 - b) 140 lpcd
 - c) 135 lpcd
 - d) 150 lpcd
- 6) Which of the following is correct sequence?
 - a) Screening > Distribution > Aeration > Landfill
 - b) Screening > Sedimentation > Aeration > Landfill
 - c) Sedimentation > Aeration > Screening > Landfill
 - d) Aeration > Sedimentation > Landfill > Distribution
- 7) Which of the following are not the sources of wastewater?
 - a) Chimney
 - b) Kitchen
 - c) Bathroom
 - d) All of the above
- 8) In composting method by trenching, trenches of _____ m length are excavated.
 - a) 4 – 10
 - b) 7 – 12
 - c) 10 – 20
 - d) Above 20

Seat No.

T. Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
CIVIL ENGINEERING
Environmental Engineering – II (BTN01506)

Day & Date: Saturday, 18-05-2024
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

- Instructions:** 1) Question no. 2 is compulsory in section - I, and solve any two questions from the remaining.
 2) Question no. 6 is compulsory in section - II, and solve any two questions from the remaining.
 2) Figures to right indicate full marks.
 3) Assume suitable data wherever necessary and mention it clearly.
 4) Use of non-programmable calculator is allowed.

Section – I

- Q.2** a) Draw complete and neat sketch of Activated Sludge treatment plant and discuss each part. **07**
- b) Define the following with equations: **03**
- i) Mean Cell Residence Time
 ii) F/M ratio
- Q.3** a) Design a completely mixed ASP for following data: **06**
- i) Wastewater flow = 20 MLd
 ii) Influent BOD = 200 mg/Lit
 iii) Effluent BOD = 25 mg/Lit
 iv) MLSS = 2000 mg/Lit
 v) F/M = 0.2
 vi) SVI = 80 ml/gm
 vii) Sludge age = 10 days
 Assume any missing data appropriately.
- b) What is Chemical Oxygen Demand? Differentiate between Chemical Oxygen Demand and Biochemical Oxygen Demand. **03**
- Q.4** a) Explain Trickling filter with the help of a diagram. **06**
- b) Differentiate between Vermicomposting and Indore Method of composting. **03**
- Q.5** a) Determine Ultimate BOD & BOD₃. If the BOD₅ is 200 mg/lit at 20°C, assuming the deoxygenation constant as 0.25/day. **06**
- b) Explain Moving Bed Biofilm Reactor with a neat diagram. **03**

Section – II

- Q.6** a) Discuss the oxygen sag analysis with the help of a diagram. **04**
- b) A stream, saturated with DO has flow of 1.3 m³/s, BOD of 4 mg/L and rate constant of 0.25 per day. It receives an effluent discharge of 0.35 m³/s. Having BOD 20 mg/L, DO 5 mg/L and rate constant 0.13 per day. The average velocity of flow of the stream is 0.15 m/s. Calculate the DO deficit at point 20 km & 40 km downstream. Assume that the temperature is 20°C throughout and BOD is measured at 5 days. Take saturation DO at 20°C as 9.17 mg/L. **06**

- | | | |
|------------|-------------------------------------------------------------------------------------------------|-----------|
| Q.7 | a) With the help of a diagram, explain cyclone Precipitator. | 05 |
| | b) Discuss the sources of Air pollution with the help of a diagram. | 04 |
| Q.8 | a) Illustrate the functioning of Indore method of composting with the help of a diagram. | 05 |
| | b) Explain the conveyance system of solid waste. | 04 |
| Q.9 | Discuss the following: | 09 |
| | a) Electrostatic Precipitator | |
| | b) Sludge drying Bed | |
| | c) MBBR | |

T. Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
CIVIL ENGINEERING
Environmental Engineering – II (BTN01506)

Day & Date: Saturday, 18-05-2024
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No. 3 (starting page of the Answer Book). Each question carry one mark.
 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 3) Figures to the right indicates full marks.
 4) Assume suitable data wherever necessary and state it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options.

14

- 1) Which type of pollutant does Ozone belong to?
 - a) Primary
 - b) Secondary
 - c) Natural
 - d) None of the above
- 2) The coning plume from the stacks is observed in _____ type of atmosphere.
 - a) Stable
 - b) Unstable
 - c) Inversion
 - d) Neutral
- 3) Quantity of wastewater flowing through sewers in dry season is known as _____.
 - a) WWF
 - b) DWF
 - c) Storm water flow
 - d) Sullage
- 4) _____ sewer collects sewage directly from houses.
 - a) Trunk
 - b) Lateral
 - c) Sub main
 - d) House
- 5) Pick out the odd one from the following.
 - a) Sutro weir
 - b) Parshall flume
 - c) Proportional flow weir
 - d) V - notch
- 6) RBC and Trickling filters are examples of _____ process.
 - a) Suspended growth process
 - b) Anaerobic process
 - c) Attached growth process
 - d) All of the above
- 7) Maximum population that can be served by using septic tank is _____.
 - a) 100
 - b) 200
 - c) 250
 - d) 300
- 8) Organic loading adopted for low-rate trickling filter is _____ g/d/m³.
 - a) 80 to 320
 - b) 800 to 3200
 - c) 500 to 1000
 - d) 5000 to 10000
- 9) _____ is ultimate disposal option considered in Municipal Solid (MSW) waste management.
 - a) Landfill
 - b) Incineration
 - c) Composting
 - d) Open burning

Planning and Design of Rural Roads (BTN01515)

Day & Date: Sunday, 19-05-2024
Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:**
- 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.
 - 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 - 3) Figures to the right indicates full marks.
 - 4) Assume suitable data wherever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) Identify the correct order of alignment survey in which they conduct in the field.
 - a) Final location and detailed survey, Preliminary survey, Reconnaissance, and map study
 - b) Map study, Final location and detailed survey, Preliminary survey, and Reconnaissance
 - c) Map study, Reconnaissance, Preliminary survey, Final location and detailed survey
 - d) Preliminary survey, Map study, Reconnaissance, Final location and detailed survey
- 2) Pradhan Mantri Gram Sadak Yojna (PMGSY), launched in the year 2000, aims to provide rural connectivity with _____.
 - a) Fair-weather roads
 - b) All-weather roads
 - c) State Highway
 - d) Major District Road
- 3) Rural roads in India are commonly classified as _____.
 - a) Other District roads and Village Roads
 - b) National Highways and State Highways
 - c) Major District Roads and Other District Roads
 - d) Other District Roads and
- 4) The ruling design speed considered for the geometric design of rural roads at plain terrain is _____.
 - a) 60kmph
 - b) 50kmph
 - c) 40kmph
 - d) 30kmph
- 5) The carriageway width of a single in rural road is considered as _____.
 - a) 5.5m
 - b) 7.5m
 - c) 3.75m
 - d) 10.0m
- 6) The camber value suggested at high rainfall areas where this bituminous pavement is provided _____.
 - a) 5.0%
 - b) 4.0%
 - c) 3.5%
 - d) 2.5%

CIVIL ENGINEERING

Planning and Design of Rural Roads (BTN01515)

Day & Date: Sunday, 19-05-2024
Time: 10:00 AM To 01:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever needed and mention it clearly.

Section – I

Q.2 Answer any two questions. 14

- a) Explain with sketches the various factors controlling the alignment of the road.
- b) What are the objectives of a preliminary survey for highway alignment? Enumerate the details to be collected.
- c) Calculate the safe stopping sight distance on a level road stretch for a design speed of kmph for
 - 1) two-way traffic on a two-lane road, and
 - 2) two-way traffic on a single-lane road
 Assume the coefficient of friction is 0.37 and the reaction time of the driver is 2.5sec.
- d) Design the rate of superelevation for a horizontal highway curve of radius 500m and design speed of 100kmph.

Q.3 Answer any two questions. 14

- a) Draw a neat cross-section of flexible pavement and explain the functions of each layer.
- b) A pavement is to be designed for a subgrade CBR of 4 percent, with initial traffic of 70 motorized vehicles per day (except 2-wheelers) in both directions of which commercial vehicle is 30 CVPD, with a growth rate of 6 percent per annum for a location having annual rainfall of 1200 mm. The design life is 10 years. Determine the pavement thickness. Refer to Fig-1 for Pavement thickness.
- c) Draw a neat cross-section of rigid pavement and explain the functions of each layer.
- d) Write a short note on Concrete Block Pavement and interlocking concrete block pavement.

Section – II

Q.4 Answer any two questions. 14

- a) What are the requirements of a good highway drainage system?
- b) Explain with the sketches how the subsurface drainage system is provided to lower the water table, seepage flow, and capillary rise.
- c) Write an explanatory note on cross drainage and drainage structures.
- d) Write a brief note on specifications and construction procedures of soil subgrade.

Q.5 Answer any two questions.

- Write a step-by-step construction procedure for the Water Bound Macadam layer in rural areas.
- Discuss the principle and scope of soil-lime stabilization.
- Explain the construction procedure of the soil-lime base course.
- Write a short note on different types of distress in the flexible pavement with causes.

Fig-1-Pavement Thickness Chart

- 8) Identify the correct order of alignment survey in which they conduct in the field.
- Final location and detailed survey, Preliminary survey, Reconnaissance, and map study
 - Map study, Final location and detailed survey, Preliminary survey, and Reconnaissance
 - Map study, Reconnaissance, Preliminary survey, Final location and detailed survey
 - Preliminary survey, Map study, Reconnaissance, Final location and detailed survey
- 9) Pradhan Mantri Gram Sadak Yojna (PMGSY), launched in the year 2000, aims to provide rural connectivity with _____.
- Fair-weather roads
 - All-weather roads
 - State Highway
 - Major District Road
- 10) Rural roads in India are commonly classified as _____.
- Other District roads and Village Roads
 - National Highways and State Highways
 - Major District Roads and Other District Roads
 - Other District Roads and
- 11) The ruling design speed considered for the geometric design of rural roads at plain terrain is _____.
- 60kmph
 - 50kmph
 - 40kmph
 - 30kmph
- 12) The carriageway width of a single in rural road is considered as _____.
- 5.5m
 - 7.5m
 - 3.75m
 - 10.0m
- 13) The camber value suggested at high rainfall areas where this bituminous pavement is provided _____.
- 5.0%
 - 4.0%
 - 3.5%
 - 2.5%
- 14) Clear distance ahead needed by a driver to bring his vehicle to a stop before collision with a stationary object in his path, _____.
- Superelevation
 - Camber
 - Stopping Sight Distance
 - Setback Distance

Seat No.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) What is the full form of GSB?

a) Granular Surface Base	b) Granular Slope Base
c) Granular Sub Base	d) Granular Stone Ballast
- 2) Lime stabilization is recommended for soils having _____.

a) $PI > 8$	b) $PI < 8$
c) $PI < 10$	d) $PI < 50$
- 3) IRC Code used for design of rigid pavement is _____.

a) IRC-37	b) IRC-58
c) IRC-80	d) IRC-81
- 4) The thickness of the rural roads is designed for traffic up to, _____.

a) 250CVPD	b) 350CVPD
c) 450CVPD	d) 650CVPD
- 5) Identify the correct order of alignment survey in which they conduct in the field.
 - a) Final location and detailed survey, Preliminary survey, Reconnaissance, and map study
 - b) Map study, Final location and detailed survey, Preliminary survey, and Reconnaissance
 - c) Map study, Reconnaissance, Preliminary survey, Final location and detailed survey
 - d) Preliminary survey, Map study, Reconnaissance, Final location and detailed survey
- 6) Pradhan Mantri Gram Sadak Yojna (PMGSY), launched in the year 2000, aims to provide rural connectivity with _____.

a) Fair-weather roads	b) All-weather roads
c) State Highway	d) Major District Road

a) 5.5m
b) 7.5m
c) 3.75m
d) 10.0m
- 10) The camber value suggested at high rainfall areas where this bituminous pavement is provided _____.
a) 5.0%
b) 4.0%
c) 3.5%
d) 2.5%
- 11) Clear distance ahead needed by a driver to bring his vehicle to a stop before collision with a stationary object in his path, _____.
a) Superelevation
b) Camber
c) Stopping Sight Distance
d) Setback Distance
- 12) Maximum percentage of superelevation specified in plain and rolling terrain is, _____.
a) 4.0%
b) 5.0%
c) 6.0%
d) 7.0%
- 13) The specified particle size of sand is from _____.
a) 80mm to 4.75mm
b) 4.75mm to 0.075mm
c) 0.075mm to 0.002mm
d) Less than 0.002mm
- 14) The maximum laboratory density required for subgrade and earthen shoulders is, _____.
a) 1.44gm/cc
b) 1.52gm/cc
c) 1.65gm/cc

**T. Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
CIVIL ENGINEERING**

Planning and Design of Rural Roads (BTN01515)

Day & Date: Sunday, 19-05-2024
Time: 10:00 AM To 01:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever needed and mention it clearly.

Section – I

Q.2 Answer any two questions.

14

- a) Explain with sketches the various factors controlling the alignment of the road.
- b) What are the objectives of a preliminary survey for highway alignment? Enumerate the details to be collected.
- c) Calculate the safe stopping sight distance on a level road stretch for a design speed of kmph for
 - 1) two-way traffic on a two-lane road, and
 - 2) two-way traffic on a single-lane road
 Assume the coefficient of friction is 0.37 and the reaction time of the driver is 2.5sec.
- d) Design the rate of superelevation for a horizontal highway curve of radius 500m and design speed of 100kmph.

Q.3 Answer any two questions.

14

- a) Draw a neat cross-section of flexible pavement and explain the functions of each layer.
- b) A pavement is to be designed for a subgrade CBR of 4 percent, with initial traffic of 70 motorized vehicles per day (except 2-wheelers) in both directions of which commercial vehicle is 30 CVPD, with a growth rate of 6 percent per annum for a location having annual rainfall of 1200 mm. The design life is 10 years. Determine the pavement thickness. Refer to Fig-1 for Pavement thickness.
- c) Draw a neat cross-section of rigid pavement and explain the functions of each layer.
- d) Write a short note on Concrete Block Pavement and interlocking concrete block pavement.

Section – II

Q.4 Answer any two questions.

14

- a) What are the requirements of a good highway drainage system?
- b) Explain with the sketches how the subsurface drainage system is provided to lower the water table, seepage flow, and capillary rise.
- c) Write an explanatory note on cross drainage and drainage structures.
- d) Write a brief note on specifications and construction procedures of soil subgrade.

Q.5 Answer any two questions.

- Write a step-by-step construction procedure for the Water Bound Macadam layer in rural areas.
- Discuss the principle and scope of soil-lime stabilization.
- Explain the construction procedure of the soil-lime base course.
- Write a short note on different types of distress in the flexible pavement with causes.

Construction Materials: Sustainability and Usability (BTN01516)

Day & Date: Sunday, 19-05-2024
Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:**
- 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No.3 (starting page of the Answer Book). Each question carry one mark.
 - 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 - 3) Figures to the right indicates full marks.
 - 4) Assume suitable data wherever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options. 14

- 1) In India, _____ is the Green Building rating system which help costumer to determine a structure's level of environmental performance.

a) LEED	b) Nabers
c) GRIHA	d) BREEAM
- 2) Centralized wastewater treatment plant (WWTP) can be converted to green infrastructure by _____.

a) Reusing sludge as fertilizer
b) Reusing treated waste water in curing of roads
c) Providing imported solar panels in the WWTP
d) Construction of WTP using flyash bricks
- 3) Which of the following is green product?

a) Wooden table	b) Plastic bottle
c) Volatile paints	d) All of the Above
- 4) Resource efficiency can be achieved by utilizing materials to _____.

a) Recycled content	b) Reusable content
c) Reusable packaging	d) None of the above
- 5) _____ Weight is applied for compressing in the process of preparing CSEB?

a) > 15 Tonnes	b) < 15 Tonnes
c) > 12 Tonnes	d) < 12 Tonnes
- 6) Binders used in CSEB are _____.

a) Cement and/or lime	b) Cement and sand
c) Lime and sand	d) Lime and silt
- 7) The cradle to grave embodied energy life cycle does not include _____ required to utilize the final product.

a) Initial embodied energy	b) Operational energy
c) Demolition energy	d) All of the above
- 8) In general _____ holds highest energy in the life cycle analysis of any product.

a) Building operations	b) Transportation
c) Demolition	d) None of the above

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options. 14

- 1) In general _____ holds highest energy in the life cycle analysis of any product.
 - a) Building operations
 - b) Transportation
 - c) Demolition
 - d) None of the above
- 2) Glass is _____ recyclable.
 - a) 100%
 - b) 75%
 - c) 50%
 - d) 25%
- 3) Flyash bricks are composed of _____ flyash.
 - a) 5% - 10%
 - b) 6% - 10%
 - c) 7% - 10%
 - d) 8% - 10%
- 4) Polyester is the example of _____.
 - a) Thermoplastics
 - b) Thermoset plastics
 - c) Thermal plastics
 - d) None of the above
- 5) Macro plastics are having size _____.
 - a) < 5 mm
 - b) > 5 mm
 - c) > 15 mm
 - d) > 20 mm
- 6) Reducing Disposable Coffee cup waste would be _____ to the economy.
 - a) Good
 - b) Bad
 - c) No effect
 - d) None of the above
- 7) In carbon ratings, cost of car is _____ proportional to carbon emissions.
 - a) directly
 - b) inversely
 - c) equally
 - d) none of the above
- 8) In India, _____ is the Green Building rating system which help costumer to determine a structure's level of environmental performance.
 - a) LEED
 - b) Nabers
 - c) GRIHA
 - d) BREEAM

- 9) Centralized wastewater treatment plant (WWTP) can be converted to green infrastructure by _____.
- a) Reusing sludge as fertilizer
 - b) Reusing treated waste water in curing of roads
 - c) Providing imported solar panels in the WWTP
 - d) Construction of WTP using flyash bricks

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options. 14

- 1) What are the reasons for resistance to change?
 - a) Fear of failure
 - b) Inertia
 - c) lack of confidence
 - d) All of the above
- 2) Which among the following is an important school of creative thinking?
 - a) Design Thinking
 - b) Behavior Thinking
 - c) Linear Thinking
 - d) Profit Thinking
- 3) Elkington introduced the sustainability concept as a "triple bottom line." What are the three important dimensions (3P's) of sustainability?
 - a) People, Planet, and Profit
 - b) People, Profit, and Product
 - c) Process, People, and Product
 - d) Profit, People, and Process
- 4) Who is not involved in the selection of ideas in idea management?
 - a) Internal experts
 - b) External experts
 - c) A mix of Internal and External Experts
 - d) Basic raw material supplier
- 5) Which one of the following is not a type of innovation according to industry system?
 - a) Product innovation
 - b) Process innovation
 - c) Personnel Innovation
 - d) Business Model innovation
- 6) Innovation is defined as: _____.
 - a) The commercialization of a new product or process
 - b) A new product or process idea
 - c) The implementation of a new production method
 - d) The invention of a new product or process
- 7) Who is an idea Champion?
 - a) The one who defeats elephant of ideas
 - b) The rider who shapes the path for elephant
 - c) The one who opens new channels for idea to move forward
 - d) All the above

- 8) An entrepreneur is someone who _____.
- a) Organizes a business
 - b) Manages a business
 - c) Takes risks
 - d) All of the above
- 9) What are the elements in the four action framework of Blue Ocean Strategy?
- a) Eliminate, Reduce, Reuse and Recycle
 - b) Eliminate, Reduce, Raise and Create
 - c) Eliminate, Recreate, Recycle and Reuse
 - d) Reduce, Reuse, Recycle and Recreate
- 10) What are the essential conditions for getting a patent for an invention?
- a) Novelty
 - b) Commercial application
 - c) Non obviousness
 - d) All the above
- 11) What are the benefits of innovations resulting from economic initiatives?
- a) Reduced expenses
 - b) Productivity gains through modernization of production tools
 - c) Ability to meet growing demand for eco-responsible and personalized products
 - d) All of the above
- 12) What is the main objective of granting a patent?
- a) To encourage and develop new technology and Industry.
 - b) To create monopoly.
 - c) To make the patent commercial.
 - d) All the above
- 13) Which of the following statement is true:
- a) Patent is valid within geographical boundary.
 - b) Patent last for 15 years
 - c) The person who pays for the invention owns the patent.
 - d) None of the above
- 14) What are the benefits of innovations resulting from economic initiatives?
- a) Reduced expenses
 - b) Productivity gains through modernization of production tools
 - c) Ability to meet growing demand for eco-responsible and personalized products

**T.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
CIVIL ENGINEERING**

Managing Innovation and Entrepreneurship (BTN01517)

Day & Date: Sunday, 19-05-2024

Max. Marks: 70

Time: 10:00 AM To 01:00 PM

- Instructions:**
- 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No.3 (starting page of the Answer Book). Each question carry one mark.
 - 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 - 3) Figures to the right indicates full marks.
 - 4) Assume suitable data wherever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options.

14

- 1) An entrepreneur is someone who _____.
 - a) Organizes a business
 - b) Manages a business
 - c) Takes risks
 - d) All of the above
- 2) What are the elements in the four action framework of Blue Ocean Strategy?
 - a) Eliminate, Reduce, Reuse and Recycle
 - b) Eliminate, Reduce, Raise and Create
 - c) Eliminate, Recreate, Recycle and Reuse
 - d) Reduce, Reuse, Recycle and Recreate
- 3) What are the essential conditions for getting a patent for an invention?
 - a) Novelty
 - b) Commercial application
 - c) Non obviousness
 - d) All the above
- 4) What are the benefits of innovations resulting from economic initiatives?
 - a) Reduced expenses
 - b) Productivity gains through modernization of production tools
 - c) Ability to meet growing demand for eco-responsible and personalized products
 - d) All of the above
- 5) What is the main objective of granting a patent?
 - a) To encourage and develop new technology and Industry.
 - b) To create monopoly.
 - c) To make the patent commercial.
 - d) All the above
- 6) Which of the following statement is true:
 - a) Patent is valid within geographical boundary.
 - b) Patent last for 15 years
 - c) The person who pays for the invention owns the patent.
 - d) None of the above

- 7) What are the benefits of innovations resulting from economic initiatives?
- a) Reduced expenses
 - b) Productivity gains through modernization of production tools
 - c) Ability to meet growing demand for eco-responsible and personalized products
 - d) All of the above
- 8) What are the reasons for resistance to change?
- a) Fear of failure
 - b) Inertia
 - c) lack of confidence
 - d) All of the above
- 9) Which among the following is an important school of creative thinking?
- a) Design Thinking
 - b) Behavior Thinking
 - c) Linear Thinking
 - d) Profit Thinking
- 10) Elkington introduced the sustainability concept as a “triple bottom line.” What are the three important dimensions (3P's) of sustainability?
- a) People, Planet, and Profit
 - b) People, Profit, and Product
 - c) Process, People, and Product
 - d) Profit, People, and Process
- 11) Who is not involved in the selection of ideas in idea management?
- a) Internal experts
 - b) External experts
 - c) A mix of Internal and External Experts
 - d) Basic raw material supplier
- 12) Which one of the following is not a type of innovation according to industry system?
- a) Product innovation
 - b) Process innovation
 - c) Personnel Innovation
 - d) Business Model innovation
- 13) Innovation is defined as: _____.
- a) The commercialization of a new product or process
 - b) A new product or process idea
 - c) The implementation of a new production method
 - d) The invention of a new product or process
- 14) Who is an idea Champion?
- a) The one who defeats elephant of ideas
 - b) The rider who shapes the path for elephant
 - c) The one who opens new channels for idea to move forward
 - d) All the above

Stress and Coping (BTN01511)

Day & Date: Monday, 20-05-2024
 Time: 10:00 AM To 12:00 PM

Max. Marks: 50

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.
 4) Assume suitable data wherever needed & mention it clearly.

MCQ/Objective Type Questions

Duration: 20 Minutes

Marks:10

Q.1 Choose amongst the alternatives.

10

- 1) When a task appears overwhelming, it is best to _____.
 - a) Put it aside till later
 - b) Drink alcohol to relax
 - c) Break it down into smaller task
 - d) Avoid the task
- 2) The word Stress is derived from Latin word 'Stringere' which means _____.
 - a) Draw tight
 - b) Stimulus
 - c) Force
 - d) Attitude
- 3) Which of the following statements is true?
 - a) The stress response is nonspecific
 - b) Different kinds of stressors produce exactly the same response
 - c) Different people respond to the same stressor differently
 - d) All of the above
- 4) When is a person more likely to have difficulty in coping with a stressful situation?
 - a) When he is over the age of fifty
 - b) When he expects a positive outcome
 - c) When he thinks he does not have control over the situation
 - d) When he has a good social support network
- 5) Aches, shallow breathing and sweating, frequent colds are _____.
 - a) Physical symptoms of stress
 - b) Behavioral symptoms of stress
 - c) Emotional symptoms of stress
 - d) Cognitive symptoms of stress
- 6) Anxiety can cause the following moods _____.
 - a) Irritable
 - b) Nervous
 - c) Anxious
 - d) All of the above
- 7) Which of the following are the physical symptoms of anxiety?
 - a) Racing heart
 - b) Sweaty palms
 - c) Flushed cheeks
 - d) All of the above

- 8)** Which of the following is true about 'deep breathing relaxation technique'?
- a) It can be self-taught
 - b) It releases tension from the body and clears your mind
 - c) You have to do this under-water
 - d) Only '1' & '2' are true
- 9)** Which of the following are stress busters?
- a) Trying to find something funny in a difficult situation
 - b) Developing a support network
 - c) Taking a mindful walk
 - d) All of the above
- 10)** Which one is not considered as Environmental stressors?
- a) Weather
 - b) Traffic
 - c) Financial problems
 - d) Substandard housing

Q.1 Choose the correct alternatives from the given options.

14

- 1) RQD is the ratio of _____.
 - a) Sum of lengths of rock core pieces greater than 15 cm to the total length of core run
 - b) Sum of lengths of rock core pieces greater than 10 cm to the total length of core run
 - c) Sum of lengths of rock core pieces to the total length of core run
 - d) Sum of lengths of unbroken rock core pieces to the total length of core run
- 2) One of the purposes of Soil exploration is _____.
 - a) To understand the behavior of the structure
 - b) To estimate the load coming on the soil
 - c) To find the quantity and quality of water
 - d) To determine basic properties of soil
- 3) Which one of the following is not the assumption made in Terzaghi's bearing capacity analysis?
 - a) The strip footing has rough base
 - b) Failure zone do not extend above the horizontal plane through the base of the footing
 - c) Plastic zone is not fully developed
 - d) The elastic zone has straight boundaries
- 4) According to IS: 1904 - 1966, maximum safe bearing capacity for coarse sand, medium sand and fine sand are respectively (in kg/cm²) _____.

a) 4.5, 2.5, 1.5	b) 33, 16.5, 9
c) 16.5, 9.0, 4.5	d) None of these
- 5) Which one of the following is the correct Terzaghi general bearing capacity equation?

a) $q_u = C N_c + \gamma D N_q + 0.5 B \gamma N \gamma$	b) $q_u = C N_c - \gamma D N_q + 0.5 B \gamma N \gamma$
c) $q_u = C N_c + 0.5 \gamma D N_q + B \gamma N \gamma$	d) None of above

- 6) In case of sandy soil, which settlement is predominant?
a) Immediate settlement
b) Consolidation settlement
c) Secondary consolidation settlement
d) None
- 7) The bearing capacity of the soil supporting a footing of size 2m x 2m, is not affected by the water table if the water table is located beyond the depth of _____.
a) 0.5 m
b) 1 m
c) 1.5 m
d) 2 m
- 8) Efficiency of a pile group consisting of four piles by using Felds rule is _____.
a) 93.75
b) 81.25
c) 87.5
d) none
- 9) These types of soil deposits are often found near the mouths of rivers, along the perimeters of bays and beneath swamps or lagoons _____.
a) Weak/compressible soil
b) Collapsible soil
c) Expansive soil
d) Corrosive soil
- 10) The negative skin friction on a pile develops when _____.
a) The soil in which it is driven is sandy soil
b) The soil surrounding it settles more than the pile
c) The ground water table rises
d) The soil near the tip is clay
- 11) Pile driven at some inclination with vertical is called _____.
a) Batter pile
b) Raker pile
c) Both a and b
d) Neither a nor b
- 12) In stability analysis, the term mobilized shear strength is referred to as _____.
a) Shear strength
b) Maximum shear stress
c) Applied shear stress
d) None
- 13) A soil sample has external diameter as 8 cm and wall thickness of 2 mm. The area ratio in percentage will be _____.
a) 12.88
b) 18.22
c) 15.97
d) 10.80
- 14) Under reamed pile is most suitable to resist _____.
a) Compressive load
b) Lateral load
c) Uplift
d) None

T. Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2024
CIVIL ENGINEERING
Foundation Engineering (BTN01601)

Day & Date: Tuesday, 21-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) Q.2 is compulsory. Solve any two from remaining questions from section-I
 2) Q.6 is compulsory. Solve any two from remaining questions from section-II
 3) Figures to the right indicate full marks.
 4) Assume additional data if required and mention it clearly.

Section – I

- Q.2** a) With a neat sketch explain bore log chart. **04**
 b) During exploration following pieces of rock cores were collected from a borehole the length cores was as follows 240 mm, 156 mm, 347 mm, 84 mm, 123 mm, 75 mm, 94 mm, 524 mm, what is the RQD for this rock and how is the quality of this rock? **06**
- Q.3** a) Enlist the difference between general shear failure and Local shear failure with suitable sketch. **04**
 b) A circular footing is resting on stiff saturated clay with $c = 125 \text{ kN/m}^2$, depth of foundation is 1.8 m Determine diameter of the footing. Take safe load on footing as 800KN and FOS = 2.5, The bulk unit weight of soil is 20 KN/m^3 , Angle of internal friction = 0, $N_c = 5.7$, $N_q = 1$ and $N_r = 0$. **05**
- Q.4** a) Explain the test procedure for standard penetration test. Also mention the corrections to be done for the observed N. **04**
 b) Immediate settlement of a square footing of dimensions 1.2 m x 1.2 m carrying a load intensity of 220 kN/m^2 is 30 mm. What would be the immediate settlement of a footing measuring 3 m x 3 m carrying a load intensity of 160 kN/m^2 . The subsoil conditions are identical in both the footing. **05**
- Q.5** a) What is expansive soil? What precautions need to be taken while designing foundation in expansive soil? **04**
 b) Enlist the ground improvement techniques. Explain any one in detail with its suitability. **05**

Section – II

- Q.6** a) Write short note on Negative skin friction. **04**
 b) Proportion a trapezoidal combined footing for 2 columns $350 \times 350 \text{ mm}$, carrying column loads of 1000 KN and 1400 KN. If the spacing between the columns is 4 m. Take the allowable soil pressure 280 KN/M^2 and the length of footing on 5 m. **06**

- Q.7** a) Write a short note on classification of piles. **04**
b) Calculate capacity of rectangular pile 0.3 m × 0.4 m of length 12 m embedded in clayey soil having $C = 45$ kPa, $\phi = 0$, $\alpha = 0.64$ (Assume suitable data if required). **05**
- Q.8** a) Explain any 4 types of cofferdams with neat sketches. **04**
b) Write a brief critical note on 'Taylor's Stability Number.' **05**
- Q.9** a) Draw a neat labelled sketch of a slope and enlist causes of failure of slope. **04**
b) What are different types of slopes failure? Explain briefly finite and infinite slopes. **05**

- 8) RQD is the ratio of _____.
- Sum of lengths of rock core pieces greater than 15 cm to the total length of core run
 - Sum of lengths of rock core pieces greater than 10 cm to the total length of core run
 - Sum of lengths of rock core pieces to the total length of core run
 - Sum of lengths of unbroken rock core pieces to the total length of core run
- 9) One of the purposes of Soil exploration is _____.
- To understand the behavior of the structure
 - To estimate the load coming on the soil
 - To find the quantity and quality of water
 - To determine basic properties of soil
- 10) Which one of the following is not the assumption made in Terzaghi's bearing capacity analysis?
- The strip footing has rough base
 - Failure zone do not extend above the horizontal plane through the base of the footing
 - Plastic zone is not fully developed
 - The elastic zone has straight boundaries
- 11) According to IS: 1904 - 1966, maximum safe bearing capacity for coarse sand, medium sand and fine sand are respectively (in kg/cm²) _____.
- 4.5, 2.5, 1.5
 - 33, 16.5, 9
 - 16.5, 9.0, 4.5
 - None of these
- 12) Which one of the following is the correct Terzaghi general bearing capacity equation?
- $q_u = C N_c + \gamma D N_q + 0.5 B \gamma N_\gamma$
 - $q_u = C N_c - \gamma D N_q + 0.5 B \gamma N_\gamma$
 - $q_u = C N_c + 0.5 \gamma D N_q + B \gamma N_\gamma$
 - None of above
- 13) In case of sandy soil, which settlement is predominant?
- Immediate settlement
 - Consolidation settlement
 - Secondary consolidation settlement
 - None
- 14) The bearing capacity of the soil supporting a footing of size 2m x 2m, is not affected by the water table if the water table is located beyond the depth of _____.
- 0.5 m
 - 1 m
 - 1.5 m
 - 2 m

 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.
 4) Assume additional data if required and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the given options.

14

- 1) In case of sandy soil, which settlement is predominant?
 - a) Immediate settlement
 - b) Consolidation settlement
 - c) Secondary consolidation settlement
 - d) None
- 2) The bearing capacity of the soil supporting a footing of size 2m x 2m, is not affected by the water table if the water table is located beyond the depth of _____.

a) 0.5 m	b) 1 m
c) 1.5 m	d) 2 m
- 3) Efficiency of a pile group consisting of four piles by using Felds rule is _____.

a) 93.75	b) 81.25
c) 87.5	d) none
- 4) These types of soil deposits are often found near the mouths of rivers, along the perimeters of bays and beneath swamps or lagoons _____.

a) Weak/compressible soil	b) Collapsible soil
c) Expansive soil	d) Corrosive soil
- 5) The negative skin friction on a pile develops when _____.
 - a) The soil in which it is driven is sandy soil
 - b) The soil surrounding it settles more than the pile
 - c) The ground water table rises
 - d) The soil near the tip is clay
- 6) Pile driven at some inclination with vertical is called _____.

a) Batter pile	b) Raker pile
c) Both a and b	d) Neither a nor b
- 7) In stability analysis, the term mobilized shear strength is referred to as _____.

a) Shear strength	b) Maximum shear stress
c) Applied shear stress	d) None

Hydraulic Structures & Water Power Engg (BTN01602)

Day & Date: Friday, 24-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:**
- 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No.3 (starting page of the Answer Book). Each question carry one mark.
 - 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 - 3) Figures to the right indicates full marks.
 - 4) Assume suitable data wherever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options.

14

- 1) While planning a water supply reservoir, as compared to an irrigation reservoir, the design yield may be kept: _____.
 - a) higher
 - b) lower
 - c) medium
 - d) lower or higher, as per designer's discretion
- 2) The 'dead storage' in a dam reservoir is the available volume for collection of silt and sediment, between: _____.
 - a) bed level of the reservoir and minimum reservoir level
 - b) bed level of the reservoir and the maximum conservation level in the reservoir.
 - c) bed level of the reservoir and the normal reservoir level
 - d) none of the above
- 3) The vertical downward earthquake acceleration, $\alpha_y = 0.1$ g, acting on a gravity dam, will _____.
 - a) increase the resisting weight of the dam by 10%
 - b) decrease the resisting weight of the dam by 10%
 - c) increase the uplift by 10%
 - d) none of the above
- 4) The type of an arch dam, which generally requires 'overhangs at abutments', is of: _____.

a) constant radius type	b) variable radius type
c) constant angle type	d) none of the above
- 5) The only provision among the following, which can help control the seepage through the body of an earthen dam and, thus, to keep the phreatic line well within the dam width, is _____.
 - a) upstream impervious cutoff
 - b) drain trench along the downstream toe
 - c) relief wells
 - d) chimney drain

CIVIL ENGINEERING**

Hydraulic Structures & Water Power Engg (BTN01602)

Day & Date: Friday, 24-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) Question No. 3 is compulsory in section I, and solve any two questions from the remaining.
2) Question No. 9 is compulsory in section II, and solve any two questions from the remaining.
3) Figures to the right indicate full marks.

Section – I

- Q.2** a) What precautions and remedial measures would you undertake to control the 'seepage' through earthen dam body and through the dam foundation? **04**
b) As impounding reservoir had original storage capacity for 738 ha-m. The drainage area of the reservoir is 80 sq.km. from which, annual sediment discharges into the reservoir at the rate 0.1153 ha-m per sq.km, of the drainage area. Assuming the trap efficiency as 80 per cent, find the annual capacity loss of the reservoir in per cent per year. **05**
- Q.3** A profile of a gravity dam is shown in figure with the important levels. If the coefficient of friction between dam and foundations is 0.75, is the dam safe against sliding? Take unit weight of concrete as 24 kN/m^3 . Assume Horizontal Earthquake coefficient as 0.05 g, Vertical Earthquake coefficient as 0.1 g and there is no tail Water. Neglect uplift. Assuming $\gamma_w = 9.81 \text{ kN/m}^3$. **10**

- Q.4** a) What is meant by energy dissipater? Discuss the various methods used for energy dissipation below spillways. **04**
b) For a homogeneous earth dam 52 m high and 2 m free board, a flow net was constructed and following results were obtained. Number of potential drops = 25, Number of flow channels = 4. The dam has horizontal filter of 40 m length at its downstream end. Calculate the seepage discharge per meter length of the dam. Assume coefficient of permeability of the dam material as $3 \times 10^{-3} \text{ cm/sec}$. **05**

- Q.5** a) Classify various types of dams according to construction materials used. **04**
Distinguish clearly between rigid and non-rigid dams.
- b) Compute the discharge (with and without velocity of approach) over an ogee weir with coefficient of discharge equal to 2.4 and head of 2 m. The length of spillway is 100 m. Weir crest is 8 m above the bottom of approach channel having same width as that of spillway. **05**

Section – II

- Q.6** a) Enlist and explain different causes of failures of weirs on permeable foundations. **04**
- b) What is mean by lining a canal? Explain its need. **05**
- Q.7** a) Explain the following cross drainage works with neat sketches. **04**
i) Aqueduct and syphon aqueduct
ii) Level crossing
- b) Explain the terms. **05**
i) River training
ii) Efflorescence
iii) Water logging
Enlist objectives of river training work?
- Q.8** a) What are the typical components of the hydro-electrical scheme? Discuss the utility of each component. **04**
- b) Differentiate between. **05**
i) Bligh's and Khosla's theory
ii) Lining of existing canal and new canal
- Q.9** a) U-7-Theory **04**
Explain different methods of controlling water logging.
- b) A runoff river hydroelectric power station is proposed across a river at a site where a net head of 25 meter is available on the turbine. The river carries a sustained minimum flow of 45 cumec in dry weather. Sufficient poundage is provided to supply daily peak load of demand with a load factor of 72%. Assuming the plant efficiency to be 70%, determine the maximum generating capacity of generator to be installed at the power house. If the daily load pattern indicates 20 hours average load and 4 hours peak load, determine the poundage to be provided to supply the daily demand. **06**

Hydraulic Structures & Water Power Engg (BTN01602)

Day & Date: Friday, 24-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:**
- 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No.3 (starting page of the Answer Book). Each question carry one mark.
 - 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 - 3) Figures to the right indicates full marks.
 - 4) Assume suitable data wherever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options.

14

- 1) Critical exit gradient, as introduced in Khosla's theory of design of weirs and barrages on pervious foundations, is : _____.
 - a) the left out pressure in the seeping water at the downstream end point, where it emerges out on the river bed
 - b) the rate of loss of pressure of the seeping water at the downstream emerging point, which is just enough to lift the soil gains at that point
 - c) the actual pressure gradient of the seepage, at the downstream emerging point
 - d) none of the above
- 2) The gated regulator, which is constructed in the parent canal near the site of an off taking canal, is called a : _____.
 - a) canal head regulator
 - b) distributary head regulator
 - c) cross regulator
 - d) none of the above
- 3) The canal, which may frequently encounter cross-drainage works, will be a : _____.
 - a) watershed canal
 - b) contour canal
 - c) side slope canal
 - d) none of them
- 4) Aggrading rivers are : _____.
 - a) silting rivers
 - b) scouring rivers
 - c) rivers in regime
 - d) meandering rivers
- 5) An alluvial river increases its length by meandering due to : _____.
 - a) variation of discharge
 - b) variation of land topography
 - c) both (a) and (b)
 - d) None of the above
- 6) A run off river plant for hydro power generation is essentially a : _____.
 - a) high head scheme
 - b) low head scheme
 - c) medium head scheme
 - d) any of these
- 7) A storage hydro plant essentially involves : _____.
 - a) a barrage or a weir
 - b) a dam
 - c) either (a) or (b)
 - d) neither (a) nor (b)

- 8) While planning a water supply reservoir, as compared to an irrigation reservoir, the design yield may be kept: _____.
- higher
 - lower
 - medium
 - lower or higher, as per designer's discretion
- 9) The 'dead storage' in a dam reservoir is the available volume for collection of silt and sediment, between: _____.
- bed level of the reservoir and minimum reservoir level
 - bed level of the reservoir and the maximum conservation level in the reservoir.
 - bed level of the reservoir and the normal reservoir level
 - none of the above
- 10) The vertical downward earthquake acceleration, $\alpha_y = 0.1 g$, acting on a gravity dam, will _____.
- increase the resisting weight of the dam by 10%
 - decrease the resisting weight of the dam by 10%
 - increase the uplift by 10%
 - none of the above
- 11) The type of an arch dam, which generally requires 'overhangs at abutments', is of: _____.
- constant radius type
 - variable radius type
 - constant angle type
 - none of the above
- 12) The only provision among the following, which can help control the seepage through the body of an earthen dam and, thus, to keep the phreatic line well within the dam width, is _____.
- upstream impervious cutoff
 - drain trench along the downstream toe
 - relief wells
 - chimney drain
- 13) Hydraulic jump is widely used for dissipation of energy in : _____.
- ogee spillways
 - trough spillways
 - side channel spillways
 - all of these
- 14) In vertical stoney spillway gate, the rollers are placed between the : _____.
- gate and the u/s groove guide
 - gate and the d/s groove guide
 - either (a) or (b)
 - none of them

CIVIL ENGINEERING**

Hydraulic Structures & Water Power Engg (BTN01602)

Day & Date: Friday, 24-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) Question No. 3 is compulsory in section I, and solve any two questions from the remaining.
2) Question No. 9 is compulsory in section II, and solve any two questions from the remaining.
3) Figures to the right indicate full marks.

Section – I

- Q.2** a) What precautions and remedial measures would you undertake to control the 'seepage' through earthen dam body and through the dam foundation? **04**
b) As impounding reservoir had original storage capacity for 738 ha-m. The drainage area of the reservoir is 80 sq.km. from which, annual sediment discharges into the reservoir at the rate 0.1153 ha-m per sq.km, of the drainage area. Assuming the trap efficiency as 80 per cent, find the annual capacity loss of the reservoir in per cent per year. **05**
- Q.3** A profile of a gravity dam is shown in figure with the important levels. If the coefficient of friction between dam and foundations is 0.75, is the dam safe against sliding? Take unit weight of concrete as 24 kN/m^3 . Assume Horizontal Earthquake coefficient as 0.05 g, Vertical Earthquake coefficient as 0.1 g and there is no tail Water. Neglect uplift. Assuming $\gamma_w = 9.81 \text{ kN/m}^3$. **10**

- Q.4** a) What is meant by energy dissipater? Discuss the various methods used for energy dissipation below spillways. **04**
b) For a homogeneous earth dam 52 m high and 2 m free board, a flow net was constructed and following results were obtained. Number of potential drops = 25, Number of flow channels = 4. The dam has horizontal filter of 40 m length at its downstream end. Calculate the seepage discharge per meter length of the dam. Assume coefficient of permeability of the dam material as $3 \times 10^{-3} \text{ cm/sec}$. **05**

- Q.5** a) Classify various types of dams according to construction materials used. **04**
Distinguish clearly between rigid and non-rigid dams.
- b) Compute the discharge (with and without velocity of approach) over an ogee weir with coefficient of discharge equal to 2.4 and head of 2 m. The length of spillway is 100 m. Weir crest is 8 m above the bottom of approach channel having same width as that of spillway. **05**

Section – II

- Q.6** a) Enlist and explain different causes of failures of weirs on permeable foundations. **04**
- b) What is mean by lining a canal? Explain its need. **05**
- Q.7** a) Explain the following cross drainage works with neat sketches. **04**
i) Aqueduct and syphon aqueduct
ii) Level crossing
- b) Explain the terms. **05**
i) River training
ii) Efflorescence
iii) Water logging
Enlist objectives of river training work?
- Q.8** a) What are the typical components of the hydro-electrical scheme? Discuss the utility of each component. **04**
- b) Differentiate between. **05**
i) Bligh's and Khosla's theory
ii) Lining of existing canal and new canal
- Q.9** a) U-7-Theory **04**
Explain different methods of controlling water logging.
- b) A runoff river hydroelectric power station is proposed across a river at a site where a net head of 25 meter is available on the turbine. The river carries a sustained minimum flow of 45 cumec in dry weather. Sufficient poundage is provided to supply daily peak load of demand with a load factor of 72%. Assuming the plant efficiency to be 70%, determine the maximum generating capacity of generator to be installed at the power house. If the daily load pattern indicates 20 hours average load and 4 hours peak load, determine the poundage to be provided to supply the daily demand. **06**

- 7) The vertical downward earthquake acceleration, $\alpha_y = 0.1 g$, acting on a gravity dam, will _____.
- increase the resisting weight of the dam by 10%
 - decrease the resisting weight of the dam by 10%
 - increase the uplift by 10%
 - none of the above
- 8) The type of an arch dam, which generally requires 'overhangs at abutments', is of: _____.
- constant radius type
 - variable radius type
 - constant angle type
 - none of the above
- 9) The only provision among the following, which can help control the seepage through the body of an earthen dam and, thus, to keep the phreatic line well within the dam width, is _____.
- upstream impervious cutoff
 - drain trench along the downstream toe
 - relief wells
 - chimney drain
- 10) Hydraulic jump is widely used for dissipation of energy in : _____.
- ogee spillways
 - trough spillways
 - side channel spillways
 - all of these
- 11) In vertical stoney spillway gate, the rollers are placed between the : _____.
- gate and the u/s groove guide
 - gate and the d/s groove guide
 - either (a) or (b)
 - none of them
- 12) Critical exit gradient, as introduced in Khosla's theory of design of weirs and barrages on pervious foundations, is : _____.
- the left out pressure in the seeping water at the downstream end point, where it emerges out on the river bed
 - the rate of loss of pressure of the seeping water at the downstream emerging point, which is just enough to lift the soil gains at that point
 - the actual pressure gradient of the seepage, at the downstream emerging point
 - none of the above
- 13) The gated regulator, which is constructed in the parent canal near the site of an off taking canal, is called a : _____.
- canal head regulator
 - distributary head regulator
 - cross regulator
 - none of the above
- 14) The canal, which may frequently encounter cross-drainage works, will be a : _____.
- watershed canal
 - contour canal
 - side slope canal
 - none of them

Hydraulic Structures & Water Power Engg (BTN01602)

Day & Date: Friday, 24-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) Question No. 3 is compulsory in section I, and solve any two questions from the remaining.
2) Question No. 9 is compulsory in section II, and solve any two questions from the remaining.
3) Figures to the right indicate full marks.

Section – I

- Q.2** a) What precautions and remedial measures would you undertake to control the 'seepage' through earthen dam body and through the dam foundation? **04**
b) As impounding reservoir had original storage capacity for 738 ha-m. The drainage area of the reservoir is 80 sq.km. from which, annual sediment discharges into the reservoir at the rate 0.1153 ha-m per sq.km, of the drainage area. Assuming the trap efficiency as 80 per cent, find the annual capacity loss of the reservoir in per cent per year. **05**
- Q.3** A profile of a gravity dam is shown in figure with the important levels. If the coefficient of friction between dam and foundations is 0.75, is the dam safe against sliding? Take unit weight of concrete as 24 kN/m^3 . Assume Horizontal Earthquake coefficient as 0.05 g, Vertical Earthquake coefficient as 0.1 g and there is no tail Water. Neglect uplift. Assuming $\gamma_w = 9.81 \text{ kN/m}^3$. **10**

- Q.4** a) What is meant by energy dissipater? Discuss the various methods used for energy dissipation below spillways. **04**
b) For a homogeneous earth dam 52 m high and 2 m free board, a flow net was constructed and following results were obtained. Number of potential drops = 25, Number of flow channels = 4. The dam has horizontal filter of 40 m length at its downstream end. Calculate the seepage discharge per meter length of the dam. Assume coefficient of permeability of the dam material as $3 \times 10^{-3} \text{ cm/sec}$. **05**

- Q.5** a) Classify various types of dams according to construction materials used. **04**
Distinguish clearly between rigid and non-rigid dams.
- b) Compute the discharge (with and without velocity of approach) over an ogee weir with coefficient of discharge equal to 2.4 and head of 2 m. The length of spillway is 100 m. Weir crest is 8 m above the bottom of approach channel having same width as that of spillway. **05**

Section – II

- Q.6** a) Enlist and explain different causes of failures of weirs on permeable foundations. **04**
- b) What is mean by lining a canal? Explain its need. **05**
- Q.7** a) Explain the following cross drainage works with neat sketches. **04**
i) Aqueduct and syphon aqueduct
ii) Level crossing
- b) Explain the terms. **05**
i) River training
ii) Efflorescence
iii) Water logging
Enlist objectives of river training work?
- Q.8** a) What are the typical components of the hydro-electrical scheme? Discuss the utility of each component. **04**
- b) Differentiate between. **05**
i) Bligh's and Khosla's theory
ii) Lining of existing canal and new canal
- Q.9** a) U-7-Theory **04**
Explain different methods of controlling water logging.
- b) A runoff river hydroelectric power station is proposed across a river at a site where a net head of 25 meter is available on the turbine. The river carries a sustained minimum flow of 45 cumec in dry weather. Sufficient poundage is provided to supply daily peak load of demand with a load factor of 72%. Assuming the plant efficiency to be 70%, determine the maximum generating capacity of generator to be installed at the power house. If the daily load pattern indicates 20 hours average load and 4 hours peak load, determine the poundage to be provided to supply the daily demand. **06**

- 8) A run off river plant for hydro power generation is essentially a : _____.
- a) high head scheme b) low head scheme
c) medium head scheme d) any of these
- 9) A storage hydro plant essentially involves : _____.
- a) a barrage or a weir b) a dam
c) either (a) or (b) d) neither (a) nor (b)
- 10) While planning a water supply reservoir, as compared to an irrigation reservoir, the design yield may be kept: _____.
- a) higher
b) lower
c) medium
d) lower or higher, as per designer's discretion
- 11) The 'dead storage' in a dam reservoir is the available volume for collection of silt and sediment, between: _____.
- a) bed level of the reservoir and minimum reservoir level
b) bed level of the reservoir and the maximum conservation level in the reservoir.
c) bed level of the reservoir and the normal reservoir level
d) none of the above
- 12) The vertical downward earthquake acceleration, $\alpha_y = 0.1$ g, acting on a gravity dam, will _____.
- a) increase the resisting weight of the dam by 10%
b) decrease the resisting weight of the dam by 10%
c) increase the uplift by 10%
d) none of the above
- 13) The type of an arch dam, which generally requires 'overhangs at abutments', is of: _____.
- a) constant radius type b) variable radius type
c) constant angle type d) none of the above
- 14) The only provision among the following, which can help control the seepage through the body of an earthen dam and, thus, to keep the phreatic line well within the dam width, is _____.
- a) upstream impervious cutoff
b) drain trench along the downstream toe
c) relief wells

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April - 2024
CIVIL ENGINEERING
Design of Bridges (BTN01610)

Day & Date: Monday, 27-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:**
- 1) Question no. 2 is compulsory in section I, and solve any two questions from the remaining.
 - 2) Question no. 6 is compulsory in section II, and solve any two questions from the remaining.
 - 3) Figures to the right indicate full marks.
 - 4) Assume suitable data if necessary and mention it clearly.

Section – I

- Q.2** Design a solid deck slab for Two lane bridge for following data: **10**
- a) Effective span – 7 m
 - b) Carriage way width – 7.5 m
 - c) Kerb – 600 × 275 on both side
 - d) Live load – IRC Class A (two lane)
 - e) Wearing coat – 100 mm thick
 - f) Use M-25 concrete and Fe-415 steel
 - g) Use $\alpha = 2.82$
- Q.3** Answer the following.
- a) Enlist the various loads to be considered for the analysis of bridges. **05**
 Explain any one in detail.
 - b) Give the detail classification of Bridges. **04**
- Q.4** A RCC 'T' beam type bridge having deck slab of 200 mm thick, wearing coat of 100 mm thick, four longitudinal girders and five cross girders. Design the exterior longitudinal girder. Use following additional data, **09**
- a) Carriage way width –10 m
 - b) Span of bridge –16 m
 - c) Live Load – IRC class AA Tracked
 - d) Kerb – 600 mm wide, 400 mm deep
 - e) Web thickness for Longitudinal and cross girder–300 mm
 - f) Longitudinal Girder spacing – 300 mm
 - g) Use M-25 concrete and Fe-415 steel
- Q.5** Design a slab panel having size of 3 m x 4.5 m. Consider IRC class AA tracked loading. Use Pigeaud's chart. Consider thickness of slab as 220 mm and wearing coat thickness as 85 mm. Use M- 30 concrete and Fe- 415 steel. Refer Fig 1 and 2 for Pigeuad's coefficient. **09**

Section – II

- Q.6** Verify the adequacy of pier for the following data: **10**
 Top width of pier- 1.8 m, Height of pier up to springing level - 6 m, C/C distance of bearing- 1.2m, Side batter 1:12, HFL - 1.2 m below the bearing level, Span of bridge -12 m, carriage way width- 7.5 m, Reaction due to D.L. from each span = 2000 kN, Reaction due to L.L. from each span = 650 kN, Braking force- 120 kN, wind pressure on pier- 2 kN/m². Material of pier = M20 concrete. Estimate the maximum and minimum stress developed at the base of the pier due to critical combination of various loads for dry condition and Flood condition.
- Q.7** Verify the suitability of abutment as shown in the fig 7.1. Use following data **09**
 Density of soil - 18 kN/m³, Friction angle of soil (ϕ) = 30°
 Coefficient of friction - 0.5, Live load reaction at bearing-500 kN, DL reaction from super structure - 2200 kN

Fig no 7.1

- Q.8** a) Design an elastomeric unreinforced bearing pad for following data **05**
 Vertical load (sustained) = 170 kN,
 Vertical load (dynamic) = 50 kN,
 Horizontal force = 90 kN
 Modulus of rigidity of elastomer – 1.1 N/mm²
 coefficient of friction = 0.4
- b) Write a note on inspection of bridges. **04**
- Q.9** Write a note on following (Any three) **09**
- Types of foundation for bridges
 - Types of bridge pier with their suitability
 - Expansion joints
 - Instruments required for bridge inspection

Seat No.

 - f) Longitudinal Girder spacing – 300 mm
 - g) Use M-25 concrete and Fe-415 steel
- Q.5** Design a slab panel having size of 3 m x 4.5 m. Consider IRC class AA tracked loading. Use Pigeaud's chart. Consider thickness of slab as 220 mm and wearing coat thickness as 85 mm. Use M- 30 concrete and Fe- 415 steel. Refer Fig 1 and 2 for Pigeuad's coefficient. **09**

Section – II

- Q.6** Verify the adequacy of pier for the following data: **10**
 Top width of pier- 1.8 m, Height of pier up to springing level - 6 m, C/C distance of bearing- 1.2m, Side batter 1:12, HFL - 1.2 m below the bearing level, Span of bridge -12 m, carriage way width- 7.5 m, Reaction due to D.L. from each span = 2000 kN, Reaction due to L.L. from each span = 650 kN, Braking force- 120 kN, wind pressure on pier- 2 kN/m². Material of pier = M20 concrete. Estimate the maximum and minimum stress developed at the base of the pier due to critical combination of various loads for dry condition and Flood condition.
- Q.7** Verify the suitability of abutment as shown in the fig 7.1. Use following data **09**
 Density of soil - 18 kN/m³, Friction angle of soil (ϕ) = 30°
 Coefficient of friction - 0.5, Live load reaction at bearing-500 kN, DL reaction from super structure - 2200 kN

Fig no 7.1

- Q.8** a) Design an elastomeric unreinforced bearing pad for following data **05**
 Vertical load (sustained) = 170 kN,
 Vertical load (dynamic) = 50 kN,
 Horizontal force = 90 kN
 Modulus of rigidity of elastomer – 1.1 N/mm²
 coefficient of friction = 0.4
- b) Write a note on inspection of bridges. **04**
- Q.9** Write a note on following (Any three) **09**
- Types of foundation for bridges
 - Types of bridge pier with their suitability
 - Expansion joints
 - Instruments required for bridge inspection

- 9) Continuous girder requires _____.
- a) Fixed bearing on all supports
 - b) Expansion bearing on all supports
 - c) Expansion bearing on all support except at one
 - d) Fixed bearing on all support except at one
- 10) The minimum width of carriage way for a two lane bridge is _____.
- a) 4.25m
 - b) 10m
 - c) 6m
 - d) 7.5m
- 11) _____ is the minimum grade of concrete for prestressed concrete bridges.
- a) M-30
 - b) M-20
 - c) M-40
 - d) M-25
- 12) The minimum width of carriage way for a single lane bridge is _____.
- a) 4.25m
 - b) 6M
 - c) 10m
 - d) 7.5m
- 13) As per IRC-21, minimum clear cover to any reinforcement bar is _____.
- a) 40mm
 - b) 25mm
 - c) 50mm
 - d) 30mm
- 14) As per crack control criteria of IRC-21, the spacing of main reinforced bar shall not exceed _____.
- a) 100mm
 - b) 300mm
 - c) 200mm
 - d) 150mm

Set **S**

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April - 2024
CIVIL ENGINEERING
Design of Bridges (BTN01610)

Day & Date: Monday, 27-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:**
- 1) Question no. 2 is compulsory in section I, and solve any two questions from the remaining.
 - 2) Question no. 6 is compulsory in section II, and solve any two questions from the remaining.
 - 3) Figures to the right indicate full marks.
 - 4) Assume suitable data if necessary and mention it clearly.

Section – I

- Q.2** Design a solid deck slab for Two lane bridge for following data: **10**
- a) Effective span – 7 m
 - b) Carriage way width – 7.5 m
 - c) Kerb – 600 × 275 on both side
 - d) Live load – IRC Class A (two lane)
 - e) Wearing coat – 100 mm thick
 - f) Use M-25 concrete and Fe-415 steel
 - g) Use $\alpha = 2.82$
- Q.3** Answer the following.
- a) Enlist the various loads to be considered for the analysis of bridges. **05**
 Explain any one in detail.
 - b) Give the detail classification of Bridges. **04**
- Q.4** A RCC 'T' beam type bridge having deck slab of 200 mm thick, wearing coat of 100 mm thick, four longitudinal girders and five cross girders. Design the exterior longitudinal girder. Use following additional data, **09**
- a) Carriage way width – 10 m
 - b) Span of bridge – 16 m
 - c) Live Load – IRC class AA Tracked
 - d) Kerb – 600 mm wide, 400 mm deep
 - e) Web thickness for Longitudinal and cross girder – 300 mm
 - f) Longitudinal Girder spacing – 300 mm
 - g) Use M-25 concrete and Fe-415 steel
- Q.5** Design a slab panel having size of 3 m x 4.5 m. Consider IRC class AA tracked loading. Use Pigeaud's chart. Consider thickness of slab as 220 mm and wearing coat thickness as 85 mm. Use M- 30 concrete and Fe- 415 steel. Refer Fig 1 and 2 for Pigeuad's coefficient. **09**

Section – II

- Q.6** Verify the adequacy of pier for the following data: **10**
 Top width of pier- 1.8 m, Height of pier up to springing level - 6 m, C/C distance of bearing- 1.2m, Side batter 1:12, HFL - 1.2 m below the bearing level, Span of bridge -12 m, carriage way width- 7.5 m, Reaction due to D.L. from each span = 2000 kN, Reaction due to L.L. from each span = 650 kN, Braking force- 120 kN, wind pressure on pier- 2 kN/m². Material of pier = M20 concrete. Estimate the maximum and minimum stress developed at the base of the pier due to critical combination of various loads for dry condition and Flood condition.
- Q.7** Verify the suitability of abutment as shown in the fig 7.1. Use following data **09**
 Density of soil - 18 kN/m³, Friction angle of soil (ϕ) = 30°
 Coefficient of friction - 0.5, Live load reaction at bearing-500 kN, DL reaction from super structure - 2200 kN

Fig no 7.1

- Q.8** a) Design an elastomeric unreinforced bearing pad for following data **05**
 Vertical load (sustained) = 170 kN,
 Vertical load (dynamic) = 50 kN,
 Horizontal force = 90 kN
 Modulus of rigidity of elastomer – 1.1 N/mm²
 coefficient of friction = 0.4
- b) Write a note on inspection of bridges. **04**
- Q.9** Write a note on following (Any three) **09**
- Types of foundation for bridges
 - Types of bridge pier with their suitability
 - Expansion joints
 - Instruments required for bridge inspection

T.Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: March/April - 2024
CIVIL ENGINEERING
Pavement Design (BTN01613)

Day & Date: Monday, 27-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:**
- 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No.3 (starting page of the Answer Book). Each question carry one mark.
 - 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 - 3) Figures to the right indicates full marks.
 - 4) Assume any missing data suitably and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q .1 Choose the correct alternatives from the options. 14

- 1) In the ESWL concept, the total stress due to the dual wheels up to a depth of $d/2$, the ESWL is considered to be equivalent to the magnitude of _____.

a) P	b) 2P
c) 0.5P	d) 4P
- 2) In flexible pavement, the load dispersion through granular layers by _____.
 - a) Slab action
 - b) Grain to Grain contact
 - c) Both slab action and grain-to-grain contact
 - d) Only Slab action
- 3) In flexible pavement, which layer has got highest elastic modulus?

a) Subgrade	b) Granular Subbase
c) Wet Mix Macadam	d) Bituminous Concrete
- 4) The axle loads and the number of axles per heavy vehicle are converted in terms of the number of standard axles loads per vehicle is known as, _____.
 - a) Lane Distribution Factor
 - b) Vehicle Damage Factor
 - c) Directional Distribution Factor
 - d) Equivalent Single Wheel Load Factor
- 5) The vehicle carries a rear single axle weight of 17 tonnes, what is the EWLF? (Use the fourth power rule and consider standard axle weight as 8.16tonne)

a) 15.78	b) 14.83
c) 16.78	d) 18.83
- 6) The ratio of flexural stress to its flexural strength is called _____.

a) Compressive Strength	b) Tensile Strength
c) Stress Ratio	d) Flexural strength

- 7) In CC pavement design, if the stress ratio due to design load is less than 0.44, then _____.
 a) Pavement slab is safe
 b) No warping stresses
 c) No possibility of fatigue failure due to repeated application of load
 d) No friction stresses at the bottom of the slab
- 8) In CC pavement, no warping condition of the pavement is called when _____.
 a) The temperature at the top and bottom of the CC pavement slab will be equal
 b) The temperature at the top of CC pavement is more the bottom
 c) The temperature at the bottom of CC pavement is more the top
 d) At the middle third of the CC pavement temperature is high
- 9) In rigid pavement, the longitudinal joint is provided when:
 a) The width of the pavement exceeds 10m
 b) The width of the pavement exceeds 4.5m
 c) The width of the pavement exceeds 7m
 d) The width of the pavement exceeds 15m
- 10) What nature of warping stresses are generated in a CC pavement during a summer mid day?
 a) Tensile in bottom fibre and compressive in top fibre
 b) Compressive in both top and bottom fibre
 c) Tensile in both top and bottom fibre
 d) Compressive in bottom fibre and tensile in top fibre
- 11) The modulus of the subgrade reaction is given by _____.
 a) $K = \frac{P}{\Delta}$
 b) $K = Px\Delta$
 c) $K = P + \Delta$
 d) $K = \Delta$
- 12) Know the load, warping, and frictional stresses on cement concrete pavement slabs as 220N/mm², 300N/mm², and 10N/mm² respectively, the critical combination of stresses during the summer season is _____.
 a) 300N/mm²
 b) 530N/mm²
 c) 520N/mm²
 d) 510N/mm²
- 13) What is the equivalent radius of the resisting section of a 20cm thick slab, given that the radius of the contact area is 15cm?
 a) 14.07cm
 b) 15.07cm
 c) 16.07cm
 d) 17.07cm
- 14) The longitudinal joints in cement concrete pavements are constructed with suitable _____.
 a) Tie bars
 b) Dowel bars
 c) Shear rods
 d) Small spacing

T.Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: March/April - 2024
CIVIL ENGINEERING
Pavement Design (BTN01613)

Day & Date: Monday, 27-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
 2) Figures to the right indicates full marks.
 3) Assume any missing data suitably and mention it clearly.

Section – I

Q.2 Answer Any Two questions. 14

- a) Draw a neat sketch of flexible pavement and show component parts of all layers. Briefly explain the function of all layers.
- b) What is VDF? Determine the Equivalent Wheel Load Factor or VDF value of the following two axle loads in terms of the standard axle load of 8.16tonne.
 - i) LCV with a rear axle load of 4.0t
 - ii) HCV with a rear axle load of 16t
- c) A flexible pavement of thickness 48cm is laid over a subgrade. A circular load of 16cm with a uniform contact pressure of 6.5kg/cm^2 is applied. Assume the elastic modulus of the subgrade as well as the pavement layer to be 900kg/cm^2 . Assuming a homogenous elastic single-layer system determine the deflection of the pavement surface under the center of the load. Use the Deflection Factor chart given in Fig-I.

Q.4 Answer Any Two questions 14

- a) Draw a neat sketch of rigid pavement and show component parts of all layers. Briefly explain the function of all layers.
- b) Find ESWL at depths of 50mm, 200mm, and 400mm for a dual wheel carrying 2044 kN each. The center-to-center tyre spacing is 200mm and the distance between the walls of the two tyres is 100mm. Use (log) equation to calculate ESWL.
- c) Plate bearing tests were conducted using a 30cm diameter plate on soil subgrade and over a base course of thickness 45cm. The pressure yielded at 0.5cm deflection on the subgrade and base course was 1.25kg/cm^2 and 8kg/cm^2 respectively. Design the thickness requirement of flexible pavement for a wheel load of 5100kg with tyre pressure of 8.0kg/cm^2 for an allowable deflection of 0.5cm using the Burmister two-layer deflection factor chart shown in Fig-II.

Section – II

Q.5 Answer Any Two questions.**14**

- a) Explain the different joints provided with their functions in CC pavements.
- b) With a diagram explain the working principle of Benkelman beam for measurement of pavement deflection.
- c) C.C. Pavement is constructed using the following data:
- i) Modulus of elasticity $3.3 \times 10^5 \text{ kg/cm}^2$
 - ii) Poisson's ratio=0.15
 - iii) Thickness of CC pavement = 18 cm
 - iv) Modulus of subgrade reaction- 25kg/cm^3
 - v) Wheel load = 4100 kg
 - vi) Radius of loaded area = 12 cm
- Calculate stresses at the Interior, Edge, and corner by Westergaard's method.

Q.6 Answer Any Two questions**14**

- a) Determine the warping stresses at the interior, edge, and corner of a 25cm thick cement concrete pavement with transverse joints at 5.0m intervals and longitudinal joints at 3.6m intervals. The modulus of subgrade reaction K is 6.9kg/cm^3 and the radius of the loaded area is 15cm. Assume the temperature differential during the day to be 0.6°C per cm slab thickness (for warping stress at interior and edge) and a maximum temperature differential of 0.4°C per cm slab thickness during the night (for warping stress at the corner). Assume $e=10 \times 10^{-6}$ per $^\circ\text{C}$, $E=3 \times 10^5 \text{ kg/cm}^2$, $\mu=0.15$. Use the Bradbury chart given in Figure III.
- b) Write a short note any two:
- i) Factors affecting flexible pavement design
 - ii) Layered systems concepts of Pavement Design
 - iii) Factors Affecting Rigid Pavement Design
 - iv) Principles of Rigid Pavement Design as per IRC-58-2015
- c) The rebound deflection values determined at 15 spots are given below. Determine the values of:
- i) mean deflection
 - ii) standard deviation and
 - iii) characteristic deflection for an important highway with heavy traffic
- Rebound deflection values in mm: 1.40, 1.32, 1.25, 1.35, 1.48, 1.60, 1.65, 1.55, 1.45, 1.40, 1.36, 1.46, 1.50, 1.52, 1.45

T.Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: March/April - 2024
CIVIL ENGINEERING
Pavement Design (BTN01613)

Day & Date: Monday, 27-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No.3 (starting page of the Answer Book). Each question carry one mark.
 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 3) Figures to the right indicates full marks.
 4) Assume any missing data suitably and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q .1 Choose the correct alternatives from the options. 14

- 1) The ratio of flexural stress to its flexural strength is called _____.
 a) Compressive Strength b) Tensile Strength
 c) Stress Ratio d) Flexural strength
- 2) In CC pavement design, if the stress ratio due to design load is less than 0.44, then _____.
 a) Pavement slab is safe
 b) No warping stresses
 c) No possibility of fatigue failure due to repeated application of load
 d) No friction stresses at the bottom of the slab
- 3) In CC pavement, no warping condition of the pavement is called when _____.
 a) The temperature at the top and bottom of the CC pavement slab will be equal
 b) The temperature at the top of CC pavement is more the bottom
 c) The temperature at the bottom of CC pavement is more the top
 d) At the middle third of the CC pavement temperature is high
- 4) In rigid pavement, the longitudinal joint is provided when:
 a) The width of the pavement exceeds 10m
 b) The width of the pavement exceeds 4.5m
 c) The width of the pavement exceeds 7m
 d) The width of the pavement exceeds 15m
- 5) What nature of warping stresses are generated in a CC pavement during a summer mid day?
 a) Tensile in bottom fibre and compressive in top fibre
 b) Compressive in both top and bottom fibre
 c) Tensile in both top and bottom fibre
 d) Compressive in bottom fibre and tensile in top fibre

T.Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: March/April - 2024
CIVIL ENGINEERING
Pavement Design (BTN01613)

Day & Date: Monday, 27-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
 2) Figures to the right indicates full marks.
 3) Assume any missing data suitably and mention it clearly.

Section – I

Q.2 Answer Any Two questions. 14

- a) Draw a neat sketch of flexible pavement and show component parts of all layers. Briefly explain the function of all layers.
- b) What is VDF? Determine the Equivalent Wheel Load Factor or VDF value of the following two axle loads in terms of the standard axle load of 8.16tonne.
 - i) LCV with a rear axle load of 4.0t
 - ii) HCV with a rear axle load of 16t
- c) A flexible pavement of thickness 48cm is laid over a subgrade. A circular load of 16cm with a uniform contact pressure of 6.5kg/cm^2 is applied. Assume the elastic modulus of the subgrade as well as the pavement layer to be 900kg/cm^2 . Assuming a homogenous elastic single-layer system determine the deflection of the pavement surface under the center of the load. Use the Deflection Factor chart given in Fig-I.

Q.4 Answer Any Two questions 14

- a) Draw a neat sketch of rigid pavement and show component parts of all layers. Briefly explain the function of all layers.
- b) Find ESWL at depths of 50mm, 200mm, and 400mm for a dual wheel carrying 2044 kN each. The center-to-center tyre spacing is 200mm and the distance between the walls of the two tyres is 100mm. Use (log) equation to calculate ESWL.
- c) Plate bearing tests were conducted using a 30cm diameter plate on soil subgrade and over a base course of thickness 45cm. The pressure yielded at 0.5cm deflection on the subgrade and base course was 1.25kg/cm^2 and 8kg/cm^2 respectively. Design the thickness requirement of flexible pavement for a wheel load of 5100kg with tyre pressure of 8.0kg/cm^2 for an allowable deflection of 0.5cm using the Burmister two-layer deflection factor chart shown in Fig-II.

Section – II

Q.5 Answer Any Two questions.**14**

- a) Explain the different joints provided with their functions in CC pavements.
- b) With a diagram explain the working principle of Benkelman beam for measurement of pavement deflection.
- c) C.C. Pavement is constructed using the following data:
 - i) Modulus of elasticity $3.3 \times 10^5 \text{ kg/cm}^2$
 - ii) Poisson's ratio=0.15
 - iii) Thickness of CC pavement = 18 cm
 - iv) Modulus of subgrade reaction- 25kg/cm^3
 - v) Wheel load = 4100 kg
 - vi) Radius of loaded area = 12 cm

Calculate stresses at the Interior, Edge, and corner by Westergaard's method.

Q.6 Answer Any Two questions**14**

- a) Determine the warping stresses at the interior, edge, and corner of a 25cm thick cement concrete pavement with transverse joints at 5.0m intervals and longitudinal joints at 3.6m intervals. The modulus of subgrade reaction K is 6.9kg/cm^3 and the radius of the loaded area is 15cm. Assume the temperature differential during the day to be 0.6°C per cm slab thickness (for warping stress at interior and edge) and a maximum temperature differential of 0.4°C per cm slab thickness during the night (for warping stress at the corner). Assume $e=10 \times 10^{-6}$ per $^\circ\text{C}$, $E=3 \times 10^5 \text{ kg/cm}^2$, $\mu=0.15$. Use the Bradbury chart given in Figure III.
- b) Write a short note any two:
 - i) Factors affecting flexible pavement design
 - ii) Layered systems concepts of Pavement Design
 - iii) Factors Affecting Rigid Pavement Design
 - iv) Principles of Rigid Pavement Design as per IRC-58-2015
- c) The rebound deflection values determined at 15 spots are given below. Determine the values of:
 - i) mean deflection
 - ii) standard deviation and
 - iii) characteristic deflection for an important highway with heavy traffic
 Rebound deflection values in mm: 1.40, 1.32, 1.25, 1.35, 1.48, 1.60, 1.65, 1.55, 1.45, 1.40, 1.36, 1.46, 1.50, 1.52, 1.45

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options. (2 Marks Each)

14

- 1) The workability of the concrete by slump test is expressed as _____.
 - a) mm³/h
 - b) mm²/h
 - c) mm/h
 - d) mm
- 2) RMC stands for _____.
 - a) Rapid Mix Cement
 - b) Ready Mix Concrete
 - c) Ready Mix Cements
 - d) Rapid Mix Concrete
- 3) Non uniform compaction may cause the concrete _____.
 - a) porous
 - b) non-homogeneous
 - c) reduce strength
 - d) all of above
- 4) Which of the following is not a composition of cement?
 - a) Tricalcium Silicate
 - b) Dicalcium Silicate
 - c) Tricalcium Aluminate
 - d) Dicalcium Aluminate
- 5) True slump shows characteristics of _____.
 - a) Homogeneous material
 - b) Non cohesive material
 - c) Segregation
 - d) Bleeding
- 6) Grading of aggregate _____.
 - a) Affects the workability
 - b) Affects the strength of concrete
 - c) Affects the w/c ratio
 - d) All the above is true
- 7) Finer the cement _____.
 - a) Higher is the rate of hydration
 - b) More is the surface area
 - c) Lesser the amount of water required for constant slump
 - d) All of the above

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) Specific force represents the sum of pressure force and _____.
 - a) Datum head
 - b) Momentum flux per unit weight
 - c) Momentum flux and datum head
 - d) None
- 2) If the Froude's number is 9.2 then the jump is known as _____.
 - a) Steady
 - b) Oscillating
 - c) Undular
 - d) Strong
- 3) The flow in open channel may be characterized as turbulent when _____.
 - a) $Re < 500$
 - b) $Re > 2000$
 - c) $Re > 4000$
 - d) $500 < Re < 2000$
- 4) In Gradually varied flow, if dy/dx is positive then dE/dx will be _____.
 - a) Zero
 - b) Negative if $y > y_c$
 - c) Positive if $y > y_c$
 - d) Always negative
- 5) For the trapezoidal section _____.
 - a) Shape is of half hexagon
 - b) Depth of flow equal to half bed width
 - c) Side slope equal to 45°
 - d) None
- 6) River plains are made up of _____.
 - a) Black soil
 - b) Red soil
 - c) Alluvium
 - d) None
- 7) The momentum correction factor, β is given as _____.
 - a) $1/V^2 A \int V^3 \cdot dA$
 - b) $1/VA \int V \cdot dA$
 - c) $1/V^3 A \int V^2 \cdot dA$
 - d) $1/V^2 A \int V^2 \cdot dA$

Open Channel flow & River Hydraulics (BTN01617)

Day & Date: Monday, 27-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Draw neat sketches wherever necessary.
4) Use of non-programmable calculator is permitted.

Section –I

Q.2 Attempt any four. 16

- a) The velocity distribution in rectangular channel of width 'B' and depth 'Yo' was approximated as $V = K1\sqrt{y}$ Where $k1 = \text{constant}$; calculate the average velocity for the crosssection and correction coefficient ' α ' & ' β '.
- b) A 3.6m wide rectangular channel convey's 10 m³/s of water with velocity 6 m/s. state is there formation of hydraulic jump if yes calculate height, length and strength of Jump and what is loss of energy per kg of water.
- c) Derive the modified GVF equation and draw a neat sketch and show all details.
- d) A flow of 6.0 m³/s is passing at a depth of 1.5 m. through a rectangular channel of width 2.5 m. If ' α ' is 1.1 Determine specific energy of flow also determine the value of the depth alternative to the existing depth. If ' α ' = 1.0 (assumed for alternate depth flow).
- e) What do you understand by most economical channel section? and show that for trapezoidal section Half of top width= Length of one of sloping side and hydraulic mean depth= half the depth of flow.

Q.3 Attempt any two. 12

- a) Define kinetic energy correction=factor (α) and momentum correction factor (β) and derive their expressions.
- b) A discharge of 840 m³/s flows down a spillway and then passes on a 60 m. Wide concrete apron($n= 0.014$) the velocity of water at the toe of spillway is 10 m/s. A tail water depth of 4.40 m the channel below causes a hydraulic jump on the horizontal apron. Determine
 - i) Depth before the jump
 - ii) Length of jump
 - iii) Energy loss in jump
 - iv) Specific force at the toe
- c) Derive the equation for loss of energy through Hydraulic Jump.

Section – II

Q.4 Attempt Any Four**16**

- a) Explain
 - i) Regime channel
 - ii) Bed load and its measurement
- b) Derive 'Reynold's model law' and state giving examples where it can be used.
- c) What do you understand by similarity? Explain Dynamic similarity.
- d) Draw a neat sketch of Current meter and explain its working in details.
- e) Design a regime channel by using lacey's theory from the data, discharge= $50 \text{ m}^3/\text{s}$ and silt factor =1.12 (Assume suitable data wherever necessary)

Q.5 Attempt Any Two**12**

- a) Write short notes on:
 - i) Cut-off
 - ii) River training works
- b) Differentiate between Kennedy's theory and Lacey' theory for channel design.
- c) A model of water meter is tested in 90 mm diameter pipe. The discharge was 50 lit/sec and pressure difference is 0.11 N/mm^2 . What will be the discharge in pipe of 450 mm diameter pipe and what will be the pressure.

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Draw neat sketches wherever necessary.
5) Use of non-programmable calculator is permitted.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) The mean velocity in Lacey's regime channel is proportional to _____.
 - a) $11 R^{1/2} S_0^{1/2}$
 - b) $10.8 D^{2/3} S_0^{1/3}$
 - c) $11 D S_0$
 - d) None
- 2) Shield's diagram is a plot of non dimensional shear stress (τ_c) against _____.
 - a) Relative depth
 - b) Shear Reynold's number
 - c) Hydraulic radius
 - d) Reynold's number
- 3) Extreme condition of meanders is called as _____.
 - a) Leavee
 - b) Spurs
 - c) Cut-off
 - d) Island
- 4) River training work serves the following purposes _____.
 - a) Protect the river bed and banks
 - b) Direct the river flow in desired condition
 - c) Increase or decrease of the river discharge
 - d) Protect the surrounding land from flooding
- 5) River gauge is used to measure _____.
 - a) Still level
 - b) Water level
 - c) Turbulence
 - d) Current
- 6) Distorted models are required to be prepared for _____.
 - a) Rivers
 - b) Commercial buildings
 - c) Residential buildings
 - d) None
- 7) The dimension of kinematic viscosity is _____.
 - a) $L^{-1} T^{-1}$
 - b) $L^2 T^{-1}$
 - c) $L^{-3} T^{-3}$
 - d) $L^{-2} T^{-3}$
- 8) Specific force represents the sum of pressure force and _____.
 - a) Datum head
 - b) Momentum flux per unit weight
 - c) Momentum flux and datum head
 - d) None

Set **Q**

**T.Y. (B.Tech.) (Sem - II) (New)(CBCS) Examination: March/April – 2024
CIVIL ENGINEERING**

Open Channel flow & River Hydraulics (BTN01617)

Day & Date: Monday, 27-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Draw neat sketches wherever necessary.
4) Use of non-programmable calculator is permitted.

Section –I

Q.2 Attempt any four. **16**

- a) The velocity distribution in rectangular channel of width 'B' and depth 'Yo' was approximated as $V = K1\sqrt{y}$ Where $k1 = \text{constant}$; calculate the average velocity for the crosssection and correction coefficient ' α ' & ' β '.
- b) A 3.6m wide rectangular channel convey's 10 m³/s of water with velocity 6 m/s. state is there formation of hydraulic jump if yes calculate height, length and strength of Jump and what is loss of energy per kg of water.
- c) Derive the modified GVF equation and draw a neat sketch and show all details.
- d) A flow of 6.0 m³/s is passing at a depth of 1.5 m. through a rectangular channel of width 2.5 m. If ' α ' is 1.1 Determine specific energy of flow also determine the value of the depth alternative to the existing depth. If ' α ' = 1.0 (assumed for alternate depth flow).
- e) What do you understand by most economical channel section? and show that for trapezoidal section Half of top width= Length of one of sloping side and hydraulic mean depth= half the depth of flow.

Q.3 Attempt any two. **12**

- a) Define kinetic energy correction=factor (α) and momentum correction factor (β) and derive their expressions.
- b) A discharge of 840 m³/s flows down a spillway and then passes on a 60 m. Wide concrete apron($n= 0.014$) the velocity of water at the toe of spillway is 10 m/s. A tail water depth of 4.40 m the channel below causes a hydraulic jump on the horizontal apron. Determine
 - i) Depth before the jump
 - ii) Length of jump
 - iii) Energy loss in jump
 - iv) Specific force at the toe
- c) Derive the equation for loss of energy through Hydraulic Jump.

Section – II

Q.4 Attempt Any Four**16**

- a) Explain
 - i) Regime channel
 - ii) Bed load and its measurement
- b) Derive 'Reynold's model law' and state giving examples where it can be used.
- c) What do you understand by similarity? Explain Dynamic similarity.
- d) Draw a neat sketch of Current meter and explain its working in details.
- e) Design a regime channel by using lacey's theory from the data, discharge= $50 \text{ m}^3/\text{s}$ and silt factor =1.12 (Assume suitable data wherever necessary)

Q.5 Attempt Any Two**12**

- a) Write short notes on:
 - i) Cut-off
 - ii) River training works
- b) Differentiate between Kennedy's theory and Lacey' theory for channel design.
- c) A model of water meter is tested in 90 mm diameter pipe. The discharge was 50 lit/sec and pressure difference is 0.11 N/mm^2 . What will be the discharge in pipe of 450 mm diameter pipe and what will be the pressure.

Open Channel flow & River Hydraulics (BTN01617)

Day & Date: Monday, 27-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:**
- 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 - 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 - 3) Figures to the right indicates full marks.
 - 4) Draw neat sketches wherever necessary.
 - 5) Use of non-programmable calculator is permitted.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) River training work serves the following purposes _____.
 - a) Protect the river bed and banks
 - b) Direct the river flow in desired condition
 - c) Increase or decrease of the river discharge
 - d) Protect the surrounding land from flooding
- 2) River gauge is used to measure _____.
 - a) Still level
 - b) Water level
 - c) Turbulence
 - d) Current
- 3) Distorted models are required to be prepared for _____.
 - a) Rivers
 - b) Commercial buildings
 - c) Residential buildings
 - d) None
- 4) The dimension of kinematic viscosity is _____.
 - a) $L^{-1}T^{-1}$
 - b) L^2T^{-1}
 - c) $L^{-3}T^{-3}$
 - d) $L^{-2}T^{-3}$
- 5) Specific force represents the sum of pressure force and _____.
 - a) Datum head
 - b) Momentum flux per unit weight
 - c) Momentum flux and datum head
 - d) None
- 6) If the Froude's number is 9.2 then the jump is known as _____.
 - a) Steady
 - b) Oscillating
 - c) Undular
 - d) Strong
- 7) The flow in open channel may be characterized as turbulent when _____.
 - a) $Re < 500$
 - b) $Re > 2000$
 - c) $Re > 4000$
 - d) $500 < Re < 2000$
- 8) In Gradually varied flow, if dy/dx is positive then dE/dx will be _____.
 - a) Zero
 - b) Negative if $y > y_c$
 - c) Positive if $y > y_c$
 - d) Always negative

- 9) For the trapezoidal section _____.
- a) Shape is of half hexagon
 - b) Depth of flow equal to half bed width
 - c) Side slope equal to 45°
 - d) None
- 10) River plains are made up of _____.
- a) Black soil
 - b) Red soil
 - c) Alluvium
 - d) None
- 11) The momentum correction factor, β is given as _____.
- a) $1/V^2 A \int V^3 \cdot dA$
 - b) $1/VA \int V \cdot dA$
 - c) $1/V^3 A \int V^2 \cdot dA$
 - d) $1/V^2 A \int V^2 \cdot dA$
- 12) The mean velocity in Lacey's regime channel is proportional to _____.
- a) $11 R^{1/2} S_0^{1/2}$
 - b) $10.8 D^{2/3} S_0^{1/3}$
 - c) $11 D S_0$
 - d) None
- 13) Shield's diagram is a plot of non dimensional shear stress (τ_c) against _____.
- a) Relative depth
 - b) Shear Reynold's number
 - c) Hydraulic radius
 - d) Reynold's number
- 14) Extreme condition of meanders is called as _____.
- a) Leavee
 - b) Spurs
 - c) Cut-off
 - d) Island

 - i) Cut-off
 - ii) River training works
- b) Differentiate between Kennedy's theory and Lacey' theory for channel design.
- c) A model of water meter is tested in 90 mm diameter pipe. The discharge was 50 lit/sec and pressure difference is 0.11 N/mm^2 . What will be the discharge in pipe of 450 mm diameter pipe and what will be the pressure.

- 9) Organic matter, which can be decomposed by bacteria is known as _____.
a) Biodegradable organic matter b) Degradation
c) Eutrophication d) Decomposers
- 10) Substances that emit ionizing radiation are defined as _____.
a) Hazardous wastes b) Biological wastes
c) Flammable wastes d) Radioactive wastes
- 11) Household hazardous waste includes batteries and _____.
a) Radioactive waste b) Food waste
c) Leachate d) Nail polish
- 12) Sanitary landfill may not cause troubles during _____.
a) Peak summers b) Peak winters
c) Peak monsoons d) None of these
- 13) Which of the following is anaerobic method of leachate treatment?
a) Aerated lagoon
b) Activated Sludge Process
c) up flow Sludge biological reactor
d) Trickling filter
- 14) Important aspect in the implementation of sanitary landfills includes _____.
a) Site Selection
b) Land filling methods
c) Movemen and control of land fill and leachate
d) All the above

Solid and Hazardous Waste Management (BTN01618)

Day & Date: Monday, 27-05-2024

Max. Marks: 56

Time: 03:00 PM To 06:00 PM

- Instructions:**
- 1) Question no. 2 is compulsory in section I, and solve any two questions from the remaining. (Q. No. 3, 4 & 5)
 - 2) Question no. 6 is compulsory in section II, and solve any two questions from the remaining. (Q. No. 7, 8 & 9)
 - 3) Figures to the right indicate full marks.
 - 4) Assume suitable data wherever needed and mention it clearly.

Section – I

- Q.2 a)** Estimate the moisture content of solid waste sample of 100 kg using the following data. **05**

Sr. No.	Component	% by mass	% by M.C.
1	Food waste	16	65
2	Paper	36	08
3	Cardboards	05	05
4	Plastics	10	02
5	Grass	12	55
6	Wood	08	04
7	Metals	13	03

- b)** Explain with sketch impact of solid waste on environment. **05**

- Q.3 a)** Explain the functional elements of municipal solid waste management with flow diagram. **05**

- b)** Explain theory of composting in brief. **04**

- Q.4 a)** Distinguish between Indore method and Bangalore method. **05**

- b)** Explain with sketch Hauled container method of collection of solid waste. **04**

- Q.5 a)** Explain factors affecting composting process. **05**

- b)** Explain different types and sources of solid waste. **04**

Section – II

- Q.6 a)** Define Hazardous waste? State and explain characteristic of hazardous waste. **05**

- b)** Write note on "Risk Management". **05**

- Q.7 a)** Explain with sketch two methods for leachate treatment. **05**

- b)** Draw the Cross section of sanitary land fill and explain components. **04**

- | | | |
|------------|-------------------------------------------------------------------------------------|-----------|
| Q.8 | a) Explain in detail natural and man-made Hazard. | 05 |
| | b) Explain types of Hazardous Waste. | 04 |
| Q.9 | a) Explain in details any one hazard episode. | 05 |
| | b) Explain in brief how you will minimize the damage due to Man-made hazard. | 04 |

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options.

14

- 1) Household hazardous waste includes batteries and _____.
 a) Radioactive waste b) Food waste
 c) Leachate d) Nail polish
- 2) Sanitary landfill may not cause troubles during _____.
 a) Peak summers b) Peak winters
 c) Peak monsoons d) None of these
- 3) Which of the following is anaerobic method of leachate treatment?
 a) Aerated lagoon
 b) Activated Sludge Process
 c) up flow Sludge biological reactor
 d) Trickling filter
- 4) Important aspect in the implementation of sanitary landfills includes _____.
 a) Site Selection
 b) Land filling methods
 c) Movemen and control of land fill and leachate
 d) All the above
- 5) The method of refuse disposal, involving burial in trenches, is called _____.
 a) incineration b) pulverization
 c) composting d) none
- 6) The aerobic method of mechanical composting, as practiced in India, is called the _____.
 a) Bangalore method b) Nagpur method
 c) Bopal method d) Indore method
- 7) Sanitary landfills may cause troubles during _____.
 a) peak summers b) peak winters
 c) peak monsoons d) non
- 8) Leachate is a coloured liquid, that comes out of _____.
 a) septic tanks b) sanitary landfills
 c) compost plants d) aerated lagoons

- 9) Biomedical wastes consist of _____.
a) solid wastes b) liquid wastes
c) both (a) & (b) d) none
- 10) The approximate quantity of biomedical waste generated in Indian hospitals per patient per day approximates to _____.
a) 0.5Kg b) 0.75Kg
c) 1.45kg d) 4.0kg
- 11) Biomedical waste were enacted in India under Environment Protection Act, in the year _____.
a) 1986 b) 1989
c) 1998 d) 2000
- 12) MRF's term in SWM is used for _____.
a) Material Recovery Facilities b) Major Relief Fund
c) Minimum Raw Food d) None of these
- 13) Organic matter, which can be decomposed by bacteria is known as _____.
a) Biodegradable organic matter b) Degradation
c) Eutrophication d) Decomposers
- 14) Substances that emit ionizing radiation are defined as _____.
a) Hazardous wastes b) Biological wastes
c) Flammable wastes d) Radioactive wastes

Solid and Hazardous Waste Management (BTN01618)

Day & Date: Monday, 27-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:**
- 1) Question no. 2 is compulsory in section I, and solve any two questions from the remaining. (Q. No. 3, 4 & 5)
 - 2) Question no. 6 is compulsory in section II, and solve any two questions from the remaining. (Q. No. 7, 8 & 9)
 - 3) Figures to the right indicate full marks.
 - 4) Assume suitable data wherever needed and mention it clearly.

Section – I

- Q.2 a)** Estimate the moisture content of solid waste sample of 100 kg using the following data. **05**

Sr. No.	Component	% by mass	% by M.C.
1	Food waste	16	65
2	Paper	36	08
3	Cardboards	05	05
4	Plastics	10	02
5	Grass	12	55
6	Wood	08	04
7	Metals	13	03

- b)** Explain with sketch impact of solid waste on environment. **05**

- Q.3 a)** Explain the functional elements of municipal solid waste management with flow diagram. **05**

- b)** Explain theory of composting in brief. **04**

- Q.4 a)** Distinguish between Indore method and Bangalore method. **05**

- b)** Explain with sketch Hauled container method of collection of solid waste. **04**

- Q.5 a)** Explain factors affecting composting process. **05**

- b)** Explain different types and sources of solid waste. **04**

Section – II

- Q.6 a)** Define Hazardous waste? State and explain characteristic of hazardous waste. **05**

- b)** Write note on "Risk Management". **05**

- Q.7 a)** Explain with sketch two methods for leachate treatment. **05**

- b)** Draw the Cross section of sanitary land fill and explain components. **04**

- | | | |
|------------|-------------------------------------------------------------------------------------|-----------|
| Q.8 | a) Explain in detail natural and man-made Hazard. | 05 |
| | b) Explain types of Hazardous Waste. | 04 |
| Q.9 | a) Explain in details any one hazard episode. | 05 |
| | b) Explain in brief how you will minimize the damage due to Man-made hazard. | 04 |

- 9) Important aspect in the implementation of sanitary landfills includes _____.
a) Site Selection
b) Land filling methods
c) Movemen and control of land fill and leachate
d) All the above
- 10) The method of refuse disposal, involving burial in trenches, is called _____.
a) incineration
b) pulverization
c) composting
d) none
- 11) The aerobic method of mechanical composting, as practiced in India, is called the _____.
a) Bangalore method
b) Nagpur method
c) Bopal method
d) Indore method
- 12) Sanitary landfills may cause troubles during _____.
a) peak summers
b) peak winters
c) peak monsoons
d) non
- 13) Leachate is a coloured liquid, that comes out of _____.
a) septic tanks
b) sanitary landfills
c) compost plants
d) aerated lagoons
- 14) Biomedical wastes consist of _____.
a) solid wastes
b) liquid wastes
c) both (a) & (b)
d) none

Design of Concrete Structures II (BTN01603)

Day & Date: Wednesday, 29-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) Question no. 2 is compulsory in section I, and solve any two questions from the remaining. (Q. No. 3, 4 & 5)
2) Question no. 6 is compulsory in section II, and solve any two questions from the remaining. (Q. No. 7, 8 & 9)
3) Use of IS 456, IS 1343 and IS 3370 part IV and non-programmable calculator is allowed.
4) Draw neat sketches where required and assume suitable data if required and state it clearly.

Section – I

- Q.2** Design an open well type stair for a Hospital building using the following data; **08**
Floor to floor height is = 3.15 m, No. of flights per floor = 3, size of steps = 150 mm riser and 300 mm tread. Landing are supported all around by walls and by beams of width 230 mm at floor levels, thickness of wall is 230 mm. Use M20 concrete and Fe415 steel.
- Q.3** Design a rectangular footing for column axially loaded of size 400 mm × 500 mm carrying 1280kN load. The SBC of soil is 190kN/m². Use M20 concrete and Fe500 steel. Sketch the details of reinforcement. **10**
- Q.4** Design the stem slab of a counter fort retaining wall, if the height of wall above the ground level is 6.5 m. SBC of soil is 200 kN/m², angle of internal friction is 30° and unit weight of back fill soil 20 kN/m². Keep spacing of counter fort as 3.5 m. Coefficient of friction between soil and concrete is 0.5. Use M20 concrete and Fe415 steel. **10**
- Q.5** Design a circular water tank resting on firm ground is fixed at base and free at top with following details : **10**
Dia. of tank 3.2 m, depth of water 3.0 m, the wall and base are not monolithic with each other, specific weight of water 9810 N/m³. Use M25 concrete and Fe500 steel. Assume free board of 250 mm and solve by IS code method.

Section – II

- Q.6** A beam of symmetrical I section spanning 8m has a flange width of 200mm & flange thickness of 60mm respectively. The overall depth of beam is 400mm, Thickness of web is 80mm. the beam is prestressed by a parabolic cable with eccentricity of 125mm at the center & zero at support with an effective force of 110kN. The live load on beam is 2000N/m. Draw the stress distribution diagram at the mid span section for the following condition **08**
1) Press stress with self-weight
2) Press stress with self-weight & live load

- Q.7** A pretensioned concrete beam of 250 mm × 380 mm is provided with 10 m span. The beam is prestressed by steel wires of area 350 mm² provided at a uniform eccentricity of 60 mm with an initial prestress of 1200 N/mm². Determine the percentage loss of stress in the wires. $E_s = 2.1 \times 10^5$ N/mm², $E_c = 3.5 \times 10^5$ N/mm², Ultimate creep strain = 45×10^{-6} mm/mm per N/mm². Shrinkage of concrete = 300×10^{-6} Relaxation loss percentage = 5%. **10**
- Q.8** Design PSC I section beam for the following span=14m, superimposed load of 32 kN/m, cube strength of concrete at 28 days is 35kN/m², safe stress in concrete at transfer= 0.45 fck, allowable tensile stress in concrete is $0.129\sqrt{(fck)}$, safe stress in steel is 60 % of ultimate stress, total loss of stress 18%, ultimate stress in steel 1420 MPa. **10**
- Q.9** A PSC beam 250 mm × 600 mm is subjected to an effective prestressing force of 1400 kN along the longitudinal centroidal axis. Design the end block by Guyon's method. **10**

Design of Concrete Structures II (BTN01603)

Day & Date: Wednesday, 29-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book page no 03 (Starting page of the Answer Book).
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) While solving MCQ, IS 456-2000, IS 3370 and IS 1343 are not allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

- Q.1 Choose the correct alternatives from the options. 14**
- 1) Which of retaining wall is suitable for height beyond 6 m? 01
 - a) L-Shape wall
 - b) T-Shape wall
 - c) Counterfort type
 - d) All of above
 - 2) The prestress loss of prestress due to anchorage slip of 3mm in concrete beam of length of 30m which is post-tensioned by a tendon with an initial stress of 1200 N/mm² and modulus of elasticity equal to 2.1×10^5 N/mm² is _____. 01
 - a) 0.0175
 - b) 0.175
 - c) 1.75
 - d) 17.5
 - 3) 'P' is the pre-stressed force applied to tendon of a rectangular pre-stressed beam whose area of cross section is (A) and sectional modulus is (Z). The minimum stress on the beam subjected to a maximum bending moment is _____. 01
 - a) $f = (P/A) - (Z/M)$
 - b) $f = (A/P) - (M/Z)$
 - c) $f = (P/A) - (M/Z)$
 - d) $f = (P/A) - (M/6Z)$
 - 4) The loss of stress due to curvature effect depends upon _____. 01
 - a) Alignment
 - b) Midpoint
 - c) Centerline
 - d) Exterior point
 - 5) The loss of prestress due to elastic shortening of concrete is least in _____. 01
 - a) One wire pre-tensioned beam
 - b) One wire post-tensioned beam
 - c) Multiple wire pre-tensioned beam with sequential cutting of wire
 - d) Multiple wire post-tensioned beam subjected to sequential prestressing
 - 6) A pressed concrete rectangular beam size 300mm × 900mm is prestressed with an initial 350mm at midspan. Stress at bottom beam section due to prestress alone in N/mm² _____. 02
 - a) -3.46(tension)
 - b) 2.59(compression)
 - c) Zero
 - d) 8.64(compression)

- 7) The horizontal portion of a step in a stairs case, is known as _____. 01
a) Rise b) Tread
c) Winder d) Flight
- 8) In stair case design find weight of waist slab per meter run if thickness of slab is 280mm, Riser of 125mm and tread of 275mm and unit weight of concrete is 2500kg/m^3 _____. 02
a) 7.69 kN/m b) 12.52 kN/m
c) 8.57 kN/m d) 8.73 kN/m
- 9) An RC square footing of side length 2m & uniform effective depth 200mm is provided for a $300\text{mm} \times 300\text{mm}$ column. The line of action of the vertical compressive load passes through the centroid of the footing as well as of the column. If the magnitude of the load is 320kN, the nominal transverse (one way) shear stress in the footing is _____. 02
a) 0.30N/mm^2 b) 0.34N/mm^2
c) 0.75N/mm^2 d) 0.26N/mm^2
- 10) In design of isolated footing critical section of one way shear is at a distance _____. 01
a) 'd' distance from the face of the column
b) 'd/2' distance from the face of the column
c) 'd/4' distance from the face of the column
d) at the face of the column
- 11) If W is weight of a retaining wall and P is the horizontal earth pressure, the factor of safety against sliding, is _____. 01
a) 1 b) 1.5
c) 1.25 d) 2

Section – I

- Q.2** Design an open well type stair for a Hospital building using the following data; **08**
Floor to floor height is = 3.15 m, No. of flights per floor = 3, size of steps = 150 mm riser and 300 mm tread. Landing are supported all around by walls and by beams of width 230 mm at floor levels, thickness of wall is 230 mm. Use M20 concrete and Fe415 steel.
- Q.3** Design a rectangular footing for column axially loaded of size 400 mm × 500 mm carrying 1280kN load. The SBC of soil is 190kN/m². Use M20 concrete and Fe500 steel. Sketch the details of reinforcement. **10**
- Q.4** Design the stem slab of a counter fort retaining wall, if the height of wall above the ground level is 6.5 m. SBC of soil is 200 kN/m², angle of internal friction is 30° and unit weight of back fill soil 20 kN/m². Keep spacing of counter fort as 3.5 m. Coefficient of friction between soil and concrete is 0.5. Use M20 concrete and Fe415 steel. **10**
- Q.5** Design a circular water tank resting on firm ground is fixed at base and free at top with following details : **10**
Dia. of tank 3.2 m, depth of water 3.0 m, the wall and base are not monolithic with each other, specific weight of water 9810 N/m³. Use M25 concrete and Fe500 steel. Assume free board of 250 mm and solve by IS code method.

Section – II

- Q.6** A beam of symmetrical I section spanning 8m has a flange width of 200mm & flange thickness of 60mm respectively. The overall depth of beam is 400mm, Thickness of web is 80mm. the beam is prestressed by a parabolic cable with eccentricity of 125mm at the center & zero at support with an effective force of 110kN. The live load on beam is 2000N/m. Draw the stress distribution diagram at the mid span section for the following condition **08**
- 1) Press stress with self-weight
 - 2) Press stress with self-weight & live load

- Q.7** A pretensioned concrete beam of 250 mm × 380 mm is provided with 10 m span. The beam is prestressed by steel wires of area 350 mm² provided at a uniform eccentricity of 60 mm with an initial prestress of 1200 N/mm². Determine the percentage loss of stress in the wires. $E_s = 2.1 \times 10^5$ N/mm², $E_c = 3.5 \times 10^5$ N/mm², Ultimate creep strain = 45×10^{-6} mm/mm per N/mm². Shrinkage of concrete = 300×10^{-6} Relaxation loss percentage = 5%. **10**
- Q.8** Design PSC I section beam for the following span=14m, superimposed load of 32 kN/m, cube strength of concrete at 28 days is 35kN/m², safe stress in concrete at transfer= 0.45 fck, allowable tensile stress in concrete is $0.129\sqrt{(fck)}$, safe stress in steel is 60 % of ultimate stress, total loss of stress 18%, ultimate stress in steel 1420 MPa. **10**
- Q.9** A PSC beam 250 mm × 600 mm is subjected to an effective prestressing force of 1400 kN along the longitudinal centroidal axis. Design the end block by Guyon's method. **10**

**T.Y. (B.Tech.) (Sem-II) (New) (CBCS) Examination: March/April-2024
CIVIL ENGINEERING**

Principles of Management and Quantitative Techniques (BTN01604)

Day & Date: Friday, 31-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to mention question paper set (P/Q/R/S) on top of page.
3) Assume suitable data wherever necessary & mention it clearly.
4) Use of Non-Programmable calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct option from the following. 14

- 1) _____ is the process of taking the necessary preventive and corrective action to ensure that organizational objectives are achieved as effectively as possible.

a) Planning	b) Staffing
c) Controlling	d) Directing
- 2) MBO means _____.

a) Management by objective	b) Manager Behavioural Organisation
c) Management By Order	d) None
- 3) Graphical method to solve linear programming problem is commonly used if _____.

a) no. of decision variables is two	b) no. of decision variables is three
c) no. of decision variables is four	d) no. of decision variables is one
- 4) Dual of the Dual is _____.

a) Primal	b) Dual
c) Zero	d) Infinity
- 5) The top most row in the simplex matrix is called _____.

a) variable row	b) objective row
c) constraint row	d) none
- 6) Games without a saddle point require players to play _____.

a) Pure strategy	b) Mixed strategy
c) Market strategy	d) None
- 7) Game theory models are classified by the _____.

a) number of players	b) sum of all payoffs
c) number of strategies	d) all of the above
- 8) Lean construction includes _____.

a) Adding value added things	b) removing non value added things
c) minimizing the waste	d) all of the above

Principles of Management and Quantitative Techniques (BTN01604)

Day & Date: Friday, 31-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicates full marks.
3) Assume suitable data wherever necessary & mention it clearly.
4) Use of Non-Programmable calculator is allowed.

Section – I

Q.2 Solve any three of following.

24

- a) Write a short note on
i) Centralization and Decentralization in management
ii) Explain Process of planning
- b) Obtain the initial basic feasible solution of a transportation problem whose cost and requirement table is as below, solve by North west corner Method.

Origin / Destination	D1	D2	D3	Supply
O1	2	7	4	5
O2	3	3	1	8
O3	5	4	7	7
O4	1	6	2	14
Demand	7	9	18	

- c) Solve the Assignment problem by using Assignment (Hungarian Method), Assign the jobs for different machines so as to minimize the total cost.

Job	Machine			
	A	B	C	D
1	8	26	17	11
2	13	28	4	26
3	38	19	18	15
4	19	26	24	10

- d) Solve by,
i) Hurwicz criterion Assume $A=0.8$
ii) Laplace Criterion

ALTERNATIVES	STATE OF NATURE (PRODUCT DEMAND)			
	HIGH	MODERATE	LOW	NIL
EXPAND	50,000	25,000	-25,000	-45,000
CONSTRUCT	70,000	30,000	-40,000	-80,000
SUBCONTRACT	30,000	15,000	-1,000	-10,000

- e) Solve the following.
i) Importance of Lean Construction.
ii) Why is there a need for Productivity measurement and Improvement?

Q.3 Write any one of the following.

- Explain Functions of Management that make the management process.
- Write a short note on Games Theory

Section – II

Q.4 Solve any three of following.

- a) Find The A Class, B Class And C Class Material, for following draw the Graph.

Item Number	Annual Consumption in unit	Unit Price in Paise
501	30000	10
502	280000	15
503	3000	10
504	110000	5
505	4000	5
506	220000	10
507	15000	5
508	80000	5
509	60000	15
510	8000	10

- Write a short Note on.
 - EOQ
 - Safety Stock
- Write a short note on Construction ERP and safety measures in ERP.
- A company manufactures screws to a nominal diameter $0.500 \pm 0.030\text{cm}$. Five samples were taken randomly from a manufactured lot and three measurements were taken for each sample at different lengths. The reading table is as below Calculate the control limits on \bar{x} chart and Draw \bar{x} chart.
Assume $n = 3, A2 = 1.02, D4 = 2.57, D3 = 0$

Sample no	Measurements per sample cm (x)		
	1	2	3
1	0.488	0.489	0.505
2	0.494	0.495	0.499
3	0.498	0.515	0.487
4	0.492	0.509	0.514
5	0.490	0.508	0.499

- Write a short note on Control charts (\bar{x}, R, p, c) in statistical quality control.

Q.5 Write a short note on any one of following.

- Break even analysis
- Inventory control

Seat No.

- 1) Lean construction includes _____.
 - a) Adding value added things
 - b) removing non value added things
 - c) minimizing the waste
 - d) all of the above
- 2) The cost of keeping items in inventory is called _____.
 - a) Set up cost
 - b) Holding cost
 - c) Finished cost
 - d) None of these
- 3) _____ stock is the lower limit of stock below which the stock should not be allowed to fall.
 - a) Maximum
 - b) Average
 - c) Safety
 - d) Standard
- 4) Average chart & range chart are for _____.
 - a) Attributes
 - b) Variables
 - c) Both
 - d) None
- 5) Sampling is the process of determining the quality of a _____.
 - a) Large group from a small part
 - b) Small part from a large group
 - c) Small group from a small part
 - d) Small group at random
- 6) An enterprise is a group of people with _____.
 - a) common goal
 - b) separate goal for each department
 - c) multiple goals
 - d) two or more goals
- 7) _____ is a key issue in the formation of strategic plans in companies.
 - a) Computerized
 - b) Quantity
 - c) Quality
 - d) Flexibility

T.Y. (B.Tech.) (Sem-II) (New) (CBCS) Examination: March/April – 2024
CIVIL ENGINEERING
Railway, Airport & Harbour Engineering (BTN01605)

Day & Date: Monday, 03-06-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.
 4) Assume any missing data suitably and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct option from the following.

14

- 1) Bearing plates are used to fix _____.
 - a) flat footed rails to the wooden sleepers
 - b) double headed rails to the wooden sleepers
 - c) bull headed rails to the wooden sleepers
 - d) flat footed rails to the cast iron sleepers
- 2) Coning of wheels _____.
 - a) prevent lateral movement of wheels
 - b) provide smooth running of trains
 - c) avoid excessive wear of inner faces of rail
 - d) all the above
- 3) A scissors cross over consists of one diamond and _____.

a) One turn out	b) Two turn outs
c) Three turn outs	d) Four turn outs
- 4) Which of the following is not a component of the rail?

a) Ballast	b) Foot
c) Web	d) Head
- 5) The standard length of rail of BG and MG track is _____.

a) 13 & 12 m	b) 12 & 12 m
c) 12 & 13 m	d) none of above
- 6) The gradient on which an additional engine is required to negotiate the gradient, is called _____.

a) Momentum gradient	b) Pusher gradient
c) Ruling gradient	d) Steep gradient
- 7) Which of the following is the most used ballast on Indian railways?

a) Coal ash ballast	b) Brickbat ballast
c) Broken stone ballast	d) Sand ballast

Seat No.

**T.Y. (B.Tech.) (Sem-II) (New) (CBCS) Examination: March/April – 2024
CIVIL ENGINEERING**

Railway, Airport & Harbour Engineering (BTN01605)

Day & Date: Monday, 03-06-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:**
- 1) In Section-I, Q.No.2 is compulsory and solve any TWO questions from remaining questions (Q. No. 3, 4 & 5).
 - 2) In Section-II, Q.No.6 is compulsory and solve any TWO questions from remaining questions (Q. No. 7,8 & 9).
 - 3) Figures to the right indicates full marks.
 - 4) Assume suitable data wherever needed & mention it clearly.

Section – I

- Q.2 Answer any two questions. 08**
- a) Explain different types of gauges on railway track.
 - b) Explain creep of rail and factors affecting on creep of rail.
 - c) Explain Advantages and disadvantages of coning of wheel.
- Q.3 Answer any two questions. 10**
- a) A train having 20 wagons weighing 18 tonnes each is to run at a speed of 50 kmph. The tractive effort of 2-8-2 locomotives with 22.5 tonnes load on each driving axle is 15 tonnes. The weight of locomotives is 120 tonnes rolling resistance of wagons and locomotives are 2.5kg/tonne and 3.5 kg/tone. The resistance which depends on speed is 2.65 tonnes. Find out steepest gradient for this condition. Coefficient of friction is 1/6.
 - b) Define permanent way with neat sketch. Explain each component of permanent way.
 - c) Explain the Different types of modes of transportation in detail.
- Q.4 Answer any two questions. 10**
- a) Explain various methods and steps for the construction and maintenance of railway track.
 - b) Explain detailed note on mono rail and metro rail.
 - c) What is the need of providing super elevation on curves of railway tracks?
 - d) Write a short note on Modern Indian Railways.
- Q.5 Answer any two questions. 10**
- a) What are the essential features of semaphore signal? Explain the working of semaphore signal in detail with sketch.
 - b) What are objectives of interlocking and also explain the different methods of interlocking.
 - c) Explain the cant, negative cant, cant deficiency and cant excess.

Section – II

- Q.6 Answer any two questions. 08**
- a) Calculate the actual length of the runway from the following data Airport elevation: R. L.100 Airport reference temperature: 28°C, Basic length of runway 600 m, Highest point along the length: R.L 98.2 Lowest point along the length R.L.95.2, Check the total correction for elevation plus temperature as per ICAO.
 - b) Draw cross-section of Airport showing all component parts and explain it in detail.
 - c) Explain site selection criteria for airport engineering.
- Q.7 Answer any two questions. 10**
- a) A taxiway is to be designed for operating an aircraft which has following characteristics.
Determine turning radius of taxiway
 - i) Wheel base-17.70 m
 - ii) Tread of main loading gear-6.62 m
 - iii) Turning speed-40kmph
 - iv) Coefficient of friction between tyre and pavement surface-0.13 and width of taxiway-22.5m.
 - b) The data for the hottest month of year is the year of maximum daily temperature is 43.72°C and mean of average daily temperature is 20.32°C then what is the airport reference temperature?
 - c) Write a note on Runway configuration with its types.
- Q.8 Answer any two questions. 10**
- a) Write short note on different types of break water with neat sketches.
 - b) What are the factors to be considered while selecting site for harbor?
 - c) What are fenders? Why are they used? Describe various types of fenders with sketches.
 - d) Write a note on Geometric design of taxiway.
- Q.9 Answer any two questions. 10**
- a) Explain in detail the classification of Harbor.
 - b) Write a note on Geometric design of taxiway.
 - c) Explain terms
 - i) Jetties
 - ii) Quays
 - iii) Tides
 - iv) Port

3) Figures to the right indicates full marks.
4) Assume any missing data suitably and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct option from the following. 14

- 1) As per ICAO recommendation, minimum width of safety area for instrumental runway should be _____.

a) 78 m	b) 150 m
c) 300 m	d) 450 m

- 2) As per ICAO, for A, B, and C type of airports, maximum effective, transverse and longitudinal grades in percentage respectively are _____.

a) 1.0, 1.5 and 1.5	b) 1.0, 1.5 and 2.0
c) 1.5, 1.5 and 2.0	d) 2.0, 2.0 and 2.0

- 3) As per ICAO recommendation, the rate of change of longitudinal gradient per 30 m length of vertical curve for A and B type of airports is limited to a maximum of _____.

a) 0.1%	b) 0.2%
c) 0.3%	d) 0.4%

- 4) Assertion A: The ratio of arriving and departing aircrafts influences the airport capacity: Reason R: Landing operation is generally given priority over the taking off operation. Select your answer based on the coding system given below: _____.

a) Both A and R are true and R is the correct explanation of A
b) Both A and R are true and R is not the correct explanation of A
c) A is true but R is false
d) A is false but R is true

- 5) Assertion A: Depth and width required at the entrance to a harbour are more than those required in the channel. Reason R: The entrance to a harbour is usually more exposed to waves as compared to the harbour itself. Select your answer based on the coding system given below: _____.

a) Both A and R are true and R is the correct explanation of A
b) Both A and R are true and R is not the correct explanation of A
c) A is true but R is false
d) A is false but R is true

 4) Assume any missing data suitably and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct option from the following. 14

- 1) Assertion A: The ratio of arriving and departing aircrafts influences the airport capacity: Reason R: Landing operation is generally given priority over the taking off operation. Select your answer based on the coding system given below: _____.
 - a) Both A and R are true and R is the correct explanation of A
 - b) Both A and R are true and R is not the correct explanation of A
 - c) A is true but R is false
 - d) A is false but R is true

- 2) Assertion A: Depth and width required at the entrance to a harbour are more than those required in the channel. Reason R: The entrance to a harbour is usually more exposed to waves as compared to the harbour itself. Select your answer based on the coding system given below: _____.
 - a) Both A and R are true and R is the correct explanation of A
 - b) Both A and R are true and R is not the correct explanation of A
 - c) A is true but R is false
 - d) A is false but R is true

- 3) When a ship floats at its designed water line, the vertical distance from water line to the bottom of the ship is known as _____.
 - a) beam
 - b) depth
 - c) freeboard
 - d) draft

- 4) The maximum harbour depth below lowest low water is generally equal to _____.
 - i) loaded draft + 1.2 m when bottom is rock
 - ii) loaded draft + 1.8 m when bottom is soft
 - iii) loaded draft + 1.2 m when bottom is soft
 - iv) loaded draft + 1.8 m
 when bottom is rock of these statements
 - a) (i) and (ii) are correct
 - b) (i) and (iii) are correct
 - c) (ii) and (iv) are correct
 - d) (iii) and (iv) are correct

- 5) Bearing plates are used to fix _____.
- flat footed rails to the wooden sleepers
 - double headed rails to the wooden sleepers
 - bull headed rails to the wooden sleepers
 - flat footed rails to the cast iron sleepers
- 6) Coning of wheels _____.
- prevent lateral movement of wheels
 - provide smooth running of trains
 - avoid excessive wear of inner faces of rail
 - all the above
- 7) A scissors cross over consists of one diamond and _____.
- One turn out
 - Two turn outs
 - Three turn outs
 - Four turn outs
- 8) Which of the following is not a component of the rail?
- Ballast
 - Foot
 - Web
 - Head
- 9) The standard length of rail of BG and MG track is _____.
- 13 & 12 m
 - 12 & 12 m
 - 12 & 13 m
 - none of above
- 10) The gradient on which an additional engine is required to negotiate the gradient, is called _____.
- Momentum gradient
 - Pusher gradient
 - Ruling gradient
 - Steep gradient
- 11) Which of the following is the most used ballast on Indian railways?
- Coal ash ballast
 - Brickbat ballast
 - Broken stone ballast
 - Sand ballast
- 12) As per ICAO recommendation, minimum width of safety area for instrumental runway should be _____.
- 78 m
 - 150 m
 - 300 m
 - 450 m
- 13) As per ICAO, for A, B, and C type of airports, maximum effective, transverse and longitudinal grades in percentage respectively are _____.
- 1.0, 1.5 and 1.5
 - 1.0, 1.5 and 2.0
 - 1.5, 1.5 and 2.0
 - 2.0, 2.0 and 2.0
- 14) As per ICAO recommendation, the rate of change of longitudinal gradient per 30 m length of vertical curve for A and B type of airports is limited to a maximum of _____.
- 0.1%
 - 0.2%
 - 0.3%
 - 0.4%

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct option from the following. 14

- 1) The gradient on which an additional engine is required to negotiate the gradient, is called _____.

a) Momentum gradient	b) Pusher gradient
c) Ruling gradient	d) Steep gradient
- 2) Which of the following is the most used ballast on Indian railways?

a) Coal ash ballast	b) Brickbat ballast
c) Broken stone ballast	d) Sand ballast
- 3) As per ICAO recommendation, minimum width of safety area for instrumental runway should be _____.

a) 78 m	b) 150 m
c) 300 m	d) 450 m
- 4) As per ICAO, for A, B, and C type of airports, maximum effective, transverse and longitudinal grades in percentage respectively are _____.

a) 1.0, 1.5 and 1.5	b) 1.0, 1.5 and 2.0
c) 1.5, 1.5 and 2.0	d) 2.0, 2.0 and 2.0
- 5) As per ICAO recommendation, the rate of change of longitudinal gradient per 30 m length of vertical curve for A and B type of airports is limited to a maximum of _____.

a) 0.1%	b) 0.2%
c) 0.3%	d) 0.4%
- 6) Assertion A: The ratio of arriving and departing aircrafts influences the airport capacity: Reason R: Landing operation is generally given priority over the taking off operation. Select your answer based on the coding system given below: _____.

a) Both A and R are true and R is the correct explanation of A
b) Both A and R are true and R is not the correct explanation of A
c) A is true but R is false
d) A is false but R is true

- 7) Assertion A: Depth and width required at the entrance to a harbour are more than those required in the channel. Reason R: The entrance to a harbour is usually more exposed to waves as compared to the harbour itself. Select your answer based on the coding system given below: _____.
- Both A and R are true and R is the correct explanation of A
 - Both A and R are true and R is not the correct explanation of A
 - A is true but R is false
 - A is false but R is true
- 8) When a ship floats at its designed water line, the vertical distance from water line to the bottom of the ship is known as _____.
- beam
 - depth
 - freeboard
 - draft
- 9) The maximum harbour depth below lowest low water is generally equal to _____.
 i) loaded draft + 1.2 m when bottom is rock
 ii) loaded draft + 1.8 m when bottom is soft
 iii) loaded draft + 1.2 m when bottom is soft
 iv) loaded draft + 1.8 m
 when bottom is rock of these statements
- (i) and (ii) are correct
 - (i) and (iii) are correct
 - (ii) and (iv) are correct
 - (iii) and (iv) are correct
- 10) Bearing plates are used to fix _____.
- flat footed rails to the wooden sleepers
 - double headed rails to the wooden sleepers
 - bull headed rails to the wooden sleepers
 - flat footed rails to the cast iron sleepers
- 11) Coning of wheels _____.
- prevent lateral movement of wheels
 - provide smooth running of trains
 - avoid excessive wear of inner faces of rail
 - all the above
- 12) A scissors cross over consists of one diamond and _____.
- One turn out

Railway, Airport & Harbour Engineering (BTN01605)

Day & Date: Monday, 03-06-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:**
- 1) In Section-I, Q.No.2 is compulsory and solve any TWO questions from remaining questions (Q. No. 3, 4 & 5).
 - 2) In Section-II, Q.No.6 is compulsory and solve any TWO questions from remaining questions (Q. No. 7,8 & 9).
 - 3) Figures to the right indicates full marks.
 - 4) Assume suitable data wherever needed & mention it clearly.

Section – I

- Q.2 Answer any two questions. 08**
- a) Explain different types of gauges on railway track.
 - b) Explain creep of rail and factors affecting on creep of rail.
 - c) Explain Advantages and disadvantages of coning of wheel.
- Q.3 Answer any two questions. 10**
- a) A train having 20 wagons weighing 18 tonnes each is to run at a speed of 50 kmph. The tractive effort of 2-8-2 locomotives with 22.5 tonnes load on each driving axle is 15 tonnes. The weight of locomotives is 120 tonnes rolling resistance of wagons and locomotives are 2.5kg/tonne and 3.5 kg/tone. The resistance which depends on speed is 2.65 tonnes. Find out steepest gradient for this condition. Coefficient of friction is 1/6.
 - b) Define permanent way with neat sketch. Explain each component of permanent way.
 - c) Explain the Different types of modes of transportation in detail.
- Q.4 Answer any two questions. 10**
- a) Explain various methods and steps for the construction and maintenance of railway track.
 - b) Explain detailed note on mono rail and metro rail.
 - c) What is the need of providing super elevation on curves of railway tracks?
 - d) Write a short note on Modern Indian Railways.
- Q.5 Answer any two questions. 10**
- a) What are the essential features of semaphore signal? Explain the working of semaphore signal in detail with sketch.
 - b) What are objectives of interlocking and also explain the different methods of interlocking.
 - c) Explain the cant, negative cant, cant deficiency and cant excess.

Section – II

- Q.6 Answer any two questions. 08**
- Calculate the actual length of the runway from the following data Airport elevation: R. L.100 Airport reference temperature: 28°C, Basic length of runway 600 m, Highest point along the length: R.L 98.2 Lowest point along the length R.L.95.2, Check the total correction for elevation plus temperature as per ICAO.
 - Draw cross-section of Airport showing all component parts and explain it in detail.
 - Explain site selection criteria for airport engineering.
- Q.7 Answer any two questions. 10**
- A taxiway is to be designed for operating an aircraft which has following characteristics.
Determine turning radius of taxiway
 - Wheel base-17.70 m
 - Tread of main loading gear-6.62 m
 - Turning speed-40kmph
 - Coefficient of friction between tyre and pavement surface-0.13 and width of taxiway-22.5m.
 - The data for the hottest month of year is the year of maximum daily temperature is 43.72°C and mean of average daily temperature is 20.32°C then what is the airport reference temperature?
 - Write a note on Runway configuration with its types.
- Q.8 Answer any two questions. 10**
- Write short note on different types of break water with neat sketches.
 - What are the factors to be considered while selecting site for harbor?
 - What are fenders? Why are they used? Describe various types of fenders with sketches.
 - Write a note on Geometric design of taxiway.
- Q.9 Answer any two questions. 10**
- Explain in detail the classification of Harbor.

Disaster Preparedness and Response (BTN01620)

Day & Date: Wednesday, 05-06-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 Each question carries one mark.
2) Answer MCQ/Objective type question on page No. 3only. Don't forgot to mention, Q.P. set (P/Q/R/S) on Top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options. **14**

- 1) The cycle of disaster consists of the following components _____.
 - a) Mitigation, Preparedness, Response, Recovery
 - b) Preparedness, vulnerability assessment, risk assessment, recovery
 - c) Mitigation, Risk assessment, Response and Recovery
 - d) None of the above
- 2) Effective hazard management largely rely on _____.
 - a) Emergency responses
 - b) Govt. agencies
 - c) Volcanoes
 - d) Pre-disaster planning
- 3) The Disaster Management Act was made in _____.
 - a) 2003
 - b) 2005
 - c) 2006
 - d) 2009
- 4) The level of harm by a hazard is governed by _____.
 - a) Frequency of the hazard
 - b) Intensity at the impact point
 - c) Magnitude of the hazard
 - d) All of the above
- 5) How many types of Hazards are there _____.
 - a) 1
 - b) 2
 - c) 4
 - d) 5
- 6) Volcanic eruption are closely associated with _____.
 - a) Mountain building and fracturing
 - b) Deforestation
 - c) Landslides
 - d) Heat budget
- 7) Structural and Non-structural measures are elements of high category of Risk Reduction measures _____.
 - a) Socio-economic measures
 - b) Physical measures
 - c) Environmental measures
 - d) Post disaster measures
- 8) How many steps are there in the disaster recovery process?
 - a) 7
 - b) 4
 - c) 8
 - d) 5

- 9) Which one of the following is not a Natural Disaster?
a) Volcano eruption b) Flood
c) Blow-out d) Tsunami
- 10) Which one of the following is the nodal ministry at the center for coordinating disaster management activities for all-natural disasters except drought?
a) ministry of agricultural b) ministry of home affairs
c) ministry of civil aviation d) ministry of health and family welfare
- 11) Which of the following is NOT a phase of emergency management?
a) Resource b) Mitigation
c) Response d) Recovery
- 12) Find out the main objectives of the search and rescue team from the following.
I) rescue the survivors trapped under debris
II) provide first-aid service to the trapped survivors
III) hand over, recover and dispose of the deceased bodies
IV) listen to all sources of information
a) I, II and IV b) I, III and IV
c) II, III and IV d) I, II and III
- 13) Who among the following is the first to respond when a disaster strikes?
a) N.G.O b) local administration
c) affected community members d) local community members
- 14) Who among the following is the most affected during the famine?
a) Bank workers b) Doctors
c) Traders d) Workers

Disaster Preparedness and Response (BTN01620)

Day & Date: Wednesday, 05-06-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

Instructions: 1) Solve any two questions from each section.
2) Figures to the right indicate full marks.

Section – I

- Q.2** a) Define disaster preparedness and explain disaster preparedness measures. **07**
b) Write a short note on disaster preparedness with special needs. **07**
- Q.3** a) Explain concept and significance of disaster preparedness plan. **07**
b) Explain basic essentials of disaster preparedness plan. **07**
- Q.4** a) Explain the role of government in disaster preparedness. **07**
b) Explain the role of education and communication in disaster preparedness. **07**

Section – II

- Q.5** a) Explain food and essential commodity in disaster response. **07**
b) Explain financial, medical and equipment resources in disaster response. **07**
- Q.6** a) Explain communication and participation in disaster response. **07**
b) Explain search, rescue and activation of emergency preparedness plan. **07**
- Q.7** a) Explain reporting and information in disasters response. **07**
b) Explain media and importance of role of media in disasters. **07**

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options.

14

- 1) How many steps are there in the disaster recovery process?

a) 7	b) 4
c) 8	d) 5

- 2) Which one of the following is not a Natural Disaster?

a) Volcano eruption	b) Flood
c) Blow-out	d) Tsunami

- 3) Which one of the following is the nodal ministry at the center for coordinating disaster management activities for all-natural disasters except drought?

a) ministry of agricultural	b) ministry of home affairs
c) ministry of civil aviation	d) ministry of health and family welfare

- 4) Which of the following is NOT a phase of emergency management?

a) Resource	b) Mitigation
c) Response	d) Recovery

- 5) Find out the main objectives of the search and rescue team from the following.

I) rescue the survivors trapped under debris	
II) provide first-aid service to the trapped survivors	
III) hand over, recover and dispose of the deceased bodies	
IV) listen to all sources of information	
a) I, II and IV	b) I, III and IV
c) II, III and IV	d) I, II and III

- 6) Who among the following is the first to respond when a disaster strikes?

a) N.G.O	b) local administration
c) affected community members	d) local community members

- 7) Who among the following is the most affected during the famine?

a) Bank workers	b) Doctors

Roads and Highway Project Development (BTN01621)

Day & Date: Wednesday, 05-06-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figure to the right indicate full marks.

Section – I

- Q.2 Answer any three. 24**
- a) How the GIS is used for Highway Projects from planning stage to construction stage?
 - b) Write down the salient features of ongoing road projects in India
 - c) Design the rate of superelevation for a horizontal highway curve of radius 500 metre and design speed 100 kmph.
 - d) How the traffic surveys & Traffic forecasting are required for assessing roadway requirements?
 - e) What is importance of 'Highway Drainage'? Elaborate its different types.
- Q.3 Write a short note on any one. 04**
- a) Street Lighting
 - b) Origin- destination characteristics and studies

Section – II

- Q.4 Answer any three. 24**
- a) Write a Tender evaluation process in detail regarding Highway Projects.
 - b) What is EIA? Explain stepwise procedure for its assessment?
 - c) Explain stepwise procedure for construction of rigid pavement road.
 - d) Elaborate 'implementation of environment management plan'.
 - e) Make note on 'Different layers of flexible pavement' with figure.
- Q.5 Write a short note on any one. 04**
- a) BOQ
 - b) Preparation of tender documents

Roads and Highway Project Development (BTN01621)

Day & Date: Wednesday, 05-06-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose correct alternative (One mark each)

14

- 1) Which of the following is included in the road project survey report?
 - a) Location
 - b) Terrain
 - c) Windspeed
 - d) Slope
- 2) The most raised portion of the pavement is called _____.
 - a) Angle of Banking
 - b) Widening
 - c) Crown
 - d) Shoulder
- 3) The extra width of pavement is provided on _____.
 - a) Horizontal Curve
 - b) Summit Curve
 - c) Vertical Curve
 - d) Valley Curve
- 4) The main purpose of providing camber is _____.
 - a) To drain off rain water
 - b) Skid resistance
 - c) To maintain Equilibrium
 - d) Geometric design purpose
- 5) What is essential in an EIA?
 - a) that it allows decision makers to assess a project's impacts in all its phase
 - b) that it allows the public and other stakeholders to present their views and inputs on the planned development
 - c) that it contributes to and improve the project design, so that environmental as well as socioeconomic measures are core parts of it
 - d) All of above
- 6) EIA is Study of probable change in socio economic and _____.
 - a) biophysical
 - b) geological
 - c) hydrological
 - d) potential
- 7) EIA is _____ and _____ environmental impactsassessment.
 - a) social and benefit
 - b) social and benefit
 - c) beneficial and adverse
 - d) None of above
- 8) The site amenities are covered under which of the items of DPR.
 - a) Background
 - b) Abstract
 - c) Miscellaneous
 - d) Estimate

Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figure to the right indicate full marks.

Section – I

Q.2 Answer any three. 24

- How the GIS is used for Highway Projects from planning stage to construction stage?
- Write down the salient features of ongoing road projects in India
- Design the rate of superelevation for a horizontal highway curve of radius 500 metre and design speed 100 kmph.
- How the traffic surveys & Traffic forecasting are required for assessing roadway requirements?
- What is importance of 'Highway Drainage'? Elaborate its different types.

Q.3 Write a short note on any one. 04

- Street Lighting
- Origin- destination characteristics and studies

Section – II

Q.4 Answer any three. 24

- Write a Tender evaluation process in detail regarding Highway Projects.
- What is EIA? Explain stepwise procedure for its assessment?
- Explain stepwise procedure for construction of rigid pavement road.
- Elaborate 'implementation of environment management plan'.
- Make note on 'Different layers of flexible pavement' with figure.

Q.5 Write a short note on any one. 04

- BOQ
- Preparation of tender documents

Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer bookpage no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever necessary and mention it clearly.
5) Use of non-programmable calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Multiple Choice Questions

14

- 1) Which of the following is not the pillar of sustainability?
 - a) Economy
 - b) Environment
 - c) Ecology
 - d) Society
- 2) Which of the following elements should be used optimum to make a green building?
 - a) Agni
 - b) Jal
 - c) Prithvi
 - d) All of the above
- 3) Principles of sustainability doesn't include _____.
 - a) Balance & equity
 - b) System thinking
 - c) Spiritual values
 - d) None of these
- 4) Which of the following is not an economic benefit for a green building?
 - a) 20 - 30 % energy used
 - b) 20 - 30 % less water used
 - c) Enhance asset value
 - d) None of these
- 5) Sustainability can't be achieved if _____.
 - a) Different societies work with unique mindset
 - b) Different societies work with different mindsets
 - c) Similar societies work with singular mindset
 - d) Similar societies work with different mindsets
- 6) Which of the following is not the purpose of a green building?
 - a) To reduce use of water
 - b) To minimize damage of the environment
 - c) Re-use of waste materials
 - d) None of the above
- 7) How can sustainable engineering contribute to a circular economy?
 - a) By promoting linear production and consumption practices
 - b) By designing products for reuse, recycling and resource recovery
 - c) By disregarding environmental considerations in engineering decisions
 - d) By prioritizing short term economic gains

- 8) Which of the following is not considered in an LCA?
a) Energy consumption b) Water usage
c) Greenhouse gas emissions d) Aesthetics
- 9) Which of the following green rating systems are currently working in India?
a) LEED b) GRIHA
c) Both a) and b) d) None of the above
- 10) GRIHA has been prepared by _____.
a) USGBC b) TERI
c) LEED d) By own self
- 11) LEED gives rating in form of _____.
a) 1 star, 2 star, 3 star, 4 star, 5 star
b) Platinum, Gold, Silver
c) Both a) and b)
d) None of the above
- 12) The principle of radiator of an engine cooling system is to _____.
a) Increase the air speed as it flows over the hot surface
b) Spread out the hot water over a large area
c) Acts as a reservoir for the water
d) Causes a heat flow by convection currents
- 13) Which of the following accounts for T in the IPAT equation?
a) Time b) Threshold population
c) Technology d) None of the above
- 14) Which of the following is the least energy efficient system?
a) Internal combustion engine b) Fuel cell
c) Incandescent light d) Human body

Sustainable Materials and Green Buildings (BTN01622)

Day & Date: Wednesday, 05-06-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) Question no. 2 is compulsory in section I, and solve any two questions from the remaining.
2) Question no. 6 is compulsory in section II, and solve any two questions from the remaining.
3) Figures to right indicate full marks.
4) Assume suitable data wherever necessary and mention it clearly.
5) Use of non-programmable calculator is allowed.

Section – I

- | | | | |
|------------|----|-------------------------------------------------------------------------------------------------------------------------------------------|-----------|
| Q.2 | a) | Discuss reuse of any five construction materials in detail. | 05 |
| | b) | Explain principles of Sustainability while planning the city of 1 lakh population. | 05 |
| Q.3 | a) | Explain AAC blocks along with merits and demerits in detail. | 05 |
| | b) | Elucidate applications of cement fibre board in green building. | 04 |
| Q.4 | a) | What is sustainability? Explain pillars of sustainability with a neat diagram. Discuss interaction between pillars in the sustainability. | 05 |
| | b) | Define self-weight concrete? Provide minimum three advantages of self-weight concrete in construction of green building. | 04 |
| Q.5 | a) | Explain benefits of Nano technology in cement concrete used in conventional RCC building. | 05 |
| | b) | Define ferrocement Technology? Provide minimum three applications of ferrocement technology in Civil Engineering. | 04 |

Section – II

- | | | | |
|------------|-------------------------------|-----------------------------------------------------------------------------------------|-----------|
| Q.6 | a) | What is GRIHA? Explain various sections allocated in the GRIHA in detail. | 05 |
| | b) | Explain effects of changing seasons on functioning of green buildings. | 05 |
| Q.7 | a) | Explain certification procedure of LEED in detail. | 05 |
| | b) | Discuss numerous applications of sustainable technology in 'Building Stock Management'. | 04 |
| Q.8 | a) | Explain various methods of effective cooling and heating systems in Green Buildings. | 05 |
| | b) | Provide minimum four decentralized water conservation systems in green building. | 04 |
| Q.9 | Discuss the following: | | 09 |
| | a) | 5R's of Green Building | |
| | b) | Low energy materials | |
| | c) | Structure of green building | |

Engineering System Design Optimization (BTN01623)

Day & Date: Wednesday, 05-06-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options and rewrite the sentence. 14

- 1) Which of the following is not method for multi-objective optimization?
 - a) Fibonacci Search Method
 - b) Unidirectional Search Method
 - c) Direct Search Method
 - d) Newton's Method
- 2) A unidirectional search is required in the following methods _____.
 - a) Steep-Descent Method
 - b) Newton's Method
 - c) Powell's Conjugate direction Method
 - d) All of these
- 3) Which of the following is specialized method for optimization?
 - a) Integer Programming
 - b) Geometric Programming
 - c) Simulated Annealing
 - d) All of these
- 4) Global Optimization considers _____.
 - a) Entire Region
 - b) Only Boundary Points
 - c) Both a and b
 - d) None of these
- 5) Optimization Algorithm is:- _____.
 - a) Stepwise Procedure to solve an Optimization Problem
 - b) Maximization of Function
 - c) Minimization of Function
 - d) All of these
- 6) Which of the following is not application of Optimization?
 - a) Maximize Discharge through Pipe
 - b) Minimize the cost of Construction
 - c) Calculating B.M. of Beam
 - d) None of these
- 7) Which of the following is not involved in the Single Variable Optimization?
 - a) Fibonacci Search Method
 - b) Newton Raphson Method
 - c) Bisection Method
 - d) Unidirectional Search Method
- 8) Gradient-Based Methods are _____.
 - a) Newton Raphson Method
 - b) Bisection Method
 - c) Both 'a' and 'b'
 - d) None of these

- 9) Types of Optimization Algorithm are: _____.
- a) Single Variable Algorithm b) Multi Variable Algorithm
c) Specialized Algorithm d) All of these
- 10) In Which of the following case is application of Optimization is not used _____.
- a) Maximize Discharge through Pipe
b) Minimize the cost of Construction
c) Calculation of shear force in column
d) None of these
- 11) Which of the following is involved in the multi Variable Optimization?
- a) Fibonacci Search Method b) Newton Raphson Method
c) Newton's Method d) Bisection Method
- 12) Region Elimination Methods are _____.
- a) Fibonacci Search Method b) Golden Section Method
c) Both 'a' and 'b' d) None of these
- 13) Process involved in Genetic Algorithm are: _____.
- a) Selection b) Mutation
c) Cross-over d) All of these
- 14) Re-analysis techniques in optimization are _____.
- a) Fast Techniques b) Slow Techniques
c) Both a and b d) None of these

CIVIL ENGINEERING**

Engineering System Design Optimization (BTN01623)

Day & Date: Wednesday, 05-06-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicates full marks.

Section – I

Q.2 Answer the following (Any Two) 12

- Explain the steps involved in the formulation of optimization problem.
- Explain 'Optimization Algorithm' in detail.
- Explain in detail various methods available for optimization.

Q.3 Answer the following (Any Two) 08

- Solve an optimization problem for the function.
 $f(x) = x^2 + \frac{45}{x}$ between the points (0,5) and $n = 15$ using 'Exhaustic Search Method.'
- Solve an optimization problem using 'Fibonacci Search Method' with the function.
 $f(x) = x^2 + \frac{20}{x}$, $n = 3$, $k = 2$, $a = 0.4$, $b = 6.5$
 $F_0 = 1, F_1 = 1, F_2 = 2, F_3 = 3, F_4 = 5$
- Optimize the given function.
 $f(x) = x^2 - 2x + 2$
 $a = 0$, $b = 5$, $\varepsilon = 10^{-3}$. Use Bisection Method and perform 2 iteration.

Q.4 Answer the following (Any Two) 08

- Optimize the given function using uni-directional search.
 $f(x) = x_1^2 - 2x_2 + 2$,
 $\varepsilon = 10^{-3}$, $x^{(0)} = (1,0)$ & search direction is $S = (2,3)$
- Problem optimization search using steepest decent method.
 $f(x) = x_1^2 - 2x_1x_2 - x_2^2$, $x^{(0)} = (1,1)$
- Perform optimization search using Powell's conjugate direction Method.
 $f(x) = (x_1 - 10)^2 + (x_2 - 8)^2$
 $x^{(0)} = (2,1)$, $S_1 = (1,0)$, $S_2 = (0,1)$, $\varepsilon = 10^{-3}$

Section – II

- Q.5 Answer the following (Any Two) 12**
- a) Optimize the objective function.
 $z = 5x + 3y$ Subjected to constraints
 $9x + 5y \leq 45,$
 $x \leq 3$ & $y \leq 2$
- b) Optimize the function
 $f(x) = x_1^2 - 2x_1x_2 - x_2^2$
Using geometric programming.
- c) Optimize the given function.
 $f(x) = 400 - x_1^2 - 2x_1x_2 - x_2^2$ using Simulated annealing where,
 $x^{(0)} = (1,1), \varepsilon = 10^{-3}$
- Q.6 Answer the following (Any Two) 08**
- a) Explain in detail 'Genetic Algorithm'.
- b) Explain the various operator of 'Genetic Algorithm?'
- c) Explain similarities between Genetic Algorithm & traditional methods.
- Q.7 Answer the following. (Any Two) 08**
- a) Explain 'Reduction in size of optimization problem?'
- b) Explain 'Fast – Re – Analysis Technique.'
- c) Explain in detail 'Multi – Level Optimization.'

Day & Date: Wednesday, 15-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct option from the following.

14

- 1) The most reliable estimate is _____.
a) Plinth area estimate b) Detailed estimate
c) Preliminary estimate d) Cube rate estimate
- 2) Administrative head of public works department who is directly responsible to government is _____.
a) Superintending engineer b) Chief engineer
c) Assistant engineer d) Executive engineer
- 3) For 15 mm thick cement plastering 1:6 on 100 sq.m. new brick work, the quantity of cement required is _____.
a) 0.200 m³ b) 0.247 m³
c) 0.274 m³ d) 0.343 m³
- 4) The expected out turn of cement concrete 1: 2: 4 per mason per day is _____.
a) 1.5 m³ b) 2.5 m³
c) 3.5 m³ d) 5.0 m³
- 5) Which of following not include in General Overhead?
a) Amenities to labor
b) Telephone bill, rent and taxes
c) Stationary, printing, postage charges
d) Travelling expenses
- 6) The value of the property (without being dismantled) at the end of the useful life period is known as _____.
a) Scrap value b) Salvage value
c) Junk value d) Book value
- 7) When actual cost of construction plus certain profit is paid to the contractor then such a contract is known as _____.
a) Unscheduled contract b) Nominated contract
c) Cost plus percentage contract d) Work order

- Q.2** a) Calculate the quantity of following item for a single room from given figure. **08**
b) Also prepare an Abstract sheet for these items by assuming suitable market rates. **04**

- Q.3** a) State the meaning of the term estimating and explain any four purposes of estimating. **04**
b) Write the detailed specifications for RCC Work of M20 Grade. **04**
- Q.4** a) Find quantity of 10 mm ϕ reinforcement in footing shown in fig. no. 1 and prepare schedule of reinforcement. **04**

- b) Write a short note on percentage breakup of the cost for civil work. **04**

- Q.5** a) Calculate the quantities of cement, sand and coarse aggregate for 40 m³ cement concrete having proportion (1:2:4). **04**
b) Write a thumb rules used for construction of building. **04**

Section – II

- Q.6** a) Prepare a tender notice for the work of construction of a hospital of 50 beds capacity RCC structure of 12,000 Sq. ft. built up area. Make suitable assumptions for required data. **08**
b) Explain the Envelope system used in tendering procedure. **04**
- Q.7** a) Explain following Acts **04**
i) Minimum Wages Act
ii) Workers Compensation Act
b) Write down the comparison between Item Rate Contract and Percentage Rate Contract. **04**
- Q.8** a) Explain different types of values - Market value, Scrap Value, Distress value and Speculation Value. **04**
b) A property fetches a monthly rent of Rs. 6000/-. The outgoings including sinking fund are up to 25% of gross income. If the rate of interest is 12% for perpetuity. Calculate year purchase and capitalized value. **04**
- Q.9** a) Explain factors affecting the valuation of the property. **04**
b) A concrete mixture was purchased at Rs. 8000/-. Assuming the salvage value to be Rs. 1000/- after 5 years, calculate the depreciation for each year by constant percentage method. **04**

- 7) The net present value (NPV) is _____.
- a) Equal to the sum of the present values of all cash flows
 - b) Equal to the sum of returns
 - c) Equal to the sum of all cash flows
 - d) None of the above
- 8) The most reliable estimate is _____.
- a) Plinth area estimate
 - b) Detailed estimate
 - c) Preliminary estimate
 - d) Cube rate estimate
- 9) Administrative head of public works department who is directly responsible to government is _____.
- a) Superintending engineer
 - b) Chief engineer
 - c) Assistant engineer
 - d) Executive engineer
- 10) For 15 mm thick cement plastering 1:6 on 100 sq.m. new brick work, the quantity of cement required is _____.
- a) 0.200 m³
 - b) 0.247 m³
 - c) 0.274 m³
 - d) 0.343 m³
- 11) The expected out turn of cement concrete 1: 2: 4 per mason per day is _____.
- a) 1.5 m³
 - b) 2.5 m³
 - c) 3.5 m³
 - d) 5.0 m³
- 12) Which of following not include in General Overhead?
- a) Amenities to labor
 - b) Telephone bill, rent and taxes
 - c) Stationary, printing, postage charges
 - d) Travelling expenses
- 13) The value of the property (without being dismantled) at the end of the useful life period is known as _____.
- a) Scrap value
 - b) Salvage value
 - c) Junk value
 - d) Book value
- 14) When actual cost of construction plus certain profit is paid to the contractor then such a contract is known as _____.
- a) Unscheduled contract
 - b) Nominated contract
 - c) Cost plus percentage contract
 - d) Work order

Estimating, Costing and Valuation (BTN01701)

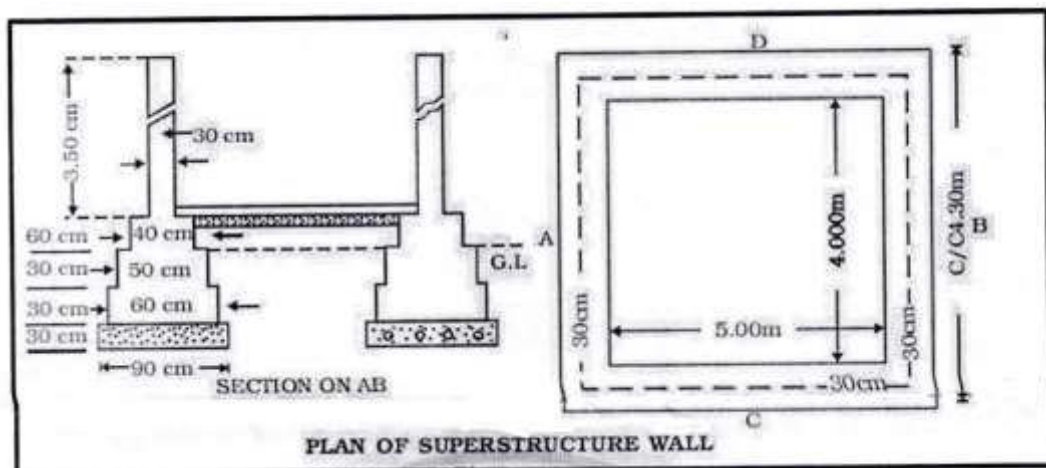

Day & Date: Wednesday, 15-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct option from the following.

14

- 1) Capitalized value of a property is the product of _____.
 - a) Annual income and annuity
 - b) Annual income and interest
 - c) Annual income and sinking fund
 - d) Annual income and year's purchase
- 2) In the straight line method, the expression for depreciation of a machine having purchasing cost C, scrap value S and useful life of the machinery N, is _____.
 - a) $(C + S)/N$
 - b) $(C - S)/N$
 - c) $[1 - (C/S) \times N]$
 - d) $[1 + (C/S) \times N]$
- 3) Calculate the annual percentage depreciation of a machine using the constant percentage method, it purchasing cost is Rs. 12000 and scrap value is Rs 3000 and the life of the machine is 8 years.
 - a) 9.37
 - b) 16
 - c) 26.67
 - d) 33.33
- 4) The net present value (NPV) is _____.
 - a) Equal to the sum of the present values of all cash flows
 - b) Equal to the sum of returns
 - c) Equal to the sum of all cash flows
 - d) None of the above
- 5) The most reliable estimate is _____.
 - a) Plinth area estimate
 - b) Detailed estimate
 - c) Preliminary estimate

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the given options. (Each question carries 2 marks) 14

- 1) The zone factors indicate reasonably estimated values of _____ in the respective zone.
 - a) Peak intensity of earthquake
 - b) Peak ground velocity
 - c) Peak ground acceleration
 - d) Peak ground displacement
- 2) Which of the following describes the buildup and release of stress during an earthquake?
 - a) Modified Mercalli Scale
 - b) Elastic Rebound Theory
 - c) Principle of Superposition
 - d) Richter scale
- 3) To find out the desired solution of a governing equation of motion of 2 DOF systems, the initial conditions are _____.
 - a) Displacement at the supports is zero
 - b) At $t=0$, displacement and velocity are zero
 - c) At $t=T_n$, displacement and velocity are zero
 - d) Velocity at the supports is zero
- 4) Viscous damping is proportional to _____.
 - a) Displacement
 - b) Acceleration
 - c) Amplitude
 - d) Velocity
- 5) The structures having high natural period _____.
 - a) Attract less seismic forces and have large drift
 - b) Have large drift
 - c) Attract large seismic forces
 - d) Attract large seismic forces and have small drift
- 6) The effect of base isolation is _____.
 - a) To reduce the fundamental period
 - b) To nullify the period
 - c) To lengthen fundamental vibration period of structure
 - d) To reduce the mass participation
- 7) The definition of the soft storey mainly refers to _____.
 - a) Strength
 - b) Stiffness
 - c) Mass
 - d) Damping

Earthquake Engineering (BTN01702)

Day & Date: Thursday, 16-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) Q. No. 3 & Q. 6 are compulsory. Attempt any two questions from the remaining of each section
 2) Figures to the right indicate full marks.
 3) Assume suitable data if necessary and state it clearly.
 4) Use of only IS 1893 is allowed.

Section – I

- Q.2** Describe direct and indirect effect of an earthquake. **09**
- Q.3** A SDOF system consists of a mass with weight 1800 N and spring of stiffness 14 KN/mm. By testing the system, it was found that a force of 450 N produces relative velocity of 0.3 m/s. Find: **10**
 a) Damping ratio
 b) Damped frequency of vibration (ω_D)
 c) Logarithmic decrement (δ)
 d) The ratio of two successive amplitudes
- Q.4** Describe the force transmissibility? Derive an expression for force transmissibility to the foundation of a SDOF system subjected to harmonic force. **09**
- Q.5** Explain the concept of Duhamel's integral for damped systems. Derive its expression. **09**

Section – II

- Q.6** It is proposed to construct a R.C.C. four storied commercial building having plan dimensions as shown in Fig. 1 in zone III with following data. Determine the lateral forces and base shear. The all column sizes are 250 x 450 mm and beams sizes are 250 x 450 mm. The slab thickness is 140 mm and thickness of walls is 230 mm. The height of floor is 3.2 m and live load is 3.0 kN/m². IS 13920 will be used. The strata is hard. **10**

Figure 1 Q.6

- Q.7** Explain the planning aspects for earthquake resistant design of building. **09**
- Q.8** Explain the significance of ductility in earthquake resistant buildings. **09**
- Q.9** Describe the bands. At what levels in masonry building would you provide them? Give justification for each of them. **09**

- Q.6** It is proposed to construct a R.C.C. four storied commercial building having plan dimensions as shown in Fig. 1 in zone III with following data. Determine the lateral forces and base shear. The all column sizes are 250 x 450 mm and beams sizes are 250 x 450 mm. The slab thickness is 140 mm and thickness of walls is 230 mm. The height of floor is 3.2 m and live load is 3.0 kN/m². IS 13920 will be used. The strata is hard. **10**

Figure 1 Q.6

- Q.7** Explain the planning aspects for earthquake resistant design of building. **09**
- Q.8** Explain the significance of ductility in earthquake resistant buildings. **09**
- Q.9** Describe the bands. At what levels in masonry building would you provide them? Give justification for each of them. **09**

Construction Management and Practices (BTN01703)

Day & Date: Friday, 17-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data whenever necessary & mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct answer.

14

- 1) _____ cranes are used for handling loads over a large rectangular area in factories, power stations, shipyards and workshops.

a) Mobile	b) Derrick
c) Gantry	d) Hydraulic
- 2) _____ is used for removing materials from cofferdams.

a) Dragline	b) Back hoe
c) Clamshell	d) Crane
- 3) _____ are used to excavate below the ground on which the machine stands.

a) Hoes	b) Power Shovel
c) Trenchers	d) Rippers
- 4) _____ slack is an indication of 'on schedule' project.

a) Positive	b) Negative
c) Zero	d) Greater
- 5) In PERT, the distribution should have a _____ probability of reaching the optimistic time.

a) Big	b) Average
c) Small	d) Medium
- 6) In a CPM network, if earliest start time of an activity is 8 days and activity duration is 7 days, the value of earliest finish time of that activity will be _____ days.

a) 1	b) 15
c) 56	d) 23
- 7) If for an activity optimistic time is 7 days, pessimistic time is 13 days and most likely time is 10 days, its standard deviation will be _____.

a) 10	b) 3.28
c) 10.77	d) 1

CIVIL ENGINEERING**

Construction Management and Practices (BTN01703)

Day & Date: Friday, 17-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) Question no. 2 is compulsory in section I, and solve any two questions from the remaining. (Q. No. 3, 4 & 5)
2) Question no. 6 is compulsory in section II, and solve any two questions from the remaining. (Q. No. 7, 8 & 9)
3) Figures to the right indicate full marks.
4) Assume suitable data wherever needed and mention it clearly.

Section – I

Q.2 Consider a project shown in the Table.

12

Activity i-j	Duration in Days		
	Optimistic	Most Likely	Pessimistic
1-2	5	7	9
2-3	11	14	17
2-4	13	15	17
2-5	4	6	8
3-7	9	10	11
4-5	0	0	0
5-6	3	3	3
6-8	5	12	17
7-8	2	4	8

- Draw PERT Network.
- Find expected critical path.
- Find duration and variance of the project.

Q.3 Answer the following questions.

08

- What is WBS? Explain its importance in project management.
- Following activities pertains to a project. Determine critical path and Duration.

Activity	1 - 2	2 - 3	2 - 4	3 - 4	3 - 5	4 - 6	5 - 6
Duration (Days)	14	13	16	15	18	23	15

Q.4 Answer the following questions.

08

- Differentiate between CPM and PERT
- What is process and different steps followed in network updating?

Q.5 Answer the following questions.

08

- Write a short note on applications of software in construction industry.
- What is BIM? Also explain the output of BIM.

Section –II

- Q.6 Write Short notes on** **12**
- a) Bulldozers
 - b) Power shovel
 - c) Hot mix plant
- Q.7 Explain in details.** **08**
- a) Safety equipment's used on construction site
 - b) Causes of accidents on construction site
- Q.8 Explain in details.** **08**
- a) Write a short note on Mivan formwork.
 - b) Explain different components and elements used in prefabricated construction.
- Q.9 Explain in details.** **08**
- a) Write note on Dredging equipment and their types.
 - b) Explain the types and uses of diaphragm walls.

Seat No.

4) Assume suitable data whenever necessary & mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct answer.

14

- 1) If the scheduled completion time of a project is 40 days and earliest expected completion time is 35 days, what will be the value of probability factor if the standard deviation is 2.87 days?

a) 1.74	b) 3.00
c) 2.74	d) 0.74
- 2) The area under the Beta distribution curve is divided into two equal parts by _____.

a) Most likely time	b) Optimistic time
c) Pessimistic time	d) Expected time
- 3) What is the process of incorporating changes and rescheduling or re planning called?

a) Resource Allocation	b) Resource smoothing
c) Resource leveling	d) Updating
- 4) The key functions of safety management system are,

1) Planning for safety	2) Organizing for safety
3) Scheduling for safety	4) Controlling for safety

a) 1, 3 and 4 are correct	b) 2, 3 and 4 are correct
c) 1, 2 and 3 are correct	d) 1, 2 and 4 are correct
- 5) Pick up the correct statement from the following: _____.

a) Programme Evaluation and Review Technique is event oriented
b) Programme Evaluation and Review Technique is not event oriented
c) Critical Path Method is event oriented
d) Critical Path Method is not event oriented

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct answer.**14**

- 1) The key functions of safety management system are,

1) Planning for safety	2) Organizing for safety
3) Scheduling for safety	4) Controlling for safety

 - a) 1, 3 and 4 are correct
 - b) 2, 3 and 4 are correct
 - c) 1, 2 and 3 are correct
 - d) 1, 2 and 4 are correct

- 2) Pick up the correct statement from the following: _____.
 - a) Programme Evaluation and Review Technique is event oriented
 - b) Programme Evaluation and Review Technique is not event oriented
 - c) Critical Path Method is event oriented
 - d) Critical Path Method is not event oriented

- 3) In the given figure, the network of a project represents.

 - a) Activity of an excavation of a footing
 - b) Activity of an excavation which starts at event No. 1 and ends at event No. 2
 - c) Activity of excavation which takes 8 units of time
 - d) None of these

- 4) If D is the duration, ES and EE are the earliest start and finish, LS and LF are latest start and latest finish time, then the following relation holds good _____.

a) $EF = ES + D$	b) $D = EF - ES$
c) $LE = LS + D$	d) All of the above

- 5) _____ cranes are used for handling loads over a large rectangular area in factories, power stations, shipyards and workshops.

a) Mobile	b) Derrick
c) Gantry	d) Hydraulic

- 6) _____ is used for removing materials from cofferdams.

a) Dragline	b) Back hoe
c) Clamshell	d) Crane

- 7) _____ are used to excavate below the ground on which the machine stands.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct answer.**14**

- 1) In a CPM network, if earliest start time of an activity is 8 days and activity duration is 7 days, the value of earliest finish time of that activity will be _____ days.

a) 1	b) 15
c) 56	d) 23
- 2) If for an activity optimistic time is 7 days, pessimistic time is 13 days and most likely time is 10 days, its standard deviation will be _____.

a) 10	b) 3.28
c) 10.77	d) 1
- 3) If the scheduled completion time of a project is 40 days and earliest expected completion time is 35 days, what will be the value of probability factor if the standard deviation is 2.87 days?

a) 1.74	b) 3.00
c) 2.74	d) 0.74
- 4) The area under the Beta distribution curve is divided into two equal parts by _____.

a) Most likely time	b) Optimistic time
c) Pessimistic time	d) Expected time
- 5) What is the process of incorporating changes and rescheduling or re planning called?

a) Resource Allocation	b) Resource smoothing
c) Resource leveling	d) Updating
- 6) The key functions of safety management system are,

1) Planning for safety	2) Organizing for safety
3) Scheduling for safety	4) Controlling for safety
a) 1, 3 and 4 are correct	b) 2, 3 and 4 are correct
c) 1, 2 and 3 are correct	d) 1, 2 and 4 are correct

- 7) Pick up the correct statement from the following: _____.
- Programme Evaluation and Review Technique is event oriented
 - Programme Evaluation and Review Technique is not event oriented
 - Critical Path Method is event oriented
 - Critical Path Method is not event oriented

- 8) In the given figure, the network of a project represents.

- Activity of an excavation of a footing
 - Activity of an excavation which starts at event No. 1 and ends at event No. 2
 - Activity of excavation which takes 8 units of time
 - None of these
- 9) If D is the duration, ES and EE are the earliest start and finish, LS and LF are latest start and latest finish time, then the following relation holds good _____.
- $EF = ES + D$
 - $D = EF - ES$
 - $LE = LS + D$
 - All of the above
- 10) _____ cranes are used for handling loads over a large rectangular area in factories, power stations, shipyards and workshops.
- Mobile
 - Derrick
 - Gantry

Advanced Structural Analysis (BTN01707)

Day & Date: Saturday, 18-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No. 3 (starting page of the Answer Book).
 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 3) Figures to the right indicates full marks.
 4) Assume suitable data wherever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct option from the following. **14**

- 1) To draw qualitative ILD of indeterminate structure, which of the following concept is used. 01
- Mullers Breslau's Principle
 - Kani's Method
 - Unit Load Method
 - Castigliano's First energy theorem

- 2) Degree of kinematic indeterminacy for the beam shown in fig. 01

- 0
 - 2
 - 1
 - 3
- 3) In curved beams, normally the nature of stress distribution is _____. 01
- Linear
 - Circular
 - Parabolic
 - Hyperbolic
- 4) A beam curved in plan is designed for _____. 01
- bending moment and shear
 - bending moment and torsion
 - shear and torsion
 - bending moment, shear and torsion

5) ILD for the shear force at the support of the cantilever beam is _____. 02

6) Which of the following methods of structural analysis is a force method? 01

- a) three moment equation
- b) slope deflection method
- c) column analogy method
- d) moment distribution method

7) In the slope deflection equations, the deformations are considered to be caused by _____. 01

- a) Bending Moment
- b) Shear Force
- c) Axial Force
- d) Torsional moment

8) Degree of kinematic indeterminacy of pin jointed plane frame is given by _____. 01

- a) $2j-r$
- b) $3j-r$
- c) $2j+r$
- d) $j-2r$

9) Stiffness of the end A if the far end B is free is _____. 02

- a) EI/L
- b) $2EI/L$
- c) $3EI/L$
- d) 0

10) In the stiffness matrix of structural analysis, the quantity taken as redundant is _____. 01

- a) Both rotation and deflection
- b) Rotation
- c) Only Deflection
- d) none of the above

11) Select the correct statement 01

- a) Flexibility matrix is a square symmetrical matrix
- b) Stiffness matrix is a square symmetrical matrix
- c) Both (a) and (b)
- d) None of the above

12) The deformation of a spring produced by a unit load is called _____. 01

- a) Stiffness
- b) Flexibility
- c) Influence coefficient
- d) Unit strain

Set **P**

Fourth Y. (B. Tech) (Sem-I) (New) (CBCS) Examination: March/April-2024
CIVIL ENGINEERING
Advanced Structural Analysis (BTN01707)

Day & Date: Saturday, 18-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:**
- 1) Question no. 2 is compulsory in section I, and solve any two questions from the remaining. (Q. No. 3, 4 & 5)
 - 2) Question no. 6 is compulsory in section II, and solve any two questions from the remaining. (Q. No. 7, 8 & 9)
 - 3) Figures to the right indicate full marks.

Section – I

- Q.2** Draw ILD for BM & SF at D for the continuous beam as shown in the figure. **08**

- Q.3** A quarter circular beams having uniform cross section is fixed at one end and free at other. It carries vertically downward load at free end. Draw SFD, BMD & TMD. Also determine vertical deflection at free end. **10**

- Q.4** A long beam supported on elastic foundation is subjected to a concentrated clockwise moment 'Mo'. The beam is infinitely long on both the sides of concentrated moment. Draw SF and BM diagram. **10**
- Q.5** Draw SF, BM, deflection diagram for a semi-infinite beam on elastic foundation winged at one end and subjected to UDL of 'W' over entire length. **10**

Section – II

- Q.6** Analyse the beam shown in Fig. 4 by stiffness method. Support B sinks down by 10 mm. Take $EI = 45000 \text{ kNm}^2$. **08**

Q.7 A simply supported beam column is subjected to loading shown in Figure. Find maximum deflection and maximum bending moment in the beam column. **10**

Q.8 Analyze the frame shown in fig. by stiffness method. **10**

Q.9 Find the forces in all members of the truss shown in fig. by using member-oriented stiffness method. Assume axial rigidity of all members is constant. **10**

**Fourth Y. (B. Tech) (Sem-I) (New) (CBCS) Examination: March/April-2024
CIVIL ENGINEERING**

Advanced Structural Analysis (BTN01707)

Day & Date: Saturday, 18-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:**
- 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No. 3 (starting page of the Answer Book).
 - 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 - 3) Figures to the right indicates full marks.
 - 4) Assume suitable data wherever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct option from the following. **14**

- 1) Which of the following methods of structural analysis is a force method? 01
 - a) three moment equation
 - b) slope deflection method
 - c) column analogy method
 - d) moment distribution method
- 2) In the slope deflection equations, the deformations are considered to be caused by _____. 01
 - a) Bending Moment
 - b) Shear Force
 - c) Axial Force
 - d) Torsional moment
- 3) Degree of kinematic indeterminacy of pin jointed plane frame is given by _____. 01
 - a) $2j-r$
 - b) $3j-r$
 - c) $2j+r$
 - d) $j-2r$
- 4) Stiffness of the end A if the far end B is free is _____. 02

- a) EI/L
 - b) $2EI/L$
 - c) $3EI/L$
 - d) 0
- 5) In the stiffness matrix of structural analysis, the quantity taken as redundant is _____. 01
 - a) Both rotation and deflection
 - b) Rotation
 - c) Only Deflection
 - d) none of the above
 - 6) Select the correct statement 01
 - a) Flexibility matrix is a square symmetrical matrix
 - b) Stiffness matrix is a square symmetrical matrix
 - c) Both (a) and (b)
 - d) None of the above

Set **Q**

Fourth Y. (B. Tech) (Sem-I) (New) (CBCS) Examination: March/April-2024
CIVIL ENGINEERING
Advanced Structural Analysis (BTN01707)

Day & Date: Saturday, 18-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:**
- 1) Question no. 2 is compulsory in section I, and solve any two questions from the remaining. (Q. No. 3, 4 & 5)
 - 2) Question no. 6 is compulsory in section II, and solve any two questions from the remaining. (Q. No. 7, 8 & 9)
 - 3) Figures to the right indicate full marks.

Section – I

- Q.2** Draw ILD for BM & SF at D for the continuous beam as shown in the figure. **08**

- Q.3** A quarter circular beams having uniform cross section is fixed at one end and free at other. It carries vertically downward load at free end. Draw SFD, BMD & TMD. Also determine vertical deflection at free end. **10**

- Q.4** A long beam supported on elastic foundation is subjected to a concentrated clockwise moment 'Mo'. The beam is infinitely long on both the sides of concentrated moment. Draw SF and BM diagram. **10**
- Q.5** Draw SF, BM, deflection diagram for a semi-infinite beam on elastic foundation winged at one end and subjected to UDL of 'W' over entire length. **10**

Section – II

- Q.6** Analyse the beam shown in Fig. 4 by stiffness method. Support B sinks down by 10 mm. Take $EI = 45000 \text{ kNm}^2$. **08**

Q.7 A simply supported beam column is subjected to loading shown in Figure. Find maximum deflection and maximum bending moment in the beam column. **10**

Q.8 Analyze the frame shown in fig. by stiffness method. **10**

Q.9 Find the forces in all members of the truss shown in fig. by using member-oriented stiffness method. Assume axial rigidity of all members is constant. **10**

Seat No.

Max. Marks: 70

- Instructions:**
- 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No. 3 (starting page of the Answer Book).
 - 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 - 3) Figures to the right indicates full marks.
 - 4) Assume suitable data wherever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

- Q.1 Choose the correct option from the following.** **14**
- 1) In curved beams, normally the nature of stress distribution is _____. 01
 - a) Linear
 - b) Circular
 - c) Parabolic
 - d) Hyperbolic
 - 2) A beam curved in plan is designed for _____. 01
 - a) bending moment and shear
 - b) bending moment and torsion
 - c) shear and torsion
 - d) bending moment, shear and torsion
 - 3) ILD for the shear force at the support of the cantilever beam is _____. 02
 - a) 
 - b) 
 - c) 
 - d) 
 - 4) Which of the following methods of structural analysis is a force method? 01
 - a) three moment equation
 - b) slope deflection method
 - c) column analogy method
 - d) moment distribution method
 - 5) In the slope deflection equations, the deformations are considered to be caused by _____. 01
 - a) Bending Moment
 - b) Shear Force
 - c) Axial Force
 - d) Torsional moment

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

- Q.1 Choose the correct option from the following.** **14**
- 1) Degree of kinematic indeterminacy of pin jointed plane frame is given by _____. 01

a) $2j-r$	b) $3j-r$
c) $2j+r$	d) $j-2r$

 - 2) Stiffness of the end A if the far end B is free is _____. 02

a) EI/L	b) $2EI/L$
c) $3EI/L$	d) 0

 - 3) In the stiffness matrix of structural analysis, the quantity taken as redundant is _____. 01

a) Both rotation and deflection	b) Rotation
c) Only Deflection	d) none of the above

 - 4) Select the correct statement 01

a) Flexibility matrix is a square symmetrical matrix	b) Stiffness matrix is a square symmetrical matrix
c) Both (a) and (b)	d) None of the above

 - 5) The deformation of a spring produced by a unit load is called _____. 01

a) Stiffness	b) Flexibility
c) Influence coefficient	d) Unit strain

 - 6) To draw qualitative ILD of indeterminate structure, which of the following concept is used. 01

a) Mullers Breslau's Principle	b) Kani's Method
c) Unit Load Method	d) Castigliano's First energy theorem

7) Degree of kinematic indeterminacy for the beam shown in fig. 01

- a) 0
- b) 2
- c) 1
- d) 3

8) In curved beams, normally the nature of stress distribution is _____. 01

- a) Linear
- b) Circular
- c) Parabolic
- d) Hyperbolic

9) A beam curved in plan is designed for _____. 01

- a) bending moment and shear
- b) bending moment and torsion
- c) shear and torsion
- d) bending moment, shear and torsion

10) ILD for the shear force at the support of the cantilever beam is _____. 02

11) Which of the following methods of structural analysis is a force method? 01

- a) three moment equation
- b) slope deflection method
- c) column analogy method
- d) moment distribution method

12) In the slope deflection equations, the deformations are considered to be caused by _____. 01

- a) Bending Moment

Traffic Engineering and Management (BTN01710)

Day & Date: Saturday, 18-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternative from the options. 14

- 1) What is traffic engineering?
 - a) Traffic engineering optimizes the performance and efficiency of the movement of people, goods, and transportation
 - b) Traffic engineering mainly deals with improving traffic performance, traffic studies, and traffic networks
 - c) The main goal of traffic engineering is to reduce highspeed collisions
 - d) All of the mentioned
- 2) Which is the most important objective of traffic engineering?
 - a) To provide a high speed road without any other priority
 - b) To increase the traffic
 - c) To reduce the accidents
 - d) To consider pedestrians as obstruction
- 3) Which of the following is the first stage in the function of the traffic engineering department?

a) Collection of data	b) Planning and design
c) Finance	d) Investigations
- 4) Which is the first stage in traffic engineering studies?

a) Spot speed studies	b) Traffic volume studies
c) Origin and destination studies	d) Speed and delay studies
- 5) What does "3-Es" of traffic engineering stand for?
 - a) Engineering, education and enthusiasm
 - b) Engineering, education and enforcement
 - c) Engineering, education and expulsion
 - d) Enforcement, empowerment and eradication
- 6) Which of the following is the traffic that is prepared based on 365 days of the year?

a) Annual average daily traffic	b) Average daily traffic
c) Average yearly traffic	d) Yearly traffic

- 7) Which of the following is the first phase of traffic regulation?
a) Traffic flow regulations b) General controls
c) Vehicle controls d) Driver controls
- 8) Which of the following traffic study determines total parking demand?
a) Parking studies b) Travel time studies
c) Accident studies d) Traffic volume study
- 9) What is the purpose of a Travel Time and Delay Study?
a) To evaluate the traffic stream
b) For survey data
c) To assess the quality of traffic movement
d) To assess the time taken to travel by various vehicles
- 10) Which of the following is not determined by traffic volume studies?
a) Number of vehicles b) Movement of vehicles
c) Design criteria d) Vehicle classification
- 11) Which of the following is not a parameter of traffic stream?
a) Speed b) PCU
c) Density of traffic d) Flow of traffic
- 12) Which of the following is not a factor affecting traffic capacity?
a) Traffic control devices b) Gradient
c) Lane width d) Lateral clearance
- 13) Fixed delay does not depend on which of the following factor?
a) Traffic signals b) Traffic volume
c) Markers d) Level crossing
- 14) Which of the following type of parking has areas exclusively allotted for parking at some distance away from the mainstream of traffic?
a) 30 degrees parking b) Right-angle parking
c) Off-street parking d) Parallel parking

**Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
CIVIL ENGINEERING**

Traffic Engineering and Management (BTN01710)

Day & Date: Saturday, 18-05-2024

Max. Marks: 56

Time: 03:00 PM To 06:00 PM

- Instructions:** 1) All questions are compulsory.
2) Assume suitable data wherever needed.
3) Draw neat sketches wherever necessary.

Section – I

Q.2 Answer any two questions. 14

- Explain in detail various components of road traffic.
- Explain in detail various traffic characteristics.
- Elaborate Sampling, adequacy of sample size and Application of sampling methods in traffic engineering studies.

Q.3 Answer any two questions. 14

- Spot speed studies are carried out at a certain stretch of highway and consolidated data is given below prepare frequency distribution table.

Speed Range (Kmph)	No. of vehicles Observed	Speed Range (Kmph)	No. of vehicles Observed
0 to 10	12	50 to 60	255
10 to 20	18	60 to 70	119
20 to 30	68	70 to 80	43
30 to 40	89	80 to 90	33
40 to 50	204	90 to 100	9

Determine

- Upper and lower values or speed limits for regulation of mixed traffic flow.
 - Design speed for checking geometric design of highway elements.
- Write short note on.
 - Categories of traffic flow
 - Speed, flow and density relationship
 - Explain the following terms in detail.
 - Highway Capacity and level of service
 - Capacity of urban and rural roads
 - PCU concept

Section – II

- Q.4 Answer any two questions. 14**
- a) Explain in detail various types of traffic regulations in Traffic engineering studies.
 - b) Explain in detail necessity, requirements, advantages and disadvantages of One-Way Street.
 - c) Explain in detail various types of traffic control devices.
- Q.5 Answer any two questions. 14**
- a) Write down stepwise procedure for traffic signal design by IRC and Webster's method.
 - b) Explain concept, importance, objectives and scope of 'Intelligent Transportation System (ITS)'.
 - c) Explain various applications of 'Intelligent Transportation System (ITS)' in traffic engineering.

30 to 40	89	80 to 90	33
40 to 50	204	90 to 100	9

Determine

- i) Upper and lower values or speed limits for regulation of mixed traffic flow.
 - ii) Design speed for checking geometric design of highway elements.
- b) Write short note on.
 - i) Categories of traffic flow
 - ii) Speed, flow and density relationship
 - c) Explain the following terms in detail.
 - i) Highway Capacity and level of service
 - ii) Capacity of urban and rural roads
 - iii) PCU concept

Section – II

- Q.4 Answer any two questions. 14**
- a) Explain in detail various types of traffic regulations in Traffic engineering studies.
 - b) Explain in detail necessity, requirements, advantages and disadvantages of One-Way Street.
 - c) Explain in detail various types of traffic control devices.
- Q.5 Answer any two questions. 14**
- a) Write down stepwise procedure for traffic signal design by IRC and Webster's method.
 - b) Explain concept, importance, objectives and scope of 'Intelligent Transportation System (ITS)'.
 - c) Explain various applications of 'Intelligent Transportation System (ITS)' in traffic engineering.

Traffic Engineering and Management (BTN01710)

Day & Date: Saturday, 18-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternative from the options. 14

- 1) Which of the following is the traffic that is prepared based on 365 days of the year?

a) Annual average daily traffic	b) Average daily traffic
c) Average yearly traffic	d) Yearly traffic
- 2) Which of the following is the first phase of traffic regulation?

a) Traffic flow regulations	b) General controls
c) Vehicle controls	d) Driver controls
- 3) Which of the following traffic study determines total parking demand?

a) Parking studies	b) Travel time studies
c) Accident studies	d) Traffic volume study
- 4) What is the purpose of a Travel Time and Delay Study?

a) To evaluate the traffic stream
b) For survey data
c) To assess the quality of traffic movement
d) To assess the time taken to travel by various vehicles
- 5) Which of the following is not determined by traffic volume studies?

a) Number of vehicles	b) Movement of vehicles
c) Design criteria	d) Vehicle classification
- 6) Which of the following is not a parameter of traffic stream?

a) Speed	b) PCU
c) Density of traffic	d) Flow of traffic
- 7) Which of the following is not a factor affecting traffic capacity?

a) Traffic control devices	b) Gradient
c) Lane width	d) Lateral clearance
- 8) Fixed delay does not depend on which of the following factor?

a) Traffic signals	b) Traffic volume
c) Markers	d) Level crossing

- 9) Which of the following type of parking has areas exclusively allotted for parking at some distance away from the mainstream of traffic?
- a) 30 degrees parking
 - b) Right-angle parking
 - c) Off-street parking
 - d) Parallel parking
- 10) What is traffic engineering?
- a) Traffic engineering optimizes the performance and efficiency of the movement of people, goods, and transportation
 - b) Traffic engineering mainly deals with improving traffic performance, traffic studies, and traffic networks
 - c) The main goal of traffic engineering is to reduce highspeed collisions
 - d) All of the mentioned
- 11) Which is the most important objective of traffic engineering?
- a) To provide a high speed road without any other priority
 - b) To increase the traffic
 - c) To reduce the accidents
 - d) To consider pedestrians as obstruction
- 12) Which of the following is the first stage in the function of the traffic engineering department?
- a) Collection of data
 - b) Planning and design
 - c) Finance
 - d) Investigations
- 13) Which is the first stage in traffic engineering studies?
- a) Spot speed studies
 - b) Traffic volume studies
 - c) Origin and destination studies
 - d) Speed and delay studies
- 14) What does “3-Es” of traffic engineering stand for?
- a) Engineering, education and enthusiasm
 - b) Engineering, education and enforcement
 - c) Engineering, education and expulsion
 - d) Enforcement, empowerment and eradication

CIVIL ENGINEERING**

Traffic Engineering and Management (BTN01710)

Day & Date: Saturday, 18-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Assume suitable data wherever needed.
3) Draw neat sketches wherever necessary.

Section – I

Q.2 Answer any two questions. 14

- Explain in detail various components of road traffic.
- Explain in detail various traffic characteristics.
- Elaborate Sampling, adequacy of sample size and Application of sampling methods in traffic engineering studies.

Q.3 Answer any two questions. 14

- Spot speed studies are carried out at a certain stretch of highway and consolidated data is given below prepare frequency distribution table.

Speed Range (Kmph)	No. of vehicles Observed	Speed Range (Kmph)	No. of vehicles Observed
0 to 10	12	50 to 60	255
10 to 20	18	60 to 70	119
20 to 30	68	70 to 80	43
30 to 40	89	80 to 90	33
40 to 50	204	90 to 100	9

Determine

- Upper and lower values or speed limits for regulation of mixed traffic flow.
 - Design speed for checking geometric design of highway elements.
- Write short note on.
 - Categories of traffic flow
 - Speed, flow and density relationship
 - Explain the following terms in detail.
 - Highway Capacity and level of service
 - Capacity of urban and rural roads
 - PCU concept

Section – II

- Q.4 Answer any two questions. 14**
- a) Explain in detail various types of traffic regulations in Traffic engineering studies.
 - b) Explain in detail necessity, requirements, advantages and disadvantages of One-Way Street.
 - c) Explain in detail various types of traffic control devices.
- Q.5 Answer any two questions. 14**
- a) Write down stepwise procedure for traffic signal design by IRC and Webster's method.
 - b) Explain concept, importance, objectives and scope of 'Intelligent Transportation System (ITS)'.
 - c) Explain various applications of 'Intelligent Transportation System (ITS)' in traffic engineering.

CIVIL ENGINEERING
Entrepreneurship (BTN01713)

Day & Date: Saturday, 18-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries two marks.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.
 4) Assume suitable data if necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the given options. (Each question carries two marks.) **14**

- 1) What is the fundamental concept of entrepreneurship?
 - a) Profit maximization
 - b) Risk-taking and innovation
 - c) Market domination
 - d) Resource conservation
- 2) What does Entrepreneurship Development focus on primarily?
 - a) Economic stability
 - b) Individual skills enhancement
 - c) Government regulations
 - d) International trade
- 3) What is a common risk associated with entrepreneurship?
 - a) Stability risk
 - b) Competitive risk
 - c) Inertia risk
 - d) Conformity risk
- 4) Entrepreneurs can be classified based on: _____
 - a) Age
 - b) Gender
 - c) Motivation
 - d) All of the above
- 5) What is the primary focus of Women Entrepreneurship in India?
 - a) Industrial policy
 - b) Economic development
 - c) Government regulations
 - d) Rural youth empowerment
- 6) What is a common problem faced by Women Entrepreneurs in India?
 - a) Lack of government support
 - b) Economic stability
 - c) Limited access to resources
 - d) Gender equality
- 7) What does NABARD focus on in the context of Women Entrepreneurship?
 - a) Rural youth development
 - b) Skill enhancement programs
 - c) Financial support for women entrepreneurs
 - d) Urban development

 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
 2) Figures to the right indicates full marks.
 3) Assume suitable data wherever necessary and mention it clearly.
 4) Use of non-programmable calculator is allowed.

Section – I

Q.2 Solve any seven of the following. (4 marks each) 28

- a) Define the term "enterprise" and explain its significance in the business context.
- b) Explain the concept of entrepreneurial activity and its importance in the business ecosystem.
- c) Explore the various types of entrepreneurs based on the nature of their businesses and provide examples for each type.
- d) Explore common problems faced by entrepreneurs and propose potential solutions to address these challenges.
- e) Define creativity and innovation in the entrepreneurial context and discuss how these elements contribute to the success of entrepreneurial ventures.
- f) Write a note on Women Entrepreneur in India.
- g) Define women entrepreneurship and highlight its significance in the Indian context.
- h) Describe the training initiatives for rural youth aimed at promoting self-employment.
- i) Explore the specialized institutions supporting entrepreneurs and their unique contributions to specific sectors or industries.
- j) Explain the importance of business plans in securing financial support for entrepreneurs and the key elements that should be included in a comprehensive business plan.

Section – II

Q.3 Solve any seven of the following. (4 Marks each) 28

- a) Explain the concept of the estimation of the cost of a project and its significance in financial analysis.
- b) Differentiate between working capital and fixed capital, emphasizing their roles in financial management.
- c) Briefly describe the break-even analysis and its application in financial decision making.
- d) Explain the factors influencing the commercial viability of a project, discussing market analysis, competition, and potential challenges.
- e) Define project profiles and their role in project documentation.
- f) Explain the concept of risk in business, discussing the types of risks and the importance of risk analysis in decision-making.

- g)** Explore the concept of sales and its role in achieving organizational objectives, discussing the various sales channels and techniques.
- h)** Differentiate between goals and objectives in the context of business planning.
- i)** Explain the significance of the technical viability assessment in project report.
- j)** Explain the methods used for the assessment of working results and their role in financial decision-making.

 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
 2) Figures to the right indicate full marks.

Section – I

Q.2 Answer any three.

24

- a) Using Graphical method, Solve

$$\text{Maximize } Z = 10X_1 + 8X_2$$

$$\text{Subject to, } 2X_1 + X_2 \leq 40;$$

$$2X_1 + 3X_2 \leq 80;$$

$$0 \leq X_1;$$

$$0 \leq X_2;$$

- b) Four different jobs can be done on 4 different machines. The set-up and takedown time cost are assumed to be prohibitively high for changeovers. The matrix below gives the cost in rupees for producing job i on machine j.

		Machines			
		M1	M2	M3	M4
Jobs	J1	51	77	49	55
	J2	32	34	59	68
	J3	37	44	70	54
	J4	55	55	58	55

- c) Solve the following game.

		Player B				
		Player A	3	0	6	-1
-1	5		-2	2	1	

- d) Discuss in detail 'Planning' & 'Organising' as a Functions of Management.
 e) Explain the Waiting Line Theory with all its characteristics to single channel waiting line. Discuss with the graph showing waiting time cost, Cost of Services & Total Expected cost.

Q.3 Write a note on any one.

04

- a) Advantages of Simulation Technique
 b) Theory of Games

Section – II

Q.4 Answer any three.

24

- a) What is Break-Even Analysis? Explain with an example. How it is important for material management?
- b) Find The A-Class, B-Class And C-Class Material, for following and draw the Graph.

Item ID	Annual Consumption in unit	Unit Price in Rs
1	700	50
2	2400	30
3	150	100
4	60	220
5	3800	15
6	4000	5
7	6000	2
8	300	35
9	30	80
10	2900	4

- c) A construction company requires 4000 bags of cement per month. Price of each cement bag has 100. If Inventory carrying cost = 20% & procurement costs per order = 50 ₹. Find EOQ & No. of orders company should place.
- d) The following are the mean length & ranges of lengths of finished product from 10 samples of size 5. The specification limits for length are 200 ± 5 cm. Construct \bar{x} and R chart and examine whether the process is under control & state your explanation.

Sample no.	1	2	3	4	5	6	7	8	9	10
Mean \bar{x}	201	198	202	200	203	204	199	196	199	201
Range R	5	0	7	3	4	7	2	8	5	6

- e) Write a note on the ERP system.

Q.5 Write a note on any one.

04

- a) Application of Dynamic Programming
- b) Genetic Algorithm

Optimization Techniques (BTN01714)

Day & Date: Saturday, 18-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternative from the options. 14

- 1) _____ of a function is a value which is higher than all the values of the function.
 - a) Global Minima
 - b) Global Maxima
 - c) Local Minima
 - d) Local Maxima
- 2) EMV technique is used for decision under _____.
 - a) Uncertainty
 - b) Certainty
 - c) Risk
 - d) All the above
- 3) The cost of keeping items in inventory stock is called _____.
 - a) Carrying Cost
 - b) Shortage cost
 - c) Procurement cost
 - d) none of this
- 4) Economic Order Quantity model helps to find _____.
 - a) Optimum size of order
 - b) Annual Requirement of Units
 - c) Both of these
 - d) None of these
- 5) At the Break-Even Point _____.
 - a) Profit > Loss
 - b) Profit < Loss
 - c) Profit = Loss
 - d) None of these
- 6) Hungarian method is suitable for _____.
 - a) Assignment Problem
 - b) Transportation Problem
 - c) Graphical Method
 - d) Game Theory
- 7) Optimization Means _____.
 - a) Maximization
 - b) Minimization
 - c) Minimization or Maximization
 - d) Mean of Minimization & Maximization
- 8) The dual of the dual is _____.
 - a) Attributes
 - b) Primal
 - c) Dual
 - d) None of these
- 9) Military organization is _____.
 - a) Line and Staff
 - b) Matrix
 - c) Line
 - d) Functional

- 10) Short Route problem is best example of _____.
a) Graphical Method b) Integer Programming
c) Dynamic Programming d) Game Theory
- 11) If rate of customer arrival is 15 person per hour and rate of service is 20 persons per hour then probability of system being idle is _____.
a) 0.5 b) 0.75
c) 1.0 d) 0.25
- 12) An LPP is said to be _____ if has no solution that satisfies all the constraints.
a) Feasible b) Bounded
c) Infeasible d) None of these
- 13) The topmost row in the simplex matrix is called _____.
a) Variable Row b) Objective Row
c) Constraint Row d) None
- 14) Games without a saddle point requires players to play _____.
a) Pure Strategy b) Mixed Strategy
c) Market Strategy d) None

Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
CIVIL ENGINEERING
Optimization Techniques (BTN01714)

Day & Date: Saturday, 18-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
 2) Figures to the right indicate full marks.

Section – I

Q.2 Answer any three.

24

- a) Using Graphical method, Solve

$$\text{Maximize } Z = 10X_1 + 8X_2$$

$$\text{Subject to, } 2X_1 + X_2 \leq 40;$$

$$2X_1 + 3X_2 \leq 80;$$

$$0 \leq X_1;$$

$$0 \leq X_2;$$

- b) Four different jobs can be done on 4 different machines. The set-up and takedown time cost are assumed to be prohibitively high for changeovers. The matrix below gives the cost in rupees for producing job i on machine j.

		Machines			
		M1	M2	M3	M4
Jobs	J1	51	77	49	55
	J2	32	34	59	68
	J3	37	44	70	54
	J4	55	55	58	55

- c) Solve the following game.

		Player B				
		Player A	3	0	6	-1
-1	5		-2	2	1	

- d) Discuss in detail 'Planning' & 'Organising' as a Functions of Management.
 e) Explain the Waiting Line Theory with all its characteristics to single channel waiting line. Discuss with the graph showing waiting time cost, Cost of Services & Total Expected cost.

Q.3 Write a note on any one.

04

- a) Advantages of Simulation Technique
 b) Theory of Games

Section – II

Q.4 Answer any three.

24

- a) What is Break-Even Analysis? Explain with an example. How it is important for material management?
- b) Find The A-Class, B-Class And C-Class Material, for following and draw the Graph.

Item ID	Annual Consumption in unit	Unit Price in Rs
1	700	50
2	2400	30
3	150	100
4	60	220
5	3800	15
6	4000	5
7	6000	2
8	300	35
9	30	80
10	2900	4

- c) A construction company requires 4000 bags of cement per month. Price of each cement bag has 100. If Inventory carrying cost = 20% & procurement costs per order = 50 ₹. Find EOQ & No. of orders company should place.
- d) The following are the mean length & ranges of lengths of finished product from 10 samples of size 5. The specification limits for length are 200 ± 5 cm. Construct \bar{x} and R chart and examine whether the process is under control & state your explanation.

Sample no.	1	2	3	4	5	6	7	8	9	10
Mean \bar{x}	201	198	202	200	203	204	199	196	199	201
Range R	5	0	7	3	4	7	2	8	5	6

- e) Write a note on the ERP system.

Q.5 Write a note on any one.

04

- a) Application of Dynamic Programming
- b) Genetic Algorithm

Seat No.

Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
CIVIL ENGINEERING
Optimization Techniques (BTN01714)

Day & Date: Saturday, 18-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternative from the options. 14

- 1) Economic Order Quantity model helps to find _____.
 a) Optimum size of order b) Annual Requirement of Units
 c) Both of these d) None of these
- 2) At the Break-Even Point _____.
 a) Profit > Loss b) Profit < Loss
 c) Profit = Loss d) None of these
- 3) Hungarian method is suitable for _____.
 a) Assignment Problem b) Transportation Problem
 c) Graphical Method d) Game Theory
- 4) Optimization Means _____.
 a) Maximization
 b) Minimization
 c) Minimization or Maximization
 d) Mean of Minimization & Maximization
- 5) The dual of the dual is _____.
 a) Attributes b) Primal
 c) Dual d) None of these
- 6) Military organization is _____.
 a) Line and Staff b) Matrix
 c) Line d) Functional
- 7) Short Route problem is best example of _____.
 a) Graphical Method b) Integer Programming
 c) Dynamic Programming d) Game Theory
- 8) If rate of customer arrival is 15 person per hour and rate of service is 20 persons per hour then probability of system being idle is _____.
 a) 0.5 b) 0.75
 c) 1.0 d) 0.25
- 9) An LPP is said to be _____ if has no solution that satisfies all the constraints.
 a) Feasible b) Bounded
 c) Infeasible d) None of these

 - 4) Assume suitable data wherever necessary.
 - 5) Draw neat labels diagrams whenever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options.

14

- 1) Hydraulic energy is converted into another form of energy by hydraulic machines. What form of energy is that?

a) Mechanical Energy	b) Electrical Energy
c) Nuclear Energy	d) Elastic Energy
- 2) Which principle is used in Hydraulic Turbines?

a) Faraday law	b) Newton's second law
c) Charles law	d) Braggs law
- 3) In hydraulic turbines, inlet energy is greater than the outlet energy.

a) True	b) False
---------	----------
- 4) _____ is the electric power obtained from the energy of the water.

a) Roto dynamic power	b) Thermal power
c) Nuclear power	d) Hydroelectric power
- 5) A hydel power plant of run-off-river type should be provided with pondage so that the _____.

a) film capacity of the plant is increased
b) operating head is controlled
c) pressure inside the turbine casing remains constant
d) kinetic energy of the running water is fully utilized
- 6) In India, pumped storage power plant _____.

a) does not exist at all	b) exists is Rajasthan alone
c) exists in Kadampurai	d) exists in Haryana
- 7) What is the efficiency of the simple elbow type draft tube?

a) 10	b) 30
c) 60	d) 90
- 8) Run of river plant is one which _____.

a) has a limited pondage	b) has no pondage at all
c) is high head plant	d) is a computer storage plant

Water Power Engineering (BTN01715)

Day & Date: Saturday, 18-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
 2) Assume suitable data if necessary.
 3) Use of only non programmable calculator is allowed.
 4) Draw neat labeled diagrams whenever necessary.
 5) Figures to the right indicates full marks.

Section – I

Q.2 Attempt any four of the following questions. 16

- a) What are the type sources?
- b) Discuss the strength, weaknesses and future prospects of water power India.
- c) What is the classification of hydropower plants. Explain any one in brief.
- d) Common load shared by two stations base load plant with 20 MW capacity and other being standby plant with 32 MW capacity. The yearly output for base load station is 126×10^6 KWh, and for standby station is 10.5×10^6 KWh. The peak load taken by standby station is 15 MW which works for 2500 hrs during the year. The base load station takes peak load as 22.5 MW. Calculate annual load factor, plant use factor, and capacity factor for both the stations.
- e) Calculate the power factor for a utility to supply a maximum 1600 kW of real power, when the reactive power at that time is 1125 kVAR.

Q.3 Attempt any two of the following questions. 12

- a) What do you understand by run-of-river plants? What are the parts and arrangements of such plants? Draw a neat sketch of such plant.
- b) What is water hammer in a pipe line? Derive the expression for the water hammer pressure in case of rigid pipe and elastic pipe.
- c) A penstock, with an internal diameter of 1.20 m, supplies water at a head equivalent to 17.6 kg/cm^2 . There is a possibility of 20% increase in the pressure due to transient conditions. The design stress and the efficiency of the joint may be assumed to be 1020 kg/cm^2 and 85%, respectively. Calculate the approximate wall thickness of the penstock required.

Section – II

Q.4 Attempt any four of the following questions.**16**

- a) What are the important types of turbines? Enlist the factors on which choice of turbine depends.
- b) What do you understand by 'pumped storage' plant? What are the advantages and disadvantages of this power plant?
- c) What are the advantages of reaction turbine over the Pelton wheel in respect of efficiency, size cost and maintenance?
- d) Power house is equipped with 4 units of vertical shaft Pelton turbines to be coupled with 80000 kVA, 3 phase, 50 hertz generators. The generation is provided with 10 pairs of poles. The gross design head is 505 m and transmission efficiency of head race tunnel and penstocks together is to be 94 percent.
The four units together will provide for a power of 256000 KW at a guaranteed efficiency of 91 percent. The nozzle efficiency is 0.98.
Find:-
i) the design discharge for the turbine
ii) jet dia. and no. of jets
iii) the nozzle tip diameter
iv) the pitch circle dia. of the wheel
v) the specific speed and
vi) number of buckets on the wheel
- e) What are the types of intake structures? Explain any one with neat sketch.

Q.5 Attempt any two of the following questions.**12**

- a) What are the important types of turbines? Enlist the factors on which choice of turbine depends.
- b) Describe how ocean tides are generated? With tidal cycle in view describe how hydropower can be generated? Also state the limitations of tidal power generation.
- c) At a hydroelectric power station Kaplan turbine is used which has following data
Operating head = 22.5m
output power at this head = 126 MW,
discharge = 615 m³/sec
speed = 68.2 rpm,
Runner tip to tip diameter = 9.3 m
Hub diameter = 4.3m
Number of blades = 6
Calculate the speed ratio, flow ratio, and the overall efficiency.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options.

14

- 1) Run of river plant is one which _____.
 a) has a limited pondage b) has no pondage at all
 c) is high head plant d) is a computer storage plant
- 2) Cavitations in turbine causes _____.
 a) low efficiency b) damage of blade surface
 c) vibration and noise d) all
- 3) Substructure of a powerhouse should provide space for _____.
 a) turbine governors
 b) generators for horizontal unit
 c) switch board
 d) low tension switches and other auxiliaries
 e) all
- 4) Trap efficiency of reservoir indicate _____.
 a) water trapped b) sediment retained
 c) sediment in flow d) sediment out flow
- 5) Which of the following is not a requirement for site selection of hydroelectric power plant?
 a) Availability of water b) Large catchment area
 c) Rocky land d) Sedimentation
- 6) Which kind of turbines changes the pressure of the water entered through it?
 a) Reaction turbines b) Impulse turbines
 c) Reactive turbines d) Kinetic turbines
- 7) Pelton turbines are mostly _____.
 a) Horizontal b) Vertical
 c) Inclined d) None of the above

- 8) Hydraulic energy is converted into another form of energy by hydraulic machines. What form of energy is that?
- a) Mechanical Energy b) Electrical Energy
c) Nuclear Energy d) Elastic Energy

- a) low efficiency
 - b) damage of blade surface
 - c) vibration and noise
 - d) all
- 14) Substructure of a powerhouse should provide space for _____.
- a) turbine governors
 - b) generators for horizontal unit
 - c) switch board
 - d) low tension switches and other auxiliaries
 - e) all

**Fourth Y. (B. Tech) (Sem-I) (New) (CBCS) Examination: March/April-2024
CIVIL ENGINEERING**

Water Power Engineering (BTN01715)

Day & Date: Saturday, 18-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Assume suitable data if necessary.
3) Use of only non programmable calculator is allowed.
4) Draw neat labeled diagrams whenever necessary.
5) Figures to the right indicates full marks.

Section – I

Q.2 Attempt any four of the following questions. 16

- What are the type sources?
- Discuss the strength, weaknesses and future prospects of water power India.
- What is the classification of hydropower plants. Explain any one in brief.
- Common load shared by two stations base load plant with 20 MW capacity and other being standby plant with 32 MW capacity. The yearly output for base load station is 126×10^6 KWh, and for standby station is 10.5×10^6 KWh. The peak load taken by standby station is 15 MW which works for 2500 hrs during the year. The base load station takes peak load as 22.5 MW. Calculate annual load factor, plant use factor, and capacity factor for both the stations.
- Calculate the power factor for a utility to supply a maximum 1600 kW of real power, when the reactive power at that time is 1125 kVAR.

Q.3 Attempt any two of the following questions. 12

- What do you understand by run-of-river plants? What are the parts and arrangements of such plants? Draw a neat sketch of such plant.
- What is water hammer in a pipe line? Derive the expression for the water hammer pressure in case of rigid pipe and elastic pipe.
- A penstock, with an internal diameter of 1.20 m, supplies water at a head equivalent to 17.6 kg/cm^2 . There is a possibility of 20% increase in the pressure due to transient conditions. The design stress and the efficiency of the joint may be assumed to be 1020 kg/cm^2 and 85%, respectively. Calculate the approximate wall thickness of the penstock required.

Section – II

Q.4 Attempt any four of the following questions.**16**

- a) What are the important types of turbines? Enlist the factors on which choice of turbine depends.
- b) What do you understand by 'pumped storage' plant? What are the advantages and disadvantages of this power plant?
- c) What are the advantages of reaction turbine over the Pelton wheel in respect of efficiency, size cost and maintenance?
- d) Power house is equipped with 4 units of vertical shaft Pelton turbines to be coupled with 80000 kVA, 3 phase, 50 hertz generators. The generation is provided with 10 pairs of poles. The gross design head is 505 m and transmission efficiency of head race tunnel and penstocks together is to be 94 percent.
The four units together will provide for a power of 256000 KW at a guaranteed efficiency of 91 percent. The nozzle efficiency is 0.98.
Find:-
- i) the design discharge for the turbine
 - ii) jet dia. and no. of jets
 - iii) the nozzle tip diameter
 - iv) the pitch circle dia. of the wheel
 - v) the specific speed and
 - vi) number of buckets on the wheel
- e) What are the types of intake structures? Explain any one with neat sketch.

Q.5 Attempt any two of the following questions.**12**

- a) What are the important types of turbines? Enlist the factors on which choice of turbine depends.
- b) Describe how ocean tides are generated? With tidal cycle in view describe how hydropower can be generated? Also state the limitations of tidal power generation.
- c) At a hydroelectric power station Kaplan turbine is used which has following data
Operating head = 22.5m
output power at this head = 126 MW,
discharge = 615 m³/sec
speed = 68.2 rpm,
Runner tip to tip diameter = 9.3 m
Hub diameter = 4.3m
Number of blades = 6
Calculate the speed ratio, flow ratio, and the overall efficiency.

Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
CIVIL ENGINEERING
Water Power Engineering (BTN01715)

Day & Date: Saturday, 18-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:**
- 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No.3 (starting page of the Answer Book). Each question carry one mark.
 - 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 - 3) Figures to the right indicates full marks.
 - 4) Assume suitable data wherever necessary.
 - 5) Draw neat labels diagrams whenever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options.

14

- 1) In India, pumped storage power plant _____.
 a) does not exist at all b) exists in Rajasthan alone
 c) exists in Kadampurai d) exists in Haryana
- 2) What is the efficiency of the simple elbow type draft tube?
 a) 10 b) 30
 c) 60 d) 90
- 3) Run of river plant is one which _____.
 a) has a limited pondage b) has no pondage at all
 c) is high head plant d) is a computer storage plant
- 4) Cavitations in turbine causes _____.
 a) low efficiency b) damage of blade surface
 c) vibration and noise d) all
- 5) Substructure of a powerhouse should provide space for _____.
 a) turbine governors
 b) generators for horizontal unit
 c) switch board
 d) low tension switches and other auxiliaries
 e) all
- 6) Trap efficiency of reservoir indicate _____.
 a) water trapped b) sediment retained
 c) sediment in flow d) sediment out flow
- 7) Which of the following is not a requirement for site selection of hydroelectric power plant?
 a) Availability of water b) Large catchment area
 c) Rocky land d) Sedimentation
- 8) Which kind of turbines changes the pressure of the water entered through it?
 a) Reaction turbines b) Impulse turbines
 c) Reactive turbines d) Kinetic turbines

4) Assume suitable data wherever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options.

14

- 1) Acid Rain is caused by Oxides of _____.
a) Phosphorus and Carbon b) Sulphur and Nitrogen
c) Sulphur and Phosphorus d) Nitrogen and Carbon
- 2) In cyclone gas flow reverses from _____ part.
a) Vortex finder b) Conical
c) Cylindrical d) Outlet
- 3) ESP can give particulate removal efficiency upto _____%.
a) 90 b) 95
c) 97 d) 99.99
- 4) Packed bed tower is a type of _____.
a) Stack monitoring kit b) Dry collector
c) Wet collector d) Bag house filter
- 5) _____ prevents upward movement of air pollutants if it exists in atmosphere.
a) DALR b) Wind
c) Clouds d) An inversion
- 6) In tray type gravity settler, trays are fixed to _____ the efficiency.
a) Decrease b) Increase
c) Keep Constant d) None of above
- 7) Photochemical smog commonly occurs in _____ area.
a) Urban b) Motorized
c) Both a and b d) None of these
- 8) Bags in bag house filter are _____ m in length.
a) 12-40 b) 10-15
c) 15-20 d) 2-10
- 9) Fugitive emissions consist of _____.
a) Street dust
b) Dust from construction activities
c) Dust from farm cultivation
d) All of the above

- 10)** The depletion of ozone in outer atmosphere may result in increased _____.
a) Heart attack cases b) Skin cancer cases
c) Asthma cases d) None of these
- 11)** Concentration of pollutants in stack emissions can be measured by _____.
a) High volume sampler b) Stack monitoring kit
c) Thermometer d) Hygrometer
- 12)** As per NAAQS (old), standard for PM₁₀ for eco-sensitive area considering annual average is _____ micrograms/m³.
a) 60 b) 100
c) 8 d) 80
- 13)** Noise pollution is created if sound is in excess to _____.
a) 70-75 dB b) 50-60 dB
c) 80-99 dB d) 40-65 dB
- 14)** Day time noise standard prescribed for residential areas in India is _____.
a) 75 dB b) 65 dB
c) 50 dB d) 55 dB

Air and Noise Pollution and Control (BTN01716)

Day & Date: Saturday, 18-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) Q.No.2 & Q.No.6 is compulsory. Attempt any two questions from the remaining questions from each section.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever needed and mention it clearly.

Section – I

- Q.2** a) Explain with neat sketch plume behavior. **05**
b) Explain the different sources of particulate matter. Illustrate with examples. **05**
- Q.3** a) Discuss effect of SO₂ in presence of SPM on human health with the help of tabular format. **05**
b) What is meant by radiation inversion and subsidence inversion? Explain with sketch. **04**
- Q.4** a) Give Gaussian dispersion model equation used for prediction of concentration of air pollutants. **04**
b) A factory uses 200000 litre of fuel oil per month. The exhaust gases from factory contain the following quantities of pollutant per ML per year: **05**
i) Particulate matter = 3 tonnes
ii) Sulphur dioxide = 59.7 tonnes
iii) Hydrocarbons = 0.37 tonnes
iv) Carbon monoxide = 0.52 tonnes
Determine the safe height of chimney required for safe dispersion of pollutants.
- Q.5** a) What is stack monitoring? Write in detail isokinetic sampling? Explain in detail with the help of figures. **04**
b) A conventional cyclone with diameter 1 m handles 3 m³/sec of air carrying particles of density 2000 kg/m³. Number of effective turns = 6. Determine cut size diameter (dpc) if $\mu = 1.81 \times 10^{-5}$ kg/m.sec. **05**
(Note - treat it as a standard cyclone).

Section – II

- Q.6** a) Explain working of gravity settling chamber with neat sketch. Also write advantages and disadvantages. **05**
b) A settling chamber is designed for removing 90 μ dia. Particles with 100% efficiency. The particulate matter density is 1250 kg/m³. Depth and width of chamber is 2.2 m each. Determine: **05**
i) Length of chamber required without trays
ii) Length of chamber with 10 trays

- Q.7** a) An ESP with overall spacing of 0.23 cm and mean gas velocity 1.5 m/s has collector plate area of 5000 m² gives efficiency of 97% in treating 200 m³/s of gas. To achieve 98% and 99% efficiency. What should be plate area required? **05**
- b) Explain the principle working of wet scrubber. **04**
- Q.8** a) Discuss in brief the sources of noise. **04**
- b) Explain decibel scale with sample sound level and frequency of sound waves. **05**
- Q.9** **Write short notes on the following:** **09**
- a) National ambient quality standards for noise
- b) Effects of noise on health
- c) Instrumentation Requirements in noise

 - b) Stack monitoring kit
 - c) Thermometer
 - d) Hygrometer
- 7) As per NAAQS (old), standard for PM₁₀ for eco-sensitive area considering annual average is _____ micrograms/m³.
 - a) 60
 - b) 100
 - c) 8
 - d) 80
- 8) Noise pollution is created if sound is in excess to _____.
 - a) 70-75 dB
 - b) 50-60 dB
 - c) 80-99 dB
 - d) 40-65 dB

**Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
CIVIL ENGINEERING**

Air and Noise Pollution and Control (BTN01716)

Day & Date: Saturday, 18-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) Q.No.2 & Q.No.6 is compulsory. Attempt any two questions from the remaining questions from each section.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever needed and mention it clearly.

Section – I

- Q.2** a) Explain with neat sketch plume behavior. **05**
b) Explain the different sources of particulate matter. Illustrate with examples. **05**
- Q.3** a) Discuss effect of SO₂ in presence of SPM on human health with the help of tabular format. **05**
b) What is meant by radiation inversion and subsidence inversion? Explain with sketch. **04**
- Q.4** a) Give Gaussian dispersion model equation used for prediction of concentration of air pollutants. **04**
b) A factory uses 200000 litre of fuel oil per month. The exhaust gases from factory contain the following quantities of pollutant per ML per year: **05**
i) Particulate matter = 3 tonnes
ii) Sulphur dioxide = 59.7 tonnes
iii) Hydrocarbons = 0.37 tonnes
iv) Carbon monoxide = 0.52 tonnes
Determine the safe height of chimney required for safe dispersion of pollutants.
- Q.5** a) What is stack monitoring? Write in detail isokinetic sampling? Explain in detail with the help of figures. **04**
b) A conventional cyclone with diameter 1 m handles 3 m³/sec of air carrying particles of density 2000 kg/m³. Number of effective turns = 6. Determine cut size diameter (dpc) if $\mu = 1.81 \times 10^{-5}$ kg/m.sec. **05**
(Note - treat it as a standard cyclone).

Section – II

- Q.6** a) Explain working of gravity settling chamber with neat sketch. Also write advantages and disadvantages. **05**
b) A settling chamber is designed for removing 90 μ dia. Particles with 100% efficiency. The particulate matter density is 1250 kg/m³. Depth and width of chamber is 2.2 m each. Determine: **05**
i) Length of chamber required without trays
ii) Length of chamber with 10 trays

- Q.7** a) An ESP with overall spacing of 0.23 cm and mean gas velocity 1.5 m/s has collector plate area of 5000 m² gives efficiency of 97% in treating 200 m³/s of gas. To achieve 98% and 99% efficiency. What should be plate area required? **05**
- b) Explain the principle working of wet scrubber. **04**
- Q.8** a) Discuss in brief the sources of noise. **04**
- b) Explain decibel scale with sample sound level and frequency of sound waves. **05**
- Q.9** **Write short notes on the following:** **09**
- a) National ambient quality standards for noise
- b) Effects of noise on health
- c) Instrumentation Requirements in noise

Recovery, Rehabilitation and Reconstruction (BTN01717)

Day & Date: Sunday, 19-05-2024

Max. Marks: 70

Time: 03:00 PM To 06:00 PM

- Instructions:**
- 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No.3 (starting page of the Answer Book). Each question carry one mark.
 - 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 - 3) Figures to the right indicates full marks.
 - 4) Assume suitable data wherever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) What is vulnerability in the context of development?
 - a) A measure of economic growth
 - b) The state of being exposed to the risk of harm or damage
 - c) A synonym for resilience
 - d) The level of technological advancement
- 2) How does vegetation and afforestation contribute to disaster mitigation?
 - a) By creating barriers to emergency responders
 - b) By increasing vulnerability to disasters
 - c) By providing natural barriers against floods, landslides, and soil erosion
 - d) By promoting deforestation
- 3) Which of the following organization is the apex authority of disaster management in India?

a) NDA	b) NDMA
c) CDMA	d) INDR
- 4) What is the role of media in disaster communication?
 - a) To promote misinformation and confusion
 - b) To limit public awareness
 - c) To provide timely and accurate information to the public, fostering preparedness and response
 - d) To ignore the needs of vulnerable populations
- 5) Which international agency is often involved in providing financial assistance for poverty reduction and development projects in developing countries?
 - a) United Nations Educational, Scientific and Cultural Organization (UNESCO)
 - b) World Health Organization (WHO)
 - c) World Bank
 - d) International Labour Organization (ILO)

- 6) In flood-prone areas, what feature is important for the ground floor of a disaster resistant house?
- a) Elevated foundation
 - b) Basement
 - c) Slab foundation
 - d) Sunken living room
- 7) How does gender play a role in socio-economic rehabilitation efforts?
- a) It is irrelevant to rehabilitation strategies
 - b) Women are excluded from rehabilitation programs
 - c) Gender-specific needs are considered for inclusive rehabilitation
 - d) Men are prioritized over women in all programs.
- 8) What is the significance of community participation in socio-economic rehabilitation?
- a) It delays the recovery process
 - b) It ensures that rehabilitation efforts align with local needs and priorities
 - c) It hinders external intervention
 - d) It increases dependency on aid organizations
- 9) What is the role of baseline data in the monitoring process?
- a) To determine the final project outcome
 - b) To establish a reference point for measuring changes and impacts
 - c) To identify the individuals responsible for the project
 - d) To compare different rehabilitation projects
- 10) What is the role of prioritization in time management during a disaster?
- a) To focus solely on non-urgent tasks
 - b) To identify and address high-priority and time-sensitive activities
 - c) To promote procrastination
 - d) To discourage collaboration with external agencies
- 11) Why is community involvement crucial in sustainable development initiatives?
- a) It increases bureaucratic hurdles
 - b) It ensures local needs are considered and met
 - c) It leads to inefficient resource allocation
 - d) It hinders the implementation of projects
- 12) What is the primary goal of Emergency Health Operations (EHO) during a crisis?
- a) To prioritize routine health services
 - b) To expedite non-emergency medical procedures
 - c) To ensure the timely and effective delivery of health services in response to a crisis
 - d) To minimize community involvement
- 13) What is the purpose of a lightning rod in disaster-resistant construction?
- a) Prevent earthquakes
 - b) Reduce wind impact
 - c) Protect against lightning strikes
 - d) Enhance insulation
- 14) What role does feedback play in the monitoring and evaluation process?
- a) It is irrelevant to the process
 - b) It helps identify areas for improvement and informs decision making
 - c) It is solely for public relations purposes
 - d) It is only necessary at the project's conclusion

Recovery, Rehabilitation and Reconstruction (BTN01717)

Day & Date: Sunday, 19-05-2024

Max. Marks: 56

Time: 03:00 PM To 06:00 PM

- Instructions:** 1) Question no. 2 is compulsory in section I, and solve any two questions from the remaining. (Q. No. 3, 4 & 5)
2) Question no. 6 is compulsory in section II, and solve any two questions from the remaining. (Q. No. 7, 8 & 9)
3) Figures to the right indicate full marks.

Section – I

- Q.2** a) Give the classification of damage as per the Medvedev- Sponheuer- Karnik (MSK) Scale of 1964. **04**
b) Write short note on Disaster Management Act. **03**
c) Write note on Fiscal Discipline. **03**
- Q.3** a) Write the importance of Disaster mitigation. **05**
b) What are the objectives of damage assessment? **04**
- Q.4** a) What do you mean by Economic Infrastructure? Explain development of Economic Infrastructure. **05**
b) Write Key elements of contingency plans for reconstructions. **04**
- Q.5** a) Mention various guidelines for disaster resistant construction. **05**
b) Write short note on Prime Minister's National Relief Fund. **04**

Section – II

- Q.6** a) What are the key steps and considerations for evaluating rehabilitation work? **04**
b) What is Speedy recovery? What is its Importance? **03**
c) What is Significance of Coordination? **03**
- Q.7** a) Write note on rehabilitation of artisans and small businessmen affected due to Disasters. **05**
b) What are the roles of Information Dissemination? **04**
- Q.8** a) What is the importance and challenges in creating Long-term Jobs? **05**
b) What are the principles of Safe Development in Recovery? **04**
- Q.9** a) Write note on safe drinking water and response strategies for it after disaster. **05**
b) Write short note on Emergency Health Operations. **04**

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the given options.

14

- 1) _____ following are components of bridges.

a) Pier	b) Abutment
c) Foundation	d) All of these
- 2) Factors affecting Selection of Type of Bridge and Bridge Site are _____.

a) The nature and bed conditions of river or stream
b) Hydraulic data collected at the site
c) The climatic condition of the area
d) All of these
- 3) Abutment of Bridge is _____.

a) Foundation	b) End pier
c) Bearing	d) All of these
- 4) Types of grades separated structures are _____.

a) Overpass	b) Under pass
c) Flyover	d) All of these
- 5) Types of Bridge foundations are _____.

a) Caisson Foundation	b) Pile foundation
c) Pier Foundation	d) All of these
- 6) Steps involved in the Construction of Diaphragm Walls are _____.

a) Excavation Preparation	b) Slurry Trench
c) Concrete Pouring	d) All of these
- 7) Pipe jacking involves moving _____ to the ground.

a) Box	b) Pipe
c) both a and b	d) All of these
- 8) Launching girders for bridges involves the following steps _____.

a) Planning and Design	b) Fabrication
c) Transportation to the Site	d) All of these

- 9) Offshore platforms are _____.
- a) Structure built in lake
 - b) Structure built on the sea
 - c) Structure built in the pond
 - d) All of these
- 10) Material handling is _____.
- a) Process of change of material
 - b) Process of transporting, lifting, and placing various construction materials and equipment.
 - c) Process of finding Quality of Construction Material.
 - d) Process of finding Quantity of Construction Material
- 11) Erecting lightweight components on tall structures in bridges requires _____.
- a) Engineering and Design
 - b) Assembly and Connection
 - c) Specialized Equipment
 - d) All of these
- 12) The cross section of a pier may be _____.
- a) with triangular edges towards upstream and downstream sides
 - b) with curved faces on upstream and downstream sides
 - c) rectangular
 - d) all the above
- 13) Ground improvement techniques are _____.
- a) Compaction
 - b) Grouting
 - c) Deep Soil Mixing
 - d) All of these
- 14) What is the basis for PERT analysis?
- a) An optimistic time
 - b) A pessimistic period of time
 - c) The date that is most likely
 - d) All options mentioned above

Seat No.

Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
CIVIL ENGINEERING
Bridge and Grade Separated Structures (BTN01718)

Day & Date: Sunday, 19-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
 2) Assume suitable data wherever needed & mention it clearly.
 3) Draw neat sketches wherever necessary.
 4) Figures to the right indicates full marks.

Section – I

- Q.2 Answer the following questions (Any Two) 14**
 a) Enlist and explain various types of grade separated structures.
 b) Explain in detail 'Pipe Jacking'
 c) Enlist and explain various types of 'Tunneling Techniques' used in the construction.
- Q.3 Answer the following questions (Any Two) 14**
 a) Explain the construction process for 'Diaphragm Walls'.
 b) Explain in detail, 'Strengthening of bridges'.
 c) Enlist and explain various types of bridge bearings.

Section – II

- Q.4 Answer the following questions (Any Two) 14**
 a) Explain various types of Ground Improvement Techniques in detail.
 b) Explain in detail 'Wing Wall'.
 c) Explain in detail, 'Maintenance and management of construction equipment'.
- Q.5 Answer the following questions (Any Two) 14**
 a) Discuss methods for calculation of depreciation of construction equipment.
 b) Explain the concept of 'Work-Breakdown-Structure' (WBS).
 c) The following table shows the list of activities and their durations. Calculate the project duration and critical path of the network.

Activity	Duration (Weeks)	Depends on
A	2	-
B	4	A
C	3	A
D	6	B,C
E	7	B
F	3	D,E

Seat No.

Bridge and Grade Separated Structures (BTN01718)

Day & Date: Sunday, 19-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No. 3 (starting page of the Answer Book). Each question carry one mark.
2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever needed and mention it clearly.
5) Draw neat sketches wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the given options.

14

- 1) Launching girders for bridges involves the following steps _____.
 - a) Planning and Design
 - b) Fabrication
 - c) Transportation to the Site
 - d) All of these
- 2) Offshore platforms are _____.
 - a) Structure built in lake
 - b) Structure built on the sea
 - c) Structure built in the pond
 - d) All of these
- 3) Material handling is _____.
 - a) Process of change of material
 - b) Process of transporting, lifting, and placing various construction materials and equipment.
 - c) Process of finding Quality of Construction Material.
 - d) Process of finding Quantity of Construction Material
- 4) Erecting lightweight components on tall structures in bridges requires _____.
 - a) Engineering and Design
 - b) Assembly and Connection
 - c) Specialized Equipment
 - d) All of these
- 5) The cross section of a pier may be _____.
 - a) with triangular edges towards upstream and downstream sides
 - b) with curved faces on upstream and downstream sides
 - c) rectangular
 - d) all the above
- 6) Ground improvement techniques are _____.
 - a) Compaction
 - b) Grouting
 - c) Deep Soil Mixing
 - d) All of these

- 7) What is the basis for PERT analysis?
a) An optimistic time
b) A pessimistic period of time
c) The date that is most likely
d) All options mentioned above
- 8) _____ following are components of bridges.
a) Pier
b) Abutment
c) Foundation
d) All of these
- 9) Factors affecting Selection of Type of Bridge and Bridge Site are _____.
a) The nature and bed conditions of river or stream
b) Hydraulic data collected at the site
c) The climatic condition of the area
d) All of these
- 10) Abutment of Bridge is _____.
a) Foundation
b) End pier
c) Bearing
d) All of these
- 11) Types of grades separated structures are _____.
a) Overpass
b) Under pass
c) Flyover

Sustainable Engineering & Technology (BTN01719)

Day & Date: Sunday, 19-05-2024

Max. Marks: 70

Time: 03:00 PM To 06:00 PM

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No. 3 (starting page of the Answer Book). Each question carry one mark.
2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Multiple Choice Questions.

14

- 1) Which of the following is an example of a sustainable engineering practice?
 - a) Designing products for single use and disposability
 - b) Using non renewable energy sources exclusively
 - c) Reducing waste generation and promoting recycling
 - d) All of above
- 2) Which of the following accounts for T in the IPAT equation?
 - a) Time
 - b) Threshold population
 - c) Technology
 - d) None of the above
- 3) Which of the following is the least energy efficient system?
 - a) Internal combustion engine
 - b) Fuel cell
 - c) Incandescent light
 - d) Human body
- 4) What is the main objective of sustainable engineering?
 - a) To minimize environmental impact while maximizing social and economic benefits
 - b) To maximize profits for engineering companies
 - c) To prioritize social benefits over environmental considerations
 - d) To focus solely on technological advancements
- 5) What is the 6RE philosophy in life cycle thinking?
 - a) Reduce, Remove, Replace, Recycle, Reuse, Rethink
 - b) Repair, Remove, Replace, Recycle, Reuse, Rethink
 - c) Reduce, Repair, Replace, Recycle, Reuse, Rethink
 - d) Reduce, Remove, Replace, Repair, Reuse, Rethink
- 6) Which of the following is a measure for central tendency?
 - a) Mean
 - b) Mode
 - c) Median
 - d) All of the above

- 7) Which of the following stage is not included in ISO-14040 framework for life cycle assessment?
- Life Cycle Impact Assessment (LCIA)
 - Goal and Scope Definition
 - Life Cycle Enhancement (LCE)
 - Life Cycle Inventory (LCI)
- 8) What is the significance of impact category and damage category in impact assessment approaches?
- Damage category causes more severe effect than impact category
 - Damage category is only considered when impact category could not evaluate actual impact
 - Damage category is assessed by weighing the impacts from impact categories and indicates the ultimate harm to environment and human
 - None of the above
- 9) Which of the following is a common database used during LCA?
- Economic database
 - Ecological database
 - Ecocycle database
 - Ecoinvent database
- 10) What are the limitations of LCA?
- Only environmental impact is accounted, socioeconomic aspects are not assessed
 - LCA depends on data quality
 - LCA provides global perspective
 - a) & b)
- 11) Basel Convention is related to: _____.
- Earth Summit
 - Ozone Layer Depletion
 - Sustainable Development
 - Transboundary Movement of Hazardous Wastes
- 12) What is the main source for the formation of wind?
- Uneven land
 - Sun
 - Vegetation
 - Seasons
- 13) Biomass is useful to produce _____.
- Chemicals
 - Fibres
 - Biochemicals
 - Transportation fuels
- 14) UNCED stands for: _____.
- United Nations Conference on Environment and Development
 - United Nations Conference on Economical Development
 - United Nations Confederation on Environment and Development
 - United Nations Confederation on Economy and Development

- 1) Basel Convention is related to: _____.
 - a) Earth Summit
 - b) Ozone Layer Depletion
 - c) Sustainable Development
 - d) Transboundary Movement of Hazardous Wastes
- 2) What is the main source for the formation of wind?
 - a) Uneven land
 - b) Sun
 - c) Vegetation
 - d) Seasons
- 3) Biomass is useful to produce _____.
 - a) Chemicals
 - b) Fibres
 - c) Biochemicals
 - d) Transportation fuels
- 4) UNCED stands for: _____.
 - a) United Nations Conference on Environment and Development
 - b) United Nations Conference on Economical Development
 - c) United Nations Confederation on Environment and Development
 - d) United Nations Confederation on Economy and Development
- 5) Which of the following is an example of a sustainable engineering practice?
 - a) Designing products for single use and disposability
 - b) Using non renewable energy sources exclusively
 - c) Reducing waste generation and promoting recycling
 - d) All of above
- 6) Which of the following accounts for T in the IPAT equation?
 - a) Time
 - b) Threshold population
 - c) Technology
 - d) None of the above
- 7) Which of the following is the least energy efficient system?
 - a) Internal combustion engine
 - b) Fuel cell
 - c) Incandescent light
 - d) Human body

- 8) What is the main objective of sustainable engineering?
- a) To minimize environmental impact while maximizing social and economic benefits
 - b) To maximize profits for engineering companies
 - c) To prioritize social benefits over environmental considerations
 - d) To focus solely on technological advancements
- 9) What is the 6RE philosophy in life cycle thinking?
- a) Reduce, Remove, Replace, Recycle, Reuse, Rethink
 - b) Repair, Remove, Replace, Recycle, Reuse, Rethink
 - c) Reduce, Repair, Replace, Recycle, Reuse, Rethink
 - d) Reduce, Remove, Replace, Repair, Reuse, Rethink
- 10) Which of the following is a measure for central tendency?
- a) Mean
 - b) Mode
 - c) Median
 - d) All of the above
- 11) Which of the following stage is not included in ISO-14040 framework for life cycle assessment?
- a) Life Cycle Impact Assessment (LCIA)
 - b) Goal and Scope Definition
 - c) Life Cycle Enhancement (LCE)
 - d) Life Cycle Inventory (LCI)
- 12) What is the significance of impact category and damage category in impact assessment approaches?
- a) Damage category causes more severe effect than impact category
 - b) Damage category is only considered when impact category could not evaluate actual impact
 - c) Damage category is assessed by weighing the impacts from impact categories and indicates the ultimate harm to environment and human
 - d) None of the above
- 13) Which of the following is a common database used during LCA?
- a) Ecoinvent database
 - b) Ecologistics database
 - c) Ecocycle database
 - d) Ecoinvent database
- 14) What are the limitations of LCA?
- a) Only environmental impact is accounted, socioeconomic aspects are not assessed
 - b) LCA depends on data quality
 - c) LCA provides global perspective
 - d) a) & b)

**Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
CIVIL ENGINEERING**

Sustainable Engineering & Technology (BTN01719)

Day & Date: Sunday, 19-05-2024

Max. Marks: 56

Time: 03:00 PM To 06:00 PM

- Instructions:** 1) Q. No. 2 compulsory in section I, and solve any two questions from remaining.
2) Q. No. 6 is compulsory in section II, and solve any two questions from remaining.
3) Figures to right indicate full marks.
4) Assume suitable data wherever necessary and mention it clearly.
5) Use of non-programable calculator is allowed.

Section – I

- | | | | |
|------------|----|--------------------------------------------------------------------------------------|-----------|
| Q.2 | a) | Analyse nexus between Technology and Sustainable development. | 05 |
| | b) | Compare Social, environmental and economic sustainability concepts for Solapur city. | 05 |
| Q.3 | a) | Discuss reuse of concrete as construction materials in detail. | 05 |
| | b) | Illustrate zero waste concept in detail. | 04 |
| Q.4 | a) | Categorize Clean Development Mechanism in detail. | 05 |
| | b) | Inspect connection between sustainability concepts and sustainability development. | 04 |
| Q.5 | a) | Illustrate global warming concept in detail. | 05 |
| | b) | Analyse numerous effects of climate change in detail. | 04 |

Section – II

- | | | | |
|------------|----|------------------------------------------------------------------------------------------|-----------|
| Q.6 | a) | Categorize frame work and benefits of ISO 14001:2015 in detail. | 05 |
| | b) | Intercept effects Circular economy in planning of city. | 05 |
| Q.7 | a) | Categorize numerous effects of ozone layer depletion in modern world. | 05 |
| | b) | Explain legal provisions for environmental protection in India in brief. | 04 |
| Q.8 | a) | Intercept symbiosis of ecology and industrial development in preserving the environment. | 05 |
| | b) | Discuss Liquid flat Plate collector with a neat diagram. | 04 |
| Q.9 | a) | Define and explain conventional and non-conventional energy resources in detail. | 05 |
| | b) | Categorize numerous practices following in maintaining the sustainable city in general. | 04 |

Sustainable Engineering & Technology (BTN01719)

Day & Date: Sunday, 19-05-2024

Max. Marks: 70

Time: 03:00 PM To 06:00 PM

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No. 3 (starting page of the Answer Book). Each question carry one mark.
2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Multiple Choice Questions.

14

- 1) Which of the following is a measure for central tendency?
 - a) Mean
 - b) Mode
 - c) Median
 - d) All of the above

- 2) Which of the following stage is not included in ISO-14040 framework for life cycle assessment?
 - a) Life Cycle Impact Assessment (LCIA)
 - b) Goal and Scope Definition
 - c) Life Cycle Enhancement (LCE)
 - d) Life Cycle Inventory (LCI)

- 3) What is the significance of impact category and damage category in impact assessment approaches?
 - a) Damage category causes more severe effect than impact category
 - b) Damage category is only considered when impact category could not evaluate actual impact
 - c) Damage category is assessed by weighing the impacts from impact categories and indicates the ultimate harm to environment and human
 - d) None of the above

- 4) Which of the following is a common database used during LCA?
 - a) Econscious database
 - b) Ecologistics database
 - c) Ecocycle database
 - d) Ecoinvent database

- 5) What are the limitations of LCA?
 - a) Only environmental impact is accounted, socioeconomic aspects are not assessed
 - b) LCA depends on data quality
 - c) LCA provides global perspective
 - d) a) & b)

- 6) Basel Convention is related to: _____.
- Earth Summit
 - Ozone Layer Depletion
 - Sustainable Development
 - Transboundary Movement of Hazardous Wastes
- 7) What is the main source for the formation of wind?
- Uneven land
 - Sun
 - Vegetation
 - Seasons
- 8) Biomass is useful to produce _____.
- Chemicals
 - Fibres
 - Biochemicals
 - Transportation fuels
- 9) UNCED stands for: _____.
- United Nations Conference on Environment and Development
 - United Nations Conference on Economical Development
 - United Nations Confederation on Environment and Development
 - United Nations Confederation on Economy and Development
- 10) Which of the following is an example of a sustainable engineering practice?
- Designing products for single use and disposability
 - Using non renewable energy sources exclusively
 - Reducing waste generation and promoting recycling
 - All of above
- 11) Which of the following accounts for T in the IPAT equation?
- Time
 - Threshold population
 - Technology
 - None of the above
- 12) Which of the following is the least energy efficient system?
- Internal combustion engine
 - Fuel cell
 - Incandescent light
 - Human body
- 13) What is the main objective of sustainable engineering?
- To minimize environmental impact while maximizing social and economic benefits
 - To maximize profits for engineering companies
 - To prioritize social benefits over environmental considerations
 - To focus solely on technological advancements
- 14) What is the 6RE philosophy in life cycle thinking?
- Reduce, Remove, Replace, Recycle, Reuse, Rethink
 - Repair, Remove, Replace, Recycle, Reuse, Rethink
 - Reduce, Repair, Replace, Recycle, Reuse, Rethink
 - Reduce, Remove, Replace, Repair, Reuse, Rethink

CIVIL ENGINEERING**

Civil Engineering System Analysis and Design (BTN01720)

Day & Date: Sunday, 19-05-2024

Max. Marks: 70

Time: 03:00 PM To 06:00 PM

- Instructions:**
- 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No. 3 (starting page of the Answer Book). Each MCQ carry one marks.
 - 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 - 3) Figures to the right indicates full marks.
 - 4) Assume suitable data wherever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options.

14

- 1) _____ is set of components that work together for overall objectives.

a) System	b) Goals
c) Objective	d) None of these
- 2) _____ is termed as performance measure, simply an objective that stated in measurable terms.

a) Measure of Effectiveness	b) Dimension
c) Planning	d) None
- 3) Which of the following is not property desired MOE?

a) Appropriateness	b) Measurability
c) Realistic	d) Cost Saving
- 4) The super systems are _____.

a) Higher level systems	b) Lower level systems
c) Both	d) None of these
- 5) _____ models describe the amount of money needed to undertake specific action.

a) Demand	b) Cost
c) Real	d) Supply
- 6) Which of the following is tool for task of description?

a) Probability	b) Statistics
c) Economics	d) All of the above
- 7) _____ models are that use the mathematics of decision making to choose a course of action, design or policy.

a) Prescriptive	b) Descriptive
c) Analog	d) Real
- 8) _____ provides basis for predicting the need for proposed civil system.

a) Planning	b) Need Assessment
c) Controlling	d) None

Civil Engineering System Analysis and Design (BTN01720)

Day & Date: Sunday, 19-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever needed and mention it clearly.
4) Use of non-programmable calculator is allowed.

Section – I

- Q.2 Solve any four of following. 28**
- a) Explain various classification of system.
 - b) Explain hierarchy of desired outcomes: Values, Goals, Objectives.
 - c) Classify different models with examples.
 - d) Explain Traditional tasks of analyzing systems in civil engineering.
 - e) Explain examples of tasks at each phase of civil system development.
 - f) Explain development of civil engineering system.

Section – II

- Q.3 Solve any four of following. 28**
- a) Explain engineering design process in detail with sketch.
 - b) Explain process for system planning.
 - c) i) Explain assessment of system needs.
ii) Explain Initial vs Recurring needs & Growing vs Sudden needs.
 - d) Explain classification of engineering design with examples.
 - e) Explain various principles of planning in detail.
 - f) Explain various of mechanisms for need assessment of system.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options. 14

- 1) _____ provides basis for predicting the need for proposed civil system.
 - a) Planning
 - b) Need Assessment
 - c) Controlling
 - d) None
- 2) A _____ may be defined as deficiency, an unfulfilled requirement, lack of product that is necessary.
 - a) Supply
 - b) Need
 - c) None
 - d) All of these
- 3) Which of the following is the stakeholder of system?
 - a) Users
 - b) Community
 - c) System Owner
 - d) All
- 4) From _____ perspective, the system inputs considered in system planning could have short term, moderate term & long term effects.
 - a) Temporal
 - b) Operational
 - c) Phase
 - d) None
- 5) Which of the following is classification of design?
 - a) Selection Design
 - b) Configuration Design
 - c) Both of the above
 - d) None of the above
- 6) In Preliminary Design, analysis & evaluation of design is done on _____ stage.
 - a) Detailed
 - b) Conceptual
 - c) Multiple
 - d) Preliminary
- 7) In _____ design, analysis & evaluation of alternative designs is done in details.
 - a) Conceptual
 - b) Preliminary
 - c) Detailed
 - d) None
- 8) _____ is set of components that work together for overall objectives.
 - a) System
 - b) Goals
 - c) Objective
 - d) None of these
- 9) _____ is termed as performance measure, simply an objective that stated in measurable terms.

Day & Date: Wednesday, 15-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume additional data if required and mention it clearly.

MCQ/Objective Type Questions

Duration: 20 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options. 14

- 1) The Damp Proof Course (D.P.C.) is measured in _____.
 - a) Cub.m.
 - b) Sq.m.
 - c) Metres
 - d) None of these
- 2) The excavation exceeding 1.5 m in width and 10 sq.m, in plan area with a depth not exceeding 30 cm, is termed as _____.
 - a) Excavation
 - b) Surface dressing
 - c) Cutting
 - d) Surface excavation
- 3) In normal circumstances, minimum period before striking vertical formwork of columns, beams shall be _____.
 - a) 16-24 Hr.
 - b) 7 days
 - c) 14 days
 - d) 21 days
- 4) In rate analysis, salary of technical personnel engaged for the work are covered in _____.
 - a) Labour cost
 - b) General overheads
 - c) Job overheads
 - d) Contingencies
- 5) During the execution of project, structural modifications are required or addition work is added for construction. The estimate for additional work is called _____.
 - a) Preliminary estimate
 - b) Supplementary estimate
 - c) Revised estimate
 - d) Detailed estimate
- 6) We prepare revised estimate against the original estimate due to change in _____.
 - a) the rate of material or change in specification of materials
 - b) structural drawing
 - c) additional items
 - d) all the above

Time: 03:00 PM To 06:00 PM

- Instructions:** 1) Q.2 is compulsory; answer any two from remaining questions from Section - I.
2) Q.6 is compulsory; answer any two from remaining questions from Section - II.
3) Figures to the right indicate full marks.
4) Assume suitable data if required and state it clearly. Section-I

Section – I

- | | | |
|------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------|
| Q.2 | a) Calculate the quantity of reinforcement required in R.C.C. column and footing shown in attached drawing: | 08 |
| | b) Also prepare an Abstract sheet for these items by assuming suitable market rates. | 04 |
| Q.3 | a) What is the Cost Control Technique? Explain all Cost Control Techniques. | 04 |
| | b) Calculate Years Purchase for a property with a useful life of 25 years if rate of interest is 6.50 % per year. Assume rate of interest for sinking fund as 2.80 %. | 04 |
| Q.4 | a) Explain General and Detailed Specification. | 04 |
| | b) Write the detailed specifications for Water Bound Macadam. | 04 |
| Q.5 | a) What is the Rate analysis? Explain the factors affecting rate analysis. | 04 |
| | b) Carry out rate analysis for external plastering 20 mm thick in cement mortar 1:4. | 04 |

Section – II

- | | | |
|------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------|
| Q.6 | a) Prepare a tender notice for the work of construction of a hospital of 120 beds capacity RCC structure of 12,000 Sq. ft built up area. Make suitable assumptions for required data. | 08 |
| | b) Write a short note on BOT projects with suitable example. | 04 |
| Q.7 | a) Explain following Acts.
1) Minimum Wages Act
2) Workers Compensation Act | 04 |
| | b) Write advantages and disadvantages of Item Rate Contract. | 04 |
| Q.8 | a) Explain different types of values - Market value, Potential value, distress value. | 04 |
| | b) Compare following methods of calculating depreciation.
- Straight line method & declining balance method. | 04 |

- Q.9 a) Explain belting method of valuation. 04
 b) Enlist and explain the 'Factors affecting valuation of properties. 04

**Fourth Y. (B.Tech.) (Sem-I) (New/Old) (CBCS) Examination:
March/April-2024**

CIVIL ENGINEERING

Engineering Economics, Estimation & Costing (197042701)

Day & Date: Wednesday, 15-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume additional data if required and mention it clearly.

MCQ/Objective Type Questions

Duration: 20 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options.

14

- 1) Earnest money is paid to enable the Government to ensure that a tenderer does not _____.
 - a) back out of his tender before its acceptance
 - b) refuse to execute the work after it has been awarded to him
 - c) compromise with quality of work
 - d) a or b
- 2) For labour component the escalation rise will be payable based on _____.
 - a) Increase in the minimum wages of unskilled male mazdoor
 - b) Increase in the actual wages of unskilled male mazdoor
 - c) Increase in the minimum wages of skilled male mazdoor
 - d) Increase in the actual wages of skilled male mazdoor
- 3) 'Money received today is more worth than money received in future' is based on which of the following term _____.

a) Time Value of money	b) Storage Value of Money
c) Time Machine	d) Cash Value of Machine
- 4) The net present value (NPV) is _____.
 - a) equal to the sum of the present values of all cash flows
 - b) equal to the sum of returns
 - c) equal to the sum of all cash flows
 - d) none of the above
- 5) The value at the end of utility of property but without dismantling is known as _____.

a) Scrap Value	b) Salvage value
c) Market value	d) Book value

- 6) Following is not the purpose of Valuation.
- For submission to financial agency/bank while borrowing loan
 - For preparing tender documents
 - For income tax/wealth tax assessment
 - For compensation after the land acquisition
- 7) Valuation of the properties which perform non profitable community functions is done by _____.
- Rental method
 - Land and building method
 - Direct comparison method
 - Profit based method
- 8) The Damp Proof Course (D.P.C.) is measured in _____.
- Cub.m.
 - Sq.m.
 - Metres
 - None of these
- 9) The excavation exceeding 1.5 m in width and 10 sq.m, in plan area with a depth not exceeding 30 cm, is termed as _____.
- Excavation
 - Surface dressing
 - Cutting
 - Surface excavation
- 10) In normal circumstances, minimum period before striking vertical formwork of columns, beams shall be _____.
- 16-24 Hr.
 - 7 days
 - 14 days
 - 21 days
- 11) In rate analysis, salary of technical personnel engaged for the work are covered in _____.
- Labour cost
 - General overheads
 - Job overheads
 - Contingencies
- 12) During the execution of project, structural modifications are required or addition work is added for construction. The estimate for additional work is called _____.
- Preliminary estimate
 - Supplementary estimate
 - Revised estimate
 - Detailed estimate
- 13) We prepare revised estimate against the original estimate due to change in _____.
- the rate of material or change in specification of materials
 - structural drawing
 - additional items
 - all the above
- 14) If rise and tread of a step is 0.15m and 0.25m respectively, then the volume (in cubic meter) of 9 number of steps of 1 m length be recorded in measurement sheet shall be _____.
- 0.3375
 - 0.337
 - 0.34
 - 0.33

 - 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 - 3) Figures to the right indicates full marks.
 - 4) Assume suitable data wherever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options.

14

- 1) Work Break down structure helps in _____.
 - a) Identifying the activities
 - b) Identifying the functional element of a project and their interrelationship
 - c) Breaking the project into several elements
 - d) Breaking the project into system
- 2) A mile stone chart is _____.

a) Same as the bar chart	b) An improvement over the bar chart
c) Inferior to the bar chart	d) None of these
- 3) A-O-A network means _____.

a) Activity On Arrow	b) Act On Activity
c) Both a and b	d) None of these
- 4) A CPM network is _____.
 - a) Activity oriented
 - b) Event oriented
 - c) Both activity as well as event oriented
 - d) Neither activity nor event oriented
- 5) PERT (Programme Evaluation and Review Technique) is mainly useful _____.
 - a) Only small projects
 - b) Only large projects
 - c) Research and development
 - d) Small as well as large and complex projects
- 6) There is no need for updating if _____.
 - a) All the activities are not progressing according to schedule
 - b) All the activities are partially progressing according to schedule
 - c) All the activities are progressing well according to schedule
 - d) All of these

- 7) Precedence networks are more commonly used when _____.
a) Repetitive tasks are involved
b) Overlapping of activities occur
c) Interdependancies exist
d) All of these
- 8) Pessimistic Time is _____.
a) All conditions are not in favour
b) All conditions are in favour
c) Both above
d) None
- 9) Management information systems (MIS) _____.
a) create and share documents that support day-today office activities
b) process business transactions (e.g., time cards, payments, orders, etc.)
c) capture and reproduce the knowledge of an expert problem solver.
d) use the transaction data to produce information needed by managers to run the business
- 10) When you begin a new project in MS Project, you can identify its timeframe by: _____.
a) Clicking on the Calendar and setting Timeframe
b) Going to the Project tab and in the Properties, group choose Project Information
c) Going to the backstage and choosing options
d) None of above
- 11) Scraper is used for _____.
a) Scraping of soils
b) Excavation only
c) Excavation, transporting and dumping of soil
d) None of these
- 12) _____ crane is used for open sites and it possesses a very long reach.
a) Goliath
b) Derrick
c) Swing jib
d) Cable
- 13) Setting up of National Safety Counsel (NSC) in India in _____.
a) 1956
b) 1976
c) 1986
d) 1966
- 14) Bentonite slurry used in the construction of _____.
a) cantilever retaining wall
b) counterfort retaining wall
c) diaphragm wall
d) sheet piles

**Fourth Y. (B.Tech.) (Sem - I) (New/Old) (CBCS) Examination:
March/April-2024
CIVIL ENGINEERING
Construction Engineering, Management & Construction Practices
(197042702)**

Day & Date: Thursday, 16-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory in section I.
2) All questions are compulsory in section II.
3) Figures to the right indicate full marks.
4) Assume suitable data wherever needed and mention it clearly.
5) Use of non-programmable calculator is allowed.

Section – I

Q.2 Attempt all of the below question.

- a) Construct the detail “Work Breakdown Structure (WBS)” for “Watch Men Cabin of Frame structure Building”. **04**
- b) Explain in brief the “Rules for construction of Network Diagram with necessary sketch”. **03**
- c) Construct “Bar Chart as well as Network Diagram” of the project and define its project duration and critical Path. **06**

Activity	Predecessor Activity	Duration (Weeks)
A	---	2
B	A	4
C	B	4
D	C	6
E	C	4
F	D, E	2

Q.3 Attempt any three from below question.

15

- a) Write down the steps involved in “Updating of Project Network Diagram”.
- b) Explain in brief the steps involved in “Network Compression of Project”.
- c) Explain in brief the about “Direct Cost, In-direct Cost and Total Project Cost” necessary graph sketch.
- d) Distinguish between the “CPM and PERT Technique”.
- e) Explain in brief use of “Project Management Software of Construction sector”.

Section – II

Q.4 Attempt all of the below question.

13

- a) Enlist the use of “Safety tools against accidents on various building construction sites”. **04**
- b) Explain the various “Safety measures to be taken on building construction sites”. **03**
- c) Explain the function of “Back Hoe” with neat sketch and labeling. **06**

Q.5 Attempt any three from below question.

- a) Explain in brief the about “Asphalt mixing and batching plant (hot mix plant),” necessary graph sketch.
- b) Enlist and explain in brief “Compactors and types Compactors”.
- c) Explain in brief the use of “Mivan Technology” in construction industries.
- d) Write a note on “Floating Equipment’s”.
- e) Explain in brief steps involved in construction of “Diaphragm Walls”.

- Instructions:** 1) All questions are compulsory in section I.
2) All questions are compulsory in section II.
3) Figures to the right indicate full marks.
4) Assume suitable data wherever needed and mention it clearly.
5) Use of non-programmable calculator is allowed.

Section – I

Q.2 Attempt all of the below question.

- a) Construct the detail “Work Breakdown Structure (WBS)” for “Watch Men Cabin of Frame structure Building”. **04**
- b) Explain in brief the “Rules for construction of Network Diagram with necessary sketch”. **03**
- c) Construct “Bar Chart as well as Network Diagram” of the project and define its project duration and critical Path. **06**

Activity	Predecessor Activity	Duration (Weeks)
A	---	2
B	A	4
C	B	4
D	C	6
E	C	4
F	D, E	2

Q.3 Attempt any three from below question.

15

- a) Write down the steps involved in “Updating of Project Network Diagram”.
- b) Explain in brief the steps involved in “Network Compression of Project”.
- c) Explain in brief the about “Direct Cost, In-direct Cost and Total Project Cost” necessary graph sketch.
- d) Distinguish between the “CPM and PERT Technique”.
- e) Explain in brief use of “Project Management Software of Construction sector”.

Section – II

Q.4 Attempt all of the below question.

13

- a) Enlist the use of “Safety tools against accidents on various building construction sites”. **04**
- b) Explain the various “Safety measures to be taken on building construction sites”. **03**
- c) Explain the function of “Back Hoe” with neat sketch and labeling. **06**

Q.5 Attempt any three from below question.

- a) Explain in brief the about “Asphalt mixing and batching plant (hot mix plant),” necessary graph sketch.
- b) Enlist and explain in brief “Compactors and types Compactors”.
- c) Explain in brief the use of “Mivan Technology” in construction industries.
- d) Write a note on “Floating Equipment’s”.
- e) Explain in brief steps involved in construction of “Diaphragm Walls”.

**Fourth Y. (B.Tech.) (Sem - I) (New/Old) (CBCS) Examination:
March/April-2024
CIVIL ENGINEERING
Construction Engineering, Management & Construction Practices
(197042702)**

Day & Date: Thursday, 16-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:**
- 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No. 3 (starting page of the Answer Book). Each question carry one mark.
 - 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 - 3) Figures to the right indicates full marks.
 - 4) Assume suitable data wherever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options.

14

- 1) Scraper is used for _____.
 - a) Scraping of soils
 - b) Excavation only
 - c) Excavation, transporting and dumping of soil
 - d) None of these
- 2) _____ crane is used for open sites and it possesses a very long reach.
 - a) Goliath
 - b) Derrick
 - c) Swing jib
 - d) Cable
- 3) Setting up of National Safety Counsel (NSC) in India in _____.
 - a) 1956
 - b) 1976
 - c) 1986
 - d) 1966
- 4) Bentonite slurry used in the construction of _____.
 - a) cantilever retaining wall
 - b) counterfort retaining wall
 - c) diaphragm wall
 - d) sheet piles
- 5) Work Break down structure helps in _____.
 - a) Identifying the activities
 - b) Identifying the functional element of a project and their interrelationship
 - c) Breaking the project into several elements
 - d) Breaking the project into system
- 6) A mile stone chart is _____.
 - a) Same as the bar chart
 - b) An improvement over the bar chart
 - c) Inferior to the bar chart
 - d) None of these
- 7) A-O-A network means _____.
 - a) Activity On Arrow
 - b) Act On Activity
 - c) Both a and b
 - d) None of these

- 8) A CPM network is _____.
- Activity oriented
 - Event oriented
 - Both activity as well as event oriented
 - Neither activity nor event oriented
- 9) PERT (Programme Evaluation and Review Technique) is mainly useful _____.
- Only small projects
 - Only large projects
 - Research and development
 - Small as well as large and complex projects
- 10) There is no need for updating if _____.
- All the activities are not progressing according to schedule
 - All the activities are partially progressing according to schedule
 - All the activities are progressing well according to schedule
 - All of these
- 11) Precedence networks are more commonly used when _____.
- Repetitive tasks are involved
 - Overlapping of activities occur
 - Interdependancies exist
 - All of these
- 12) Pessimistic Time is _____.
- All conditions are not in favour
 - All conditions are in favour
 - Both above
 - None
- 13) Management information systems (MIS) _____.
- create and share documents that support day-today office activities
 - process business transactions (e.g., time cards, payments, orders, etc.)
 - capture and reproduce the knowledge of an expert problem solver.
 - use the transaction data to produce information needed by managers to run the business
- 14) When you begin a new project in MS Project, you can identify its timeframe by: _____.
- Clicking on the Calendar and setting Timeframe
 - Going to the Project tab and in the Properties, group choose Project Information
 - Going to the backstage and choosing options
 - None of above

Design of Concrete Structures – II (197042703)

Day & Date: Friday, 17-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions :** 1) Q. No.1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book).
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) While solving MCQ IS 456-2000, IS 3370 IV, IS 1343 are not allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

- Q.1 Choose the correct answer:** **14**
- 1) What is the maximum pitch for a staircase? 01
 - a) 25°
 - b) 30°
 - c) 35°
 - d) 40°
 - 2) In case of footing, the critical section for BM occurs _____. 01
 - a) At a distance of 'd/2' from face of column
 - b) At a distance of 'd' from face of column
 - c) At the face of the column
 - d) None of the above
 - 3) If W is weight of a retaining wall and P is the horizontal earth pressure, the factor of safety against sliding, is _____. 01
 - a) 1
 - b) 1.5
 - c) 1.25
 - d) 2
 - 4) As per IS 456:2000, in reinforced footing, Thickness at the edge of footing shall not be less than _____ for footings on soils. 01
 - a) 125 mm
 - b) 150 mm
 - c) 200 mm
 - d) 300 mm
 - 5) All are the component of retaining wall except? 01
 - a) Toe Slab
 - b) Heel Slab
 - c) Stem
 - d) Surcharge
 - 6) In water tank, for Fe₅₀₀ the permissible tensile stress is _____. 01
 - a) 130 N/mm²
 - b) 150 N/mm²
 - c) 125 N/mm²
 - d) 190 N/mm²
 - 7) A pre-tensioned concrete beam, 100 mm wide and 300 mm deep in prestressed by straight wires and modulus of elasticity of steel and concrete are 210 and 35 N/mm². Find modular ratio _____. 01
 - a) 14
 - b) 7
 - c) 6
 - d) 10

CIVIL ENGINEERING

Design of Concrete Structures – II (197042703)

Day & Date: Friday, 17-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:**
- 1) Question no. 2 is compulsory in section I, and solve any two questions from the remaining. (Q. No. 3, 4 & 5)
 - 2) Question no. 6 is compulsory in section II, and solve any two questions from the remaining. (Q. No. 7, 8 & 9)
 - 3) Figures to the right indicate full marks.
 - 4) Draw neat sketches where required and assume suitable data if required and state it clearly.
 - 5) IS 456, IS1343, IS 3370 Part IV and non-programmable calculator are allowed.

Section – I

- Q.2** Design a dog-legged type staircase for a residential building using following data: **08**
- a) floor to floor height = 3.6 m
 - b) size of steps: Riser = 180 mm and tread = 250 mm
 - c) LL = 3.2 KN/m²
 - d) assume width of stair = 1 m
 - e) Material – M 20, Fe 415
 - f) width of beams = 300 mm
- The stair is supported at top and bottom risers by beam spanning parallel with risers at the landing slab on either side. Sketch the reinforcement details.
- Q.3** A rectangular column 400 mm × 600 mm carries an axial load of 2000 kN. The SBC of soil is 150 kN/ m². Using M20 concrete and Fe 415 steel, design a rectangular footing to support the column. Sketch the reinforcement details. **10**
- Q.4** Design the stem slab of a cantilever retaining wall, if the overall height is 5.5 m. SBC of soil is 200 kN/m², angle of repose of the soil is 30° and unit weight of soil 18 kN/m³, width of the slab base is 3.2 m, toe projection is 0.6 m. Use M25 concrete and Fe500 steel. **10**
- Q.5** Design a square water tank having size 5m × 4m × 3.2m, resting on firm ground is free at top, bottom as well as vertical edges are fixed, with following details: depth of water 3.2 m, assume free board of 250 mm and solve by IS code method. Use M25 concrete and Fe415 steel. **10**

Section – II

- Q.6** A Prestressed concrete beam 500 mm × 750 mm in section has a span of 8 m & is subjected to udl of 17.5 kN/m including self weight of the beam. The prestressing tendons are located at lower third point of the section & provide an effective stresses in the concrete for midspan section. Determine the extreme stresses in concrete at the mid span section. Solve by following method: Stress concept method, strength concept method & load balancing method. Take prestressing force 1000 KN. **08**
- Q.7** A concrete beam 230 mm × 450 mm has a span of 12 m. The beam is prestressed by steel wires of 550 mm² at an eccentricity of 90 mm with an initial prestress of 1000 N/mm². Determine the percentage loss of stress in the wires for pre-tensioned and post-tensioned beam. Take $E_s = 2.5 \times 10^5$ N/mm², $E_c = 3.5 \times 10^4$ N/mm², Ultimate creep strain = 26×10^{-6} mm/mm per N/mm², Shrinkage strain = 1.7×10^{-4} , Relaxation of steel stress = 5% of the initial prestress, Anchorage slip = 1.25 mm, Friction coefficient for wave effect = 0.0015. **10**
- Q.8** Design PSC I section for the following data: Span = 15 m Superimposed load = 34 kN/m Cube strength of concrete at 28 days = 35 kN/m² Safe stress in concrete at transfer = 0.5 fck Allowable tensile stress in concrete = $0.129(fck)^{1/2}$ Safe stress in steel = 1000 MPa Total loss of stress = 20% Ultimate stress in steel = 1500 mpa. **10**
- Q.9** A PSC beam is 400 mm × 800 mm deep. Determine the horizontal, vertical, shear & principal stresses. The tendons are placed at an eccentricity of 100 mm. The anchor plate is 300 mm deep & 200 mm wide. Take P = 1000 KN. Design the end block by Magnel method for $x/d = 0.75$, take $K_q = 0.251$ and $K_z = -2.47$. **10**

Seat No.

Design of Concrete Structures – II (197042703)

Day & Date: Friday, 17-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions :** 1) Q. No.1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book).
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) While solving MCQ IS 456-2000, IS 3370 IV, IS 1343 are not allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct answer:

14

- 1) In water tank, for Fe₅₀₀ the permissible tensile stress is _____. 01
 - a) 130 N/mm²
 - b) 150 N/mm²
 - c) 125 N/mm²
 - d) 190 N/mm²
- 2) A pre-tensioned concrete beam, 100 mm wide and 300 mm deep in prestressed by straight wires and modulus of elasticity of steel and concrete are 210 and 35 N/mm². Find modular ratio _____. 01
 - a) 14
 - b) 7
 - c) 6
 - d) 10
- 3) The simplest method of analysis of bursting tensile forces in anchorage zone is _____. 01
 - a) Magnel method
 - b) Guyons method
 - c) Balton method
 - d) None
- 4) High tensile bars threaded at the ends are used in _____. 01
 - a) Fressyinet System
 - b) Gifford Udall method
 - c) Lee Mecall method
 - d) Magnel Blaton system
- 5) The value of K in the formula, $d = K (Mt)^{1/2}$ _____. 01
 - a) 10 to 20
 - b) 20 to 30
 - c) 30 to 40
 - d) None
- 6) What is the maximum pitch for a staircase? 01
 - a) 25°
 - b) 30°
 - c) 35°
 - d) 40°
- 7) In case of footing, the critical section for BM occurs _____. 01
 - a) At a distance of 'd/2' from face of column

Design of Concrete Structures – II (197042703)

Day & Date: Friday, 17-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions :** 1) Q. No.1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book).
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) While solving MCQ IS 456-2000, IS 3370 IV, IS 1343 are not allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

- Q.1 Choose the correct answer:** **14**
- 1) High tensile bars threaded at the ends are used in _____. 01
 - a) Fressyinet System
 - b) Gifford Udall method
 - c) Lee Mecall method
 - d) Magnel Blaton system
 - 2) The value of K in the formula, $d = K (Mt)^{1/2}$ _____. 01
 - a) 10 to 20
 - b) 20 to 30
 - c) 30 to 40
 - d) None
 - 3) What is the maximum pitch for a staircase? 01
 - a) 25°
 - b) 30°
 - c) 35°
 - d) 40°
 - 4) In case of footing, the critical section for BM occurs _____. 01
 - a) At a distance of 'd/2' from face of column
 - b) At a distance of 'd' from face of column
 - c) At the face of the column
 - d) None of the above
 - 5) If W is weight of a retaining wall and P is the horizontal earth pressure, the factor of safety against sliding, is _____. 01
 - a) 1
 - b) 1.5
 - c) 1.25
 - d) 2
 - 6) As per IS 456:2000, in reinforced footing, Thickness at the edge of footing shall not be less than _____ for footings on soils. 01
 - a) 125 mm
 - b) 150 mm
 - c) 200 mm
 - d) 300 mm
 - 7) All are the component of retaining wall except? 01
 - a) Toe Slab
 - b) Heel Slab
 - c) Stem
 - d) Surcharge
 - 8) In water tank, for Fe₅₀₀ the permissible tensile stress is _____. 01
 - a) 130 N/mm²
 - b) 150 N/mm²
 - c) 125 N/mm²
 - d) 190 N/mm²

**Fourth Y. (B.Tech.) (Sem - I) (New/Old) (CBCS) Examination:
March/April-2024**

CIVIL ENGINEERING

Design of Concrete Structures – II (197042703)

Day & Date: Friday, 17-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:**
- 1) Question no. 2 is compulsory in section I, and solve any two questions from the remaining. (Q. No. 3, 4 & 5)
 - 2) Question no. 6 is compulsory in section II, and solve any two questions from the remaining. (Q. No. 7, 8 & 9)
 - 3) Figures to the right indicate full marks.
 - 4) Draw neat sketches where required and assume suitable data if required and state it clearly.
 - 5) IS 456, IS1343, IS 3370 Part IV and non-programmable calculator are allowed.

Section – I

- Q.2** Design a dog-legged type staircase for a residential building using following data: **08**
- a) floor to floor height = 3.6 m
 - b) size of steps: Riser = 180 mm and tread = 250 mm
 - c) LL = 3.2 KN/m²
 - d) assume width of stair = 1 m
 - e) Material – M 20, Fe 415
 - f) width of beams = 300 mm
- The stair is supported at top and bottom risers by beam spanning parallel with risers at the landing slab on either side. Sketch the reinforcement details.
- Q.3** A rectangular column 400 mm × 600 mm carries an axial load of 2000 kN. The SBC of soil is 150 kN/ m². Using M20 concrete and Fe 415 steel, design a rectangular footing to support the column. Sketch the reinforcement details. **10**
- Q.4** Design the stem slab of a cantilever retaining wall, if the overall height is 5.5 m. SBC of soil is 200 kN/m², angle of repose of the soil is 30° and unit weight of soil 18 kN/m³, width of the slab base is 3.2 m, toe projection is 0.6 m. Use M25 concrete and Fe500 steel. **10**
- Q.5** Design a square water tank having size 5m × 4m × 3.2m, resting on firm ground is free at top, bottom as well as vertical edges are fixed, with following details: depth of water 3.2 m, assume free board of 250 mm and solve by IS code method. Use M25 concrete and Fe415 steel. **10**

Section – II

- Q.6** A Prestressed concrete beam 500 mm × 750 mm in section has a span of 8 m & is subjected to udl of 17.5 kN/m including self weight of the beam. The prestressing tendons are located at lower third point of the section & provide an effective stresses in the concrete for midspan section. Determine the extreme stresses in concrete at the mid span section. Solve by following method: Stress concept method, strength concept method & load balancing method. Take prestressing force 1000 KN. **08**
- Q.7** A concrete beam 230 mm × 450 mm has a span of 12 m. The beam is prestressed by steel wires of 550 mm² at an eccentricity of 90 mm with an initial prestress of 1000 N/mm². Determine the percentage loss of stress in the wires for pre-tensioned and post-tensioned beam. Take $E_s = 2.5 \times 10^5$ N/mm², $E_c = 3.5 \times 10^4$ N/mm², Ultimate creep strain = 26×10^{-6} mm/mm per N/mm², Shrinkage strain = 1.7×10^{-4} , Relaxation of steel stress = 5% of the initial prestress, Anchorage slip = 1.25 mm, Friction coefficient for wave effect = 0.0015. **10**
- Q.8** Design PSC I section for the following data: Span = 15 m Superimposed load = 34 kN/m Cube strength of concrete at 28 days = 35 kN/m² Safe stress in concrete at transfer = 0.5 fck Allowable tensile stress in concrete = $0.129(fck)^{1/2}$ Safe stress in steel = 1000 MPa Total loss of stress = 20% Ultimate stress in steel = 1500 mpa. **10**
- Q.9** A PSC beam is 400 mm × 800 mm deep. Determine the horizontal, vertical, shear & principal stresses. The tendons are placed at an eccentricity of 100 mm. The anchor plate is 300 mm deep & 200 mm wide. Take P = 1000 KN. Design the end block by Magnel method for $x/d = 0.75$, take $K_q = 0.251$ and $K_z = -2.47$. **10**

4) While solving MCQ IS 456-2000, IS 3370 IV, IS 1343 are not allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

- Q.1 Choose the correct answer:** **14**
- 1) If W is weight of a retaining wall and P is the horizontal earth pressure, the factor of safety against sliding, is _____. 01
 - a) 1
 - b) 1.5
 - c) 1.25
 - d) 2
 - 2) As per IS 456:2000, in reinforced footing, Thickness at the edge of footing shall not be less than _____ for footings on soils. 01
 - a) 125 mm
 - b) 150 mm
 - c) 200 mm
 - d) 300 mm
 - 3) All are the component of retaining wall except? 01
 - a) Toe Slab
 - b) Heel Slab
 - c) Stem
 - d) Surcharge
 - 4) In water tank, for F_{e500} the permissible tensile stress is _____. 01
 - a) 130 N/mm²
 - b) 150 N/mm²
 - c) 125 N/mm²
 - d) 190 N/mm²
 - 5) A pre-tensioned concrete beam, 100 mm wide and 300 mm deep in prestressed by straight wires and modulus of elasticity of steel and concrete are 210 and 35 N/mm². Find modular ratio _____. 01
 - a) 14
 - b) 7
 - c) 6
 - d) 10
 - 6) The simplest method of analysis of bursting tensile forces in anchorage zone is _____. 01
 - a) Magnel method
 - b) Guyons method
 - c) Balton method
 - d) None
 - 7) High tensile bars threaded at the ends are used in _____. 01
 - a) Fressyinet System
 - b) Gifford Udall method
 - c) Lee Mecall method
 - d) Magnel Blaton system
 - 8) The value of K in the formula, $d = K (Mt)^{1/2}$ _____. 01
 - a) 10 to 20
 - b) 20 to 30
 - c) 30 to 40

CIVIL ENGINEERING

Earthquake Engineering (197042704)

Day & Date: Saturday, 18-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No.3 (starting page of the Answer Book). Each MCQ carry one marks.
2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options.

14

- 1) The zone factors indicate reasonably estimated values of _____ in the respective zone.

a) Peak intensity of earthquake	b) Peak ground velocity
c) Peak ground acceleration	d) Peak ground displacement
- 2) Choose the correct option from following statements:

a) Earthquake causes landslide	b) Landslide causes earthquake
c) a) and b) are wrong	d) a) and b) both are correct
- 3) The damping in a dynamic system is represented as equivalent to _____.

a) Coulomb damping	b) Viscous damping
c) Friction damping	d) Negative damping
- 4) The response is maximum when _____.

a) Damping ratio = 1	b) Frequency ratio = 1
c) Stiffness ratio = 1	d) Mass ratio = 1
- 5) With the increase in the stiffness of the structural system, the natural period _____.

a) increases	b) decreases
c) remains same	d) constant
- 6) In the equivalent static procedure, the natural period of the building is _____.

a) Computed by the free-vibration analysis
b) Estimated according to the formula in IS-1893:2016
c) Assumed
d) as given in book
- 7) The acceleration response spectrum in IS-1893:2016 is for the damping of _____.

a) 2%	b) 10%
c) 5%	d) None of these

- 8) _____ is the building structure which has least lateral force resistance.
- a) Ordinary moment-resisting RCC frame
 - b) Special moment-resisting RCC frame
 - c) Shear wall structure
 - d) Masonry structure
- 9) The slenderness ratio of masonry is the ratio of _____.
- a) Length of wall to height of wall
 - b) Length of wall to thickness
 - c) Height of wall to area of cross-section
 - d) None of above
- 10) The structures having short natural period _____.
- a) Attract large seismic forces
 - b) Have large drift
 - c) Attract less seismic forces and have large drift
 - d) Attract large seismic forces and have small drift
- 11) The magnitude of earthquake _____.
- a) remains same location wise
 - b) varying location wise
 - c) increasing location wise
 - d) decreasing location wise
- 12) A building structure suffers torsion under seismic action when _____.
- a) The centre of gravity does not coincide with the centre of rigidity
 - b) The centre of gravity does not coincide with the centre of stiffness
 - c) The centre of rigidity does not coincide with the centre of stiffness
 - d) The centre of gravity coincides with the centre of stiffness
- 13) India is divided into _____ earthquake zones.
- a) Five
 - b) Four
 - c) Six
 - d) Seven
- 14) The response reduction factor accounts for _____.
- a) Ductile behaviour of the structure
 - b) Redundancy in the structure
 - c) Over strength of the structure
 - d) All of the above

March/April-2024

CIVIL ENGINEERING

Earthquake Engineering (197042704)

Day & Date: Saturday, 18-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:**
- 1) In Section – I, Q. No. 4 is compulsory. Attempt any two questions from the remaining questions.
 - 2) In Section – II, Q. No. 9 is compulsory. Attempt any two questions from the remaining questions.
 - 3) Figures to the right indicates full marks.
 - 4) Assume suitable data if necessary and mention it clearly.
 - 5) Use of only IS 1893:2016 is allowed.

Section – I

- Q.2** What do you understand by soil liquefaction? What are the factors affecting liquefaction? **09**
- Q.3** Write the equation of motion and determine the effective stiffness using the basic definition of stiffness for the spring-mass systems shown in following fig. 1. **09**

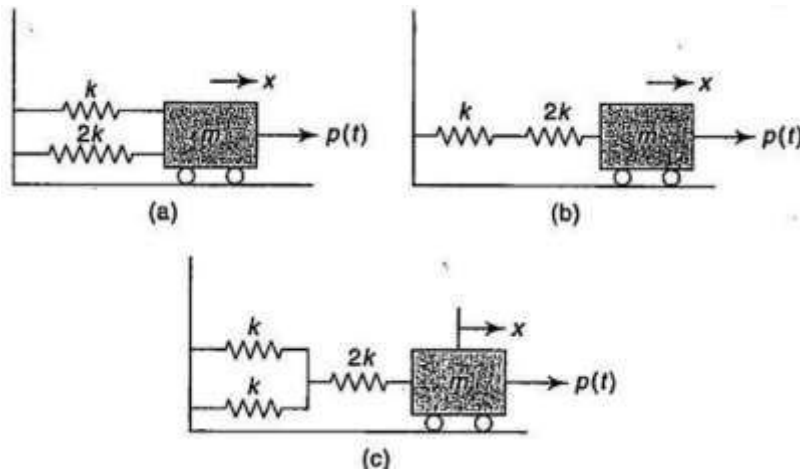

Fig. 1

- Q.4** What do you mean by force transmissibility? Derive an expression for force transmissibility to the foundation of a SDOF system subjected to harmonic force. **10**
- Q.5** Derive the Duhamel's Integral for damped system. From this expression reduce the expression for Duhamel's Integral for Undamped system. **09**

Section – II

- Q.6** It is proposed to construct a R.C.C. three storied college building having plan dimensions as shown in fig. 2 in zone II with following data. Determine the lateral forces and base shear in longer for the building. The all column sizes are 300 x 450 mm & beams sizes are 230 x 450 mm. The slab thickness is 120mm & thk. of walls is 230mm. The ht. of floor is 3.2m & Live load is 3.0 kN/m². Provisions of IS 13920 will be incorporated. The strata is Medium. **09**

- Q.7** What do understand by a weak storey? How weak storey differs from soft storey? **09**
- Q.8** What are the factors that make steel the most ideal material for earthquake resistance? Explain how it is useful in confinement of RC members. **09**
- Q.9** State the reasons for the poor of performance of masonry building in seismic areas. **10**

**Fourth Y. (B.Tech.) (Sem - I) (New/Old) (CBCS) Examination:
March/April-2024**

CIVIL ENGINEERING

Earthquake Engineering (197042704)

Day & Date: Saturday, 18-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) In Section – I, Q. No. 4 is compulsory. Attempt any two questions from the remaining questions.
2) In Section – II, Q. No. 9 is compulsory. Attempt any two questions from the remaining questions.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and mention it clearly.
5) Use of only IS 1893:2016 is allowed.

Section – I

- Q.2** What do you understand by soil liquefaction? What are the factors affecting liquefaction? **09**
- Q.3** Write the equation of motion and determine the effective stiffness using the basic definition of stiffness for the spring-mass systems shown in following fig. 1. **09**

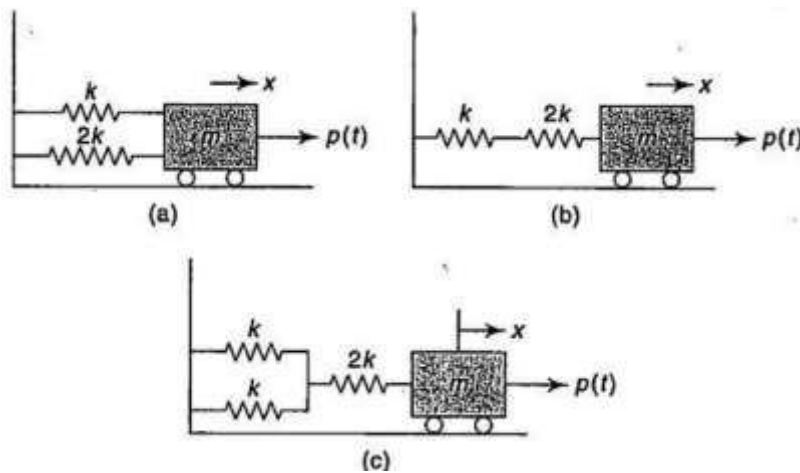

Fig. 1

- Q.4** What do you mean by force transmissibility? Derive an expression for force transmissibility to the foundation of a SDOF system subjected to harmonic force. **10**
- Q.5** Derive the Duhamel's Integral for damped system. From this expression reduce the expression for Duhamel's Integral for Undamped system. **09**

Section – II

- Q.6** It is proposed to construct a R.C.C. three storied college building having plan dimensions as shown in fig. 2 in zone II with following data. Determine the lateral forces and base shear in longer for the building. The all column sizes are 300 x 450 mm & beams sizes are 230 x 450 mm. The slab thickness is 120mm & thk. of walls is 230mm. The ht. of floor is 3.2m & Live load is 3.0 kN/m². Provisions of IS 13920 will be incorporated. The strata is Medium. **09**

- Q.7** What do understand by a weak storey? How weak storey differs from soft storey? **09**
- Q.8** What are the factors that make steel the most ideal material for earthquake resistance? Explain how it is useful in confinement of RC members. **09**
- Q.9** State the reasons for the poor of performance of masonry building in seismic areas. **10**

CIVIL ENGINEERING

Earthquake Engineering (197042704)

Day & Date: Saturday, 18-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No.3 (starting page of the Answer Book). Each MCQ carry one marks.
2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options. **14**

- 1) In the equivalent static procedure, the natural period of the building is _____.
 - a) Computed by the free-vibration analysis
 - b) Estimated according to the formula in IS-1893:2016
 - c) Assumed
 - d) as given in book
- 2) The acceleration response spectrum in IS-1893:2016 is for the damping of _____.

a) 2%	b) 10%
c) 5%	d) None of these
- 3) _____ is the building structure which has least lateral force resistance.
 - a) Ordinary moment-resisting RCC frame
 - b) Special moment-resisting RCC frame
 - c) Shear wall structure
 - d) Masonry structure
- 4) The slenderness ratio of masonry is the ratio of _____.
 - a) Length of wall to height of wall
 - b) Length of wall to thickness
 - c) Height of wall to area of cross-section
 - d) None of above
- 5) The structures having short natural period _____.
 - a) Attract large seismic forces
 - b) Have large drift
 - c) Attract less seismic forces and have large drift
 - d) Attract large seismic forces and have small drift
- 6) The magnitude of earthquake _____.

a) remains same location wise	b) varying location wise
c) increasing location wise	d) decreasing location wise

- 7) A building structure suffers torsion under seismic action when _____.
- a) The centre of gravity does not coincide with the centre of rigidity
 - b) The centre of gravity does not coincide with the centre of stiffness
 - c) The centre of rigidity does not coincide with the centre of stiffness
 - d) The centre of gravity coincides with the centre of stiffness
- 8) India is divided into _____ earthquake zones.
- a) Five
 - b) Four
 - c) Six
 - d) Seven
- 9) The response reduction factor accounts for _____.
- a) Ductile behaviour of the structure
 - b) Redundancy in the structure
 - c) Over strength of the structure
 - d) All of the above
- 10) The zone factors indicate reasonably estimated values of _____ in the respective zone.
- a) Peak intensity of earthquake
 - b) Peak ground velocity
 - c) Peak ground acceleration
 - d) Peak ground displacement
- 11) Choose the correct option from following statements:
- a) Earthquake causes landslide
 - b) Landslide causes earthquake
 - c) a) and b) are wrong
 - d) a) and b) both are correct
- 12) The damping in a dynamic system is represented as equivalent to _____.
- a) Coulomb damping
 - b) Viscous damping
 - c) Friction damping
 - d) Negative damping
- 13) The response is maximum when _____.
- a) Damping ratio = 1
 - b) Frequency ratio = 1
 - c) Stiffness ratio = 1
 - d) Mass ratio = 1
- 14) With the increase in the stiffness of the structural system, the natural period _____.
- a) increases
 - b) decreases
 - c) remains same
 - d) constant

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the given options.

14

- 1) What is the most important objective of traffic engineering?
 - a) To consider pedestrians as obstruction
 - b) To reduce the accidents
 - c) To increase the traffic
 - d) To provide a high-speed road without any other priority
- 2) The speed at any instant of time is called _____.
 - a) Running Speed
 - b) Travel speed
 - c) Spot speed
 - d) Traffic speed
- 3) The vehicles per unit length at any instant of time is called as _____.
 - a) Density
 - b) Jam Density
 - c) Maximum density
 - d) Traffic flow
- 4) The symbol when violated which may lead to offense is?
 - a) Cautionary
 - b) Mandatory
 - c) Informatory
 - d) Both informatory and cautionary
- 5) The clearance time is indicated by _____.
 - a) Red
 - b) Green
 - c) White
 - d) Amber
- 6) Give way sign is of _____.
 - a) Triangular shape
 - b) Circular shape
 - c) Octagonal shape
 - d) Hexagonal shape
- 7) Which of the following roads are congested during peak hours?
 - a) Rural roads
 - b) Urban roads
 - c) Highways
 - d) Express ways
- 8) The traffic that is prepared based on 365 days of the year is called _____.
 - a) Yearly traffic
 - b) Annual average daily traffic
 - c) Average daily traffic
 - d) Average yearly traffic

- 9) To reduce the conflicts which method is preferable _____.
- a) Restricting the entry in one side
 - b) Widening of the roads
 - c) Use of traffic signals
 - d) Diverting the traffic
- 10) Which one of the following is not a regulatory sign?
- a) No U-turn
 - b) Overtaking prohibited
 - c) School zone
 - d) No parking
- 11) Which one of the following is not a warning sign?
- a) No entry
 - b) Curve ahead
 - c) U-turn
 - d) Narrow bridge ahead
- 12) Give name of traffic control devices _____.
- a) signs
 - b) signals
 - c) marking
 - d) all of the above
- 13) For highway geometric design purposes, the speed used is _____.
- a) 15th percentile
 - b) 50th percentile
 - c) 85th percentile
 - d) 98th percentile
- 14) STOP sign is having _____.
- a) Triangular shape
 - b) Circular shape
 - c) Octagonal shape
 - d) Any shape

CIVIL ENGINEERING

Traffic Engineering and Management (197042712)

Day & Date: Sunday, 19-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicates full marks.
3) Assume suitable data wherever needed and mention it clearly.
4) Draw neat sketches wherever necessary.

Section – I

Q.2 Answer the following questions (Any Two) 14

- Explain in detail objective and scope of traffic engineering.
- Explain in detail road user characteristics, vehicular characteristics-static and dynamic characteristics in traffic Engineering.
- Write short note on:
 - Spot Speed Studies
 - Speed and Delay Studies
 - Origin and Destination Studies

Q.3 Answer the following questions (Any Two) 14

- Spot speed studies are carried out at a certain stretch of highway and consolidated data is given below prepare frequency distribution table.

Speed Range (Kmph)	No. of vehicles Observed	Speed Range (Kmph)	No. of vehicles Observed
0 to 10	15	50 to 60	260
10 to 20	20	60 to 70	125
20 to 30	70	70 to 80	45
30 to 40	92	80 to 90	35
40 to 50	210	90 to 100	12

Determine:

- Upper and lower values or speed limits for regulation of mixed traffic flow.
 - Design speed for checking geometric design of highway elements.
- Explain and Derive relationship between Traffic Volume, Speed and Density.
 - Explain the following terms in detail.
 - Highway Capacity and level of service
 - Capacity of urban and rural roads
 - PCU concept

Section – II

- Q.4 Answer the following questions (Any Two) 14**
- a) Explain in detail various regulations on vehicles in traffic engineering.
 - b) Explain in detail Central Motor Vehicle Rules.
 - c) Explain in detail Traffic signs, Traffic Markings and Islands.
- Q.5 Answer the following questions (Any Two) 14**
- a) Explain in detail approach for Rotary intersection design.
 - d) Write a short note on.
 - i) Traffic Signals
 - ii) Road Lighting
 - c) Explain various applications of 'Intelligent Transportation System (ITS)' in traffic engineering.

Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No.3 (starting page of the Answer Book). Each question carry one mark.
2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the given options.

14

- 1) Traffic passing through 'special class' level crossing should be more than _____ Train Vehicle Unit (TVU).
a) 10000 to 20000 b) 30000 to 50000
c) 20000 to 30000 d) Above 50000
- 2) Indication post for detonators should be provide data at a distance of _____ m & _____ m for B.G. Level crossing.
a) 400 m & 800 m b) 500 m & 1200 m
c) 600 m & 1200 m d) 600 m & 1000 m
- 3) For protection of level crossing gate in an emergency on BG. Double line, the gateman should place one detonator at one place & three detonator at subsequent place at a distance of _____ m & _____ m respectively.
a) 400 m & 800 m b) 600 m & 1200 m
c) 500 m & 1000 m d) 300 m & 900 m
- 4) In an unmanned Level crossing, stop board should be provided at a distance of from the centre of nearest track _____.
a) 5 m b) 10 m
c) 7.5 m d) None of these
- 5) Replacement of swing gates by lifting bander existing manned Level Crossings shall be carried out where TVU is more than _____.
a) 4000 b) 50,000
c) 40,000 d) 60,000
- 6) TSR is recommended when the % age of unserviceable sleeper become more than _____.
a) 20% b) 40%
c) 30% d) None of these

| Q.6 | a) | Illustrate the reasons behind defects found in Rails. | 04 |
| | b) | Elaborate with the help of a diagram details of LWR. | 05 |
| Q.7 | a) | With the help of diagram explain Alumina Thermite process. | 04 |
| | b) | Identify the various types of derailments and mention the aspects of derailments. | 05 |
| Q.8 | a) | Explain diamond crossing with help of diagram. | 05 |
| | b) | A main line track on BG is having LWR of 52 kgs Laid at 40°C. The maximum rail temperature is 60°C and the minimum rail temperature is 0°C. Calculate the following:
i) Tension in rail
ii) Compression in rail
iii) Tensile stress and
iv) Compressive stress | 05 |
| Q.9 | a) | Illustrate the requirement of Railway station. (at least six points) | 04 |
| | b) | Discuss Nadal's Formula and its application. | 05 |

Set **Q**

**Fourth Y. (B.Tech.) (Sem-I) (New/Old) (CBCS) Examination:
March/April -2024**

CIVIL ENGINEERING

Advanced Railway Track (197042714)

Day & Date: Sunday, 19-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No.3 (starting page of the Answer Book). Each question carry one mark.
2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the given options.

14

- 1) What is the limiting loss of section in 52 kg. rail?
 - a) 4%
 - b) 8%
 - c) 10%
 - d) 6%
- 2) The service life of 60 kg. 90 UTS rail in GMT is _____.
 - a) 800
 - b) 1500
 - c) 1000
 - d) None of these
- 3) The service life of 52 kg. 72 UTS rails _____ in GMT.
 - a) 350
 - b) 250
 - c) 325
 - d) 550
- 4) When the Train Vehicle unit exceeds. TVU or visibility is poor as in the case of an unmanned level crossing, the same is considered as accident prone and action should be taken to man such level crossings in a phased manner.
 - a) <2500
 - b) 10000
 - c) 6000
 - d) 5000
- 5) For protection of level crossing gate in an emergency on BG. Double line, the gateman should place one detonator at one place & three detonator at subsequent place at a distance of _____ m & _____ m respectively.
 - a) 400 m & 800 m
 - b) 600 m & 1200 m
 - c) 500 m & 1000 m
 - d) 300 m & 900 m
- 6) At all manned level crossing, where visibility is poor, about 15 to 20 rumble strips should be provided spaced at _____ metres from centre to centre.
 - a) 1.0 m
 - b) 0.5 m
 - c) 1.5 m
 - d) 2.0 m
- 7) Periodical census of traffic for unmanned level crossings should be done.
 - a) Once in six years
 - b) Once in one year
 - c) Once in 3 years
 - d) Once in five years

- 8) Traffic passing through 'special class' level crossing should be more than _____ Train Vehicle Unit (TVU).
- a) 10000 to 20000 b) 30000 to 50000
c) 20000 to 30000 d) Above 50000
- 9) Indication post for detonators should be provide data at a distance of _____ m & _____ m for B.G. Level crossing.
- a) 400 m & 800 m b) 500 m & 1200 m
c) 600 m & 1200 m d) 600 m & 1000 m
- 10) For protection of level crossing gate in an emergency on BG. Double line, the gateman should place one detonator at one place & three detonator at subsequent place at a distance of _____ m & _____ m respectively.
- a) 400 m & 800 m b) 600 m & 1200 m
c) 500 m & 1000 m d) 300 m & 900 m
- 11) In an unmanned Level crossing, stop board should be provided at a distance of from the centre of nearest track _____.
- a) 5 m b) 10 m
c) 7.5 m d) None of these
- 12) Replacement of swing gates by lifting bander existing manned Level Crossings shall be carried out where TVU is more than _____.
- a) 4000 b) 50,000
c) 40,000 d) 60,000
- 13) TSR is recommended when the % age of unserviceable sleeper become more than _____.
- a) 20% b) 40%
c) 30% d) None of these
- 14) Through renewal of rubber pads shall be planned after _____ years.
- a) 7 b) 6
c) 5 d) 4

Set **Q**

**Fourth Y. (B.Tech.) (Sem-I) (New/Old) (CBCS) Examination:
March/April -2024**

CIVIL ENGINEERING

Advanced Railway Track (197042714)

Day & Date: Sunday, 19-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) Question no. 2 is compulsory in section I, and solve any two questions from the remaining. (Q. No. 3, 4 & 5)
2) Question no. 8 is compulsory in section II, and solve any two questions from the remaining. (Q. No. 6, 7 & 9)
3) Figures to the right indicate full marks.
4) Assume suitable data wherever needed and mention it clearly.

Section – I

- | | | | |
|------------|-----------|-------------------------------------------------------------------------------------------------------|-----------|
| Q.2 | a) | Discuss the need of mechanized maintenance of railway track. | 05 |
| | b) | With the help of diagram, illustrate the tamping procedure. | 05 |
| Q.3 | a) | Elaborate the classification track renewals. | 04 |
| | b) | Explain the renewal of Sleepers. | 05 |
| Q.4 | a) | Illustrate the whistle board with a neat diagram. | 04 |
| | b) | Illustrate the speed braker with a neat diagram. | 05 |
| Q.5 | a) | Describe the chemical and mechanical composition of all types of steel used in Indian Railway tracks. | 05 |
| | b) | Explain the handling process of rails. | 04 |

Section – II

- | | | | |
|------------|-----------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------|
| Q.6 | a) | Illustrate the reasons behind defects found in Rails. | 04 |
| | b) | Elaborate with the help of a diagram details of LWR. | 05 |
| Q.7 | a) | With the help of diagram explain Alumina Thermite process. | 04 |
| | b) | Identify the various types of derailments and mention the aspects of derailments. | 05 |
| Q.8 | a) | Explain diamond crossing with help of diagram. | 05 |
| | b) | A main line track on BG is having LWR of 52 kgs Laid at 40°C. The maximum rail temperature is 60°C and the minimum rail temperature is 0°C. Calculate the following:
i) Tension in rail
ii) Compression in rail
iii) Tensile stress and
iv) Compressive stress | 05 |

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the given options. 14

- 1) When the Train Vehicle unit exceeds. TVU or visibility is poor as in the case of an unmanned level crossing, the same is considered as accident prone and action should be taken to man such level crossings in a phased manner.

a) <2500	b) 10000
c) 6000	d) 5000
- 2) For protection of level crossing gate in an emergency on BG. Double line, the gateman should place one detonator at one place & three detonator at subsequent place at a distance of _____ m & _____m respectively.

a) 400 m & 800 m	b) 600 m & 1200 m
c) 500 m & 1000 m	d) 300 m & 900 m
- 3) At all manned level crossing, where visibility is poor, about 15 to 20 rumble strips should be provided spaced at _____ metres from centre to centre.

a) 1.0 m	b) 0.5 m
c) 1.5 m	d) 2.0 m
- 4) Periodical census of traffic for unmanned level crossings should be done.

a) Once in six years	b) Once in one year
c) Once in 3 years	d) Once in five years
- 5) Traffic passing though 'special class' level crossing should be more than _____ Train Vehicle Unit (TVU).

a) 10000 to 20000	b) 30000 to 50000
c) 20000 to 30000	d) Above 50000
- 6) Indication post for detonators should be provide data at a distance of _____ m & _____ m for B.G. Level crossing.

a) 400 m & 800 m	b) 500 m & 1200 m
c) 600 m & 1200 m	d) 600 m & 1000 m

- 7) For protection of level crossing gate in an emergency on BG. Double line, the gateman should place one detonator at one place & three detonator at subsequent place at a distance of _____ m & _____ m respectively.
- a) 400 m & 800 m b) 600 m & 1200 m
c) 500 m & 1000 m d) 300 m & 900 m
- 8) In an unmanned Level crossing, stop board should be provided at a distance of from the centre of nearest track _____.
- a) 5 m b) 10 m
c) 7.5 m d) None of these
- 9) Replacement of swing gates by lifting bander existing manned Level Crossings shall be carried out where TVU is more than _____.
- a) 4000 b) 50,000
c) 40,000 d) 60,000
- 10) TSR is recommended when the % age of unserviceable sleeper become more than _____.
- a) 20% b) 40%
c) 30% d) None of these
- 11) Through renewal of rubber pads shall be planned after _____ years.
- a) 7 b) 6
c) 5 d) 4
- 12) What is the limiting loss of section in 52 kg. rail?
- a) 4% b) 8%
c) 10% d) 6%
- 13) The service life of 60 kg. 90 UTS rail in GMT is _____.
- a) 800 b) 1500
c) 1000 d) None of these
- 14) The service life of 52 kg. 72 UTS rails _____ in GMT.

Day & Date: Sunday, 19-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the given options

14

- 1) _____ is a line of thought in management which Stresses the interactive nature and interdependence in an organization.
 - a) System analysis
 - b) System approach
 - c) Quantitative methods
 - d) System programming
- 2) _____ is a mathematics with the application of scientific methods and techniques to decision making problems for optimal solutions.
 - a) Linear programming
 - b) Statistical Methods
 - c) Statistical analysis
 - d) Operation research
- 3) _____ is an element factor that restrict project or system from achieving its potential reference to its variables.
 - a) Optimization
 - b) Constrains
 - c) Dynamic Programming
 - d) Building Model
- 4) _____ represent the total number of individuals in a habitat and also its potential for long term survival.
 - a) Population size
 - b) Population age
 - c) Population dispersion
 - d) Population density
- 5) _____ is a use of system analysis and simulation to minimize complex of ecological system.
 - a) Environmental modeling
 - b) Reality & Real system
 - c) Ecological modeling
 - d) Conceptual model
- 6) _____ is the study of population in relation to environment including environmental influences on population density and distribution.
 - a) Population dynamics
 - b) Population ecology
 - c) Population dispersion model
 - d) Population Simulation

- 7) An integrated system combines and optimize waste collective system by effective sorting followed by one or more options _____.
- Material recycling
 - Biological treatment
 - Thermal treatment and sanitary landfill
 - All of above
- 8) The _____ of municipal wastes refers to concept of long term planning process that involve anticipated changes in future.
- Integrated Waste management
 - Strategic planning
 - Environmental Planning
 - System analysis
- 9) The _____ delivers the incoming flow rate and the concentration for s11 components in wastewater model.
- Inflow model
 - Outflow model
 - Strategic flow model
 - Dynamic flow model
- 10) The concentration of particular component in the sludge flow is calculated with _____ and depend on flow rate.
- C:N ratio
 - BOD
 - Mass balance
 - Nutrient Removal
- 11) _____ is an optimization method applicable for the solution of problems in which objective functions and constrains appear.
- Non-Linear programming
 - Linear programming
 - Graphical programming
 - Continuity Equations
- 12) _____ helps to visualize and also helps to understand different terminologies associated with the solution of linear programming.
- Graphical Method
 - Simplex Method
 - Linear programming
 - Stochastic programming
- 13) _____ means of estimating downwind air pollution concentrations and information about pollutant emission and nature of atmosphere.
- Gaussian Plume model
 - Dispersion Model
 - Atmospheric dispersion model
 - Meteorological model
- 14) _____ gives the concentration estimates within an order of magnitude for continuous releases over homogeneous terrain.
- Source dispersion model
 - Emission Model
 - Receptor model
 - Gaussian plume model

Day & Date: Sunday, 19-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) Question No. 2 is compulsory in Section I, and solve any two questions from the remaining.
2) Question No. 6 is compulsory in Section II, and solve any two questions from the remaining.
3) Figures to the right indicate full marks.
4) Assume suitable data wherever needed and mention it clearly.
5) Use of non-programable calculator is allowed.

Section – I

- | | | | |
|------------|--------------------------|------------------------------------------------------------------------|-----------|
| Q.2 | a) | Explain the use of System approach in civil Engineering. | 05 |
| | b) | Explain the Benefits of Integrated waste Management | 05 |
| Q.3 | a) | Explain the concepts and principle of Population dynamics. | 05 |
| | b) | Explain the characteristics of Population ecology. | 04 |
| Q.4 | a) | Explain the elements of integrated waste management with neat diagram. | 04 |
| | b) | Explain with neat sketch the model of sustainable waste management. | 05 |
| Q.5 | Write Short Notes | | |
| | a) | Building Modeling | 05 |
| | b) | Scope of system approach in civil Engineering | 04 |

Section – II

- | | | | |
|------------|---------------------------|---------------------------------------------------------------------------------------------|-----------|
| Q.6 | a) | Explain the salient features of Optimization. | 05 |
| | b) | Explain with a neat diagram the strategies of wastewater treatment process and its control. | 05 |
| Q.7 | a) | Explain the point source Gaussian plume model. | 05 |
| | b) | Explain the equation of continuity for rectangular model. | 04 |
| Q.8 | a) | Explain inflow model for incoming flow. | 05 |
| | b) | Explain Linear programming and its applications in civil engineering. | 04 |
| Q.9 | Write short notes. | | |
| | a) | Pollutant Standard Index criteria | 05 |
| | b) | Concepts of wastewater model | 04 |

Set **R**

**Fourth Y. (B.Tech.) (Sem - I) (New/Old) (CBCS) Examination:
March/April -2024
CIVIL ENGINEERING
Environmental Systems (197042716)**

Day & Date: Sunday, 19-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the given options

14

- 1) _____ is an optimization method applicable for the solution of problems in which objective functions and constrains appear.
 - a) Non-Linear programming
 - b) Linear programming
 - c) Graphical programming
 - d) Continuity Equations
- 2) _____ helps to visualize and also helps to understand different terminologies associated with the solution of linear programming.
 - a) Graphical Method
 - b) Simplex Method
 - c) Linear programming
 - d) Stochastic programming
- 3) _____ means of estimating downwind air pollution concentrations and information about pollutant emission and nature of atmosphere.
 - a) Gaussian Plume model
 - b) Dispersion Model
 - c) Atmospheric dispersion model
 - d) Meteorological model
- 4) _____ gives the concentration estimates within an order of magnitude for continuous releases over homogeneous terrain.
 - a) Source dispersion model
 - b) Emission Model
 - c) Receptor model
 - d) Gaussian plume model
- 5) _____ is a line of thought in management which Stresses the interactive nature and interdependence in an organization.
 - a) System analysis
 - b) System approach
 - c) Quantitative methods
 - d) System programming
- 6) _____ is a mathematics with the application of scientific methods and techniques to decision making problems for optimal solutions.
 - a) Linear programming
 - b) Statistical Methods
 - c) Statistical analysis
 - d) Operation research
- 7) _____ is an element factor that restrict project or system from achieving its potential reference to its variables.
 - a) Optimization
 - b) Constrains
 - c) Dynamic Programming
 - d) Building Model

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the given options

14

- 1) _____ is the study of population in relation to environment including environmental influences on population density and distribution.
 - a) Population dynamics
 - b) Population ecology
 - c) Population dispersion model
 - d) Population Simulation
- 2) An integrated system combines and optimize waste collective system by effective sorting followed by one or more options _____.
 - a) Material recycling
 - b) Biological treatment
 - c) Thermal treatment and sanitary landfill
 - d) All of above
- 3) The _____ of municipal wastes refers to concept of long term planning process that involve anticipated changes in future.
 - a) Integrated Waste management
 - b) Strategic planning
 - c) Environmental Planning
 - d) System analysis
- 4) The _____ delivers the incoming flow rate and the concentration for s11 components in wastewater model.
 - a) Inflow model
 - b) Outflow model
 - c) Strategic flow model
 - d) Dynamic flow model
- 5) The concentration of particular component in the sludge flow is calculated with _____ and depend on flow rate.
 - a) C:N ratio
 - b) BOD
 - c) Mass balance
 - d) Nutrient Removal
- 6) _____ is an optimization method applicable for the solution of problems in which objective functions and constrains appear.
 - a) Non-Linear programming
 - b) Linear programming
 - c) Graphical programming
 - d) Continuity Equations

- 7) _____ helps to visualize and also helps to understand different terminologies associated with the solution of linear programming.
- a) Graphical Method b) Simplex Method
c) Linear programming d) Stochastic programming
- 8) _____ means of estimating downwind air pollution concentrations and information about pollutant emission and nature of atmosphere.
- a) Gaussian Plume model b) Dispersion Model
c) Atmospheric dispersion model d) Meteorological model
- 9) _____ gives the concentration estimates within an order of magnitude for continuous releases over homogeneous terrain.
- a) Source dispersion model b) Emission Model
c) Receptor model d) Gaussian plume model
- 10) _____ is a line of thought in management which Stresses the interactive nature and interdependence in an organization.
- a) System analysis b) System approach
c) Quantitative methods d) System programming
- 11) _____ is a mathematics with the application of scientific methods and techniques to decision making problems for optimal solutions.
- a) Linear programming b) Statistical Methods
c) Statistical analysis d) Operation research
- 12) _____ is an element factor that restrict project or system from achieving its potential reference to its variables.
- a) Optimization b) Constrains
c) Dynamic Programming d) Building Model
- 13) _____ represent the total number of individuals in a habitat and also its potential for long term survival.
- a) Population size b) Population age
c) Population dispersion d) Population density
- 14) _____ is a use of system analysis and simulation to minimize complex of ecological system.
- a) Environmental modeling b) Reality & Real system
c) Ecological modeling d) Conceptual model

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the given options.

14

- 1) A nuclear power plant is variably used as a _____.
a) base load plant b) peak load plant
c) stand by plant d) None
- 2) The load factor for the peak day of the year determines the required _____.
a) Water storage b) Pondage
c) Generating capacity d) None
- 3) Minimum pressure occurs in fall flowing power tunnel at the time of _____.
a) load rejection b) load acceptance
c) head race d) fall race
- 4) Unit power in a turbine is _____.
a) $P/H^{1/2}$ b) P/H
c) $P/H^{3/2}$ d) $P/H^{3/4}$
- 5) The pumped storage scheme is employed to supply water _____.
a) during the off-peak hours b) during the peak hours
c) system base load d) none of above
- 6) The draft tube is provided to _____.
a) reduce the effect of water hammer
b) raise the water surface of the stream to create an artificial head
c) increase the artificial head on the water wheel
d) none of the above
- 7) The flow through penstocks and pressure conducts is generally _____.
a) laminar b) turbulent
c) both a) and b) d) none of these
- 8) The specific speeds of Pelton wheel, Francis and Kaplan turbines are in _____.
a) Increasing order
b) Decreasing order
c) Neither increasing nor decreasing order
d) none

Water Power Engineering (197042717)

Day & Date: Sunday, 19-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:**
- 1) All questions are compulsory.
 - 2) Figures to the right indicates full marks.
 - 3) Draw neat labelled diagrams whenever necessary.
 - 4) Use of only non-programmable calculator is allowed.
 - 5) Assume suitable data wherever necessary.

Section – I

Q.2 Solve Any Four. 16

- a) What do you understand by non-conventional sources of power generation? What is the scope of these sources in India?
- b) What are the different salient factors to be considered in deciding the alignment of a tunnel in a hydroelectric project?
- c) What are the various objectives of planning for water power development?
- d) When a run of river plant operates as a peak load stations with a weekly load factor of 24%, all its capacity is firm capacity. What will be the minimum flow in the river so that the station may serve as the base load stations. It is given that, Installed capacity of generator = 11,000 kW, Operating Head = 15 m, Plant efficiency = 84%, estimate the daily load factor of the plant if the stream flow is 25 cumecs.
- e) Assuming that the daily flow in a river is 20 m³/ sec, what would be the firm capacity of run of river plant to be used as 8 hours peak load station? What would be the pondage factor and the magnitude of the pondage? Head of the plant is 12 m. Overall efficiency is 85 %.

Q.3 Solve Any Two. 12

- a) What do you understand by base load and peak load power plants? What factors are considered in selecting a plant as base load plant or peak load plant?
- b) A penstock, with an internal diameter 1.0 m, supplies water at a head equivalent to 15 kg/cm². There is a possibility of 24% in the pressure due to transient conditions. The design stress and the efficiency of the joint may be assumed to be 1000 kg/cm² and 86% resp. Find the wall thickness of penstock.
- c) What do you understand by Run of river plants? What are the parts and arrangement of such plants? Draw a neat sketch.

Section – II

Q.4 Solve Any Four. **16**

- a) Which factors are considered in deciding the setting of Pelton wheel in horizontal plane and in vertical plane?
- b) Explain the function of Anchor block and enlist the forces acting on it.
- c) What do you understand by 'pump storage plant'? What are the advantages and disadvantages of this power plant?
- d) Power house is equipped with 4 units of vertical shaft Pelton turbines to be coupled with 80000 kVA, 3 phase. 50 hertz generation. The generation are provided with 10 pairs of poles. The gross design head is 500 m and transmission efficiency of head race tunnel and penstocks together is to be 95%. The four units together will provide for a power of 350000 hp at a guaranteed efficiency of 90%. The nozzle efficiency is 0.98.
Find:
 - i) Design discharge for the turbine
 - ii) Jet dia. and no. of jets
 - iii) Nozzle tip diameter
 - iv) Pitch circle dia. of the wheel
- e) Enlist the different types of Draft tubes and write the advantages of them.

Q.5 Solve Any Two. **12**

- a) A closed cycle power plant with gross head 350 m has head race tunnel of 4.0 m dia. and 750 m long. Flow velocity is 8.0 m/s and coefficient of friction 0.015 overall efficiency of pumping and generation at 88% and 90% respectively, Calculate plant efficiency.
- b) What topographical features are in favour of adopting underground power plant? What are the different types of underground power stations? Draw a neat layout.
- c) Explain the various methods of Tidal power generation. What are the limitations of each method? (Draw neat sketches)

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the given options. 14

- 1) The specific speeds of Pelton wheel, Francis and Kaplan turbines are in _____.
 - a) Increasing order
 - b) Decreasing order
 - c) Neither increasing nor decreasing order
 - d) none
- 2) A turbine is called reaction turbine if at the inlet of turbine, the total energy is _____.
 - a) kinetic
 - b) pressure
 - c) kinetic and pressure
 - d) none
- 3) In hydro electric power station what is an enlarge body of water just above the intake and used as a regulating reservoir called _____.
 - a) Penstock
 - b) spillways
 - c) reservoir
 - d) Fore bay
- 4) The draft tube is provided to _____.
 - a) reduce the effect of water hammer
 - b) raise the water surface of the stream to create an artificial head
 - c) increase the acting head on the water wheel
 - d) None of the above
- 5) Cavitation in a turbine causes _____.
 - a) low efficiency
 - b) blade surface is damaged
 - c) vibration and noise
 - d) none of the above
- 6) For harnessing low variable water heads the suitable hydraulic turbine with reaction and adjustable vanes is _____.
 - a) Pelton
 - b) Francis
 - c) Impeller
 - d) Kaplan
- 7) Surge tank is necessarily provided for _____.
 - a) long penstocks
 - b) short length penstocks
 - c) surface penstocks
 - d) embedded penstocks

- b) Explain the function of Anchor block and enlist the forces acting on it.
- c) What do you understand by 'pump storage plant'? What are the advantages and disadvantages of this power plant?
- d) Power house is equipped with 4 units of vertical shaft Pelton turbines to be coupled with 80000 kVA, 3 phase. 50 hertz generation. The generation are provided with 10 pairs of poles. The gross design head is 500 m and transmission efficiency of head race tunnel and penstocks together is to be 95%. The four units together will provide for a power of 350000 hp at a guaranteed efficiency of 90%. The nozzle efficiency is 0.98.
Find:
 - i) Design discharge for the turbine
 - ii) Jet dia. and no. of jets
 - iii) Nozzle tip diameter
 - iv) Pitch circle dia. of the wheel
- e) Enlist the different types of Draft tubes and write the advantages of them.

Q.5 Solve Any Two. **12**

- a) A closed cycle power plant with gross head 350 m has head race tunnel of 4.0 m dia. and 750 m long. Flow velocity is 8.0 m/s and coefficient of friction 0.015 overall efficiency of pumping and generation at 88% and 90% respectively, Calculate plant efficiency.
- b) What topographical features are in favour of adopting underground power plant? What are the different types of underground power stations? Draw a neat layout.
- c) Explain the various methods of Tidal power generation. What are the limitations of each method? (Draw neat sketches)

CIVIL ENGINEERING

Water Power Engineering (197042717)

Day & Date: Sunday, 19-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book).
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.
5) Use of only non-programmable calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the given options.

14

- 1) The draft tube is provided to _____.
a) reduce the effect of water hammer
b) raise the water surface of the stream to create an artificial head
c) increase the artificial head on the water wheel
d) none of the above
- 2) The flow through penstocks and pressure conducts is generally _____.
a) laminar
b) turbulent
c) both a) and b)
d) none of these
- 3) The specific speeds of Pelton wheel, Francis and Kaplan turbines are in _____.
a) Increasing order
b) Decreasing order
c) Neither increasing nor decreasing order
d) none
- 4) A turbine is called reaction turbine if at the inlet of turbine, the total energy is _____.
a) kinetic
b) pressure
c) kinetic and pressure
d) none
- 5) In hydro electric power station what is an enlarge body of water just above the intake and used as a regulating reservoir called _____.
a) Penstock
b) spillways
c) reservoir
d) Fore bay
- 6) The draft tube is provided to _____.
a) reduce the effect of water hammer
b) raise the water surface of the stream to create an artificial head
c) increase the acting head on the water wheel
d) None of the above
- 7) Cavitation in a turbine causes _____.
a) low efficiency
b) blade surface is damaged
c) vibration and noise
d) none of the above

CIVIL ENGINEERING

Water Power Engineering (197042717)

Day & Date: Sunday, 19-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:**
- 1) All questions are compulsory.
 - 2) Figures to the right indicates full marks.
 - 3) Draw neat labelled diagrams whenever necessary.
 - 4) Use of only non-programmable calculator is allowed.
 - 5) Assume suitable data wherever necessary.

Section – I

Q.2 Solve Any Four. 16

- a) What do you understand by non-conventional sources of power generation? What is the scope of these sources in India?
- b) What are the different salient factors to be considered in deciding the alignment of a tunnel in a hydroelectric project?
- c) What are the various objectives of planning for water power development?
- d) When a run of river plant operates as a peak load stations with a weekly load factor of 24%, all its capacity is firm capacity. What will be the minimum flow in the river so that the station may serve as the base load stations. It is given that, Installed capacity of generator = 11,000 kW, Operating Head = 15 m, Plant efficiency = 84%, estimate the daily load factor of the plant if the stream flow is 25 cumecs.
- e) Assuming that the daily flow in a river is 20 m³/ sec, what would be the firm capacity of run of river plant to be used as 8 hours peak load station? What would be the pondage factor and the magnitude of the pondage? Head of the plant is 12 m. Overall efficiency is 85 %.

Q.3 Solve Any Two. 12

- a) What do you understand by base load and peak load power plants? What factors are considered in selecting a plant as base load plant or peak load plant?
- b) A penstock, with an internal diameter 1.0 m, supplies water at a head equivalent to 15 kg/cm². There is a possibility of 24% in the pressure due to transient conditions. The design stress and the efficiency of the joint may be assumed to be 1000 kg/cm² and 86% resp. Find the wall thickness of penstock.
- c) What do you understand by Run of river plants? What are the parts and arrangement of such plants? Draw a neat sketch.

Section – II

Q.4 Solve Any Four. **16**

- a) Which factors are considered in deciding the setting of Pelton wheel in horizontal plane and in vertical plane?
- b) Explain the function of Anchor block and enlist the forces acting on it.
- c) What do you understand by 'pump storage plant'? What are the advantages and disadvantages of this power plant?
- d) Power house is equipped with 4 units of vertical shaft Pelton turbines to be coupled with 80000 kVA, 3 phase. 50 hertz generation. The generation are provided with 10 pairs of poles. The gross design head is 500 m and transmission efficiency of head race tunnel and penstocks together is to be 95%. The four units together will provide for a power of 350000 hp at a guaranteed efficiency of 90%. The nozzle efficiency is 0.98.
Find:
 - i) Design discharge for the turbine
 - ii) Jet dia. and no. of jets
 - iii) Nozzle tip diameter
 - iv) Pitch circle dia. of the wheel
- e) Enlist the different types of Draft tubes and write the advantages of them.

Q.5 Solve Any Two. **12**

- a) A closed cycle power plant with gross head 350 m has head race tunnel of 4.0 m dia. and 750 m long. Flow velocity is 8.0 m/s and coefficient of friction 0.015 overall efficiency of pumping and generation at 88% and 90% respectively, Calculate plant efficiency.

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:20

Q.1 Choose the correct alternatives from the given options. 20

- 1) What is an ethical dilemma?
 - a) an issue caused by not following guidelines
 - b) conflict between what's right and what's wrong
 - c) same as a professional dilemma
 - d) moral conflict between values

- 2) _____ is the concept that describe the beliefs of an individual or culture.
 - a) Values
 - b) Attitude
 - c) Behaviour
 - d) Personality

- 3) In the _____ right conduct for an individual is regarded as whatever directly benefits oneself.
 - a) pre-conventional level
 - b) post-conventional level
 - c) conventional level
 - d) Final level

- 4) An agreement not enforceable by law is said to be _____.
 - a) A contract
 - b) Void
 - c) A voidable contract
 - d) A void contract

- 5) We use which among the following technique in business organizations and firms for protecting the IT assets?
 - a) Ethical hacking
 - b) Unethical hacking
 - c) Fixing bugs
 - d) Internal data-breach

- 6) A contract consists of _____.
 - a) Mutual promises or agreement enforceable by law
 - b) Agreement not enforceable by law
 - c) Involuntary obligations
 - d) None of these

- 7) Which of the following is not true with respect to Titanic disaster?
 - a) Adequate Life boats
 - b) Ship sailed at high speed in the night
 - c) It had hit against an ice berg
 - d) The ship tore into two parts due to hitting against iceberg

- 8) Which of the following is not true with respect to ensure a safety design?
- The maximum requirement is that a design must comply with the applicable laws.
 - An acceptable design must meet the standard of "accepted engineering practice."
 - Alternative designs that are potentially safer must be explored
 - Engineer must attempt to foresee potential misuses of the product by the consumer and must design to avoid these problems.
- 9) In _____, a neutral third party assists the disputing parties in reaching a settlement of their dispute.
- Infiltration
 - Arbitration
 - Mediation
 - Negotiation
- 10) Which of the following stakeholder has the responsibility of prescribing norms to ensure safety of the citizens?
- Government
 - Professional Societies
 - Standardization Bodies
 - All of these
- 11) What does a trademark protect?
- An invention
 - Logos, names and brands
 - The look, shape and feel of a product
 - A secret formula
- 12) How long do patents usually last for?
- 10 years
 - 20 years
 - 40 years
 - 60 years
- 13) Safety provisions in Indian Factory Act does not cover _____.
- Fencing of machinery
 - Precaution against fire
 - Lunch rooms
 - Protection eyes
- 14) Which of the following matter are not referred to arbitration?
- Civil matters
 - Matrimonial matters
 - Banking matters
 - Property matters
- 15) Copyright law gives _____ exclusive rights to the owner of copyright.
- 2
 - 4
 - 6
 - 3
- 16) Ethical Style is _____.
- Promises only what can be delivered
 - Deals honestly with others
 - Behaves unselfishly
 - Contributes to knowledge base
- 17) _____ is defined as the right of a person to guide.
- Democracy
 - Freedom
 - Responsibility
 - Authority
- 18) Patents are granted by national patent offices or by regional offices that cany out examination work for a group of countries _____.
- True
 - False
- 19) Rules that mandate or prohibit certain behaviour in society _____.
- Regulation
 - Law
 - Rules
 - Moral ethics

- 20)** The hardware or a process used in its manufacture may be protected by
a) _____.
- | | |
|--------------|--------------------|
| a) Copyright | b) Design registry |

Section – I

- Q.2** a) Explain role of contractors and consultants in professional practice. **10**
b) State and Explain Professional bodies certifying and offering platform for Civil engineers. **10**
- Q.3** a) Define the terms: - **10**
1) Engineering Ethics
2) Vigil mechanism
3) Protected disclosures
4) Negligence
b) State Code of Ethics as defined in the website of Institution of Engineers. **10**
- Q.4** a) Describe principle of contract management, also discuss Indian Contract Act, 1972. **10**
b) Explain the process of preparing a tender document. **10**

Section – II

- Q.5** a) What is Arbitration tribunal? Discuss the grounds for setting aside an award. **10**
b) Discuss the Dispute Resolution Boards and Lok Adalats. **10**
- Q.6** a) Describe the regulation of employment and conditions of service under Building & other Construction Workers. **10**
b) Discuss methods of engaging labor. **10**
- Q.7** a) Explain process of obtaining patent. **10**
b) Explain Copyright in India including Historical evolution of Copy Rights Act, 1957. **10**

**Fourth Y. (B Tech) (Sem-II) (New) (CBCS) Examination: March/April-2024
CIVIL ENGINEERING**

Repairs & Rehabilitation of Structures (BTN01803)

Day & Date: Saturday, 11-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 100

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:20

Q.1 Choose the correct alternatives from the given options. 20

- 1) _____ are unpredictable factors of failure of structure.

a) Earthquake	b) Bomb blast
c) both a & b	d) none of the above
- 2) The pH value of fresh concrete is around _____.

a) 10	b) 9
c) 8	d) 12.5
- 3) In restoration of strength by adding external reinforced concrete, the damage in concrete is first repaired by applying _____.

a) Preload	b) Tensile load
c) Compressive load	d) Overload
- 4) Mortar or concrete conveyed through pressure hose and applied pneumatically at high velocity on to a surface is called _____.

a) Guniting	b) grouting
c) sealing	d) spraying
- 5) The main reason for crack generation in concrete is _____.

a) movement of humidity	b) shrinkage
c) difference in temperature	d) all of the above
- 6) Remove a whole building or part of building in control way is known as _____.

a) restoration	b) demolition
c) retrofitting	d) maintenance
- 7) Anti corrosive paint is _____ in colour.

a) Blue	b) White
c) Black	d) Yellow
- 8) Epoxy resins have _____.

a) poor mechanical strength	b) poor thermal strength
c) low tensile strength	d) none of the above

Seat No.

**Fourth Y. (B Tech) (Sem-II) (New) (CBCS) Examination: March/April-2024
CIVIL ENGINEERING**

Repairs & Rehabilitation of Structures (BTN01803)

Day & Date: Saturday, 11-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 80

- Instructions:** 1) All questions are compulsory
2) Figures to the right indicate full marks.
3) Assume suitable data wherever needed and mention it clearly.

Section – I

- Q.2 Solve any two** **16**
- Explain the various causes for deterioration of concrete structures.
 - Explain assessment procedure for inspection and evaluating a damaged structure.
 - Describe about fiber reinforced concrete.
- Q.3 Solve any four** **24**
- Explain bacterial concrete/self-healing concrete
 - Explain Shoring and Underpinning.
 - Discuss about maintenance of structure.
 - Describe on Shotcrete and Guniting.
 - Explain vacuum concrete.
 - Explain about cracks found in reinforced concrete structures.

Section – II

- Q.4 Solve any two** **16**
- Explain with sketches retrofitting and jacketing method used in repairs of column and beams.
 - Explain in detail structural health monitoring for buildings.
 - Explain repair techniques used in R.C. slab.
- Q.5 Solve any four** **24**
- Describe repairs of underwater structures.
 - Explain repairs in case of leakages in concrete slab.
 - Explain strengthening of R.C beams.
 - Explain demolition techniques used in buildings.
 - Describe repair techniques used fire damaged buildings.
 - Describe repair techniques used to overcome low member strength, deflection in R.C members.

Repairs & Rehabilitation of Structures (BTN01803)

Day & Date: Saturday, 11-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 100

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:20

Q.1 Choose the correct alternatives from the given options. 20

- 1) _____ equipment used for starting the explosion in explosive material.
 - a) Detonators
 - b) Starting cap
 - c) Current switch
 - d) none of the above
- 2) _____ is not used in the underpinning work.
 - a) Heating method
 - b) Frizzing method
 - c) Pit method
 - d) all of the above
- 3) The repair and rehabilitation of damaged or spelled concrete is done by removing the _____.
 - a) Loose concrete
 - b) Collapsing
 - c) Breakage
 - d) Bonding
- 4) Main causes of failure of the structure _____.
 - a) Design error
 - b) Poor inspection
 - c) Poor quality of materials
 - d) all of the above
- 5) _____ bacteria are commonly used in bacterial concrete for crack repair.
 - a) E. coli
 - b) Lactobacillus
 - c) Streptococcus
 - d) Salmonella
- 6) Which non-destructive testing (NDT) method is suitable for detecting voids or delamination's in concrete?
 - a) Ultrasonic testing
 - b) X-ray imaging
 - c) Taste testing
 - d) Guesswork
- 7) _____ sensor is often employed to monitor temperature changes in concrete structures.
 - a) Strain gauges
 - b) Piezoelectric sensors
 - c) Fiberoptic sensors
 - d) Thermocouples
- 8) _____ of the following factors contributes to the corrosion of steel in marine structures.
 - a) Low humidity
 - b) High pH of seawater
 - c) Absence of oxygen
 - d) Presence of chloride ions

- 9) _____ of the following factors may necessitate retrofitting of concrete structures.
- Low humidity
 - Minimal traffic loads
 - Structural deterioration or damage
 - Excessive reinforcement
- 10) _____ is the primary goal of structural rehabilitation.
- To decrease the load-bearing capacity
 - To increase the risk of collapse
 - To enhance the structural integrity and extend service life
 - To ignore existing defects
- 11) _____ are unpredictable factors of failure of structure.
- Earthquake
 - Bomb blast
 - both a & b
 - none of the above
- 12) The pH value of fresh concrete is around _____.
- 10
 - 9
 - 8
 - 12.5
- 13) In restoration of strength by adding external reinforced concrete, the damage in concrete is first repaired by applying _____.
- Preload
 - Tensile load
 - Compressive load
 - Overload
- 14) Mortar or concrete conveyed through pressure hose and applied pneumatically at high velocity on to a surface is called _____.
- Guniting
 - grouting
 - sealing
 - spraying
- 15) The main reason for crack generation in concrete is _____.
- movement of humidity
 - shrinkage
 - difference in temperature
 - all of the above
- 16) Remove a whole building or part of building in control way is known as _____.
- restoration
 - demolition
 - retrofitting
 - maintenance
- 17) Anti corrosive paint is _____ in colour.
- Blue
 - White
 - Black
 - Yellow
- 18) Epoxy resins have _____.
- poor mechanical strength
 - poor thermal strength
 - low tensile strength
 - none of the above
- 19) _____ type of plaster defect generates a series of hair cracks inside the plaster.
- Crazing
 - Blistering
 - Flaking
 - Popping
- 20) _____ metal is used for making a foamed concrete.
- Aluminum
 - Zinc
 - a & b both
 - none of the above

Industrial Structures (BTN01804)

Day & Date: Saturday, 11-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 100

- Instructions:**
- 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No.3 (starting page of the Answer Book).
 - 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 - 3) Figures to the right indicates full marks.
 - 4) Assume suitable data wherever needed and mention it clearly.
 - 5) Use of IS 800-2007 and IS 875 are allowed, but not allowed for MCQ (Q. No.1)
 - 6) Use of scientific non programmable calculator is allowed.
 - 7) Draw the appropriate sketches wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 20

Q.1 Choose the correct alternatives from the options.

- 1) What is the value of constant 'k' to calculate throat thickness in fillet weld if the angle between fusion faces is 110° ? **01**
 - a) 0.6
 - b) 0.65
 - c) 0.55
 - d) 0.75
- 2) For the block shear failure of a tension member, the failure occurs along a path through the connection involving _____. **01**
 - a) Tension on the two perpendicular planes
 - b) Shear on the two perpendicular planes
 - c) Tension on one plane and shear on the other perpendicular plane
 - d) Tension on the plane of connection and compression on the other
- 3) The shape factor in plastic method of analysis depends upon _____. **01**
 - a) Yield stress of the material
 - b) Hinge length
 - c) Geometry of the section
 - d) Redistribution of moments
- 4) Which of the following is a compression member? **01**
 - a) Purlin
 - b) Boom
 - c) Girt
 - d) Tie
- 5) As per IS 800 purlins are designed as a _____. **01**
 - a) Simply supported beams
 - b) Cantilever beams
 - c) Continuous beams
 - d) Compression member
- 6) Sag rod are designed as _____. **01**
 - a) Compression member
 - b) Tension member
 - c) Laterally supported beam
 - d) Laterally unsupported beam

CIVIL ENGINEERING
Industrial Structures (BTN01804)

Day & Date: Saturday, 11-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 80

- Instructions:** 1) Attempt any two questions from both sections.
 2) Figures to the right indicate full marks.
 3) Assume suitable data wherever needed & mention it clearly.
 4) Use of IS 800-2007 and IS 875 are allowed, but not allowed for MCQ.
 5) Use of scientific non programmable calculator is allowed.
 6) Draw the appropriate sketches wherever necessary.

Section – I

- Q.2** An Industrial building has the following: **20**
 a) Span - 30 m
 b) Length - 70 m
 c) Wind speed - 6 m/s
 d) Clear height - 10 m
 e) Class B Building
 f) Galvanized Steel Sheet
 Design roof truss, purlin and girder for the industrial building.
 Assume any missing data as Indian Standards.
- Q.3** With the help of a diagram, explain structural framing of a braced industrial building. Show cross section at end bay and bottom chord bracing. **20**
- Q.4** An elevated cylindrical tank is to be designed for a capacity of 300 KL, the tank has conical roof and suspended hemispherical bottom. Design the tank for the thickness of the plates at cylindrical and hemispherical sections. Also design the connections. Take $F_y = 250$ and assume any missing data as per standards. **20**

Section – II

- Q.5** A self-supporting steel chimney is 80 m high and its diameter at the top is 4 metres, design breech (flue) opening. Adopt the wind force as per IS : 875. The location of the place is such that the intensity of wind pressure at 30 m height is 120 kN/m^2 . Assume any missing data as per Indian Standards. **20**
- Q.6** a) Sketch the elevation of different transmission line towers. **10**
 b) Explain the procedure for designing transmission line towers. **10**
- Q.7** a) Explain the different types of machine foundation. **08**
 b) Explain the design procedure of turbo generator foundation. **12**

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 20

Q.1 Choose the correct alternatives from the options.

- 1) As per IS 800 purlins are designed as a _____. **01**
 - a) Simply supported beams
 - b) Cantilever beams
 - c) Continuous beams
 - d) Compression member
- 2) Sag rod are designed as _____. **01**
 - a) Compression member
 - b) Tension member
 - c) Laterally supported beam
 - d) Laterally unsupported beam
- 3) The self- weight of a roof truss (N/m^2) may be obtained by _____. **01**
 - a) $(L + 5)5$
 - b) $(L/3 + 5)10$
 - c) $(L - 5)5$
 - d) $(L/3 - 5)10$
- 4) Steel is an alloy which mainly contains _____. **01**
 - a) iron and silica
 - b) iron and sulfur
 - c) iron and carbon
 - d) iron and sodium
- 5) What is the value of constant 'k' to calculate throat thickness in fillet weld if the angle between fusion faces is 110° ? **01**
 - a) 0.6
 - b) 0.65
 - c) 0.55
 - d) 0.75
- 6) For the block shear failure of a tension member, the failure occurs along a path through the connection involving _____. **01**
 - a) Tension on the two perpendicular planes
 - b) Shear on the two perpendicular planes
 - c) Tension on one plane and shear on the other perpendicular plane
 - d) Tension on the plane of connection and compression on the other

- 7) The shape factor in plastic method of analysis depends upon _____. **01**
a) Yield stress of the material b) Hinge length
c) Geometry of the section d) Redistribution of moments
- 8) Which of the following is a compression member? **01**
a) Purlin b) Boom
c) Girt d) Tie
- 9) The shape factor for triangular section is _____. **02**
a) 1.50 b) 1.14
c) 2.34 d) 1.78
- 10) A beam section is classified as low shear case when the factored shear force is less than _____. **02**
a) $0.4V_d$ b) $0.6V_d$
c) $0.8V_d$ d) V_d
- 11) For economical span of roof truss, if t , p , r are the cost of truss, purlin and roof coverings respective, then _____. **02**
a) $t = p + r$ b) $t = 2p + r$
c) $t = p + 3r$ d) $t + p + 2r$
- 12) Which of the following is the mode of failure in fillet weld material? **02**
a) Tension b) Shear
c) Bearing d) Crushing
- 13) The slenderness ratio of lacing flat is limited to _____. **02**
a) 350 b) 145
c) 180 d) 250
- 14) The thickness of base plate is determined from the _____. **02**
a) Flexural strength of plate
b) Shear strength of plate
c) Bearing strength of concrete pedestal
d) Punching criteria

 6) Draw the appropriate sketches wherever necessary.

Section – I

- Q.2** An Industrial building has the following: **20**
 a) Span - 30 m
 b) Length - 70 m
 c) Wind speed - 6 m/s
 d) Clear height - 10 m
 e) Class B Building
 f) Galvanized Steel Sheet
 Design roof truss, purlin and girder for the industrial building.
 Assume any missing data as Indian Standards.
- Q.3** With the help of a diagram, explain structural framing of a braced industrial building. Show cross section at end bay and bottom chord bracing. **20**
- Q.4** An elevated cylindrical tank is to be designed for a capacity of 300 KL, the tank has conical roof and suspended hemispherical bottom. Design the tank for the thickness of the plates at cylindrical and hemispherical sections. Also design the connections. Take $F_y = 250$ and assume any missing data as per standards. **20**

Section – II

- Q.5** A self-supporting steel chimney is 80 m high and its diameter at the top is 4 metres, design breech (flue) opening. Adopt the wind force as per IS : 875. The location of the place is such that the intensity of wind pressure at 30 m height is 120 kN/m^2 . Assume any missing data as per Indian Standards. **20**
- Q.6** a) Sketch the elevation of different transmission line towers. **10**
 b) Explain the procedure for designing transmission line towers. **10**
- Q.7** a) Explain the different types of machine foundation. **08**
 b) Explain the design procedure of turbo generator foundation. **12**

Fourth Y. (B. Tech) (Sem-II) (New) (CBCS) Examination: March/April-2024
CIVIL ENGINEERING
Industrial Structures (BTN01804)

Day & Date: Saturday, 11-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 100

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No.3 (starting page of the Answer Book).
 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 3) Figures to the right indicates full marks.
 4) Assume suitable data wherever needed and mention it clearly.
 5) Use of IS 800-2007 and IS 875 are allowed, but not allowed for MCQ (Q. No.1)
 6) Use of scientific non programmable calculator is allowed.
 7) Draw the appropriate sketches wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 20

Q.1 Choose the correct alternatives from the options.

- 1) The shape factor in plastic method of analysis depends upon _____. **01**
 - a) Yield stress of the material
 - b) Hinge length
 - c) Geometry of the section
 - d) Redistribution of moments
- 2) Which of the following is a compression member? **01**
 - a) Purlin
 - b) Boom
 - c) Girt
 - d) Tie
- 3) As per IS 800 purlins are designed as a _____. **01**
 - a) Simply supported beams
 - b) Cantilever beams
 - c) Continuous beams
 - d) Compression member
- 4) Sag rod are designed as _____. **01**
 - a) Compression member
 - b) Tension member
 - c) Laterally supported beam
 - d) Laterally unsupported beam
- 5) The self- weight of a roof truss (N/m^2) may be obtained by _____. **01**
 - a) $(L + 5)5$
 - b) $(L/3 + 5)10$
 - c) $(L - 5)5$
 - d) $(L/3 - 5)10$
- 6) Steel is an alloy which mainly contains _____. **01**
 - a) iron and silica
 - b) iron and sulfur
 - c) iron and carbon
 - d) iron and sodium
- 7) What is the value of constant 'k' to calculate throat thickness in fillet weld if the angle between fusion faces is 110° ? **01**
 - a) 0.6
 - b) 0.65
 - c) 0.55
 - d) 0.75

Ground improvement Techniques (BTN01806)

Day & Date: Saturday, 11-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 100

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 20

Q.1 Choose the correct alternatives from the given options. 20

- 1) The objective(s) of grouting is/are:
 - a) Densification to prevent or arrest settlement and mitigate liquefaction
 - b) Soil solidification to increase cohesion of granular soil
 - c) Reduction of permeability and water control
 - d) All of the above
- 2) Grouting pressure is generally limited (in kPa) up to _____.
 - a) 1.0
 - b) 5.0
 - c) 20
 - d) 50
- 3) The correct assumption for theory of grouting is _____.
 - a) The ground is anisotropic
 - b) The grout is Newtonian fluid
 - c) Grout is injected from the top of pipe
 - d) All of the above
- 4) The aim of soil stabilization is to increase the _____.
 - a) Seepage
 - b) Bearing capacity
 - c) Shear strength
 - d) Both b) and c)
- 5) Cement stabilization is generally used for stabilizing _____.
 - a) Sand
 - b) Gravel
 - c) Clay
 - d) All of these
- 6) The strength of soil lime stabilization depends on _____ content of the soil type.
 - a) Water
 - b) Pozzolana
 - c) Clay
 - d) Organic
- 7) Increase in lime content results in _____.
 - a) Increase in liquid limit
 - b) Decrease in plasticity index
 - c) No change in plasticity index
 - d) None of the above

- 8) The favorable geomaterials for soil nailing installation is/are _____.
a) stiff to hard fine grained soil
b) very soft fine-grained soils
c) poorly graded cohesionless soils
d) All of the above
- 9) Which of the following is/are function(s) of geosynthetics?
a) Reinforcement
b) Filtration
c) Erosion Control
d) All of these
- 10) Advantage(s) of mechanically stabilized earth wall is/are _____.
a) Relatively easy to build
b) Require high-quality backfill materials
c) Poor drainage
d) All of these
- 11) Limitation(s) of mechanically stabilized earth wall is/are _____.
a) Relatively easy to build
b) Require high-quality backfill materials
c) Cost effective
d) All of these
- 12) The analysis of a Geosynthetic-reinforced earth wall is mainly based on _____.
a) Earth pressure at rest
b) Passive earth pressure theory
c) Active earth pressure theory
d) None of the above
- 13) For vibro-compaction, performance criteria for geometrical, $D_r \geq 60\%$ should be considered at:
a) Floor slabs
b) Column footing
c) Mat foundation
d) budge foundation
- 14) Ground heave occur in soil because of _____.
a) Water
b) Expansive soil
c) Froze soil
d) all of the above
- 15) The removal of excess water from saturated soil mass called _____.
a) Compaction
b) Saturation
c) Drainage and Dewatering
d) All of the above
- 16) The performance of compaction equipment depends upon _____.
a) Soil type
b) Water type
c) Particle size Distribution
d) All of the above
- 17) Deep dynamic compaction is generally not recommended for _____.
a) Loose and partially saturated fills
b) Silts with plasticity index less than 8
c) Clayey soil with high degree of saturation
d) None of the above
- 18) The analysis of a Geosynthetic-reinforced earth wall is mainly based on _____.
a) Earth pressure at rest
b) Passive earth pressure theory
c) Active earth pressure theory
d) None of the above

- 19)** Stone columns are widely used to _____.
a) Increase bearing capacity and stability
b) Reduce settlement and liquefaction potential.
c) Accelerate consolidation
d) All of the above
- 20)** Design parameter for Rapid Impact compaction are:
a) Depth of improvement
b) Geomaterial type
c) Distance to the existing structures
d) All of the above

Ground improvement Techniques (BTN01806)

Day & Date: Saturday, 11-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 80

- Instructions:** 1) Solve any two questions from section - I.
2) Solve any two questions from section - II.
3) Figures to the right indicate full marks.
4) Assume suitable assumption, if required and state them clearly.

Section – I

- | | | |
|------------|---------------------------------------------------------------------------------------------------------------------------------------|-----------|
| Q.2 | a) Discuss the necessity of ground improvement technique and explain the role of ground improvement in foundation engineering. | 10 |
| | b) Write a note on ground modification option in dealing with difficult soil. | 10 |
| Q.3 | a) Write a detailed note on various equipment for compaction and their suitability for different soils. | 10 |
| | b) Explain vibro flotation and its importance in improving soil properties. | 10 |
| Q.4 | a) Explain purpose of dewatering during construction stage and post construction stage. | 10 |
| | b) What are the advantages and limitations of vacuum dewatering system. | 10 |

Section – II

- | | | |
|------------|----------------------------------------------------------------------------------------|-----------|
| Q.5 | a) Write a detailed note on heat treatment of soils. | 10 |
| | b) Explain the concept of soil nailing. | 10 |
| Q.6 | a) Explain types of admixtures used for lime stabilization. | 10 |
| | b) Explain cement stabilization in improving soil properties. | 10 |
| Q.7 | a) Explain open web girders and composite girders with neat sketches. | 10 |
| | b) What are the advantages and limitations of reinforced earth retaining walls. | 10 |

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 20

Q.1 Choose the correct alternatives from the given options. 20

- 1) The strength of soil lime stabilization depends on _____ content of the soil type.

a) Water	b) Pozzolana
c) Clay	d) Organic
- 2) Increase in lime content results in _____.

a) Increase in liquid limit	b) Decrease in plasticity index
c) No change in plasticity index	d) None of the above
- 3) The favorable geomaterials for soil nailing installation is/are _____.
 - a) stiff to hard fine grained soil
 - b) very soft fine-grained soils
 - c) poorly graded cohesionless soils
 - d) All of the above
- 4) Which of the following is/are function(s) of geosynthetics?

a) Reinforcement	b) Filtration
c) Erosion Control	d) All of these
- 5) Advantage(s) of mechanically stabilized earth wall is/are _____.
 - a) Relatively easy to build
 - b) Require high-quality backfill materials
 - c) Poor drainage
 - d) All of these
- 6) Limitation(s) of mechanically stabilized earth all is/are _____.
 - a) Relatively easy to build
 - b) Require high-quality backfill materials
 - c) Cost effective
 - d) All of these

- 7) The analysis of a Geosynthetic-reinforced earth wall is mainly based on _____.
a) Earth pressure at rest
b) Passive earth pressure theory
c) Active earth pressure theory
d) None of the above
- 8) For vibro-compaction, performance criteria for geometrical, $D_r \geq 60\%$ should be considered at:
a) Floor slabs
b) Column footing

CIVIL ENGINEERING**

Ground improvement Techniques (BTN01806)

Day & Date: Saturday, 11-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 80

- Instructions:** 1) Solve any two questions from section - I.
2) Solve any two questions from section - II.
3) Figures to the right indicate full marks.
4) Assume suitable assumption, if required and state them clearly.

Section – I

- Q.2** a) Discuss the necessity of ground improvement technique and explain the role of ground improvement in foundation engineering. **10**
b) Write a note on ground modification option in dealing with difficult soil. **10**
- Q.3** a) Write a detailed note on various equipment for compaction and their suitability for different soils. **10**
b) Explain vibro flotation and its importance in improving soil properties. **10**
- Q.4** a) Explain purpose of dewatering during construction stage and post construction stage. **10**
b) What are the advantages and limitations of vacuum dewatering system. **10**

Section – II

- Q.5** a) Write a detailed note on heat treatment of soils. **10**
b) Explain the concept of soil nailing. **10**
- Q.6** a) Explain types of admixtures used for lime stabilization. **10**
b) Explain cement stabilization in improving soil properties. **10**
- Q.7** a) Explain open web girders and composite girders with neat sketches. **10**
b) What are the advantages and limitations of reinforced earth retaining walls. **10**

Cost Management of Engineering Projects (BTN01807)

Day & Date: Saturday, 11-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 100

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book page no. 03 (Starting page of the Answer Book).
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Assume suitable data wherever needed & mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 20

Q.1 Choose the correct alternatives from the options.

20

- 1) Which of the following tool is used when there is uncertainty in activity duration?

a) PERT	b) milestone chart
c) CPM	d) bar chart

- 2) Please read the following statements:
 - i) Critical path has no float and it determines the project completion period.
 - ii) Critical path is the comparatively longest path
 Which of the above statements is/are wrong?

a) Neither i not ii	b) i
c) ii	d) both i & ii

- 3) PERT is a Project Management tool for managing _____.

a) Time	b) Cost
c) Quality	d) Resources

- 4) Which of the following is not a characteristic of a project?

a) Unique	b) Heterogeneous
c) Infinite duration	d) Non-repetitive

- 5) The early finish time of an activity is always _____.
 - a) Greater than earliest start time of succeeding activity
 - b) less than earliest start time of succeeding activity
 - c) Less than or equal to earliest start time of the succeeding activity
 - d) greater than or equal to earliest start time of the succeeding activity

- 6) _____ is the maximum delay possible for an activity if succeeding activity starts as early as possible and preceding activity ends as late as possible.

a) interfering float	b) total float
c) independent float	d) free float

- 7) In PERT calculation, if factor Z comes negative then Probability of completion of project in scheduled time is always _____.

a) 100%	b) 50%
c) less than 50%	d) greater than 50%

- 8) Hungarian method is suitable for _____.
 a) Graphical Problem b) Transportation Model
 c) Simplex Problem d) Assignment Model
- 9) Odd man out.
 a) Cost of Fuel b) Depreciation Cost
 c) Repair & Maintenance Cost d) Operator salary
- 10) _____ means one employee getting orders and instructions from one supervisor.
 a) Order b) Remuneration
 c) Discipline d) Unity of command
- 11) _____ problem is a special problem of LPP.
 a) Queuing b) Transportation
 c) Simulation d) Decision Tree
- 12) Choose the correct condition for crashing
 (If CC= crash cost, NC= normal cost, CD= crash duration, ND= normal duration)
 a) $CC < NC, CD < ND$ b) $CC < NC, CD > ND$
 c) $CC > NC, CD > ND$ d) $CC > NC, CD < ND$
- 13) An _____ is a set of processes and procedures that transform data into information and knowledge.
 a) Information system b) Knowledge system
 c) Database system d) Computer system
- 14) _____ is a standard that companies compare themselves to and strive to be that good.
 a) Production b) Benchmarking
 c) Structuring d) Formatting
- 15) Basically, _____ is raw material that is to be processed, while _____ is the processed data.
 a) information, data b) data, information
 c) format, detailing d) goods, services
- 16) Moderate inventory control is sufficient for _____.
 a) A class items b) B class items
 c) C Class items d) All of these
- 17) _____ models to analysis a problem and provides possible solution for management evaluation.
 a) Decision b) Standard
 c) Structural d) Periodic
- 18) The person who ensures that systems are developed on time, within budget, and with acceptable quality is a _____.
 a) systems designer b) project manager
 c) systems owner d) systems builder
- 19) Total quality costs include: _____.
 a) Prevention costs b) Appraisal costs
 c) Failure costs d) All of the given options
- 20) Dual of the Dual is _____.
 a) Primal b) Dual
 c) Zero d) Infinity

Cost Management of Engineering Projects (BTN01807)

Day & Date: Saturday, 11-05-2024

Max. Marks: 80

Time: 03:00 PM To 06:00 PM

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any FOUR from the following.

40

- a) 1) Draw the Bar Chart for the project with following data and find the project duration.

Activity	A	B	C	D	E	F	G	H	I	J	K
Preceding Activities	-	-	A	B	C	D	E & F	G	H	H	I & J
Duration (Days)	6	2	3	2	4	1	1	6	3	1	1

- 2) Distinguish Bar chart and Mile stone chart.
- b) What are different costs incurred in Project? What are the basic phases of a project and their purposes ?
- c) Explain about Strategic Cost Management Process.
- d) What are the of databases? explain about Distributed Database and Operational Database with figure.
- e) What is Cost Management in Project management? Also explain Cost concepts in decision making.
- f) List Reasons for Project Failure and how to avert disaster, and state cost control techniques.
- g) Elaborate the following, and duties of the same,
1) Project Manager.
2) Project Team Member.
3) Project Sponsor.

Section – II

Q.3 Attempt any FOUR from the following.

40

- a) What is 'Break Even Analysis'? Explain with analytical and graphical approach. Also attach Cost-Volume-Profit analysis approach.
- b) Draw network, find out CP & PD. Calculate All floats of each non-critical Activity.

Activity	A	B	C	D	E	F	G	H	I	J
Immediate Predecessor	-	-	A	A	B, C	B, C	E	E	D, G	F, H, I
Time in Weeks	15	15	3	5	8	12	1	14	3	14

- c) Find the probability of completing the project 3 weeks earlier than expected project duration.

Activity	Estimated Time		
	to	tm	tp
1-2	3	6	15
1-6	2	5	14
2-3	6	12	30
2-4	2	5	8
3-5	5	11	17
4-5	3	6	15
6-7	3	9	27
5-8	1	4	7
7-8	4	19	28

Probability Factor	Probability
0	50%
1	84.13%
2	97.72%
3	99.87%

- d) Explain “Assignment Model’ & ‘Transportation Model’ as a special case of LPP with its assumption, Applications in Operation Research.
- e) What are the direct expenses and selling over heads in project costing? Elaborate each.
- f) Explain ERP with its characteristics, Application, and benefits in business execution.
- g) How SIMULATION is versatile tool in Quantitative techniques? Explain its Advantages, Limitations and use in different sector.

Disaster Management (BTN01808)

Day & Date: Saturday, 11-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 100

- Instructions:**
- 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book page no. 03 (Starting page of the Answer Book).
 - 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 - 3) Figures to the right indicate full marks.
 - 4) Assume suitable data wherever needed & mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 20

Q.1 Choose the correct alternatives from the options. 20

- 1) The destructive powers of tsunami result mainly from their _____.
 - a) Incredible height
 - b) Unpredictability
 - c) Cold water
 - d) Momentum and long wavelength
- 2) Which event produces the biggest tsunami?
 - a) Earthquake
 - b) Under water landslides
 - c) Hurricanes
 - d) Impacts of asteroids and comets
- 3) As the magnitude of natural disasters increases their frequency of occurrence _____.

a) Increases	b) Decreases
c) Remains the same	d) Unpredictable
- 4) The largest wave during a tsunami event is _____.
 - a) The first
 - b) The third
 - c) Unpredictable, it could be any of them
 - d) The fifth
- 5) Landslides occurs due to _____.
 - a) Intensity of rainfall
 - b) Steep slopes
 - c) Deforestation leading it soil erosion
 - d) All of the above
- 6) The National Institute of Disaster Management (NIDM) is at _____.

a) New Delhi	b) Mumbai
c) Chennai	d) Kolkata

- 7) The nodal department for wind detection IMD refers to _____.
a) Indian Meteorological Department
b) Indian Metrological Department
c) Indian Metallurgical Department
d) None of these
- 8) The first step in preparedness planning is _____.
a) Analysis of data collected
b) Determination of objectives
c) Development of implementing device
d) Determination of strategy
- 9) The eye of a cyclone is _____.
a) Cloudy and highly stormy
b) Full of strong winds
c) Calm and cloudless
d) Site with high atmospheric pressure
- 10) What does the acronym ISDR stands for?
a) International Significant Disaster Resource
b) International Sustainable Development Report
c) International Strategy for Disaster Reduction
d) National Strategy for Developing Recreation
- 11) A flash flood is a flood that _____.
a) Is caused by heavy rain
b) Occurs suddenly & unexpectedly and for short duration
c) Occurs in urban areas
d) Is caused by blocking of drains
- 12) The change in elevation of a stream per unit length is called _____.
a) Base level
b) Gradient
c) Velocity
d) Discharge
- 13) Tsunami is classified as _____.
a) Water hazard
b) Environmental Hazard
c) Biological hazard
d) Geological hazard
- 14) Flash floods are often caused _____.
a) By thunderstorms
b) By dikes & dams that are too high
c) By rainfall over many days
d) By river beds that are too high
- 15) What is speed of tsunami waves?
a) 40 m/hr
b) 100 km/hr
c) 9000 km/hr
d) 800 km/hr
- 16) Channelization of streams is designed to reduce flooding by _____.
a) Speeding the passage of flood waters
b) Reducing bank erosion
c) Slowing down river velocity so as to reduce damage
d) Increase the meandering of streams
- 17) These include actions taken to return to normal once an emergency occurs _____.
a) Mitigation
b) Preparedness
c) Response
d) Recovery

- 18)** Dams are designed to reduce flooding by _____.
- a) Protecting river banks from erosion
 - b) Providing storage for flood water
 - c) Increasing the d/s velocity of flood water
 - d) Trapping sediment behind the dam
- 19)** The point at which a fault first ruptures in the earth is called the _____.
- a) Hypocenter
 - b) Hypicenter
 - c) Epicenter
 - d) Hypercenter
- 20)** Following safety standards in selecting building materials is an example of this type of activity.
- a) Mitigation
 - b) Preparedness
 - c) Response
 - d) Recovery

Seat No.	
-----------------	--

Fourth. Y. (B.Tech.) (Sem-II) (New) (CBCS) Examination: March/April-2024
CIVIL ENGINEERING
Disaster Management (BTN01808)

Day & Date: Saturday, 11-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 80

- Instructions:** 1) Question no. 2 is compulsory in section I, and solve any two questions from the remaining.
2) Question no. 6 is compulsory in section II, and solve any two questions from the remaining.
3) Figures to the right indicate full marks.
4) Assume suitable data wherever needed and mention it clearly.

Section – I

- Q.2** a) Explain environmental disaster risk reduction using ecosystem approach. **09**
b) Explain the concept of environmental hazard. State environmental stress. **05**
- Q.3** a) Explain the Earthquake. State its hazardous effects. **08**
b) Explain the causes of landslides. **05**
- Q.4** a) Describe the causes of Cyclones. **08**
b) Explain about one of the recent earthquakes in India. **05**
- Q.5** a) Explain conservation measures of soil erosion. **08**
b) Describe the term population explosion. **05**

Section – II

- Q.6** a) Define disaster management cycle. Briefly explain its various phases. **09**
b) Discuss the immediate relief measures to be taken for disaster victims. **05**
- Q.7** a) Explain the role of seismological observatory in disaster mitigation. **08**
b) Explain the role of GIS and GPS in disaster mitigation. **05**
- Q.8** a) Elaborate the role of Panchayats in Disaster mitigation. **05**
b) Discuss the Disaster Management Act- 2005. **08**
- Q.9** a) Discuss the details for disaster of hills in India. **08**
b) Describe the National Institute of Disaster Management. **05**

- 19)** The largest wave during a tsunami event is _____.
- a) The first
 - b) The third
 - c) Unpredictable, it could be any of them
 - d) The fifth
- 20)** Landslides occurs due to _____.
- a) Intensity of rainfall
 - b) Steep slopes
 - c) Deforestation leading it soil erosion
 - d) All of the above

Seat No.

Fourth. Y. (B.Tech.) (Sem-II) (New) (CBCS) Examination: March/April-2024
CIVIL ENGINEERING
Disaster Management (BTN01808)

Day & Date: Saturday, 11-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 100

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book page no. 03 (Starting page of the Answer Book).
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicate full marks.
 4) Assume suitable data wherever needed & mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 20

Q.1 Choose the correct alternatives from the options.

20

- 1) A flash flood is a flood that _____.
 - a) Is caused by heavy rain
 - b) Occurs suddenly & unexpectedly and for short duration
 - c) Occurs in urban areas
 - d) Is caused by blocking of drains
- 2) The change in elevation of a stream per unit length is called _____.
 - a) Base level
 - b) Gradient
 - c) Velocity
 - d) Discharge
- 3) Tsunami is classified as _____.
 - a) Water hazard
 - b) Environmental Hazard
 - c) Biological hazard
 - d) Geological hazard
- 4) Flash floods are often caused _____.
 - a) By thunderstorms
 - b) By dikes & dams that are too high
 - c) By rainfall over many days
 - d) By river beds that are too high
- 5) What is speed of tsunami waves?
 - a) 40 m/hr
 - b) 100 km/hr
 - c) 9000 km/hr
 - d) 800 km/hr
- 6) Channelization of streams is designed to reduce flooding by _____.
 - a) Speeding the passage of flood waters
 - b) Reducing bank erosion
 - c) Slowing down river velocity so as to reduce damage
 - d) Increase the meandering of streams
- 7) These include actions taken to return to normal once an emergency occurs _____.
 - a) Mitigation
 - b) Preparedness
 - c) Response
 - d) Recovery

- 8) Dams are designed to reduce flooding by _____.
a) Protecting river banks from erosion
b) Providing storage for flood water
c) Increasing the d/s velocity of flood water
d) Trapping sediment behind the dam
- 9) The point at which a fault first ruptures in the earth is called the _____.
a) Hypocenter
b) Hypicenter
c) Epicenter
d) Hypercenter
- 10) Following safety standards in selecting building materials is an example of this type of activity.
a) Mitigation
b) Preparedness
c) Response
d) Recovery
- 11) The destructive powers of tsunami result mainly from their _____.
a) Incredible height
b) Unpredictability
c) Cold water
d) Momentum and long wavelength
- 12) Which event produces the biggest tsunami?
a) Earthquake
b) Under water landslides
c) Hurricanes
d) Impacts of asteroids and comets
- 13) As the magnitude of natural disasters increases their frequency of occurrence _____.
a) Increases
b) Decreases
c) Remains the same
d) Unpredictable
- 14) The largest wave during a tsunami event is _____.
a) The first
b) The third
c) Unpredictable, it could be any of them
d) The fifth
- 15) Landslides occurs due to _____.
a) Intensity of rainfall
b) Steep slopes
c) Deforestation leading it soil erosion
d) All of the above
- 16) The National Institute of Disaster Management (NIDM) is at _____.
a) New Delhi
b) Mumbai
c) Chennai
d) Kolkata
- 17) The nodal department for wind detection IMD refers to _____.
a) Indian Meteorological Department
b) Indian Metrological Department
c) Indian Metallurgical Department
d) None of these

- 18)** The first step in preparedness planning is _____.
- a) Analysis of data collected
 - b) Determination of objectives
 - c) Development of implementing device
 - d) Determination of strategy
- 19)** The eye of a cyclone is _____.
- a) Cloudy and highly stormy
 - b) Full of strong winds
 - c) Calm and cloudless
 - d) Site with high atmospheric pressure
- 20)** What does the acronym ISDR stands for?
- a) International Significant Disaster Resource
 - b) International Sustainable Development Report
 - c) International Strategy for Disaster Reduction
 - d) National Strategy for Developing Recreation

Water and Air Quality Modelling (BTN01809)

Day & Date: Saturday, 11-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 100

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:20

Q.1 Choose the correct alternatives from the given options. 20

- 1) _____ are used to make predictions and conclusions based on how two random variables are connected.

a) Casual Models	b) Simple Models
c) Statistical models	d) Stochastic Models

- 2) _____ is an application of conservation of mass to the analysis of physical system.

a) Mass balance	b) Rate Constants
c) Conservation of mass	d) Law of mass action

- 3) Ground water models are used to predict the effect of hydrological changes on the behavior of _____.

a) Soil water zone	b) Aquifer
c) Capillary zone	d) Intermediate zone

- 4) Water quality model is a mathematical representation of _____ from land-based sources to a water body.

a) Inorganic Pollutants	b) Contamination of pollutants
c) Movement of pollutant	d) Volatile compounds

- 5) _____ is a biological process in which certain bacteria are capable of converting atmospheric nitrogen to ammonia.

a) Denitrification	b) Ammonification
c) Nitrogen fixation	d) Assimilation

- 6) _____ equation is used as water quality model to describe decrease of DO content in a river along a certain distance by degradation of BOD.

a) Delphi method	b) Streeter Phelps
c) Le Chatelier's	d) Darcy

- 7) _____ refers to a disposal pattern of gaseous pollutants in atmosphere depending upon wind condition, atmospheric stability and vertical temperature gradient.

a) Plume behavior	b) Dispersion
c) Air Emission	d) Lapse rate

- 20)** The monitoring and evaluation of ambient air quality is first important steps in _____ air pollution.
- | | |
|------------------|----------------|
| a) Rapid mixing | b) Refraction |
| c) Agglomeration | d) Controlling |

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:20

Q.1 Choose the correct alternatives from the given options. 20

- 1) _____ is typically used for predicting pollutant levels under "worst scenarios".
 - a) Long term modeling
 - b) Short term modeling
 - c) Intermediate modeling
 - d) Sub standard modeling
- 2) _____ take the pollutant concentration to distribute in both horizontal and vertical aspects.
 - a) Atmospheric model
 - b) Transport model
 - c) Gaussian model
 - d) Diffusion model
- 3) The suitability of water sources for human consumption is described in terms of _____.
 - a) Non reactive index
 - b) Extreme value index
 - c) Water quality index
 - d) Water control index
- 4) WQI concept is based on the factor _____.
 - a) Parameter selection for measurement
 - b) Transformation and raw data parameter
 - c) Aggregation of sub index values
 - d) All of above
- 5) _____ is generally used to summarize specific expert opinions to develop parameter weight for different water quality index.
 - a) Streeter Phelps method
 - b) Le Chatelier's method
 - c) Newton method
 - d) Delphi method
- 6) _____ is used to integrate the opinion of water expert on sub index value.
 - a) Delphi method
 - b) Newton method
 - c) Streeter Phelps method
 - d) Henry's method
- 7) The behavior and dispersion of plume entirely depends on _____.
 - a) Adiabatic Lapse Rate
 - b) Environmental Lapse Rate
 - c) Sub Adiabatic Lapse Rate
 - d) Standard Temperature Lapse Rate

- 20) _____ use mathematical relationship to represent complex decision so that future demand can be predicted at various levels of geography.
- a) Transport model
 - b) Building model
 - c) Diffusion model
 - d) Statistical model

Set **R**

Fourth Y. (B.Tech.) (Sem-II) (New) (CBCS) Examination: March/April-2024
CIVIL ENGINEERING
Water and Air Quality Modelling (BTN01809)

Day & Date: Saturday, 11-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 80

- Instructions:** 1) Question no. 2 is compulsory in section I, and solve any two questions from the remaining.
 2) Question no. 6 is compulsory in section II, and solve any two questions from the remaining.
 3) Figures to the right indicate full marks.
 4) Assume suitable data wherever needed and mention it clearly.
 5) Use of non-programmable calculator is allowed.

Section – I

- | | | | |
|------------|-----------|-----------------------------------------------------------|-----------|
| Q.2 | a) | Explain the importance of Casual Model. | 07 |
| | b) | Explain 5 major air pollutants and their health effects. | 07 |
| Q.3 | a) | Explain the purpose of water quality model. | 07 |
| | b) | What factors affect the intensity of Oxygen sag curve? | 06 |
| Q.4 | a) | What are limitations of ground water model? | 07 |
| | b) | How can meteorology help in controlling air pollutants? | 06 |
| Q.5 | a) | Explain with neat sketch how Oxygen Sag Curve is created. | 07 |
| | b) | Write Short Notes on: | 06 |
| | | i) Methods of Calibration | |
| | | ii) Mechanism of pollutant transport | |

Section – II

- | | | | |
|------------|-----------|--------------------------------------------------------------------------------------|-----------|
| Q.6 | a) | Explain the features of Gaussian Plume Model. | 07 |
| | b) | Explain the merits of Water Quality Index. | 07 |
| Q.7 | a) | Explain Fixed box model with respect to wind blowing parallel to longer direction X. | 07 |
| | b) | Explain the advantages of Delphi model. | 06 |
| Q.8 | a) | What are the modern techniques for controlling environmental pollution? | 07 |
| | b) | What are the six categories of National Air Quality Index? | 06 |
| Q.9 | a) | Explain theory of diffusion model and how it is useful in decision making. | 07 |
| | b) | Write Short Notes on: | 06 |
| | | i) Air Quality Index | |
| | | ii) Ambient Water Quality | |

Seat No.

**Fourth Y. (B.Tech.) (Sem-II) (New) (CBCS) Examination: March/April-2024
CIVIL ENGINEERING**

Water and Air Quality Modelling (BTN01809)

Day & Date: Saturday, 11-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 100

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:20

Q.1 Choose the correct alternatives from the given options. 20

- 1) _____ is used to integrate the opinion of water expert on sub index value.

a) Delphi method	b) Newton method
c) Streeter Phelps method	d) Henry's method
- 2) The behavior and dispersion of plume entirely depends on _____.

a) Adiabatic Lapse Rate	b) Environmental Lapse Rate
c) Sub Adiabatic Lapse Rate	d) Standard Temperature Lapse Rate
- 3) In a Gaussian model emissions and meteorological condition remains _____.

a) Unstable	b) Extremely stable
c) Constant	d) turbulence
- 4) Water quality index is one of the most used tools to describe _____.

a) Water quality	b) Salinity
c) Physical characteristics	d) BOD level
- 5) The monitoring and evaluation of ambient air quality is first important steps in _____ air pollution.

a) Rapid mixing	b) Refraction
c) Agglomeration	d) Controlling
- 6) _____ are used to make predictions and conclusions based on how two random variables are connected.

a) Casual Models	b) Simple Models
c) Statistical models	d) Stochastic Models
- 7) _____ is an application of conservation of mass to the analysis of physical system.

a) Mass balance	b) Rate Constants
c) Conservation of mass	d) Law of mass action
- 8) Ground water models are used to predict the effect of hydrological changes on the behavior of _____.

a) Soil water zone	b) Aquifer
c) Capillary zone	d) Intermediate zone

- 9) Water quality model is a mathematical representation of _____ from land-based sources to a water body.
- a) Inorganic Pollutants b) Contamination of pollutants
c) Movement of pollutant d) Volatile compounds
- 10) _____ is a biological process in which certain bacteria are capable of converting atmospheric nitrogen to ammonia.
- a) Denitrification b) Ammonification
c) Nitrogen fixation d) Assimilation
- 11) _____ equation is used as water quality model to describe decrease of DO content in a river along a certain distance by degradation of BOD.
- a) Delphi method b) Streeter Phelps
c) Le Chatelier's d) Darcy
- 12) _____ refers to a disposal pattern of gaseous pollutants in atmosphere depending upon wind condition, atmospheric stability and vertical temperature gradient.
- a) Plume behavior b) Dispersion
c) Air Emission d) Lapse rate
- 13) _____ are used to forecast the increase in algal growth and to predict the effect of some management decision.
- a) Water model b) Transition model
c) Lake model d) DO sag curve
- 14) _____ is a difference in wind speed or direction over short distance in Atmosphere.
- a) Atmospheric stability b) Temperature gradient
c) Wind shear d) Solar radiation
- 15) _____ use mathematical relationship to represent complex decision so that future demand can be predicted at various levels of geography.
- a) Transport model b) Building model
c) Diffusion model d) Statistical model
- 16) _____ is typically used for predicting pollutant levels under "worst scenarios".
- a) Long term modeling b) Short term modeling
c) Intermediate modeling d) Sub standard modeling
- 17) _____ take the pollutant concentration to distribute in both horizontal and vertical aspects.
- a) Atmospheric model b) Transport model
c) Gaussian model d) Diffusion model
- 18) The suitability of water sources for human consumption is described in terms of _____.
- a) Non reactive index b) Extreme value index
c) Water quality index d) Water control index
- 19) WQI concept is based on the factor _____.
- a) Parameter selection for measurement
b) Transformation and raw data parameter
c) Aggregation of sub index values
d) All of above

- 20)** _____ is generally used to summarize specific expert opinions to develop parameter weight for different water quality index.
- a) Streeter Phelps method
 - b) Le Chatelier's method
 - c) Newton method
 - d) Delphi method

Concrete composites (BTN01810)

Day & Date: Monday, 13-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 100

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.
 4) Assume suitable data if required and state it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 20

Q.1 Choose the correct alternatives from the options. 20

- 1) Which of the following is NOT a physical property of silica fume?

a) Fine particle size	b) High specific surface area
c) Porous structure	d) Low density
- 2) What mechanical property of silica fume concrete is typically improved compared to conventional concrete?

a) Tensile strength	b) Compressive strength
c) Flexural strength	d) Shear strength
- 3) Which of the following is NOT a constituent material in Fiber Reinforced Concrete?

a) Cement	b) Water
c) Aggregate	d) Wood
- 4) The purpose of adding fibers to concrete is to: _____.

a) Increase compressive strength	b) Increase tensile strength
c) Increase flexural strength	d) All of the above
- 5) Behavior of Fiber Reinforced Concrete under compression is: _____.

a) Brittle	b) Ductile
c) Same as conventional concrete	d) Unpredictable
- 6) What is ferrocement primarily composed of?

a) Cement and sand	b) Cement and steel
c) Concrete and steel	d) Concrete and sand
- 7) What is silica fume?

a) A type of aggregate	b) A byproduct of silicon metal production
c) A type of cement	d) A chemical admixture

- 8) What is polymer concrete?
- Concrete mixed with polymer fibers
 - Concrete mixed with polymer resins
 - Concrete mixed with polymer additives
 - Concrete mixed with polymer beads
- 9) What is a key characteristic of High Strength Concrete (HSC)?
- Low compressive strength
 - High water-cement ratio
 - High compressive strength
 - Low workability
- 10) Which microstructural feature contributes significantly to the strength of High Strength Concrete?
- Large aggregate size
 - Dense matrix
 - High water content
 - Air voids
- 11) The mix proportion of Fiber Reinforced Concrete depends on: _____.
- Type of fibers used
 - Desired properties
 - Design requirements
 - All of the above
- 12) Which of the following mechanical properties is NOT typically associated with ferrocement?
- High tensile strength
 - Low elasticity
 - High compressive strength
 - High ductility
- 13) What is the main chemical component of silica fume?
- Silicon dioxide (SiO₂)
 - Calcium oxide (CaO)
 - Aluminum oxide (Al₂O₃)
 - Magnesium oxide (MgO)
- 14) In ferrocement design, what parameter is typically optimized for minimizing cracking?
- Cement content
 - Water-cement ratio
 - Aggregate size
 - Reinforcement spacing
- 15) Which of the following is a classification of polymer concrete based on the type of polymer used?
- Epoxy polymer concrete
 - Polyester polymer concrete
 - Acrylic polymer concrete
 - All of the above
- 16) Polymer concrete is commonly used in the construction of _____.
- High-rise buildings
 - Bridges and tunnels
 - Wooden structures
 - Agricultural buildings
- 17) What distinguishes High Strength Concrete from conventional concrete?
- Higher water-cement ratio
 - Lower compressive strength
 - Lower density
 - Higher compressive strength
- 18) What is the typical ratio of cement to sand used in ferrocement mixtures?
- 1:1
 - 1:2
 - 1:3
 - 1:4
- 19) Which of the following is a common method for applying the mortar layer in ferrocement construction?
- Hand painting
 - Roller application
 - Spraying
 - Stamping

- 20)** Polymer concrete exhibits _____ compared to traditional concrete.
- a) Lower shrinkage
 - b) Higher permeability
 - c) Lower tensile strength
 - d) Higher porosity

Fourth Y. (B.Tech.) (Sem-II) (New) (CBCS) Examination: March/April-2024
CIVIL ENGINEERING
Concrete composites (BTN01810)

Day & Date: Monday, 13-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 80

- Instructions:** 1) All questions are compulsory.
 2) Figures to the right indicate full marks.
 3) Assume suitable data if required and state it clearly.

Section – I

- Q.2 Solve any two. 16**
- a) Explains the behavior of fiber reinforced concrete under the compression, tension and flexure.
 - b) What is mean by Fiber Reinforced Concrete. Explain the different types of Fibers used for construction of Fiber Reinforced Concrete.
 - c) Explains the factors affecting the properties of Fiber Reinforced Concrete.
- Q.3 Solve any four. 24**
- a) Explains the mechanical properties of Ferro cement?
 - b) Explain the materials used in Ferro cement.
 - c) What are the applications of Ferrocement.
 - d) Explains the merits of Ferro cement as a structural material?
 - e) Explain the properties of freshly mixed fiber reinforced concrete.
 - f) What is workability of Concrete? Explain the methods of measurement of workability.

Section – II

- Q.4 Solve any two. 16**
- a) Explain the physical and mechanical properties of Silica Fume Concrete with respect to durability of concrete.
 - b) State the applications of Silica Fume Concrete.
 - c) Explain the reaction mechanism of Silica Fume Concrete.
- Q.5 Solve any four. 24**
- a) Write note on types of polymer concrete.
 - b) Explain properties of constituent materials of Polymer Concrete.
 - c) Explain different physical and chemical properties of Silica Fumes.
 - d) What are the applications of polymer impregnated concrete and polymer concrete?
 - e) What is high performance concrete? Explain the properties of high-performance concrete.
 - f) What are the design consideration for High performance concrete?

Fourth Y. (B.Tech.) (Sem-II) (New) (CBCS) Examination: March/April-2024
CIVIL ENGINEERING
Concrete composites (BTN01810)

Day & Date: Monday, 13-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 80

- Instructions:** 1) All questions are compulsory.
 2) Figures to the right indicate full marks.
 3) Assume suitable data if required and state it clearly.

Section – I

- Q.2 Solve any two.** **16**
- Explains the behavior of fiber reinforced concrete under the compression, tension and flexure.
 - What is mean by Fiber Reinforced Concrete. Explain the different types of Fibers used for construction of Fiber Reinforced Concrete.
 - Explains the factors affecting the properties of Fiber Reinforced Concrete.
- Q.3 Solve any four.** **24**
- Explains the mechanical properties of Ferro cement?
 - Explain the materials used in Ferro cement.
 - What are the applications of Ferrocement.
 - Explains the merits of Ferro cement as a structural material?
 - Explain the properties of freshly mixed fiber reinforced concrete.
 - What is workability of Concrete? Explain the methods of measurement of workability.

Section – II

- Q.4 Solve any two.** **16**
- Explain the physical and mechanical properties of Silica Fume Concrete with respect to durability of concrete.
 - State the applications of Silica Fume Concrete.
 - Explain the reaction mechanism of Silica Fume Concrete.
- Q.5 Solve any four.** **24**
- Write note on types of polymer concrete.
 - Explain properties of constituent materials of Polymer Concrete.
 - Explain different physical and chemical properties of Silica Fumes.
 - What are the applications of polymer impregnated concrete and polymer concrete?
 - What is high performance concrete? Explain the properties of high-performance concrete.
 - What are the design consideration for High performance concrete?

Fouth Y. (B.Tech.) (Sem-II) (New) (CBCS) Examination: March/April-2024
CIVIL ENGINEERING
Rural Roads (BTN01812)

Day & Date: Monday, 13-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 100

- Instructions:** 1) All questions are compulsory.
 2) Assume suitable data wherever needed & mention it clearly.
 3) Draw neat sketches wherever necessary.

MCQ/Objective Type Questions

Duration: 20 Minutes

Marks: 20

Q.1 Choose the correct alternatives from the options.

20

- 1) Which factor is NOT considered in the environmental impact assessment of rural road projects?

a) Soil erosion	b) Air pollution
c) Noise pollution	d) Population growth
- 2) Which agency is typically responsible for the maintenance of rural roads?

a) Municipalities	b) National highway authority
c) Rural development authority	d) Local communities
- 3) Which technique is used for strengthening the subgrade of rural roads?

a) Geotextiles	b) Compaction
c) Stabilization	d) Reinforcement
- 4) In geometric design, what does the "grade" refer to?

a) The width of the roadway	b) The slope of the roadway
c) The curvature of the roadway	d) The alignment of the roadway
- 5) Which geometric design element ensures that drivers have adequate visibility of the road ahead?

a) Sight distance	b) Super-elevation
c) Horizontal curve	d) Vertical curve
- 6) What is the primary purpose of a vertical curve in geometric design?

a) To provide a transition between different grades
b) To control the alignment of the roadway
c) To increase the super-elevation on curves
d) To accommodate pedestrian crossings
- 7) Cobblestone pavements are characterized by:

a) High maintenance requirements
b) Low initial cost
c) Smooth surface
d) Rapid construction
- 8) Which of the following materials is commonly used as a sub-base in rural road pavements?

a) Sand	b) Gravel
c) Concrete	d) Bitumen

- 9) Which type of material is suitable for stabilizing weak subgrade soils in rural road construction?
- Geotextiles
 - Fly ash
 - Lime
 - Asphalt emulsion
- 10) Which type of pavement material is commonly used in rural roads due to its availability and cost-effectiveness?
- Concrete
 - Asphalt
 - Brick
 - Gravel
- 11) What is the purpose of providing drainage in pavement design for rural roads?
- To reduce noise pollution
 - To prevent erosion
 - To enhance aesthetics
 - To improve ride comfort
- 12) Which method is commonly used for pavement thickness design in rural roads?
- American Association of State Highway and Transportation Officials (AASHTO) method
 - Mechanistic-Empirical (ME) method
 - British Standards (BS) method
 - Asphalt Institute method
- 13) Which factor is NOT considered in the AASHTO pavement design method?
- Traffic load
 - Soil bearing capacity
 - Climate conditions
 - Pavement material availability
- 14) Which layer of a typical rural road construction provides structural support and distributes traffic loads?
- Subgrade
 - Base course
 - Sub-base
 - Surface course
- 15) What is the purpose of compaction during road construction?
- To increase construction cost
 - To reduce the road's strength
 - To improve soil stability and density
 - To accelerate road degradation
- 16) Which of the following factors does NOT influence the choice of road pavement thickness in rural areas?
- Soil type
 - Traffic load
 - Roadside vegetation
 - Climate conditions
- 17) Which type of drainage is essential to prevent waterlogging and prolong the lifespan of rural roads?
- Surface drainage
 - Subsurface drainage
 - Vegetative drainage
 - Atmospheric drainage
- 18) Which of the following is a common maintenance activity for rural roads?
- Painting murals on road surfaces
 - Installing solar panels along the roadside
 - Filling potholes
 - Erecting statues along the roadside

- 19)** What is the purpose of routine maintenance of rural roads?
- a) To increase traffic congestion
 - b) To decrease road safety
 - c) To extend the lifespan of the road
 - d) To promote environmental degradation
- 20)** Which of the following materials is commonly used for road surfacing in rural areas?
- a) Glass
 - b) Rubber
 - c) Asphalt
 - d) Plastic

Fouth Y. (B.Tech.) (Sem-II) (New) (CBCS) Examination: March/April-2024
CIVIL ENGINEERING
Rural Roads (BTN01812)

Day & Date: Monday, 13-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 80

- Instructions:** 1) All questions are compulsory.
 2) Assume suitable data wherever needed & mention it clearly.
 3) Draw neat sketches wherever necessary.

Section – I

Q.2 Solve following. (Any 2)

- | | | |
|-----------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------|
| a) | Explain Recent developments on rural roads in India. | 10 |
| b) | Explain the concept of 'Network Planning in Rural Roads'. | 10 |
| c) | 4-Lane expressway having design speed of 120 kmph and radius of 250 m and passing through plain and rolling terrain. Calculate length of transition curve for the cases:- | 10 |
| | 1) Rate of change of centrifugal acceleration. | |
| | 2) Rate of change of super-elevation. | |

Q.3 Solve following. (Any 2)

- | | | |
|-----------|---------------------------------------------------------------------------------------------------------------------------------------------------|-----------|
| a) | Explain location surveys for rural roads. | 10 |
| b) | Explain Survey for marginal materials and aggregates/ low grade materials, artificial aggregates, waste materials, new materials and stabilizers. | 10 |
| c) | Explain the concept of Special Pavement in detail. | 10 |

Section – II

Q.4 Solve following. (Any 2)

- | | | |
|-----------|----------------------------------------------------------------------------------|-----------|
| a) | What are the various pavement components Design of flexible pavement as per IRC. | 10 |
| b) | Explain the design of semi-rigid pavement in detail in rural roads. | 10 |
| c) | Explain Construction of roller compacted concrete. | 10 |

Q.5 Solve following. (Any 2)

- | | | |
|-----------|------------------------------------------------------------------|-----------|
| a) | Explain Specifications and tests for quality control as per IRC. | 10 |
| b) | Explain maintenance of special pavements. | 10 |
| c) | Explain the concept of 'Rehabilitation'. | 10 |

TQM and MIS in Civil Engineering (BTN01813)

Day & Date: Monday, 13-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 100

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:20

Q.1 Choose the correct answer:

20

- 1) KAIZEN Means _____.
 - a) Quality improvement Technique
 - b) Change to become good
 - c) Achieving Quality
 - d) None
- 2) Total quality costs include: _____.

a) Prevention costs	b) Appraisal costs
c) Failure costs	d) All of the given options
- 3) MIS structure is based on _____.

a) Management Activity	b) Population
c) Both (a) and (b)	d) None
- 4) The objective of ISO-9000 family of Quality management is _____.

a) Customer satisfaction	b) Employee satisfaction
c) Skill enhancement	d) Environmental issues
- 5) Internal information for MIS may come from any one of the following departments _____.

a) Customers care department	b) HR department
c) Marketing department	d) Production department
- 6) _____ is not a process tools for TQM systems.

a) process flow analysis	b) histograms
c) Plier	d) control charts
- 7) TQM & ISO both focuses on _____.

a) Customer	b) Employee
c) Supplier	d) All of the above
- 8) ISO 9000 seeks standardization in terms of _____.

a) products	b) production procedures
c) suppliers specifications	d) procedures to manage quality

- 9) The person who ensures that systems are developed on time, within budget, and with acceptable quality is a _____.
- a) systems designer b) project manager
c) systems owner d) systems builder
- 10) Internal information for MIS may come from any one of the following department _____.
- a) Customers care department b) HR department
c) Marketing department d) Production department
- 11) An _____ is a set of processes and procedures that transform data into information and knowledge.
- a) information system b) Knowledge system
c) Database system d) Computer system
- 12) The focal point of all quality control should be: _____
- a) Price focus b) Cost Focus
c) Customer Focus d) Manufacturing Focus
- 13) A company wants to measure the length of a fan as a part of its quality control exercise. The type of data collected will be:
- a) Variable b) Attribute
c) Cannot be determined d) None of the above
- 14) _____ are used in six sigma.
- a) black belt b) green belt
c) both black belt and green belt d) None of the above
- 15) _____ is any business-related exchange such as payments to employees, sales to customers, or payments to suppliers.
- a) Data b) E-commerce
c) A transaction d) Input
- 16) In a company _____ is the centre which consists of all processing activities.
- a) Data b) Production
c) Information d) Sale
- 17) _____ models to analysis a problem and provides possible solution for management evaluation.
- a) Decision b) Standard
c) Structural d) Periodic
- 18) _____ is a standard that companies compare themselves to and strive to be that good.
- a) Production b) Benchmarking
c) Structuring d) Formatting
- 19) Meaning of 'Seiri' IN 5s technique is _____.
- a) Short b) Shine
c) Structured d) Straighten
- 20) Basically, _____ is raw material that is to be processed, while _____ is the processed data.
- a) information, data b) data, information
c) format, detailing d) goods, services

Set P

**Fourth Y. (B.Tech.) (Sem-II) (New) (CBCS) Examination: March/April-2024
CIVIL ENGINEERING**

TQM and MIS in Civil Engineering (BTN01813)

Day & Date: Monday, 13-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 80

Instructions: 1) All questions are compulsory.
2) Figure to the right indicate full marks.

Section – I

Q.2 Attempt any four questions. 40

- a) What is “Kaizen”? Explain with 7-key concepts & 5s Methodology.
- b) What are the factors affecting the poor quality and Construction?
- c) Differentiate between Quality Control and Quality Assurance.
- d) Give Measures to overcome the responsible causes for poor quality of construction.
- e) What Is Checklist? Enlist it for “Concreting”, “Formwork” & “RCC Steelwork”
- f) Explain all 8 Principles of Quality Management.

Section – II

Q.3 Attempt any four question 40

- a) Define data and information. What are the major differences between them? Explain with the help of suitable Example.
- b) What data information is required for planning of new road corridor between two megacities?
- c) Explain the use of MIS in field of construction industry.
- d) Explain Decision Support System with ‘purpose’ & ‘components’.
- e) Elaborate ‘ERP’ with benefits, limitation & ERP module with diagrammatical explanation.
- f) What is ‘Information System’? Explain with its Classification & processing.

TQM and MIS in Civil Engineering (BTN01813)

Day & Date: Monday, 13-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 100

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:20

Q.1 Choose the correct answer:

20

- 1) _____ is not a process tools for TQM systems.

a) process flow analysis	b) histograms
c) Plier	d) control charts
- 2) TQM & ISO both focuses on _____.

a) Customer	b) Employee
c) Supplier	d) All of the above
- 3) ISO 9000 seeks standardization in terms of _____.

a) products	b) production procedures
c) suppliers specifications	d) procedures to manage quality
- 4) The person who ensures that systems are developed on time, within budget, and with acceptable quality is a _____.

a) systems designer	b) project manager
c) systems owner	d) systems builder
- 5) Internal information for MIS may come from any one of the following department _____.

a) Customers care department	b) HR department
c) Marketing department	d) Production department
- 6) An _____ is a set of processes and procedures that transform data into information and knowledge.

a) information system	b) Knowledge system
c) Database system	d) Computer system
- 7) The focal point of all quality control should be: _____.

a) Price focus	b) Cost Focus
c) Customer Focus	d) Manufacturing Focus
- 8) A company wants to measure the length of a fan as a part of its quality control exercise. The type of data collected will be:

a) Variable	b) Attribute
c) Cannot be determined	d) None of the above

Planning for Sustainable Development (BTN01814)

Day & Date: Monday, 13-05-2024

Max. Marks: 100

Time: 03:00 PM To 06:00 PM

- Instructions:**
- 1) Question no. 1 is compulsory in section - I, and solve any four questions from the remaining.
 - 2) Question no. 7 is compulsory in section II, and solve any four questions from the remaining.
 - 2) Figures to the right indicate full marks.
 - 3) Assume suitable data wherever necessary and mention it clearly.

Section – I

- | | | |
|------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------|
| Q.1 | Examine how do environmental, social, and economic factors intersect within the concept of sustainable development? | 10 |
| Q.2 | Provide any five examples of sustainable development initiatives or projects in different parts of the world? | 10 |
| Q.3 | Explain how has globalization impacted the discourse on sustainability, and how have international organizations and agreements shaped sustainability goals and priorities? | 10 |
| Q.4 | What are the key principles behind sustainable development, and how do they guide the formulation of strategies for promoting sustainability? | 10 |
| Q.5 | What are the social and economic implications of biodiversity loss and ecosystem degradation, and how can we integrate conservation efforts into sustainable development strategies? | 10 |
| Q.6 | Discuss any five challenges, and any five opportunities associated with adopting renewable energy solutions, such as solar, wind, and hydroelectric power, in industries and communities? | 10 |

Section – II

- | | | |
|-------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------|
| Q.7 | Enumerate five examples of grassroots movements and community-led initiatives that have catalyzed societal change towards sustainability? | 10 |
| Q.8 | Examine how does urbanization and urban planning influence societal transformations towards sustainable living, including issues such as transportation, housing, and infrastructure? | 10 |
| Q.9 | Describe any five key concepts of institutional theory and how they apply to sustainability? | 10 |
| Q.10 | Examine how does transparency, accountability, and integrity in governance practices contribute to promoting sustainability and building trust among stakeholders? | 10 |

- Q.11** Provide any five examples of successful Indian policy initiatives that have effectively reduced environmental degradation and promoted conservation and sustainability? **10**
- Q.12** Discuss any five key components of a sustainable capacity development strategy for fostering innovation within organizations and communities? **10**

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) Maintaining prestressed concrete structures of various types in a fit and serviceable condition is primary function of _____.
a) Maintenance engineer b) Design engineer
c) Structural engineer d) Architect
- 2) Honey combing in concrete is caused due to _____.
a) Inadequate compaction b) Chemical reaction
c) Shock waves d) Lack of curing
- 3) Bacterial concrete is a _____ concrete.
a) porous b) self-healing
c) foamed d) vacuum
- 4) The pH value of fresh concrete is around _____.
a) 10 b) 9
c) 8 d) 12.5
- 5) _____ is the main reason for crack generation in concrete.
a) movement of humidity b) sleep
c) difference in temperature d) All of the above
- 6) _____ is not used in the underpinning work.
a) heating method b) frizzing method
c) pit method d) All of the above
- 7) _____ metal is used for making a foamed concrete.
a) Aluminum b) Zinc
c) a & b both d) None of the above
- 8) One of the testing equipment used for inspection of bridge structure is _____.
a) Strain Gauge b) Measuring Jar
c) Test Tubes d) None of these
- 9) _____ is the process in which we cover the structural members of a building to increase the strength of the building.
a) Jacketing b) Shoring
c) Scaffolding d) Demolition

- 10) _____ is a similar phenomenon to explosion but the pieces collapse into the center of the object instead of being expelled.
- a) Explosion
 - b) An implosion
 - c) Both a and b
 - d) None of the above
- 11) Remove a whole building or part of building in control way is known as _____.
- a) restoration
 - b) demolition
 - c) retrofitting
 - d) maintenance
- 12) _____ equipment used for starting the explosion in explosive material.
- a) Detonators
 - b) Starting cap
 - c) Current switch
 - d) None of the above
- 13) _____ factor does not affect the quantity of the explosive material.
- a) Column size
 - b) Column shape
 - c) Size of demolition
 - d) Depth of the hole
- 14) _____ involves strengthening a building structure to better withstand seismic activity such as earthquake.
- a) Seismic retrofitting
 - b) Plastering
 - c) Shuttering
 - d) Honeycombing

Repairs & Rehabilitation of Structures (197042806)

Day & Date: Thursday, 09-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any One. 10

- a) Explain bacterial concrete / self-healing concrete and vacuum concrete.
- b) Explain assessment procedures for inspection and evaluating a damaged structure.

Q.3 Solve any Two. 18

- a) Explain with sketches Shoring and Underpinning.
- b) Discuss in detail maintenance of structure.
- c) Discuss Shotcrete and Guniting as repair techniques.
- d) Explain the various causes for deterioration of concrete structures.

Section – II

Q.4 Solve any One. 10

- a) Explain in detail repairs of marine structures.
- b) Demolition techniques used for dilapidated buildings.

Q.5 Solve any Two. 18

- a) Explain techniques used in repairs for leakages in R.C. slab.
- b) Discuss in detail structural health monitoring.
- c) Explain with sketches retrofitting and jacketing method used in repairs of beams and columns.
- d) Explain with example use of sensors in structures.

- 10) Bacterial concrete is a _____ concrete.
- a) porous
 - b) self-healing
 - c) foamed
 - d) vacuum
- 11) The pH value of fresh concrete is around _____.
- a) 10
 - b) 9
 - c) 8

Max. Marks: 56

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

- Q.2 Solve any One. 10**
- a) Explain bacterial concrete / self-healing concrete and vacuum concrete.
 - b) Explain assessment procedures for inspection and evaluating a damaged structure.
- Q.3 Solve any Two. 18**
- a) Explain with sketches Shoring and Underpinning.
 - b) Discuss in detail maintenance of structure.
 - c) Discuss Shotcrete and Guniting as repair techniques.
 - d) Explain the various causes for deterioration of concrete structures.

Section – II

- Q.4 Solve any One. 10**
- a) Explain in detail repairs of marine structures.
 - b) Demolition techniques used for dilapidated buildings.
- Q.5 Solve any Two. 18**
- a) Explain techniques used in repairs for leakages in R.C. slab.
 - b) Discuss in detail structural health monitoring.
 - c) Explain with sketches retrofitting and jacketing method used in repairs of beams and columns.
 - d) Explain with example use of sensors in structures.

CIVIL ENGINEERING****Air & Noise Pollution and Control (197042813)**Day & Date: Thursday, 09-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.
2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options.**14**

- 1) Instruments used for wind speed record is _____.
a) Thermometer
b) Barometer
c) Anemometers
d) Solariometer
- 2) Which of the following statements is true about the Air Quality Index?
a) It indicates the colour of the air
b) It predicts ozone levels in your area
c) It determines the intensity of sound and sound pollution
d) It estimates air pollution mainly Sulphur content in the air
- 3) The effective height of stack is given by _____.
a) Plume height / Actual height of the stack
b) Plume height × Actual height of the stack
c) Plume height – Actual height of the stack
d) Plume height + Actual height of the stack
- 4) Bags in bag house filter are having length in the range of _____m.
a) 0.2 to 1.0
b) 20 to 100
c) 200 to 500
d) 2 to 10
- 5) Which of the following air pollution control device has maximum efficiency?
a) Electrostatic precipitator
b) Dynamic precipitator
c) Spray tower
d) Wet cyclonic scrubber
- 6) The Unit used for measuring noise pollution is _____.
a) Joule
b) Decibel
c) Newton
d) Nano Unit
- 7) In air, sound pressure can be measured using a _____, and in water with a _____.
a) microphone, hydrophone
b) hydrophone, microphone
c) Both a & b
d) None of these
- 8) _____ of following is/are secondary air pollutant.
a) CO₂
b) PAN
c) PBN
d) CO

Air & Noise Pollution and Control (197042813)

Day & Date: Thursday, 09-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) Question no. 2 is compulsory in section I, and solve any two questions from the remaining.
2) Question no. 6 is compulsory in section II, and solve any two questions from the remaining.
3) Figures to the right indicate full marks.
4) Assume suitable data wherever necessary and mention it clearly.
5) Use of non-programmable calculator is allowed.

Section – I

- Q.2** a) Explain Common Air Pollutants and its sources in a tabular form. **05**
b) Explain with neat sketch "Plume Behavior." **05**
- Q.3** a) A factory uses 1.7 million litres of fuel oil/month. The exhaust gases from factory contain the following quantities of pollutants/million litres/year. **05**
- Particulate matter = 4.7 tonnes / year
 - Sulphur dioxide = 19 tonnes / year
- Determine the safe (minimum) height of chimney required for safe dispersion of pollutants.
- b) What are the harmful effects of air pollutants on Human Health. **04**
- Q.4** a) Explain meteorological factors influencing air pollution. **05**
b) What is photochemical smog and explain the theory of formation of smog with respective to nitrogen dioxide? **04**
- Q.5 Write short notes on. (Any Three) 09**
- a) Acid Rain
 - b) London Smog
 - c) Global Warming
 - d) Effective stack height

Section – II

- Q.6** a) Explain the working and principle of the cyclone separator with neat sketch for air pollution control. **06**
b) What is the basic concept of noise pollution? **04**
- Q.7** a) Two air pollution equipment's (Gravity settling Chamber and Cyclone Separator) are connected in series. Efficiencies of Gravity settling Chamber and Cyclone Separator is 85% and 80% respectively. Determine overall efficiency of the system. **05**
b) Explain with neat sketch and working operation of Spray Tower. **04**

- Q.8** a) Explain with neat sketch Gravity settling chamber. **05**
b) Explain with neat sketch Bag house Filter. **04**
- Q.9 Write short notes on (Any Three)** **09**
- a) Types of Noise Pollution
 - b) Sources of Sound
 - c) Vehicular Pollution
 - d) Catalytic converter for air pollution control

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options.

14

- 1) _____ of following is/are secondary air pollutant.

a) CO ₂	b) PAN
c) PBN	d) CO
- 2) What is the total percentage of nitrogen gas in the air?

a) 12%	b) 21%
c) 78%	d) 87%
- 3) _____ is known as vertical temperature gradient.

a) Lapse Rate	b) Radiation inversion
c) Subsidence inversion	d) Mixing Height
- 4) Main impact of Greenhouse effect is _____.

a) Increase in vegetation	b) Decrease in vegetation
c) No effect on vegetation	d) None of these
- 5) The spread of plume is directly related to _____.

a) Atmospheric stability	b) Vertical temperature gradient
c) Moisture content	d) Plume rise and dispersion
- 6) The depth of troposphere changes constantly due to change in _____.

a) Humidity	b) Temperature
c) Moisture	d) Density of air
- 7) Which of the following is (are) responsible for ozone layer depletion?

a) Only CFC	b) Only HFC
c) CFC & HFC	d) None of these
- 8) Instruments used for wind speed record is _____.

a) Thermometer	b) Barometer
c) Anemometers	d) Solarimeter
- 9) Which of the following statements is true about the Air Quality Index?

a) It indicates the colour of the air
b) It predicts ozone levels in your area
c) It determines the intensity of sound and sound pollution
d) It estimates air pollution mainly Sulphur content in the air

- 10) The effective height of stack is given by _____.
- a) Plume height / Actual height of the stack
 - b) Plume height \times Actual height of the stack
 - c) Plume height – Actual height of the stack
 - d) Plume height + Actual height of the stack
- 11) Bags in bag house filter are having length in the range of _____m.
- a) 0.2 to 1.0
 - b) 20 to 100
 - c) 200 to 500
 - d) 2 to 10
- 12) Which of the following air pollution control device has maximum efficiency?
- a) Electrostatic precipitator
 - b) Dynamic precipitator
 - c) Spray tower
 - d) Wet cyclonic scrubber
- 13) The Unit used for measuring noise pollution is _____.
- a) Joule
 - b) Decibel
 - c) Newton
 - d) Nano Unit
- 14) In air, sound pressure can be measured using a _____, and in water with a _____.
- a) microphone, hydrophone

- a) Types of Noise Pollution
 - b) Sources of Sound
 - c) Vehicular Pollution
 - d) Catalytic converter for air pollution control

- 9) Pick up the incorrect statement from the following:
- a) Insufficient quantity of water makes the concrete mix harsh
 - b) Insufficient quantity of water makes the concrete unworkable
 - c) Excess quantity of water makes the concrete segregated
 - d) All of the above
- 10) Vicat's apparatus is used for _____.
- a) Consistency test
 - b) Fineness test
 - c) Strength test
 - d) Soundness test
- 11) If 1500 g of water is required to have a cement paste 1875 g of normal consistency, the percentage of water is _____.
- a) 15 %
 - b) 20 %
 - c) 25 %
 - d) 30 %
- 12) For given water content, workability decreases if the concrete aggregates contain an excess of _____.
- a) Flat particles
 - b) Elongated particles
 - c) Flaky particles
 - d) All of the above
- 13) Grading of Fine aggregate _____.
- a) Affects the workability
 - b) Affects the strength of concrete
 - c) Is depends on the shape & texture of the particles of the aggregates
 - d) Affects the w/c ratio
- 14) For ensuring quality of concrete, one should use _____.

 a) Flat particles b) Elongated particles
 c) Flaky particles d) All of the above
- 3) Grading of Fine aggregate _____.
 a) Affects the workability
 b) Affects the strength of concrete
 c) Is depends on the shape & texture of the particles of the aggregates
 d) Affects the w/c ratio
- 4) For ensuring quality of concrete, one should use _____.
 a) Single sized aggregates b) Well graded aggregates
 c) Coarse aggregates d) All of the above
- 5) Volume of one bag of cement is taken as _____.
 a) 35 liters b) 70 liters
 c) 35 m³ d) 70m³
- 6) Final setting time of cement is _____.
 a) Minimum 30 min b) Maximum 30 min
 c) Minimum 600 min d) Maximum 600 min
- 7) Initial setting time of cement is _____.
 a) Minimum 30 min b) Maximum 30 min
 c) Minimum 600 min d) Maximum 600 min
- 8) For determination of bending strength of concrete, the test on concrete can be done by _____.
 a) Centre point loading method and third point loading method
 b) Centre point loading method and three point loading method
 c) Midpoint loading method and third point loading method
 d) Midpoint loading method and third point loading method

Set R

**Fourth Y. (B.Tech.) (Sem - II) (Old) (CBCS) Examination: March/April-2024
CIVIL ENGINEERING**

Advanced Concrete Technology (197042821)

Day & Date: Friday, 10-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) Question no. 2 is compulsory in section I, and solve any two questions from the remaining.
2) Question no. 6 is compulsory in section II, and solve any two questions from the remaining.
3) Figures to the right indicate full marks.
4) Assume suitable data wherever needed and mention it clearly.

Section – I

- Q.2** Write in detail how the mineral admixtures are classified. **10**
- Q.3** Discuss the maturity of concrete? How is it measured? What are its uses in concrete industry? **09**
- Q.4** Explain specific differentiation between High performance concrete and High strength concrete. **09**
- Q.5** What is self compacting concrete? Explain why vibrator is not needed for self compacting concrete. **09**

Section – II

- Q.6** Explain the design considerations of roller-compacted concrete. **10**
- Q.7** How is the ready mixed concrete specified to satisfy the requirement in the fresh & hardened state? **09**
- Q.8** In mix proportioning, why is it desirable to use the minimum quantity of water. **09**
- Q.9** What are the advantages and disadvantages of revibration of concrete? **09**

Seat No.

**Fourth Y. (B.Tech.) (Sem - II) (Old) (CBCS) Examination: March/April-2024
CIVIL ENGINEERING**

Advanced Concrete Technology (197042821)

Day & Date: Friday, 10-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) Workability of concrete for given water content is good if the aggregates are _____.
 - a) Angular aggregates
 - b) Rounded aggregates
 - c) Irregular aggregates
 - d) Flaky aggregates
- 2) Finer grinding of cement results in _____.
 - a) More ultimate strength
 - b) Early development of strength
 - c) Both a and b
 - d) Does not affect the strength
- 3) Grading of aggregate _____.
 - a) Affects the workability
 - b) Affects the strength of concrete
 - c) Is depends on the shape & texture of the particles of the aggregates
 - d) All of above
- 4) Pick up the incorrect statement from the following:
 - a) Insufficient quantity of water makes the concrete mix harsh
 - b) Insufficient quantity of water makes the concrete unworkable
 - c) Excess quantity of water makes the concrete segregated
 - d) All of the above
- 5) Vicat's apparatus is used for _____.
 - a) Consistency test
 - b) Fineness test
 - c) Strength test
 - d) Soundness test
- 6) If 1500 g of water is required to have a cement paste 1875 g of normal consistency, the percentage of water is _____.
 - a) 15 %
 - b) 20 %
 - c) 25 %
 - d) 30 %
- 7) For given water content, workability decreases if the concrete aggregates contain an excess of _____.
 - a) Flat particles
 - b) Elongated particles
 - c) Flaky particles
 - d) All of the above

- 8) Grading of Fine aggregate _____.
- a) Affects the workability
 - b) Affects the strength of concrete
 - c) Is depends on the shape & texture of the particles of the aggregates
 - d) Affects the w/c ratio
- 9) For ensuring quality of concrete, one should use _____.
- a) Single sized aggregates
 - b) Well graded aggregates
 - c) Coarse aggregates
 - d) All of the above
- 10) Volume of one bag of cement is taken as _____.
- a) 35 liters
 - b) 70 liters
 - c) 35 m³
 - d) 70m³
- 11) Final setting time of cement is _____.
- a) Minimum 30 min
 - b) Maximum 30 min
 - c) Minimum 600 min
 - d) Maximum 600 min
- 12) Initial setting time of cement is _____.
- a) Minimum 30 min
 - b) Maximum 30 min
 - c) Minimum 600 min
 - d) Maximum 600 min
- 13) For determination of bending strength of concrete, the test on concrete can be done by _____.
- a) Centre point loading method and third point loading method
 - b) Centre point loading method and three point loading method
 - c) Midpoint loading method and third point loading method
 - d) Midpoint loading method and third point loading method
- 14) The chemical reaction of cement with water is called as _____.
- a) Curing
 - b) Hydration
 - c) Bleeding
 - d) Segregation

Water and Air Quality Modelling (197042823)

Day & Date: Friday, 10-05-2024

Max. Marks: 100

Time: 03:00 PM To 06:00 PM

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:20

Q.1 Choose the correct alternatives from the given options. 20

- 1) _____ are mathematical models representing relationship with an individual system.
 - a) Statistical models
 - b) Casual models
 - c) Stochastic Models
 - d) Simple Models
- 2) _____ is an application of conservation of mass to the analysis of physical system.
 - a) Mass balance
 - b) Rate Constants
 - c) Conservation of mass
 - d) Law of mass action
- 3) _____ is a movement of particles from high concentration to low concentration, resulting in equal distribution of substances.
 - a) Diffusion
 - b) Dispersion
 - c) Emission
 - d) Transportation
- 4) Water quality model is a mathematical representation of _____ from land based sources to a water body.
 - a) Inorganic Pollutants
 - b) Contamination of pollutants
 - c) Movement of pollutant
 - d) Volatile compounds
- 5) _____ are distinct part of river system; transition zone between rivers and saline habitats.
 - a) Deposition
 - b) Headwater
 - c) Erosion
 - d) Estuaries
- 6) _____ equation is used as water quality model to describe decrease of DO content in a river along a certain distance by degradation of BOD
 - a) Delphi method
 - b) Streeter Phelps
 - c) Le Chatelier's
 - d) Darcy
- 7) The atmospheric stability is related to the variation with altitude of _____.
 - a) Temperature
 - b) Pressure
 - c) Humidity
 - d) All of above
- 8) _____ are used to forecast the increase in algal growth and to predict the effect of some management decision.
 - a) Water model
 - b) Transition model
 - c) Lake model
 - d) DO sag curve

Water and Air Quality Modelling (197042823)

Day & Date: Friday, 10-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 80

- Instructions:** 1) Question no. 2 is compulsory. Solve any two questions from the remaining.
 2) Question no. 6 is compulsory. Solve any two questions from the remaining.
 3) Figures to the right indicate full marks.
 4) Assume suitable data wherever needed and mention it clearly.
 5) Use of non-programmable calculator is allowed.

Section – I

- | | | |
|------------|--------------------------------------------------------------------------------|-----------|
| Q.2 | a) Explain 4 main types of Statistical model. | 07 |
| | b) Explain 5 major air pollutants and their health effects | 07 |
| Q.3 | a) What are the elements of Streeter Phelps model? | 07 |
| | b) What factors affect the intensity of Oxygen sag curve | 06 |
| Q.4 | a) What are the meteorological factors in dispersion of air pollutants? | 07 |
| | b) How can meteorology helps in controlling air pollutants? | 06 |
| Q.5 | a) Explain with neat sketch how Oxygen Sag Curve is created | 07 |
| | b) Write Short Notes on | 06 |
| | i) Benefits of Model Making | |
| | ii) Purpose of water quality model | |

Section – II

- | | | |
|------------|------------------------------------------------------------------------------------------------|-----------|
| Q.6 | a) Explain the principle of Gaussian Plume Model and also states its limitations. | 07 |
| | b) Explain the merits of Water Quality Index. | 07 |
| Q.7 | a) Explain Fixed box model with respect to wind blowing parallel to longer direction X. | 07 |
| | b) Explain Delphi method process. | 06 |
| Q.8 | a) Explain Extreme value Theory for predicting Violations of Air Quality Standards. | 07 |
| | b) What are the six categories of National Air Quality Index? | 06 |
| Q.9 | a) Explain modern techniques for controlling environmental pollution. | 07 |
| | b) Write Short Notes on | 06 |
| | i) Fixed Box Model | |
| | ii) Ambient Water Quality | |

- 3) _____ are used to forecast the increase in algal growth and to predict the effect of some management decision.
 - a) Water model
 - b) Transition model
 - c) Lake model
 - d) DO sag curve
- 4) Mass balance ensure a consistent and accurate record of _____ material.
 - a) Decision making
 - b) Quantity and Quality
 - c) Estimating
 - d) Cost cutting
- 5) _____ use mathematical relationship to represent complex decision so that future demand can be predicted at various levels of geography.
 - a) Transport model
 - b) Building model
 - c) Diffusion model
 - d) Statistical model
- 6) Concentration such as CO and SO₂ forecast ___ due to their relative inertness
 - a) Non- reactive models
 - b) Emission Standards
 - c) Meteorology
 - d) Ambient air
- 7) _____ take the pollutant concentration to distribute in both horizontal and vertical aspects.
 - a) Atmospheric model
 - b) Transport model
 - c) Gaussian model
 - d) Diffusion model
- 8) _____ is one of the most used tools to describe water quality.
 - a) Water control index
 - b) Water quality index
 - c) Water pollution index
 - d) Extreme value index

- 9) WQI concept is based on the factor _____.
a) Parameter selection for measurement
b) Transformation and raw data parameter
c) Aggregation of sub index values
d) All of above
- 10) The density of ambient water at room temperature 20-25°C is _____.
a) 1 g/cm³
b) 0.5 g/cm³
c) 0.99 g/cm³
d) 1.98 g/cm³
- 11) _____ is used to integrate the opinion of water expert on sub index value.
a) Delphi method
b) Newton method
c) Streeter Phelps method
d) Henry's method
- 12) The object of ambient water quality programs is to ensure water quality monitoring _____.
a) Toxic Control
b) Quality assurance and quality control
c) Standard quantity
d) Pollution control
- 13) In a Gaussian model emissions and meteorological condition remains _____.
a) Unstable
b) Extremely stable
c) Constant
d) turbulence
- 14) The diffusion of pollutants by turbulence related to temperature, stratification and wind field leads to _____.
a) Stability class
b) Smog
c) Biological change in air
d) Physical change in air
- 15) The monitoring and evaluation of ambient air quality is first important steps in _____ air pollution.
a) Rapid mixing
b) Refraction
c) Agglomeration
d) Controlling
- 16) _____ are mathematical models representing relationship with an individual system.
a) Statistical models
b) Casual models
c) Stochastic Models
d) Simple Models
- 17) _____ is an application of conservation of mass to the analysis of physical system.
a) Mass balance
b) Rate Constants
c) Conservation of mass
d) Law of mass action
- 18) _____ is a movement of particles from high concentration to low concentration, resulting in equal distribution of substances.
a) Diffusion
b) Dispersion
c) Emission
d) Transportation

- | | | | |
|------------|----|----------------------------------------------------------------------|-----------|
| Q.2 | a) | Explain 4 main types of Statistical model. | 07 |
| | b) | Explain 5 major air pollutants and their health effects | 07 |
| Q.3 | a) | What are the elements of Streeter Phelps model? | 07 |
| | b) | What factors affect the intensity of Oxygen sag curve | 06 |
| Q.4 | a) | What are the meteorological factors in dispersion of air pollutants? | 07 |
| | b) | How can meteorology helps in controlling air pollutants? | 06 |
| Q.5 | a) | Explain with neat sketch how Oxygen Sag Curve is created | 07 |
| | b) | Write Short Notes on | 06 |
| | | i) Benefits of Model Making | |
| | | ii) Purpose of water quality model | |

Section – II

- | | | | |
|------------|----|--------------------------------------------------------------------------------------|-----------|
| Q.6 | a) | Explain the principle of Gaussian Plume Model and also states its limitations. | 07 |
| | b) | Explain the merits of Water Quality Index. | 07 |
| Q.7 | a) | Explain Fixed box model with respect to wind blowing parallel to longer direction X. | 07 |
| | b) | Explain Delphi method process. | 06 |
| Q.8 | a) | Explain Extreme value Theory for predicting Violations of Air Quality Standards. | 07 |
| | b) | What are the six categories of National Air Quality Index? | 06 |
| Q.9 | a) | Explain modern techniques for controlling environmental pollution. | 07 |
| | b) | Write Short Notes on | 06 |
| | | i) Fixed Box Model | |
| | | ii) Ambient Water Quality | |

Fourth Y. (B.Tech.) (Sem-II) (Old) (CBCS) Examination: March/April-2024
CIVIL ENGINEERING
Design of Bridges (197042816)

Day & Date: Friday, 10-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) Question no. 2 is compulsory in section I, and solve any two questions from the remaining.
 2) Question no. 6 is compulsory in section II, and solve any two questions from the remaining.
 3) Figures to the right indicate full marks.
 4) Assume suitable data wherever necessary and mention it clearly.

Section – I

- Q.2** Design a solid deck slab for Two Lane Bridge with following data: **10**
- a) Effective span – 6 m
 - b) Carriage way width – 7.5 m
 - c) Kerb – 600 × 275 on both side
 - d) Live load – IRC Class A Two lanes
 - e) Wearing coat – 100 mm thick
 - f) Use M-25 concrete and Fe-415 steel
 - g) Use $\alpha = 2.64$
- Q.3** **04**
- a) Write a note on investigations need to be carried out for bridge across a river.
 - b) Explain the subsoil exploration needed in the design of major bridges? **05**
Write in detail about any one technique of sub soil exploration.
- Q.4** A RCC T beam type bridge having deck slab of 200 mm thick, wearing coat of 80 mm thick, three longitudinal girders and five cross girders. Determine the design bending moment for all longitudinal girders. Use following additional data, **09**
- i) Carriage way width – 7.5 m
 - ii) Span of bridge – 14 m
 - iii) Live Load – IRC class AA Tracked
 - iv) Kerb – 600 mm wide, 400 mm deep
 - v) Web thickness for Longitudinal and cross girder – 300 mm
 - vi) Longitudinal Girder spacing – 3.5 m
 - vii) Use M-30 concrete and Fe-415 steel
- Q.5** **Answer the following.**
- a) Explain the IRC class A loading for bridges. Write about its suitability. **05**
 - b) Explain the Piguad's theory for the analysis of slab panels. What are the limitations of this theory? **04**

Section – II

- Q.6** Verify the adequacy of pier for the following data: **10**
Top width of pier - 16 m, Height of pier up to springing level - 7 m, C/C distance of bearing - 1.2m, Side batter 1:12, HFL - 1.5 m below the bearing level, Span of bridge - 8 m, carriage way width - 7.5 m, Reaction due to D.L. from each span = 2000 kN, Reaction due to L.L. from each span = 700 kN, Braking force - 140 kN, wind pressure on pier - 2.4 kN/m². Material of pier = M20 concrete. Estimate the maximum and minimum stress developed at the base of the pier due to critical combination of various loads for dry condition and Flood condition.
- Q.7** a) What is Reinforced earth retaining wall? Explain with neat sketch. **05**
b) Write a note on various stability conditions of abutments. **04**
- Q.8** a) Design an elastomeric unreinforced bearing pad for following data **05**
Vertical load (sustained) = 196 kN,
Vertical load (dynamic) = 46 kN,
Horizontal force = 56 kN
Modulus of rigidity of elastomer - 1.1 N/mm²
Coefficient of friction = 0.3
- b) Explain various functions of bearing. **04**
- Q.9** Write a note on following. (Any three) **09**
a) Types of Pier
b) Maintenance of bridges
c) Expansion Joints
d) Types of Bearing

Seat
No.

Fourth Y. (B.Tech.) (Sem-II) (Old) (CBCS) Examination: March/April-2024
CIVIL ENGINEERING
Design of Bridges (197042816)

Day & Date: Friday, 10-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No.3 (starting page of the Answer Book). Each question carry one mark.
 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 3) Figures to the right indicates full marks.
 4) Assume suitable data wherever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options.

14

- 1) Pigeaud's curves are used to calculate _____.
 a) Bending moment coefficients b) Load factor
 c) Impact factor d) Effective span
- 2) Load factor 'K' by Courbon's theory for uniform MI is given by, _____.
 a) $\frac{\sum W}{n} \left[1 + \frac{neI_1X_1}{\sum I_iX_i^2} \right]$ b) $\frac{\sum W}{n} \left[n + \frac{eX_1}{\sum X^2} \right]$
 c) $\frac{\sum W}{n} \left[1 + \frac{neX_1}{\sum X^2} \right]$ d) $\frac{\sum W}{n} \left[n + \frac{eI_1X_1}{\sum I_iX_i^2} \right]$
- 3) Permissible maximum compressive stress of plain concrete M20 is _____.
 a) 7.0 MPa b) 2.7 MPa
 c) 5.0 MPa d) 1.5 MPa
- 4) Expansion bearing allow _____.
 a) Rotation only
 b) Translation only
 c) Both rotational as well as translation
 d) Restrict rotation as well as translation
- 5) Following is not type of Expansion bearing _____.
 a) Sliding plate beam b) Steel roller-cum-rocker bearing
 c) Elastomeric bearing d) Rocker bearing
- 6) Elastomeric having ultimate tensile strain _____.
 a) 300 percent maximum b) 300 percent minimum
 c) 400 percent maximum d) 400 percent minimum
- 7) Guideline for the design of bridge foundation are available in IRC bridge code section _____.
 a) I b) III
 c) V d) VII
- 8) Aquaduct is the classification of bridge according to _____.
 a) Material b) Function
 c) Type of superstructure d) Inter-span relationship

- 9) Section VII of IRC bridge code deals with _____.
- a) Composite construction b) Bearings
c) Cement concrete d) Foundations & substructure
- 10) To provide for the possible variation of the direction of the water current, allowance for an extra variation of water current direction is _____.
- a) 15° b) 20°
c) 25° d) 35°
- 11) The minimum side clearance from kerb for class AA tracked loading is _____.
- a) 0.15m b) 1.0m
c) 1.2m d) None of these
- 12) The minimum height of Kerb may be taken as _____ above the road level.
- a) 250mm b) 225mm
c) 600mm d) 300mm
- 13) Permissible shear stress (τ_{co}) for M-25 concrete is _____.
- a) 0.28 N/mm² b) 0.34 N/mm²
c) 0.4 N/mm² d) 0.45 N/mm²
- 14) Pigeaud's method is most useful when K is more than _____.
- a) 0.44 b) 0.50
c) 0.55 d) 0.60

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No.3 (starting page of the Answer Book). Each question carry one mark.
 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options.

14

- 1) The process of creating something new is called _____.
 a) Creative flexibility b) Management
 c) Business d) Innovation
- 2) If an entrepreneur takes decisions on behalf of their enterprise, it is known as _____.
 a) Routine decisions b) Strategic decisions
 c) Organisational decisions d) Personal decisions
- 3) Which type of entrepreneur, imitates some part of business activity only when it is the only option available to run the enterprise?
 a) Innovative b) Imitative
 c) fabian d) drone
- 4) Good source of information for an entrepreneur about competitors can be obtained from _____.
 a) Websites
 b) Product information leaflets
 c) Company reports about published accounts
 d) All the above
- 5) Which of the following is a psychological factor affecting entrepreneurial growth?
 a) Legitimacy of Entrepreneurship b) Social status
 c) Need for achievement d) None of these
- 6) SIDBI was set up as a subsidiary of _____.
 a) IDBI b) IFCI
 c) ICICI d) SFC
- 7) Entrepreneurs are motivated by _____.
 a) Money b) Personal values
 c) Pull influences d) All the above
- 8) Which of the following is considered to be integral part of entrepreneurship?
 a) Innovation b) Risk
 c) Organizing d) All of these

- 9) Which of these is not a challenge for the entrepreneur?
- a) Managing the cash flow of their business
 - b) Recruiting new employees
 - c) Choosing the product or service to sell in the market
 - d) Formulating rules and regulations relating to conducting entrepreneurship in their country
- 10) Ownership position of less than 50 per cent in a business is known as: _____.
- a) Majority Interest
 - b) Joint Venture
 - c) Minority Interest
 - d) None of the above
- 11) The lean startup model canvas was initially proposed by _____.
- a) Elon Musk
 - b) Steve Jobs
 - c) Ash Maurya
 - d) Alexander Osterwalder
- 12) One of the disadvantages of a franchise business for a franchisee is _____.
- a) Lack of independence
 - b) Franchise businesses typically have a high failure data
 - c) Lack of brand identity
 - d) Training is not normally provided by the franchiser
- 13) Refusal to adopt and use opportunities to make changes in production _____ entrepreneurs.
- a) Fabian
 - b) Imitative
 - c) Innovative
 - d) Drone
- 14) Business risks can be _____.
- a) Avoided
 - b) Reduced
 - c) Erased
 - d) None of the above

Day & Date: Friday, 10-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

Instructions: 1) Solve any two questions from each section.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt the following questions.

- a) Write a short note on Evolution of Entrepreneurship. **07**
b) What is the Role of Entrepreneurship in Economic Development? **07**

Q.3 Attempt the following questions.

- a) What are the Problems of Women Entrepreneurship in India? **07**
b) What are the reasons for the slow growth of women entrepreneurship and remedies to solve them. **07**

Q.4 Attempt the following questions.

- a) What is the Role of Government in promoting Entrepreneurship? **07**
b) Write a short note on the Financial Support System. **07**

Section – II

Q.5 Attempt the following questions.

- a) Write a short note on working capital requirement and its financing. **07**
b) Write a short note on break even analysis cash flow charts financial statement. **07**

Q.6 Attempt the following questions.

- a) Describe concept of Preliminary and final project report preparation. **07**
b) Write financial technical commercial and economic viability of the project implementation process. **07**

Q.7 Attempt the following questions.

- a) What are the Industrial and commercial tax laws? **07**
b) What are the Communication skills and its barriers? **07**

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options. 14

- 1) Which of the following is considered to be integral part of entrepreneurship?
 - a) Innovation
 - b) Risk
 - c) Organizing
 - d) All of these
- 2) Which of these is not a challenge for the entrepreneur?
 - a) Managing the cash flow of their business
 - b) Recruiting new employees
 - c) Choosing the product or service to sell in the market
 - d) Formulating rules and regulations relating to conducting entrepreneurship in their country
- 3) Ownership position of less than 50 per cent in a business is known as: _____.
 - a) Majority Interest
 - b) Joint Venture
 - c) Minority Interest
 - d) None of the above
- 4) The lean startup model canvas was initially proposed by _____.
 - a) Elon Musk
 - b) Steve Jobs
 - c) Ash Maurya
 - d) Alexander Osterwalder
- 5) One of the disadvantages of a franchise business for a franchisee is _____.
 - a) Lack of independence
 - b) Franchise businesses typically have a high failure data
 - c) Lack of brand identity
 - d) Training is not normally provided by the franchiser
- 6) Refusal to adopt and use opportunities to make changes in production _____ entrepreneurs.
 - a) Fabian
 - b) Imitative
 - c) Innovative
 - d) Drone
- 7) Business risks can be _____.
 - a) Avoided
 - b) Reduced
 - c) Erased
 - d) None of the above

- 8) The process of creating something new is called _____.
a) Creative flexibility b) Management
c) Business d) Innovation
- 9) If an entrepreneur takes decisions on behalf of their enterprise, it is known as _____.
a) Routine decisions b) Strategic decisions
c) Organisational decisions d) Personal decisions
- 10) Which type of entrepreneur, imitates some part of business activity only when it is the only option available to run the enterprise?
a) Innovative b) Imitative
c) fabian d) drone
- 11) Good source of information for an entrepreneur about competitors can be obtained from _____.
a) Websites
b) Product information leaflets
c) Company reports about published accounts
d) All the above
- 12) Which of the following is a psychological factor affecting entrepreneurial growth?
a) Legitimacy of Entrepreneurship b) Social status
c) Need for achievement d) None of these
- 13) SIDBI was set up as a subsidiary of _____.
a) IDBI b) IFCI
c) ICICI d) SFC
- 14) Entrepreneurs are motivated by _____.
a) Money b) Personal values
c) Pull influences d) All the above

Set Q

Fourth Y. (B.Tech.) (Sem-II) (Old) (CBCS) Examination: March/April-2024
CIVIL ENGINEERING
Entrepreneurship (197042822)

Day & Date: Friday, 10-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

Instructions: 1) Solve any two questions from each section.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt the following questions.

- a) Write a short note on Evolution of Entrepreneurship. **07**
b) What is the Role of Entrepreneurship in Economic Development? **07**

Q.3 Attempt the following questions.

- a) What are the Problems of Women Entrepreneurship in India? **07**
b) What are the reasons for the slow growth of women entrepreneurship and remedies to solve them. **07**

Q.4 Attempt the following questions.

- a) What is the Role of Government in promoting Entrepreneurship? **07**
b) Write a short note on the Financial Support System. **07**

Section – II

Q.5 Attempt the following questions.

- a) Write a short note on working capital requirement and its financing. **07**
b) Write a short note on break even analysis cash flow charts financial statement. **07**

Q.6 Attempt the following questions.

- a) Describe concept of Preliminary and final project report preparation. **07**
b) Write financial technical commercial and economic viability of the project implementation process. **07**

Q.7 Attempt the following questions.

- a) What are the Industrial and commercial tax laws? **07**
b) What are the Communication skills and its barriers? **07**

- 8) Good source of information for an entrepreneur about competitors can be obtained from _____.
- a) Websites
 - b) Product information leaflets
 - c) Company reports about published accounts
 - d) All the above
- 9) Which of the following is a psychological factor affecting entrepreneurial growth?
- a) Legitimacy of Entrepreneurship
 - b) Social status
 - c) Need for achievement
 - d) None of these
- 10) SIDBI was set up as a subsidiary of _____.
- a) IDBI
 - b) IFCI
 - c) ICICI
 - d) SFC
- 11) Entrepreneurs are motivated by _____.
- a) Money
 - b) Personal values
 - c) Pull influences
 - d) All the above
- 12) Which of the following is considered to be integral part of entrepreneurship?
- a) Innovation
 - b) Risk
 - c) Organizing
 - d) All of these
- 13) Which of these is not a challenge for the entrepreneur?
- a) Managing the cash flow of their business
 - b) Recruiting new employees
 - c) Choosing the product or service to sell in the market
 - d) Formulating rules and regulations relating to conducting entrepreneurship in their country
- 14) Ownership position of less than 50 per cent in a business is known as: _____.
- a) Majority Interest
 - b) Joint Venture
 - c) Minority Interest
 - d) None of the above

Ground Improvement Techniques (197042820)

Day & Date: Friday, 10-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) Solve any two questions from each section.
2) Figures to the right indicate full marks.
3) Make suitable assumptions, if required and state them clearly.

Section – I

Q.2 Attempt the following questions.

- | | | |
|----|---------------------------------------------------------------------------------------------|----|
| a) | State the objectives of ground improvement. | 07 |
| b) | Explain the factors to be consider in the selection of the best soil improvement technique. | 07 |

Q.3 Attempt the following questions.

- | | | |
|----|---------------------------------------------------------|----|
| a) | Explain aims of mechanical modification. | 07 |
| b) | Explain pre loading with sand drains and fabric drains. | 07 |

Q.4 Attempt the following questions.

- | | | |
|----|--------------------------------------------------------------------------------------|----|
| a) | Explain purpose of dewatering during construction stage and post construction stage. | 07 |
| b) | What are the advantages and limitations of Electro osmotic method? | 07 |

Section – II

Q.5 Attempt the following questions.

- | | | |
|----|----------------------------------------------------------|----|
| a) | Write a detailed note on methods of heating soil insitu. | 07 |
| b) | Explain micro piling with neat sketch. | 07 |

Q.6 Attempt the following questions.

- | | | |
|----|----------------------------------------------------------|----|
| a) | Explain types of admixtures used for lime stabilization. | 07 |
| b) | Explain design of soil cement mixtures. | 07 |

Q.7 Attempt the following questions.

- | | | |
|----|-------------------------------------------------------------------------------|----|
| a) | What are the different types of bridges plate girders? Explain one in detail. | 07 |
| b) | What are the advantages and limitations of reinforced earth retaining walls. | 07 |

Ground Improvement Techniques (197042820)

Day & Date: Friday, 10-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:**
- 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No.3 (starting page of the Answer Book). Each question carry one mark.
 - 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 - 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options.

14

- 1) The equipment used for vibro-compaction includes:

a) crane	b) hydraulic vibrator
c) air compressor	d) All of the above
- 2) Displacement method of Deep replacement is suitable for:

a) cohesive soil	b) cohesion less soil
c) Both a & b	d) None of the above
- 3) For displacement techniques the incorrect method from the following is _____.

a) vibro-casing	b) dynamic replacement
c) vibro-probe	d) vibro-displacement
- 4) In electro-osmosis method, when direct current is applied to the electrodes, the soil water will _____.

a) travel from positive electrode to negative electrode	b) travel from negative electrode to positive electrode
c) move towards the center between the electrodes	d) not be affected by the current
- 5) Select the correct method to control groundwater is/are:

a) Drainage	b) Dewatering
c) Barrier	d) All of the above
- 6) Choose the correct statement for the ground improvement by preloading technique:

a) preloading is especially used for low permeable geomaterial	b) fill preloading can be easily implemented in an open land with limited resources
c) basic concept of preloading is to reduce void ratio of geomaterial through consolidation	d) All of the above
- 7) The soil type suitable for jet grouting is _____.

a) Cohesive soil	b) Cohesionless soil
c) Clay	d) All of the above

Q.1 Choose the correct alternatives from the options.

14

- 1) In electro-osmosis method, when direct current is applied to the electrodes, the soil water will _____.
 - a) travel from positive electrode to negative electrode
 - b) travel from negative electrode to positive electrode
 - c) move towards the center between the electrodes
 - d) not be affected by the current
- 2) Select the correct method to control groundwater is/are:
 - a) Drainage
 - b) Dewatering
 - c) Barrier
 - d) All of the above
- 3) Choose the correct statement for the ground improvement by preloading technique:
 - a) preloading is especially used for low permeable geomaterial
 - b) fill preloading can be easily implemented in an open land with limited resources
 - c) basic concept of preloading is to reduce void ratio of geomaterial through consolidation
 - d) All of the above
- 4) The soil type suitable for jet grouting is _____.
 - a) Cohesive soil
 - b) Cohesionless soil
 - c) Clay
 - d) All of the above
- 5) Grouting pressure is generally limited (in kPa) up to _____.
 - a) 1.0
 - b) 5.0
 - c) 20
 - d) 50
- 6) Liquefaction occurs in soil when _____.
 - a) Effective stress remain unchanged
 - b) Effective stress increases
 - c) Effective stress reduces to zero
 - d) None of the above
- 7) Ground heave occur in soil because of _____.
 - a) Water
 - b) Expansive soil
 - c) Froze soil
 - d) All of these

- 8) The incorrect statement about effects of compaction of soil is:
- a) Compaction increases shear and bearing strength of soil
 - b) Compaction increases the permeability of soil
 - c) Compaction increases the frictional characteristic of soil
 - d) Compaction decreases the compressibility of soil
- 9) The performance of compaction equipment depends upon _____.
- a) Soil type
 - b) Water type
 - c) Particle size Distribution
 - d) All of the above
- 10) In compaction test, if the compacting effort is increased, it will result in _____.
- a) No change in maximum dry density and decrease in OMC
 - b) Increase in maximum dry density and OMC
 - c) Increase in maximum dry density and OMC remain unchanged
 - d) Increase in maximum dry density and decrease in OMC
- 11) Design parameter for Rapid Impact compaction are:
- a) Depth of improvement
 - b) Geomaterial type
 - c) Distance to the existing structures
 - d) All of the above
- 12) The equipment used for vibro-compaction includes:
- a) crane
 - b) hydraulic vibrator
 - c) air compressor
 - d) All of the above

- Instructions:**
- 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No.3 (starting page of the Answer Book). Each question carry one mark.
 - 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 - 3) Figures to the right indicates full marks.
 - 4) Assume suitable data wherever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options.

14

- 1) Which of the following is not a component of the rail?

a) Ballast	b) Foot
c) Web	d) Head
- 2) Stretcher bar is provided _____.
 - a) To permit lateral movement of the tongue rail
 - b) To maintain the two tongue rails at the exact distance
 - c) To ensure exact gauge at the toe of the switch as well as the nose of crossing
 - d) To prevent any vertical movement between the wing rail and nose of crossing
- 3) The standard length of rail of BG and MG track is _____.

a) 13 & 12m	b) 12 & 12m
c) 12 & 13m	d) None of above
- 4) The gradient on which an additional engine is required to negotiate the gradient, is called _____.

a) Momentum gradient	b) Pusher gradient
c) Ruling gradient	d) Steep gradient
- 5) For providing the required tilt of rails, adzing of wooden sleepers, is done for _____.

a) Bull headed rails	b) Double headed rails
c) Flat footed rails	d) Any type of rails
- 6) Cant deficiency occur when a vehicle travels around a curve at _____.
 - a) Equilibrium speed
 - b) Speeds higher than equilibrium speed
 - c) Speeds lower than equilibrium speed
 - d) Booked speed
- 7) The place where a railway line and a road cross each other at the same level, is known as _____.

a) Cross over	b) Railway junction
c) Road junction	d) Level crossing

Set **P**

**Fourth Y. (B.Tech.) (Sem-II) (Old) (CBCS) Examination: March/April-2024
CIVIL ENGINEERING**

Railway & Harbour Engineering (197042801)

Day & Date: Saturday, 11-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) Q. No. 2 is compulsory and solve any two questions from remaining questions Q. No. 3 to Q. No. 5.
2) Q. No. 6 is compulsory and solve any two questions from remaining questions Q. No. 7 to Q. No. 9.
3) Figures to the right indicate full marks.
4) Assume suitable data wherever needed & mention it clearly.

Section – I

- Q.2** Calculate max permissible train load that can be pulled by locomotive with Four pairs of driving wheels with axle load of 24 tonne for BG track with speed of 80 Km/h, $f = (1/6)$. **08**
Also calculate the reduction in the speed, if the train has to climb up a gradient of 1 in 200.
If train climbs up the gradient with a 2 degree curve, then what would be reduction in the speed?
- Q.3 Answer any two questions.** **10**
a) Explain the role of railway engineering in national and global development.
b) Define permanent way with neat sketch. Explain each component of permanent way.
c) Draw a systematic layout of a right hand turnout and name the different parts.
- Q.4 Answer any two questions.** **10**
a) Explain various methods and steps for the construction and maintenance of railway track.
b) Explain different types of signals.
c) Write a short note on Modern Indian Railways.
- Q.5** What are the essential features of semaphore signal? Explain the working of semaphore signal in detail with sketch. **10**

Section – II

- Q.6** Length of run way under standard condition is 1620m, the airport site has an elevation of 230m, reference temperature is 32.94°C. If the runway is to be constructed with effective gradient of 0.2%, determine corrected runway length. **08**

Q.7 Answer any two questions.

- a) A taxiway is to be designed for operating an aircraft which has following characteristics.
Determine turning radius of taxiway
- Wheel base - 17.70 m
 - Tread of main loading gear - 6.62 m
 - Turning speed - 40 kmph
 - Coefficient of friction between tyre and pavement surface - 0.13 and width of taxiway - 22.5 m
- b) Draw cross-section of Airport showing all component parts and explain it in detail.
- c) The data for the hottest month of year is the year of maximum daily temperature is 43.72°C and mean of average daily temperature is 20.32°C then what is the airport reference temperature?

Q.8 Answer any two questions.**10**

- Write short note on wharf and jetties with neat sketches.
- What are the factors to be considered while selecting site for harbor?
- What are fenders? Why are they used? Describe various types of fenders with sketches.

- Q.9** Explain the role of Airport engineering in national and global development. Also state the contribution of Dock and harbors in national development of country.

Railway & Harbour Engineering (197042801)

Day & Date: Saturday, 11-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:**
- 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No.3 (starting page of the Answer Book). Each question carry one mark.
 - 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 - 3) Figures to the right indicates full marks.
 - 4) Assume suitable data wherever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options.

14

- 1) As per ICAO, the minimum width of safety area for instrumental runway should be _____.

a) 75m	b) 150m
c) 300m	d) 450m
- 2) The runway length after correcting elevation and temperature is 2845m. If the effective gradient on runway is 0.5% then revised runway length will be _____.

a) 2845m	b) 2910m
c) 3030m	d) 3130m
- 3) Calm period is the percentage of time during which wind intensity is less than _____.

a) 4.8 kmph	b) 6.4 kmph
c) 8 kmph	d) 9.6 kmph
- 4) The minimum width of clearway is _____.

a) 50m	b) 100m
c) 150m	d) 250m
- 5) The width of the entrances of the harbors is restricted to _____.

a) 100 m	b) 125 m
c) 150 m	d) 180 m
- 6) If F is the fetch, the straight-line distance of open water available in kilometers, the height of the wave in meters is _____.

a) 0.15 F	b) 0.20 F
c) 0.28 F	d) 0.34 F
- 7) In a wet dock system, _____.
 - a) Minimum required depth of water for the vessels is maintained
 - b) Entrance locks are provided with massive gates
 - c) The locks of dock gate are operated by means of heavy bascule bridges and connected machinery
 - d) All of above

Max. Marks: 56

- Instructions:** 1) Q. No. 2 is compulsory and solve any two questions from remaining questions Q. No. 3 to Q. No. 5.
2) Q. No. 6 is compulsory and solve any two questions from remaining questions Q. No. 7 to Q. No. 9.
3) Figures to the right indicate full marks.
4) Assume suitable data wherever needed & mention it clearly.

Section – I

- Q.2** Calculate max permissible train load that can be pulled by locomotive with Four pairs of driving wheels with axle load of 24 tonne for BG track with speed of 80 Km/h, $f = (1/6)$. **08**
Also calculate the reduction in the speed, if the train has to climb up a gradient of 1 in 200.
If train climbs up the gradient with a 2 degree curve, then what would be reduction in the speed?
- Q.3 Answer any two questions.** **10**
a) Explain the role of railway engineering in national and global development.
b) Define permanent way with neat sketch. Explain each component of permanent way.
c) Draw a systematic layout of a right hand turnout and name the different parts.
- Q.4 Answer any two questions.** **10**
a) Explain various methods and steps for the construction and maintenance of railway track.
b) Explain different types of signals.
c) Write a short note on Modern Indian Railways.
- Q.5** What are the essential features of semaphore signal? Explain the working of semaphore signal in detail with sketch. **10**

Section – II

- Q.6** Length of run way under standard condition is 1620m, the airport site has an elevation of 230m, reference temperature is 32.94°C. If the runway is to be constructed with effective gradient of 0.2%, determine corrected runway length. **08**

Q.7 Answer any two questions.

- a) A taxiway is to be designed for operating an aircraft which has following characteristics.
Determine turning radius of taxiway
- Wheel base - 17.70 m
 - Tread of main loading gear - 6.62 m
 - Turning speed - 40 kmph
 - Coefficient of friction between tyre and pavement surface - 0.13 and width of taxiway - 22.5 m
- b) Draw cross-section of Airport showing all component parts and explain it in detail.
- c) The data for the hottest month of year is the year of maximum daily temperature is 43.72°C and mean of average daily temperature is 20.32°C then what is the airport reference temperature?

Q.8 Answer any two questions.**10**

- Write short note on wharf and jetties with neat sketches.
- What are the factors to be considered while selecting site for harbor?
- What are fenders? Why are they used? Describe various types of fenders with sketches.

Q.9 Explain the role of Airport engineering in national and global development. Also state the contribution of Dock and harbors in national development of country.**10**

- 8) The gradient on which an additional engine is required to negotiate the gradient, is called _____.
- a) Momentum gradient b) Pusher gradient
c) Ruling gradient d) Steep gradient
- 9) For providing the required tilt of rails, adzing of wooden sleepers, is done for _____.
- a) Bull headed rails b) Double headed rails
c) Flat footed rails d) Any type of rails
- 10) Cant deficiency occur when a vehicle travels around a curve at _____.
- a) Equilibrium speed
b) Speeds higher than equilibrium speed
c) Speeds lower than equilibrium speed
d) Booked speed
- 11) The place where a railway line and a road cross each other at the same level, is known as _____.
- a) Cross over b) Railway junction
c) Road junction d) Level crossing
- 12) As per ICAO, the minimum width of safety area for instrumental runway should be _____.
- a) 75m b) 150m
c) 300m d) 450m
- 13) The runway length after correcting elevation and temperature is 2845m. If the effective gradient on runway is 0.5% then revised runway length will be _____.
- a) 2845m b) 2910m
c) 3030m d) 3130m
- 14) Calm period is the percentage of time during which wind intensity is less than _____.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternative:**14**

- 1) Which of the following statements is true about the occupational structure of the Indian economy during British rule?
 - a) The occupational structure of the Indian economy during the British rule was stagnant
 - b) The occupational structure of the Indian economy during the British rule was underdeveloped
 - c) The occupational structure of the Indian economy during the British rule was both stagnant and underdeveloped
 - d) The occupational structure of the Indian economy during British rule was developed
- 2) Which of the following sectors was the major contributor to the Gross Domestic Product (GDP) during the British rule in India?
 - a) Primary sector
 - b) Secondary sector
 - c) Tertiary sector
 - d) None of the above
- 3) Which of the following is included in the National Income of a country?
 - a) Rent
 - b) Interest
 - c) Wages
 - d) Rent, Interest, Wages, Salary, Profits
- 4) The term economic growth is explained by _____.
 - a) Structural changes in the economy
 - b) Increase in the per capita production
 - c) Increase in the per capita income
 - d) All of the above
- 5) The purchasing power of money varies _____.
 - a) Directly with the volume of employment
 - b) Inversely with the price level
 - c) Directly with the interest rate
 - d) Directly with the price level

- 6) Which of the following activities is not included in the calculation of the national income of a country?
- A maid working for a family on a full-time basis
 - A lawyer conducting their law practice
 - A housewife performing housework
 - A dispensary rendering medical services
- 7) Which of the following is not a characteristic of the Indian economy on the eve of India's independence?
- Small and fragmented land holdings
 - Use of outdated and old technology
 - Commercial farming
 - Low level of productivity
- 8) The industrial license was abolished for most industries except _____ during the 1991 reforms.
- Steel
 - Food processing
 - Liquor
 - All of the above
- 9) What was the primary outcome of the liberalisation and privatisation initiatives under the New Economic Policy (NEP) in 1991, followed by the Indian government?
- Fiscal policy reforms
 - Globalisation
 - Monetary policy reforms
 - None of the above
- 10) Which of the following arguments are made in favour of privatisation of a country's economy?
- It helps to revive sick public sector units
 - It creates a competitive environment for businesses
 - It helps to protect the sovereignty of a consumer
 - All the above
- 11) Which of the following is a step that the central bank will take to increase the overall availability of credit?
- It will sell the government securities in the market
 - It will buy more government securities from the market
 - It will raise the reverse repo rate
 - It will raise the repo rate
- 12) Which of the following statements is true about demand deposits?
- It includes both fixed deposits and current account deposits.
 - It includes both savings account deposits and fixed deposits.
 - It includes both current account deposits and savings account deposits.
 - It includes fixed deposits, current account deposits and savings account
- 13) Which of the statements gives an accurate picture of the effect of the increase in the repo rate?
- The money supply in the country will decrease
 - The money supply in the country will increase
 - The money supply in the country will increase initially and decrease
 - There is no effect on the money supply in the country
- 14) How many members are present in the WTO?
- 207
 - 195
 - 160
 - 164

Day & Date: Monday, 13-05-2024

Max. Marks: 56

Time: 03:00 PM To 06:00 PM

- Instructions:** 1) In Section-I, Q. No. 2 is compulsory and solve any TWO questions from remaining questions (Q. No. 3, 4 & 5).
2) In Section-II, Q. No. 6 is compulsory and solve any TWO questions from remaining questions (Q. No. 7, 8 & 9).
3) Figures to right indicate full marks.

Section – I

- Q.2** a) Explain in brief salient features eleventh Five year plan. **04**
b) Write in detail why economic policies were required to reform. **04**
c) What is mean by inflation? Explain the causes of inflation. **04**
- Q.3** a) Explain in detail rural credit system. **04**
b) Explain effect of green revolution on Indian economy. **04**
- Q.4** a) Write a note on Economic condition of India During the colonial government? **04**
b) Explain in detail about economic reforms in India. **04**
- Q.5** a) What is mean by unemployment? What are the causes and effects of unemployment? **04**
b) Write a short note on WTO and agriculture. **04**

Section – II

- Q.6** a) What is mean by SEBI? Explain in detail. **05**
b) Write short note on 13th finance commission. **05**
- Q.7** a) What is mean by parallel economy? Explain in detail. **05**
b) How balance of payment is maintained by RBI. **04**
- Q.8** a) What is mean by FDI? Explain in detail. **05**
b) Explain in detail performance of industrial sector before the economic reform period. **04**
- Q.9** a) What is role of Panchayat and Pressure groups in implementation of economic policies? **05**
b) Explain role of public sector units in Indian economy. **04**

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternative:

14

- 1) The industrial license was abolished for most industries except _____ during the 1991 reforms.

a) Steel	b) Food processing
c) Liquor	d) All of the above
- 2) What was the primary outcome of the liberalisation and privatisation initiatives under the New Economic Policy (NEP) in 1991, followed by the Indian government?

a) Fiscal policy reforms	b) Globalisation
c) Monetary policy reforms	d) None of the above
- 3) Which of the following arguments are made in favour of privatisation of a country's economy?
 - a) It helps to revive sick public sector units
 - b) It creates a competitive environment for businesses
 - c) It helps to protect the sovereignty of a consumer
 - d) All the above
- 4) Which of the following is a step that the central bank will take to increase the overall availability of credit?
 - a) It will sell the government securities in the market
 - b) It will buy more government securities from the market
 - c) It will raise the reverse repo rate
 - d) It will raise the repo rate
- 5) Which of the following statements is true about demand deposits?
 - a) It includes both fixed deposits and current account deposits.
 - b) It includes both savings account deposits and fixed deposits.
 - c) It includes both current account deposits and savings account deposits.
 - d) It includes fixed deposits, current account deposits and savings account

- 6) Which of the statements gives an accurate picture of the effect of the increase in the repo rate?
- a) The money supply in the country will decrease
 - b) The money supply in the country will increase
 - c) The money supply in the country will increase initially and decrease
 - d) There is no effect on the money supply in the country
- 7) How many members are present in the WTO?
- a) 207
 - b) 195
 - c) 160
 - d) 164
- 8) Which of the following statements is true about the occupational structure of the Indian economy during British rule?
- a) The occupational structure of the Indian economy during the British rule was stagnant
 - b) The occupational structure of the Indian economy during the British rule was underdeveloped
 - c) The occupational structure of the Indian economy during the British rule was both stagnant and underdeveloped
 - d) The occupational structure of the Indian economy during British rule was developed
- 9) Which of the following sectors was the major contributor to the Gross Domestic Product (GDP) during the British rule in India?
- a) Primary sector
 - b) Secondary sector
 - c) Tertiary sector
 - d) None of the above
- 10) Which of the following is included in the National Income of a country?
- a) Rent
 - b) Interest
 - c) Wages
 - d) Rent, Interest, Wages, Salary, Profits
- 11) The term economic growth is explained by _____.
- a) Structural changes in the economy
 - b) Increase in the per capita production
 - c) Increase in the per capita income
 - d) All of the above
- 12) The purchasing power of money varies _____.
- a) Directly with the volume of employment
 - b) Inversely with the price level
 - c) Directly with the interest rate
 - d) Directly with the price level
- 13) Which of the following activities is not included in the calculation of the national income of a country?
- a) A maid working for a family on a full-time basis
 - b) A lawyer conducting their law practice
 - c) A housewife performing housework
 - d) A dispensary rendering medical services

- 14)** Which of the following is not a characteristic of the Indian economy on the eve of India's independence?

Fourth Y. (B.Tech.) (Sem - II) (Old) (CBCS) Examination: March/April-2024
CIVIL ENGINEERING
Professional Practice, Law & Ethics (197042803)

Day & Date: Tuesday, 14-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No 3 (starting page of the Answer Book). Each question carry one mark.
 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 3) Figures to the right indicates full marks.
 4) Assume suitable data wherever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct answer.**14**

- 1) Which act requires employers in industrial establishments to define the conditions of employment?
 - a) The Factories Act, 1948
 - b) The Industrial Disputes Act, 1947
 - c) The Industrial Employment Act, 1946
 - d) The Trade Union Act, 1926
- 2) Which of the following is Rights of a Copyright Owner?
 - a) Publish their work and Perform their work in public
 - b) Translate and Broadcast their work
 - c) Prevent others from making unauthorized use of copyrighted work
 - d) All of the above
- 3) Patent is a _____.

a) Transferable property	b) Negotiable property
c) Real property	d) Non-transferable property
- 4) An agreement enforceable by law is: _____.

a) A voidable contract	b) A Valid contract / contract
c) A Void	d) A void contract
- 5) Which of the following is an example of conflict of interest?
 - a) An individual who works at 7-11 while also volunteering their time on their days off
 - b) An individual who is self-employed starting a computer business
 - c) A person working for Apple and Microsoft at the same time
 - d) A person working for INTEL
- 6) The first and farthest professional ethics is _____.
 - a) to strive for excellence
 - b) to take care to environment
 - c) to serve the needy and poor of the society
 - d) None of these

**Fourth Y. (B.Tech.) (Sem - II) (Old) (CBCS) Examination: March/April-2024
CIVIL ENGINEERING**

Professional Practice, Law & Ethics (197042803)

Day & Date: Tuesday, 14-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) Solve any two questions from Section - I
2) Solve any two questions from Section - II
3) Figures to right indicate full marks.
4) Assume suitable data wherever needed and mention it clearly.

Section – I

- Q.2** a) Explain role governed by manufacturer, vendor & service agencies. **07**
b) Explain term profession & and professional body, enlist benefits & disadvantages of joining professional body. **07**
- Q.3** a) Define ethics and enlist & explain its types. **07**
b) Explain terms Professional responsibility & Conflict of interest. **07**
- Q.4** a) Write note on tenders and Request for proposals. **07**
b) Write note on wrong practices in contracting. **07**

Section – II

- Q.5** a) Explain the concept of arbitration tribunal. **07**
b) Distinguish between Conciliation, Negotiation, Mediation and Arbitration. **07**
- Q.6** a) Explain workmen compensation act, 1923. **07**
b) Discuss methods of engaging labor. **07**
- Q.7** a) Explain process of obtaining/filing the patent. **07**
b) Write note on ownership of copyrights and assignments. **07**

- 9) A keyway lowers _____.
a) The strength of the shaft b) The rigidity of shaft
c) Both strength & rigidity of shaft d) Ductility of shaft material
- 10) The bolts in rigid flanged coupling connecting two shafts transmitting power are subjected to _____.
a) Shear force and bending moment
b) axial force
c) Torsion & bending moment
d) Torsion
- 11) The maximum shear stress in spring wire is induced at _____.
a) Inner surface of coil b) Outer surface of coil
c) Central surface of coil d) End coils
- 12) The function of spring is _____.
a) To absorb shock b) To store energy
c) To measure force d) None of the above
- 13) Which of the following is the temporary joint?
a) Butt welding b) Bolted
c) Riveted d) Lap welded
- 14) A bolt M 24 × 2 means that _____.
a) The pitch of the thread is 24 mm & depth is 2 mm
b) The cross-sectional area of the threads is 24 mm²
c) The nominal diameter of the bolt is 24 mm & the pitch is 2 mm
d) The effective diameter of the bolt is 24 mm & there are two threads per cm

T. Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING
Design of Machine Elements (BTN02501)

Day & Date: Monday, 13-05-2024
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

- Instructions:** 1) Attempt any Two questions from each section.
 2) Figures to right indicate full marks.
 3) Make suitable assumptions wherever necessary and state them clearly.
 4) Draw neat diagram wherever necessary.

Section – I

- Q.2** a) Illustrate any one theory of failure with its graphical representation. **06**
 b) Two plain carbon steel (30C8) rods are connected by means of knuckle joint to transmit an axial tensile force of 60 kN. Calculate the diameter of knuckle pin subjected to double shear and outer diameter of single eye, by considering factor of safety as 3. Yield stress (S_{yt}) of 30C8 is 400N/mm^2 **08**
- Q.3** a) Illustrate with neat diagram stress concentration and remedies to reduce stress concentration. **06**
 b) A bar of circular cross-section is subjected to alternating tensile forces varying from a minimum of 200 kN to a maximum of 500 kN. It is to be manufactured of a material with an ultimate tensile strength of 900 MPa and an endurance limit of 700 MPa. Determine the diameter of bar using factor of safety 3.5 related to ultimate tensile strength and 4 related to endurance limit and a stress concentration factor of 1.65 for fatigue load. Use Goodman straight line as basis for design. **08**
- Q.4** a) What are the advantages of belt drive? **04**
 b) What are the limitations of V-Belt drive? **03**
 c) Write step by step procedure to select flat belt from Manufacturers Catalogue. **07**

Section – II

- Q.5** a) What are the design considerations in casting? **04**
 b) Explain different types of shafts. **03**
 c) The pulley on the line shaft is 1.5 metre in diameter and has belt tension 5.4 kN and 1.8 kN on the tight side and slack side of the belt, respectively. Both these tensions may be assumed to be vertical. If the pulley be overhang from the shaft, the distance of the centre line of the pulley from the centre line of the bearing being 400 mm, find the diameter of the shaft. Assume maximum allowable shear stress of 42 MPa. **07**

- Q.6 a)** Explain following terms of springs **04**
- 1) Free length
 - 2) Active coils
 - 3) Spring index
 - 4) Spring rate
- b)** What are the different types of springs? Explain with neat sketch leaf spring. **03**
- c)** A compression coil spring made of an alloy steel is having the following specifications: **07**
 Mean diameter of coil = 50 mm; Wire diameter = 5 mm; Number of active coils = 20.
 If this spring is subjected to an axial load of 500 N; calculate the maximum shear stress to which the spring material is subjected in case of:
- 1) Neglecting the curvature effect
 - 2) Considering the effect of curvature
- Q.7 a)** What are the advantages and di-advantages of welded joint over bolted joint? **04**
- b)** Explain different types of stress induced in bolt in bolted joint. **03**
- c)** A bracket as shown in Fig. is applied by load of 10 kN vertically at a distance of 400 mm from the face of the column. The vertical face of the bracket is secured to a column by four bolts, in two rows (two in each row) at a distance of 50 mm from the lower edge of the bracket. Determine the size of the bolts, if the permissible value of the tensile stress for the bolt material is 84 MPa. **07**

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No. 3 (starting page of the Answer Book). Each question carry one mark.
 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 3) Figures to the right indicates full marks.
 4) Make suitable assumptions wherever necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options. 14

- 1) The maximum shear stress in spring wire is induced at _____.
 a) Inner surface of coil b) Outer surface of coil
 c) Central surface of coil d) End coils
- 2) The function of spring is _____.
 a) To absorb shock b) To store energy
 c) To measure force d) None of the above
- 3) Which of the following is the temporary joint?
 a) Butt welding b) Bolted
 c) Riveted d) Lap welded
- 4) A bolt M 24 × 2 means that _____.
 a) The pitch of the thread is 24 mm & depth is 2 mm
 b) The cross-sectional area of the threads is 24 mm²
 c) The nominal diameter of the bolt is 24 mm & the pitch is 2 mm
 d) The effective diameter of the bolt is 24 mm & there are two threads per cm
- 5) The maximum principal stress theory is proper choice for _____.
 a) Brittle material b) Ductile material
 c) Non-metals d) Both a & b
- 6) All the types of levers are subjected to _____.
 a) Twisting moment b) Bending moment
 c) Direct axial load d) Both a & b
- 7) The causes of stress concentration are _____.
 a) variation is material property b) variation of load
 c) variation of factor of safety d) variation in cross sectional area
- 8) Stress concentration in static loading is more serious in _____.
 a) Ductile material b) Brittle material
 c) Equally serious in both cases d) Depends on other factor

- 9) The V-belts are particularly good for _____ drives.
- a) Short
 - b) Long
 - c) a and b
 - d) All of the above
- 10) The power transmitted by means of belt depends upon _____.
- a) Velocity of the belt
 - b) Tension under which the belt is placed on the pulleys
 - c) Arc of the contact between the belt and smaller pulley
 - d) All of the above
- 11) In the assembly of pulley, key & shaft _____.
- a) pulley is made weakest
 - b) key is made weakest
 - c) key is made strongest
 - d) All three are designed for equal strength
- 12) The muff coupling is designed as a _____.
- a) Thin cylinder
 - b) Thick cylinder
 - c) Solid shaft
 - d) Hollow shaft
- 13) A keyway lowers _____.
- a) The strength of the shaft
 - b) The rigidity of shaft
 - c) Both strength & rigidity of shaft
 - d) Ductility of shaft material
- 14) The bolts in rigid flanged coupling connecting two shafts transmitting power are subjected to _____.
- a) Shear force and bending moment
 - b) axial force
 - c) Torsion & bending moment
 - d) Torsion

CAD-CAM-CAE (BTN02502)

Day & Date: Tuesday, 14-05-2024
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

- Instructions:** 1) Attempt any two questions from in section - I.
 2) Question No. 5 is compulsory and from the remaining attempt any one from Section - II.
 3) Figures to the right indicate full marks.
 4) Assume suitable data if necessary.
 5) Use of scientific calculator is allowed.

Section – I

- Q.2** a) Explain part classification and coding system with example. **08**
 b) Which are the schemes of solid modeling? Explain any one. **06**
- Q.3** a) Explain functions of Graphics software. **07**
 b) Enlist the different types of FE analysis. Explain any 02 types in detail. **07**
- Q.4** a) Triangle PQR has its vertices at P (0, 0), Q (4, 0) and R (2, 3). It is to be translated by 04 units in X direction and 02 units in Y direction, then it is to be rotated in counter direction about point R through 90°. Find new position of triangle PQR. **08**
 b) How Automation and CAD/CAM are dependent on each other? Explain with example. **06**

Section – II

- Q.5** a) With reference to component drawing given below prepare CNC part program. **10**
 Given:
 Tool material: H.S.S. Work Material: M.S.
 Spindle speed: 2000 rpm Feed rate: 400 mm/min
 All dimensions are in mm.

- b) Explain concept of Do Loop in CNC Part Program. **04**

- | | | |
|------------|------------------------------------------------------------------------------|-----------|
| Q.6 | a) Describe Automatic Tool Changer with neat sketch. | 07 |
| | b) Explain types of DNC with neat sketch. | 07 |

 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Assume suitable data if required.
 4) Use of scientific calculator is allowed.
 5) Figure to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct answer.

14

- 1) Which type of tool magazines are generally used to handle large number of tools?
 - a) Drum type
 - b) Chain type
 - c) Turret type
 - d) Both a & b
- 2) The curve which is tangent at first and last segment of polygon is _____.
 - a) Bezier Curve
 - b) Spline Curve
 - c) Hermite Curve
 - d) None of the above
- 3) In numerical control systems, DNC stands for _____.
 - a) Dedicated Numerical Control
 - b) Directional Numerical Control
 - c) Distributed Numerical Control
 - d) b & c
- 4) Creation, analysis, modification and optimization is _____.
 - a) CIM
 - b) CAD
 - c) CAM
 - d) CAD/CAM
- 5) The machine zero on lathe is generally set on the machine at _____.
 - a) Top right side
 - b) Top left side
 - c) At top mid position
 - d) None of the above
- 6) CSG is a _____.
 - a) Wire frame modeling scheme
 - b) Solid modeling scheme
 - c) Surface modeling scheme
 - d) All the above
- 7) FANUC, CNUMERIC, SIEMENS are CNC _____.
 - a) Programming language
 - b) Controllers
 - c) Machines
 - d) None
- 8) NC machines used for drilling, boring, reaming, tapping is _____.
 - a) Contouring type
 - b) Straight cut
 - c) Point to point
 - d) None of the above

- 9) Windowing transformation means _____.
a) Window to viewport transformation
b) Geometric transformation
c) Vertices transformation
d) Homogeneous Transformation
- 10) Miscellaneous function used for Coolant off is _____.
a) M 07
b) M 09
c) M 08
d) M10
- 11) Concatenations can be done using _____.
a) Viewing coordinates
b) Polar coordinate
c) Cylindrical coordinate
d) Homogeneous coordinate
- 12) The preparatory function used for circular clockwise interpolation function is _____.
a) G03
b) G02
c) G04
d) G01
- 13) In the following geometric modeling which is not 3D modeling?
a) Wireframe modeling
b) Surface modeling
c) Drafting
d) Solid Modeling
- 14) Retrieval type and generative type are the types of _____.
a) F.M.S.
b) Group Technology
c) C.A.P.P.
d) DNC

T.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING
CAD-CAM-CAE (BTN02502)

Day & Date: Tuesday, 14-05-2024
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

- Instructions:** 1) Attempt any two questions from in section - I.
 2) Question No. 5 is compulsory and from the remaining attempt any one from Section - II.
 3) Figures to the right indicate full marks.
 4) Assume suitable data if necessary.
 5) Use of scientific calculator is allowed.

Section – I

- Q.2** a) Explain part classification and coding system with example. **08**
 b) Which are the schemes of solid modeling? Explain any one. **06**
- Q.3** a) Explain functions of Graphics software. **07**
 b) Enlist the different types of FE analysis. Explain any 02 types in detail. **07**
- Q.4** a) Triangle PQR has its vertices at P (0, 0), Q (4, 0) and R (2, 3). It is to be translated by 04 units in X direction and 02 units in Y direction, then it is to be rotated in counter direction about point R through 90°. Find new position of triangle PQR. **08**
 b) How Automation and CAD/CAM are dependent on each other? Explain with example. **06**

Section – II

- Q.5** a) With reference to component drawing given below prepare CNC part program. **10**
 Given:
 Tool material: H.S.S. Work Material: M.S.
 Spindle speed: 2000 rpm Feed rate: 400 mm/min
 All dimensions are in mm.

- b) Explain concept of Do Loop in CNC Part Program. **04**

- | | | |
|------------|------------------------------------------------------------------------------|-----------|
| Q.6 | a) Describe Automatic Tool Changer with neat sketch. | 07 |
| | b) Explain types of DNC with neat sketch. | 07 |
| Q.7 | a) Explain Tool length and cutter diameter compensation with example. | 07 |
| | b) Explain types of NC System. | 07 |

Day & Date: Tuesday, 14-05-2024
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Assume suitable data if required.
 4) Use of scientific calculator is allowed.
 5) Figure to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct answer.**14**

- 1) In the following geometric modeling which is not 3D modeling?
 a) Wireframe modeling b) Surface modeling
 c) Drafting d) Solid Modeling
- 2) Retrieval type and generative type are the types of _____.
 a) F.M.S. b) Group Technology
 c) C.A.P.P. d) DNC
- 3) Which type of tool magazines are generally used to handle large number of tools?
 a) Drum type b) Chain type
 c) Turret type d) Both a & b
- 4) The curve which is tangent at first and last segment of polygon is _____.
 a) Bezier Curve b) Spline Curve
 c) Hermite Curve d) None of the above
- 5) In numerical control systems, DNC stands for _____.
 a) Dedicated Numerical Control b) Directional Numerical Control
 c) Distributed Numerical Control d) b & c
- 6) Creation, analysis, modification and optimization is _____.
 a) CIM b) CAD
 c) CAM d) CAD/CAM
- 7) The machine zero on lathe is generally set on the machine at _____.
 a) Top right side b) Top left side
 c) At top mid position d) None of the above
- 8) CSG is a _____.
 a) Wire frame modeling scheme
 b) Solid modeling scheme
 c) Surface modeling scheme
 d) All the above

- 9) FANUC, CNUMERIC, SIEMENS are CNC _____.
a) Programming language b) Controllers
c) Machines d) None
- 10) NC machines used for drilling, boring, reaming, tapping is _____.
a) Contouring type b) Straight cut
c) Point to point d) None of the above
- 11) Windowing transformation means _____.
a) Window to viewport transformation
b) Geometric transformation
c) Vertices transformation
d) Homogeneous Transformation
- 12) Miscellaneous function used for Coolant off is _____.
a) M 07 b) M 09
c) M 08 d) M10
- 13) Concatenations can be done using _____.
a) Viewing coordinates b) Polar coordinate
c) Cylindrical coordinate d) Homogeneous coordinate
- 14) The preparatory function used for circular clockwise interpolation function is _____.
a) G03 b) G02
c) G04 d) G01

Metallurgy (BTN02503)

Day & Date: Wednesday, 15-05-2024
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No. 3 (starting page of the Answer Book).
 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 3) Figures to the right indicates full marks.
 4) Make suitable assumptions, if required and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

- Q.1 A) Choose the correct answer:** **14**
- 1) Eutectic means complete solubility in _____. **01**
 - a) Liquid state
 - b) Solid state
 - c) Liquid & solid state
 - d) Neither liquid nor solid
 - 2) Isomorphous means complete solubility in _____. **01**
 - a) Liquid state
 - b) Solid state
 - c) Liquid & solid state
 - d) Neither liquid nor solid state
 - 3) Which of the following steel cannot be hardened by heat treatment? **01**
 - a) Austenitic stainless steel
 - b) Ferritic stainless steel
 - c) Maraging Steel
 - d) HCHC Steel
 - 4) Which of the following steel is oil hardened? **01**
 - a) Austenitic stainless steel
 - b) HCHC Steel
 - c) High Carbon Steel
 - d) HSLA Steel
 - 5) Which of the following alloy is precipitation hardened? **01**
 - a) Brass
 - b) Tin bronze
 - c) Duralumin
 - d) Aluminum bronze
 - 6) Which of the following alloy is given modification treatment? **01**
 - a) Al-Cu alloy
 - b) Cu-Sn alloy
 - c) Al-Si alloy
 - d) Cu-Al alloy

MECHANICAL ENGINEERING
Metallurgy (BTN02503)

Day & Date: Wednesday, 15-05-2024
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

- Instructions:** 1) Solve any two questions from each section.
 2) Figures to right indicate full marks.
 3) Make suitable assumptions, if required and state them dearly.

Section – I

- Q.2** a) Explain classification of metallic materials. **04**
 b) Compare the following: **04**
 - Interstitial & substitutional solid solution
 c) Draw Fe-Fe₃C diagram. Label all the phases / constituents and temperatures correctly. **06**
- Q.3** a) Write short note on stainless steel. **04**
 b) Draw the neat sketch for SG iron & Grey cast iron. (Microstructure) **04**
 c) Give the composition, properties & application of following. (Any Three) **06**
 i) S.G. iron
 ii) OHNS
 iii) HCHC steel
 iv) 18-4-1 tool steel
- Q.4** a) Compare between steel & cast iron. **04**
 b) Compare between Eutectic transformation & eutectoid transformation. **04**
 c) Compare between Brasses & Bronzes with at least two examples. **06**

Section – II

- Q.5** a) Write short notes on following: **04**
 i) Nano materials
 ii) Composite materials
 b) Draw neat sketch for following: **06**
 - Effect of modification on Al-Si system
 c) Explain the following terms: **04**
 - Austempering & martempering
- Q.6** a) What is the heat treatment? State objectives of hardening & types of hardening. **06**
 b) Draw TTT diagram for eutectoid steel & label all phases and temperature. **04**
 c) Compare between: **04**
 - Annealing Vs. Normalising

- Q.7**
- a) What is tempering explain in brief types of tempering. **04**
 - b) Draw flow chart for manufacture of sintered friction materials by P/M. **04**
 - c) Explain with neat sketch at least two methods of powder manufacturing. **06**
- Q.8**
- a) Draw creep curve & explain various stages in brief. **06**
 - b) Write short note on X-ray radiography test. **04**
 - c) Compare between Brinell hardness test & Rockwell hardness test. **04**

 - c) High Carbon Steel
 - d) HSLA Steel
 - 6) Which of the following alloy is precipitation hardened? **01**
 - a) Brass
 - b) Tin bronze
 - c) Duralumin
 - d) Aluminum bronze

B) MCQ with more than one answer correct.

- 1) Which of the following NDT methods are useful in detecting cracks on the surface of component? **02**
- a) Ultrasonic test b) Magnetic Particle Test
c) Radiography d) Dye Penetrant Test
- 2) To Transform retained austenite to martensite which of the following treatment is employed? **02**
- a) Tempering b) Heating below A one line
c) Secondary Hardening d) Subzero Treatment
- 3) During manufacturing of self-lubricated bearing, which of the following is the important step? **02**
- a) Blending b) Heat Treatment
c) Inspection d) Impregnation
- 4) Magnetic particle test can be done on _____. **02**
- a) Cast Iron b) Duralumin
c) Bronze d) Plain carbon steel

T. Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING
Industrial Engineering (BTN02504)

Day & Date: Thursday, 16-05-2024
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct answer:

14

- 1) Critical examination is carried out through _____.
 a) Cumulative stop watch b) Questioning process
 c) Travel chart d) Work sampling technique
- 2) ILO stands for _____.
 a) Indian Labour Organisation
 b) Indian Legislative Organisation
 c) International Labour Organisation
 d) None of the above
- 3) Personal allowance for male worker is _____.
 a) 4% b) 6%
 c) 5% d) 8%
- 4) A good plant layout _____.
 a) Gives workers safety
 b) Gives time and distance
 c) Streamline the flow of material
 d) Integrates men, material and machines
- 5) Productivity can be increased _____.
 a) When production increased without increase in input
 b) The same production with increase in input
 c) Production decreased without increase in input
 d) The rate of increase in output is more compared to rate of increase in input
- 6) Performance rating of an average qualified worker is _____.
 a) 50 b) 200
 c) 100 d) 150
- 7) Factors affecting the working condition _____.
 a) Plant lighting & ventilation elements
 b) Material handling equipment
 c) String diagram
 d) Process chart

T. Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING
Industrial Engineering (BTN02504)

Day & Date: Thursday, 16-05-2024
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

- Instructions:** 1) Solve any two questions from each section.
 2) Use of calculator is allowed.
 3) Figures to right indicate full marks.
 4) Assume additional suitable data, if necessary and mention it clearly.

Section – I

- Q.2** a) What are the types of charts used in method study? Explain any one chart with suitable example. **07**
 b) Explain Critical Examination steps in Method Study. **07**
- Q.3** a) Explain Design of Workplace with neat sketch. **07**
 b) What is meant by Accident? Explain in brief about Prevention of accident. **07**
- Q.4** a) Define Work Study and Explain steps in work study. **07**
 b) Explain in brief contribution of Taylor's and Gilbreth in development of industrial engineering. **07**

Section – II

- Q.5** a) Explain various factors affecting on site selection. **07**
 b) Define Plant Layout. What are the types of Plant layout? Explain any two with neat sketch. **07**
- Q.6** a) What is job evolution? Explain any two methods of job evaluation. **07**
 b) What are the objectives of merit rating? Explain any two methods of merit rating. **07**
- Q.7** a) The observed time and performance rating of a time study is given below **07**

Elements	1	2	3	4	5
Observed time (min.)	0.2	0.08	0.6	0.12	0.10
Performance rating	80	85	95	80	85

Assume: Relaxation allowance - 15%
 Contingency allowance - 7%
 Interference allowance - 5%

Calculate Standard Time

- b) What is allowance? What are the various types of allowance? Explain in brief. **07**

Seat No.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct answer:

14

- 1) Ergonomics deals with _____.
 a) Anthropometry
 b) Time measurement
 c) Aesthetic design
 d) None of the above
- 2) Process layout is suitable for _____.
 a) Job production
 b) Mass production
 c) Batch production
 d) Continuous
- 3) Gilbreth contributed to _____.
 a) Motion study
 b) Time study
 c) Project study
 d) Value engg.
- 4) Observed time is 5 min. and performance rating is 120. The normal time is _____.
 a) 0.6 min
 b) 1.2 min
 c) 6.0 min
 d) 12 min
- 5) Critical examination is carried out through _____.
 a) Cumulative stop watch
 b) Questioning process
 c) Travel chart
 d) Work sampling technique
- 6) ILO stands for _____.
 a) Indian Labour Organisation
 b) Indian Legislative Organisation
 c) International Labour Organisation
 d) None of the above

Q.1 Choose the correct answer:

14

- 1) Performance rating of an average qualified worker is _____.
 - a) 50
 - b) 200
 - c) 100
 - d) 150
- 2) Factors affecting the working condition _____.
 - a) Plant lighting & ventilation elements
 - b) Material handling equipment
 - c) String diagram
 - d) Process chart
- 3) Fixed position layout is also known as _____.
 - a) Synthetic layout
 - b) Static product layout
 - c) Analytical layout
 - d) None of above
- 4) Operation process chart is useful _____.
 - a) To study work station layout
 - b) To avoid waiting time and unnecessary
 - c) To reduce idle time of man and machine
 - d) To fix up the sequence of operation
- 5) Merit rating is the method of determining worth of _____.
 - a) A job
 - b) Machine
 - c) A particular division in workshop
 - d) An individual employee
- 6) Ergonomics deals with _____.
 - a) Anthropometry
 - b) Time measurement
 - c) Aesthetic design
 - d) None of the above
- 7) Process layout is suitable for _____.
 - a) Job production

 4) Assume suitable data if necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the given options.

14

- 1) Gas turbines are classified based on:

a) Fuel type	b) Power output
c) Compression ratio	d) All of the above
- 2) When comparing gas turbines to steam turbines, which statement is true?
 - a) Gas turbines have higher efficiency
 - b) Gas turbines have lower power-to-weight ratios
 - c) Gas turbines are less expensive to operate
 - d) Gas turbines require more maintenance
- 3) What is the Brayton cycle?
 - a) A thermodynamic cycle used in refrigeration systems
 - b) A thermodynamic cycle used in gas turbine engines
 - c) A thermodynamic cycle used in steam turbines
 - d) A thermodynamic cycle used in diesel engines
- 4) Which parameter has the most significant impact on the performance of the gas turbine cycle?

a) Pressure ratio	b) Turbine inlet temperature
c) Compressor efficiency	d) Cooling effectiveness
- 5) What is the purpose of intercooling in the gas turbine cycle?
 - a) To increase compressor efficiency
 - b) To decrease compressor work input
 - c) To decrease turbine inlet temperature
 - d) To increase turbine work output
- 6) Flow through a convergent-divergent nozzle is used for:
 - a) Subsonic flow only
 - b) Supersonic flow only
 - c) Both subsonic and supersonic flow
 - d) Flow with constant velocity

- 7) What are total or stagnation properties in fluid dynamics?
- Properties of the fluid at a point where the velocity is zero
 - Properties of the fluid at a point where the pressure is zero
 - Properties of the fluid at a point where the temperature is zero
 - Properties of the fluid at a point where the velocity is equal to the speed of sound
- 8) How does a centrifugal compressor work?
- By increasing the pressure of the fluid using centrifugal force
 - By reducing the pressure of the fluid using centrifugal force
 - By compressing the fluid using axial flow
 - By compressing the fluid using reciprocating motion
- 9) What does the slip factor represent in centrifugal compressors?
- Efficiency of the compressor
 - Ratio of actual velocity to theoretical velocity
 - Ratio of pressure rise to temperature rise
 - Ratio of impeller width to blade angle
- 10) What components are typically found in an axial flow compressor?
- Impeller and diffuser
 - Rotor and stator
 - Inlet and outlet pipes
 - Turbine and combustion chamber
- 11) What relation between blade angles is required for a 50% degree of reaction in an axial flow compressor?
- $\beta_1 = \beta_2$
 - $\beta_1 + \beta_2 = 50^\circ$
 - $\beta_1 = 2\beta_2$
 - $\beta_1 - \beta_2 = 50^\circ$
- 12) What is the key difference between axial flow compressors and centrifugal compressors?
- Axial compressors have a higher pressure ratio
 - Axial compressors have a higher efficiency
 - Axial compressors have a straight flow path
 - Axial compressors have a radial flow path
- 13) What are the requirements for materials used in gas turbines?
- High thermal conductivity and low strength
 - Low thermal conductivity and high strength
 - High thermal conductivity and high strength
 - Low thermal conductivity and low strength
- 14) What types of combustion chambers are commonly used in gas turbines?
- Open and closed
 - Annular and can-annular
 - Cylindrical and spherical
 - Vertical and horizontal

T.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING
GAS TURBINES (BTN02514)

Day & Date: Friday, 17-05-2024
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
 2) Figures to the right indicates full marks.
 3) Assume suitable data if necessary and mention it clearly.
 4) Use of a calculator is allowed.

Section – I

Q.2 Attempt any two questions. 14

- Explain the classification of gas turbines.
- Derive the expression for the thermal efficiency of the Brayton cycle.
- Explore methods of improving the thermal efficiency and specific work output of gas turbine cycle.
- Air enters a diffuser shown in Fig. with a velocity of 200 m/s. Determine (a) the speed of sound and (b) the Mach number at the diffuser inlet when the air temperature is 30°C

Q.3 Attempt any two questions 14

- Analyze the differences between gas turbines and steam turbines.
- Air at temperature of 15°C enters a gas turbine plant working at pressure ratio of 15. Turbine inlet temperature is 1250°C. Polytropic efficiency (i.e. small stage efficiency) of compressor and turbine is 0.91. Assume $c_p = 1.005$ and 1.128 for air and gases respectively and calorific value of fuel used = 42000 kJ/kg of fuel, Calculate: (a) overall efficiency (b) specific output (c) fuel to air ratio and (d) specific fuel consumption.
- Explain the fundamental concepts such as the velocity of sound, Mach number, and Mach angle.
- Investigate the behavior of isentropic flow in a passage of variable cross-sectional area.

Section – II

- Q.4 Attempt any two questions.** **14**
- a) Provide a detailed overview of the combustion process in gas turbines.
 - b) Describe the construction and working of a centrifugal compressor.
 - c) Draw and label a velocity diagram for a centrifugal compressor. Derive equation to calculate Euler's Work.
 - d) Find the polytropic efficiency of an axial flow compressor from the following data:
The total head pressure ratio = 4
Overall total head isentropic efficiency = 85%
Total head inlet temperature = 290K
The inlet and outlet air angles from the rotor blades of the above compressor are 10° and 45° respectively. The rotor and stator blades are symmetrical. The mean blade speed and axial velocity remain constant throughout the compressor. Assuming a value of 220 m/s for blade speed and the work done factor as 0.86, find the number of stages required.
- Q.5 Attempt any two questions** **14**
- a) Explore the different types of combustion chambers used in gas turbines.
 - b) Discuss the working principle of axial flow compressor with the help of T- S representation.
 - c) A centrifugal compressor has a pressure ratio of 4:1 with an isentropic efficiency of 80% when running at 15000 rpm and inducing air at 293 K. Curved vanes at inlet give the air a prewhirl of 25° to the axial direction at all radii and the mean dia. of eye is 250 mm. The absolute air velocity at inlet is 150 m/s. Impeller tip dia. is 600 mm. Calculate the slip factor.
 - d) Give a comparison between centrifugal and axial flow compressor.

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no. 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.
 4) Assume suitable data if necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the given options.

14

- 1) What relation between blade angles is required for a 50% degree of reaction in an axial flow compressor?

a) $\beta_1 = \beta_2$	b) $\beta_1 + \beta_2 = 50^\circ$
c) $\beta_1 = 2\beta_2$	d) $\beta_1 - \beta_2 = 50^\circ$
- 2) What is the key difference between axial flow compressors and centrifugal compressors?
 - a) Axial compressors have a higher pressure ratio
 - b) Axial compressors have a higher efficiency
 - c) Axial compressors have a straight flow path
 - d) Axial compressors have a radial flow path
- 3) What are the requirements for materials used in gas turbines?
 - a) High thermal conductivity and low strength
 - b) Low thermal conductivity and high strength
 - c) High thermal conductivity and high strength
 - d) Low thermal conductivity and low strength
- 4) What types of combustion chambers are commonly used in gas turbines?

a) Open and closed	b) Annular and can-annular
c) Cylindrical and spherical	d) Vertical and horizontal
- 5) Gas turbines are classified based on:

a) Fuel type	b) Power output
c) Compression ratio	d) All of the above
- 6) When comparing gas turbines to steam turbines, which statement is true?
 - a) Gas turbines have higher efficiency
 - b) Gas turbines have lower power-to-weight ratios
 - c) Gas turbines are less expensive to operate
 - d) Gas turbines require more maintenance

- 7) What is the Brayton cycle?
- A thermodynamic cycle used in refrigeration systems
 - A thermodynamic cycle used in gas turbine engines
 - A thermodynamic cycle used in steam turbines
 - A thermodynamic cycle used in diesel engines
- 8) Which parameter has the most significant impact on the performance of the gas turbine cycle?
- Pressure ratio
 - Turbine inlet temperature
 - Compressor efficiency
 - Cooling effectiveness
- 9) What is the purpose of intercooling in the gas turbine cycle?
- To increase compressor efficiency
 - To decrease compressor work input
 - To decrease turbine inlet temperature
 - To increase turbine work output
- 10) Flow through a convergent-divergent nozzle is used for:
- Subsonic flow only
 - Supersonic flow only
 - Both subsonic and supersonic flow
 - Flow with constant velocity
- 11) What are total or stagnation properties in fluid dynamics?
- Properties of the fluid at a point where the velocity is zero
 - Properties of the fluid at a point where the pressure is zero
 - Properties of the fluid at a point where the temperature is zero
 - Properties of the fluid at a point where the velocity is equal to the speed of sound
- 12) How does a centrifugal compressor work?
- By increasing the pressure of the fluid using centrifugal force
 - By reducing the pressure of the fluid using centrifugal force
 - By compressing the fluid using axial flow
 - By compressing the fluid using reciprocating motion
- 13) What does the slip factor represent in centrifugal compressors?
- Efficiency of the compressor
 - Ratio of actual velocity to theoretical velocity
 - Ratio of pressure rise to temperature rise
 - Ratio of impeller width to blade angle
- 14) What components are typically found in an axial flow compressor?
- Impeller and diffuser
 - Rotor and stator
 - Inlet and outlet pipes
 - Turbine and combustion chamber

T.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING
GAS TURBINES (BTN02514)

Day & Date: Friday, 17-05-2024
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
 2) Figures to the right indicates full marks.
 3) Assume suitable data if necessary and mention it clearly.
 4) Use of a calculator is allowed.

Section – I

Q.2 Attempt any two questions. 14

- Explain the classification of gas turbines.
- Derive the expression for the thermal efficiency of the Brayton cycle.
- Explore methods of improving the thermal efficiency and specific work output of gas turbine cycle.
- Air enters a diffuser shown in Fig. with a velocity of 200 m/s. Determine (a) the speed of sound and (b) the Mach number at the diffuser inlet when the air temperature is 30°C

Q.3 Attempt any two questions 14

- Analyze the differences between gas turbines and steam turbines.
- Air at temperature of 15°C enters a gas turbine plant working at pressure ratio of 15. Turbine inlet temperature is 1250°C. Polytropic efficiency (i.e. small stage efficiency) of compressor and turbine is 0.91. Assume $c_p = 1.005$ and 1.128 for air and gases respectively and calorific value of fuel used = 42000 kJ/kg of fuel, Calculate: (a) overall efficiency (b) specific output (c) fuel to air ratio and (d) specific fuel consumption.
- Explain the fundamental concepts such as the velocity of sound, Mach number, and Mach angle.
- Investigate the behavior of isentropic flow in a passage of variable cross-sectional area.

Section – II

- Q.4 Attempt any two questions.** **14**
- a) Provide a detailed overview of the combustion process in gas turbines.
 - b) Describe the construction and working of a centrifugal compressor.
 - c) Draw and label a velocity diagram for a centrifugal compressor. Derive equation to calculate Euler's Work.
 - d) Find the polytropic efficiency of an axial flow compressor from the following data:
The total head pressure ratio = 4
Overall total head isentropic efficiency = 85%
Total head inlet temperature = 290K
The inlet and outlet air angles from the rotor blades of the above compressor are 10° and 45° respectively. The rotor and stator blades are symmetrical. The mean blade speed and axial velocity remain constant throughout the compressor. Assuming a value of 220 m/s for blade speed and the work done factor as 0.86, find the number of stages required.
- Q.5 Attempt any two questions** **14**
- a) Explore the different types of combustion chambers used in gas turbines.
 - b) Discuss the working principle of axial flow compressor with the help of T- S representation.
 - c) A centrifugal compressor has a pressure ratio of 4:1 with an isentropic efficiency of 80% when running at 15000 rpm and inducing air at 293 K. Curved vanes at inlet give the air a prewhirl of 25° to the axial direction at all radii and the mean dia. of eye is 250 mm. The absolute air velocity at inlet is 150 m/s. Impeller tip dia. is 600 mm. Calculate the slip factor.
 - d) Give a comparison between centrifugal and axial flow compressor.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 A) Attempt the following single correct answer type questions. (Each question carries one mark) 06

- 1) Elements in press tool which strip out material _____.
 - a) Die
 - b) Punch
 - c) Stripper
 - d) Back Plate
- 2) In metal cutting operation, minimum heat is generated in _____.
 - a) the shear zone
 - b) the chip-tool interface zone
 - c) the tool-work interface zone
 - d) none of the above
- 3) Tool signature consists of seven elements of geometry.
 - a) True
 - b) False
- 4) Break - even analysis it is necessary for deciding _____.
 - a) Profit and loss
 - b) Economic Order
 - c) Inventory carry cost
 - d) All the above
- 5) For blanking operation clearance is not provided on _____.
 - a) Die
 - b) Punch
 - c) Die & Punch
 - d) None of the above
- 6) A device, in which a component is held and located for tapping operation and bushes are integrated that guide the tool, is called as _____.
 - a) Jig
 - b) Fixture
 - c) both a and b
 - d) none of the above

B) Attempt the following multiple choice correct answer type questions. 08
(Each question carries two marks)

- 7) In metal cutting while drawing merchant circle number of assumptions as follows _____.
- a) The cutting velocity remains constant
 - b) Continuous chip without built up edge
 - c) No constant cutting velocity
 - d) Continuous chip with built up edge
- 8) In jig or fixture pin locater is used for _____.
- a) Clamping round job
 - b) Locate the flat job
 - c) Locating round job
 - d) No use of pin locater
- 9) In press tool the main purpose of stripper _____.
- a) to guide punch
 - b) to guide strip
 - c) to strip out the material
 - d) to hold the punch
- 10) In Jig or fixture diamond pin locater is used when _____.
- a) There is two already machined parallel holes in work piece
 - b) Two or more than two parallel holes in work piece
 - c) One hole is already machined in work piece
 - d) No hole is exist in the work piece

Set **P**

T. Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING
Tool Engineering (BTN02515)

Day & Date: Friday, 17-05-2024
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

- Instructions:** 1) Question no. 2 is compulsory in section I, and solve any two questions from the remaining. (Q. No. 3, 4 & 5)
 2) Question no. 6 is compulsory in section II, and solve any two questions from the remaining. (Q. No. 7, 8 & 9)
 3) Figures to the right indicate full marks.

Section – I

- Q.2 a)** Design a press tool for the component shown in Fig-I giving following details. **14**
- Cutting force
 - Clearance between punch and die
 - Stripping force and no of bolts and bolt size need for die clamping
 - Strip layout and % material utilization

Material: - M.S.
 Thickness = 6mm
 Shear strength = 46 kg/ mm²

Fig - I

Also draw one sectional view of assembly of press tool and part name.

OR

- b)** Design a draw tool for given component Fig-II also calculate the following **14**
 (draw one sectional view of assembly)
- Blank size
 - No of draws
 - draw ratio
 - drawing force
 - Blank force
 - die and punch clearance

Material - M.S.
 Material Thickness - 0.2
 Yield strength = 40 kg/ mm²

Fig - II

- Q.3 a)** The following observations were made during on orthogonal cutting operation. **04**
 i) rake angle - 15°
 ii) shear angle - 30°
 iii) cutting force - 300N
 iv) feed force - 120N
 v) cutting velocity = 100 m/min
 Determine
 i) shear strain
 ii) work done in shear
- b)** Sketch and explain in brief about types of chips in metal cutting. **03**
- Q.4 a)** While turning die 20 mm bar at 400 rpm. With H.S.S. tool a tool life of 9 min. when same bar was Turned at 250 rpm. What will be tool life at same speed? Where $n = 0.108$ **03**
- b)** Explain in brief difference between carbide and HSS tool material. **04**
- Q.5 Writes a short note on (Any Two)** **07**
 a) Bending die
 b) Merchant circle
 c) Draw tool and press tool

Section – II

- Q.6 a)** Design drill jig for drilling die 10-hole draw one view of sectional assembly with parts name. **14**

OR

- b)** Design milling fixture for milling 110×12 face draws one view of sectional assembly with parts name. **14**
- Q.7 a)** Explain in brief about EOQ. **04**
b) Explain in brief about geometry of single point cutting tool. **03**
- Q.8 a)** With neat sketch explain in brief about any two clamping devices used in jig or fixture. **04**
b) Explain with neat sketch extended and slip bush used in jig. **03**
- Q.9 Write short notes on (Any Two)** **07**
 a) Types of fixture & its application
 b) Effect of tool geometry on tool life
 c) Difference between jig and fixture

B) Attempt the following multiple choice correct answer type questions. 08
(Each question carries two marks)

- 7) In jig or fixture pin locater is used for _____.
a) Clamping round job b) Locate the flat job
c) Locating round job d) No use of pin locater
- 8) In press tool the main purpose of stripper _____.
a) to guide punch b) to guide strip
c) to strip out the material d) to hold the punch
- 9) In Jig or fixture diamond pin locater is used when _____.
a) There is two already machined parallel holes in work piece
b) Two or more than two parallel holes in work piece
c) One hole is already machined in work piece
d) No hole is exist in the work piece
- 10) In metal cutting while drawing merchant circle number of assumptions as follows _____.
a) The cutting velocity remains constant
b) Continuous chip without built up edge
c) No constant cutting velocity
d) Continuous chip with built up edge

 2) Question no. 6 is compulsory in section II, and solve any two questions from the remaining. (Q. No. 7, 8 & 9)
 3) Figures to the right indicate full marks.

Section – I

- Q.2 a)** Design a press tool for the component shown in Fig-I giving following details. **14**
- Cutting force
 - Clearance between punch and die
 - Stripping force and no of bolts and bolt size need for die clamping
 - Strip layout and % material utilization

Material: - M.S.
 Thickness = 6mm
 Shear strength = 46 kg/ mm²

Fig - I

Also draw one sectional view of assembly of press tool and part name.

OR

- b)** Design a draw tool for given component Fig-II also calculate the following **14**
 (draw one sectional view of assembly)
- Blank size
 - No of draws
 - draw ratio
 - drawing force
 - Blank force
 - die and punch clearance

Material - M.S.
 Material Thickness - 0.2
 Yield strength = 40 kg/ mm²

Fig - II

- Q.3** a) The following observations were made during on orthogonal cutting operation. **04**
 i) rake angle - 15°
 ii) shear angle - 30°
 iii) cutting force - 300N
 iv) feed force - 120N
 v) cutting velocity = 100 m/min
 Determine
 i) shear strain
 ii) work done in shear
- b) Sketch and explain in brief about types of chips in metal cutting. **03**
- Q.4** a) While turning die 20 mm bar at 400 rpm. With H.S.S. tool a tool life of 9 min. when same bar was Turned at 250 rpm. What will be tool life at same speed? Where $n = 0.108$ **03**
- b) Explain in brief difference between carbide and HSS tool material. **04**
- Q.5** Writes a short note on (Any Two) **07**
 a) Bending die
 b) Merchant circle
 c) Draw tool and press tool

Section – II

- Q.6** a) Design drill jig for drilling die 10-hole draw one view of sectional assembly with parts name. **14**

OR

- b) Design milling fixture for milling 110×12 face draws one view of sectional assembly with parts name. **14**
- Q.7** a) Explain in brief about EOQ. **04**
 b) Explain in brief about geometry of single point cutting tool. **03**
- Q.8** a) With neat sketch explain in brief about any two clamping devices used in jig or fixture. **04**
 b) Explain with neat sketch extended and slip bush used in jig. **03**
- Q.9** Write short notes on (Any Two) **07**
 a) Types of fixture & its application
 b) Effect of tool geometry on tool life
 c) Difference between jig and fixture

B) Attempt the following multiple choice correct answer type questions. 08

(Each question carries two marks)

- 7) In press tool the main purpose of stripper _____.
- a) to guide punch
 - b) to guide strip
 - c) to strip out the material
 - d) to hold the punch
- 8) In Jig or fixture diamond pin locator is used when _____.
- a) There is two already machined parallel holes in work piece
 - b) Two or more than two parallel holes in work piece
 - c) One hole is already machined in work piece
 - d) No hole is exist in the work piece
- 9) In metal cutting while drawing merchant circle number of assumptions as follows _____.
- a) The cutting velocity remains constant
 - b) Continuous chip without built up edge
 - c) No constant cutting velocity
 - d) Continuous chip with built up edge
- 10) In jig or fixture pin locator is used for _____.

Tool Engineering (BTN02515)

Day & Date: Friday, 17-05-2024
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

- Instructions:** 1) Question no. 2 is compulsory in section I, and solve any two questions from the remaining. (Q. No. 3, 4 & 5)
 2) Question no. 6 is compulsory in section II, and solve any two questions from the remaining. (Q. No. 7, 8 & 9)
 3) Figures to the right indicate full marks.

Section – I

- Q.2 a)** Design a press tool for the component shown in Fig-I giving following details. **14**
- Cutting force
 - Clearance between punch and die
 - Stripping force and no of bolts and bolt size need for die clamping
 - Strip layout and % material utilization

Material: - M.S.
 Thickness = 6mm
 Shear strength = 46 kg/ mm²

Fig - I

Also draw one sectional view of assembly of press tool and part name.

OR

- b)** Design a draw tool for given component Fig-II also calculate the following **14**
 (draw one sectional view of assembly)
- Blank size
 - No of draws
 - draw ratio
 - drawing force
 - Blank force
 - die and punch clearance

Material - M.S.
 Material Thickness - 0.2
 Yield strength = 40 kg/ mm²

Fig - II

- Q.3 a)** The following observations were made during on orthogonal cutting operation. **04**
- i) rake angle - 15°
 - ii) shear angle - 30°
 - iii) cutting force - 300N
 - iv) feed force - 120N
 - v) cutting velocity = 100 m/min
- Determine
- i) shear strain
 - ii) work done in shear
- b)** Sketch and explain in brief about types of chips in metal cutting. **03**
- Q.4 a)** While turning die 20 mm bar at 400 rpm. With H.S.S. tool a tool life of 9 min. when same bar was Turned at 250 rpm. What will be tool life at same speed? Where $n = 0.108$ **03**
- b)** Explain in brief difference between carbide and HSS tool material. **04**
- Q.5 Writes a short note on (Any Two)** **07**
- a) Bending die
 - b) Merchant circle
 - c) Draw tool and press tool

Section – II

- Q.6 a)** Design drill jig for drilling die 10-hole draw one view of sectional assembly with parts name. **14**

OR

- b)** Design milling fixture for milling 110×12 face draws one view of sectional assembly with parts name. **14**
- Q.7 a)** Explain in brief about EOQ. **04**
- b)** Explain in brief about geometry of single point cutting tool. **03**
- Q.8 a)** With neat sketch explain in brief about any two clamping devices used in jig or fixture. **04**
- b)** Explain with neat sketch extended and slip bush used in jig. **03**
- Q.9 Write short notes on (Any Two)** **07**
- a) Types of fixture & its application
 - b) Effect of tool geometry on tool life
 - c) Difference between jig and fixture

Seat No.

T.Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING
Industrial Hydraulics & Pneumatics (BTN02516)

Day & Date: Friday, 17-05-2024
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.
- 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
- 3) Figures to the right indicates full marks.
- 4) Draw suitable diagrams wherever necessary.
- 5) Assume suitable data if required & state it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correction answer.

14

- 1) Seals are used to avoid _____ in a fluid system.
 - a) Internal leakage
 - b) External leakage
 - c) Both internal leakage & external leakage
 - d) None of the above

- 2) Velocity of the piston is more during _____.
 - a) Forward stroke
 - b) Backward stroke
 - c) Either forward or backward stroke
 - d) None of these

- 3) In case of spring loaded accumulator, the pressure of oil supplied by accumulator _____.

a) Remains constant	b) Varies
c) May remain constant or vary	d) None of the above

- 4) Pressure reducing valves are normally _____ type of pressure control valves.

a) Closed	b) Open
c) Both closed & open	d) None of these

- 5) If a direction control valve is represented as 4/2, the first number i.e. 4 indicates _____.
 - a) Functional openings or connections
 - b) Distinct positions of spool
 - c) Number of actuators
 - d) None of the above

- 6) Speed control circuit/s is/are _____.

a) Meter in circuit	b) Meter out circuit
c) Bleed off circuit	d) All of these

Seat No.	
-----------------	--

T.Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING
Industrial Hydraulics & Pneumatics (BTN02516)

Day & Date: Friday, 17-05-2024
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

- Instructions:** 1) Solve any two questions from each section.
 2) Figures to the right indicate full marks.
 3) Draw suitable diagrams wherever necessary.
 4) Assume suitable data if required & state it clearly.

Section – I

- | | | | |
|------------|-----------|----------------------------------------------------------------|-----------|
| Q.2 | a) | Enlist advantages & limitations of hydraulic systems. | 05 |
| | b) | Explain construction & working of gear pump. | 05 |
| | c) | Draw & explain a hydraulic circuit with intensifier. | 04 |
| | | | |
| Q.3 | a) | Explain different types of seals used in hydraulic system. | 05 |
| | b) | Explain construction & working of 4/2 Direction Control Valve. | 05 |
| | c) | Draw symbols of Sequence Valve & Double acting cylinder. | 04 |
| | | | |
| Q.4 | a) | Explain construction & working of pressure relief valve. | 05 |
| | b) | Explain meter in circuit with neat sketch. | 05 |
| | c) | Explain construction & working of weight loaded accumulator. | 04 |

Section – II

- | | | | |
|------------|-----------|--------------------------------------------------------------------------------|-----------|
| Q.5 | a) | Explain pneumatic braking system. | 05 |
| | b) | Explain construction & working of pressure regulator. | 05 |
| | c) | Explain construction & working of any 2 types of pneumatic cylinders. | 04 |
| | | | |
| Q.6 | a) | Explain different factors to be considered for selection of an air compressor. | 05 |
| | b) | Explain construction & working of Quick Exhaust Valve. | 05 |
| | c) | Write a note on pneumatic power tools. | 04 |
| | | | |
| Q.7 | a) | Explain construction & working of air filters. | 05 |
| | b) | Explain construction & working of 3/2 seat type direction control valve. | 05 |
| | c) | Draw symbols of Flow control valve & Air motor. | 04 |

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.
 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 3) Figures to the right indicates full marks.
 4) Draw suitable diagrams wherever necessary.
 5) Assume suitable data if required & state it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correction answer.

14

- 1) Centrifugal compressors deliver _____.
 a) high pressure air & discharge is low
 b) low pressure air & discharge is less
 c) low pressure air & discharge is high
 d) high pressure air & discharge is high
- 2) In 5/2 pneumatic direction control valve, _____ ports are used for release of air to atmosphere.
 a) 7
 b) 2
 c) 5
 d) 3
- 3) At inlet of air motor, air pressure is _____.
 a) Less
 b) More
 c) less or more
 d) none of these
- 4) In case of pneumatic cylinder, cushioning is _____.
 a) Needed
 b) not needed at all
 c) not possible due to air
 d) none of the given
- 5) The time-delay valve consists of _____.
 a) throttle valve (flow control valve)
 b) direction control valve
 c) air chamber/ reservoir
 d) all of these
- 6) Quick exhaust valve is used for _____.
 a) Single acting cylinder
 b) Double acting cylinder
 c) Single/Double acting cylinder
 d) None of these
- 7) For controlling speed of forward stroke of the piston of pneumatic cylinder, _____ should be preferred.
 a) meter in circuit
 b) meter out circuit
 c) time delay circuit
 d) None of these

- 8) Seals are used to avoid _____ in a fluid system.
- a) Internal leakage
 - b) External leakage
 - c) Both internal leakage & external leakage
 - d) None of the above
- 9) Velocity of the piston is more during _____.
- a) Forward stroke
 - b) Backward stroke
 - c) Either forward or backward stroke
 - d) None of these
- 10) In case of spring loaded accumulator, the pressure of oil supplied by accumulator _____.
- a) Remains constant
 - b) Varies
 - c) May remain constant or vary
 - d) None of the above
- 11) Pressure reducing valves are normally _____ type of pressure control valves.
- a) Closed
 - b) Open
 - c) Both closed & open
 - d) None of these
- 12) If a direction control valve is represented as 4/2, the first number i.e. 4 indicates _____.
- a) Functional openings or connections
 - b) Distinct positions of spool
 - c) Number of actuators
 - d) None of the above
- 13) Speed control circuit/s is/are _____.
- a) Meter in circuit
 - b) Meter out circuit
 - c) Bleed off circuit
 - d) All of these
- 14) For two linear actuators, if sequencing during only forward stroke is to be achieved, _____ sequence valve/s is/are needed.
- a) Two
 - b) Three
 - c) One
 - d) Four

Seat No.

MECHANICAL ENGINEERING
Industrial Hydraulics & Pneumatics (BTN02516)

Day & Date: Friday, 17-05-2024
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

- Instructions:** 1) Solve any two questions from each section.
 2) Figures to the right indicate full marks.
 3) Draw suitable diagrams wherever necessary.
 4) Assume suitable data if required & state it clearly.

Section – I

- | | | | |
|------------|----|----------------------------------------------------------------|-----------|
| Q.2 | a) | Enlist advantages & limitations of hydraulic systems. | 05 |
| | b) | Explain construction & working of gear pump. | 05 |
| | c) | Draw & explain a hydraulic circuit with intensifier. | 04 |
| | | | |
| Q.3 | a) | Explain different types of seals used in hydraulic system. | 05 |
| | b) | Explain construction & working of 4/2 Direction Control Valve. | 05 |
| | c) | Draw symbols of Sequence Valve & Double acting cylinder. | 04 |
| | | | |
| Q.4 | a) | Explain construction & working of pressure relief valve. | 05 |
| | b) | Explain meter in circuit with neat sketch. | 05 |
| | c) | Explain construction & working of weight loaded accumulator. | 04 |

Section – II

- | | | | |
|------------|----|--------------------------------------------------------------------------------|-----------|
| Q.5 | a) | Explain pneumatic braking system. | 05 |
| | b) | Explain construction & working of pressure regulator. | 05 |
| | c) | Explain construction & working of any 2 types of pneumatic cylinders. | 04 |
| | | | |
| Q.6 | a) | Explain different factors to be considered for selection of an air compressor. | 05 |
| | b) | Explain construction & working of Quick Exhaust Valve. | 05 |
| | c) | Write a note on pneumatic power tools. | 04 |
| | | | |
| Q.7 | a) | Explain construction & working of air filters. | 05 |
| | b) | Explain construction & working of 3/2 seat type direction control valve. | 05 |
| | c) | Draw symbols of Flow control valve & Air motor. | 04 |

- 7) In case of spring loaded accumulator, the pressure of oil supplied by accumulator _____.
a) Remains constant b) Varies
c) May remain constant or vary d) None of the above
- 8) Pressure reducing valves are normally _____ type of pressure control valves.
a) Closed b) Open
c) Both closed & open d) None of these
- 9) If a direction control valve is represented as 4/2, the first number i.e. 4 indicates _____.
a) Functional openings or connections
b) Distinct positions of spool
c) Number of actuators
d) None of the above
- 10) Speed control circuit/s is/are _____.
a) Meter in circuit b) Meter out circuit
c) Bleed off circuit d) All of these
- 11) For two linear actuators, if sequencing during only forward stroke is to be achieved, _____ sequence valve/s is/are needed.
a) Two b) Three
c) One d) Four
- 12) Centrifugal compressors deliver _____.
a) high pressure air & discharge is low
b) low pressure air & discharge is less
c) low pressure air & discharge is high
d) high pressure air & discharge is high
- 13) In 5/2 pneumatic direction control valve, _____ ports are used for release of air to atmosphere.
a) 7 b) 2
c) 5 d) 3
- 14) At inlet of air motor, air pressure is _____.
a) Less b) More
c) less or more d) none of these

T. Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING
Machine Vision (BTN02518)

Day & Date: Saturday, 18-05-2024
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No. 3 (starting page of the Answer Book). Each question carry one mark.
 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 3) Figures to the right indicates full marks.
 4) Use of non-programmable scientific calculator is allowed.
 5) Assume suitable data if necessary

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Select the correct alternative.

14

- 1) An image which contains about 256 different intensity levels between black and white is a _____ image.
 - a) Color
 - b) Binary
 - c) Grayscale
 - d) Monochrome
- 2) The two most commonly used image sensors in modern cameras are _____.
 - a) CCD and CDI
 - b) CCD and CMOS
 - c) CMOS and CDI
 - d) RGB and HSV
- 3) Zero crossing of gradient represents location of corner in an image.
 - a) True
 - b) False
- 4) Silhouette is obtained with back light source.
 - a) True
 - b) False
- 5) Which of the following operation involves plotting an image histogram?
 - a) Corner detection
 - b) Thresholding
 - c) Region growing
 - d) None of the above
- 6) The process in which small part of image is compared with large image and located in large image, is called _____.
 - a) pattern recognition
 - b) template matching
 - c) region growing
 - d) split and merge technique
- 7) If path traced by end effector of robot arm is complex and continuous, then robot programming should be done by following approach _____.
 - a) manual leadthrough
 - b) powered leadthrough
 - c) textual programming method
 - d) none of the above

- 8) In the context of camera, the term CMOS stands for _____.
a) Camera Multiple Operating System
b) Complementary Metal Oxide Semiconductor
c) Closed Circuit Operating System
d) None of the above
- 9) Charge to voltage converter for Individual pixel is employed in _____.
a) CCD camera
b) CMOS camera
c) Vidicon Camera
d) None of the above
- 10) Bin picking application of robot involves _____.
a) Identification and Servoing
b) Identification and inspection
c) Inspection and Servoing
d) None of the above
- 11) Seam tracking in continuous arc welding is an example of _____.
a) Visual servoing and navigation
b) Inspection
c) Identification
d) Inspection and identification
- 12) The application in which the purpose of machine vision system is to recognize and classify an object is called _____.
a) Inspection
b) Identification
c) Visual servoing and navigation
d) None of the above
- 13) The process of _____ is a technique which relates the location of pixels in the image array to the points in the scene.
a) Camera calibration
b) Camera orientation
c) Camera adaptation
d) Camera adjustment
- 14) The acronym AGV stands for _____.
a) Automatic Guided Vehicle
b) Automated Guided Vehicle
c) Automated Gliding Vehicle
d) Automatic Gliding Vehicle

T. Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING
Machine Vision (BTN02518)

Day & Date: Saturday, 18-05-2024
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

Instructions: 1) Answer any two questions from each Section - I and Section - II.
 2) Figures to right indicate full marks.
 3) Assume suitable data if necessary and mention it clearly.

Section – I

- Q.2** a) With block diagram of Machine Vision system, state the objective of machine vision system. **07**
 b) Explain with neat sketch successive approximation type AD converter. **07**
- Q.3** a) Define an edge in an image and explain the process of edge detection. **07**
 b) Discuss in detail image thresholding. **07**
- Q.4** a) Determine the area, minimum aspect ratio, the diameter, perimeter, centroid and thinness measures of the image. **10**

- b) Why do we need image processing? Explain. **04**

Section – II

- Q.5** a) Explain the working of Moravec corner detector. **07**
 b) Draw neat sketch of CCD image sensor and explain its working. **07**
- Q.6** a) Discuss in detail about split and merge technique and region growing approach of segmentation. **08**
 b) Explain in brief manual leadthrough and powered leadthrough robot programming methods. **06**
- Q.7** Write a short note on (any three) **14**
 a) Inspection application of machine vision in robotics
 b) Visual servoing and navigation application of machine vision in robotics
 c) Template matching
 d) Sampling and quantization

T. Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING
Machine Vision (BTN02518)

Day & Date: Saturday, 18-05-2024
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

Instructions: 1) Answer any two questions from each Section - I and Section - II.
 2) Figures to right indicate full marks.
 3) Assume suitable data if necessary and mention it clearly.

Section – I

- Q.2** a) With block diagram of Machine Vision system, state the objective of machine vision system. **07**
 b) Explain with neat sketch successive approximation type AD converter. **07**
- Q.3** a) Define an edge in an image and explain the process of edge detection. **07**
 b) Discuss in detail image thresholding. **07**
- Q.4** a) Determine the area, minimum aspect ratio, the diameter, perimeter, centroid and thinness measures of the image. **10**

- b) Why do we need image processing? Explain. **04**

Section – II

- Q.5** a) Explain the working of Moravec corner detector. **07**
 b) Draw neat sketch of CCD image sensor and explain its working. **07**
- Q.6** a) Discuss in detail about split and merge technique and region growing approach of segmentation. **08**
 b) Explain in brief manual leadthrough and powered leadthrough robot programming methods. **06**
- Q.7** Write a short note on (any three) **14**
 a) Inspection application of machine vision in robotics
 b) Visual servoing and navigation application of machine vision in robotics
 c) Template matching
 d) Sampling and quantization

T. Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING
Machine Vision (BTN02518)

Day & Date: Saturday, 18-05-2024
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No. 3 (starting page of the Answer Book). Each question carry one mark.
 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 3) Figures to the right indicates full marks.
 4) Use of non-programmable scientific calculator is allowed.
 5) Assume suitable data if necessary

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Select the correct alternative.

14

- 1) Seam tracking in continuous arc welding is an example of _____.
 a) Visual servoing and navigation b) Inspection
 c) Identification d) Inspection and identification
- 2) The application in which the purpose of machine vision system is to recognize and classify an object is called _____.
 a) Inspection b) Identification
 c) Visual servoing and navigation d) None of the above
- 3) The process of _____ is a technique which relates the location of pixels in the image array to the points in the scene.
 a) Camera calibration b) Camera orientation
 c) Camera adaptation d) Camera adjustment
- 4) The acronym AGV stands for _____.
 a) Automatic Guided Vehicle b) Automated Guided Vehicle
 c) Automated Gliding Vehicle d) Automatic Gliding Vehicle
- 5) An image which contains about 256 different intensity levels between black and white is a _____ image.
 a) Color b) Binary
 c) Grayscale d) Monochrome
- 6) The two most commonly used image sensors in modern cameras are _____.
 a) CCD and CDI b) CCD and CMOS
 c) CMOS and CDI d) RGB and HSV
- 7) Zero crossing of gradient represents location of corner in an image.
 a) True b) False
- 8) Silhouette is obtained with back light source.
 a) True b) False

- 9) Which of the following operation involves plotting an image histogram?
a) Corner detection b) Thresholding
c) Region growing d) None of the above
- 10) The process in which small part of image is compared with large image and located in large image, is called _____.
a) pattern recognition b) template matching
c) region growing d) split and merge technique
- 11) If path traced by end effector of robot arm is complex and continuous, then robot programming should be done by following approach _____.
a) manual leadthrough b) powered leadthrough
c) textual programming method d) none of the above
- 12) In the context of camera, the term CMOS stands for _____.
a) Camera Multiple Operating System
b) Complementary Metal Oxide Semiconductor
c) Closed Circuit Operating System
d) None of the above
- 13) Charge to voltage converter for Individual pixel is employed in _____.
a) CCD camera b) CMOS camera
c) Vidicon Camera d) None of the above
- 14) Bin picking application of robot involves _____.
a) Identification and Servoing b) Identification and inspection
c) Inspection and Servoing d) None of the above

T. Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING
Machine Vision (BTN02518)

Day & Date: Saturday, 18-05-2024
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

- Instructions:** 1) Answer any two questions from each Section - I and Section - II.
 2) Figures to right indicate full marks.
 3) Assume suitable data if necessary and mention it clearly.

Section – I

- Q.2** a) With block diagram of Machine Vision system, state the objective of machine vision system. **07**
 b) Explain with neat sketch successive approximation type AD converter. **07**
- Q.3** a) Define an edge in an image and explain the process of edge detection. **07**
 b) Discuss in detail image thresholding. **07**
- Q.4** a) Determine the area, minimum aspect ratio, the diameter, perimeter, centroid and thinness measures of the image. **10**

- b) Why do we need image processing? Explain. **04**

Section – II

- Q.5** a) Explain the working of Moravec corner detector. **07**
 b) Draw neat sketch of CCD image sensor and explain its working. **07**
- Q.6** a) Discuss in detail about split and merge technique and region growing approach of segmentation. **08**
 b) Explain in brief manual leadthrough and powered leadthrough robot programming methods. **06**
- Q.7** Write a short note on (any three) **14**
 a) Inspection application of machine vision in robotics
 b) Visual servoing and navigation application of machine vision in robotics
 c) Template matching
 d) Sampling and quantization

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct answer.

14

- 1) What is the first step in the design process?
 - a) Make a prototype
 - b) Identify the problem or the need
 - c) Market your idea
 - d) Test and retest
- 2) Choose the correct sequence to generate prototype.
 - a) 3D CAD data - CAD solid model - STL file - RP prototype
 - b) CAD solid model - 3D CAD data - RP prototype - STL file
 - c) STL file - 3D CAD data - CAD solid model - RP prototype
 - d) 3D CAD data - STL file - CAD solid model - RP prototype
- 3) From following, the alternative name for Rapid Prototyping is _____.
 - a) Additive Manufacturing
 - b) Layer Manufacturing
 - c) Direct CAD Manufacturing
 - d) All of the above
- 4) Process of converting STL file model in to layers is called _____ in RP.
 - a) chopping
 - b) slicing
 - c) cutting
 - d) trimming
- 5) Full form of STL is _____.
 - a) Straight-lithography
 - b) Streto-lithography
 - c) Stereo-lithography
 - d) Straight-lipsography
- 6) In the _____ process, one starts with a single block of solid material larger than the final size of the desired object and material is removed until the desired shape is reached.
 - a) Subtractive process
 - b) Additive process
 - c) Formative process
 - d) All of above
- 7) Which of the following is typically the most expensive type of 3D printer?
 - a) SLA
 - b) SLM
 - c) FDM
 - d) None of the above

- 8) Which printer melts metal?
a) SLS
b) SLM
c) SLA
d) FDM
- 9) SLA printer's package material is in a _____.
a) Chain
b) Spool
c) Cartridge
d) None of the above
- 10) What material is not used in 3D printing?
a) Nylon
b) ABS
c) PLA
d) PVC
- 11) Which file type is most commonly exported from CAD software?
a) SLDRT
b) JPG
c) STL
d) X3G
- 12) Process of forming metal powder by directing molten metal through an orifice after which it is break into small particle using high pressure fluid is known as _____.
a) Atomization
b) Reduction
c) Crushing
d) Electrolysis
- 13) In Fused Deposition Modelling, the raw material is used in the form of _____.
a) Wax
b) Wire
c) Powder
d) All of above mentioned
- 14) In the process of Selective Laser Sintering, raw material used is in the form of _____.
a) Machining Wax
b) Foam Core
c) Powder
d) Rubber

3D Printing Material (BTN02519)

Day & Date: Saturday, 18-05-2024
Time: 10:00 AM To 01:00 PM

Max. Marks: 56

- Instructions:** 1) Q. No. 2 to Q. No. 6 are compulsory. Solve any two from the remaining questions from each section.
2) Assume suitable data if required.
3) Use of scientific calculator is allowed.
4) Figures to right indicate full marks.

Section – I

- Q.2** Explain the product design concept with respect to 3D printing. **10**
- Q.3** Compare Conventional Manufacturing Vs Additive Manufacturing **09**
- Q.4** Enlist different thermo plastic materials used in 3D Printer. Explain in detail applications and characteristics of any 2 materials. **09**
- Q.5** Enlist different metal and alloy materials used in 3D Printer. Explain in detail applications and characteristics of any 03 metal and alloy materials. **09**

Section – II

- Q.6** Discuss various forms of raw material used in 3D Printing. **10**
- Q.7** Enlist the different techniques to generate the powder. And explain with neat sketch any 01 technique. **09**
- Q.8** Explain Selection process of 3d printing machine specification for following Materials: **09**
a) Polymers
b) Composites
- Q.9** Discuss the different applications of 3D printing in the various field. **09**

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct answer.

14

- 1) Which printer melts metal?

a) SLS	b) SLM
c) SLA	d) FDM
- 2) SLA printer's package material is in a _____.

a) Chain	b) Spool
c) Cartridge	d) None of the above
- 3) What material is not used in 3D printing?

a) Nylon	b) ABS
c) PLA	d) PVC
- 4) Which file type is most commonly exported from CAD software?

a) SLDRT	b) JPG
c) STL	d) X3G
- 5) Process of forming metal powder by directing molten metal through an orifice after which it is break into small particle using high pressure fluid is known as _____.

a) Atomization	b) Reduction
c) Crushing	d) Electrolysis
- 6) In Fused Deposition Modelling, the raw material is used in the form of _____.

a) Wax	b) Wire
c) Powder	d) All of above mentioned
- 7) In the process of Selective Laser Sintering, raw material used is in the form of _____.

a) Machining Wax	b) Foam Core
c) Powder	d) Rubber

- 8) What is the first step in the design process?
- a) Make a prototype
 - b) Identify the problem or the need
 - c) Market your idea
 - d) Test and retest
- 9) Choose the correct sequence to generate prototype.

Energy Conservation, Management and Audit (BTN02520)

Day & Date: Saturday, 18-05-2024
Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No.3 (starting page of the Answer Book). Each question carry one mark.
2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct answer.**14**

- 1) "The judicious and effective use of energy to maximize profits and enhance competitive positions". This can be the definition of _____.
 - a) Energy conservation
 - b) Energy management
 - c) Energy policy
 - d) Energy Audit
- 2) Primary or final energy consumption means _____.
 - a) Total energy demand of the country
 - b) Energy demand for commercial purpose
 - c) Energy demand for industrial purpose
 - d) Energy demand of residential and municipal
- 3) Sunlight, air, soil, and water are examples of _____.
 - a) Renewable resources
 - b) Non-renewable resources
 - c) Conventional resources
 - d) Non-natural resources
- 4) Which of the following is not part of energy monitoring?
 - a) data recording
 - b) data analysis
 - c) data reporting
 - d) energy efficiency equipment financing
- 5) Which of the following is a disadvantage of most of the renewable-energy Sources?
 - a) Unreliable supply
 - b) Highly polluting
 - c) High waste disposal cost
 - d) High running cost
- 6) Which is not a Primary energy resources?
 - a) Petroleum products
 - b) Electrical Energy
 - c) Geothermal Energy
 - d) Biomass like wood
- 7) Name the Act, which is proposed to bring the qualitative transformation of the electricity sector?
 - a) Regulatory Commission Act 1998
 - b) Indian Electricity Act 1910
 - c) Supply Act 1948
 - d) Electricity Act 2003

Seat No.

T. Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING

Energy Conservation, Management and Audit (BTN02520)

Day & Date: Saturday, 18-05-2024
Time: 10:00 AM To 01:00 PM

Max. Marks: 56

- Instructions:** 1) Attempt any two questions from each Section.
2) Figures to right indicate full marks.
3) Assume suitable data if required.

Section – I

- Q.2 Solve:**
- a) Why renewable energy is important? Discuss the relevance of renewable energy for national energy security policy. **07**
 - b) Describe Current energy scenario - World. **07**
- Q.3 Solve:**
- a) Importance Energy Audit in Indian Industry. **07**
 - b) Why Pre-audit and Post-audit is important during Energy audit? **07**
- Q.4 Answer the following questions. (Any Four) **14****
- a) Write Standard Energy Audit Report Format.
 - b) Discuss Responsibilities of Energy Auditor.
 - c) Describe Current energy scenario - India.
 - d) Explain Preliminary Energy Audit.
 - e) Write a short note on Energy action Planning.

Section – II

- Q.5 Solve:**
- a) Explain in detail direct method and indirect method for finding out boiler efficiency. **07**
 - b) Explain Energy Conservation opportunities in HVAC and Furnace. **07**
- Q.6 Solve:**
- a) Explain different Financial Analysis Techniques. **07**
 - b) What are the direct and indirect benefits of waste heat recovery? **07**
- Q.7 Write short notes. (Any Four). **14****
- a) Explain Energy Performance Assessment of pump.
 - b) List the energy saving opportunities in pumping system
 - c) Time Value of Money
 - d) Simple Payback Period
 - e) Explain Energy Conservation opportunities in Steam System.

- 9) Primary or final energy consumption means _____.
a) Total energy demand of the country
b) Energy demand for commercial purpose
c) Energy demand for industrial purpose
d) Energy demand of residential and municipal
- 10) Sunlight, air, soil, and water are examples of _____.
a) Renewable resources b) Non-renewable resources
c) Conventional resources d) Non-natural resources
- 11) Which of the following is not part of energy monitoring?
a) data recording
b) data analysis
c) data reporting
d) energy efficiency equipment financing
- 12) Which of the following is a disadvantage of most of the renewable-energy Sources?
a) Unreliable supply b) Highly polluting
c) High waste disposal cost d) High running cost
- 13) Which is not a Primary energy resources?
a) Petroleum products b) Electrical Energy
c) Geothermal Energy d) Biomass like wood
- 14) Name the Act, which is proposed to bring the qualitative transformation of the electricity sector?
a) Regulatory Commission Act 1998
b) Indian Electricity Act 1910
c) Supply Act 1948
d) Electricity Act 2003

Max. Marks: 56

- Instructions:** 1) Attempt any two questions from each Section.
2) Figures to right indicate full marks.
3) Assume suitable data if required.

Section – I

Q.2 Solve:

- a) Why renewable energy is important? Discuss the relevance of renewable energy for national energy security policy. **07**
b) Describe Current energy scenario - World. **07**

Q.3 Solve:

- a) Importance Energy Audit in Indian Industry. **07**
b) Why Pre-audit and Post-audit is important during Energy audit? **07**

Q.4 Answer the following questions. (Any Four) **14**

- a) Write Standard Energy Audit Report Format.
b) Discuss Responsibilities of Energy Auditor.
c) Describe Current energy scenario - India.
d) Explain Preliminary Energy Audit.
e) Write a short note on Energy action Planning.

Section – II

Q.5 Solve:

- a) Explain in detail direct method and indirect method for finding out boiler efficiency. **07**
b) Explain Energy Conservation opportunities in HVAC and Furnace. **07**

Q.6 Solve:

- a) Explain different Financial Analysis Techniques. **07**
b) What are the direct and indirect benefits of waste heat recovery? **07**

Q.7 Write short notes. (Any Four). **14**

- a) Explain Energy Performance Assessment of pump.
b) List the energy saving opportunities in pumping system
c) Time Value of Money
d) Simple Payback Period
e) Explain Energy Conservation opportunities in Steam System.

Energy Conservation, Management and Audit (BTN02520)

Day & Date: Saturday, 18-05-2024
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No.3 (starting page of the Answer Book). Each question carry one mark.
 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 3) Figures to the right indicates full marks.
 4) Assume suitable data if necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct answer.**14**

- 1) Which of the following is highest contributor to the air pollution?
 - a) Carbon Monoxide
 - b) Hydro Carbons
 - c) Sulphur Oxides
 - d) Particulates
- 2) Kilowatt-hour (kWh) is a unit of _____.
 - a) Current
 - b) Power
 - c) Energy
 - d) Resistance
- 3) Recovery of waste heat from hot fluid to fluid is called _____.
 - a) thermo compressor
 - b) waste heat recovery boiler
 - c) heat Pump
 - d) Economizer
- 4) Energy consumption per unit of GDP is called as _____.
 - a) Energy Ratio
 - b) Energy intensity
 - c) Per capita consumption
 - d) none
- 5) "The judicious and effective use of energy to maximize profits and enhance competitive positions". This can be the definition of _____.
 - a) Energy conservation
 - b) Energy management
 - c) Energy policy
 - d) Energy Audit
- 6) Primary or final energy consumption means _____.
 - a) Total energy demand of the country
 - b) Energy demand for commercial purpose
 - c) Energy demand for industrial purpose
 - d) Energy demand of residential and municipal
- 7) Sunlight, air, soil, and water are examples of _____.
 - a) Renewable resources
 - b) Non-renewable resources
 - c) Conventional resources
 - d) Non-natural resources
- 8) Which of the following is not part of energy monitoring?
 - a) data recording
 - b) data analysis
 - c) data reporting
 - d) energy efficiency equipment financing

- 9) Which of the following is a disadvantage of most of the renewable-energy Sources?
- a) Unreliable supply b) Highly polluting
c) High waste disposal cost d) High running cost
- 10) Which is not a Primary energy resources?
- a) Petroleum products b) Electrical Energy
c) Geothermal Energy d) Biomass like wood
- 11) Name the Act, which is proposed to bring the qualitative transformation of the electricity sector?
- a) Regulatory Commission Act 1998
b) Indian Electricity Act 1910
c) Supply Act 1948
d) Electricity Act 2003
- 12) The world's first 100% solar powered airport located at _____.
- a) Cochin, Kerala b) Bengaluru, Karnataka
c) Chennai, Tami Nadu d) Mumbai, Maharashtra
- 13) Which country has the largest share of the global coal reserves?
- a) Russia b) China
c) USA d) India
- 14) Select the important factor for the site selection of a thermal power plant.
- a) Distance from the populated area
b) Availability of fuel
c) Availability of water
d) Cost of plant

Introduction to Electric and Hybrid Electric Vehicles (BTN02521)

Day & Date: Saturday, 18-05-2024
Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions: 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No. 3 (starting page of the Answer Book). Each question carry one mark.
2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
3) Figures to the right indicates full marks.
4) Draw neat sketches wherever necessary.
4) Attempt any two questions from Section I and Section II

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Multiple Choice Questions.

14

- 1) What's the difference between a plug-in hybrid and a battery electric vehicle?
 - a) There is no difference
 - b) A plug-in hybrid only accepts AC power, while a battery electric vehicle accepts AC and DC power
 - c) A plug-in hybrid can be powered by either the battery or the gasoline engine. A pure electric vehicle is powered only by the battery.
 - d) Both models utilize a battery and gasoline engine but in different ways
- 2) The electric motor in hybrid car can also act as _____.
 - a) Generator
 - b) Fuel Pump
 - c) Cooling Fan
 - d) Compressor
- 3) Which voltage is likely to be available from the battery of an electric vehicle also known as Mild hybrid?
 - a) 12V
 - b) 24V
 - c) 300V
 - d) 100V
- 4) Which of the following vehicles produces zero emissions?
 - a) Traditional
 - b) Hybrid
 - c) Electric Vehicle
 - d) Both Traditional and Hybrid
- 5) How to increase the range on electric vehicle?
 - a) By reducing battery
 - b) By installing a turbocharger
 - c) By installing another DC motor
 - d) By increasing the battery capacity
- 6) HEV stands for _____.
 - a) Hybrid Electronic Vehicle
 - b) Hybrid Electrical vehicle
 - c) Hybrid Environmental Vehicle
 - d) None of these

- 7) Hybrid vehicles convert energy that is normally lost through braking into electrical energy. What is the term that is used for the recycling of energy?
- a) Perpetual motion b) Regenerative braking
c) Kinetic conversation d) Hybrid alchemy
- 8) Which of the following is not an advantage of hybrid vehicles?
- a) Initial cost is low b) Environmentally friendly
c) Better mileage d) Higher energy conservation
- 9) Which of the following is not the type of hybrid vehicle?
- a) Plug in Hybrid b) Parallel Hybrid
c) Natural Gas for Vehicle d) Series Hybrid
- 10) What purpose does a generator serve in a hybrid vehicle?
- a) It converts nuclear energy into electrical energy.
b) It converts mechanical energy into electrical energy.
c) It converts chemical energy into electrical energy.
d) It converts electrical energy into mechanical energy.
- 11) In _____ vehicle energy is stored in an auxiliary battery and then it is used to quickly start a Vehicle.
- a) Full Hybrid b) Micro Hybrid
c) Series Hybrid d) Mild Hybrid
- 12) In which vehicle system lowest size of a battery is used?
- a) Micro Hybrid b) Series Hybrid
c) Mild Hybrid d) Parallel Hybrid
- 13) The rotating part of DC Motor is called as _____.
- a) Stator b) Rotor
c) Poles d) Pole shoe
- 14) ACC requires the driver to set the desired _____.
- a) Noise b) Speed
c) Vision d) All of these

Introduction to Electric and Hybrid Electric Vehicles (BTN02521)

Day & Date: Saturday, 18-05-2024
Time: 10:00 AM To 01:00 PM

Max. Marks: 56

Instructions: 1) Solve any two questions from each section.
2) Figures to right indicate full marks.

Section – I

- Q.2 Attempt the following questions. 14**
- a) Write a note on history of electric vehicles. Stating related scenarios for getting pick of production and then to convert the market trends. **05**
- b) Write a note on swapped battery and range extender batteries techniques. **05**
- c) Write a note on gravitational and volumetric energy density. Explain battery cost reduction strategy. **04**
- Q.3 Attempt the Following questions. 14**
- a) Explain the tractive effort and transmission requirements in electric vehicles. **05**
- b) Write a note on DC electric motor characteristics. **05**
- c) What is tractive effort and explain the tractive effort in electric vehicles? **04**
- Q.4 Attempt the Following questions. 14**
- a) Explain the hybrid electric drive train architecture. **05**
- b) Explain the series hybrid electric drive train with neat sketch. **05**
- c) Write a note on mass analysis and packaging. **04**

Section – II

- Q.5 Attempt the Following questions. 14**
- a) Write the construction and working of BLDC Motor. **05**
- b) Write a note on speed and torque control of DC Motors. **05**
- c) Write a note on different advantages of synchronous over asynchronous motors. **04**
- Q.6 Attempt the Following questions. 14**
- a) Write a note on drive cycle stating different steps involved in it. **05**
- b) Write a note on regeneration efficiency. **05**
- c) Write a note on AC induction motor. **04**
- Q.7 Attempt the Following question. 14**
- a) Explain construction of electric compact sedan. **05**
- b) Relate modified Indian drive cycle with European drive cycle. **05**
- c) Write a note on traction energy for drive cycle. **04**

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Multiple Choice Questions.

14

- 1) Which of the following is not an advantage of hybrid vehicles?

a) Initial cost is low	b) Environmentally friendly
c) Better mileage	d) Higher energy conservation
- 2) Which of the following is not the type of hybrid vehicle?

a) Plug in Hybrid	b) Parallel Hybrid
c) Natural Gas for Vehicle	d) Series Hybrid
- 3) What purpose does a generator serve in a hybrid vehicle?

a) It converts nuclear energy into electrical energy.
b) It converts mechanical energy into electrical energy.
c) It converts chemical energy into electrical energy.
d) It converts electrical energy into mechanical energy.
- 4) In _____ vehicle energy is stored in an auxiliary battery and then it is used to quickly start a Vehicle.

a) Full Hybrid	b) Micro Hybrid
c) Series Hybrid	d) Mild Hybrid
- 5) In which vehicle system lowest size of a battery is used?

a) Micro Hybrid	b) Series Hybrid
c) Mild Hybrid	d) Parallel Hybrid
- 6) The rotating part of DC Motor is called as _____.

a) Stator	b) Rotor
c) Poles	d) Pole shoe
- 7) ACC requires the driver to set the desired _____.

a) Noise	b) Speed
c) Vision	d) All of these

- 8) What's the difference between a plug-in hybrid and a battery electric vehicle?
- a) There is no difference
 - b) A plug-in hybrid only accepts AC power, while a battery electric vehicle accepts AC and DC power
 - c) A plug-in hybrid can be powered by either the battery or the gasoline engine. A pure electric vehicle is powered only by the battery.
 - d) Both models utilize a battery and gasoline engine but in different ways

**T.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING**

Introduction to Electric and Hybrid Electric Vehicles (BTN02521)

Day & Date: Saturday, 18-05-2024
Time: 10:00 AM To 01:00 PM

Max. Marks: 56

Instructions: 1) Solve any two questions from each section.
2) Figures to right indicate full marks.

Section – I

- Q.2 Attempt the following questions. 14**
- a) Write a note on history of electric vehicles. Stating related scenarios for getting pick of production and then to convert the market trends. **05**
 - b) Write a note on swapped battery and range extender batteries techniques. **05**
 - c) Write a note on gravitational and volumetric energy density. Explain battery cost reduction strategy. **04**
- Q.3 Attempt the Following questions. 14**
- a) Explain the tractive effort and transmission requirements in electric vehicles. **05**
 - b) Write a note on DC electric motor characteristics. **05**
 - c) What is tractive effort and explain the tractive effort in electric vehicles? **04**
- Q.4 Attempt the Following questions. 14**
- a) Explain the hybrid electric drive train architecture. **05**
 - b) Explain the series hybrid electric drive train with neat sketch. **05**
 - c) Write a note on mass analysis and packaging. **04**

Section – II

- Q.5 Attempt the Following questions. 14**
- a) Write the construction and working of BLDC Motor. **05**
 - b) Write a note on speed and torque control of DC Motors. **05**
 - c) Write a note on different advantages of synchronous over asynchronous motors. **04**
- Q.6 Attempt the Following questions. 14**
- a) Write a note on drive cycle stating different steps involved in it. **05**
 - b) Write a note on regeneration efficiency. **05**
 - c) Write a note on AC induction motor. **04**
- Q.7 Attempt the Following question. 14**
- a) Explain construction of electric compact sedan. **05**
 - b) Relate modified Indian drive cycle with European drive cycle. **05**
 - c) Write a note on traction energy for drive cycle. **04**

Introduction to Electric and Hybrid Electric Vehicles (BTN02521)

Day & Date: Saturday, 18-05-2024
Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions: 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No. 3 (starting page of the Answer Book). Each question carry one mark.
- 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
- 3) Figures to the right indicates full marks.
- 4) Draw neat sketches wherever necessary.
- 4) Attempt any two questions from Section I and Section II

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Multiple Choice Questions.

14

- 1) HEV stands for _____.
 - a) Hybrid Electronic Vehicle
 - b) Hybrid Electrical vehicle
 - c) Hybrid Environmental Vehicle
 - d) None of these
- 2) Hybrid vehicles convert energy that is normally lost through braking into electrical energy. What is the term that is used for the recycling of energy?
 - a) Perpetual motion
 - b) Regenerative braking
 - c) Kinetic conversation
 - d) Hybrid alchemy
- 3) Which of the following is not an advantage of hybrid vehicles?
 - a) Initial cost is low
 - b) Environmentally friendly
 - c) Better mileage
 - d) Higher energy conservation
- 4) Which of the following is not the type of hybrid vehicle?
 - a) Plug in Hybrid
 - b) Parallel Hybrid
 - c) Natural Gas for Vehicle
 - d) Series Hybrid
- 5) What purpose does a generator serve in a hybrid vehicle?
 - a) It converts nuclear energy into electrical energy.
 - b) It converts mechanical energy into electrical energy.
 - c) It converts chemical energy into electrical energy.
 - d) It converts electrical energy into mechanical energy.
- 6) In _____ vehicle energy is stored in an auxiliary battery and then it is used to quickly start a Vehicle.
 - a) Full Hybrid
 - b) Micro Hybrid
 - c) Series Hybrid
 - d) Mild Hybrid
- 7) In which vehicle system lowest size of a battery is used?
 - a) Micro Hybrid
 - b) Series Hybrid
 - c) Mild Hybrid
 - d) Parallel Hybrid

Economics (BTN02508)

Day & Date: Monday, 20-05-2024
 Time: 10:00 AM To 12:00 PM

Max. Marks: 50

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 20 Minutes

Marks: 10

Q.1 Choose the correct alternatives from the options. 10

- 1) Who gives a welfare definition of economics?

a) Adam Smith	b) Alfred Marshall
c) Lionel Robbins	d) Paul Samuelson
- 2) The type of equilibrium that deals with the determination of price and quantity of only one _____.

a) General equilibrium	b) Partial equilibrium
c) Zero equilibrium	d) Pareto efficiency
- 3) Who is known as father of economics?

a) Adam Smith	b) Prof. A. Samulson
c) Alfred Marshall	d) J. R. Hicks
- 4) Macroeconomic theory deals with _____.

a) The behavior of firms	b) The activities of individual units
c) Economic aggregates	d) The behavior of the electronics industry
- 5) Which of the following market types has all firms selling products so identical that buyers do not care from which firm they buy?

a) Perfect competition	b) Oligopoly
c) Monopolistic competition	d) Monopoly
- 6) Which of the following is the best example of a natural monopoly?

a) owning the only licensed taxicab in town	b) the United States Postal Service
c) ownership of the only ferry across Puget Sound for twenty miles	d) the cable television company in your hometown
- 7) Which of the following is not a regulatory institution in Indian financial system?

a) RBI	b) CIBIL
c) SEBI	d) IRDA

- 8) Money supply increases when inflation rises in the economy _____.
- a) Increase
 - b) Decrease
 - c) No change
 - d) None of the above
- 9) Market system means: _____.
- a) Socialism
 - b) Capitalism
 - c) A place where goods are traded
 - d) All of the above
- 10) _____ is the application of knowledge which redefines the boundaries of global business.

MCQ/Objective Type Questions

Duration: 20 Minutes

Marks: 10

Q.1 Choose the correct alternatives from the given options.

10

- 1) What is the term of Patent?

a) 35 years	b) 25 years
c) 20 years	d) 15 years
- 2) Intellectual Property Rights (IPR) protects the use of information and ideas that are of _____.

a) Ethical value	b) Moral value
c) Social value	d) Commercial value
- 3) Who fills the invention disclosure form (IDF)?

a) Inventor	b) Patent Attorney
c) Assignee	d) Patent Searcher
- 4) The following can be patented _____.

a) Machine	b) Process
c) Composition of matter	d) All of these
- 5) Trade mark _____.

a) is represented graphically
b) is capable of distinguishing the goods or services of one person from those of others
c) may include shapes of goods or combination of colors
d) All of the above
- 6) In India, the literary work is protected until _____.

a) Lifetime of author
b) 25 years after the death of author
c) 40 years after the death of author
d) 60 years after the death of author
- 7) Which is not a type of intellectual property?

a) Trade secrets	b) Trademarks
c) Home loans	d) Copyrights

**Intellectual Property Rights for Technology Development and
Management (BTN02509)**

Day & Date: Monday, 20-05-2024
Time: 10:00 AM To 12:00 PM

Max. Marks: 50

- Instructions:**
- 1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 - 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 - 3) Figures to the right indicates full marks.
 - 4) Assume suitable data wherever needed & mention it clearly.

MCQ/Objective Type Questions

Duration: 20 Minutes

Marks: 10

Q.1 Choose the correct alternatives from the given options. 10

- 1) The first Patent Law was enacted in India in the year _____.
a) 1856 b) 1880
c) 1905 d) 1850
- 2) All of the following are examples of intellectual property protections except _____.
a) Copyright b) Patents
c) Contracts d) Trademarks
- 3) What is the term of Patent?
a) 35 years b) 25 years
c) 20 years d) 15 years
- 4) Intellectual Property Rights (IPR) protects the use of information and ideas that are of _____.
a) Ethical value b) Moral value
c) Social value d) Commercial value
- 5) Who fills the invention disclosure form (IDF)?
a) Inventor b) Patent Attorney
c) Assignee d) Patent Searcher
- 6) The following can be patented _____.
a) Machine b) Process
c) Composition of matter d) All of these
- 7) Trade mark _____.
a) is represented graphically
b) is capable of distinguishing the goods or services of one person from those of others
c) may include shapes of goods or combination of colors
d) All of the above

- 8)** In India, the literary work is protected until _____.
a) Lifetime of author
b) 25 years after the death of author
c) 40 years after the death of author
d) 60 years after the death of author
- 9)** Which is not a type of intellectual property?
a) Trade secrets
b) Trademarks
c) Home loans
d) Copyrights
- 10)** In which article is intellectual property rights outlined?
a) Article 15
b) Article 27
c) Article 13
d) Article 20

10

- 1) Which of the following are stress busters?
 - a) Trying to find something funny in a difficult situation
 - b) Developing a support network
 - c) Taking a mindful walk
 - d) All of the above

- 2) Which one is not considered as Environmental stressors?
 - a) Weather
 - b) Traffic
 - c) Financial problems
 - d) Substandard housing

- 3) When a task appears overwhelming, it is best to _____.
 - a) Put it aside till later
 - b) Drink alcohol to relax
 - c) Break it down into smaller task
 - d) Avoid the task

- 4) The word Stress is derived from Latin word 'Stringere' which means _____.
 - a) Draw tight
 - b) Stimulus
 - c) Force
 - d) Attitude

- 5) Which of the following statements is true?
 - a) The stress response is nonspecific
 - b) Different kinds of stressors produce exactly the same response
 - c) Different people respond to the same stressor differently
 - d) All of the above

- 6) When is a person more likely to have difficulty in coping with a stressful situation?
 - a) When he is over the age of fifty
 - b) When he expects a positive outcome
 - c) When he thinks he does not have control over the situation
 - d) When he has a good social support network

- 7) Aches, shallow breathing and sweating, frequent colds are _____.
a) Physical symptoms of stress
b) Behavioral symptoms of stress
c) Emotional symptoms of stress
d) Cognitive symptoms of stress
- 8) Anxiety can cause the following moods _____.
a) Irritable
b) Nervous
c) Anxious
d) All of the above
- 9) Which of the following are the physical symptoms of anxiety?
a) Racing heart
b) Sweaty palms
c) Flushed cheeks
d) All of the above
- 10) Which of the following is true about 'deep breathing relaxation technique'?
a) It can be self-taught
b) It releases tension from the body and clears your mind
c) You have to do this under-water
d) Only '1' & '2' are true

T. Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING
Stress and Coping (BTN02511)

Day & Date: Monday, 20-05-2024
Time: 10:00 AM To 12:00 PM

Max. Marks: 40

Instructions: 1) Attempt any four questions from Q. no 2 to Q. no 7.
2) Figures to the right indicate full marks.

- Q.2** Explain in detail the various personality sources of stress. Explain Type A and Type B Personality factors causing stress. **10**
- Q.3** What do you mean by Stress? Describe the current & Historical status of stress in India. **10**
- Q.4** Comment on psychological & behavioral consequences of stress in brief. **10**
- Q.5** Explain various coping styles to deal with stress. **10**
- Q.6** Describe positive and negative effects of stress with examples. **10**
- Q.7** Discuss the nature of stress response. **10**

Stress and Coping (BTN02511)

Day & Date: Monday, 20-05-2024
 Time: 10:00 AM To 12:00 PM

Max. Marks: 50

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.
 4) Assume suitable data wherever needed & mention it clearly.

MCQ/Objective Type Questions

Duration: 20 Minutes

Marks:10

Q.1 Choose amongst the alternatives.**10**

- 1) Which of the following statements is true?
 - a) The stress response is nonspecific
 - b) Different kinds of stressors produce exactly the same response
 - c) Different people respond to the same stressor differently
 - d) All of the above
- 2) When is a person more likely to have difficulty in coping with a stressful situation?
 - a) When he is over the age of fifty
 - b) When he expects a positive outcome
 - c) When he thinks he does not have control over the situation
 - d) When he has a good social support network
- 3) Aches, shallow breathing and sweating, frequent colds are _____.
 - a) Physical symptoms of stress
 - b) Behavioral symptoms of stress
 - c) Emotional symptoms of stress
 - d) Cognitive symptoms of stress
- 4) Anxiety can cause the following moods _____.

a) Irritable	b) Nervous
c) Anxious	d) All of the above
- 5) Which of the following are the physical symptoms of anxiety?

a) Racing heart	b) Sweaty palms
c) Flushed cheeks	d) All of the above
- 6) Which of the following is true about 'deep breathing relaxation technique'?
 - a) It can be self-taught
 - b) It releases tension from the body and clears your mind
 - c) You have to do this under-water
 - d) Only '1' & '2' are true

- 7) Which of the following are stress busters?
- a) Trying to find something funny in a difficult situation
 - b) Developing a support network
 - c) Taking a mindful walk
 - d) All of the above
- 8) Which one is not considered as Environmental stressors?
- a) Weather
 - b) Traffic

MCQ/Objective Type Questions

Duration: 20 Minutes

Marks: 10

Q.1 Choose the correct alternatives from the options. 10

- 1) Virtues are _____.
 a) moral
 b) ethics
 c) values
 d) positive and preferred values
- 2) One of the basic desires of every human being is to be always _____.
 a) Happy
 b) Sad
 c) Laugh
 d) Earn Money
- 3) Value and skills should go hand in hand _____.
 a) True
 b) False
 c) Cannot tell
 d) Wrong question
- 4) _____ are the basic Human aspirations.
 a) Money
 b) Relationship without money
 c) Physical facility
 d) Continuous happiness
- 5) Many complex social problems exist in the _____.
 a) Industry/ Business
 b) Society
 c) Home
 d) None of the above
- 6) What is Integrity?
 a) Unity of thought
 b) Word and deed
 c) Open mindedness
 d) All of these
- 7) Human values are essential for _____.
 a) living in harmony with self, each other and nature
 b) making life easier and happy
 c) living with family and friends
 d) making money to fulfill desires
- 8) Courage is the tendency to accept and face _____.
 a) Self-confidence
 b) Risks and difficult tasks in rational ways
 c) Physical courage
 d) Social courage

- 9) Commitment means _____.
- a) Alignment to goals
 - b) Adherence to ethical principles
 - c) Empathy
 - d) All the above
- 10) The objectives of professional ethics in engineering are _____.
- a) To understand the moral values that ought to guide the Engineering profession
 - b) To resolve the moral issues in the profession, and
 - c) To justify the moral judgment concerning the profession
 - d) All the above

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING
Transmission System Design (BTN02601)

Day & Date: Tuesday, 21-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) Answer any two questions from each section.
 2) Figures to the right indicate full marks.
 3) Assume suitable data if necessary and mention it clearly.

Section – I

- Q.2**
- a) Derive the Lewis beam strength equation for spur gear tooth. **03**
 - b) Explain force analysis on Spur gear with the help of figure. **04**
 - c) A pair of spur gears with 20° pressure angle, consists of a 17 teeth pinion meshing with 68 teeth gear. The module and face width are 2.5 and 25 mm respectively. The gears are machined to meet the specifications of Grade 10 and are heat treated to a surface hardness of 250 BHN. Determine: **07**
 - i) The optimum speed for maximum power transmitting capacity; and
 - ii) The maximum power transmitted by the gears at the above speed.
- Q.3**
- a) Discuss force analysis of helical gear. **03**
 - b) Derive the expression for virtual number of teeth for helical gears. **04**
 - c) A pair of parallel helical gears consists of a 20 teeth pinion meshing with a 100 teeth gear. The pinion rotates at 720 rpm. The normal pressure angle is 20°, while the helix angle is 25°. The face width is 40 mm and the normal module is 4 mm. The pinion as well as the gear is made of steel 40C8 ($S_{ut} = 600 \text{ N/mm}^2$) and heat treated to a surface hardness of 300 BHN. The service factor and the factor of safety are 1.5 and 2 respectively. Assume that the velocity factor accounts for the dynamic load and calculate the power transmitting capacity of gears. **07**
- Q.4**
- a) Discuss advantages and disadvantages of worm gear drives. **03**
 - b) Define the following terms related to worm gear **04**
 - i) Lead
 - ii) Lead Angle
 - iii) Helix Angle
 - iv) Single-start threads
 - c) A pair of worm gears is designated as, 1/30/10/8 Calculate **07**
 - i) the center distance;
 - ii) the speed reduction;
 - iii) the dimensions of the worm; and
 - iv) the dimensions of the worm wheel

Section – II

- Q.5**
- Explain terminology used in straight bevel gear. **03**
 - Discuss various mounting methods of bevel gears with figure. **04**
 - A pair of straight bevel gears consists of a 24-teeth pinion meshing with a 48 teeth gear. The module at the outside diameter is 6 mm, while the face width is 50 mm. The gears are made of grey cast iron FG 220 ($S_{ut} = 220 \text{ N/mm}^2$). The pressure angle is 20° . The teeth are generated and assume that velocity factor accounts for the dynamic load. The pinion rotates at 300 rpm and the service factor is 1.5. The Lewis form factor based on formative number of teeth = 0.3473 and $C_v = 5.6/(5.6 + \sqrt{v})$. Calculate: **07**
 - the beam strength of the tooth
 - the static load that the gears can transmit with a factor of safety of 2 for bending consideration; and
 - the rated power that the gears can transmit
- Q.6**
- Discuss Hydrodynamic bearing with neat sketch. **03**
 - With the help of figure explain any 4 types of Rolling Contact Bearings. **04**
 - A shaft transmitting 50 kW at 125 rpm from the gear G1 to the gear G2 and mounted on two single-row deep groove ball bearings B1 and B2 is shown in Fig. The gear tooth forces are $P_{t1} = 15915 \text{ N}$, $P_{r1} = 5793 \text{ N}$, $P_{t2} = 9549 \text{ N}$, $P_{r2} = 3476 \text{ N}$. The diameter of the shaft at bearings B1 and B2 is 75 mm. The load factor is 1.4 and the expected life for 90% of the bearings is 10000 h. Find Dynamic load at bearings B1 and B2. **07**

- Q.7**
- Discuss Block brake with short shoe with figure. **03**
 - Discuss the working of Single Plate Clutch with figure. **04**
 - A multi-disk clutch consists of five steel plates and four bronze plates. The inner and outer diameters of the friction disks are 75 and 150 mm respectively. The coefficient of friction is 0.1 and the intensity of pressure on friction lining is limited to 0.3 N/mm^2 . Assuming uniform wear theory, calculate: **07**
 - the required force to engage the clutch; and
 - power transmitting capacity at 750 rpm

Seat No.

Transmission System Design (BTN02601)

Day & Date: Tuesday, 21-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.
 4) Assume suitable data if necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options and rewrite the sentence. 14

- 1) In Lewis equation, gear tooth is considered as _____.
 a) simply supported beam b) cantilever beam
 c) curved beam d) none of the above
- 2) According to Lewis equation _____.
 a) pinion is always weaker than gear
 b) pinion is weaker than gear if made of same material
 c) gear is weaker than pinion if made of same material
 d) none of the above
- 3) The friction material of the brake should have _____.
 a) high coefficient of friction b) low coefficient of friction
 c) high surface hardness d) high endurance limit strength
- 4) In thrust bearings, the load acts _____.
 a) along the axis of rotation
 b) perpendicular to the axis of rotation
 c) parallel to the axis of rotation
 d) a and c
- 5) Worm gears are widely used when _____.
 a) velocity ratio is high
 b) space is limited
 c) axes of shafts are non-intersecting
 d) all the three
- 6) The main advantage of worm gear drive is _____.
 a) ease of manufacturing b) high velocity ratio
 c) low power loss d) low cost
- 7) Taper roller bearing is used to take _____.
 a) only radial load b) only axial load
 c) only torque d) both axial and radial loads

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING
Transmission System Design (BTN02601)

Day & Date: Tuesday, 21-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) Answer any two questions from each section.
 2) Figures to the right indicate full marks.
 3) Assume suitable data if necessary and mention it clearly.

Section – I

- Q.2**
- a) Derive the Lewis beam strength equation for spur gear tooth. **03**
 - b) Explain force analysis on Spur gear with the help of figure. **04**
 - c) A pair of spur gears with 20° pressure angle, consists of a 17 teeth pinion meshing with 68 teeth gear. The module and face width are 2.5 and 25 mm respectively. The gears are machined to meet the specifications of Grade 10 and are heat treated to a surface hardness of 250 BHN. Determine: **07**
 - i) The optimum speed for maximum power transmitting capacity; and
 - ii) The maximum power transmitted by the gears at the above speed.
- Q.3**
- a) Discuss force analysis of helical gear. **03**
 - b) Derive the expression for virtual number of teeth for helical gears. **04**
 - c) A pair of parallel helical gears consists of a 20 teeth pinion meshing with a 100 teeth gear. The pinion rotates at 720 rpm. The normal pressure angle is 20°, while the helix angle is 25°. The face width is 40 mm and the normal module is 4 mm. The pinion as well as the gear is made of steel 40C8 ($S_{ut} = 600 \text{ N/mm}^2$) and heat treated to a surface hardness of 300 BHN. The service factor and the factor of safety are 1.5 and 2 respectively. Assume that the velocity factor accounts for the dynamic load and calculate the power transmitting capacity of gears. **07**
- Q.4**
- a) Discuss advantages and disadvantages of worm gear drives. **03**
 - b) Define the following terms related to worm gear **04**
 - i) Lead
 - ii) Lead Angle
 - iii) Helix Angle
 - iv) Single-start threads
 - c) A pair of worm gears is designated as, 1/30/10/8 Calculate **07**
 - i) the center distance;
 - ii) the speed reduction;
 - iii) the dimensions of the worm; and
 - iv) the dimensions of the worm wheel

Section – II

- Q.5**
- Explain terminology used in straight bevel gear. 03
 - Discuss various mounting methods of bevel gears with figure. 04
 - A pair of straight bevel gears consists of a 24-teeth pinion meshing with a 48 teeth gear. The module at the outside diameter is 6 mm, while the face width is 50 mm. The gears are made of grey cast iron FG 220 ($S_{ut} = 220 \text{ N/mm}^2$). The pressure angle is 20° . The teeth are generated and assume that velocity factor accounts for the dynamic load. The pinion rotates at 300 rpm and the service factor is 1.5. The Lewis form factor based on formative number of teeth = 0.3473 and $C_v = 5.6/(5.6 + \sqrt{v})$. Calculate: 07
 - the beam strength of the tooth
 - the static load that the gears can transmit with a factor of safety of 2 for bending consideration; and
 - the rated power that the gears can transmit
- Q.6**
- Discuss Hydrodynamic bearing with neat sketch. 03
 - With the help of figure explain any 4 types of Rolling Contact Bearings. 04
 - A shaft transmitting 50 kW at 125 rpm from the gear G1 to the gear G2 and mounted on two single-row deep groove ball bearings B1 and B2 is shown in Fig. The gear tooth forces are $P_{t1} = 15915 \text{ N}$, $P_{r1} = 5793 \text{ N}$, $P_{t2} = 9549 \text{ N}$, $P_{r2} = 3476 \text{ N}$. The diameter of the shaft at bearings B1 and B2 is 75 mm. The load factor is 1.4 and the expected life for 90% of the bearings is 10000 h. Find Dynamic load at bearings B1 and B2. 07

- Q.7**
- Discuss Block brake with short shoe with figure. 03
 - Discuss the working of Single Plate Clutch with figure. 04
 - A multi-disk clutch consists of five steel plates and four bronze plates. The inner and outer diameters of the friction disks are 75 and 150 mm respectively. The coefficient of friction is 0.1 and the intensity of pressure on friction lining is limited to 0.3 N/mm^2 . Assuming uniform wear theory, calculate: 07
 - the required force to engage the clutch; and
 - power transmitting capacity at 750 rpm

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING
Transmission System Design (BTN02601)

Day & Date: Tuesday, 21-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.
 4) Assume suitable data if necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options and rewrite the sentence. 14

- 1) In thrust bearings, the load acts _____.
 a) along the axis of rotation
 b) perpendicular to the axis of rotation
 c) parallel to the axis of rotation
 d) a and c
- 2) Worm gears are widely used when _____.
 a) velocity ratio is high
 b) space is limited
 c) axes of shafts are non-intersecting
 d) all the three
- 3) The main advantage of worm gear drive is _____.
 a) ease of manufacturing b) high velocity ratio
 c) low power loss d) low cost
- 4) Taper roller bearing is used to take _____.
 a) only radial load b) only axial load
 c) only torque d) both axial and radial loads
- 5) The initial contact in helical gears is _____.
 a) point b) line
 c) surface d) unpredictable
- 6) Compared with spur gears, helical gears _____.
 a) run more smoothly b) run with noise and vibrations
 c) consume less power d) run exactly alike
- 7) In helical gears, the distance between two similar points on adjacent teeth, measured in a plane perpendicular to tooth element, is called _____.
 a) normal circular pitch b) transverse circular pitch
 c) axial pitch d) diametral pitch
- 8) In case of spur gears, Lewis form factor depends upon _____.
 a) module b) number of teeth
 c) pressure angle d) b and c

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options and rewrite the sentence. 14

- 1) The root angle of a bevel gear is equal to _____.
 a) pitch angle + addendum angle b) pitch angle - addendum angle
 c) pitch angle + dedendum angle d) pitch angle - dedendum angle
- 2) The brake used in most of motorcycles is _____.
 a) internal expanding brake b) block brake
 c) band brake d) disk brake
- 3) In Lewis equation, gear tooth is considered as _____.
 a) simply supported beam b) cantilever beam
 c) curved beam d) none of the above
- 4) According to Lewis equation _____.
 a) pinion is always weaker than gear
 b) pinion is weaker than gear if made of same material
 c) gear is weaker than pinion if made of same material
 d) none of the above
- 5) The friction material of the brake should have _____.
 a) high coefficient of friction b) low coefficient of friction
 c) high surface hardness d) high endurance limit strength
- 6) In thrust bearings, the load acts _____.
 a) along the axis of rotation
 b) perpendicular to the axis of rotation
 c) parallel to the axis of rotation
 d) a and c
- 7) Worm gears are widely used when _____.
 a) velocity ratio is high
 b) space is limited
 c) axes of shafts are non-intersecting
 d) all the three

- 8) The main advantage of worm gear drive is _____.
a) ease of manufacturing b) high velocity ratio
c) low power loss d) low cost
- 9) Taper roller bearing is used to take _____.
a) only radial load b) only axial load
c) only torque d) both axial and radial loads
- 10) The initial contact in helical gears is _____.
a) point b) line
c) surface d) unpredictable
- 11) Compared with spur gears, helical gears _____.
a) run more smoothly b) run with noise and vibrations
c) consume less power d) run exactly alike
- 12) In helical gears, the distance between two similar points on adjacent teeth, measured in a plane perpendicular to tooth element, is called _____.
a) normal circular pitch b) transverse circular pitch
c) axial pitch d) diametral pitch
- 13) In case of spur gears, Lewis form factor depends upon _____.
a) module b) number of teeth
c) pressure angle d) b and c
- 14) When two identical bevel gears are used to transmit power between shafts that are intersecting at right angle, they are called, _____.
a) spiral bevel gears b) Miter gears
c) straight bevel gears d) hypoid gears

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct answer: 14

- 1) Measurement of speed of a rotating shaft by an electric tachometer is a _____.
 a) primary measurement
 b) non-contact type measurement
 c) secondary measurement
 d) tertiary measurement
- 2) Which of the following metals is preferred in a resistance-thermometer employed for measuring the temperature in the range -200°C 1000°C?
 a) Platinum
 b) Copper
 c) Nickel
 d) Tungsten
- 3) Which condition is essential in the operation of Mcleod gauge?
 a) Isobaric
 b) Adiabatic
 c) Isothermal
 d) Isochoric
- 4) A permanent magnet is used in _____ tachometer.
 a) inductive pickup
 b) capacitive pickup
 c) Mechanical
 d) photoelectric pickup
- 5) _____ must be mounted vertically to use.
 a) turbine meter
 b) gas flow meter
 c) Rotameter
 d) Anemometer
- 6) A Prony Brake dynamometer measures the _____.
 a) Crank shaft force
 b) Crank shaft torque
 c) Engine Brake Power
 d) Power input of Pump
- 7) A strain gauge converts Mechanical displacement in to change in _____.
 a) Inductance
 b) Resistance
 c) Capacitance
 d) Reluctance
- 8) A comparator is an essential feature of _____.
 a) manual system
 b) open loop system
 c) any system
 d) feedback control system

**T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING
Instrumentation and Control Engineering (BTN02602)**

Day & Date: Friday, 24-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

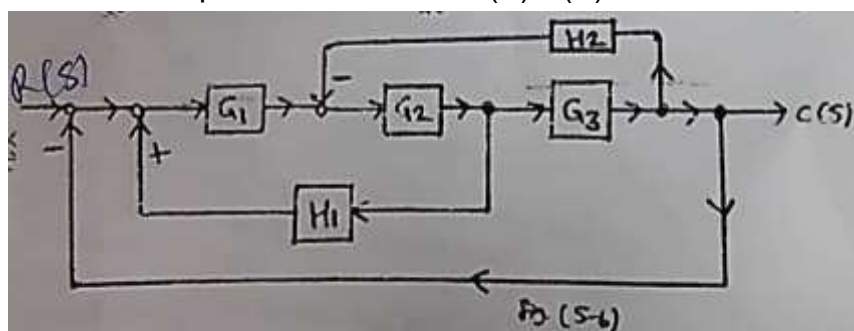

- Instructions:** 1) Solve any two questions from each Section.
2) Use of scientific calculator is allowed.
3) Figures to right indicate full marks.
4) Assume additional suitable data if necessary and state it clearly.
5) Use university graph paper and semi-log paper if required.

Section – I

- Q.2** a) Explain following system characteristics. 04
 1) Accuracy
 2) dead zone
 b) Explain with a neat sketch turbine type flow meter. 06
 c) Explain the basic principle of working of R.T.D. 04
- Q.3** a) Describe with a neat sketch 'McLeod gauge'. 06
 b) Explain with a neat sketch 'stroboscope'. 04
 c) Explain with a neat sketch 'Gear Train Dynamometer'. 04
- Q.4** a) Derive 'the expression for voltage output of Wheatstone's bridge circuit using strain gauges. 06
 b) A measuring system consists of a transducer, amplifier and recorder with individual sensitivities as respectively, 04
 $k_1 = 0.25mV/^\circ C, k_2 = 2.5V/mV, k_3 = 4mm/V$
 Determine the overall sensitivity of this system.
 c) Explain a hydraulic load cell. 04

Section – II

- Q.5** a) Differentiate between open loop and closed loop control systems. 04
 b) For the block diagram of a feedback control system as shown in fig. (5-b), obtain the closed loop transfer function $C(S)/R(S)$ 06

- c) Explain the 'Magnitude Condition' in Root Locus and its importance. 04

- Q.6 a)** For a control system represented by, **09**
- $$G(S)H(S) = \frac{K}{S(S+1)(S+5)}$$
- Sketch the complete Root Locus and comment on the system stability.
- b)** Explain with a graph, P+D controller. What do you mean by 'Derivative Time'? **05**
-
- Q.7 a)** For a unity feedback control system given by, **09**
- $$G(S) = \frac{200(S+2)}{S^2(S+40)}$$
- Sketch the Bode Plots and comment on the system stability.
- b)** Explain Bode plots for simple poles & zeros. **05**

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct answer:

14

- 1) A root locus has any branches originating from infinity when _____.
 - a) $P = Z$
 - b) $P > Z$
 - c) $Z > P$
 - d) $Z = 0$
- 2) 'Centroid' of asymptotes is a point which _____.
 - a) may be real or complex
 - b) is real but may or may not lie on the root locus
 - c) is real and always lies on the root locus
 - d) is always imaginary
- 3) 'Phase Margin' is always calculated at _____.
 - a) Corner frequency
 - b) Phase cross-over frequency
 - c) Gain cross-over frequency
 - d) Highest magnitude
- 4) If a system has two poles at the origin, its Magnitude Plot will have a starting slope of _____.
 - a) -20 db/decade
 - b) -40 db/decade
 - c) 20 db/decade
 - d) 40 db/decade
- 5) Measurement of speed of a rotating shaft by an electric tachometer is a _____.
 - a) primary measurement
 - b) non-contact type measurement
 - c) secondary measurement
 - d) tertiary measurement
- 6) Which of the following metals is preferred in a resistance-thermometer employed for measuring the temperature in the range -200°C to 1000°C ?
 - a) Platinum
 - b) Copper
 - c) Nickel
 - d) Tungsten
- 7) Which condition is essential in the operation of McLeod gauge?
 - a) Isobaric
 - b) Adiabatic
 - c) Isothermal
 - d) Isochoric

- 8) A permanent magnet is used in _____ tachometer.
a) inductive pickup b) capacitive pickup
c) Mechanical d) photoelectric pickup
- 9) _____ must be mounted vertically to use.
a) turbine meter b) gas flow meter
c) Rotameter d) Anemometer
- 10) A Prony Brake dynamometer measures the _____.
a) Crank shaft force b) Crank shaft torque
c) Engine Brake Power d) Power input of Pump
- 11) A strain gauge converts Mechanical displacement in to change in _____.
a) Inductance b) Resistance
c) Capacitance d) Reluctance
- 12) A comparator is an essential feature of _____.
a) manual system b) open loop system
c) any system d) feedback control system
- 13) Integral Time is given by _____.
a) K_p/K_i b) K_p/K_d
c) K_d/K_p d) K_i/K_p
- 14) If error is constant, _____ action gives a constant output.
a) P - action b) D- action
c) ON/OFF action d) I - action

**T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING
Instrumentation and Control Engineering (BTN02602)**

Day & Date: Friday, 24-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) Solve any two questions from each Section.
2) Use of scientific calculator is allowed.
3) Figures to right indicate full marks.
4) Assume additional suitable data if necessary and state it clearly.
5) Use university graph paper and semi-log paper if required.

Section – I

- Q.2** a) Explain following system characteristics. **04**
 1) Accuracy
 2) dead zone
 b) Explain with a neat sketch turbine type flow meter. **06**
 c) Explain the basic principle of working of R.T.D. **04**
- Q.3** a) Describe with a neat sketch 'McLeod gauge'. **06**
 b) Explain with a neat sketch 'stroboscope'. **04**
 c) Explain with a neat sketch 'Gear Train Dynamometer'. **04**
- Q.4** a) Derive 'the expression for voltage output of Wheatstone's bridge circuit using strain gauges. **06**
 b) A measuring system consists of a transducer, amplifier and recorder with individual sensitivities as respectively, **04**
 $k_1 = 0.25mV/^\circ C, k_2 = 2.5V/mV, k_3 = 4mm/V$
 Determine the overall sensitivity of this system.
 c) Explain a hydraulic load cell. **04**

Section – II

- Q.5** a) Differentiate between open loop and closed loop control systems. **04**
 b) For the block diagram of a feedback control system as shown in fig. (5-b), obtain the closed loop transfer function $C(S)/R(S)$ **06**

- c) Explain the 'Magnitude Condition' in Root Locus and its importance. **04**

- Q.6 a)** For a control system represented by, **09**
- $$G(S)H(S) = \frac{K}{S(S+1)(S+5)}$$
- Sketch the complete Root Locus and comment on the system stability.
- b)** Explain with a graph, P+D controller. What do you mean by 'Derivative Time'? **05**
- Q.7 a)** For a unity feedback control system given by, **09**
- $$G(S) = \frac{200(S+2)}{S^2(S+40)}$$
- Sketch the Bode Plots and comment on the system stability.
- b)** Explain Bode plots for simple poles & zeros. **05**

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING
Instrumentation and Control Engineering (BTN02602)

Day & Date: Friday, 24-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.
 4) Answer cannot be changed once it is marked.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct answer:

14

- 1) A Prony Brake dynamometer measures the _____.
 a) Crank shaft force b) Crank shaft torque
 c) Engine Brake Power d) Power input of Pump
- 2) A strain gauge converts Mechanical displacement in to change in _____.
 a) Inductance b) Resistance
 c) Capacitance d) Reluctance
- 3) A comparator is an essential feature of _____.
 a) manual system b) open loop system
 c) any system d) feedback control system
- 4) Integral Time is given by _____.
 a) K_p/K_i b) K_p/K_d
 c) K_d/K_p d) K_i/K_p
- 5) If error is constant, _____ action gives a constant output.
 a) P - action b) D- action
 c) ON/OFF action d) I - action
- 6) A root locus has any branches originating from infinity when _____.
 a) $P = Z$ b) $P > Z$
 c) $Z > P$ d) $Z = 0$
- 7) 'Centroid' of asymptotes is a point which _____.
 a) may be real or complex
 b) is real but may or may not lie on the root locus
 c) is real and always lies on the root locus
 d) is always imaginary
- 8) 'Phase Margin' is always calculated at _____.
 a) Corner frequency b) Phase cross-over frequency
 c) Gain cross-over frequency d) Highest magnitude

 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.
 4) Make suitable assumptions wherever necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the Correct answer.

14

- 1) When a composite wall of three layers in series having thermal resistances R_1, R_2 and R_3 respectively. The heat transfer takes place normal to the surface of the layers. How is the total thermal resistance of the composite system calculated?

a) $1/(R_1 + R_2 + R_3)$	b) $((1/R_1) + (1/R_2) + (1/R_3))$
c) $(R_1 + R_2 + R_3)$	d) None of the above
- 2) The critical radius of a hollow sphere having thermal conductivity k and h_0 as convective heat transfer coefficient of outer fluid is given by

a) h_0/k	b) k/h_0
c) $2k/h_0$	d) $h_0/2k$
- 3) In which of the following cases most unsteady heat flow occurs?
 - a) Through the walls of a furnace
 - b) Through lagged pipes carrying steam
 - c) Through the wall of a refrigerator
 - d) During annealing of castings
- 4) What is the purpose of using fins in a particular heat transfer system?
 - a) To decrease rate of heat transfer
 - b) To increase rate of heat transfer
 - c) To maintain rate of heat transfer at a constant rate
 - d) cannot say
- 5) Aluminum is used as a fin material because _____.
 - a) It has higher convection heat transfer coefficient
 - b) It has higher thermal conductivity
 - c) It has lower convection heat transfer coefficient
 - d) It has lower thermal conductivity
- 6) What is the relation between reflectivity (ρ), absorptivity (α) and transmissivity (τ)?

a) $\rho - \alpha + \tau = 1$	b) $\rho + \alpha - \tau = 1$
c) $\rho + \alpha + \tau = 1$	d) $\rho - \alpha - \tau = 1$

Heat Transfer (BTN02603)

Day & Date: Monday, 27-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) Solve any two questions from each section.
 2) Figures to the right indicate full marks.
 3) Assume suitable data wherever necessary.
 4) Use of scientific calculator is allowed.

Section – I

Q.2 Attempt the following questions.

- a) Define thermal conductivity. Explain the effect of temperature on thermal conductivity for solid, liquid and gases. **04**
- b) Derive the general heat conduction equation in three dimensions in Cartesian coordinates. **05**
- c) A wall of a furnace is made up of inside layer of silica brick 120 mm thick covered with layer of magnetite brick 240 mm thick. The temperature at the inside surface of silica brick wall and outside surface of magnetite brick wall are 725°C and 110°C respectively. The contact thermal resistance between the two walls at the interface is 0.0035°C/w per unit wall area. If thermal conductivities of silica and magnetite bricks are $1.7\text{W/m}^{\circ}\text{C}$ and $5.8\text{W/m}^{\circ}\text{C}$ Calculate **05**
- i) The rate of heat loss per unit area of walls, and
- ii) The temperature drop at the interface

Q.3 Attempt the following questions.

- a) Derive an expression for temperature distribution and heat flow rate for infinitely long fin. **04**
- b) Find out the amount of heat transferred through an iron fin of length 50 mm width 100 mm & thickness 5 mm Assume $k=210\text{W/m}^{\circ}\text{C}$ & $h=42\text{W/m}^2\text{C}$ for the material of fin and the temperature and the base of fin 80°C . Also determine the temperature at the tip of fin when atmosphere temperature 20°C **05**
- c) A small electrical heating application uses wire of 2mm diameter with 0.8 mm thick insulation ($k=0.12\text{W/m}^{\circ}\text{C}$). The heat transfer coefficient on the insulation surface is $35\text{W/m}^2\text{C}$. Determine the critical thickness of insulation in this case & the percentage change in the heat transfer rate if the critical thickness is used. Assuming that the temperature difference between the surface of the wire and surrounding air remains unchanged. **05**

Q.4 Attempt the following questions.

- a) Explain the following terms: **04**
- i) Solid angle.
- ii) Radiosity.
- iii) Irradiation.

- b) State Plank's law of radiation. Hence derive Wien's displacement law. 05
- c) Determine the rate of heat loss by radiation from a steel tube of outside diameter 70 mm and 3 m long at the temperature of 227°C. If the tube is located in a square brick conduit of 0.3 m side and 27°C. Take $\varepsilon_{(Steel)} = 0.79$ & $\varepsilon_{(brick)} = 0.93$ 05

Section – II

Q.5 Attempt the following question.

- a) Show by dimensional analysis, $Nu = f(Gr, Pr)$ for natural convection. 04
- b) Explain with neat sketch velocity and thermal boundary layer. 05
- c) The Crankcase of an I.C. Engine measuring 80cm × 20 cm may be idealized as a flat plate. The engine runs at 90 Km/hr & the crankcase is cooled by the air flowing past it at the same speed. Calculate the heat loss from the crank surface maintained at 85°C to the ambient air at 15 °C. Due to road induced vibration the boundary layer becomes turbulent from the leading edge itself. 05
- The Properties of air at 50°C are:
 $K = 0.02824 \text{ W/m } ^\circ\text{C}$, $\gamma = 17.95 \times 10^{-6} \text{ m/s}^2$, $Pr = 0.698$
 Use
 $Nu = 0.036(Re)^{0.8}(Pr)^{0.333}$

Q.6 Attempt the following questions.

- a) Define Condensation and explain its types. 04
- b) Draw typical pool boiling curve and explain various regimes of pool boiling. 05
- c) A counter flow double pipe heat exchanger using hot water at the rate of 10500 kg/h. the steam enters the heat exchanger at 180°C & leaves at 130°C . The inlet & exit temperatures of water are 30°C and 80°C resp. if overall heat transfer coefficient from steam to water is 814 W/m²°C .Calculate the heat transfer area. What would be the increase in area if fluid flow were parallel. Take specific heat of water 4.187 KJ/Kg K. 05

Q.7 Attempt the following questions.

- a) Explain Heat Pipe working and its applications. 04
- b) Derive an expression for determining the LMTD of parallel flow heat exchanger. 05
- c) A chemical having specific heat of 3.3 KJ/KgK flowing at the rate of 20000 Kg/hr. enters the parallel flow heat exchanger at 120°C. The flow rate of cooling water is 50000 Kg/hr having specific heat of 4.186 KJ/KgK with an inlet temperature 20°C. The heat transfer area is 10 m² and the overall heat transfer coefficient is 1050 W/m²K. 05
- Find:
- i) The effectiveness of heat exchanger
 - ii) The outlet temperature of water and chemical

 4) Make suitable assumptions wherever necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the Correct answer.

14

- 1) A _____ body reflects entire radiation incident on it.
 - a) Transparent
 - b) Black
 - c) Gray
 - d) White
- 2) In a film condensation, the vertical plate temperature should be _____.
 - a) More than the saturation temperature of the vapour
 - b) Less than the saturation temperature of the vapour
 - c) Equal to the saturation temperature of the vapour
 - d) None of the above
- 3) _____ number is generally associated with only natural convection heat transfer.
 - a) Prandtl
 - b) Weber
 - c) Nusselt
 - d) Grashoff
- 4) The thickness of thermal boundary layer is equal to that of hydrodynamic boundary layer when Prandtl number is _____.
 - a) 0
 - b) 0.1
 - c) 0.5
 - d) 1.0
- 5) An automobile radiator is _____ type of heat exchanger.
 - a) cross-flow
 - b) regenerator
 - c) counter-flow
 - d) recuperator
- 6) For the same heat transfer Q and, same overall, heat transfer coefficient U_0 , surface area required for counter flow operation is always _____.
 - a) less than parallel flow
 - b) more than parallel flow
 - c) same as parallel flow
 - d) unpredictable

- 7) In parallel flow heat exchangers,
- the exit temperature of hot fluid is always equal to the exit temperature of cold fluid
 - the exit temperature of hot fluid is always less than the exit temperature of cold fluid
 - the exit temperature of hot fluid is always more than the exit temperature of cold fluid
 - we cannot predict comparison between exit temperatures of hot fluid and cold fluid
- 8) When a composite wall of three layers in series having thermal resistances R_1, R_2 and R_3 respectively. The heat transfer takes place normal to the surface of the layers. How is the total thermal resistance of the composite system calculated?
- $1/(R_1 + R_2 + R_3)$
 - $((1/R_1) + (1/R_2) + (1/R_3))$
 - $(R_1 + R_2 + R_3)$
 - None of the above
- 9) The critical radius of a hollow sphere having thermal conductivity k and h_0 as convective heat transfer coefficient of outer fluid is given by
- h_0/k
 - k/h_0
 - $2k/h_0$
 - $h_0/2k$
- 10) In which of the following cases most unsteady heat flow occurs?
- Through the walls of a furnace
 - Through lagged pipes carrying steam
 - Through the wall of a refrigerator
 - During annealing of castings
- 11) What is the purpose of using fins in a particular heat transfer system?
- To decrease rate of heat transfer
 - To increase rate of heat transfer
 - To maintain rate of heat transfer at a constant rate
 - cannot say
- 12) Aluminum is used as a fin material because _____.
- It has higher convection heat transfer coefficient
 - It has higher thermal conductivity
 - It has lower convection heat transfer coefficient
 - It has lower thermal conductivity
- 13) What is the relation between reflectivity (ρ), absorptivity (α) and transmissivity (τ)?
- $\rho - \alpha + \tau = 1$
 - $\rho + \alpha - \tau = 1$
 - $\rho + \alpha + \tau = 1$
 - $\rho - \alpha - \tau = 1$
- 14) Unit of thermal diffusivity _____.
- m/s^2
 - m^2/s
 - J/s
 - None of the above

Seat No.

Q.2 Attempt the following questions.

- a) Define thermal conductivity. Explain the effect of temperature on thermal conductivity for solid, liquid and gases. **04**
- b) Derive the general heat conduction equation in three dimensions in Cartesian coordinates. **05**
- c) A wall of a furnace is made up of inside layer of silica brick 120 mm thick covered with layer of magnetite brick 240 mm thick. The temperature at the inside surface of silica brick wall and outside surface of magnetite brick wall are 725°C and 110°C respectively. The contact thermal resistance between the two walls at the interface is $0.0035^{\circ}\text{C}/\text{W}$ per unit wall area. If thermal conductivities of silica and magnetite bricks are $1.7\text{W}/\text{m}^{\circ}\text{C}$ and $5.8\text{W}/\text{m}^{\circ}\text{C}$ Calculate
- i) The rate of heat loss per unit area of walls, and
 - ii) The temperature drop at the interface

Q.3 Attempt the following questions.

- a) Derive an expression for temperature distribution and heat flow rate for infinitely long fin. **04**
- b) Find out the amount of heat transferred through an iron fin of length 50 mm width 100 mm & thickness 5 mm Assume $k=210\text{W}/\text{m}^{\circ}\text{C}$ & $h=42\text{W}/\text{m}^2\text{C}$ for the material of fin and the temperature and the base of fin 80°C . Also determine the temperature at the tip of fin when atmosphere temperature 20°C **05**
- c) A small electrical heating application uses wire of 2mm diameter with 0.8 mm thick insulation ($k=0.12\text{W}/\text{m}^{\circ}\text{C}$). The heat transfer coefficient on the insulation surface is $35\text{W}/\text{m}^2\text{C}$. Determine the critical thickness of insulation in this case & the percentage change in the heat transfer rate if the critical thickness is used. Assuming that the temperature difference between the surface of the wire and surrounding air remains unchanged. **05**

Q.4 Attempt the following questions.

- a) Explain the following terms: **04**
- i) Solid angle.
 - ii) Radiosity.
 - iii) Irradiation.

- b) State Plank's law of radiation. Hence derive Wien's displacement law. 05
- c) Determine the rate of heat loss by radiation from a steel tube of outside diameter 70 mm and 3 m long at the temperature of 227°C. If the tube is located in a square brick conduit of 0.3 m side and 27°C. Take $\varepsilon_{(Steel)} = 0.79$ & $\varepsilon_{(brick)} = 0.93$ 05

Section – II

Q.5 Attempt the following question.

- a) Show by dimensional analysis, $Nu = f(Gr, Pr)$ for natural convection. 04
- b) Explain with neat sketch velocity and thermal boundary layer. 05
- c) The Crankcase of an I.C. Engine measuring 80cm × 20 cm may be idealized as a flat plate. The engine runs at 90 Km/hr & the crankcase is cooled by the air flowing past it at the same speed. Calculate the heat loss from the crank surface maintained at 85°C to the ambient air at 15 °C. Due to road induced vibration the boundary layer becomes turbulent from the leading edge itself. 05
- The Properties of air at 50°C are:
 $K = 0.02824 \text{ W/m } ^\circ\text{C}$, $\gamma = 17.95 \times 10^{-6} \text{ m/s}^2$, $Pr = 0.698$
 Use
 $Nu = 0.036(Re)^{0.8}(Pr)^{0.333}$

Q.6 Attempt the following questions.

- a) Define Condensation and explain its types. 04
- b) Draw typical pool boiling curve and explain various regimes of pool boiling. 05
- c) A counter flow double pipe heat exchanger using hot water at the rate of 10500 kg/h. the steam enters the heat exchanger at 180°C & leaves at 130°C . The inlet & exit temperatures of water are 30°C and 80°C resp. if overall heat transfer coefficient from steam to water is 814 W/m²°C .Calculate the heat transfer area. What would be the increase in area if fluid flow were parallel. Take specific heat of water 4.187 KJ/Kg K. 05

Q.7 Attempt the following questions.

- a) Explain Heat Pipe working and its applications. 04
- b) Derive an expression for determining the LMTD of parallel flow heat exchanger. 05
- c) A chemical having specific heat of 3.3 KJ/KgK flowing at the rate of 20000 Kg/hr. enters the parallel flow heat exchanger at 120°C. The flow rate of cooling water is 50000 Kg/hr having specific heat of 4.186 KJ/KgK with an inlet temperature 20°C. The heat transfer area is 10 m² and the overall heat transfer coefficient is 1050 W/m²K. 05
- Find:
- i) The effectiveness of heat exchanger
 - ii) The outlet temperature of water and chemical

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING
Heat Transfer (BTN02603)

Day & Date: Monday, 27-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.
 4) Make suitable assumptions wherever necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the Correct answer.

14

- 1) What is the relation between reflectivity (ρ), absorptivity (α) and transmissivity (τ)?
 - a) $\rho - \alpha + \tau = 1$
 - b) $\rho + \alpha - \tau = 1$
 - c) $\rho + \alpha + \tau = 1$
 - d) $\rho - \alpha - \tau = 1$
- 2) Unit of thermal diffusivity _____.
 - a) m/s^2
 - b) m^2/s
 - c) J/s
 - d) None of the above
- 3) A _____ body reflects entire radiation incident on it.
 - a) Transparent
 - b) Black
 - c) Gray
 - d) White
- 4) In a film condensation, the vertical plate temperature should be _____.
 - a) More than the saturation temperature of the vapour
 - b) Less than the saturation temperature of the vapour
 - c) Equal to the saturation temperature of the vapour
 - d) None of the above
- 5) _____ number is generally associated with only natural convection heat transfer.
 - a) Prandtl
 - b) Weber
 - c) Nusselt
 - d) Grashoff
- 6) The thickness of thermal boundary layer is equal to that of hydrodynamic boundary layer when Prandtl number is _____.
 - a) 0
 - b) 0.1
 - c) 0.5
 - d) 1.0
- 7) An automobile radiator is _____ type of heat exchanger.
 - a) cross-flow
 - b) regenerator
 - c) counter-flow
 - d) recuperator
- 8) For the same heat transfer Q and, same overall, heat transfer coefficient U_0 , surface area required for counter flow operation is always _____.
 - a) less than parallel flow
 - b) more than parallel flow
 - c) same as parallel flow
 - d) unpredictable

- 9) In parallel flow heat exchangers,
- the exit temperature of hot fluid is always equal to the exit temperature of cold fluid
 - the exit temperature of hot fluid is always less than the exit temperature of cold fluid
 - the exit temperature of hot fluid is always more than the exit temperature of cold fluid
 - we cannot predict comparison between exit temperatures of hot fluid and cold fluid
- 10) When a composite wall of three layers in series having thermal resistances R_1 , R_2 and R_3 respectively. The heat transfer takes place normal to the surface of the layers. How is the total thermal resistance of the composite system calculated?
- $1/(R_1 + R_2 + R_3)$
 - $((1/R_1) + (1/R_2) + (1/R_3))$
 - $(R_1 + R_2 + R_3)$
 - None of the above
- 11) The critical radius of a hollow sphere having thermal conductivity k and h_0 as convective heat transfer coefficient of outer fluid is given by
- h_0/k
 - k/h_0
 - $2k/h_0$
 - $h_0/2k$
- 12) In which of the following cases most unsteady heat flow occurs?
- Through the walls of a furnace
 - Through lagged pipes carrying steam
 - Through the wall of a refrigerator
 - During annealing of castings
- 13) What is the purpose of using fins in a particular heat transfer system?
- To decrease rate of heat transfer
 - To increase rate of heat transfer
 - To maintain rate of heat transfer at a constant rate
 - cannot say
- 14) Aluminum is used as a fin material because _____.
- It has higher convection heat transfer coefficient
 - It has higher thermal conductivity
 - It has lower convection heat transfer coefficient
 - It has lower thermal conductivity

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING
Heat Transfer (BTN02603)

Day & Date: Monday, 27-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) Solve any two questions from each section.
 2) Figures to the right indicate full marks.
 3) Assume suitable data wherever necessary.
 4) Use of scientific calculator is allowed.

Section – I

Q.2 Attempt the following questions.

- a) Define thermal conductivity. Explain the effect of temperature on thermal conductivity for solid, liquid and gases. **04**
- b) Derive the general heat conduction equation in three dimensions in Cartesian coordinates. **05**
- c) A wall of a furnace is made up of inside layer of silica brick 120 mm thick covered with layer of magnetite brick 240 mm thick. The temperature at the inside surface of silica brick wall and outside surface of magnetite brick wall are 725°C and 110°C respectively. The contact thermal resistance between the two walls at the interface is $0.0035^{\circ}\text{C}/\text{W}$ per unit wall area. If thermal conductivities of silica and magnetite bricks are $1.7\text{W}/\text{m}^{\circ}\text{C}$ and $5.8\text{W}/\text{m}^{\circ}\text{C}$ Calculate
 i) The rate of heat loss per unit area of walls, and
 ii) The temperature drop at the interface **05**

Q.3 Attempt the following questions.

- a) Derive an expression for temperature distribution and heat flow rate for infinitely long fin. **04**
- b) Find out the amount of heat transferred through an iron fin of length 50 mm width 100 mm & thickness 5 mm Assume $k=210\text{W}/\text{m}^{\circ}\text{C}$ & $h=42\text{W}/\text{m}^2\text{C}$ for the material of fin and the temperature and the base of fin 80°C . Also determine the temperature at the tip of fin when atmosphere temperature 20°C **05**
- c) A small electrical heating application uses wire of 2mm diameter with 0.8 mm thick insulation ($k=0.12\text{W}/\text{m}^{\circ}\text{C}$). The heat transfer coefficient on the insulation surface is $35\text{W}/\text{m}^2\text{C}$. Determine the critical thickness of insulation in this case & the percentage change in the heat transfer rate if the critical thickness is used. Assuming that the temperature difference between the surface of the wire and surrounding air remains unchanged. **05**

Q.4 Attempt the following questions.

- a) Explain the following terms: **04**
 i) Solid angle.
 ii) Radiosity.
 iii) Irradiation.

- b) State Plank's law of radiation. Hence derive Wien's displacement law. **05**
- c) Determine the rate of heat loss by radiation from a steel tube of outside diameter 70 mm and 3 m long at the temperature of 227°C. If the tube is located in a square brick conduit of 0.3 m side and 27°C. Take $\varepsilon_{(Steel)} = 0.79$ & $\varepsilon_{(brick)} = 0.93$ **05**

Section – II

Q.5 Attempt the following question.

- a) Show by dimensional analysis, $Nu = f(Gr, Pr)$ for natural convection. **04**
- b) Explain with neat sketch velocity and thermal boundary layer. **05**
- c) The Crankcase of an I.C. Engine measuring 80cm × 20 cm may be idealized as a flat plate. The engine runs at 90 Km/hr & the crankcase is cooled by the air flowing past it at the same speed. Calculate the heat loss from the crank surface maintained at 85°C to the ambient air at 15 °C. Due to road induced vibration the boundary layer becomes turbulent from the leading edge itself. **05**
- The Properties of air at 50°C are:
 $K = 0.02824 \text{ W/m } ^\circ\text{C}$, $\gamma = 17.95 \times 10^{-6} \text{ m/s}^2$, $Pr = 0.698$
 Use
 $Nu = 0.036(Re)^{0.8}(Pr)^{0.333}$

Q.6 Attempt the following questions.

- a) Define Condensation and explain its types. **04**
- b) Draw typical pool boiling curve and explain various regimes of pool boiling. **05**
- c) A counter flow double pipe heat exchanger using hot water at the rate of 10500 kg/h. the steam enters the heat exchanger at 180°C & leaves at 130°C . The inlet & exit temperatures of water are 30°C and 80°C resp. if overall heat transfer coefficient from steam to water is 814 W/m²°C .Calculate the heat transfer area. What would be the increase in area if fluid flow were parallel. Take specific heat of water 4.187 KJ/Kg K. **05**

Q.7 Attempt the following questions.

- a) Explain Heat Pipe working and its applications. **04**
- b) Derive an expression for determining the LMTD of parallel flow heat exchanger. **05**
- c) A chemical having specific heat of 3.3 KJ/KgK flowing at the rate of 20000 Kg/hr. enters the parallel flow heat exchanger at 120°C. The flow rate of cooling water is 50000 Kg/hr having specific heat of 4.186 KJ/KgK with an inlet temperature 20°C. The heat transfer area is 10 m² and the overall heat transfer coefficient is 1050 W/m²K. **05**
- Find:
- The effectiveness of heat exchanger
 - The outlet temperature of water and chemical

Industrial & Quality Management (BTN02604)

Day & Date: Wednesday, 29-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No.3 (starting page of the Answer Book). Each question carry one mark.
- 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
- 3) Draw neat-labelled diagrams wherever necessary.
- 4) Figures to right indicate full marks.
- 5) Use of log table and calculators is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct option from the following.

14

- 1) _____ is defined as "the discipline dealing with what is good & bad & with moral duty & obligation".
 - a) Rule
 - b) Organisation culture
 - c) Protocol
 - d) Ethics
- 2) _____ Managers are the real 'team manager' in grid type.
 - a) 1.9
 - b) 5.5
 - c) 9.1
 - d) 9.9
- 3) In _____ concept product enjoys the supreme importance.
 - a) Selling
 - b) Marketing
 - c) Manufacturing
 - d) Business
- 4) Close control, close supervision is advantage of _____.
 - a) Narrow span
 - b) Wide span
 - c) Close span
 - d) Open span
- 5) The responsibilities of the operations manager include _____.
 - a) Planning, organizing, staffing, procuring and reviewing
 - b) Forecasting, designing, planning, organizing, and controlling
 - c) Forecasting, designing operating, procuring, and reviewing
 - d) Planning, organizing, staffing, leading, and controlling
 - e) Designing & operating
- 6) Self esteem, status affiliation with others, affection those come under _____ needs.
 - a) Basic
 - b) Primary
 - c) Third level of
 - d) Secondary
- 7) _____ is ability of individual or group to induce or influence the beliefs or action of other person or group.
 - a) Power
 - b) Authority
 - c) Post
 - d) Leadership

- 8) The basic objective of quality control in any organisation is to _____.
a) Quality development, quality maintenance and quality improvement activities in organization
b) Achieve optimum cost
c) Achieve customer's satisfaction
d) Achieve all the above
- 9) Cost associated with defective products being shipped to the customers are called as _____.
a) Cost of internal failure
b) Total cost of failure
c) Rejection cost
d) Cost of external failure
- 10) For identification of vital few for the given data, the tool used is _____.
a) Cause-Effect diagram
b) Scatter diagram
c) Pareto Analysis
d) Check Sheet
- 11) Total quality management (TQM) mainly aims for _____.
a) Control for quality
b) Usefulness of product
c) Customer satisfaction
d) Cost control
- 12) The statistician who invented the control chart for use in industrial quality control was:
a) Deming
b) Taguchi
c) Pareto
d) Shewhart
e) None of the above
- 13) The method of accepting or rejecting the lot is known as _____.
a) Lot sampling
b) Acceptance sampling
c) Batch sampling
d) Quality control
- 14) In double sampling plan, second sample is taken when the number of defectives _____.
a) $>C1$ but $<C2$
b) $>C1$
c) $>C1$ and $C2$
d) $<C2$

Day & Date: Wednesday, 29-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) Question no. 3 is compulsory in section I, and solve any two questions from the remaining. (Q. No. 2, 4 & 5)
 2) Question no. 6 is compulsory in section II, and solve any two questions from the remaining. (Q. No. 7, 8 & 9)
 3) Figures to the right indicate full marks.
 4) Draw neat-labelled diagrams wherever necessary.
 5) Use of log table and calculators is allowed.

Section – I

- Q.2** a) What are managerial skills and managerial roles? **05**
 b) Explain the financial management role, nature & functions of each department. **04**
- Q.3** a) What is planning? Explain advantages and disadvantages of planning? **05**
 b) What are the types of organizations? Explain Problems with organizational level. **05**
- Q.4** a) Define Leadership. Explain four extreme styles. **05**
 b) Discuss types of communication by taking suitable example. **04**
- Q.5 Write short note on (Any Three)** **09**
 a) Channel of distribution
 b) Social responsibilities in management.
 c) Methods of Departmentation
 d) Explain Maslow's theory
 e) Decision making

Section – II

- Q.6** a) What is meaning of quality of design and quality of conformance? Explain the factors affecting quality of design. **05**
 b) Differentiate between: Cost of quality & value of quality. **05**
- Q.7** a) How employee involvement affects organization performance? What are various ways to improve employee involvement? **05**
 b) List seven quality control tools. Explain with neat sketches Pareto analysis, Scatter diagram and cause and effect diagram. **04**

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING
Industrial & Quality Management (BTN02604)

Day & Date: Wednesday, 29-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No.3 (starting page of the Answer Book). Each question carry one mark.
- 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
- 3) Draw neat-labelled diagrams wherever necessary.
- 4) Figures to right indicate full marks.
- 5) Use of log table and calculators is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct option from the following.

14

- 1) Self esteem, status affiliation with others, affection those come under _____ needs.

a) Basic	b) Primary
c) Third level of	d) Secondary
- 2) _____ is ability of individual or group to induce or influence the beliefs or action of other person or group.

a) Power	b) Authority
c) Post	d) Leadership
- 3) The basic objective of quality control in any organisation is to _____.

a) Quality development, quality maintenance and quality improvement activities in organization
b) Achieve optimum cost
c) Achieve customer's satisfaction
d) Achieve all the above
- 4) Cost associated with defective products being shipped to the customers are called as _____.

a) Cost of internal failure	b) Total cost of failure
c) Rejection cost	d) Cost of external failure
- 5) For identification of vital few for the given data, the tool used is _____.

a) Cause-Effect diagram	b) Scatter diagram
c) Pareto Analysis	d) Check Sheet
- 6) Total quality management (TQM) mainly aims for _____.

a) Control for quality	b) Usefulness of product
c) Customer satisfaction	d) Cost control

- 7) The statistician who invented the control chart for use in industrial quality control was:
- a) Deming
 - b) Taguchi
 - c) Pareto
 - d) Shewhart
 - e) None of the above
- 8) The method of accepting or rejecting the lot is known as _____.
- a) Lot sampling
 - b) Acceptance sampling
 - c) Batch sampling
 - d) Quality control
- 9) In double sampling plan, second sample is taken when the number of defectives _____.
- a) $>C1$ but $<C2$
 - b) $>C1$
 - c) $>C1$ and $C2$
 - d) $<C2$
- 10) _____ is defined as “the discipline dealing with what is good & bad & with moral duty & obligation”.
- a) Rule
 - b) Organisation culture
 - c) Protocol
 - d) Ethics
- 11) _____ Managers are the real ‘team manager’ in grid type.
- a) 1.9
 - b) 5.5
 - c) 9.1
 - d) 9.9
- 12) In _____ concept product enjoys the supreme importance.
- a) Selling
 - b) Marketing
 - c) Manufacturing
 - d) Business
- 13) Close control, close supervision is advantage of _____.
- a) Narrow span
 - b) Wide span
 - c) Close span
 - d) Open span
- 14) The responsibilities of the operations manager include _____.
- a) Planning, organizing, staffing, procuring and reviewing
 - b) Forecasting, designing, planning, organizing, and controlling
 - c) Forecasting, designing operating, procuring, and reviewing
 - d) Planning, organizing, staffing, leading, and controlling
 - e) Designing & operating

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING
Industrial & Quality Management (BTN02604)

Day & Date: Wednesday, 29-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) Question no. 3 is compulsory in section I, and solve any two questions from the remaining. (Q. No. 2, 4 & 5)
 2) Question no. 6 is compulsory in section II, and solve any two questions from the remaining. (Q. No. 7, 8 & 9)
 3) Figures to the right indicate full marks.
 4) Draw neat-labelled diagrams wherever necessary.
 5) Use of log table and calculators is allowed.

Section – I

- Q.2** a) What are managerial skills and managerial roles? **05**
 b) Explain the financial management role, nature & functions of each department. **04**
- Q.3** a) What is planning? Explain advantages and disadvantages of planning? **05**
 b) What are the types of organizations? Explain Problems with organizational level. **05**
- Q.4** a) Define Leadership. Explain four extreme styles. **05**
 b) Discuss types of communication by taking suitable example. **04**
- Q.5 Write short note on (Any Three) 09**
 a) Channel of distribution
 b) Social responsibilities in management.
 c) Methods of Departmentation
 d) Explain Maslow's theory
 e) Decision making

Section – II

- Q.6** a) What is meaning of quality of design and quality of conformance? Explain the factors affecting quality of design. **05**
 b) Differentiate between: Cost of quality & value of quality. **05**
- Q.7** a) How employee involvement affects organization performance? What are various ways to improve employee involvement? **05**
 b) List seven quality control tools. Explain with neat sketches Pareto analysis, Scatter diagram and cause and effect diagram. **04**

- Q.8** **a)** A manufacturer purchases small bolts in cartons that usually contain several thousand bolts. Each shipment consists of a number of cartons. As a part of acceptance procedure for these bolts 400 bolts are selected at random from each carton and are subjected to visual inspection for certain defects. In shipment 10 cartons the respective percentage of defectives in the sample from each carton are 0, 0, 0.5, 0.75, 0, 2.0, 0.25, 0, 0.25 and 1.25. Does this shipment of bolts appear to exhibit statistical control with respect to the quality characteristics examined in the inspection? **05**
- b)** Explain actual and ideal OC curve for a sampling plan. Also explain all concepts such as producer's risk, consumer's risk. **04**
- Q.9** **Write short note on (Any Three)** **09**
- a)** Need of Environment management system
 - b)** Supplier partnership
 - c)** Appraisal costs and Prevention costs
 - d)** X bar chart
 - e)** Six Sigma.

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING
Project Management (BTN02608)

Day & Date: Friday, 31-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.
 4) Make Suitable assumptions wherever necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options.

14

- 1) Project is a _____ endeavor.

a) Temporary	b) Permanent
c) Perpetual	d) None of the above
- 2) Which from the following represents the correct project cycle?

a) Planning → Initiating → Executing → Closing
b) Planning → Executing → Initiating → Closing
c) Initiating → Planning → Executing → Closing
d) Initiating → Executing → Planning → Closing
- 3) Which stage of project management life cycle requires the maximum time of completion _____.

a) Conceptualization	b) Planning
c) Execution	d) Estimation
- 4) What file extension is used for Microsoft Project files?

a) .mpp	b) .mpd
c) .mcm	d) .pct
- 5) Fill in the blank. There is _____ correlation between project complexity and project risk. Select one:

a) an unknown	b) a positive
c) no	d) a negative
- 6) The cash inflows and (outflows) associated with a project are as follows: At start (120000), Year 1: 40000, Year 2: 50000, Year 3: 60000, Residual Value (at the end of 3rd year): 20000. The payback period for this project would be:

a) 2 years and 3 months	b) 2 years and 6 months
c) 3 years	d) 2 years
- 7) Which of the following represents the estimated value of the work actually accomplished?

a) Earned value (EV)	b) Planned value (PV)
c) Actual cost (AC)	d) Cost variance (CV)

8) A company is considering investing surplus funds in a project. Calculate the NPV at 7 % discount rate for the following data:

Project	Year 0	Year 1	Year 2
A	(200)	200	200

- a) 161.60
 - b) 1.6160
 - c) 16.160
 - d) 200
- 9) From the following calculate critical Path Duration in days
Activity: 1-2 2-3 2-4 3-5 4-6 5-6
Duration: 3 4 3 3 2 2
- a) 13 days
 - b) 8 days
 - c) 11 days
 - d) 12 days
- 10) The probability of completing the project can be estimated based upon the _____.
- a) Uniform distribution curve
 - b) Exponential distribution curve
 - c) U-shaped distribution curve
 - d) Normal distribution curve
- 11) With respect to PERT and CPM, slack _____.
- a) is a task or subproject that must be completed
 - b) marks the start or completion of a task
 - c) is the latest time an activity can be started without delaying the entire project.
 - d) is the amount of time a task may be delayed without changing the overall project completion time.
- 12) Scheduling used to determine:
- a) overall project duration
 - b) project cost estimating
 - c) the project management plan
 - d) sub-contractor’s responsibilities
- 13) A communication management plan identifies the relevant information that should be communicated to:
- a) the project team
 - b) the project stakeholders
 - c) the project board
 - d) the project sponsor
- 14) For an activity in a CPM analysis, the early Finish time is 13 and the late Finish time is 13. Duration of activity is 6. Which of the following statements is true?
- a) The early start is 6
 - b) The duration of the activity is 13
 - c) The slack of this activity is 13
 - d) The activity is on the critical path

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING
Project Management (BTN02608)

Day & Date: Friday, 31-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

Instructions: 1) Solve any two questions from each Section.
 2) Figures to the right indicates full marks.

Section – I

- Q.2** a) Explain role of Project Manager. **05**
 b) Explain the phases of a project life cycle. **05**
 c) State various numerical/financial models used in project feasibility study. **04**
 Explain NPV.
- Q.3** a) Explain break even analysis with its importance in project management. **05**
 b) What are scoring models? Explain weighted scoring model in project selection. **05**
 c) Explain project feasibility studies. **04**
- Q.4** a) State the various project cost-estimating methods. Explain any one methods in detail. **05**
 b) What is risk management? Explain steps in risk management. **05**
 c) Write a short note on Monte Carlo Simulation. **04**

Section – II

- Q.5** a) Explain Purpose of Project Execution and Control. **05**
 b) An R & D project has a list of tasks to be performed whose time estimates are given in the Table as follows. **05**
 i) Draw the project network.
 ii) Find the critical path.

Activity i j	Activity Name	T ₀	t _m (in days)	t _p
1-2	A	4	6	8
1-3	B	2	3	10
1-4	C	6	8	16
2-4	D	1	2	3
3-4	E	6	7	8
3-5	F	6	7	14
4-6	G	3	5	7
4-7	H	4	11	12
5-7	I	2	4	6
6-7	J	2	9	10

- c) Explain CPM and PERT. How they are different from each other? **04**

- | | | |
|------------|---------------------------------------------------------------------------------------------------------------------------------------------|-----------|
| Q.6 | a) What is Project Controlling? Explain various steps in Project Control Process. | 05 |
| | b) Write a short note on Work Breakdown Structure (WBS) | 05 |
| | c) Explain Project Management Information System (PMIS) | 04 |
| Q.7 | a) Explain importance of Project Performance measurement. Explain Benefits and Challenges of Performance Measurement and Evaluation. | 05 |
| | b) Explain Resource levelling and smoothing with example. | 05 |
| | c) Write a short note on Use of MS Projects in Project Management. | 04 |

2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make Suitable assumptions wherever necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options. 14

1) A company is considering investing surplus funds in a project. Calculate the NPV at 7 % discount rate for the following data:

Table with 4 columns: Project, Year 0, Year 1, Year 2. Row 1: A, (200), 200, 200

- a) 161.60 b) 1.6160
c) 16.160 d) 200
2) From the following calculate critical Path Duration in days
Activity: 1-2 2-3 2-4 3-5 4-6 5-6
Duration: 3 4 3 3 2 2
a) 13 days b) 8 days
c) 11 days d) 12 days
3) The probability of completing the project can be estimated based upon the _____.
a) Uniform distribution curve b) Exponential distribution curve
c) U-shaped distribution curve d) Normal distribution curve
4) With respect to PERT and CPM, slack _____.
a) is a task or subproject that must be completed
b) marks the start or completion of a task
c) is the latest time an activity can be started without delaying the entire project.
d) is the amount of time a task may be delayed without changing the overall project completion time.
5) Scheduling used to determine:
a) overall project duration
b) project cost estimating
c) the project management plan
d) sub-contractor's responsibilities

- 6) A communication management plan identifies the relevant information that should be communicated to:
- a) the project team
 - b) the project stakeholders
 - c) the project board
 - d) the project sponsor
- 7) For an activity in a CPM analysis, the early Finish time is 13 and the late Finish time is 13. Duration of activity is 6. Which of the following statements is true?
- a) The early start is 6
 - b) The duration of the activity is 13
 - c) The slack of this activity is 13
 - d) The activity is on the critical path
- 8) Project is a _____ endeavor.
- a) Temporary
 - b) Permanent
 - c) Perpetual
 - d) None of the above
- 9) Which from the following represents the correct project cycle?
- a) Planning → Initiating → Executing → Closing
 - b) Planning → Executing → Initiating → Closing
 - c) Initiating → Planning → Executing → Closing
 - d) Initiating → Executing → Planning → Closing
- 10) Which stage of project management life cycle requires the maximum time of completion _____.
- a) Conceptualization
 - b) Planning
 - c) Execution
 - d) Estimation
- 11) What file extension is used for Microsoft Project files?
- a) .mpp
 - b) .mpd
 - c) .mcm
 - d) .pct
- 12) Fill in the blank. There is _____ correlation between project complexity and project risk. Select one:
- a) an unknown
 - b) a positive
 - c) no
 - d) a negative
- 13) The cash inflows and (outflows) associated with a project are as follows: At start (120000), Year 1: 40000, Year 2: 50000, Year 3: 60000, Residual Value (at the end of 3rd year): 20000. The payback period for this project would be:
- a) 2 years and 3 months
 - b) 2 years and 6 months
 - c) 3 years
 - d) 2 years
- 14) Which of the following represents the estimated value of the work actually accomplished?

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options. 14

- 1) The cash inflows and (outflows) associated with a project are as follows: At start (120000), Year 1: 40000, Year 2: 50000, Year 3: 60000, Residual Value (at the end of 3rd year): 20000. The payback period for this project would be:
 a) 2 years and 3 months b) 2 years and 6 months
 c) 3 years d) 2 years
- 2) Which of the following represents the estimated value of the work actually accomplished?
 a) Earned value (EV) b) Planned value (PV)
 c) Actual cost (AC) d) Cost variance (CV)
- 3) A company is considering investing surplus funds in a project. Calculate the NPV at 7 % discount rate for the following data:

Project	Year 0	Year 1	Year 2
A	(200)	200	200

- a) 161.60 b) 1.6160
 c) 16.160 d) 200
- 4) From the *following calculate critical Path Duration in days*
 Activity: 1-2 2-3 2-4 3-5 4-6 5-6
 Duration: 3 4 3 3 2 2
 a) 13 days b) 8 days
 c) 11 days d) 12 days
- 5) The probability of completing the project can be estimated based upon the _____.
 a) Uniform distribution curve b) Exponential distribution curve
 c) U-shaped distribution curve d) Normal distribution curve

- 6) With respect to PERT and CPM, slack _____.
a) is a task or subproject that must be completed
b) marks the start or completion of a task
c) is the latest time an activity can be started without delaying the entire project.
d) is the amount of time a task may be delayed without changing the overall project completion time.
- 7) Scheduling used to determine:
a) overall project duration
b) project cost estimating
c) the project management plan
d) sub-contractor's responsibilities
- 8) A communication management plan identifies the relevant information that should be communicated to:
a) the project team
b) the project stakeholders
c) the project board
d) the project sponsor
- 9) For an activity in a CPM analysis, the early Finish time is 13 and the late Finish time is 13. Duration of activity is 6. Which of the following statements is true?
a) The early start is 6
b) The duration of the activity is 13
c) The slack of this activity is 13
d) The activity is on the critical path
- 10) Project is a _____ endeavor.
a) Temporary
b) Permanent
c) Perpetual
d) None of the above
- 11) Which from the following represents the correct project cycle?
a) Planning → Initiating → Executing → Closing
b) Planning → Executing → Initiating → Closing
c) Initiating → Planning → Executing → Closing
d) Initiating → Executing → Planning → Closing
- 12) Which stage of project management life cycle requires the maximum time of completion _____.
a) Conceptualization
b) Planning
c) Execution
d) Estimation
- 13) What file extension is used for Microsoft Project files?
a) .mpp
b) .mpd
c) .mcm
d) .pct
- 14) Fill in the blank. There is _____ correlation between project complexity and project risk. Select one:
a) an unknown
b) a positive
c) no
d) a negative

Seat No.

Set **S**

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING
Project Management (BTN02608)

Day & Date: Friday, 31-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

Instructions: 1) Solve any two questions from each Section.
 2) Figures to the right indicates full marks.

Section – I

- Q.2** a) Explain role of Project Manager. **05**
 b) Explain the phases of a project life cycle. **05**
 c) State various numerical/financial models used in project feasibility study. **04**
 Explain NPV.
- Q.3** a) Explain break even analysis with its importance in project management. **05**
 b) What are scoring models? Explain weighted scoring model in project selection. **05**
 c) Explain project feasibility studies. **04**
- Q.4** a) State the various project cost-estimating methods. Explain any one methods in detail. **05**
 b) What is risk management? Explain steps in risk management. **05**
 c) Write a short note on Monte Carlo Simulation. **04**

Section – II

- Q.5** a) Explain Purpose of Project Execution and Control. **05**
 b) An R & D project has a list of tasks to be performed whose time estimates are given in the Table as follows. **05**
 i) Draw the project network.
 ii) Find the critical path.

Activity i j	Activity Name	T_0	t_m (in days)	t_p
1-2	A	4	6	8
1-3	B	2	3	10
1-4	C	6	8	16
2-4	D	1	2	3
3-4	E	6	7	8
3-5	F	6	7	14
4-6	G	3	5	7
4-7	H	4	11	12
5-7	I	2	4	6
6-7	J	2	9	10

- c) Explain CPM and PERT. How they are different from each other? **04**

- | | | | |
|------------|-----------|-----------------------------------------------------------------------------------------------------------------------------------|-----------|
| Q.6 | a) | What is Project Controlling? Explain various steps in Project Control Process. | 05 |
| | b) | Write a short note on Work Breakdown Structure (WBS) | 05 |
| | c) | Explain Project Management Information System (PMIS) | 04 |
| Q.7 | a) | Explain importance of Project Performance measurement. Explain Benefits and Challenges of Performance Measurement and Evaluation. | 05 |
| | b) | Explain Resource levelling and smoothing with example. | 05 |
| | c) | Write a short note on Use of MS Projects in Project Management. | 04 |

Seat No.

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING
Industrial Product Design (BTN02609)

Day & Date: Friday, 31-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No.3 (starting page of the Answer Book). Each question carry one mark.
 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 3) Figures to the right indicate full marks.
 4) Make suitable assumption if required.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Multiple Choice Questions.

14

- 1) _____ is a three-dimensional area enclosed by a surface.
 - a) Form
 - b) Shape
 - c) Line
 - d) None of the above
- 2) The necessity to know the environment in which the product will be used is termed as _____.
 - a) Design Situation
 - b) Design Analysis
 - c) Aesthetics
 - d) Ergonomics
- 3) The purpose of _____ is to generate large number of ideas.
 - a) Idea Screening
 - b) Brain Storming
 - c) Concept development and Testing
 - d) Marketing Strategy Development
- 4) How can contrasting colors and clear labeling on machine controls enhance user-friendliness?
 - a) They add unnecessary complexity.
 - b) They make the machine less visible.
 - c) They improve user recognition and ease of operation.
 - d) They have no impact on usability.
- 5) What role does the psychology of scene play in industrial product design?
 - a) It has no relevance to product design.
 - b) It helps create appealing visuals.
 - c) It influences user perceptions and emotions.
 - d) It affects production costs.
- 6) How can the careful selection of materials and textures enhance the aesthetics of a product?
 - a) It doesn't impact aesthetics.
 - b) It increases manufacturing costs.
 - c) It can add depth, contrast, and tactile appeal to the design
 - d) It primarily affects the product's weight

- 7) What does the term "contrast" signify in aesthetic design?
- a) Making all elements in a design look the same
 - b) Using similar colours and shapes
 - c) The closeness of different elements to create visual interest
 - d) Achieving perfect symmetry in design
- 8) _____ helps in establishing the interchangeability of products.
- a) Standardization
 - b) Simplification
 - c) Diversification
 - d) Specialization
- 9) Consumer needs and requirements are known as _____ in QFD methodology.
- a) Consumer preferences
 - b) Voice of the customer
 - c) Expectations
 - d) Variety of need
- 10) The design for environment is essentially due to _____.
- a) Customer Demand
 - b) Government Laws
 - c) ISO Requirement
 - d) All of the above
- 11) Which of the following is (are) recommendation (s) of design for assembly?
- a) Design parts with self-locating features
 - b) Maximize the fasteners
 - c) Use modular design
 - d) Both A and C
- 12) The cost reduction technique in comparison to the worth of a product is known as _____.
- a) Reverse engineering
 - b) Value engineering
 - c) Material engineering
 - d) Quality engineering
- 13) _____ is the first step in finalizing target specifications/requirements of a product.
- a) Identify customer needs
 - b) Benchmark competitive product specifications,
 - c) Establish target specifications,
 - d) Perform economic analysis,
- 14) Which of the following is (are) closely related to the INTRODUCTION stage of the product life cycle?
- a) Demand
 - b) Advertisement and promotion
 - c) Both A and B
 - d) None of these

Seat No.

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING
Industrial Product Design (BTN02609)

Day & Date: Friday, 31-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) Attempt any two questions from each section.
 2) Make suitable assumptions if necessary and state it clearly.
 3) Figures to right indicates full marks.

Section – I

- Q.2 Attempt any two. 14**
- a) Identify and provide concise discussions on the Human factors influencing the design of industrial products.
 - b) Elaborate on how setting specifications and market requirements play a role in product design interpretation.
 - c) Create an ergonomic illustration of a wheelchair with accurate labeling.
- Q.3 Attempt any two. 14**
- a) Outline the key stages of the Design Thinking process, and describe the purpose of each stage.
 - b) Elaborate on idea Generation and provide guidance on how to execute a brainstorming session.
 - c) Outline some key design strategies that facilitate ease of manufacturing, as recommended by DFM guidelines?
- Q.4 Write short note (Any Two) 14**
- a) Psychology of Colour.
 - b) Mechanics of seeing with suitable examples.
 - c) Concept of aesthetics with suitable examples.

Section – II

- Q.5 Attempt any two. 14**
- a) Provide a short overview of the Empathize stage in Design Thinking.
 - b) Analyse and enlist the anthropometric specifications required for designing a control panel of CNC machine with sketch.
 - c) What are Human Factors in Design?
- Q.6 Attempt any two. 14**
- a) Enlist a few popular Computer- Aided Product Design (CAPD) software tools and discuss their specific features and applications in product design.
 - b) Create a comparison chart showing advantages of Additive manufacturing over subtractive manufacturing.
 - c) Enlist the techniques of rapid prototyping and elaborate any one in details using sketch.

Q.7 Write short notes on (Any Two)

- a) Principles of Design**
- b) Design Thinking**
- c) Product Planning**

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Multiple Choice Questions.**14**

- 1) _____ helps in establishing the interchangeability of products.

a) Standardization	b) Simplification
c) Diversification	d) Specialization
- 2) Consumer needs and requirements are known as _____ in QFD methodology.

a) Consumer preferences	b) Voice of the customer
c) Expectations	d) Variety of need
- 3) The design for environment is essentially due to _____.

a) Customer Demand	b) Government Laws
c) ISO Requirement	d) All of the above
- 4) Which of the following is (are) recommendation (s) of design for assembly?

a) Design parts with self-locating features	b) Maximize the fasteners
c) Use modular design	d) Both A and C
- 5) The cost reduction technique in comparison to the worth of a product is known as _____.

a) Reverse engineering	b) Value engineering
c) Material engineering	d) Quality engineering
- 6) _____ is the first step in finalizing target specifications/requirements of a product.

a) Identify customer needs	b) Benchmark competitive product specifications,
c) Establish target specifications,	d) Perform economic analysis,
- 7) Which of the following is (are) closely related to the INTRODUCTION stage of the product life cycle?

a) Demand	b) Advertisement and promotion
c) Both A and B	d) None of these

- 8) _____ is a three-dimensional area enclosed by a surface.
- a) Form
 - b) Shape
 - c) Line
 - d) None of the above
- 9) The necessity to know the environment in which the product will be used is termed as _____.
- a) Design Situation
 - b) Design Analysis
 - c) Aesthetics
 - d) Ergonomics
- 10) The purpose of _____ is to generate large number of ideas.
- a) Idea Screening
 - b) Brain Storming
 - c) Concept development and Testing
 - d) Marketing Strategy Development
- 11) How can contrasting colors and clear labeling on machine controls enhance user-friendliness?
- a) They add unnecessary complexity.
 - b) They make the machine less visible.
 - c) They improve user recognition and ease of operation.
 - d) They have no impact on usability.
- 12) What role does the psychology of scene play in industrial product design?
- a) It has no relevance to product design.
 - b) It helps create appealing visuals.
 - c) It influences user perceptions and emotions.
 - d) It affects production costs.
- 13) How can the careful selection of materials and textures enhance the aesthetics of a product?
- a) It doesn't impact aesthetics.
 - b) It increases manufacturing costs.
 - c) It can add depth, contrast, and tactile appeal to the design
 - d) It primarily affects the product's weight
- 14) What does the term "contrast" signify in aesthetic design?

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Multiple Choice Questions.**14**

- 1) How can the careful selection of materials and textures enhance the aesthetics of a product?
 - a) It doesn't impact aesthetics.
 - b) It increases manufacturing costs.
 - c) It can add depth, contrast, and tactile appeal to the design
 - d) It primarily affects the product's weight
- 2) What does the term "contrast" signify in aesthetic design?
 - a) Making all elements in a design look the same
 - b) Using similar colours and shapes
 - c) The closeness of different elements to create visual interest
 - d) Achieving perfect symmetry in design
- 3) _____ helps in establishing the interchangeability of products.

a) Standardization	b) Simplification
c) Diversification	d) Specialization
- 4) Consumer needs and requirements are known as _____ in QFD methodology.

a) Consumer preferences	b) Voice of the customer
c) Expectations	d) Variety of need
- 5) The design for environment is essentially due to _____.

a) Customer Demand	b) Government Laws
c) ISO Requirement	d) All of the above
- 6) Which of the following is (are) recommendation (s) of design for assembly?
 - a) Design parts with self-locating features
 - b) Maximize the fasteners
 - c) Use modular design
 - d) Both A and C
- 7) The cost reduction technique in comparison to the worth of a product is known as _____.

a) Reverse engineering	b) Value engineering
c) Material engineering	d) Quality engineering

Plastic Engineering (BTN02610)

Day & Date: Friday 31-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Multiple Choice Questions (Each Question 1 marks) 14

- 1) In addition polymerization reaction the polymer is formed in a _____ step.
 - a) Single
 - b) Three
 - c) Double
 - d) None
- 2) Polymers can be very _____ to chemicals.
 - a) Resistant
 - b) Similar
 - c) Opposite
 - d) None
- 3) Which of the following is an additive used for saving base plastic material?
 - a) Fillers
 - b) Plasticizers
 - c) Pigments
 - d) None of these
- 4) _____ is the most of commonly used manufacturing process for the plastic component.
 - a) Injection molding
 - b) Blow Molding
 - c) Transfer molding
 - d) Relational molding
- 5) The Rotational Molding is _____ plastic forming process.
 - a) High Temperature
 - b) Low temperature, High pressure
 - c) Low pressure
 - d) High Temperature, Low pressure
- 6) For the more precise dimensional stability of Thermosets, _____ is used.
 - a) Transfer moulding
 - b) Compression moulding
 - c) Any moulding process
 - d) Calendering
- 7) In _____ welding method, the workpieces to be joined are irradiated with a steam of neutron.
 - a) Infrared
 - b) Hot gas
 - c) Nuclear
 - d) Heated tool
- 8) Materials having a _____ shrinkage allowance can be molded with close tolerance.
 - a) Low
 - b) Medium
 - c) High
 - d) None

- 9) The ratio of volume of loose plastic powder to the volume of moulding is known as _____.
a) Clamping force b) Density factor
c) Bulk factor d) None
- 10) The depth of loading chamber is _____.
a) Inversely proportional to projected area
b) Inversely proportional to change in volume of plastic material
c) Directly proportional to projected area
d) None of the above
- 11) The heat to be removed by cooling circuits depend on _____.
a) Specific heat of material
b) Injection temperature of material
c) Latent heat of material
d) All of the above
- 12) The properties of the polymer will also depend on the _____ available for Cooling.
a) Time b) Area
c) Peed d) Momentum
- 13) Epoxy resin is example of _____ plastic.
a) Thermoplastics b) Elastomers
c) Thermosetting d) None
- 14) It is the _____ operation that sets the shape of thermoplastics.
a) Heating b) Grinding
c) Cutting d) Cooling

T. Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING
Plastic Engineering (BTN02610)

Day & Date: Friday 31-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

Instructions: 1) Solve any two questions from Section I & II.
 2) Figures to the right indicate full marks.

- Q.2 Descriptive Questions (Any Three) 14**
(a & b compulsory attempt any one from remaining)
- a) Explain the process of Injection moulding with a neat diagram. **05**
 b) Explain biodegradable plastics and composite plastics with applications. **05**
 c) Explain the different tests carried out on plastic material explain any one of them in detail **04**
 d) Explain the additives used in the plastics. **04**
- Q.3 Descriptive Questions (Any Three) 14**
(a & c compulsory attempt any one from remaining)
- a) What are different types of injection moulds? Explain one of them with neat sketch. **05**
 b) Explain design rules related to Ribs for plastic parts. **04**
 c) Explain with neat sketch hot gas welding? **05**
 d) Explain various tolerances and allowances considered for plastics parts design. **04**
- Q.4 Descriptive Questions (Any Three) 14**
(b & c compulsory attempt any one from remaining)
- a) What is Polymerization process? Explain its types with examples. **05**
 b) A product has to be designed for an assembly of body of spray bottle. The body of spray bottle has the dimensions as shown in the figure below. The plastic body of spray bottle cap has to be designed to fit on the top of the bottle. The top end of the bottle is having diameter of 50 mm and its nozzle 20 mm
- 
- c) Write short note on **03**
 1) Design of corners
 2) Design of ribs
 3) Design for minimum wall thickness
- d) Explain various tolerances and allowances considered for plastics parts design. **05**

Section – II

Q.5 Descriptive Questions.

14

- a) Design a compression mold for the component shown in figure below which is made up of melamine material. Take $K=2$; compression pressure= 90 kg/cm^2 ; density = 1.7 gm/cm^3 .

06

- b) Explain main parts of compression mould with neat sketch.

04

- c) Explain types transfer moulds and their main parts with neat sketch.

04

Q.6 Descriptive Questions (Any Three)

14

(c & d compulsory attempt any one from remaining)

- a) Explain Ejection System for Injection mould with neat sketch.

04

- b) Explain cooling system for injection mould with neat sketch.

04

- c) Write short note on-

05

- 1) Design of loading chamber
- 2) Design of punch

- d) Find out the cooling time required for a mould with heaviest wall thickness 40 mm, for polypropylene material with following properties-

05

Thermal conductivity= 0.22 w/m K Density= 0.545 gm/cm^3 Specific heat = 1.68 kJ/kg k **Q.7 Descriptive questions.**

14

- a) Explain with neat sketch automation in transfer mould.

04

- b) Explain with neat sketch construction of correct cooling system.

04

- c) A plastic material with temperature 200°C is injected to a mould with 2000 kg/hr . the latent heat of fusion of material is 100 kJ/kg . The temperature of water supplied is 60°C and water coming out from mould is 90°C . Find the total weight of water supplied per hour. [$k=30.5$, $C_p=1.68 \text{ kJ/kg k}$]

T. Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING
Plastic Engineering (BTN02610)

Day & Date: Friday 31-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Multiple Choice Questions (Each Question 1 marks)

14

- 1) Materials having a _____ shrinkage allowance can be molded with close tolerance.
 - a) Low
 - b) Medium
 - c) High
 - d) None
- 2) The ratio of volume of loose plastic powder to the volume of moulding is known as _____.
 - a) Clamping force
 - b) Density factor
 - c) Bulk factor
 - d) None
- 3) The depth of loading chamber is _____.
 - a) Inversely proportional to projected area
 - b) Inversely proportional to change in volume of plastic material
 - c) Directly proportional to projected area
 - d) None of the above
- 4) The heat to be removed by cooling circuits depend on _____.
 - a) Specific heat of material
 - b) Injection temperature of material
 - c) Latent heat of material
 - d) All of the above
- 5) The properties of the polymer will also depend on the _____ available for Cooling.
 - a) Time
 - b) Area
 - c) Peed
 - d) Momentum
- 6) Epoxy resin is example of _____ plastic.
 - a) Thermoplastics
 - b) Elastomers
 - c) Thermosetting
 - d) None
- 7) It is the _____ operation that sets the shape of thermoplastics.
 - a) Heating
 - b) Grinding
 - c) Cutting
 - d) Cooling

Q.1 Multiple Choice Questions (Each Question 1 marks)

14

- 1) The heat to be removed by cooling circuits depend on _____.
 a) Specific heat of material
 b) Injection temperature of material
 c) Latent heat of material
 d) All of the above
- 2) The properties of the polymer will also depend on the _____ available for Cooling.
 a) Time
 b) Area
 c) Peed
 d) Momentum
- 3) Epoxy resin is example of _____ plastic.
 a) Thermoplastics
 b) Elastomers
 c) Thermosetting
 d) None
- 4) It is the _____ operation that sets the shape of thermoplastics.
 a) Heating
 b) Grinding
 c) Cutting
 d) Cooling
- 5) In addition polymerization reaction the polymer is formed in a _____ step.
 a) Single
 b) Three
 c) Double
 d) None
- 6) Polymers can be very _____ to chemicals.
 a) Resistant
 b) Similar
 c) Opposite
 d) None
- 7) Which of the following is an additive used for saving base plastic material?
 a) Fillers
 b) Plasticizers
 c) Pigments
 d) None of these
- 8) _____ is the most of commonly used manufacturing process for the plastic component.
 a) Injection molding
 b) Blow Molding
 c) Transfer molding
 d) Relational molding

- 9) The Rotational Molding is _____ plastic forming process.
- a) High Temperature
 - b) Low temperature, High pressure
 - c) Low pressure
 - d) High Temperature, Low pressure
- 10) For the more precise dimensional stability of Thermosets, _____ is used.
- a) Transfer moulding
 - b) Compression moulding
 - c) Any moulding process
 - d) Calendering
- 11) In _____ welding method, the workpieces to be joined are irradiated with a stream of neutron.
- a) Infrared
 - b) Hot gas
 - c) Nuclear
 - d) Heated tool
- 12) Materials having a _____ shrinkage allowance can be molded with close tolerance.
- a) Low
 - b) Medium
 - c) High
 - d) None
- 13) The ratio of volume of loose plastic powder to the volume of moulding is known as _____.
- a) Clamping force
 - b) Density factor
 - c) Bulk factor
 - d) None

Railway Transportation System (BTN02611)

Day & Date: Friday, 31-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.
 4) Assume suitable data if necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) What is the size of ballast used in points and crossings under the Indian railways?

a) 10 mm	b) 40 mm
c) 25 mm	d) 5 mm
- 2) What is the reason of premature failure of rails?

a) Inherent defects in metal	b) Tilting of rails
c) Change in gauge width	d) Loose ballast
- 3) Why is it necessary for the sleepers to act as an elastic structure?
 - a) To absorb the vibrations of moving loads
 - b) To make it cheap
 - c) It is the material limitation
 - d) To keep them intact
- 4) Why the sleepers are closely spaced near the joints?

a) Because of weakness of joints	b) Because of coning of wheels
c) Because of tilting of rails	d) Because of more load at joints
- 5) Which of the following types of sleepers have the maximum service life?

a) Wooden	b) Steel
c) Cast iron	d) Concrete
- 6) Which type of sleeper has the maximum creep?

a) Wooden	b) Concrete
c) Steel	d) Cast iron
- 7) Railway passenger coaches are manufactured at _____.

a) Varanasi	b) Chittaranjan
c) Peranbur	d) Kolkata
- 8) Weight of the engine is categorized in _____.

a) sprung mass	b) unsprung mass
c) non-sprung mass	d) dummy mass

Day & Date: Friday, 31-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) Solve any two questions from each section.
2) Figures to the right indicate full marks
3) Assume suitable data if required

Section – I

- Q.2** a) Explain with neat sketch fundamental functional principles of vehicle running in curves. **07**
b) Describe the term derailment of vehicle through displacement of track. **07**
- Q.3** a) Explain the causes of derailment of vehicle and state how to prevent it. **07**
b) Write short note on comparison of the characteristics of railway systems. **07**
- Q.4** a) Explain bogies with creep controlled wheel sets. **07**
b) With neat sketch explain bogies with self steering wheel sets. **07**

Section – II

- Q.5** a) Describe the following terms **07**
i) Acceleration forces
ii) Braking forces
b) Explain vertical wheel load due to residual centrifugal force. **07**
- Q.6** a) Define temperature force. Explain the effects of temperature forces on track. **07**
b) Explain the with neat sketch transversal cross wind forces acting on track. Also state how to avoid it. **07**
- Q.7** a) Explain the total vertical load acting on the track. **07**
b) Explain the following terms **07**
i) Creep forces when vehicle running on straight path
ii) Creep forces when vehicle running in curves

- 9) What is the reason of premature failure of rails?
a) Inherent defects in metal b) Tilting of rails
c) Change in gauge width d) Loose ballast
- 10) Why is it necessary for the sleepers to act as an elastic structure?
a) To absorb the vibrations of moving loads
b) To make it cheap
c) It is the material limitation
d) To keep them intact
- 11) Why the sleepers are closely spaced near the joints?
a) Because of weakness of joints b) Because of coning of wheels
c) Because of tilting of rails d) Because of more load at joints
- 12) Which of the following types of sleepers have the maximum service life?
a) Wooden b) Steel
c) Cast iron d) Concrete
- 13) Which type of sleeper has the maximum creep?
a) Wooden b) Concrete
c) Steel d) Cast iron
- 14) Railway passenger coaches are manufactured at _____.
a) Varanasi b) Chittaranjan
c) Peranbur d) Kolkata

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING
Railway Transportation System (BTN02611)

Day & Date: Friday, 31-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) Tractive force can be increasing by _____.
a) reducing the load b) increasing the load
c) reducing friction d) none of this
- 2) Tractive effort is required to _____.
a) Overcome the gravity component of train mass
b) Overcome friction, windage and curve resistance
c) Accelerate the train mass
d) All of the above
- 3) The grip between wheel and the rail is known as _____.
a) Traction b) Adhesion
c) Braking d) Acceleration
- 4) Which one of the following is used as extra rail to prevent derailment?
a) Stock rail b) Guard rail
c) Tongue rail d) Wing rail
- 5) What is the size of ballast used in points and crossings under the Indian railways?
a) 10 mm b) 40 mm
c) 25 mm d) 5 mm
- 6) What is the reason of premature failure of rails?
a) Inherent defects in metal b) Tilting of rails
c) Change in gauge width d) Loose ballast
- 7) Why is it necessary for the sleepers to act as an elastic structure?
a) To absorb the vibrations of moving loads
b) To make it cheap
c) It is the material limitation
d) To keep them intact
- 8) Why the sleepers are closely spaced near the joints?
a) Because of weakness of joints b) Because of coning of wheels
c) Because of tilting of rails d) Because of more load at joints

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING
Railway Transportation System (BTN02611)

Day & Date: Friday, 31-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) Solve any two questions from each section.
2) Figures to the right indicate full marks
3) Assume suitable data if required

Section – I

- Q.2** a) Explain with neat sketch fundamental functional principles of vehicle running in curves. **07**
b) Describe the term derailment of vehicle through displacement of track. **07**
- Q.3** a) Explain the causes of derailment of vehicle and state how to prevent it. **07**
b) Write short note on comparison of the characteristics of railway systems. **07**
- Q.4** a) Explain bogies with creep controlled wheel sets. **07**
b) With neat sketch explain bogies with self steering wheel sets. **07**

Section – II

- Q.5** a) Describe the following terms **07**
i) Acceleration forces
ii) Braking forces
b) Explain vertical wheel load due to residual centrifugal force. **07**
- Q.6** a) Define temperature force. Explain the effects of temperature forces on track. **07**
b) Explain the with neat sketch transversal cross wind forces acting on track. Also state how to avoid it. **07**
- Q.7** a) Explain the total vertical load acting on the track. **07**
b) Explain the following terms **07**
i) Creep forces when vehicle running on straight path
ii) Creep forces when vehicle running in curves

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) Which type of sleeper has the maximum creep?
 - a) Wooden
 - b) Concrete
 - c) Steel
 - d) Cast iron
- 2) Railway passenger coaches are manufactured at _____.
 - a) Varanasi
 - b) Chittaranjan
 - c) Peranbur
 - d) Kolkata
- 3) Weight of the engine is categorized in _____.
 - a) sprung mass
 - b) unsprung mass
 - c) non-sprung mass
 - d) dummy mass
- 4) Weight of the wheels is categorized in _____.
 - a) sprung mass
 - b) unsprung mass
 - c) non-sprung mass
 - d) dummy mass
- 5) Weight of the passenger car is categorized in _____.
 - a) sprung mass
 - b) unsprung mass
 - c) non-sprung mass
 - d) dummy mass
- 6) Tractive force can be increasing by _____.
 - a) reducing the load
 - b) increasing the load
 - c) reducing friction
 - d) none of this
- 7) Tractive effort is required to _____.
 - a) Overcome the gravity component of train mass
 - b) Overcome friction, windage and curve resistance
 - c) Accelerate the train mass
 - d) All of the above
- 8) The grip between wheel and the rail is known as _____.
 - a) Traction
 - b) Adhesion
 - c) Braking
 - d) Acceleration

Industrial Networks and Controllers (BTN02612)

Day & Date: Monday, 03-06-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:**
- 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.
 - 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 - 3) Figures to the right indicates full marks.
 - 4) Assume suitable data wherever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Select the correct alternative

14

- 1) The Derivative (D) controller mode adjusts the controller output based on the
 - a) Error between set point and process variable
 - b) Rate of change of error
 - c) Accumulated error over time
 - d) None of the above
- 2) Which of the following specifications is not a transient response specification?

a) Peak time	b) Settling time
c) Rise time	d) Bandwidth
- 3) The transfer function relates:
 - a) Input to output in the time domain
 - b) System components visually
 - c) Desired vs actual output
 - d) Errors to control actions
- 4) On-off control is a type of control mode that operates based on:
 - a) Continuous adjustment of the control output
 - b) Proportional adjustment of the control output
 - c) Binary switching between two states
 - d) Integrative adjustment of the control output
- 5) Force control is used in robotics to:
 - a) Maintain a constant joint angle
 - b) Regulate the gripping force on an object
 - c) Track a pre-defined trajectory
 - d) Amplify sensor readings
- 6) In _____ space scheme, the trajectory is specified in terms of end effector configurations.

a) Joint	b) Cartesian
c) Both a and b	d) None of the above

- 7) Which method is commonly used for obstacle avoidance in trajectory planning?
- a) Path following
 - b) Potential field
 - c) Random movement
 - d) Guesswork
- 8) The concept of “localization” in obstacle avoidance refers to _____.
a) Identifying the position of obstacles in the environment
b) Determining the robot’s own position in the environment
c) Estimating the size of obstacles
d) Calculating the distance to obstacles
- 9) In potential field method, the attractive forces guide the robot _____.
a) Towards the goal location
b) Towards the obstacles
c) Along the edges of the environment
d) Towards the repulsive forces
- 10) The cell decomposition method for path planning involves _____.
a) Creating a graph of connected nodes and edges
b) Assigning attractive and repulsive forces
c) Dividing the environment into cells
d) Optimizing a cost function
- 11) In leadthrough programming, what does “leadthrough” refers to?
a) Following a predefined path
b) Providing guidance and teaching a robot manually
c) Using machine learning algorithms for automation
d) Tracking the position of robot in real-time
- 12) Which of the following factors should be considered when designing a workcell layout?
a) Employee vacation schedules
b) Market competition analysis
c) Safety regulations and guidelines
d) Product pricing strategies
- 13) Which of the following industries most commonly utilize AGVs?
a) Retail and e-commerce- b) Film and Entertainment
- c) Sports and recreation
- d) Aerospace

14) Which of the following tasks can mobile robots perform?
a) Performing complex surgeries
b) Analyzing stock market trends
c) Designing computer software
d) Assisting with household chores

Set **P**

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April - 2024
MECHANICAL ENGINEERING
Industrial Networks and Controllers (BTN02612)

Day & Date: Monday, 03-06-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) Answer any 2 questions from each section.
 2) Figures to the right indicate full marks.
 3) Use of non-programmable scientific calculator is allowed.
 4) Assume suitable data if necessary.

Section II

- Q.2** a) Derive the state equations for a simple mechanical system, such as a pendulum or a mass-spring-damper system. Explain how these equations can be utilized to design control strategies for stabilizing the system. **07**
- b) Evaluate the effectiveness of joint space schemes in robot control. Discuss the principles behind joint space control methods and their suitability for addressing various control objectives, such as trajectory tracking and obstacle avoidance. Provide examples to support your discussion. **07**
- Q.3** a) Explain the trade-offs between using a Proportional (P) controller, an Integral(I) controller, and a Derivative (D) controller. Discuss scenarios where each type of controller might be most beneficial. **07**
- b) Discuss the steady-state response of a control system. Explain the concept of steady-state error and its significance in control system design. Describe the factors that affect steady-state error and discuss methods for minimizing it in practical control systems. **07**
- Q.4** a) Analyze the issues and challenges associated with trajectory planning in robotics. Discuss common problems encountered during trajectory planning, such as singularities, joint limits, and workspace constraints. Explain how these issues can be addressed in practical motion planning scenarios. **07**
- b) Enlist obstacle and collision avoidance algorithms. Explain Bug algorithm. **07**

Section II

- Q.5** a) Discuss the factors that influence the selection of actuators for a given robotic application. Consider parameters such as power requirements, precision, speed, and cost. **07**
- b) Draw a block diagram of a DC servomotor and explain its working. **07**
- Q.6** a) Discuss the key factors to consider when designing a robot cell layout for industrial automation. Discuss the factors related to workcell layout, control, safety, and human-machine interface. **07**
- b) Distinguish between Walkthrough programming and Offline programming. **07**

- Q.7** **a)** Define AGVs (Automated Guided Vehicles) and explain their classification. **07**
Discuss the different navigation techniques used in AGVs for autonomous movement.
- b)** Analyze real-world applications of mobile robots in diverse fields such as **07**
agriculture, search and rescue, surveillance, and exploration. Discuss the challenges and opportunities associated with deploying mobile robots in these domains, considering factors such as navigation complexity, energy efficiency, and adaptability to changing conditions.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Select the correct alternative

14

- 1) In _____ space scheme, the trajectory is specified in terms of end effector configurations.

a) Joint	b) Cartesian
c) Both a and b	d) None of the above
- 2) Which method is commonly used for obstacle avoidance in trajectory planning?

a) Path following	b) Potential field
c) Random movement	d) Guesswork
- 3) The concept of "localization" in obstacle avoidance refers to _____.
 - a) Identifying the position of obstacles in the environment
 - b) Determining the robot's own position in the environment
 - c) Estimating the size of obstacles
 - d) Calculating the distance to obstacles
- 4) In potential field method, the attractive forces guide the robot _____.
 - a) Towards the goal location
 - b) Towards the obstacles
 - c) Along the edges of the environment
 - d) Towards the repulsive forces
- 5) The cell decomposition method for path planning involves _____.
 - a) Creating a graph of connected nodes and edges
 - b) Assigning attractive and repulsive forces
 - c) Dividing the environment into cells
 - d) Optimizing a cost function
- 6) In leadthrough programming, what does "leadthrough" refers to?
 - a) Following a predefined path
 - b) Providing guidance and teaching a robot manually
 - c) Using machine learning algorithms for automation
 - d) Tracking the position of robot in real-time

- 7) Which of the following factors should be considered when designing a workcell layout?
- a) Employee vacation schedules
 - b) Market competition analysis
 - c) Safety regulations and guidelines
 - d) Product pricing strategies
- 8) Which of the following industries most commonly utilize AGVs?
- a) Retail and e-commerce

- a) Performing complex surgeries
 - b) Analyzing stock market trends
 - c) Designing computer software
 - d) Assisting with household chores
- 10) The Derivative (D) controller mode adjusts the controller output based on the
- a) Error between set point and process variable
 - b) Rate of change of error
 - c) Accumulated error over time
 - d) None of the above
- 11) Which of the following specifications is not a transient response specification?
- a) Peak time
 - b) Settling time
 - c) Rise time
 - d) Bandwidth
- 12) The transfer function relates:
- a) Input to output in the time domain
 - b) System components visually
 - c) Desired vs actual output
 - d) Errors to control actions
- 13) On-off control is a type of control mode that operates based on:
- a) Continuous adjustment of the control output
 - b) Proportional adjustment of the control output
 - c) Binary switching between two states
 - d) Integrative adjustment of the control output
- 14) Force control is used in robotics to:
- a) Maintain a constant joint angle
 - b) Regulate the gripping force on an object
 - c) Track a pre-defined trajectory
 - d) Amplify sensor readings

Seat No.

Set **S**

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April - 2024
MECHANICAL ENGINEERING
Industrial Networks and Controllers (BTN02612)

Day & Date: Monday, 03-06-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) Answer any 2 questions from each section.
 2) Figures to the right indicate full marks.
 3) Use of non-programmable scientific calculator is allowed.
 4) Assume suitable data if necessary.

Section II

- Q.2** a) Derive the state equations for a simple mechanical system, such as a pendulum or a mass-spring-damper system. Explain how these equations can be utilized to design control strategies for stabilizing the system. **07**
- b) Evaluate the effectiveness of joint space schemes in robot control. Discuss the principles behind joint space control methods and their suitability for addressing various control objectives, such as trajectory tracking and obstacle avoidance. Provide examples to support your discussion. **07**
- Q.3** a) Explain the trade-offs between using a Proportional (P) controller, an Integral(I) controller, and a Derivative (D) controller. Discuss scenarios where each type of controller might be most beneficial. **07**
- b) Discuss the steady-state response of a control system. Explain the concept of steady-state error and its significance in control system design. Describe the factors that affect steady-state error and discuss methods for minimizing it in practical control systems. **07**
- Q.4** a) Analyze the issues and challenges associated with trajectory planning in robotics. Discuss common problems encountered during trajectory planning, such as singularities, joint limits, and workspace constraints. Explain how these issues can be addressed in practical motion planning scenarios. **07**
- b) Enlist obstacle and collision avoidance algorithms. Explain Bug algorithm. **07**

Section II

- Q.5** a) Discuss the factors that influence the selection of actuators for a given robotic application. Consider parameters such as power requirements, precision, speed, and cost. **07**
- b) Draw a block diagram of a DC servomotor and explain its working. **07**
- Q.6** a) Discuss the key factors to consider when designing a robot cell layout for industrial automation. Discuss the factors related to workcell layout, control, safety, and human-machine interface. **07**
- b) Distinguish between Walkthrough programming and Offline programming. **07**

- Q.7** **a)** Define AGVs (Automated Guided Vehicles) and explain their classification. **07**
Discuss the different navigation techniques used in AGVs for autonomous movement.
- b)** Analyze real-world applications of mobile robots in diverse fields such as **07**
agriculture, search and rescue, surveillance, and exploration. Discuss the challenges and opportunities associated with deploying mobile robots in these domains, considering factors such as navigation complexity, energy efficiency, and adaptability to changing conditions.

T.Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: March/April - 2024
MECHANICAL ENGINEERING
3D Printing Hardware & Software (BTN02613)

Day & Date: Monday, 03-06-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Assume suitable data if required.
 4) Figure to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct answer.

14

- 1) How are 3D printing processes classified?
 - a) By the type of material used
 - b) By the size of the object being printed
 - c) By the number of colors in the design
 - d) By the speed of the printing process
- 2) What is the purpose of software in 3D printing?
 - a) To create a physical object from a digital design
 - b) To choose the color and texture of the final product
 - c) To determine the size and shape of the final product
 - d) To program the printer's hardware
- 3) What is an STL file?
 - a) A file format used in 2D printing
 - b) A file format used in 3D printing
 - c) A file format used in video editing
 - d) A file format used in music production
- 4) Which additive manufacturing technology uses a UV laser to cure photopolymer resin layer by layer?
 - a) Stereolithography (SLA)
 - b) Digital Light Processing (DLP)
 - c) Fused Deposition Modeling (FDM)
 - d) Selective Laser Sintering (SLS)
- 5) Which type of software is used for creating the 3D models that will be printed?
 - a) Slicing/CAM software
 - b) Printer Control/Client software
 - c) 3D Modeling/CAD software
 - d) Rendering software
- 6) What is the purpose of slicing software in 3D printing?
 - a) Creating 3D models
 - b) Controlling the 3D printer
 - c) Transforming 3D models into printable instructions
 - d) Visualizing the final printed object

- 7) Which software is responsible for controlling the 3D printer during the printing process?
- Slicing/CAM software
 - Printer Control/Client software
 - 3D Modeling/CAD software
 - Simulation software
- 8) What is the purpose of 3D scanning?
- Creating 3D models for virtual reality
 - Capturing real-world objects and converting them into digital 3D models
 - Controlling the 3D printer during the printing process
 - Transforming 2D images into 3D representations
- 9) Which additive manufacturing technology uses a digital light projector to cure liquid resin layer by layer?
- Stereolithography (SLA)
 - Digital Light Processing (DLP)
 - Fused Deposition Modeling (FDM)
 - Selective Laser Sintering (SLS)
- 10) Which additive manufacturing technology extrudes thermoplastic filament layer by layer to build a 3D object?
- Stereolithography (SLA)
 - Digital Light Processing (DLP)
 - Fused Deposition Modeling (FDM)
 - Selective Laser Sintering (SLS)
- 11) Which design approach focuses on optimizing the design for efficient manufacturing and assembly?
- Design for 3D Printing
 - Design for Manufacturing and Assembly
 - Core DFM for 3D Printing
 - Design Tools for 3D printing
- 12) What is one of the objectives of Design for 3D Printing?
- Maximizing production planning and control
 - Minimizing the use of additive manufacturing technologies
 - Optimizing design for efficient manufacturing and assembly
 - Implementing traditional manufacturing techniques in 3D printing
- 13) Which technology is used to create digital models for 3D printing?
- Computer-Aided Design (CAD)
 - Virtual Reality (VR)
 - Augmented Reality (AR)
 - Artificial Intelligence (AI)
- 14) What is the main advantage of using layers in 3D printing?
- It makes the printing process faster
 - It allows for more precise and complex designs
 - It reduces the cost of materials
 - It allows for a smoother surface finish

T.Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: March/April - 2024
MECHANICAL ENGINEERING
3D Printing Hardware & Software (BTN02613)

Day & Date: Monday, 03-06-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) In Section I, Q. No. 2 is compulsory and attempt any two questions from the remaining of the question.
 2) In Section II, Q. No. 6 is compulsory and attempt any two questions from the remaining of the question.
 3) Assume suitable data if required.
 4) Use of scientific calculator is allowed.
 5) Figures to the right indicate full marks.

Section – I

- | | | |
|------------|---------------------------------------------------------------------------------------------------------------------------------|-----------|
| Q.2 | Discuss CAD and Associated technology used in 3d printer. | 10 |
| Q.3 | Illustrate classification of 3d printing processes. | 09 |
| Q.4 | Enlist different 3D Printing Technologies and describe any 01 with application. | 09 |
| Q.5 | Explain the concept of Design for Manufacturing and Assembly (DFMA) and explain its significance in the context of 3D printing. | 09 |

Section – II

- | | | |
|------------|---------------------------------------------------------------------------------------------------------------------|-----------|
| Q.6 | Discuss the significance of 3D modeling/CAD software in the 3D printing workflow. | 10 |
| Q.7 | Explain the key steps involved in preparing a 3D model for printing using slicing/CAM software. | 09 |
| Q.8 | Describe the basic principles behind 3D scanning technology and the process involved in creating digital 3D models. | 09 |
| Q.9 | Illustrate the importance of cleaning and repairing 3D scans before 3D printing. | 09 |

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct answer.

14

- 1) What is the purpose of 3D scanning?
 - a) Creating 3D models for virtual reality
 - b) Capturing real-world objects and converting them into digital 3D models
 - c) Controlling the 3D printer during the printing process
 - d) Transforming 2D images into 3D representations

- 2) Which additive manufacturing technology uses a digital light projector to cure liquid resin layer by layer?
 - a) Stereolithography (SLA)
 - b) Digital Light Processing (DLP)
 - c) Fused Deposition Modeling (FDM)
 - d) Selective Laser Sintering (SLS)

- 3) Which additive manufacturing technology extrudes thermoplastic filament layer by layer to build a 3D object?
 - a) Stereolithography (SLA)
 - b) Digital Light Processing (DLP)
 - c) Fused Deposition Modeling (FDM)
 - d) Selective Laser Sintering (SLS)

- 4) Which design approach focuses on optimizing the design for efficient manufacturing and assembly?
 - a) Design for 3D Printing

T.Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: March/April - 2024
MECHANICAL ENGINEERING
Energy Conversion Systems (BTN02614)

Day & Date: Monday, 03-06-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct answer:

14

- 1) The mean temperature of heat addition can be increased by _____.
 - a) increasing the amount of heat supplied at high temperatures
 - b) decreasing the amount of heat added at low temperatures
 - c) both of the mentioned
 - d) none of the mentioned
- 2) Which cycle is idealized cycle for the spark ignition internal combustion engines?
 - a) Otto cycle
 - b) Diesel cycle
 - c) Dual cycle
 - d) Bryton cycle
- 3) In diesel cycle heat rejection occurs at _____.
 - a) Reversible constant volume process
 - b) Reversible constant pressure process
 - c) Irreversible constant volume process
 - d) Irreversible constant pressure process
- 4) Which of the following energy has the greatest potential among all the sources of renewable energy?
 - a) Solar energy
 - b) Wind Energy
 - c) Thermal energy
 - d) Hydro-electrical energy
- 5) What is total amount of solar energy received by earth and atmosphere?
 - a) 3.8×10^{24} J/year
 - b) 9.2×10^{24} J/year
 - c) 5.4×10^{24} J/year
 - d) 2.1×10^{24} J/year
- 6) Which is most common source of energy from which electricity is produced?
 - a) Hydroelectricity
 - b) Wind energy
 - c) Coal
 - d) Solar energy
- 7) Thermocouple is a _____.
 - a) Primary device
 - b) Secondary transducer
 - c) Tertiary transducer
 - d) None of the mentioned

T.Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: March/April - 2024
MECHANICAL ENGINEERING
Energy Conversion Systems (BTN02614)

Day & Date: Monday, 03-06-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) Attempt any two questions from each Section.
 2) Assume suitable data if required.
 3) Use of scientific calculator is allowed.
 4) Figures to the right indicate full marks.

Section – I

- Q.2 Solve:**
- a) Drive an expression of Carnot cycle. **07**
 - b) Drive an expression of Brayton cycle. **07**
- Q.3 Solve:**
- a) Classify in details of different types of Batteries. **07**
 - b) Explain in details construction and working of Lithium Ion Batteries. **07**
- Q.4 Solve:**
- a) Describe Thermionic convertor with neat sketches. **07**
 - b) Write a short note on types of Thermoelectric Convertor. **07**

Section – II

- Q.5 Solve:**
- a) Describe Thermodynamics and kinetics processes of fuel Fuel cells. **07**
 - b) Write in details of types of Fuel cells. **07**
- Q.6 Solve:**
- a) Explain Electrical & Thermal energy storage technology with neat sketch. **07**
 - b) Describe in details of Chemical energy storage. **07**
- Q.7 Solve:**
- a) Explain in details of solar photovoltaic systems. **07**
 - b) Describe in details Construction and working of solar cell. **07**

T.Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: March/April - 2024
MECHANICAL ENGINEERING
Energy Conversion Systems (BTN02614)

Day & Date: Monday, 03-06-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct answer:

14

- 1) Operation of thermocouple is governed by _____.
 - a) Peltier effect
 - b) Seebeck effect
 - c) Thomson effect
 - d) All of the mentioned
- 2) The amount of photo generated current increases slightly with an increase in _____.
 - a) Temperature
 - b) Photons
 - c) Diode current
 - d) Shunt current
- 3) Solar cells are made from bulk materials that are cut into wafer of _____ thickness.
 - a) 120-180 μm
 - b) 120-220 μm
 - c) 180-220 μm
 - d) 180-240 μm
- 4) Chemical energy is converted to _____ energy by a fuel cell.
 - a) solar
 - b) electrical
 - c) potential
 - d) mechanical
- 5) Which of the following element is used as a thermocouple in nuclear reactor?
 - a) Boron
 - b) Platinum
 - c) Copper
 - d) Iron
- 6) Which of the following does not affect the reactions in a fuel cell?
 - a) Electrolyte composition
 - b) Electrode composition
 - c) A combination of fuel and oxidiser
 - d) Catalytic effect of the reaction container
- 7) Thermo couple cannot be used to measure _____.
 - a) Temperature of gas
 - b) Temperature of liquid
 - c) IR radiation
 - d) None of the mentioned
- 8) The mean temperature of heat addition can be increased by _____.
 - a) increasing the amount of heat supplied at high temperatures
 - b) decreasing the amount of heat added at low temperatures
 - c) both of the mentioned
 - d) none of the mentioned

- Instructions:** 1) Attempt any two questions from each Section.
 2) Assume suitable data if required.
 3) Use of scientific calculator is allowed.
 4) Figures to the right indicate full marks.

Section – I

- Q.2 Solve:**
- | | | |
|----|---------------------------------------|-----------|
| a) | Drive an expression of Carnot cycle. | 07 |
| b) | Drive an expression of Brayton cycle. | 07 |
- Q.3 Solve:**
- | | | |
|----|-----------------------------------------------------------------------|-----------|
| a) | Classify in details of different types of Batteries. | 07 |
| b) | Explain in details construction and working of Lithium Ion Batteries. | 07 |
- Q.4 Solve:**
- | | | |
|----|----------------------------------------------------------|-----------|
| a) | Describe Thermionic convertor with neat sketches. | 07 |
| b) | Write a short note on types of Thermoelectric Convertor. | 07 |

Section – II

- Q.5 Solve:**
- | | | |
|----|--------------------------------------------------------------------|-----------|
| a) | Describe Thermodynamics and kinetics processes of fuel Fuel cells. | 07 |
| b) | Write in details of types of Fuel cells. | 07 |
- Q.6 Solve:**
- | | | |
|----|--------------------------------------------------------------------------|-----------|
| a) | Explain Electrical & Thermal energy storage technology with neat sketch. | 07 |
| b) | Describe in details of Chemical energy storage. | 07 |
- Q.7 Solve:**
- | | | |
|----|-------------------------------------------------------------|-----------|
| a) | Explain in details of solar photovoltaic systems. | 07 |
| b) | Describe in details Construction and working of solar cell. | 07 |

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct answer:

14

- 1) Number of cells connected in series provide a _____.
a) High current carrying capacity b) Higher Voltage
c) Higher power d) None of the above
- 2) Battery container should be acid resistance therefore it is made up of _____.
a) Glass b) Plastic
c) Wood d) All of the above
- 3) _____ the best indication of the state of charge of a battery.
a) Temperature of electrolyte b) Specific gravity of electrolyte
c) Level of electrolyte d) Colour of electrolyte
- 4) _____ avoids the direct contact of the positive and negative plate in a lithium-ion battery?
a) Electrolyte b) Separator
c) Load d) Rectifier
- 5) Which is the electrolyte used in Li-ion battery?
a) Lead dioxide b) Lithium-based gel
c) Sulfur dioxide d) Cobalt
- 6) Battery is a device which converts chemical energy into _____.
a) Mechanical energy b) potential energy
c) Electrical energy d) Wind energy
- 7) It is noticed that during charging _____.
a) There is a rise in voltage
b) Energy is absorbed by the cell
c) Specific gravity of H₂ SO₄ is increased
d) All of the above
- 8) Overcharging _____.
a) Produces excessive gassing
b) Loosens the active material
c) Increases the temperature resulting in buckling of plates
d) All of the above

Instructions: 1) Answer any 2 questions from each section.
 2) Figures to the right indicates full marks.

Section – I

- Q.2 Solve the following.**
- a) Define the following:** **07**
- i) State of charge
 - ii) C-Rate
 - iii) Specific Energy Density
 - iv) Life cycles
 - v) Depth of Discharge
 - vi) Usable capacity
 - vii) Energy capacity
- b) Explain parameters for EV battery selection.** **07**
- Q.3 Solve the following.**
- a) Explain LMO and LTO battery chemistries.** **07**
- b) Explain various cell failures.** **07**
- Q.4 Solve the following.**
- a) Explain Lithium-Polymer battery with neat sketch.** **07**
- b) Explain Lithium-air battery with neat sketch.** **07**

Section – II

- Q.5 Solve the following.**
- a) Explain forces acting on battery pack with neat sketch.** **07**
- b) Explain Battery Pack Development Process.** **07**
- Q.6 Solve the following.**
- a) Explain the battery management system.** **07**
- b) Explain why thermal management of battery pack is important?** **07**
- Q.7 Solve the following.**
- a) Explain different EV Charging protocols.** **07**
- b) Explain on-board, off-board chargers and slow and fast chargers.** **07**

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct answer:

14

- 1) Overcharging _____.
 - a) Produces excessive gassing
 - b) Loosens the active material
 - c) Increases the temperature resulting in buckling of plates
 - d) All of the above
- 2) The capacity of a battery is expressed in terms of _____.
 - a) Current rating
 - b) Voltage rating
 - c) Ampere hour rating
 - d) None of the above
- 3) Each cell has a vent cap _____.
 - a) To allow gases out when the cell is on charge
 - b) To add water to the cell if needed
 - c) To check the level of electrolyte
 - d) To do all above functions
- 4) Cell short circuit results in _____.
 - a) Low specific gravity electrolyte
 - b) Abnormal high-temperature
 - c) Reduced gassing on charge
 - d) All of the above
- 5) Internal resistance of a cell is reduced to by _____.
 - a) Using vent plug to permit gas formed during discharge
 - b) Increasing the plate area
 - c) Putting plates very close together
 - d) All of the above
- 6) Which of the following circuit is used for cooling of the lithium-ion battery?
 - a) Air conditioning
 - b) Heater circuit
 - c) Ignition circuit
 - d) EGR circuit
- 7) Which of the following is not an advantage of Lithium-ion battery?
 - a) High specific energy density
 - b) More expensive
 - c) Reliability
 - d) Lower self-discharge rate
- 8) Number of cells connected in series provide a _____.
 - a) High current carrying capacity
 - b) Higher Voltage
 - c) Higher power
 - d) None of the above

 - b) Energy is absorbed by the cell
 - c) Specific gravity of H₂ SO₄ is increased
 - d) All of the above
- 3) Overcharging _____.
 - a) Produces excessive gassing
 - b) Loosens the active material
 - c) Increases the temperature resulting in buckling of plates
 - d) All of the above
- 4) The capacity of a battery is expressed in terms of _____.
 - a) Current rating
 - b) Voltage rating
 - c) Ampere hour rating
 - d) None of the above
- 5) Each cell has a vent cap _____.
 - a) To allow gases out when the cell is on charge
 - b) To add water to the cell if needed
 - c) To check the level of electrolyte
 - d) To do all above functions
- 6) Cell short circuit results in _____.
 - a) Low specific gravity electrolyte
 - b) Abnormal high-temperature
 - c) Reduced gassing on charge
 - d) All of the above
- 7) Internal resistance of a cell is reduced to by _____.
 - a) Using vent plug to permit gas formed during discharge
 - b) Increasing the plate area
 - c) Putting plates very close together
 - d) All of the above

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April - 2024
MECHANICAL ENGINEERING

Battery Technology and Charging Infrastructure (BTN02615)

Day & Date: Monday, 03-06-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

Instructions: 1) Answer any 2 questions from each section.
2) Figures to the right indicates full marks.

Section – I

- Q.2 Solve the following.**
- a) **Define the following:** **07**
- i) State of charge
 - ii) C-Rate
 - iii) Specific Energy Density
 - iv) Life cycles
 - v) Depth of Discharge
 - vi) Usable capacity
 - vii) Energy capacity
- b) Explain parameters for EV battery selection. **07**
- Q.3 Solve the following.**
- a) Explain LMO and LTO battery chemistries. **07**
- b) Explain various cell failures. **07**
- Q.4 Solve the following.**
- a) Explain Lithium-Polymer battery with neat sketch. **07**
- b) Explain Lithium-air battery with neat sketch. **07**

Section – II

- Q.5 Solve the following.**
- a) Explain forces acting on battery pack with neat sketch. **07**
- b) Explain Battery Pack Development Process. **07**
- Q.6 Solve the following.**
- a) Explain the battery management system. **07**
- b) Explain why thermal management of battery pack is important? **07**
- Q.7 Solve the following.**
- a) Explain different EV Charging protocols. **07**
- b) Explain on-board, off-board chargers and slow and fast chargers. **07**

Seat No.

Set **P**

Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING
Refrigeration and Air Conditioning (BTN02701)

Day & Date: Wednesday, 15-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) A reversible Carnot cycle used for refrigeration comprises _____.
 - a) Two isentropic and two adiabatic processes
 - b) Two isentropic and two constant volume processes
 - c) Two isentropic and two constant pressure process
 - d) Two isentropic and two isothermal processes
- 2) In Lithium-Bromide absorption system _____.
 - a) Lithium-bromide used as refrigerant and water as absorbent
 - b) Ammonia used as refrigerant and Lithium- Bromide as absorbent
 - c) Water used as refrigerant and Lithium-Bromide as absorbent
 - d) None of the above
- 3) Linde system for liquefaction of air is also known as _____.
 - a) Hampson system
 - b) Cascade system
 - c) Claude system
 - d) Carnot system
- 4) For rectangular duct, the aspect ratio is equal to _____.
 - a) Sum of longer and shorter side
 - b) Ratio of longer to shorter side
 - c) Product of longer and shorter side
 - d) Difference of longer and shorter side
- 5) The difference between dry bulb temperature and wet bulb temperature, is called _____.
 - a) dry bulb depression
 - b) wet bulb depression
 - c) dew point depression
 - d) degree of saturation
- 6) In a psychrometric process, the sensible heat added is 30 kJ/s and the latent heat added is 20 kJ/s. The sensible heat factor for the process will be _____.
 - a) 0.6
 - b) 0.3
 - c) 0.67
 - d) 1.5

- 7) What is the process carried out in generator of vapour absorption refrigeration cycle?
- weak solution of ammonia in water is heated
 - strong solution of ammonia in water is heated
 - only water is heated and heat is given to the ammonia to form its vapour
 - None of the above
- 8) The Freon group of refrigerants are also called as _____.
- Azeotrope refrigerants
 - Inorganic refrigerants
 - Hydro-carbon refrigerants
 - Halo-carbon refrigerants
- 9) The conditioned air supplied to the room must have the capacity to take up _____.
- Room sensible heat load only
 - Both room sensible heat and latent heat loads
 - Room latent heat load only
 - None of the above
- 10) Rectangular ducts are generally preferred over circular ducts in buildings as _____.
- For a given flow rate, the pressure drop is less compared to a circular Duct
 - Rectangular ducts match well with building profile
 - For a given pressure drop, it requires less material compared to a circular duct
 - Rectangular ducts are easier to fabricate
- 11) Absorption of the refrigerant by the absorbent in a vapour absorption refrigeration system is accompanied by _____.
- Release of heat
 - No thermal effects
 - Absorption of heat
 - Reduction in volume
- 12) During Sensible Cooling of air, the wet bulb temperature _____.
- Increases
 - Decreases
 - Remains same
 - Can't predict
- 13) The temperature at which moisture in air starts condensing is known as _____.
- Dry bulb temperature
 - Dew point temperature
 - Super dry temperature
 - Wet bulb temperature
- 14) CFC based refrigerants are being replaced as they are found to _____.
- React with several materials of construction
 - Consume more energy
 - Cause ozone layer depletion
 - Expensive

Seat No.

Set **P**

Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING
Refrigeration and Air Conditioning (BTN02701)

Day & Date: Wednesday, 15-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) Solve ANY TWO questions from each section of remaining questions.
 2) Figures to the right indicate full marks.
 3) Assume suitable data if necessary.
 4) Use of Refrigerant property tables, Psychrometric chart and programmable calculator is allowed.

Section – I

- Q.2** a) State desirable properties of refrigerants. **05**
 b) An air refrigerator operates between pressure limits of 1 bar and 5 bar on Bell Coleman Cycle. Its initial temperature is 10°C and after compression the air is cooled up to 20°C. Determine the theoretical COP and net refrigerating effect.
 Take $c_p = 1.005 \text{ KJ/Kg K}$ and $c_v = 0.718 \text{ KJ/Kg K}$ **05**
 c) Explain with the help of neat diagram Electrolux Refrigeration System. **04**
- Q.3** a) Explain Li-Br absorption system with the help of neat diagram. **05**
 b) State the difference between VCRS & VARS. **05**
 c) Describe the Vapour Compression Refrigeration System with the help of neat diagram. **04**
- Q.4** a) A vapour compression refrigerator works between the pressure limits of 60 bar and 25 bar. The working fluid is just dry at the end of compression and there is no under-cooling of the liquid before the expansion valve. Determine:
 i) C.O.P of the cycle;
 ii) Dryness Fraction of refrigerant at the inlet of compressor;
 iii) Capacity of refrigerator in KW and in TR, if the fluid flow is at the rate of 5 kg/min.
- | Pressure (bar) | Saturation Temperature (K) | Enthalpy (KJ/Kg) | | Entropy (KJ/Kg K) | |
|----------------|----------------------------|------------------|--------|-------------------|--------|
| | | Liquid | Vapour | Liquid | Vapour |
| 60 | 295 | 151.96 | 293.29 | 0.554 | 1.0332 |
| 25 | 261 | 56.32 | 322.58 | 0.226 | 1.2464 |
- b) Explain Linde system for liquefaction of air with neat sketch. **06**

Section – II

- Q.5** a) Derive an expression for Equivalent diameter of rectangular duct for equal discharge and equal velocity through both ducts. **05**
b) Write a short note on BPF. **05**
c) State and explain the factors affecting human comfort. **04**
- Q.6** a) Explain different types of pressures in ducts. **05**
b) Define the following: **05**
i) DPT
ii) Relative Humidity
iii) SHF
iv) WBD
v) GSHF
c) Explain the factors forming load on refrigeration & air conditioning systems. **04**
- Q.7** a) On a particular day, the atmospheric air was found to have dry bulb temperature of 30°C and a wet bulb temperature of 18°C. The barometric pressure was observed to be 756mm of Hg. Determine relative humidity, specific humidity, dew point temperature and enthalpy of air per Kg of dry air. **08**
b) Explain Chilled water systems and DX water systems. **06**

b) Write a short note on BPF. **05**
c) State and explain the factors affecting human comfort. **04**
- Q.6** a) Explain different types of pressures in ducts. **05**
b) Define the following: **05**
i) DPT
ii) Relative Humidity
iii) SHF
iv) WBD
v) GSHF
c) Explain the factors forming load on refrigeration & air conditioning systems. **04**
- Q.7** a) On a particular day, the atmospheric air was found to have dry bulb temperature of 30°C and a wet bulb temperature of 18°C. The barometric pressure was observed to be 756mm of Hg. Determine relative humidity, specific humidity, dew point temperature and enthalpy of air per Kg of dry air. **08**
b) Explain Chilled water systems and DX water systems. **06**

Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING
Automobile Engineering (BTN02702)

Day & Date: Thursday, 16-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Use of non-programmable calculator is allowed.
 4) Assume suitable data if necessary.
 5) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Multiple choice questions.

14

- 1) What does the term "horsepower" measure in the context of automobiles?
 - a) The number of horses used to pull the car
 - b) Engine power and performance
 - c) Maximum speed
 - d) Tire pressure

- 2) What safety feature in automobiles is designed to inflate during a collision to protect the occupants?

a) Seat belt	b) Airbag
c) GPS	d) Cup holder

- 3) What does 0-60 mph time measure in a car's performance?

a) Top speed	b) Acceleration
c) Fuel efficiency	d) Handling

- 4) Which component of an automobile's performance is affected by its weight distribution?

a) Fuel efficiency	b) Acceleration
c) Top speed	d) Traction

- 5) Which type of transmission allows for manual gear changes without a clutch pedal?
 - a) Automatic transmission
 - b) Continuously Variable Transmission (CVT)
 - c) Semi-automatic transmission
 - d) Dual-clutch transmission

- 6) In an automatic transmission, what is responsible for changing gears automatically?

a) Clutch pedal	b) Gear lever
c) Torque converter	d) Drive shaft

- 7) What is the primary purpose of a differential in a car's transmission system?
- a) To control the steering
 - b) To distribute power evenly to all wheels
 - c) To help with braking
 - d) To adjust the suspension
- 8) Which type of steering system requires the driver to exert more effort to turn the wheel, especially at low speeds?
- a) Hydraulic power steering
 - b) Manual steering
 - c) Electric power steering
 - d) Rack and pinion steering
- 9) What component in the steering system is responsible for converting the rotational motion of the steering wheel into lateral movement of the tires?
- a) Suspension system
 - b) Steering column
 - c) Rack and pinion
 - d) Brake pads
- 10) In a typical braking system, which component is responsible for applying friction to the brake rotors to slow down the vehicle?
- a) Brake pedal
 - b) Brake master cylinder
 - c) Brake pads
 - d) Brake booster
- 11) What is the purpose of an anti-lock braking system (ABS)?
- a) To increase braking efficiency
 - b) To prevent skidding and maintain steering control during hard braking
 - c) To reduce fuel consumption
 - d) To provide a smoother ride
- 12) What is the primary advantage of regenerative brakes in hybrid and electric vehicles?
- a) Shorter stopping distance
 - b) Increased brake pad longevity
 - c) Energy recovery and improved fuel efficiency
 - d) Quieter braking operation
- 13) What is the main function of a car's suspension system?
- a) Improve fuel efficiency
 - b) Provide a comfortable ride
 - c) Enhance engine performance
 - d) Reduce tire wear
- 14) Which type of suspension system uses a combination of springs and shock absorbers?
- a) MacPherson strut
 - b) Independent rear suspension
 - c) Leaf spring
 - d) Torsion bar

Seat No.

Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING
Automobile Engineering (BTN02702)

Day & Date: Thursday, 16-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) Answer any two questions from each section.
 2) Assume suitable data if necessary.
 3) Use of non-programmable calculator is allowed.
 4) Figures to the right indicate full marks.

Section – I

- Q.2** a) Explain the basic components of an automobile and their functions. **08**
 b) Enlist and define all types of bodies in an automobile. **06**
- Q.3** a) A truck weighs 100111 N and the engine develops 97 kW at 2400 rpm. The transmission efficiency is 90% in top gear of 3.4:1 and 85% in third gear of 8.4:1. The performance of the vehicle is such that it will just reach a speed of 86.8 km/h at 2400 rpm at wide open throttle when running on the level in still air, and at the same engine speed in third gear it will just climb a gradient of 1 in 14. If the total resistance in N is given by the formula, $R = KW + KaAV^2 + W \sin \theta$, where A is in m^2 ; V in km/h and W in N, calculate K and K_a and hence the engine power required for climbing a grade of 1 in 40 at 48 km/h in top gear. How much more weight can be added to the vehicle to use the engine power fully under the above condition. Front area of truck = $5.575 m^2$. **10**
 b) Obtain the expression for acceleration and gradability in terms of tractive effort and total resistance. **04**
- Q.4** a) Describe the functions of a torque converter in an automatic transmission system. **08**
 b) Discuss the importance of a synchromesh gearbox in manual transmissions. **06**

Section – II

- Q.5** a) Describe with neat sketch the components and operation of a rack and pinion steering system. **07**
 b) Explain with neat sketch the concept of power steering and how it enhances the driving experience. **07**
- Q.6** a) Discuss the principles of operation and benefits of anti-lock braking systems (ABC). **06**
 b) A motorcar weighs 13341.5 N and has a wheelbase of 2.65 m. The CG is 1.27 m behind the front axle and 0.76 m above the ground level. Maximum braking on all four wheels on level ground will bring the vehicle uniformly to rest from a speed of 64 km/h in a distance of 25.9 m. Calculate the value of an adhesion between the tyre and the road. **08**
 Under the same road condition, the vehicle descends a hill of gradient 1 in 20 and is braked on the front wheels only. Determine the load distributed between the front and rear wheels and the distance required to bring the car to rest.

- Q.7**
- a)** Compare and contrast leaf spring suspension and independent suspension systems in terms of ride comfort and handling. **05**
 - b)** Explain the importance of shock absorbers in maintaining a smooth and controlled ride. **04**
 - c)** Discuss the use of air suspension in various types of vehicles and its ability to adapt to different load conditions and driving situations. **05**

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Objective Questions.

14

- 1) A robot _____ represents degree of freedom of a robot.
 - a) axis
 - b) payload
 - c) repeatability
 - d) weight
- 2) Repeatability of a robot is expressed in _____.
 - a) meters
 - b) microns
 - c) milli-meters
 - d) centi-meters
- 3) Cartesian robots are also called as _____ robots.
 - a) Rotary
 - b) Angular
 - c) Linear
 - d) Incremental
- 4) A _____ is a variable resistance device that expresses linear or angular displacements in terms of voltage.
 - a) Thermistor
 - b) Thermocouple
 - c) Potentiometer
 - d) LVDT
- 5) When asymmetrical, elastic crystals are deformed by a force, an electrical potential is developed within the distorted crystal lattice. This is called _____ effect
 - a) Hall
 - b) Piezo-electric
 - c) Strain Gauge
 - d) Faraday
- 6) Linear type of electric actuator is also called as _____.
 - a) Solenoid
 - b) Transformer
 - c) Resolver
 - d) None of the above
- 7) Which of the following are types of end effectors?
 - a) Grippers
 - b) Process Tools
 - c) Sensors
 - d) All of the above
- 8) _____ generates instant contrast as it creates dark silhouettes against a bright background.
 - a) Dark Field Lighting
 - b) Bright Field Lighting
 - c) Back Lighting
 - d) Diffused Lighting

- 9) CCD in camera sensors stands for _____.
a) Charge Coupled Device b) Compressed Charged Device
c) Changed Conductor Device d) Charged Conductor Diffusor
- 10) Line scan cameras have _____ of pixels for acquiring data very quickly.
a) Multiple Sets b) Multiple Rows
c) Rows and Column d) Single Row
- 11) Spot welding is the example of _____ task.
a) Continuous Curved Path b) Point to point path
c) Continuous Straight Path d) None of the above
- 12) A PLC is programmed by specifying some kinds of logic diagrams, called _____ diagrams.
a) Scattered b) Ladder
c) Intermediate d) Cascaded
- 13) Which of the following is the objective of using ASRS?
a) Increasing the storage capacity
b) Increasing the stock rotation
c) maximising floor space utilization
d) all of the above
- 14) _____ come in various formulations, including adhesives, silicone, polyurethane, and epoxy.
a) Sealants b) Paints
c) Sprayers d) Lubricants

Set P

Fourth Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING
Automation and Robotics (BTN02703)

Day & Date: Friday, 17-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

Instructions: 1) Solve any two questions from each sections.
2) Figures to the right indicates full marks.

Section – I

- Q.2** a) Define robot and explain basic components of robots with functions. **07**
b) Explain different specifications of an industrial robot. **07**
- Q.3** a) What is use of encoders? Explain linear and rotary encoders used in robots. **07**
b) What is an end effector? Explain types of end effectors with applications. **07**
- Q.4** a) Explain difference between AGVs and AMRs. State types of AGVs. **07**
b) Derive forward kinematics equation for 2 DOF planar system. **07**

Section – II

- Q.5** a) What is machine vision? Explain major applications of machine vision. **07**
b) What is role of sensor in camera? Explain working of CCD and CMOS sensors. **07**
- Q.6** a) Why good robot work-cell design is important? Explain considerations in robot work cell design. **07**
b) Explain briefly different programming methods used for industrial robots. **07**
- Q.7** a) Explain considerations while selecting robot for spot welding. State various applications. **07**
b) What is an ASRS? Explain any 3 types of ASRS with examples. **07**

Seat No.	
----------	--

Fourth Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING
Automation and Robotics (BTN02703)

Day & Date: Friday, 17-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Objective Questions.

14

- 1) _____ generates instant contrast as it creates dark silhouettes against a bright background.
 - a) Dark Field Lighting
 - b) Bright Field Lighting
 - c) Back Lighting
 - d) Diffused Lighting
- 2) CCD in camera sensors stands for _____.
 - a) Charge Coupled Device
 - b) Compressed Charged Device
 - c) Changed Conductor Device
 - d) Charged Conductor Diffusor
- 3) Line scan cameras have _____ of pixels for acquiring data very quickly.
 - a) Multiple Sets
 - b) Multiple Rows
 - c) Rows and Column
 - d) Single Row
- 4) Spot welding is the example of _____ task.
 - a) Continuous Curved Path
 - b) Point to point path
 - c) Continuous Straight Path
 - d) None of the above
- 5) A PLC is programmed by specifying some kinds of logic diagrams, called _____ diagrams.
 - a) Scattered
 - b) Ladder
 - c) Intermediate
 - d) Cascaded
- 6) Which of the following is the objective of using ASRS?
 - a) Increasing the storage capacity
 - b) Increasing the stock rotation
 - c) maximising floor space utilization
 - d) all of the above
- 7) _____ come in various formulations, including adhesives, silicone, polyurethane, and epoxy.
 - a) Sealants
 - b) Paints
 - c) Sprayers
 - d) Lubricants
- 8) A robot _____ represents degree of freedom of a robot.
 - a) axis
 - b) payload
 - c) repeatability
 - d) weight

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Objective Type Questions.

14

- 1) Most operation produce a mixture of both products and services, which of the following business is closest to producing 'pure' services?
 - a) IT company
 - b) Counsellor /therapist
 - c) Steel company
 - d) A restaurant
- 2) Which kind of labour force is required in case of Job shop Production _____?
 - a) Highly Skilled
 - b) Semi-skilled
 - c) Unskilled
 - d) Any of the above
- 3) If demand is 106 during January, 120 in February, 134 in March, and 142 in April, what is the 3-month simple moving average for May?
 - a) 132
 - b) 126
 - c) 142
 - d) 138
- 4) Sales forecasts are based on estimates of _____.
 - a) Demand
 - b) Supply
 - c) Demand and supply
 - d) None of the above
- 5) Efficiency is given by _____.
 - a) actual output divided by effective capacity
 - b) capacity divided by utilization
 - c) actual output divided by design capacity
 - d) effective capacity divided by actual output
- 6) Payback Period Criteria is used for _____.
 - a) Capacity planning
 - b) Forecasting
 - c) Production control
 - d) Investment decisions
- 7) The correct sequence of operations in production planning and control is _____.
 - a) Routing-Scheduling-Dispatching-Follow up
 - b) Scheduling-Routing- Dispatching-Follow up
 - c) Dispatching-Routing-Scheduling- Follow up
 - d) Routing-Scheduling-Follow up-Dispatching

- 8) The length of time between placing an order and receipt of material is called as _____.
a) Order time
b) Lead time
c) Cycle time
d) Process time
- 9) In ABC analysis A items require _____.
a) No safety stocks
b) Low safety stock
c) Moderate safety stock
d) High safety stock
- 10) In inventory control theory EOQ is _____.
a) Average level of inventory
b) Optimum lot size
c) Lot size corresponds to Break-even
d) Capacity of warehouse
- 11) TPM Means _____.
a) Total Production Management
b) Total Process Management
c) Total Productive Maintenance
d) None of these
- 12) The downtime cost consists of _____.
a) Loss of production
b) Wages paid to the workers
c) Reduction in sale
d) All of the above
- 13) Which of the following is a non-value-added activity?
a) Clear and truthful advertising
b) Designs that meet engineering specifications but have limited customer input
c) Competent and timely after-sales customer help
d) Use of suppliers that provide high-quality inputs
- 14) JIT is targeted for _____.
a) Average inventory
b) High inventory
c) Zero inventory
d) None of the above

Set **P**

Fourth Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING
Production and Operations Management (BTN02706)

Day & Date: Saturday, 18-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) Solve any two questions from each sections.
 2) Figures to the right indicates full marks.
 3) Make suitable assumptions wherever necessary and state them clearly.
 4) Draw neat diagram wherever necessary.

Section – I

- Q.2** a) Define Production Management. Discuss its objectives and Scope. **07**
 b) The following data gives sales of the company for various years. Using least square method estimate sales for next 3 years. **07**

Years	2001	2002	2003	2004	2005	2006	2007
Sales ('000 units)	80	90	92	83	94	99	92

- Q.3** a) Explain Capacity planning procedure. **07**
 b) Discuss in detail investment decision and replacement analysis. **07**
- Q.4 Write notes on. (any two)** **14**
 a) Coordination of PPC with other departments.
 b) Aggregate planning.
 c) Functions of PPC

Section – II

- Q.5** a) Explain the different objectives of inventory control. **05**
 b) Write a note on ABC analysis. **05**
 c) A company purchases 15,625 units of raw material at Rs 12 per unit to meet its entire annual requirement the order cost comes to Rs 60 per unit to order and inventory carrying cost Rs 1.20 per unit **04**
 Find out-
 i) EOQ
 ii) Total ordering cost
 iii) Total carrying cost
 iv) Total inventory cost
- Q.6** a) Write the need and importance of maintenance department in organization. **05**
 b) Write a short brief note on benefits of TPM (Total Productive Maintenance] in organization. **05**
 c) Explain in brief the various types of maintenance in organization. **04**
- Q.7** a) Explain the concept of Six Sigma. **05**
 b) Explain the working of Kanban System. **05**
 c) Write the definition and objectives of value analysis. **04**

14

- 1) Payback Period Criteria is used for _____.
 a) Capacity planning b) Forecasting
 c) Production control d) Investment decisions
- 2) The correct sequence of operations in production planning and control is _____.
 a) Routing-Scheduling-Dispatching-Follow up
 b) Scheduling-Routing- Dispatching-Follow up
 c) Dispatching-Routing-Scheduling- Follow up
 d) Routing-Scheduling-Follow up-Dispatching
- 3) The length of time between placing an order and receipt of material is called as _____.
 a) Order time b) Lead time
 c) Cycle time d) Process time
- 4) In ABC analysis A items require _____.
 a) No safety stocks b) Low safety stock
 c) Moderate safety stock d) High safety stock
- 5) In inventory control theory EOQ is _____.
 a) Average level of inventory
 b) Optimum lot size
 c) Lot size corresponds to Break-even
 d) Capacity of warehouse
- 6) TPM Means _____.
 a) Total Production Management
 b) Total Process Management
 c) Total Productive Maintenance
 d) None of these
- 7) The downtime cost consists of _____.
 a) Loss of production b) Wages paid to the workers
 c) Reduction in sale d) All of the above

- 8) Which of the following is a non-value-added activity?
a) Clear and truthful advertising
b) Designs that meet engineering specifications but have limited customer input
c) Competent and timely after-sales customer help
d) Use of suppliers that provide high-quality inputs
- 9) JIT is targeted for _____.
a) Average inventory
b) High inventory
c) Zero inventory
d) None of the above
- 10) Most operation produce a mixture of both products and services, which of the following business is closest to producing 'pure' services?
a) IT company
b) Counsellor /therapist
c) Steel company
d) A restaurant
- 11) Which kind of labour force is required in case of Job shop Production _____?
a) Highly Skilled
b) Semi-skilled
c) Unskilled
d) Any of the above
- 12) If demand is 106 during January, 120 in February, 134 in March, and 142 in April, what is the 3-month simple moving average for May?
a) 132
b) 126
c) 142
d) 138
- 13) Sales forecasts are based on estimates of _____.
a) Demand
b) Supply
c) Demand and supply
d) None of the above
- 14) Efficiency is given by _____.
a) actual output divided by effective capacity
b) capacity divided by utilization
c) actual output divided by design capacity
d) effective capacity divided by actual output

Set **S**

Fourth Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING
Production and Operations Management (BTN02706)

Day & Date: Saturday, 18-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) Solve any two questions from each sections.
 2) Figures to the right indicates full marks.
 3) Make suitable assumptions wherever necessary and state them clearly.
 4) Draw neat diagram wherever necessary.

Section – I

- Q.2** a) Define Production Management. Discuss its objectives and Scope. **07**
 b) The following data gives sales of the company for various years. Using least square method estimate sales for next 3 years. **07**

Years	2001	2002	2003	2004	2005	2006	2007
Sales ('000 units)	80	90	92	83	94	99	92

- Q.3** a) Explain Capacity planning procedure. **07**
 b) Discuss in detail investment decision and replacement analysis. **07**
- Q.4 Write notes on. (any two)** **14**
 a) Coordination of PPC with other departments.
 b) Aggregate planning.
 c) Functions of PPC

Section – II

- Q.5** a) Explain the different objectives of inventory control. **05**
 b) Write a note on ABC analysis. **05**
 c) A company purchases 15,625 units of raw material at Rs 12 per unit to meet its entire annual requirement the order cost comes to Rs 60 per unit to order and inventory carrying cost Rs 1.20 per unit **04**
 Find out-
 i) EOQ
 ii) Total ordering cost
 iii) Total carrying cost
 iv) Total inventory cost
- Q.6** a) Write the need and importance of maintenance department in organization. **05**
 b) Write a short brief note on benefits of TPM (Total Productive Maintenance] in organization. **05**
 c) Explain in brief the various types of maintenance in organization. **04**
- Q.7** a) Explain the concept of Six Sigma. **05**
 b) Explain the working of Kanban System. **05**
 c) Write the definition and objectives of value analysis. **04**

Seat No.

Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING
Artificial Intelligence and Machine Learning (BTN02707)

Day & Date: Saturday, 18-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.
 4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the given options.

14

- 1) _____ is the goal of Artificial Intelligence.
 - a) To solve artificial problems
 - b) To extract scientific causes
 - c) To explain various sorts of intelligence
 - d) To solve real-world problems
- 2) _____ is the goal of Artificial Intelligence.
 - a) To solve artificial problems
 - b) To extract scientific causes
 - c) To explain various sorts of intelligence
 - d) To solve real-world problems
- 3) A search algorithm takes _____ as an input and returns _____ as an output.
 - a) Input, output
 - b) Problem, solution
 - c) Solution, problem
 - d) Parameters, sequence of actions
- 4) Which is the best way to go for Game playing problem?
 - a) Linear approach
 - b) Heuristic approach (Some knowledge is stored)
 - c) Random approach
 - d) An Optimal approach
- 5) The values of the set membership is represented by _____.
 - a) Discrete Set
 - b) Degree of truth
 - c) Probabilities
 - d) Both Degree of truth & Probabilities
- 6) Fuzzy Set theory defines fuzzy operators. Choose the fuzzy operators from the following.

a) AND	b) OR
c) NOT	d) All of the mentioned

- 7) What is the main challenge/s of NLP?
- Handling Ambiguity of Sentences
 - Handling Tokenization
 - Handling POS-Tagging
 - All of the mentioned
- 8) Choose form the following areas where NLP can be useful.
- Automatic Text Summarization
 - Automatic Question-Answering Systems
 - Information Retrieval
 - All of the mentioned
- 9) What is Machine learning?
- The autonomous acquisition of knowledge through the use of computer programs
 - The autonomous acquisition of knowledge through the use of manual programs
 - The selective acquisition of knowledge through the use of computer programs
 - The selective acquisition of knowledge through the use of manual programs
- 10) Different learning methods does not include?
- Memorization
 - Analogy
 - Deduction
 - Introduction
- 11) What's the main point of difference between human & machine intelligence?
- Human perceive everything as a pattern while machine perceive it merely as data
 - Human has emotions
 - Human has more IQ & intellect
 - Human has sense organs
- 12) What is plasticity in neural networks?
- Input pattern keeps on changing
 - Input pattern has become static
 - Output pattern keeps on changing
 - Output is static
- 13) There are _____ types of reinforcement.
- 3
 - 2
 - 4
 - 5
- 14) Which of the following is an application of reinforcement learning?
- Topic modeling
 - Recommendation system
 - Pattern recognition
 - Image classification

**Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING**

Artificial Intelligence and Machine Learning (BTN02707)

Day & Date: Saturday, 18-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) Attempts any two questions from each section.
2) Assume suitable data if required.
3) Figures to the right indicate full marks.

Section – I

- | | | |
|------------|---------------------------------------------------------------------------------------------|-----------|
| Q.2 | a) Explain Production Systems method of problem solving in AI. | 07 |
| | b) How Artificial intelligence, Machine Learning, and Deep Learning differ from each other? | 07 |
| Q.3 | a) What is Fuzzy Logic? Explain any 3 applications using fuzzy systems. | 07 |
| | b) Discuss various properties and operations on crisp relation. | 07 |
| Q.4 | a) Explain how NLP is used for Question Answering System. | 07 |
| | b) List few differences between AI, Machine Learning, and NLP. | 07 |

Section – II

- | | | |
|------------|--------------------------------------------------------------------------------------------------------------------------------------|-----------|
| Q.5 | a) Explain in detail distance-based methods? | 07 |
| | b) Discuss the nearest neighbor with a neat sketch? | 07 |
| Q.6 | a) What is reinforcement learning? Explain with diagram the steps in reinforcement learning. | 07 |
| | b) What are the elements of reinforcement learning? Give illustrations for each element. | 07 |
| Q.7 | a) Explain the concept of a Perceptron with a neat diagram? | 07 |
| | b) Derive the Back propagation rule considering the training rule for Output Unit weights and Training Rule for Hidden Unit weights. | 07 |

Railway Systems Management (BTN02708)

Day & Date: Saturday, 18-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct answer.

14

- 1) Which signals are used in shunting operations for low-speed movement?
 - a) Semaphore Signal
 - b) Warner Signal
 - c) Starter signal
 - d) Disc signal
- 2) In DFC track inspection is done by _____.
 - a) TRC
 - b) BFC
 - c) NFC
 - d) LFC
- 3) _____ is not a coupling used in Railway Coaches.
 - a) Screw Coupling
 - b) Side buffer coupling
 - c) Central buffer coupling
 - d) Tie coupling
- 4) Which of the following is an advantage of electric traction over other methods of traction?
 - a) Faster acceleration
 - b) No pollution problems
 - c) Better braking action
 - d) All of the above
- 5) _____ is not a part of VCC used in A/C.
 - a) Evaporator
 - b) Condenser
 - c) Compressor
 - d) Deflector
- 6) In railway the green light indicates _____.
 - a) stop
 - b) proceed
 - c) proceed cautiously
 - d) none
- 7) For Fiat Bogie Break disc diameter is _____ mm.
 - a) 750
 - b) 650
 - c) 635
 - d) 640
- 8) Which of the following can be used in case of Bridge joints?
 - a) Metal flat or Bridge plate
 - b) Extra sleepers
 - c) Metal flat
 - d) Bridge plate
- 9) _____ is not a maintenance report that is recorded in Loco shade.
 - a) Loco master defect report
 - b) Component defect report
 - c) Analysis defect report
 - d) Component inspection report

- 10) _____ is not a cause of accident in Indian Railway.
- a) Negligence
 - b) Human error
 - c) Reckless pedestrians and drivers
 - d) Electrification
- 11) _____ works as primary energy absorber during accidental shock.
- a) Honeycomb absorber
 - b) Pads
 - c) Spring
 - d) None of these
- 12) _____ is not strategy of fire accidents.
- a) Prevention
 - b) Detection
 - c) Suppression
 - d) Speed
- 13) Weight of the passenger is categorized in _____.
- a) sprung mass
 - b) un sprung mass
 - c) non-sprung mass
 - d) dummy mass
- 14) FOIS Means _____.
- a) Freight Operations Information Society
 - b) Freight Operations Internet System
 - c) Freight Operations Information System
 - d) None of these

Set P

**Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING**

Railway Systems Management (BTN02708)

Day & Date: Saturday, 18-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) Attempt any two questions from each Section.
2) Assume suitable data if necessary.
3) Use of scientific calculator is allowed.

Section – I

Q.2 Solve:

- a) What are the components of air suspension in the Indian Railway? **04**
Elaborate in details.
- b) Draw typical passenger Vehicle showing the layout of air conditioning & heating equipment. **05**
- c) Explain in details the different parts of C.B.C coupler. **05**

Q.3 Solve:

- a) Write the steps of heating load calculation in 2. A.C coach. **04**
- b) Explain with neat Sketches the Electronic power and Auxiliary Services. **05**
- c) Write the constructional details of Traction Motors used in Indian Railway. **05**

Q.4 Solve:

- a) Describe all Parts of LHB Bogies in Railway. **04**
- b) Write a short note R.M.P.U in LHB coaches. **05**
- c) Explain in details of HOG. **05**

Section – II

Q.5 Solve:

- a) What are different components of Bio-Vacuum toilet system explain in detail. **04**
- b) Write short note on types of pollution in Indian railway. **05**
- c) What is role of production engineers in rolling stock maintenance? Describe in details. **05**

Q.6 Solve:

- a) Which digital technologies used in traffic control. Explain RFID in details. **05**
- b) What is mean by overhauling? Explain in details overhauling & periodic overhauling in diesel Locomotives. **05**
- c) Describe in details the Green Initiatives in Indian railway sectors. **04**

Q.7 Solve:

- a) Write in details the Ticket reservation system in Indian Railway. **04**
- b) What is mean by rolling stock management. which types of rolling stock management used in Indian railway? **05**
- c) Explain in details Human waste management used in Indian railway. **05**

Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING
Railway Systems Management (BTN02708)

Day & Date: Saturday, 18-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct answer.

14

- 1) Which of the following can be used in case of Bridge joints?
 - a) Metal flat or Bridge plate
 - b) Extra sleepers
 - c) Metal flat
 - d) Bridge plate
- 2) _____ is not a maintenance report that is recorded in Loco shade.
 - a) Loco master defect report
 - b) Component defect report
 - c) Analysis defect report
 - d) Component inspection report
- 3) _____ is not a cause of accident in Indian Railway.
 - a) Negligence
 - b) Human error
 - c) Reckless pedestrians and drivers
 - d) Electrification
- 4) _____ works as primary energy absorber during accidental shock.
 - a) Honeycomb absorber
 - b) Pads
 - c) Spring
 - d) None of these
- 5) _____ is not strategy of fire accidents.
 - a) Prevention
 - b) Detection
 - c) Suppression
 - d) Speed
- 6) Weight of the passenger is categorized in _____.
 - a) sprung mass
 - b) un sprung mass
 - c) non-sprung mass
 - d) dummy mass
- 7) FOIS Means _____.
 - a) Freight Operations Information Society
 - b) Freight Operations Internet System
 - c) Freight Operations Information System
 - d) None of these
- 8) Which signals are used in shunting operations for low-speed movement?
 - a) Semaphore Signal
 - b) Warner Signal
 - c) Starter signal
 - d) Disc signal

Seat No.

Set Q

Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING
Railway Systems Management (BTN02708)

Day & Date: Saturday, 18-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) Attempt any two questions from each Section.
 2) Assume suitable data if necessary.
 3) Use of scientific calculator is allowed.

Section – I**Q.2 Solve:**

- a) What are the components of air suspension in the Indian Railway? **04**
 Elaborate in details.
- b) Draw typical passenger Vehicle showing the layout of air conditioning & heating equipment. **05**
- c) Explain in details the different parts of C.B.C coupler. **05**

Q.3 Solve:

- a) Write the steps of heating load calculation in 2. A.C coach. **04**
- b) Explain with neat Sketches the Electronic power and Auxiliary Services. **05**
- c) Write the constructional details of Traction Motors used in Indian Railway. **05**

Q.4 Solve:

- a) Describe all Parts of LHB Bogies in Railway. **04**
- b) Write a short note R.M.P.U in LHB coaches. **05**
- c) Explain in details of HOG. **05**

Section – II**Q.5 Solve:**

- a) What are different components of Bio-Vacuum toilet system explain in detail. **04**
- b) Write short note on types of pollution in Indian railway. **05**
- c) What is role of production engineers in rolling stock maintenance? Describe in details. **05**

Q.6 Solve:

- a) Which digital technologies used in traffic control. Explain RFID in details. **05**
- b) What is mean by overhauling? Explain in details overhauling & periodic overhauling in diesel Locomotives. **05**
- c) Describe in details the Green Initiatives in Indian railway sectors. **04**

Q.7 Solve:

- a) Write in details the Ticket reservation system in Indian Railway. **04**
- b) What is mean by rolling stock management. which types of rolling stock management used in Indian railway? **05**

Q.1 Choose the correct answer.

14

- 1) _____ works as primary energy absorber during accidental shock.
 - a) Honeycomb absorber
 - b) Pads
 - c) Spring
 - d) None of these
- 2) _____ is not strategy of fire accidents.
 - a) Prevention
 - b) Detection
 - c) Suppression
 - d) Speed
- 3) Weight of the passenger is categorized in _____.
 - a) sprung mass
 - b) un sprung mass
 - c) non-sprung mass
 - d) dummy mass
- 4) FOIS Means _____.
 - a) Freight Operations Information Society
 - b) Freight Operations Internet System
 - c) Freight Operations Information System
 - d) None of these
- 5) Which signals are used in shunting operations for low-speed movement?
 - a) Semaphore Signal
 - b) Warner Signal
 - c) Starter signal
 - d) Disc signal
- 6) In DFC track inspection is done by _____.
 - a) TRC
 - b) BFC
 - c) NFC
 - d) LFC
- 7) _____ is not a coupling used in Railway Coaches.
 - a) Screw Coupling
 - b) Side buffer coupling
 - c) Central buffer coupling
 - d) Tie coupling
- 8) Which of the following is an advantage of electric traction over other methods of traction?
 - a) Faster acceleration
 - b) No pollution problems
 - c) Better braking action
 - d) All of the above
- 9) _____ is not a part of VCC used in A/C.
 - a) Evaporator
 - b) Condenser
 - c) Compressor
 - d) Deflector

Analysis & Synthesis of Mechanisms (BTN02709)

Day & Date: Saturday, 18-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.
 4) Assume suitable data if necessary and state it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) The analysis of mechanism deals with _____.
 - a) The determination of input and output angles of a mechanism.
 - b) The determination of dimensions of the links in a mechanism.
 - c) The determination of displacement, velocity and acceleration of the links in a mechanism.
 - d) The determination of number of joints in a mechanism.
- 2) The synthesis of mechanism deals with _____.
 - a) The determination of input and output angles of a mechanism.
 - b) The determination of dimensions of the links in a mechanism.
 - c) The determination of displacement, velocity and acceleration of the links in a mechanism.
 - d) The determination of number of joints in a mechanism.
- 3) The difference between the desired motion and the actual motion produced is known as _____.

a) Structural error	b) Mechanical error
c) Graphical error	d) Mathematical error
- 4) The error resulting from tolerances in the length of links and bearing clearances is known as _____.

a) Structural error	b) Mechanical error
c) Graphical error	d) Mathematical error
- 5) Which of the following is not a kind of synthesis problem?

a) Function generation	b) Path generation
c) Body guidance	d) Linkage guidance
- 6) Designing a four-bar mechanism to generate the function $y = f(x)$ is an example of

a) Function generation	b) Path generation
c) Body guidance	d) Linkage guidance

- 7) When a mechanism is required to guide a point, it falls under the category of synthesis?
a) Function generation b) Path generation
c) Body guidance d) Linkage guidance
- 8) What is a coupler curve?
a) Locus of a point on the plane parallel to coupler
b) Locus of a point on the coupler link
c) Locus of a point on the plane perpendicular to coupler
d) Locus of a point on the follower link
- 9) How many minimum possible circles are traced by links in a four-bar mechanism?
a) 1 b) 2
c) 3 d) 4
- 10) When the position of a point within a moving body and the angular displacement of the body are specified, designing of this mechanism falls under the category of _____ synthesis.
a) Function generation b) Path generation
c) Body guidance d) Linkage guidance
- 11) The points at which the generated and desired functions agree are known as _____.
a) Precision points
b) Accuracy points
c) Either precision points or accuracy points
d) Neither precision points nor accuracy points
- 12) The best spacing of the precision points, for the first trial, is called _____.
a) Chebyshev spacing b) Freudenstein spacing
c) Sandor spacing d) Equal spacing
- 13) If the crank rotation angle varies from 45 degrees to 135 degrees, using three precision points with Chebyshev's spacing, synthesize a slider crank mechanism where displacement of slider is square of the crank rotation. From the above information calculate 'a' in mm.
a) 48.2 b) 58.2
c) 45.6 d) 42.2
- 14) If the crank rotation angle varies from 45 degrees to 135 degrees, using three precision points with Chebyshev's spacing, synthesize a slider crank mechanism where displacement of slider is square of the crank rotation. From the above information calculate 'c' in mm.
a) 148.2 b) 158.2
c) 135.7 d) 120.2

 4) Assume suitable data if necessary and state it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) Designing a four-bar mechanism to generate the function $y = f(x)$ is an example of

a) Function generation	b) Path generation
c) Body guidance	d) Linkage guidance
- 2) When a mechanism is required to guide a point, it falls under the category of synthesis?

a) Function generation	b) Path generation
c) Body guidance	d) Linkage guidance
- 3) What is a coupler curve?
 - a) Locus of a point on the plane parallel to coupler
 - b) Locus of a point on the coupler link
 - c) Locus of a point on the plane perpendicular to coupler
 - d) Locus of a point on the follower link
- 4) How many minimum possible circles are traced by links in a four-bar mechanism?

a) 1	b) 2
c) 3	d) 4
- 5) When the position of a point within a moving body and the angular displacement of the body are specified, designing of this mechanism falls under the category of _____ synthesis.

a) Function generation	b) Path generation
c) Body guidance	d) Linkage guidance
- 6) The points at which the generated and desired functions agree are known as _____.
 - a) Precision points
 - b) Accuracy points
 - c) Either precision points or accuracy points
 - d) Neither precision points nor accuracy points

- 7) The best spacing of the precision points, for the first trial, is called _____.
a) Chebyshev spacing b) Freudenstein spacing
c) Sandor spacing d) Equal spacing
- 8) If the crank rotation angle varies from 45 degrees to 135 degrees, using three precision points with Chebyshev's spacing, synthesize a slider crank mechanism where displacement of slider is square of the crank rotation. From the above information calculate 'a' in mm.
a) 48.2 b) 58.2
c) 45.6 d) 42.2
- 9) If the crank rotation angle varies from 45 degrees to 135 degrees, using three precision points with Chebyshev's spacing, synthesize a slider crank mechanism where displacement of slider is square of the crank rotation. From the above information calculate 'c' in mm.
a) 148.2 b) 158.2
c) 135.7 d) 120.2
- 10) The analysis of mechanism deals with _____.
a) The determination of input and output angles of a mechanism.
b) The determination of dimensions of the links in a mechanism.
c) The determination of displacement, velocity and acceleration of the links in a mechanism.
d) The determination of number of joints in a mechanism.
- 11) The synthesis of mechanism deals with _____.
a) The determination of input and output angles of a mechanism.
b) The determination of dimensions of the links in a mechanism.
c) The determination of displacement, velocity and acceleration of the links in a mechanism.
d) The determination of number of joints in a mechanism.
- 12) The difference between the desired motion and the actual motion produced is known as _____.
a) Structural error b) Mechanical error
c) Graphical error d) Mathematical error
- 13) The error resulting from tolerances in the length of links and bearing clearances is known as _____.
a) Structural error b) Mechanical error
c) Graphical error d) Mathematical error
- 14) Which of the following is not a kind of synthesis problem?
a) Function generation b) Path generation
c) Body guidance d) Linkage guidance

Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING
Analysis & Synthesis of Mechanisms (BTN02709)

Day & Date: Saturday, 18-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) Attempt any two questions from each section.
 3) Figures to the right indicate full marks.
 4) Assume suitable data if necessary and state it clearly.

Section – I

- Q.2** a) Define kinematic pair and explain its classification. **07**
 b) What is the difference between degrees of freedom of a kinematic pair and that of a mechanism? How the two are interconnected. **07**
- Q.3** a) Explain matrix method of analysis of mechanisms. **07**
 b) Can the matrix method be applied for analyzing the mechanisms involving springs? If YES, How? If NO, why? **07**
- Q.4** a) What is the use of Bobillier's constructions? Explain all Bobillier constructions with supporting sketches. **07**
 b) Explain the significance of inflection circle. What is its use in kinematics. **07**

Section – II

- Q.5** a) Explain circle point curve and center point curve. **07**
 b) Derive Freudenstein's equation and explain its use. **07**
- Q.6** a) Explain different defects possible in synthesized mechanisms. **07**
 b) Explain Denavit-Hartenberg parameters of spatial mechanism. **07**
- Q.7** a) Explain point position reduction. **07**
 b) Explain Dwell mechanisms. **07**

Seat No.

Fourth Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING
Business Economics (BTN02710)

Day & Date: Saturday, 18-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.
 4) Answer cannot be changed once it is marked.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct answer:

14

- 1) Which of the following is a Giffen good?

a) Cellphone	b) Potato
c) Notebook	d) Gold
- 2) Higher indifference curve indicates _____.

a) higher cost	b) lower cost
c) higher satisfaction	d) lower satisfaction
- 3) Maximum ceiling price must be _____.

a) below the equilibrium price	b) same as the equilibrium price
c) above the equilibrium price	d) same as production cost
- 4) Sum of all indirect costs & indirect expenses is known as _____.

a) total cost	b) production cost
c) prime cost	d) Overheads
- 5) Additional cost that results by increasing the output by one unit is known as _____.

a) opportunity cost	b) marginal cost
c) incremental cost	d) sunk cost
- 6) Which of the following is not included in production cost?
 - a) factory overhead
 - b) administrative overhead
 - c) selling and distribution overhead
 - d) indirect expenses
- 7) Finding the current value from future sum is known as _____.

a) future worth method	b) present worth method
c) rate of return method	d) annual equivalent method
- 8) Which of the following favours 'Buy' decision?

a) high production volume	b) higher fixed cost
c) high production capacity	d) lower fixed cost

- 9) Replacing casting by forging is an example of _____.
a) raw material substitution b) product modification
c) process modification d) design modification
- 10) Decision to 'Buy' is preferred _____.
a) above BEP b) to the right of BEP
c) to the left of BEP d) below BEP
- 11) An new equipment is known as a _____.
a) defender b) survivor
c) competitor d) challenger
- 12) To guess possible failures is a necessary step in _____ maintenance.
a) routine b) opportunistic
c) breakdown d) predictive
- 13) C.B.M. stands for _____.
a) Cost Based Maintenance b) Condition Based Monitoring
c) Condition Based Maintenance d) Cost Based Monitoring
- 14) Arms of a chair is an example of _____ function.
a) primary b) aesthetic
c) tertiary d) secondary

Fourth Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING
Business Economics (BTN02710)

Day & Date: Saturday, 18-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) Solve any two questions from each Section.
 2) Use of scientific calculator is allowed.
 3) Figures to the right indicates full marks.
 4) Assume additional suitable data if necessary and state it clearly.

Section – I

- Q.2** a) Explain law of demand and determinants of demand. **08**
 b) Annual fees of a student is Rs 80000 per year for a period of 10 years of education. Calculate the total fees that the student would pay at the end of 10 years if the interest rate is 8 % compounded annually. Draw the cash flow diagram. **06**
- Q.3** a) Two operators work on a forging machine for 30 jobs each weighing 5 kg in a shift of eight hours. They are paid at a rate of Rs 300 and Rs 200 per day. Forged material costs Rs 8 / kg. If factory and administrative expenses put together are twice the labour cost, calculate the cost of production per unit. **08**
 b) Anil has taken a housing loan of Rs 4000000. If term of loan is 20 years with interest rate 9 % compounded annually, calculate the annual payment he has to make. **06**
- Q.4** a) A hard disc supplier wants to raise the price of a hard disc from current price of Rs 3000 per unit. Currently he sells 800 units / month but wants to bring down the sales to 600 / month. If PED of the hard disc is 3, what should be its new price? (Use initial value method) **07**
 b) Explain with suitable examples 'implicit cost' and 'explicit cost'. **07**

Section – II

- Q.5** a) Explain various functional aspects of make or buy decision. **06**
 b) Explain with a block diagram, various phases of a project life cycle. **08**
- Q.6** a) Explain: **08**
 1) preventive maintenance
 2) breakdown maintenance
 b) What do you mean by 'Value' of a product? What are the various types of values? **06**
- Q.7** a) Discuss with suitable examples the need to replace raw material of a product. **08**
 b) Explain various reasons for replacement of an asset. **06**

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Select the correct alternative.

14

- 1) Robot Intelligence refers to: _____.
 - a) The ability of robots to have emotions
 - b) The physical strength of a robot
 - c) The ability of robots to learn from their environment and make decisions
 - d) The ability of robots to perform repetitive tasks
- 2) What are the characteristics of future robot tasks?
 - a) Limited adaptability and flexibility
 - b) Adaptability, flexibility, and autonomous decision-making
 - c) Strict reliance on pre-programmed instructions
 - d) Slow response to changing conditions
- 3) In the service industry, robots are often used for tasks like:

a) Manufacturing	b) Healthcare
c) Agriculture	d) Mining
- 4) Unmanned Ground Vehicles (UGV) are primarily designed for:
 - a) Aerial surveillance
 - b) Underwater exploration
 - c) Ground-based tasks without human intervention
 - d) Space exploration
- 5) When designing a robot cell layout, what is a crucial consideration to minimize interference and optimize workflow?
 - a) Maximizing machine density
 - b) Minimizing workspace separation
 - c) Optimizing robot speed
 - d) Reducing workcell size

- 6) Which programming method involves physically moving a robot arm through the desired path teaching it the required motions?
- Offline programming
 - Walk-through programming
 - Powered Lead-through programming
 - Visual programming
- 7) Slip in the context of WMR refers to:
- Smooth motion on flat surfaces
 - The loss of traction and wheel slippage
 - Precise positioning on uneven terrain
 - Reducing the wheel diameter
- 8) _____ configuration robot is preferred for pick and place operations.
- SCARA
 - Jointed-Arm
 - Spherical
 - Cartesian
- 9) For Spray coating application, which drive system is preferred _____.
- Hydraulic
 - Pneumatic
 - Electrical
 - Mechanical
- 10) The estimated value of robot at the end of its useful life is called _____.
- Depreciation cost
 - MARR
 - ROI
 - Salvage value
- 11) EUAC stands for _____ in economic analysis.
- Equivalent Uniform Annual Cost
 - Exact Uniform Annual Cost
 - Equivalent Universal Annual Cost
 - Equivalent Universal Approximate Cost
- 12) MARR for a project is decided by _____.
- Bank
 - Company
 - Central Government
 - RBI
- 13) _____ maintenance of robot is the case when maintenance crew is called in to repair a robot that breakdowns during regular operation.
- Preventive
 - Predictive
 - Remedial
 - All of the above
- 14) Engelberger reported the average MTBF for its robots as _____ hrs.
- 100
 - 200
 - 300
 - 400

Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING
Advanced Topics in Robotics (BTN02718)

Day & Date: Sunday, 19-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) Answer any two questions from each section.
 2) Figures to the right indicate full marks.
 3) Use of a non-programmable scientific calculator is allowed.
 4) Assume suitable data if necessary.

Section – I

- Q.2** a) What are the key industries currently utilizing robotics technology, and how has this adoption evolved over the past decade? **07**
 b) What is robot intelligence? Write in detail about the Hierarchical control structure in a Real-time control system as prescribed by the National Bureau of Standards. **07**
- Q.3** a) What are the different methods of Lead-through programming? Assess their merits and demerits. **07**
 b) Enlist different types of robot cell layouts. Compare and contrast the different types of robot cell layouts. **07**
- Q.4** a) Define Mobile robots and enlist the types of land-based mobile robots. Explain the key issues for the locomotion of mobile robots. **07**
 b) What is slip in the context of WMR? Model the WMR for rolling without slip on flat terrain. **07**

Section – II

- Q.5** a) Elaborate on the features of the welding robot. **08**
 b) Elaborate on the features of the spray coating robot. **06**
- Q.6** a) Prepare a checklist for workforce acceptance to assess the potential for successfully implementing robotics in plant. **06**
 b) A robot installation project has an initial cost of \$85,000 and expected annual costs for operation and maintenance are estimated to be \$24,000. The project is expected to generate revenues of \$60,000 annually for four years, at which time the project will be retired. The estimated salvage value of the robot at the end of 4 years is \$ 40,000. **08**
 i) Determine the payback period for the project.
 ii) Determine the Equivalent uniform annual cost for the project using a 25% MARR.

iii) Determine the expected Return on investment to be derived from the investment.

Evaluate by all the methods separately, whether the robot project is economically feasible.

Given: Capital recovery factor and Sinking fund factor for 4 years is given below for various interest rates.

Interest Rates (%)	Capital Recovery factor	Sinking Fund factor
20	0.3863	0.1863
25	0.4234	0.1734
30	0.4616	0.1616
35	0.5008	0.1508

Q.7 a) What are the different types of robotics training that should take place in a company? **06**

b) The cost of the robot is \$80,000 and the user company wants to establish an optimum level of spare parts inventory. The company knows which components of robot are likely to fail and it wants to build its spare parts to a stock level at which total cost of inventory plus lost total production time is minimized. When a breakdown occurs, the repair time will average two hours if the required spare part is available. If it is not available, it will lose an average of 10 hours of production while the part is being ordered and delivered. In addition, rush delivery of the part will cost \$50 per order. The company estimates that the cost of downtime is \$100 per hour. The robot operates one shift of 8 hours per day for 250 days per year. The mean time between failure is 200 hours. The cost of inventory is 20% per year of the value of spare parts in stock. The following level indicates various alternative spare parts level and corresponding probability that the robot can be repaired using parts available in stock. **08**

Spare Parts level (\$)	Pr (Coverage)	Pr (no coverage)
0	0	1
5000	0.25	0.75
10000	0.4	0.6
20000	0.65	0.35
30000	0.8	0.2
40000	0.9	0.1
80000	1	0

i) Based on the data provided, determine the optimum level of spare parts inventory to maintain.

ii) At the level of inventory determined in part (a), determine the 'availability' of the robot.

Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING
Advanced Topics in Robotics (BTN02718)

Day & Date: Sunday, 19-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.
 4) Use of a non-programmable scientific calculator is allowed.
 5) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Select the correct alternative.

14

- 1) _____ configuration robot is preferred for pick and place operations.
 - a) SCARA
 - b) Jointed-Arm
 - c) Spherical
 - d) Cartesian
- 2) For Spray coating application, which drive system is preferred _____.
 - a) Hydraulic
 - b) Pneumatic
 - c) Electrical
 - d) Mechanical
- 3) The estimated value of robot at the end of its useful life is called _____.
 - a) Depreciation cost
 - b) MARR
 - c) ROI
 - d) Salvage value
- 4) EUAC stands for _____ in economic analysis.
 - a) Equivalent Uniform Annual Cost
 - b) Exact Uniform Annual Cost
 - c) Equivalent Universal Annual Cost
 - d) Equivalent Universal Approximate Cost
- 5) MARR for a project is decided by _____.
 - a) Bank
 - b) Company
 - c) Central Government
 - d) RBI
- 6) _____ maintenance of robot is the case when maintenance crew is called in to repair a robot that breakdowns during regular operation.
 - a) Preventive
 - b) Predictive
 - c) Remedial
 - d) All of the above
- 7) Engelberger reported the average MTBF for its robots as _____ hrs.
 - a) 100
 - b) 200
 - c) 300
 - d) 400
- 8) Robot Intelligence refers to: _____.
 - a) The ability of robots to have emotions
 - b) The physical strength of a robot
 - c) The ability of robots to learn from their environment and make decisions
 - d) The ability of robots to perform repetitive tasks

- 9)** What are the characteristics of future robot tasks?
- a) Limited adaptability and flexibility
 - b) Adaptability, flexibility, and autonomous decision-making
 - c) Strict reliance on pre-programmed instructions
 - d) Slow response to changing conditions
- 10)** In the service industry, robots are often used for tasks like:
- a) Manufacturing
 - b) Healthcare
 - c) Agriculture
 - d) Mining
- 11)** Unmanned Ground Vehicles (UGV) are primarily designed for:
- a) Aerial surveillance
 - b) Underwater exploration
 - c) Ground-based tasks without human intervention
 - d) Space exploration
- 12)** When designing a robot cell layout, what is a crucial consideration to minimize interference and optimize workflow?
- a) Maximizing machine density
 - b) Minimizing workspace separation
 - c) Optimizing robot speed
 - d) Reducing workcell size
- 13)** Which programming method involves physically moving a robot arm through the desired path teaching it the required motions?
- a) Offline programming
 - b) Walk-through programming
 - c) Powered Lead-through programming
 - d) Visual programming
- 14)** Slip in the context of WMR refers to:
- a) Smooth motion on flat surfaces
 - b) The loss of traction and wheel slippage
 - c) Precise positioning on uneven terrain
 - d) Reducing the wheel diameter

Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING
Advanced Topics in Robotics (BTN02718)

Day & Date: Sunday, 19-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) Answer any two questions from each section.
 2) Figures to the right indicate full marks.
 3) Use of a non-programmable scientific calculator is allowed.
 4) Assume suitable data if necessary.

Section – I

- Q.2** a) What are the key industries currently utilizing robotics technology, and how has this adoption evolved over the past decade? **07**
 b) What is robot intelligence? Write in detail about the Hierarchical control structure in a Real-time control system as prescribed by the National Bureau of Standards. **07**
- Q.3** a) What are the different methods of Lead-through programming? Assess their merits and demerits. **07**
 b) Enlist different types of robot cell layouts. Compare and contrast the different types of robot cell layouts. **07**
- Q.4** a) Define Mobile robots and enlist the types of land-based mobile robots. Explain the key issues for the locomotion of mobile robots. **07**
 b) What is slip in the context of WMR? Model the WMR for rolling without slip on flat terrain. **07**

Section – II

- Q.5** a) Elaborate on the features of the welding robot. **08**
 b) Elaborate on the features of the spray coating robot. **06**
- Q.6** a) Prepare a checklist for workforce acceptance to assess the potential for successfully implementing robotics in plant. **06**
 b) A robot installation project has an initial cost of \$85,000 and expected annual costs for operation and maintenance are estimated to be \$24,000. The project is expected to generate revenues of \$60,000 annually for four years, at which time the project will be retired. The estimated salvage value of the robot at the end of 4 years is \$ 40,000. **08**
 i) Determine the payback period for the project.
 ii) Determine the Equivalent uniform annual cost for the project using a 25% MARR.

iii) Determine the expected Return on investment to be derived from the investment.

Evaluate by all the methods separately, whether the robot project is economically feasible.

Given: Capital recovery factor and Sinking fund factor for 4 years is given below for various interest rates.

Interest Rates (%)	Capital Recovery factor	Sinking Fund factor
20	0.3863	0.1863
25	0.4234	0.1734
30	0.4616	0.1616
35	0.5008	0.1508

Q.7 a) What are the different types of robotics training that should take place in a company? **06**

b) The cost of the robot is \$80,000 and the user company wants to establish an optimum level of spare parts inventory. The company knows which components of robot are likely to fail and it wants to build its spare parts to a stock level at which total cost of inventory plus lost total production time is minimized. When a breakdown occurs, the repair time will average two hours if the required spare part is available. If it is not available, it will lose an average of 10 hours of production while the part is being ordered and delivered. In addition, rush delivery of the part will cost \$50 per order. The company estimates that the cost of downtime is \$100 per hour. The robot operates one shift of 8 hours per day for 250 days per year. The mean time between failure is 200 hours. The cost of inventory is 20% per year of the value of spare parts in stock. The following level indicates various alternative spare parts level and corresponding probability that the robot can be repaired using parts available in stock. **08**

Spare Parts level (\$)	Pr (Coverage)	Pr (no coverage)
0	0	1
