Data Processing & Feature Engineering (BTN06516)

Day & Date: Friday, 17-05-2024
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book.
 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct option from the following.

14

- 1) What are the types of feature Extraction?
 - a) PCA
 - b) LDA
 - c) A & B
 - d) None
- 2) PCA is technique for _____.
 - a) Feature Extraction
 - b) Dimension Reduction
 - c) Variance Normalization
 - d) Data Augmentation
- 3) Which of the following is an example of feature extraction?
 - a) Constructing bag of words vector from an email
 - b) Applying PCA projects to a large high-dimensional data
 - c) Removing stopwords in a sentence
 - d) All of the above
- 4) Which are the techniques are comes under attributes aggregation
 - a) Principal component analysis
 - b) Independent component analysis
 - c) Multidimensional scaling
 - d) All of the above
- 5) Attribute selection method help to find best attribute subset from given set of attributes
 - a) True
 - b) False
- 6) What are the different types of attributes?
 - a) Nominal
 - b) Ordinal
 - c) Quantitative
 - d) All of above
- 7) Median can be used a central tendency to _____ kind of features.
 - a) Categorical
 - b) Ordinal
 - c) Quantitative
 - d) All

- 8)** What are some examples of Data Quality problems
- a) Noisy and Outliers data
 - b) Missing data
 - c) Duplicates
 - d) All of these
- 9)** Why do we need feature transformation?
- a) Converting non numeric features into numeric
 - b) Resizing inputs to fix size
 - c) A and B
 - d) None
- 10)** _____ is an example of Shape statistics.
- a) Range
 - b) Quartiles
 - c) Mode
 - d) Kurtosis
- 11)** Which of the following(s) is/are features scaling techniques?
- a) Standardization
 - b) Normalization
 - c) Min max Scaling
 - d) all of above
- 12)** In following type of feature selection method we start with empty feature set
- a) Forward feature selection
 - b) Backward feature selection
 - c) Both a and b
 - d) All of above
- 13)** CNN is mostly used when there is an?
- a) Structured data
 - b) unstructured data
 - c) Both A and B
 - d) None of the above
- 14)** Which of the following is a subset of machine learning?
- a) AI
 - b) Deep Learning
 - c) SciPy
 - d) None

**T.Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Data Processing & Feature Engineering (BTN06516)**

Day & Date: Friday, 17-05-2024
Time: 10:00 AM To 01:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any Three

12

- a) Fill the missing values in the below table. Use the mode for qualitative values and rounded average for quantitative values; consider the object from same class (company) for the process of identification of missing value.

Food	Age	Distance	Company
Chinese	51	Close	Good
			Good
Italian	82		Good
Burgers	23	Far	Bad
Chinese	46		Good
Chinese			Bad
Burgers		Vary close	Good
Chinese	38	Close	Bad
Italian	31	Far	Good

- b) State the reasons to apply dimensionality reduction.
c) Write a short note on principal component analysis.
d) What are the differences between irrelevant, inconsistent and redundant data. Explain with the help of suitable example.

Q.3 Attempt the following (Any Two)

16

- a) Explain the conversion of different scale types.
b) What is the feature selection and its types?
c) Explain the concept of Principal Component Analysis.

Section – II

Q.4 Attempt the following (Any Three)

12

- a) Write a python code for dealing with counts.
b) What is the Normalization explain it with diagram.
c) Explain the Pros and Cons of Machine Learning and Deep Learning
d) Write a note on Convolutional Layers with diagram.

Q.5 Attempt the following (Any Two)

- a) Define the terms Data Tasks, Models, Features, Scalars, Vectors, and Spaces.
- b) Write a python code to implement Min-Max scalers technique.
- c) Explain the term Fully Connected Layers with example.

Seat No.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct options.**14**

- 1) In the context of IIoT, what role does AI play in analytics?
 - a) Analyzing Agricultural Data
 - b) Enhancing Cybersecurity
 - c) Improving Social Media Engagement
 - d) Augmenting Industrial Internet Analytics
- 2) What is a key opportunity associated with the IIoT?
 - a) Reduced Job Opportunities
 - b) Increased Environmental Impact
 - c) Enhanced Operational Efficiency
 - d) Limited Technological Advancements
- 3) What is a common application of IIoT in use-cases?

a) Online Shopping	b) Smart Office Solutions
c) Virtual Reality Gaming	d) Social Media Networking
- 4) What is the purpose of Gateways in IIoT Reference Architecture?
 - a) Enhancing Wireless Communication
 - b) Legacy Protocol Modernization
 - c) Data Encryption
 - d) Three-Tier Topology Implementation
- 5) Which category includes Modern Communication Protocols in IIoT systems?

a) Analog Communication	b) Digital Communication
c) Wireless Communication	d) Legacy Communication
- 6) Which protocol is commonly used for securing the Operational Technology (OT) in IIoT systems?

a) HTTPS	b) SNMP
c) Modbus	d) MQTT

- 7) What is a potential security concern at the system level in IIoT?
- a) Device Color
 - b) Data Sensitivity
 - c) Authentication and Authorization
 - d) Communication Speed
- 8) What is the purpose of AWS QuickSight in Cloud Industrial IoT Solutions?
- a) Real-time Data Ingestion
 - b) Data Visualization and Business Intelligence
 - c) Cloud Storage
 - d) Querying Data
- 9) Which AWS service is utilized for registering devices in AWS IoT Core?
- a) AWS S3
 - b) AWS Athena
 - c) AWS Glue
 - d) AWS IoT Core
- 10) What does AWS Glue primarily focus on in Cloud Industrial IoT Solutions?
- a) Real-time Analytics
 - b) Data Storage
 - c) Data Ingestion
 - d) ETL (Extract, Transform, Load)
- 11) Which Google Cloud service is specifically designed for managing and ingesting data from IoT devices at scale?
- a) Google Cloud Pub/Sub
 - b) Google Cloud Storage
 - c) Google Cloud Bigtable
 - d) Google Cloud Dataflow
- 12) What is the purpose of Google Cloud Bigtable in Cloud Industrial IoT Solutions?
- a) Real-time Analytics
 - b) Scalable NoSQL Storage
 - c) Device Registration
 - d) Data Querying and Analysis
- 13) What is the primary purpose of monitoring and metering in OpenStack?
- a) Managing User Identity
 - b) Real-time Data Storage
 - c) Tracking Resource Usage and Performance
 - d) Virtual Machine Creation
- 14) What is involved in the process of updating and patching in the context of OpenStack?
- a) User Authentication
 - b) Modifying User Identity
 - c) Keeping Software Components Up-to-Date
 - d) Elasticity and Scaling

Max. Marks: 56

Instructions: 1) All question are compulsory.
2) Figures to right indicate full marks.

Section – I

Q.2 Attempt any Three. 12

- What are the three primary types of tools needed to deliver intelligence workloads at the edge?
- Describe one use case for the smart home vertical that aligns with one or more of the key benefits of ML-powered edge solutions.
- What is the benefit of isolating your code and dependencies from other services?
- What is the benefit of using a publish/subscribe model to exchange messages?

Q.3 Attempt any Two. 16

- What is the benefit of decoupling services in your edge architecture?
- What do you think is the worst-case scenario if your home network router was compromised by an attacker but was still processing traffic as normal?
- Explain in detail with an example to describe what common components an edge solution uses.

Section – II

Q.4 Attempt any Three. 12

- Explain how you modify an artifact stored in the cloud after it has been included in a registered custom component.
- What is the benefit of performing a data modeling exercise?
- Discuss at least one benefit of using a serverless function for processing IoT data.
- What business intelligence (BI) services can you use for data exposition to end consumers?

Q.5 Attempt any Two. 16

- What are some examples that differentiate static and dynamic resources of an edge component?
- Discuss the relevance of ETL architectures for edge computing.
- Why is it necessary to have an operational data store or a data lake/data warehouse?

- What is the benefit of decoupling services in your edge architecture?
- What do you think is the worst-case scenario if your home network router was compromised by an attacker but was still processing traffic as normal?
- Explain in detail with an example to describe what common components an edge solution uses.

Section – II

Q.4 Attempt any Three. 12

- Explain how you modify an artifact stored in the cloud after it has been included in a registered custom component.
- What is the benefit of performing a data modeling exercise?
- Discuss at least one benefit of using a serverless function for processing IoT data.
- What business intelligence (BI) services can you use for data exposition to end consumers?

Q.5 Attempt any Two. 16

- What are some examples that differentiate static and dynamic resources of an edge component?
- Discuss the relevance of ETL architectures for edge computing.
- Why is it necessary to have an operational data store or a data lake/data warehouse?

Seat No.

Set R

**T. Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: March/April-2024
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Industrial IoT (BTN06517)**

Day & Date: Friday, 17-05-2024
Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.
2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct options.

14

- 1) Which Google Cloud service is specifically designed for managing and ingesting data from IoT devices at scale?
 - a) Google Cloud Pub/Sub
 - b) Google Cloud Storage
 - c) Google Cloud Bigtable
 - d) Google Cloud Dataflow
- 2) What is the purpose of Google Cloud Bigtable in Cloud Industrial IoT Solutions?
 - a) Real-time Analytics
 - b) Scalable NoSQL Storage
 - c) Device Registration
 - d) Data Querying and Analysis
- 3) What is the primary purpose of monitoring and metering in OpenStack?
 - a) Managing User Identity
 - b) Real-time Data Storage
 - c) Tracking Resource Usage and Performance
 - d) Virtual Machine Creation
- 4) What is involved in the process of updating and patching in the context of OpenStack?
 - a) User Authentication
 - b) Modifying User Identity
 - c) Keeping Software Components Up-to-Date
 - d) Elasticity and Scaling
- 5) In the context of IIoT, what role does AI play in analytics?
 - a) Analyzing Agricultural Data
 - b) Enhancing Cybersecurity
 - c) Improving Social Media Engagement
 - d) Augmenting Industrial Internet Analytics
- 6) What is a key opportunity associated with the IIoT?
 - a) Reduced Job Opportunities
 - b) Increased Environmental Impact
 - c) Enhanced Operational Efficiency
 - d) Limited Technological Advancements

T. Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: March/April-2024
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Industrial IoT (BTN06517)

Day & Date: Friday, 17-05-2024
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

Instructions: 1) All question are compulsory.
 2) Figures to right indicate full marks.

Section – I

Q.2 Attempt any Three. **12**

- a) What are the three primary types of tools needed to deliver intelligence workloads at the edge?
- b) Describe one use case for the smart home vertical that aligns with one or more of the key benefits of ML-powered edge solutions.
- c) What is the benefit of isolating your code and dependencies from other services?
- d) What is the benefit of using a publish/subscribe model to exchange messages?

Q.3 Attempt any Two. **16**

- a) What is the benefit of decoupling services in your edge architecture?
- b) What do you think is the worst-case scenario if your home network router was compromised by an attacker but was still processing traffic as normal?
- c) Explain in detail with an example to describe what common components an edge solution uses.

Section – II

Q.4 Attempt any Three. **12**

- a) Explain how you modify an artifact stored in the cloud after it has been included in a registered custom component.
- b) What is the benefit of performing a data modeling exercise?
- c) Discuss at least one benefit of using a serverless function for processing IoT data.
- d) What business intelligence (BI) services can you use for data exposition to end consumers?

Q.5 Attempt any Two. **16**

 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct options.**14**

- 1) Which protocol is commonly used for securing the Operational Technology (OT) in IIoT systems?
 - a) HTTPS
 - b) SNMP
 - c) Modbus
 - d) MQTT
- 2) What is a potential security concern at the system level in IIoT?
 - a) Device Color
 - b) Data Sensitivity
 - c) Authentication and Authorization
 - d) Communication Speed
- 3) What is the purpose of AWS QuickSight in Cloud Industrial IoT Solutions?
 - a) Real-time Data Ingestion
 - b) Data Visualization and Business Intelligence
 - c) Cloud Storage
 - d) Querying Data
- 4) Which AWS service is utilized for registering devices in AWS IoT Core?
 - a) AWS S3
 - b) AWS Athena
 - c) AWS Glue
 - d) AWS IoT Core
- 5) What does AWS Glue primarily focus on in Cloud Industrial IoT Solutions?
 - a) Real-time Analytics
 - b) Data Storage
 - c) Data Ingestion
 - d) ETL (Extract, Transform, Load)
- 6) Which Google Cloud service is specifically designed for managing and ingesting data from IoT devices at scale?
 - a) Google Cloud Pub/Sub
 - b) Google Cloud Storage
 - c) Google Cloud Bigtable
 - d) Google Cloud Dataflow
- 7) What is the purpose of Google Cloud Bigtable in Cloud Industrial IoT Solutions?
 - a) Real-time Analytics
 - b) Scalable NoSQL Storage
 - c) Device Registration
 - d) Data Querying and Analysis

 - c) Improving Social Media Engagement
 - d) Augmenting Industrial Internet Analytics
- 11) What is a key opportunity associated with the IIoT?
- a) Reduced Job Opportunities
 - b) Increased Environmental Impact
 - c) Enhanced Operational Efficiency
 - d) Limited Technological Advancements
- 12) What is a common application of IIoT in use-cases?
- a) Online Shopping
 - b) Smart Office Solutions
 - c) Virtual Reality Gaming
 - d) Social Media Networking
- 13) What is the purpose of Gateways in IIoT Reference Architecture?
- a) Enhancing Wireless Communication
 - b) Legacy Protocol Modernization
 - c) Data Encryption
 - d) Three-Tier Topology Implementation
- 14) Which category includes Modern Communication Protocols in IIoT systems?
- a) Analog Communication
 - b) Digital Communication
 - c) Wireless Communication
 - d) Legacy Communication

T.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Data Communication and Signaling in Railway (BTN06518)

Day & Date: Friday, 17-05-2024
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) All questions are compulsory
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options. 14

- 1) When semaphore and Warner signals are installed on the same post, then the stop indication is given when
 - a) Semaphore arm is lowered but Warner arm is horizontal
 - b) Both semaphore and Warner arms are lowered
 - c) Both the arms are horizontal
 - d) None of the above
- 2) The reception signal is

a) Outer signal only	b) Starter Only
c) Neither (outer signal) nor	d) Both (outer signal) and (starter)
- 3) A treadle bar is used for

a) Interlocking point and signal	b) Setting points and crossings
c) setting marshalling yard	d) Track maintenance
- 4) The stations which do not have any signal are known as

a) A-class stations	b) B-class stations
c) Crossing stations	d) Terminal stations
- 5) What is the URL of a website?
 - a) It is the location of website on internet
 - b) It is used to create internet
 - c) It is location of peripheral on internet
 - d) None of these
- 6) "@" in an email address is used to _____.

a) Separate username from ISP	b) Create password for email
c) Add strength to email	d) None of these
- 7) FTP uses _____ parallel TCP connections to transfer a file.

a) 1	b) 2
c) 3	d) 4

- 8) Fiber optics possess following properties _____.
- a) Immune electromagnetic interference
 - b) Very less signal attenuation
 - c) Very hard to tap
 - d) All of the mentioned
- 9) What is the max data transfer rate for optical fiber cable?
- a) 10 Mbps
 - b) 100 Mbps
 - c) 1000 Mbps
 - d) 10000 Mbps
- 10) The secondary winding of which of the given transformer is always kept closed?
- a) Voltage transformer
 - b) Current transformer
 - c) Step-up transformer
 - d) Power transformer
- 11) Which of the following does not change in an ordinary transformer?
- a) Current
 - b) Frequency
 - c) Voltage
 - d) All of the above
- 12) If the strands of the fusing wire are twisted, what happens to the fusing current?
- a) Increases
 - b) Reduces
 - c) No change/ remains same
 - d) Depends on the value of current, increases or decreases.
- 13) On what factor does the operating speed of the relay depend upon?
- a) Rate of flux built up
 - b) Armature core air gap
 - c) Spring tension
 - d) All of these
- 14) The capacity of a lead-acid cell depends on
- a) Rate of discharge
 - b) Temperature
 - c) Density of electrolyte
 - d) All above

**T. Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
ELECTRONICS AND TELECOMMUNICATION ENGINEERING
Professional Ethics & Human Value (BTN06509)**

Day & Date: Monday, 20-05-2024
Time: 10:00 AM To 12:00 PM

Max. Marks: 40

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Q.2 What is Ethics and explain three types of ethics or morality? **10**

OR

What are the objectives of Engineering Ethics? Explain in detail.

Q.3 Distinguish between Kohlberg's and Gilligan's approach to ethical (moral) judgments. **10**

OR

List and explain the skills required to handle moral problems in Engineering Ethics.

Q.4 Write short notes on any four. **20**

- a) Respect for others
- b) Intellectual Property Rights
- c) Spirituality
- d) Kohlberg's Theory
- e) Character
- f) Cooperation

**T. Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
ELECTRONICS AND TELECOMMUNICATION ENGINEERING
Professional Ethics & Human Value (BTN06509)**

Day & Date: Monday, 20-05-2024
Time: 10:00 AM To 12:00 PM

Max. Marks: 50

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if required and state it clearly.

MCQ/Objective Type Questions

Duration: 20 Minutes

Marks: 10

Q.1 Choose the correct alternatives from the options. 10

- 1) What is Integrity?
 - a) Unity of thought
 - b) Word and deed
 - c) Open mindedness
 - d) All of these
- 2) Human values are essential for _____.
 - a) living in harmony with self, each other and nature
 - b) making life easier and happy
 - c) living with family and friends
 - d) making money to fulfill desires
- 3) Courage is the tendency to accept and face _____.
 - a) Self-confidence
 - b) Risks and difficult tasks in rational ways
 - c) Physical courage
 - d) Social courage
- 4) Commitment means _____.
 - a) Alignment to goals
 - b) Adherence to ethical principles
 - c) Empathy
 - d) All the above
- 5) The objectives of professional ethics in engineering are _____.
 - a) To understand the moral values that ought to guide the Engineering profession
 - b) To resolve the moral issues in the profession, and
 - c) To justify the moral judgment concerning the profession
 - d) All the above
- 6) Virtues are _____.
 - a) moral
 - b) ethics
 - c) values
 - d) positive and preferred values
- 7) One of the basic desires of every human being is to be always _____.
 - a) Happy
 - b) Sad
 - c) Laugh
 - d) Earn Money

- 8) Value and skills should go hand in hand _____.
- | | |
|----------------|-------------------|
| a) True | b) False |
| c) Cannot tell | d) Wrong question |
- 9) _____ are the basic Human aspirations.
- | | |
|----------------------|-------------------------------|
| a) Money | b) Relationship without money |
| c) Physical facility | d) Continuous happiness |
- 10) Many complex social problems exist in the _____.
- | | |
|-----------------------|----------------------|
| a) Industry/ Business | b) Society |
| c) Home | d) None of the above |

T.Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: March/April - 2024
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Antenna & Wave Propagation (BTN06601)

Day & Date: Tuesday, 21-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
 2) Figures to the right indicate full marks.

Section – I

- Q.2 Attempt any Three. 12**
- a) Explain in brief principle of radiation mechanism of an antenna.
 - b) Define the current distribution for the following short dipole, half wave dipole and monopole.
 - c) Explain the slot antenna and its applications.
 - d) Explain the following modes of helical antenna.
 - i) Normal Mode
 - ii) Axial Mode
- Q.3 Attempt any Two. 16**
- a) Define antenna beam width, antenna bandwidth, antenna beam efficiency, antenna beam area, antenna temperature with one example.
 - b) What is pattern multiplication? State its importance. Explain with an example.
 - c) Explain the radiation resistance and radiation power for half wave dipole antenna and monopole.

Section – II

- Q.4 Attempt any Three 12**
- a) Explain advantages and applications of microstrip antenna.
 - b) Explain the concept of smart antenna with analogy.
 - c) State and explain various modes of propagation.
 - d) Write short note on duct propagation and troposcattering.
- Q.5 Attempt any Two. 16**
- a) Explain the working of Horn antenna. Explain different types of horn antenna.
 - b) Explain the concept of reconfigurable antennas in detail.
 - c) What is the structure of atmosphere? Explain each layer, significance of all.

Antenna & Wave Propagation (BTN06601)

Day & Date: Tuesday, 21-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct option from the following.

14

- 1) As the number of turns in helical antenna approaches to infinity then the axial ration become _____.

a) Unity	b) Infinity
c) Two	d) Four
- 2) For a dipole Log Periodic Antenna all the dimensions change by the _____.

a) Same scaling factor	b) Log of scaling factor
c) Tangent of scaling factor	d) None
- 3) Horn antennas are derivatives of _____.

a) Coaxial lines	b) Slots
c) Microstrips	d) Waveguides
- 4) A microstrip antenna usually classified as _____.

a) Narrow band	b) Medium band
c) Broadband	d) Base band
- 5) Smart antenna is combining _____ technology.

a) Digital signal processing	b) Smart technology
c) Android	d) All of above
- 6) Space wave propagation is the type of _____.

a) Surface wave propagation	b) Ground wave propagation
c) Sky wave propagation	d) Radio wave propagation
- 7) Product of frequency and wavelength is called as _____.

a) Speed of light	b) Constant
c) Variable	d) Does not having meaning
- 8) To create radiation there must be a _____.

a) Direct current	b) Time Varying current
c) Induced current	d) All of above
- 9) A radiator having equal radiation in all direction is referred to as _____ radiator.

a) Directional	b) Isotropic
c) Guided	d) Non-directional

- 5) To create radiation there must be a _____.
 - a) Direct current
 - b) Time Varying current
 - c) Induced current
 - d) All of above
- 6) A radiator having equal radiation in all direction is referred to as _____ radiator.
 - a) Directional
 - b) Isotropic
 - c) Guided
 - d) Non-directional
- 7) The ratio of 4π over the beam solid angle is defined the _____.
 - a) Gain
 - b) Directivity
 - c) Efficiency
 - d) Aperture
- 8) The input impedance of $\lambda/2$ dipole, with an idealized sinusoidal current distribution _____.
 - a) $73+j42.5$
 - b) $50+j100$
 - c) $25+j50$
 - d) $36+j42.5$
- 9) To achieve Broadside radiation from a uniform linear array, the phasing between elements must be _____.
 - a) 90
 - b) 45
 - c) 0
 - d) 120

- 10)** A monopole antenna is considered as _____.
a) Traveling wave b) Surface wave
c) Sky wave d) Resonant
- 11)** Primary modes of radiation of helical antenna are _____.
a) Normal mode only b) Axial mode only
c) Both normal and axial mode d) None
- 12)** As the number of turns in helical antenna approaches to infinity then the axial ration become _____.
a) Unity b) Infinity
c) Two d) Four
- 13)** For a dipole Log Periodic Antenna all the dimensions change by the _____.
a) Same scaling factor b) Log of scaling factor
c) Tangent of scaling factor d) None
- 14)** Horn antennas are derivatives of _____.

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2024
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Embedded System (BTN06602)

Day & Date: Friday 24-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.
 4) Assume suitable data if required.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct option from the following **14**

- 1) What does T, D, M, I stands for in ARM7TDMI?
 - a) Timer, Debug, Multiplex, ICE
 - b) Thumb, Debug, Multiplier, ICE
 - c) Timer, Debug, Modulation, IS
 - d) More
- 2) In LPC2148 board _____ bit ARM7TDMI controller is present?
 - a) 128 bit
 - b) 8 bit
 - c) 64 bit
 - d) 32 bit
- 3) When there is a failed attempt to memory access then processor enters _____ mode.
 - a) Abort
 - b) Supervisor
 - c) User
 - d) Fast Interrupt Request
- 4) Exception priorities are in the following descending order
 - a) Reset, Data, Abort, FIQ, IRQ, Pre Fetch Abort, SWI or Undef
 - b) SWI or Undef, Pre Fetch Abort, IRQ, FIQ, Abort, Data, Reset
 - c) FIQ, IRQ, Data, Abort, Pre Fetch Abort, SWI or Undef, Reset
 - d) None of the above
- 5) Who is the founder of LPC2148 board?
 - a) Intel
 - b) Atmel
 - c) Motorola
 - d) Philips
- 6) In LPC 2148 _____ pin select register is used to configure port pins P0.0 to P0.15.
 - a) PINSEL0
 - b) PINSEL1
 - c) PINSEL2
 - d) IOODIR
- 7) _____ instruction transfer the content of CPSR into a register file.
 - a) MRS
 - b) CPSR
 - c) MSR
 - d) None
- 8) What is the standard form of LSL?
 - a) Logical Shift Left
 - b) Left Shift Logical
 - c) Logical Shift Logic
 - d) None of these

- 9) _____ is a kernel object that one or more threads of execution can release for the purposes of synchronization.
- a) Interrupt
 - b) Acquire
 - c) Semaphore
 - d) Mutual exclusion
- 10) Concurrent and independent threads of execution that can compete for CPU execution time is called _____.
- a) Semaphore
 - b) Task
 - c) Threading
 - d) None of the above
- 11) A semaphore is a protocol mechanism used to _____.
- a) control access to a shared resource
 - b) signal the occurrence of an event
 - c) allow two task to synchronize their activities
 - d) all of the above
- 12) Which is the core of OS?
- a) Kernel
 - b) Semaphore
 - c) Shell
 - d) Scheduler
- 13) When the processor is executing in thumb state, then all instructions are _____ wide
- a) 8 bits
 - b) 16 bits
 - c) 32 bits
 - d) 64 bits
- 14) In real time operating system _____.
- a) All processes have the same priority
 - b) A task must be serviced by its deadline period
 - c) Process scheduling can be done only once
 - d) Kernel is not required

Seat No.	
----------	--

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2024
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Embedded System (BTN06602)

Day & Date: Friday 24-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
 2) Figures to the right indicate full marks.
 3) Assume suitable data if required.

Section – I

Q.2 Attempt any four of the following questions. 16

- a) Define embedded system. Explain the components of embedded system Hardware.
- b) Explain the features of LPC 2148 in detail.
- c) Draw and explain CPSR format.
- d) Explain general purpose registers related to LPC2148.
- e) Describe the operation with example of following ARM instructions.
 1) MVN 2) ADD 3) LDR 4) MSR

Q.3 Attempt any Two of the following questions. 12

- a) With the suitable diagram explain ARM 7TDMI core architecture in detail.
- b) What are the recent trends in embedded system? Explain each in detail.
- c) Explain the following on chip peripherals of LPC 2148 in detail. PLL WDT

Section – II

Q.4 Attempt any Four of the following questions. 16

- a) Write different features μcos of II RTOS.
- b) Explain concept of semaphore with example.
- c) What are the RTOS services in contrast with traditional OS.
- d) Define interrupt latency, interrupt response time and interrupt recovery time.
- e) Draw and explain the block diagram of Smart Card System based ATM.

Q.5 Attempt any Two of the following questions. 12

- a) Explain the following kernel objects in RTOS.
 1) Message Queue
 2) Event Register
- b) What are the types of scheduling algorithm. Explain any two types of scheduling algorithm in RTOS.
- c) Draw interfacing diagram of 16x2 LCD with LPC2148. Write an embedded c program to display "Embedded Systems" message on 16x2 LCD.

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2024
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Embedded System (BTN06602)

Day & Date: Friday 24-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.
 4) Assume suitable data if required.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct option from the following

14

- 1) What is the standard form of LSL?
 - a) Logical Shift Left
 - b) Left Shift Logical
 - c) Logical Shift Logic
 - d) None of these

- 2) _____ is a kernel object that one or more threads of execution can release for the purposes of synchronization.
 - a) Interrupt
 - b) Acquire
 - c) Semaphore
 - d) Mutual exclusion

- 3) Concurrent and independent threads of execution that can compete for CPU execution time is called _____.
 - a) Semaphore
 - b) Task
 - c) Threading
 - d) None of the above

- 4) A semaphore is a protocol mechanism used to _____.
 - a) control access to a shared resource
 - b) signal the occurrence of an event
 - c) allow two task to synchronize their activities
 - d) all of the above

- 5) Which is the core of OS?
 - a) Kernel
 - b) Semaphore
 - c) Shell
 - d) Scheduler

- 6) When the processor is executing in thumb state, then all instructions are _____ wide
 - a) 8 bits
 - b) 16 bits
 - c) 32 bits
 - d) 64 bits

- 7) In real time operating system _____.
 - a) All processes have the same priority
 - b) A task must be serviced by its deadline period
 - c) Process scheduling can be done only once
 - d) Kernel is not required

- 8) What does T, D, M, I stands for in ARM7TDMI?
a) Timer, Debug, Multiplex, ICE b) Thumb, Debug, Multiplier, ICE
c) Timer, Debug, Modulation, IS d) More
- 9) In LPC2148 board _____ bit ARM7TDMI controller is present?
a) 128 bit b) 8 bit
c) 64 bit d) 32 bit
- 10) When there is a failed attempt to memory access then processor enters _____ mode.
a) Abort b) Supervisor
c) User d) Fast Interrupt Request
- 11) Exception priorities are in the following descending order
a) Reset, Data, Abort, FIQ, IRQ, Pre Fetch Abort, SWI or Undef
b) SWI or Undef, Pre Fetch Abort, IRQ, FIQ, Abort, Data, Reset
c) FIQ, IRQ, Data, Abort, Pre Fetch Abort, SWI or Undef, Reset
d) None of the above
- 12) Who is the founder of LPC2148 board?
a) Intel b) Atmel
c) Motorola d) Philips
- 13) In LPC 2148 _____ pin select register is used to configure port pins P0.0 to P0.15.
a) PINSEL0 b) PINSEL1
c) PINSEL2 d) IO0DIR
- 14) _____ instruction transfer the content of CPSR into a register file.
a) MRS b) CPSR
c) MSR d) None

Seat No.

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2024
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Embedded System (BTN06602)

Day & Date: Friday 24-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
 2) Figures to the right indicate full marks.
 3) Assume suitable data if required.

Section – I

Q.2 Attempt any four of the following questions. 16

- a) Define embedded system. Explain the components of embedded system Hardware.
- b) Explain the features of LPC 2148 in detail.
- c) Draw and explain CPSR format.
- d) Explain general purpose registers related to LPC2148.
- e) Describe the operation with example of following ARM instructions.
 1) MVN 2) ADD 3) LDR 4) MSR

Q.3 Attempt any Two of the following questions. 12

- a) With the suitable diagram explain ARM 7TDMI core architecture in detail.
- b) What are the recent trends in embedded system? Explain each in detail.
- c) Explain the following on chip peripherals of LPC 2148 in detail. PLL WDT

Section – II

Q.4 Attempt any Four of the following questions. 16

- a) Write different features μ cos of II RTOS.
- b) Explain concept of semaphore with example.
- c) What are the RTOS services in contrast with traditional OS.
- d) Define interrupt latency, interrupt response time and interrupt recovery time.
- e) Draw and explain the block diagram of Smart Card System based ATM.

Q.5 Attempt any Two of the following questions. 12

- a) Explain the following kernel objects in RTOS.
 1) Message Queue
 2) Event Register
- b) What are the types of scheduling algorithm. Explain any two types of scheduling algorithm in RTOS.
- c) Draw interfacing diagram of 16x2 LCD with LPC2148. Write an embedded c program to display "Embedded Systems" message on 16x2 LCD.

Seat No.	
----------	--

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2024
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Embedded System (BTN06602)

Day & Date: Friday 24-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.
 4) Assume suitable data if required.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct option from the following

14

- 1) A semaphore is a protocol mechanism used to _____.
 - a) control access to a shared resource
 - b) signal the occurrence of an event
 - c) allow two task to synchronize their activities
 - d) all of the above
- 2) Which is the core of OS?
 - a) Kernel
 - b) Semaphore
 - c) Shell
 - d) Scheduler
- 3) When the processor is executing in thumb state, then all instructions are _____ wide
 - a) 8 bits
 - b) 16 bits
 - c) 32 bits
 - d) 64 bits
- 4) In real time operating system _____.
 - a) All processes have the same priority
 - b) A task must be serviced by its deadline period
 - c) Process scheduling can be done only once
 - d) Kernel is not required
- 5) What does T, D, M, I stands for in ARM7TDMI?
 - a) Timer, Debug, Multiplex, ICE
 - b) Thumb, Debug, Multiplier, ICE
 - c) Timer, Debug, Modulation, IS
 - d) More
- 6) In LPC2148 board _____ bit ARM7TDMI controller is present?
 - a) 128 bit
 - b) 8 bit
 - c) 64 bit
 - d) 32 bit
- 7) When there is a failed attempt to memory access then processor enters _____ mode.
 - a) Abort
 - b) Supervisor
 - c) User
 - d) Fast Interrupt Request

- 8) Exception priorities are in the following descending order
- a) Reset, Data, Abort, FIQ, IRQ, Pre Fetch Abort, SWI or Undef
 - b) SWI or Undef, Pre Fetch Abort, IRQ, FIQ, Abort, Data, Reset
 - c) FIQ, IRQ, Data, Abort, Pre Fetch Abort, SWI or Undef, Reset
 - d) None of the above
- 9) Who is the founder of LPC2148 board?
- a) Intel
 - b) Atmel
 - c) Motorola
 - d) Philips
- 10) In LPC 2148 _____ pin select register is used to configure port pins P0.0 to P0.15.
- a) PINSEL0
 - b) PINSEL1
 - c) PINSEL2
 - d) IO0DIR
- 11) _____ instruction transfer the content of CPSR into a register file.
- a) MRS
 - b) CPSR
 - c) MSR
 - d) None
- 12) What is the standard form of LSL?
- a) Logical Shift Left
 - b) Left Shift Logical
 - c) Logical Shift Logic
 - d) None of these
- 13) _____ is a kernel object that one or more threads of execution can release for the purposes of synchronization.
- a) Interrupt
 - b) Acquire
 - c) Semaphore
 - d) Mutual exclusion
- 14) Concurrent and independent threads of execution that can compete for CPU execution time is called _____.
- a) Semaphore
 - b) Task
 - c) Threading
 - d) None of the above

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct option from the following **14**

- 1) In LPC 2148 _____ pin select register is used to configure port pins P0.0 to P0.15.
 - a) PINSEL0
 - b) PINSEL1
 - c) PINSEL2
 - d) IOODIR
- 2) _____ instruction transfer the content of CPSR into a register file.
 - a) MRS
 - b) CPSR
 - c) MSR
 - d) None
- 3) What is the standard form of LSL?
 - a) Logical Shift Left
 - b) Left Shift Logical
 - c) Logical Shift Logic
 - d) None of these
- 4) _____ is a kernel object that one or more threads of execution can release for the purposes of synchronization.
 - a) Interrupt
 - b) Acquire
 - c) Semaphore
 - d) Mutual exclusion
- 5) Concurrent and independent threads of execution that can compete for CPU execution time is called _____.
 - a) Semaphore
 - b) Task
 - c) Threading
 - d) None of the above
- 6) A semaphore is a protocol mechanism used to _____.
 - a) control access to a shared resource
 - b) signal the occurrence of an event
 - c) allow two task to synchronize their activities
 - d) all of the above
- 7) Which is the core of OS?
 - a) Kernel
 - b) Semaphore
 - c) Shell
 - d) Scheduler
- 8) When the processor is executing in thumb state, then all instructions are _____ wide
 - a) 8 bits
 - b) 16 bits
 - c) 32 bits
 - d) 64 bits

- 9) In real time operating system _____.
- a) All processes have the same priority
 - b) A task must be serviced by its deadline period
 - c) Process scheduling can be done only once
 - d) Kernel is not required

 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.
 4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct option from the following.

14

- 1) With gate open, the maximum anode current at which SCR is turned OFF from ON condition is called _____.
 - a) breakdown voltage
 - b) peak reverse voltage
 - c) holding current
 - d) latching current
- 2) IC1596 consists of _____ along with differential amplifier pairs.
 - a) Current sources
 - b) voltage sources
 - c) none of these
- 3) For a single phase halfwave converter with R load, maximum DC voltage obtained is _____.
 - a) $V_m/2\pi$
 - b) V_m/π
 - c) $V_m/3\pi$
 - d) V_m
- 4) A fully controlled bridge converter is more beneficial over M-2 converter because _____.
 - a) SCR PIV rating requirement is less
 - b) Transformer rating requirement is less
 - c) Both a and b
 - d) None of these
- 5) _____ is used to trigger TRIAC.
 - a) DIAC
 - b) SCR
 - c) BJT
 - d) None of these
- 6) In a PLL frequency synthesizer, a value of divide-by-N network varies from 9 to 999 in a single steps increment with $f_{in} = 1$ KHz. What is the value of synthesizer output?
 - a) 0.1 KHz to 999 KHz
 - b) 1 KHz to 999 KHz
 - c) 10 KHz to 999 KHz
 - d) 9 KHz to 999 KHz
- 7) What is the VCO center frequency of LM565 with $R_1 = 10K$ and $C_1 = 0.01\mu f$ is _____.
 - a) 3KHz
 - b) 300Hz
 - c) 1000Hz
 - d) None of these

- 8) To obtain delay of 350 RC, number of XR 2240 required are _____.
a) 1
b) 2
c) 4
d) All of above
- 9) IC 74C926 displays output of latch, if its display select pin is connected to _____.
a) Logic 0
b) Logic 1
c) Either a or b
d) None
- 10) RTD is a temperature sensor with _____ temperature coefficient.
a) Positive
b) Negative
c) Linear
d) Non - Linear
- 11) Resistance of PT 100 at 0 deg C is _____.
a) 100 Ω
b) 200 Ω
c) 138.5 Ω
d) 50 Ω
- 12) Which of the following is self powered temperature sensor?
a) Thermocouple
b) RTD
c) Thermistor
d) None of these
- 13) Proportional band of the controller is expressed as: _____.
a) Gain
b) Ratio
c) Percentage
d) Range of control variables
- 14) What type of power supply is typically used for a PLC?
a) AC
b) DC
c) Both AC and DC
d) Solar

T.Y. (B.Tech.) (Sem - II) (New)(CBCS) Examination: March/April – 2024
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Electronic System Design (BTN06603)

Day & Date: Monday, 27-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
 2) Figures to the right indicate full marks.
 3) Assume suitable data wherever necessary and mention it clearly.

Section – I

- Q.2 Attempt Any Four of the following. 16**
- a) Explain VI characteristics of DIAC with the help of plot, schematic construction and symbol.
 - b) For a free running frequency of 1KHz from PLL565, determine value of lock range, capture range and frequency of VCO.
 - c) Define latching current and holding current, forward breakover voltage and Peak reverse voltage.
 - d) What is commutation? Explain CLASS B commutation method of SCR.
 - e) Explain AC power control using DIAC and TRIAC.
- Q.3 Attempt Any Two of the following: 12**
- a) Explain with the help of circuit diagram and waveforms single phase full wave-controlled rectifier bridge rectifier with resistive load. Derive the expression for Average DC output voltage, Average DC load current, RMS load voltage.
 - b) Design frequency synthesizer to generate signal of 1KHz to 999KHz using PLL565.
 - c) Explain construction and working of SCR. Compare TRIAC and SCR.

Section – II

- Q.4 Attempt Any Four of the following. 16**
- a) What is instrumentation amplifier and derive an output voltage equation for same?
 - b) Explain cold junction compensation in thermocouple.
 - c) Explain the concept of frequency ratio measurement.
 - d) Design offset voltage to current convertor input voltage is -5 to 10 V, required output current 4 mA to 20 mA.
 - e) Draw and explain PLC architecture.
- Q.5 Attempt Any Two of the following: 12**
- a) Design timer using XR2240 to generate a delay of 1 hr in section.
 - b) What is ladder diagram? Design ladder diagram for elevator controlling.
 - c) Design ON-OFF controller to control temperature in the range of 0°C to 100°C. Set point is 40°C.

Seat No.

 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.
 4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct option from the following. 14

- 1) In a PLL frequency synthesizer, a value of divide-by-N network varies from 9 to 999 in a single steps increment with $f_{in} = 1 \text{ KHz}$. What is the value of synthesizer output?

a) 0.1 KHz to 999 KHz	b) 1 KHz to 999 KHz
c) 10 KHz to 999 KHz	d) 9 KHz to 999 KHz
- 2) What is the VCO center frequency of LM565 with $R1 = 10K$ and $C1 = 0.01\mu f$ is _____.

a) 3KHz	b) 300Hz
c) 1000Hz	d) None of these
- 3) To obtain delay of 350 RC, number of XR 2240 required are _____.

a) 1	b) 2
c) 4	d) All of above
- 4) IC 74C926 displays output of latch, if its display select pin is connected to _____.

a) Logic 0	b) Logic 1
c) Either a or b	d) None
- 5) RTD is a temperature sensor with _____ temperature coefficient.

a) Positive	b) Negative
c) Linear	d) Non - Linear
- 6) Resistance of PT 100 at 0 deg C is _____.

a) 100 Ω	b) 200 Ω
c) 138.5 Ω	d) 50 Ω
- 7) Which of the following is self powered temperature sensor?

a) Thermocouple	b) RTD
c) Thermistor	d) None of these
- 8) Proportional band of the controller is expressed as: _____.

a) Gain	b) Ratio
c) Percentage	d) Range of control variables

- 9) What type of power supply is typically used for a PLC?
- a) AC
 - b) DC
 - c) Both AC and DC
 - d) Solar
- 10) With gate open, the maximum anode current at which SCR is turned OFF from ON condition is called _____.
- a) breakdown voltage
 - b) peak reverse voltage
 - c) holding current
 - d) latching current
- 11) IC1596 consists of _____ along with differential amplifier pairs.
- a) Current sources
 - b) voltage sources
 - c) none of these
- 12) For a single phase halfwave converter with R load, maximum DC voltage obtained is _____.
- a) $V_m/2\pi$
 - b) V_m/π
 - c) $V_m/3\pi$
 - d) V_m
- 13) A fully controlled bridge converter is more beneficial over M-2 converter because _____.
- a) SCR PIV rating requirement is less
 - b) Transformer rating requirement is less
 - c) Both a and b
 - d) None of these
- 14) _____ is used to trigger TRIAC.
- a) DIAC
 - b) SCR
 - c) BJT
 - d) None of these

T.Y. (B.Tech.) (Sem - II) (New)(CBCS) Examination: March/April – 2024
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Electronic System Design (BTN06603)

Day & Date: Monday, 27-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
 2) Figures to the right indicate full marks.
 3) Assume suitable data wherever necessary and mention it clearly.

Section – I

- Q.2 Attempt Any Four of the following. 16**
- a) Explain VI characteristics of DIAC with the help of plot, schematic construction and symbol.
 - b) For a free running frequency of 1KHz from PLL565, determine value of lock range, capture range and frequency of VCO.
 - c) Define latching current and holding current, forward breakover voltage and Peak reverse voltage.
 - d) What is commutation? Explain CLASS B commutation method of SCR.
 - e) Explain AC power control using DIAC and TRIAC.
- Q.3 Attempt Any Two of the following: 12**
- a) Explain with the help of circuit diagram and waveforms single phase full wave-controlled rectifier bridge rectifier with resistive load. Derive the expression for Average DC output voltage, Average DC load current, RMS load voltage.
 - b) Design frequency synthesizer to generate signal of 1KHz to 999KHz using PLL565.
 - c) Explain construction and working of SCR. Compare TRIAC and SCR.

Section – II

- Q.4 Attempt Any Four of the following. 16**
- a) What is instrumentation amplifier and derive an output voltage equation for same?
 - b) Explain cold junction compensation in thermocouple.
 - c) Explain the concept of frequency ratio measurement.
 - d) Design offset voltage to current convertor input voltage is -5 to 10 V, required output current 4 mA to 20 mA.
 - e) Draw and explain PLC architecture.
- Q.5 Attempt Any Two of the following: 12**
- a) Design timer using XR2240 to generate a delay of 1 hr in section.
 - b) What is ladder diagram? Design ladder diagram for elevator controlling.
 - c) Design ON-OFF controller to control temperature in the range of 0°C to 100°C. Set point is 40°C.

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2024
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Optical Fiber Communication (BTN06609)

Day & Date: Wednesday, 29-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct options.

14

- 1) N. A. is useful measure of _____.
 a) light scattering ability b) Attenuation
 c) Dispersion d) light gathering capability
- 2) The Numerical Aperture (NA) is defined for a step index fiber in air by NA is equal to _____.
 a) $\sin \theta a$ b) $\cos \theta a$
 c) $\tan \theta a$ d) None of these
- 3) The ray tracing helical path through fiber gives change in direction of 2γ at each reflection called _____.
 a) meridional ray b) skew ray
 c) axial ray d) none of these
- 4) Multimode graded index fibers tend to have _____ core diameters than multimode step index fibers.
 a) smaller b) Greater
 c) varying d) Constant
- 5) Meridional ray is the ray which passes through _____ of the fiber core.
 a) All angles b) The axis
 c) N. A. d) Structure
- 6) An optical fiber _____ is a device that distributes light from a main fiber into one or more branch fibers.
 a) Splitter b) Coupler
 c) Splices d) Connector
- 7) SBS (Stimulated Brillouin Scattering) is mainly a _____.
 a) Backward process
 b) Forward process
 c) Both backward and forward process
 d) None of these

- 8) A permanent joint formed between two individual optical fibers in the field is known as _____.
- a) Fiber joint
 - b) Fiber splice
 - c) Fiber coupler
 - d) Fiber connector
- 9) Ray scattering and Mie scattering are the types of _____.
- a) Linear scattering
 - b) Non Linear
 - c) Exponential Scattering
 - d) None of these
- 10) The internal quantum efficiency of LEDs decreases _____ with increasing temperature.
- a) Linearly
 - b) Inversely
 - c) Exponentially
 - d) Randomly
- 11) The internal quantum efficiency of LED decreases with _____.
- a) Increase in temp
 - b) Decrease in temp
 - c) Increase in pressure
 - d) Decrease in pressure
- 12) The requirement of detector is _____.
- a) High fidelity
 - b) Larger size
 - c) More numerical aperture
 - d) All the above
- 13) The receiver sensitivity is _____.
- a) Minimum mean power
 - b) Maximum mean power
 - c) Average mean power
 - d) None of above
- 14) OTDM stands for _____.
- a) Orthogonal time duplex multiplexing
 - b) Orthogonal Time Division Multiplexing
 - c) Both a) & b)
 - d) Optical Time Division Multiplexing

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2024
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Optical Fiber Communication (BTN06609)

Day & Date: Wednesday, 29-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

Instructions: 1) All questions are compulsory.
2) Figures to the right indicates full marks.

Q.2 Solve any Four. 16

- With B.D., Explain optical fiber communication system briefly.
- Explain intrinsic absorption mechanism in fiber optics.
- Explain scattering losses observed in fiber optics.
- What is dispersion? Compare dispersions in different types of fiber optics.
- Briefly write about connectors of fiber optics.

Q.3 Solve any Two. 12

- Explain structure of surface emitting LED.
- An optical fiber has a numerical aperture of 0.20 and a cladding refractive index of 1.59. Determine.
 - The acceptance angle for the fiber in water which has a refractive index of 1.33
 - The critical angle at the core-cladding interface
- What are splices? Explain techniques for splicing.

Section – II

Q.4 Solve any Four. 16

- Explain the optical detection principle in brief.
- Explain the optical network modes in short.
- Write a short note on WDM.
- Explain OTDM.
- Explain the Transmitter design of optical communication System.

Q.5 Solve any Two. 12

- Explain the operation of Optical TDM. What are its advantages over Electrical TDM?
- Explain in detail the receiver design for optical communication System.
- Explain in detail structure and working of phototransistor.

Seat No.

 3) Figures to the right indicates full marks.
 4) Assume suitable data whenever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct option from the following.

14

- 1) A pixel p at coordinates (x, y) has neighbors whose coordinates are given by: $(x+1, y)$, $(x-1, y)$, $(x, y+1)$, $(x, y-1)$. This set of pixels is called _____.
 - a) 4-neighbors of p
 - b) Diagonal neighbors
 - c) 8-neighbors
 - d) None of the mentioned
- 2) Which of the following is method of estimating the degradation function?
 - a) Image observation
 - b) Experimentation
 - c) Mathematical modeling
 - d) All of above
- 3) In frequency domain, what is the equivalent operation of product of two functions in spatial domain?
 - a) Correlation
 - b) Convolution
 - c) Fourier transform
 - d) Fast Fourier transform
- 4) Process used to correct the power law response is called as _____.
 - a) Alpha correction
 - b) Luminance correction
 - c) Gamma correction
 - d) None of the above
- 5) If the images are displayed using 8-bits, then, what is the range of the value of an image if the image is a result of subtraction operation?
 - a) 0 to 255
 - b) 0 to 511
 - c) -255 to 0
 - d) None of the mentioned
- 6) What is the full form of CDF?
 - a) Cumulative density function
 - b) Contour derived function
 - c) Cumulative distribution function
 - d) None of the mentioned
- 7) What is the sum of all components of a normalized histogram?
 - a) 1
 - b) -1
 - c) 0
 - d) None of the mentioned
- 8) Histogram matching is also called as _____.
 - a) Histogram equalization
 - b) Contrast stretching
 - c) Histogram specification
 - d) None of the above

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicates full marks.
3) Assume suitable data whenever needed and mention it clearly.

Section – I

- Q.2 Attempt any Four. 16**
- a) What is contrast stretching of an image and how it can be achieved?
 - b) Explain Image sampling and quantization.
 - c) What are applications of Dilation and Erosion in image morphology?
 - d) Explain types Low pass filters used for image smoothing.
 - e) Explain log transform and power law transform.
- Q.3 Attempt any Two. 12**
- a) What is gray level slicing and bit plane slicing? What are its applications?
 - b) Explain Regional Processing method for edge linking.
 - c) Explain in detail Discrete Fourier Transform.

Section – II

- Q.4 Attempt any Four. 16**
- a) What is Aperture problem in 2D motion estimation?
 - b) Explain estimation of degradation function by modeling.
 - c) Explain Video Frame classifications.
 - d) Explain Exhaustive block matching algorithms.
 - e) Difference between progressive versus interlaced scans.
- Q.5 Attempt any Two. 12**
- a) Explain Inverse Filter for image restoration.
 - b) What are sampling structures for Digital Video?
 - c) Difference between 2-D motion Vs optical flow.

Q.1 Choose the correct option from the following.

14

- 1) Histogram matching is also called as _____.
 a) Histogram equalization b) Contrast stretching
 c) Histogram specification d) None of the above
- 2) Which of the method is not related to region based segmentation?
 a) Thresholding b) Merging & splitting
 c) Region growing d) Hough transform
- 3) Which of the following second order operator is most robust to noise in edge filtering?
 a) Sobel operator b) Laplacian operator
 c) Laplacian of Gaussian operator d) Prewitt operator
- 4) Process that increases the dynamic range of gray levels in an image is called as _____.
 a) Linear stretching b) Contrast stretching
 c) Contrast matching d) All of above
- 5) Block motion model can't handle _____ motion.
 a) Translational b) Rotational
 c) Translational and rotational d) None of above
- 6) Which of the following is implementation issue of phase correlation method?
 a) Boundary effects
 b) Spectral leakage due to non integer motion vectors
 c) Range of displacement estimates
 d) All of above
- 7) Which scanning method is used for Television signal?
 a) Progressive b) Interlaced
 c) Progressive or interlaced d) None of above

- 8) A pixel p at coordinates (x, y) has neighbors whose coordinates are given by: $(x+1, y)$, $(x-1, y)$, $(x, y+1)$, $(x, y-1)$
This set of pixels is called _____.
- a) 4-neighbors of p b) Diagonal neighbors
c) 8-neighbors d) None of the mentioned
- 9) Which of the following is method of estimating the degradation function?
- a) Image observation b) Experimentation
c) Mathematical modeling d) All of above
- 10) In frequency domain, what is the equivalent operation of product of two functions in spatial domain?
- a) Correlation b) Convolution
c) Fourier transform d) Fast Fourier transform
- 11) Process used to correct the power law response is called as _____.
- a) Alpha correction b) Luminance correction
c) Gamma correction d) None of the above
- 12) If the images are displayed using 8-bits, then, what is the range of the value of an image if the image is a result of subtraction operation?
- a) 0 to 255 b) 0 to 511
c) -255 to 0 d) None of the mentioned
- 13) What is the full form of CDF?
- a) Cumulative density function b) Contour derived function
c) Cumulative distribution function d) None of the mentioned
- 14) What is the sum of all components of a normalized histogram?
- a) 1 b) -1
c) 0 d) None of the mentioned

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2024
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Image and Video Processing (BTN06610)

Day & Date: Wednesday, 29-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicates full marks.
3) Assume suitable data whenever needed and mention it clearly.

Section – I

- Q.2 Attempt any Four. 16**
- a) What is contrast stretching of an image and how it can be achieved?
 - b) Explain Image sampling and quantization.
 - c) What are applications of Dilation and Erosion in image morphology?
 - d) Explain types Low pass filters used for image smoothing.
 - e) Explain log transform and power law transform.
- Q.3 Attempt any Two. 12**
- a) What is gray level slicing and bit plane slicing? What are its applications?
 - b) Explain Regional Processing method for edge linking.
 - c) Explain in detail Discrete Fourier Transform.

Section – II

- Q.4 Attempt any Four. 16**
- a) What is Aperture problem in 2D motion estimation?
 - b) Explain estimation of degradation function by modeling.
 - c) Explain Video Frame classifications.
 - d) Explain Exhaustive block matching algorithms.
 - e) Difference between progressive versus interlaced scans.
- Q.5 Attempt any Two. 12**
- a) Explain Inverse Filter for image restoration.
 - b) What are sampling structures for Digital Video?
 - c) Difference between 2-D motion Vs optical flow.

Seat No.

ELECTRONICS & TELECOMMUNICATION ENGINEERING
Image and Video Processing (BTN06610)**

Day & Date: Wednesday, 29-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:**
- 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 - 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 - 3) Figures to the right indicates full marks.
 - 4) Assume suitable data whenever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct option from the following.

14

- 1) Process that increases the dynamic range of gray levels in an image is called as _____.
 - a) Linear stretching
 - b) Contrast stretching
 - c) Contrast matching
 - d) All of above
- 2) Block motion model can't handle _____ motion.
 - a) Translational
 - b) Rotational
 - c) Translational and rotational
 - d) None of above
- 3) Which of the following is implementation issue of phase correlation method?
 - a) Boundary effects
 - b) Spectral leakage due to non integer motion vectors
 - c) Range of displacement estimates
 - d) All of above
- 4) Which scanning method is used for Television signal?
 - a) Progressive
 - b) Interlaced
 - c) Progressive or interlaced
 - d) None of above
- 5) A pixel p at coordinates (x, y) has neighbors whose coordinates are given by: $(x+1, y)$, $(x-1, y)$, $(x, y+1)$, $(x, y-1)$. This set of pixels is called _____.
 - a) 4-neighbors of p
 - b) Diagonal neighbors
 - c) 8-neighbors
 - d) None of the mentioned
- 6) Which of the following is method of estimating the degradation function?
 - a) Image observation
 - b) Experimentation
 - c) Mathematical modeling
 - d) All of above
- 7) In frequency domain, what is the equivalent operation of product of two functions in spatial domain?
 - a) Correlation
 - b) Convolution

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct option from the following.**14**

- 1) What is the full form of CDF?
 - a) Cumulative density function
 - b) Contour derived function
 - c) Cumulative distribution function
 - d) None of the mentioned
- 2) What is the sum of all components of a normalized histogram?
 - a) 1
 - b) -1
 - c) 0
 - d) None of the mentioned
- 3) Histogram matching is also called as _____.
 - a) Histogram equalization
 - b) Contrast stretching
 - c) Histogram specification
 - d) None of the above
- 4) Which of the method is not related to region based segmentation?
 - a) Thresholding
 - b) Merging & splitting
 - c) Region growing
 - d) Hough transform
- 5) Which of the following second order operator is most robust to noise in edge filtering?
 - a) Sobel operator
 - b) Laplacian operator
 - c) Laplacian of Gaussian operator
 - d) Prewitt operator
- 6) Process that increases the dynamic range of gray levels in an image is called as _____.
 - a) Linear stretching
 - b) Contrast stretching

 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct answer:

14

- 1) Which type of quantization is most preferable for audio signals for a human ear?
 - a) Uniform quantization
 - b) Non uniform quantization
 - c) Uniform & Non uniform quantization
 - d) None of the mentioned
- 2) The number of lines per field in the United States TV system is _____.
 - a) 262 $\frac{1}{2}$
 - b) 525
 - c) 30
 - d) 60
- 3) The signals sent by the TV transmitter to ensure correct scanning in the receiver are called _____.
 - a) sync
 - b) chroma
 - c) luminance
 - d) video
- 4) In India, which monochrome TV system is used _____.
 - a) 525 line system
 - b) 625 line system
 - c) 819 line system
 - d) None of these
- 5) TV broadcasting system in India is as per CCIR _____.
 - a) system B
 - b) system I
 - c) system M
 - d) system X
- 6) The value of kell factor is about _____.
 - a) 0.3
 - b) 0.5
 - c) 0.7
 - d) 0.9
- 7) Moving Picture Experts Group (MPEG) is used to compress _____.
 - a) Frames
 - b) Images
 - c) Audio
 - d) Video
- 8) The outdoor unit is connected to indoor DTH received by _____.
 - a) Wave Guide
 - b) Coaxial cable
 - c) Twin flat feeder
 - d) Optical fiber

Max. Marks: 56

Instructions: 1) All questions are compulsory.
2) Figures to the right indicates full marks.

Section – I

Q.2 Attempt any Four. 16
a) Draw and explain the color composite video signal.
b) What are the different methods of color mixing?
c) Compare LCD Vs LED.
d) What is the difference between PAL NTSC?
e) List out the different types of video formats.

Q.3 Attempt any Two. 12
a) What is frequency interleaving? With neat sketch explain how this method is helpful for accommodating colour information also explain what is colour sub carrier frequency.
b) Draw a block diagram of an NTSC Colour T.V. Transmitter and describe each block.
c) Why is compression essential in multimedia applications? Explain MPEG in detail.

Section – II

Q.4 Attempt any Four. 16
a) What are the drawbacks of Mp3?
b) What is DVD? State its advantages and types?
c) Signal to Quantization noise ratio.
d) Explain the Arithmetic Coding.
e) What is The Difference In Linear Quantization And Non-linear Quantization?

Q.5 Attempt any Two. 12
a) What do you mean by lossy and lossless compression?
b) What is Blue Ray Disc? Give its specifications.
c) Explain in detail about the digitization principles.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct answer:

14

- 1) The outdoor unit is connected to indoor DTH received by _____.
 - a) Wave Guide
 - b) Coaxial cable
 - c) Twin flat feeder
 - d) Optical fiber
- 2) Compact disc surface doesn't wear out because the sensor is _____.
 - a) Electric
 - b) Magnetic
 - c) Mechanical
 - d) Optical
- 3) I signal in NTSC colour TV system is located at 57° with respect to _____.
 - a) Colour burst
 - b) R – Y
 - c) B – Y
 - d) G – Y
- 4) In Audio and Video Compression, voice is sampled at 8000 samples per second with _____.
 - a) 5 bits per sample
 - b) 6 bits per sample
 - c) 7 bits per sample
 - d) 8 bits per sample
- 5) For speech, we need to compress the digitize signals at _____.
 - a) 128 Khz
 - b) 256 Khz
 - c) 64 Khz
 - d) 1152 Khz
- 6) Moving Picture Experts Group (MPEG-2), was designed for high-quality DVD with a data rate of _____.
 - a) 3 to 6 Mbps
 - b) 4 to 6 Mbps
 - c) 5 to 6 Mbps
 - d) 6 to 6 Mbps
- 7) In PAL system, phase of R-Y signal is changed every alternate line by _____.
 - a) 90°
 - b) 180°
 - c) 270°
 - d) 360°
- 8) Which type of quantization is most preferable for audio signals for a human ear?
 - a) Uniform quantization

Sensors and Applications (BTN06605)**

Day & Date: Friday, 31-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.
2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options. 14

- 1) Change in output of sensor with change in input is _____.
 - a) Slew rate
 - b) Sensitivity
 - c) Power
 - d) Error
- 2) Thermocouple generate output voltage according to change in _____.
 - a) Humidity
 - b) Pressure
 - c) Weight
 - d) Temperature
- 3) _____ is the generation of electric charge by a crystalline material upon subjecting it to stress.
 - a) Hall Effect
 - b) Rectification
 - c) Heat Transfer Law
 - d) Piezoelectric Effect
- 4) _____ is the ability of the sensor to indicate the same output over a period of time for a constant input.
 - a) Error
 - b) Stability
 - c) Drift
 - d) None of the mentioned
- 5) The change in any linear dimension (length, width, or height) is called as _____.
 - a) Liner Expansion
 - b) Non-Linear Expansion
 - c) Angular Expansion
 - d) None of the mentioned
- 6) Loudspeaker is example of _____.
 - a) Rectifier
 - b) Microcontroller
 - c) Transducer
 - d) None of these
- 7) Converts the physical quantity to be measured into a continuously changing voltage or current _____.
 - a) Digital Sensor
 - b) Analog Sensor
 - c) Actuator
 - d) None of these
- 8) Arduino uses _____ as a basic programming language.
 - a) C/C++
 - b) Python
 - c) Java
 - d) None of these

Sensors and Applications (BTN06605)

Day & Date: Friday, 31-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt Any Four **16**

- a) Define transducer. Explain different types of transducers with examples.
- b) Define following terms.
 - 1) Drift
 - 2) Resolution
 - 3) Error
 - 4) Accuracy
- c) Explain temperature and thermal properties of a material with thermal expansion, temperature scales with conversion units and change in resistance.
- d) Explain piezoelectric effect with neat diagram. State applications of piezoelectric sensors.
- e) Describe working of ADC with neat block diagram.

Q.3 Attempt Any Two **12**

- a) Describe Current generators, Voltage references and Oscillators as excitation circuits.
- b) State various heat transfer modes. Explain each mode in detail with diagram. Give examples of sensors used to measure heat.
- c) Describe various dynamic models of Sensor Elements with differential equations.

Section – II

Q.4 Attempt Any Four **16**

- a) Draw neat labeled pin diagram of Arduino Uno board. State and explain various features associated with Arduino UNO board.
- b) Draw block diagram of Raspberry Pi board with peripherals. Explain each peripheral with specifications.
- c) Write a code to interface IR sensor with Arduino. Draw necessary connection diagram.
- d) Write a code to control brightness of an LED using Raspberry Pi. Draw appropriate interfacing diagram with input output pins.
- e) Design a circuit and write a program to detect a human being with buzzer indicator by using Arduino/Raspberry Pi.

Q.5 Attempt Any Two

- a) Write a program and draw connection diagram to interface LDR with Raspberry Pi board. State various features of Raspberry Pi.
- b) Design circuit and write a program to detect obstacle using IR sensor and Arduino. Compare Analog sensors w.r.t. Digital sensors.
- c) Detect an obstacle present in front of a person using interfacing of ultrasonic sensor with Arduino Uno. Compare sensors w.r.t. actuators.

- 1) Arduino uses _____ as a basic programming language.
 - a) C/C++
 - b) Python
 - c) Java
 - d) None of these
- 2) Arduino Uno consists of _____ of flash program memory?
 - a) 16 Kbyte
 - b) 32 Kbyte
 - c) 64 Kbyte
 - d) 512 Kbyte
- 3) Arduino UNO uses _____ microcontroller.
 - a) 8051
 - b) PIC16F877
 - c) Atmega328
 - d) Atmega2560
- 4) How many times does the setup() function run on every startup of the Arduino System?
 - a) 01
 - b) 02
 - c) 04
 - d) 08
- 5) Raspberry Pi-3 supports inbuilt _____.
 - a) HDMI connector
 - b) USB Connectors
 - c) Micro SD Slot
 - d) All of the mentioned
- 6) I2C communication signals SDA and SCL are associated in Raspberry-Pi to _____.
 - a) GPIO 1 & GPIO 2
 - b) GPIO 2 & GPIO 3
 - c) GPIO 7 & GPIO 8
 - d) GPIO 14 & GPIO 15
- 7) How many USB ports are present in Raspberry Pi 3?
 - a) 01
 - b) 02
 - c) 04
 - d) 08
- 8) Change in output of sensor with change in input is _____.
 - a) Slew rate
 - b) Sensitivity
 - c) Power
 - d) Error
- 9) Thermocouple generate output voltage according to change in _____.
 - a) Humidity
 - b) Pressure
 - c) Weight
 - d) Temperature

- 10) _____ is the generation of electric charge by a crystalline material upon subjecting it to stress.
- a) Hall Effect
 - b) Rectification
 - c) Heat Transfer Law
 - d) Piezoelectric Effect
- 11) _____ is the ability of the sensor to indicate the same output over a period of time for a constant input.
- a) Error
 - b) Stability
 - c) Drift
 - d) None of the mentioned
- 12) The change in any linear dimension (length, width, or height) is called as _____.
- a) Linear Expansion
 - b) Non-Linear Expansion
 - c) Angular Expansion
 - d) None of the mentioned
- 13) Loudspeaker is example of _____.
- a) Rectifier
 - b) Microcontroller
 - c) Transducer
 - d) None of these
- 14) Converts the physical quantity to be measured into a continuously changing voltage or current _____.
- a) Digital Sensor
 - b) Analog Sensor
 - c) Actuator
 - d) None of these

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2024
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Sensors and Applications (BTN06605)

Day & Date: Friday, 31-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt Any Four

16

- Define transducer. Explain different types of transducers with examples.
- Define following terms.
 - Drift
 - Resolution
 - Error
 - Accuracy
- Explain temperature and thermal properties of a material with thermal expansion, temperature scales with conversion units and change in resistance.
- Explain piezoelectric effect with neat diagram. State applications of piezoelectric sensors.
- Describe working of ADC with neat block diagram.

Q.3 Attempt Any Two

12

- Describe Current generators, Voltage references and Oscillators as excitation circuits.
- State various heat transfer modes. Explain each mode in detail with diagram. Give examples of sensors used to measure heat.
- Describe various dynamic models of Sensor Elements with differential equations.

Section – II

Q.4 Attempt Any Four

16

- Draw neat labeled pin diagram of Arduino Uno board. State and explain various features associated with Arduino UNO board.
- Draw block diagram of Raspberry Pi board with peripherals. Explain each peripheral with specifications.
- Write a code to interface IR sensor with Arduino. Draw necessary connection diagram.
- Write a code to control brightness of an LED using Raspberry Pi. Draw appropriate interfacing diagram with input output pins.
- Design a circuit and write a program to detect a human being with buzzer indicator by using Arduino/Raspberry Pi.

Q.5 Attempt Any Two

- a) Write a program and draw connection diagram to interface LDR with Raspberry Pi board. State various features of Raspberry Pi.
- b) Design circuit and write a program to detect obstacle using IR sensor and Arduino. Compare Analog sensors w.r.t. Digital sensors.
- c) Detect an obstacle present in front of a person using interfacing of ultrasonic sensor with Arduino Uno. Compare sensors w.r.t. actuators.

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2024
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Sensors and Applications (BTN06605)

Day & Date: Friday, 31-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.
 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options.

14

- 1) How many times does the setup() function run on every startup of the Arduino System?
 - a) 01
 - b) 02
 - c) 04
 - d) 08
- 2) Raspberry Pi-3 supports inbuilt _____.
 - a) HDMI connector
 - b) USB Connectors
 - c) Micro SD Slot
 - d) All of the mentioned
- 3) I2C communication signals SDA and SCL are associated in Raspberry-Pi to _____.
 - a) GPIO 1 & GPIO 2
 - b) GPIO 2 & GPIO 3
 - c) GPIO 7 & GPIO 8
 - d) GPIO 14 & GPIO 15
- 4) How many USB ports are present in Raspberry Pi 3?
 - a) 01
 - b) 02
 - c) 04
 - d) 08
- 5) Change in output of sensor with change in input is _____.
 - a) Slew rate
 - b) Sensitivity
 - c) Power
 - d) Error
- 6) Thermocouple generate output voltage according to change in _____.
 - a) Humidity
 - b) Pressure
 - c) Weight
 - d) Temperature
- 7) _____ is the generation of electric charge by a crystalline material upon subjecting it to stress.
 - a) Hall Effect
 - b) Rectification
 - c) Heat Transfer Law
 - d) Piezoelectric Effect
- 8) _____ is the ability of the sensor to indicate the same output over a period of time for a constant input.
 - a) Error
 - b) Stability
 - c) Drift
 - d) None of the mentioned

- 9) The change in any linear dimension (length, width, or height) is called as _____.
- a) Linear Expansion
 - b) Non-Linear Expansion
 - c) Angular Expansion
 - d) None of the mentioned
- 10) Loudspeaker is example of _____.
- a) Rectifier
 - b) Microcontroller
 - c) Transducer
 - d) None of these
- 11) Converts the physical quantity to be measured into a continuously changing voltage or current _____.
- a) Digital Sensor
 - b) Analog Sensor
 - c) Actuator
 - d) None of these
- 12) Arduino uses _____ as a basic programming language.
- a) C/C++
 - b) Python
 - c) Java
 - d) None of these
- 13) Arduino Uno consists of _____ of flash program memory?
- a) 16 Kbyte
 - b) 32 Kbyte
 - c) 64 Kbyte
 - d) 512 Kbyte
- 14) Arduino UNO uses _____ microcontroller.
- a) 8051
 - b) PIC16F877
 - c) Atmega328
 - d) Atmega2560

 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct options

14

- 1) What is the primary advantage of open-source software?
 - a) It is always free of charge
 - b) It is guaranteed to be bug-free
 - c) It allows users to customize and modify the software to meet their specific needs
 - d) It provides better technical support than proprietary software
- 2) Which license grants users the freedom to use, modify, and distribute open-source software while also requiring derivative works to be licensed under the same terms?
 - a) Apache License
 - b) BSD License
 - c) GNU General Public License (GPL)
 - d) MIT License
- 3) What is the purpose of partitioning a hard disk during the installation of an operating system?
 - a) To allocate space for system files only
 - b) To separate user files from system files
 - c) To create multiple logical drives within a single physical disk
 - d) To improve disk performance and organization
- 4) Which command-line utility is commonly used for basic file system management tasks in Linux?

a) ls	b) Cp
c) Mv	d) fdisk
- 5) In the context of an open-source operating system, what does process management involve?
 - a) Creating new partitions on the hard disk.
 - b) Monitoring network traffic.
 - c) Controlling and coordinating the execution of programs.
 - d) Setting up and managing user accounts.

- 6) Which task is commonly associated with the system administrator's responsibility in managing backup operations?
- a) Updating system software
 - b) Allocating disk space
 - c) Monitoring network security
 - d) Ensuring data integrity and recovery
- 7) Which open-source software is commonly used for configuring Apache web servers?
- a) MySQL
 - b) PHP
 - c) Apache Tomcat
 - d) Apache HTTP Server
- 8) What is the main function of a DHCP server in a network environment?
- a) Assigning IP addresses to network devices
 - b) Transferring files between clients and servers
 - c) Hosting websites and serving web pages
 - d) Managing email communication
- 9) What is the primary purpose of executing a shell script in an open-source operating system?
- a) To compile source code
 - b) To run system commands
 - c) To create user accounts
 - d) To configure network settings
- 10) What is the function of control structures in shell scripting?
- a) To define functions and subroutines
 - b) To handle system signals and interrupts
 - c) To perform arithmetic operations
 - d) To control the flow of execution based on conditions
- 11) What is the main difference between distributed and non-distributed VCS?
- a) Distributed VCS allows offline access to repositories
 - b) Non-distributed VCS supports larger file sizes
 - c) Distributed VCS is faster in handling large codebases
 - d) Non-distributed VCS provides stronger data encryption
- 12) Which of the following is a cloud-based solution for Git repositories?
- a) Github
 - b) Gitlab
 - c) BitBucket
 - d) All of the above
- 13) What command is used to commit changes to the local repository?
- a) git init
 - b) git clone
 - c) git commit
 - d) git add
- 14) What does <HEAD> represent in Git?
- a) The most recent commit is in the repository
 - b) The main branch of the repository
 - c) The current working directory
 - d) The parent commit of the current branch

Instructions: 1) All questions are compulsory.
2) Figures to the right indicates full marks

Section – I

Q.2 Attempt any Four **16**

- a) List and explain the advantages of using open source software.
- b) What are some applications of open source software in various domains?
- c) What are IP tables? How can IP tables be used to secure Linux servers? Explain how firewall rules can be created and configured using IP tables.
- d) Explain the concept of sed (stream editor) in Linux and how it can be used for text manipulation tasks.
- e) What are the key responsibilities of a system administrator in Linux? How do these responsibilities differ from those of a network administrator?

Q.3 Attempt any Two **12**

- a) What are the steps involved in installing Linux in a multiboot environment, and what considerations should be taken into account for hard disk partitioning and swap space allocation?
- b) What are some common commands for file manipulation in Linux, including piping and redirection, and how do they work?
- c) What is backup? How can backup be used to protect system data in Linux? Discuss different backup options and their pros and cons.

Section – II

Q.4 Attempt any Four **16**

- a) What is a DNS server? How can DNS servers be configured in Linux? Discuss different DNS server software options and their key features.
- b) What are the steps involved in obtaining and installing Git on your system? Are there any specific requirements or considerations?
- c) What are control structures in Bash shell scripts? How can if statements, for loops, and while loops be used to control program flow?
- d) What is script control in Bash shell programming? Explain how signals can be used to interrupt or terminate Bash shell scripts.
- e) What is the significance of checking the status of a repository using the "git status" command? How does it help in managing changes?

Q.5 Attempt any Two

- a) How can Bash shell scripts be used to interact with the web? Discuss different options for downloading web pages, parsing data from web pages, and working with URLs in Bash shell scripts.
- b) What are the different ways to remove files in Git? How does "git reset" remove staged files, and how does "git rm" remove committed files?
- c) What is the process of checking out a branch in Git? How does it switch the working directory to a different branch and what are the implications of this action?

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2024
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Open Source Technologies (BTN06606)

Day & Date: Friday, 31-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

Instructions: 1) All questions are compulsory.
2) Figures to the right indicates full marks

Section – I

Q.2 Attempt any Four **16**

- a) List and explain the advantages of using open source software.
- b) What are some applications of open source software in various domains?
- c) What are IP tables? How can IP tables be used to secure Linux servers? Explain how firewall rules can be created and configured using IP tables.
- d) Explain the concept of sed (stream editor) in Linux and how it can be used for text manipulation tasks.
- e) What are the key responsibilities of a system administrator in Linux? How do these responsibilities differ from those of a network administrator?

Q.3 Attempt any Two **12**

- a) What are the steps involved in installing Linux in a multiboot environment, and what considerations should be taken into account for hard disk partitioning and swap space allocation?
- b) What are some common commands for file manipulation in Linux, including piping and redirection, and how do they work?
- c) What is backup? How can backup be used to protect system data in Linux? Discuss different backup options and their pros and cons.

Section – II

Q.4 Attempt any Four **16**

- a) What is a DNS server? How can DNS servers be configured in Linux? Discuss different DNS server software options and their key features.
- b) What are the steps involved in obtaining and installing Git on your system? Are there any specific requirements or considerations?
- c) What are control structures in Bash shell scripts? How can if statements, for loops, and while loops be used to control program flow?
- d) What is script control in Bash shell programming? Explain how signals can be used to interrupt or terminate Bash shell scripts.
- e) What is the significance of checking the status of a repository using the "git status" command? How does it help in managing changes?

Q.5 Attempt any Two

- a) How can Bash shell scripts be used to interact with the web? Discuss different options for downloading web pages, parsing data from web pages, and working with URLs in Bash shell scripts.
- b) What are the different ways to remove files in Git? How does "git reset" remove staged files, and how does "git rm" remove committed files?
- c) What is the process of checking out a branch in Git? How does it switch the working directory to a different branch and what are the implications of this action?

Set **S**

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2024
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Open Source Technologies (BTN06606)

Day & Date: Friday, 31-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer book page no.3. each question carries one marks.
 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct options 14

- 1) Which task is commonly associated with the system administrator's responsibility in managing backup operations?
 - a) Updating system software
 - b) Allocating disk space
 - c) Monitoring network security
 - d) Ensuring data integrity and recovery
- 2) Which open-source software is commonly used for configuring Apache web servers?

a) MySQL	b) PHP
c) Apache Tomcat	d) Apache HTTP Server
- 3) What is the main function of a DHCP server in a network environment?
 - a) Assigning IP addresses to network devices
 - b) Transferring files between clients and servers
 - c) Hosting websites and serving web pages
 - d) Managing email communication
- 4) What is the primary purpose of executing a shell script in an open-source operating system?

a) To compile source code	b) To run system commands
c) To create user accounts	d) To configure network settings
- 5) What is the function of control structures in shell scripting?
 - a) To define functions and subroutines
 - b) To handle system signals and interrupts
 - c) To perform arithmetic operations
 - d) To control the flow of execution based on conditions
- 6) What is the main difference between distributed and non-distributed VCS?
 - a) Distributed VCS allows offline access to repositories
 - b) Non-distributed VCS supports larger file sizes
 - c) Distributed VCS is faster in handling large codebases
 - d) Non-distributed VCS provides stronger data encryption

Day & Date: Monday, 03-06-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) Which of the following is NOT a step in the machine learning workflow?

a) Data preprocessing	b) Model evaluation
c) Model deployment	d) Data visualization
- 2) What is Unsupervised learning?
 - a) Learning with a strict teacher
 - b) Learning without any guidance
 - c) Learning from labeled data
 - d) Learning from unlabeled data
- 3) What is the purpose of a confusion matrix in classification?
 - a) To confuse the model during training
 - b) To visualize the dataset
 - c) To evaluate the performance of a classification model
 - d) To create additional features
- 4) Which of the following evaluation metrics is typically used for classification problems?

a) Mean Absolute Error (MAE)	b) Root Mean Squared Error (RMSE)
c) Accuracy	d) R-squared (R^2)
- 5) In k-Nearest Neighbors (KNN) classification, what does "k" represent?
 - a) The number of features
 - b) The number of classes
 - c) The number of neighbors to consider
 - d) The number of iterations
- 6) In K-means clustering, what does "K" represent?

a) The number of features	b) The number of clusters
c) The number of data points	d) The number of iterations
- 7) The principle underlying the Market Basket Analysis is known as _____.

a) Association rule	b) Bisecting rule
c) k-means	d) Bayes' theorem

- 8) Early detection of mental disorders using machine learning and data science: diagnosing clinical depression, bipolar disorder, anxiety are applications of ML in:
- a) Image Detection
 - b) Medical Diagnosis
 - c) Learning Language
 - d) Stock Analysis
- 9) Single-layer perceptron is able to deal with _____.
- a) linearly separable data
 - b) non-linearly separable data
 - c) linearly inseparable data
 - d) none of the above
- 10) Which of the following is NOT a common type of machine learning?
- a) Supervised Learning
 - b) Unsupervised Learning
 - c) Reinforcement Learning
 - d) Deterministic Learning
- 11) What is the primary difference between binary and multiclass classification?
- a) Binary has two classes, while multiclass has more than two classes
 - b) Binary classification is unsupervised, while multiclass is supervised
 - c) Binary classification uses regression techniques
 - d) Multiclass classification uses clustering algorithms
- 12) Which of the following is an example of a regression problem?
- a) Predicting whether an email is spam or not
 - b) Identifying the objects in an image
 - c) Predicting the price of a house based on its features
 - d) Grouping customers into different segments
- 13) Which of the following will be Euclidean distance between the two data points A(4,3) and B(2,3)?
- a) 1
 - b) 2
 - c) 4
 - d) 8
- 14) What is a feedforward neural network?
- a) A network where information travels in both directions
 - b) A network with multiple hidden layers
 - c) A network where information flows in one direction, from input to output
 - d) A network with recurrent connections

Set **P**

T.Y. (B.Tech.) (Sem - II) (New)(CBCS) Examination: March/April – 2024
ELECTRONICS AND TELECOMMUNICATION ENGINEERING
AI/MI -Machine Learning (BTN06612)

Day & Date: Monday, 03-06-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
 2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any four.

16

- a) What are the characteristics that distinguish machine learning tasks from traditional programming tasks?
- b) What is significance of K in KNN Classifier? You are using the K-NN algorithm to classify a new data point in a dataset with 'k' set to 3. The three nearest neighbors to the new data point are as follows, along with their class labels:
 Neighbor 1: Class A
 Neighbor 2: Class B
 Neighbor 3: Class A
 Calculate the predicted class for the new data point using majority voting.
- c) Define Confidence, Support parameters and calculate the same for following associations
 Milk =>Bread
 {Bread, Cheese}=>Juice

Transaction ID	Items Purchased
1	Bread, Cheese, Egg, Juice
2	Bread, Cheese, Juice
3	Bread, Milk, Yogurt
4	Bread, Juice, Milk
5	Cheese, Juice, Milk

- d) What are steps in developing Machine Learning Model?
- e) You have the following dataset representing the number of hours (in hours) that a group of students spent studying for an exam:8,10,12,7,9
 Calculate the following statistical parameters:
 Mean (Average):9.2
 Median:9
 Range: 5
 Standard Deviation 1.72
- f) What is the difference between feature construction and feature extraction, providing examples of scenarios where each would be more advantageous.

Q.3 Solve any two.

- a) Suppose you are working on a medical diagnosis task, where you have developed a binary classification model to detect the presence or absence of a certain disease based on patient data. The disease is rare, affecting only 2% of the population. You have evaluated your model and obtained the following confusion matrix:

		Actual	
		Positive	Negative
Predicted	Positive	80	10
	Negative	5	905

Calculate the following performance metrics for your model:

Accuracy

Precision

Recall

F1-score

Provide interpretations for each metric's value in the context of this medical diagnosis task

- b) In a machine learning project, the developed ML model predicts the price of houses based on various features such as square footage, number of bedrooms, and neighborhood. Your dataset contains 500 samples, and you want to evaluate your model's performance using cross-validation. Explain briefly what cross-validation is and why it is important in machine learning.
You decide to use k-fold cross-validation with $k = 5$. Describe the process of performing k-fold cross-validation on your dataset, including the steps involved and how the dataset is divided.
What are the benefits of using k-fold cross-validation over a simple train-test split?
- c) With the help of suitable block diagram discuss how Reinforcement learning can be used for developing ML Model.

Section – II**Q.4 Solve any four.**

16

- a) Draw the simple structure of McCulloch Pitts Neuron Model (MP Neuron)?
- b) Discuss the steps followed in Backpropagation algorithm.
- c) What are different activation functions in ANN?
- d) Discuss the characteristics of following clustering techniques.
 - Partitioning methods
 - Hierarchical methods
 - Density-based methods
- e) Discuss the steps followed in K means clustering. How to decide value of K?
- f) Compare between Supervised and Unsupervised machine learning with reference to following points
 - i) Definition
 - ii) Training Data
 - iii) Evaluation
 - iv) Examples

Q.5 Solve any two

- a) Describe the key features and functionalities of an effective email spam filter. Include a discussion on how machine learning algorithms can be employed to enhance the accuracy of spam detection.
- b) Why AND, OR Gate problems are called Linearly separable and XOR is called as linearly inseparable problem for its Neural Network implementation? Which logic gate is represented by the following Neural Network Design.

- c) Discuss apriori algorithm and explain how it can be used for association rule learning.

 - Hierarchical methods
 - Density-based methods
- e) Discuss the steps followed in K means clustering. How to decide value of K?
- f) Compare between Supervised and Unsupervised machine learning with reference to following points
 - i) Definition
 - ii) Training Data
 - iii) Evaluation
 - iv) Examples

Q.5 Solve any two

- a) Describe the key features and functionalities of an effective email spam filter. Include a discussion on how machine learning algorithms can be employed to enhance the accuracy of spam detection.
- b) Why AND, OR Gate problems are called Linearly separable and XOR is called as linearly inseparable problem for its Neural Network implementation? Which logic gate is represented by the following Neural Network Design.

- c) Discuss apriori algorithm and explain how it can be used for association rule learning.

T.Y. (B.Tech.) (Sem - II) (New)(CBCS) Examination: March/April – 2024
ELECTRONICS AND TELECOMMUNICATION ENGINEERING
AI/ML -Machine Learning (BTN06612)

Day & Date: Monday, 03-06-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the given options. 14

- 1) In K-means clustering, what does "K" represent?
 - a) The number of features
 - b) The number of clusters
 - c) The number of data points
 - d) The number of iterations
- 2) The principle underlying the Market Basket Analysis is known as _____.
 - a) Association rule
 - b) Bisecting rule
 - c) k-means
 - d) Bayes' theorem
- 3) Early detection of mental disorders using machine learning and data science: diagnosing clinical depression, bipolar disorder, anxiety are applications of ML in:
 - a) Image Detection
 - b) Medical Diagnosis
 - c) Learning Language
 - d) Stock Analysis
- 4) Single-layer perceptron is able to deal with _____.
 - a) linearly separable data
 - b) non-linearly separable data
 - c) linearly inseparable data
 - d) none of the above
- 5) Which of the following is NOT a common type of machine learning?
 - a) Supervised Learning
 - b) Unsupervised Learning
 - c) Reinforcement Learning
 - d) Deterministic Learning
- 6) What is the primary difference between binary and multiclass classification?
 - a) Binary has two classes, while multiclass has more than two classes
 - b) Binary classification is unsupervised, while multiclass is supervised
 - c) Binary classification uses regression techniques
 - d) Multiclass classification uses clustering algorithms
- 7) Which of the following is an example of a regression problem?
 - a) Predicting whether an email is spam or not
 - b) Identifying the objects in an image
 - c) Predicting the price of a house based on its features
 - d) Grouping customers into different segments
- 8) Which of the following will be Euclidean distance between the two data points A(4,3) and B(2,3)?
 - a) 1
 - b) 2
 - c) 4
 - d) 8

- 9) What is a feedforward neural network?
- a) A network where information travels in both directions
 - b) A network with multiple hidden layers
 - c) A network where information flows in one direction, from input to output
 - d) A network with recurrent connections
- 10) Which of the following is NOT a step in the machine learning workflow?
- a) Data preprocessing
 - b) Model evaluation
 - c) Model deployment
 - d) Data visualization
- 11) What is Unsupervised learning?
- a) Learning with a strict teacher
 - b) Learning without any guidance
 - c) Learning from labeled data
 - d) Learning from unlabeled data
- 12) What is the purpose of a confusion matrix in classification?
- a) To confuse the model during training
 - b) To visualize the dataset
 - c) To evaluate the performance of a classification model
 - d) To create additional features
- 13) Which of the following evaluation metrics is typically used for classification problems?
- a) Mean Absolute Error (MAE)
 - b) Root Mean Squared Error (RMSE)
 - c) Accuracy
 - d) R-squared (R^2)
- 14) In k-Nearest Neighbors (KNN) classification, what does "k" represent?
- a) The number of features
 - b) The number of classes
 - c) The number of neighbors to consider
 - d) The number of iterations

Set **S**

T.Y. (B.Tech.) (Sem - II) (New)(CBCS) Examination: March/April – 2024
ELECTRONICS AND TELECOMMUNICATION ENGINEERING
AI/MI -Machine Learning (BTN06612)

Day & Date: Monday, 03-06-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
 2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any four.

16

- a) What are the characteristics that distinguish machine learning tasks from traditional programming tasks?
- b) What is significance of K in KNN Classifier? You are using the K-NN algorithm to classify a new data point in a dataset with 'k' set to 3. The three nearest neighbors to the new data point are as follows, along with their class labels:
 Neighbor 1: Class A
 Neighbor 2: Class B
 Neighbor 3: Class A
 Calculate the predicted class for the new data point using majority voting.
- c) Define Confidence, Support parameters and calculate the same for following associations
 Milk =>Bread
 {Bread, Cheese}=>Juice

Transaction ID	Items Purchased
1	Bread, Cheese, Egg, Juice
2	Bread, Cheese, Juice
3	Bread, Milk, Yogurt
4	Bread, Juice, Milk
5	Cheese, Juice, Milk

- d) What are steps in developing Machine Learning Model?
- e) You have the following dataset representing the number of hours (in hours) that a group of students spent studying for an exam:8,10,12,7,9
 Calculate the following statistical parameters:
 Mean (Average):9.2
 Median:9
 Range: 5
 Standard Deviation 1.72
- f) What is the difference between feature construction and feature extraction, providing examples of scenarios where each would be more advantageous.

Q.3 Solve any two.

- a) Suppose you are working on a medical diagnosis task, where you have developed a binary classification model to detect the presence or absence of a certain disease based on patient data. The disease is rare, affecting only 2% of the population. You have evaluated your model and obtained the following confusion matrix:

		Actual	
		Positive	Negative
Predicted	Positive	80	10
	Negative	5	905

Calculate the following performance metrics for your model:

Accuracy

Precision

Recall

F1-score

Provide interpretations for each metric's value in the context of this medical diagnosis task

- b) In a machine learning project, the developed ML model predicts the price of houses based on various features such as square footage, number of bedrooms, and neighborhood. Your dataset contains 500 samples, and you want to evaluate your model's performance using cross-validation.

Explain briefly what cross-validation is and why it is important in machine learning.

You decide to use k-fold cross-validation with $k = 5$. Describe the process of performing k-fold cross-validation on your dataset, including the steps involved and how the dataset is divided.

What are the benefits of using k-fold cross-validation over a simple train-test split?

- c) With the help of suitable block diagram discuss how Reinforcement learning can be used for developing ML Model.

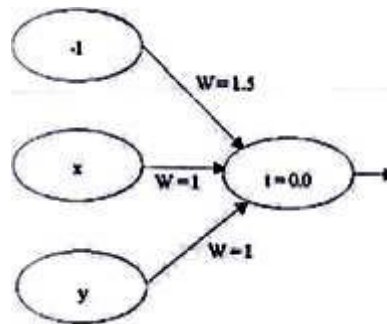

Section – II**Q.4 Solve any four.**

16

- a) Draw the simple structure of McCulloch Pitts Neuron Model (MP Neuron)?
- b) Discuss the steps followed in Backpropagation algorithm.
- c) What are different activation functions in ANN?
- d) Discuss the characteristics of following clustering techniques.
- Partitioning methods
 - Hierarchical methods
 - Density-based methods
- e) Discuss the steps followed in K means clustering. How to decide value of K?
- f) Compare between Supervised and Unsupervised machine learning with reference to following points
- i) Definition
 - ii) Training Data
 - iii) Evaluation
 - iv) Examples

Q.5 Solve any two

- a) Describe the key features and functionalities of an effective email spam filter. Include a discussion on how machine learning algorithms can be employed to enhance the accuracy of spam detection.
- b) Why AND, OR Gate problems are called Linearly separable and XOR is called as linearly inseparable problem for its Neural Network implementation? Which logic gate is represented by the following Neural Network Design.

- c) Discuss apriori algorithm and explain how it can be used for association rule learning.

 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct options.

14

- 1) What is the first step to create a new AWS account?
 - a) Choose a billing plan
 - b) Provide payment information
 - c) Verify email address
 - d) Set up multi-factor authentication
- 2) Which AWS account type has full administrative access and control over all AWS resources?
 - a) Root user
 - b) Non-root user
 - c) IAM user
 - d) Service account
- 3) Which term is used to describe the practice of running multiple virtual machines on a single physical server?
 - a) Elasticity
 - b) Scalability
 - c) Virtualization
 - d) Agility
- 4) Which component of IAM defines what actions are allowed or denied on AWS resources?
 - a) Users
 - b) Roles
 - c) Policies
 - d) Groups
- 5) Which of the following is NOT an IAM best practice in AWS?
 - a) Regularly reviewing and rotating access keys
 - b) Using AWS root user for everyday tasks
 - c) Granting least privilege to IAM users
 - d) Enforcing strong password policies
- 6) What is ClassicLink in AWS VPC?
 - a) A service for linking multiple VPCs together
 - b) A legacy networking feature for EC2-Classic instances
 - c) A load balancing solution for VPC instances
 - d) A network traffic monitoring tool for VPCs
- 7) Which of the following is a VPC best practice in AWS?
 - a) Allowing unrestricted inbound and outbound traffic
 - b) Using default VPC settings without modification
 - c) Assigning public IP addresses to all VPC instances
 - d) Implementing network access control through security groups

- 8) What is an EC2 best practice for improving security?
- a) Disabling network encryption
 - b) Sharing key pairs between multiple instances
 - c) Assigning public IP addresses to all instances
 - d) Restricting inbound traffic using security groups
- 9) Which of the following is a benefit of using EC2 Auto Scaling?
- a) Ensuring high availability and fault tolerance
 - b) Reducing data transfer costs
 - c) Enabling direct database access
 - d) Streamlining instance purchasing process
- 10) How can you optimize costs when using EC2 instances?
- a) Running instances continuously without stopping
 - b) Choosing the largest instance size available
 - c) Using spot instances for non-critical workloads
 - d) Keeping all instances in the same availability zone
- 11) Which AWS service provides automated response actions based on Cloud Watch alarms?
- a) AWS Lambda
 - b) AWS Glue
 - c) AWS Step Functions
 - d) AWS Batch
- 12) What is the purpose of Cloud Watch logs in AWS?
- a) Storing and monitoring system, application, and custom log files
 - b) Generating real-time notifications for critical events
 - c) Collecting and analyzing network traffic data
 - d) Managing access control for AWS resources
- 13) What are the storage classes available in Amazon S3?
- a) Standard, Archive, and Cold
 - b) Standard, Glacier, and EBS
 - c) Standard, Infrequent Access, and Deep Archive
 - d) Standard, Intelligent-Tiering, and Glacier Deep Archive
- 14) How does Amazon S3 Glacier compare to other S3 storage classes?
- a) Glacier offers immediate data access with high availability
 - b) Glacier has the lowest storage cost among all storage classes
 - c) Glacier is designed for frequently accessed data
 - d) Glacier has the shortest data retrieval time

Day & Date: Monday, 03-06-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any Three. 12

- Explain the basic concepts of AWS and its key services.
- What is virtualization and how does it work in AWS? How is it related to elasticity and scalability?
- What is the AWS root user? Why is it important to understand the root user account?
- What is Virtual Private Cloud (VPC)? How is VPC used in AWS to create isolated virtual networks?

Q.3 Answer the following question. 16

- Explain the key components of AWS VPC, including subnets, IP addressing, and routing tables. Describe how these components work together to create a custom network topology within VPC.
- What are the different networking components of VPC? Explain the role of VPC endpoints, NAT gateways, and VPN connections in VPC networking.

Section – II

Q.4 Attempt any Three. 12

- What is an Amazon Machine Image (AMI) in the context of EC2?
- What is Elastic Block Store (EBS) and why is it important in EC2?
- How can CloudWatch alarms be used to trigger actions based on certain threshold conditions?
- What are objects in S3 and what are the key components of an object?

Q.5 Answer the following question. 16

- What are the different storage classes available in S3 and how do they differ in terms of durability, availability, and cost?
- How does lifecycle management in S3 allow for the automatic transition of objects between different storage classes or deletion based on predefined rules?

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April - 2024
ELECTRONICS & TELECOMMUNICATION ENGINEERING
IoT Cloud Platform (BTN06614)

Day & Date: Monday, 03-06-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any Three. 12

- Explain the basic concepts of AWS and its key services.
- What is virtualization and how does it work in AWS? How is it related to elasticity and scalability?
- What is the AWS root user? Why is it important to understand the root user account?
- What is Virtual Private Cloud (VPC)? How is VPC used in AWS to create isolated virtual networks?

Q.3 Answer the following question. 16

- Explain the key components of AWS VPC, including subnets, IP addressing, and routing tables. Describe how these components work together to create a custom network topology within VPC.
- What are the different networking components of VPC? Explain the role of VPC endpoints, NAT gateways, and VPN connections in VPC networking.

Section – II

Q.4 Attempt any Three. 12

- What is an Amazon Machine Image (AMI) in the context of EC2?
- What is Elastic Block Store (EBS) and why is it important in EC2?
- How can CloudWatch alarms be used to trigger actions based on certain threshold conditions?
- What are objects in S3 and what are the key components of an object?

Q.5 Answer the following question. 16

- What are the different storage classes available in S3 and how do they differ in terms of durability, availability, and cost?
- How does lifecycle management in S3 allow for the automatic transition of objects between different storage classes or deletion based on predefined rules?

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April - 2024
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Applications of IT and Control Engineering in Railway (BTN06615)

Day & Date: Monday, 03-06-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options. 14

- 1) India's first passenger train from Bori Bunder (Mumbai) to Thane was run on which of the following gauge?

a) Meter gauge	b) Standard gauge
c) Broad gauge	d) Narrow gauge
- 2) Which of the following rail has been standardized for adoption on the Indian railways?

a) Combination of BH and DH	b) Flat footed
c) Double headed	d) Bull headed
- 3) Why the railway track is made resilient and elastic?

a) Easy fixing	b) It can be adjusted easily
c) So that it absorbs shocks	d) To make it economic
- 4) Which of the following is also known as another name of inner rail?

a) Gradient rail	b) Cant rail
c) Fixed rail	d) Slope rail
- 5) Which of the following is the most important strategic reason for the construction of a new railway line?

a) For creating jobs	b) Because of absence of a railway line
c) To increase tourists	d) To make movement of defense forces easier in case of emergency
- 6) Which of the following is not a cotter used on Indian Railways?

a) Empty end split cotter	b) Solid end split cotter
c) Centre split cotter	d) Side split cotter
- 7) Which among the following is used between rails and sleepers to absorb shocks, resist lateral movement of rails and provide electrical insulation between rails?

a) Spring steel clips	b) CI anti creep bearing plate
c) Rubber pads	d) Spring steel loose jaw

- 8) What is an elastic fastening called which is easy to fit in but difficult to remove?
- a) Pilfer proof elastic fastening b) Proof elastic fastening
c) Circlip proof elastic fastening d) Pandrol clip elastic fastening
- 9) What is Control System?
- a) Control system is a system in which the output is controlled by varying the input
b) Control system is a device that will not manage or regulate the behaviour of other devices using control loops
c) Control system is a feedback system that can be both positive and negative
d) Control System is a system in which the input is controlled by varying the output
- 10) Which of the following is not the feature of a modern control system?
- a) Correct power level b) No oscillation
c) Quick response d) Accuracy
- 11) Which of the following element is not used in an automatic control system?
- a) Final control element b) Sensor
c) Oscillator d) Error detector
- 12) What should be the nature of bandwidth for a good control system?
- a) Small b) Medium
c) Large d) All of the mentioned
- 13) In a stable control system backlash can cause which of the following?
- a) Overdamping
b) Low-level oscillations
c) Underdamping
d) Poor stability at reduced values of open loop gain
- 14) The input signals to control systems are not known fully ahead of time, the characteristics of control system which suddenly strain a control system are:
- a) Constant velocity and acceleration
b) Sudden shock
c) Sudden change
d) All of the mentioned

T.Y. (B.Tech.) (Sem - II) (New)(CBCS) Examination: March/April - 2024
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Applications of IT and Control Engineering in Railway (BTN06615)

Day & Date: Monday, 03-06-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

- Q.2 Attempt any Four. 16**
- a) What is Public Address System? Explain.
 - b) What is typical arrangement of PRS Terminals?
 - c) Write a short note on Unreserved Ticketing System (UTS).
 - d) What is mean by freight operations? Explain.
 - e) Which Network topologies used in FOIS? Give Details.
- Q.3 Attempt any Two. 12**
- a) Explain RMS and TMS.
 - b) Give Application of Information Technology in Railways.
 - c) Explain classification of railway bridges.

Section – II

- Q.4 Attempt any Four. 16**
- a) Write a short note on Auxiliary Warning System.
 - b) Explain different networking devices.
 - c) Give Any four rules of block diagram reduction.
 - d) Give the transfer function of a closed-loop system with proper equation.
 - e) Write note on TELNET (Terminal Network).
- Q.5 Attempt any Two. 12**
- a) What is mean by data logger? Explain.
 - b) What is mean by control system? Give its types.
 - c) Explain Robotic control system.

 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct options.**14**

- 1) Who is the father of Machine Learning?
 - a) Geoffrey Everest Hinton
 - b) Geoffrey Hill
 - c) Geoffrey Chaucer
 - d) None of the above
- 2) Which is FALSE regarding regression?
 - a) It may be used for interpretation
 - b) It is used for prediction
 - c) It discovers causal relationships
 - d) It relates inputs to outputs
- 3) Reinforcement learning is _____.
 - a) Supervised Learning
 - b) Unsupervised Learning
 - c) Award-Based Learning
 - d) None of above
- 4) Which ONE of the following are regression tasks?
 - a) Predict the age of a person
 - b) Predict the country from where the person comes from
 - c) Predict whether the price of petroleum will increase tomorrow
 - d) Predict whether a document is related to science
- 5) What is over fitting?
 - a) Poor result in Training and poor result in test
 - b) Great result in Training and poor result in test
 - c) Great result in Training and Great result in test
 - d) Poor result in Training and Great result in test
- 6) Which one of the following statements is TRUE for a Decision Tree?
 - a) Decision tree is only suitable for the classification problem statement
 - b) In a decision tree, the entropy of a node decreases as we go down a decision tree
 - c) In a decision tree, entropy determines purity
 - d) Decision tree can only be used for only numeric valued and continuous attributes
- 7) Which of the following is the centroid-based clustering method?
 - a) K-means clustering
 - b) DBSCAN clustering
 - c) Hierarchical clustering
 - d) KNN Algorithm

- 8) Which of the following statement is TRUE about the Association rule method?
- a) It determines how strongly or how weakly two objects are connected
 - b) It determines the relation between two objects
 - c) Relation between particular objects
 - d) Relation between frequent item set
- 9) The most widely used metrics and tools to access a classification model are ____.
- a) Confusion Matrix
 - b) Cost Sensitive accuracy
 - c) Area under the ROC curve
 - d) All of the above
- 10) What is back propagation?
- a) It is another name given to the curvy function in the Perceptron
 - b) It is the transmission of error back through the network to allow weights to be adjusted so that the network can learn
 - c) It is another name given to the curvy function in the Perceptron
 - d) None of the above
- 11) What is Perceptron?
- a) A single layer feed-forward neural network with pre-processing
 - b) A neural network that contains feedback
 - c) A double layer auto-associative neural network
 - d) An auto-associative neural network
- 12) Applications of NN (Neural Network).
- a) Risk management
 - b) Data validation
 - c) Sales forecasting
 - d) All of the above
- 13) When performing regression or classification which of the following is the correct way to preprocess the data?
- a) Normalize the data ---PCA---Training
 - b) PCA---Normalize PCA output---Training
 - c) Normalize the data---PCA---Normalize PCA output---Training
 - d) None of the above
- 14) Bayes rule can be used for: _____.
- a) Solving queries
 - b) Increasing complexity
 - c) Answering probabilistic query
 - d) Decreasing complexity

 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct options. 14

- 1) Which of the following statement is TRUE about the Association rule method?
 - a) It determines how strongly or how weakly two objects are connected
 - b) It determines the relation between two objects
 - c) Relation between particular objects
 - d) Relation between frequent item set
- 2) The most widely used metrics and tools to access a classification model are _____.
 - a) Confusion Matrix
 - b) Cost Sensitive accuracy
 - c) Area under the ROC curve
 - d) All of the above
- 3) What is back propagation?
 - a) It is another name given to the curvy function in the Perceptron
 - b) It is the transmission of error back through the network to allow weights to be adjusted so that the network can learn
 - c) It is another name given to the curvy function in the Perceptron
 - d) None of the above
- 4) What is Perceptron?
 - a) A single layer feed-forward neural network with pre-processing
 - b) A neural network that contains feedback
 - c) A double layer auto-associative neural network
 - d) An auto-associative neural network
- 5) Applications of NN (Neural Network).
 - a) Risk management
 - b) Data validation
 - c) Sales forecasting
 - d) All of the above
- 6) When performing regression or classification which of the following is the correct way to preprocess the data?
 - a) Normalize the data ---PCA---Training
 - b) PCA---Normalize PCA output---Training
 - c) Normalize the data---PCA---Normalize PCA output---Training
 - d) None of the above
- 7) Bayes rule can be used for: _____.
 - a) Solving queries
 - b) Increasing complexity
 - c) Answering probabilistic query
 - d) Decreasing complexity

- 8) Who is the father of Machine Learning?
a) Geoffrey Everest Hinton b) Geoffrey Hill
c) Geoffrey Chaucer d) None of the above
- 9) Which is FALSE regarding regression?
a) It may be used for interpretation b) It is used for prediction
c) It discovers causal relationships d) It relates inputs to outputs
- 10) Reinforcement learning is _____.
a) Supervised Learning b) Unsupervised Learning
c) Award-Based Learning d) None of above
- 11) Which ONE of the following are regression tasks?
a) Predict the age of a person
b) Predict the country from where the person comes from
c) Predict whether the price of petroleum will increase tomorrow
d) Predict whether a document is related to science
- 12) What is over fitting?
a) Poor result in Training and poor result in test
b) Great result in Training and poor result in test
c) Great result in Training and Great result in test
d) Poor result in Training and Great result in test
- 13) Which one of the following statements is TRUE for a Decision Tree?
a) Decision tree is only suitable for the classification problem statement
b) In a decision tree, the entropy of a node decreases as we go down a decision tree
c) In a decision tree, entropy determines purity
d) Decision tree can only be used for only numeric valued and continuous attributes
- 14) Which of the following is the centroid-based clustering method?
a) K-means clustering b) DBSCAN clustering
c) Hierarchical clustering d) KNN Algorithm

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April – 2024
ELECTRONICS AND TELECOMMUNICATION ENGINEERING
Data Science Machine Learning (BTN06613)

Day & Date: Monday, 03-06-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicates full marks.

Section – I

Q.2 Solve any Four: **16**

- a) What is Machine Learning? Explain with two Examples.
- b) Explain the K-Nearest Neighbor Algorithm with example?
- c) What is Feature? Explain the Feature Extraction technique of ML?
- d) Explain the Different Characteristics of Machine Learning Task?
- e) Explain the Assessing Performance of Regression.

Q.3 Attempt any Two. **12**

- a) What are all the databases we are using in ML?
- b) What is Reinforcement Learning? Explain with Examples.
- c) What is Over-fitting and under-fitting? Explain with examples.

Section – II

Q.4 Attempt any Four. **16**

- a) What are Neural network Elements? Explain Basic Perceptron?
- b) List the difference between Supervised and Unsupervised Machine learning?
- c) Write a note on Deep learning.
- d) Write a note on DBSCAN.
- e) Explain Hierarchical Clustering Technique of ML.

Q.5 Attempt any Two. **12**

- a) Explain Back-propagation algorithm of ANN.
- b) Explain Virtual Personal Assistant.
- c) What is the Association rule in ML? Explain with an example.

Seat No.	
----------	--

Set **R**

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April – 2024
ELECTRONICS AND TELECOMMUNICATION ENGINEERING
Data Science Machine Learning (BTN06613)

Day & Date: Monday, 03-06-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct options.**14**

- 1) What is Perceptron?
 - a) A single layer feed-forward neural network with pre-processing
 - b) A neural network that contains feedback
 - c) A double layer auto-associative neural network
 - d) An auto-associative neural network
- 2) Applications of NN (Neural Network).

a) Risk management	b) Data validation
c) Sales forecasting	d) All of the above
- 3) When performing regression or classification which of the following is the correct way to preprocess the data?
 - a) Normalize the data ---PCA---Training
 - b) PCA---Normalize PCA output---Training
 - c) Normalize the data---PCA---Normalize PCA output---Training
 - d) None of the above
- 4) Bayes rule can be used for: _____.

a) Solving queries	b) Increasing complexity
c) Answering probabilistic query	d) Decreasing complexity
- 5) Who is the father of Machine Learning?

a) Geoffrey Everest Hinton	b) Geoffrey Hill
c) Geoffrey Chaucer	d) None of the above
- 6) Which is FALSE regarding regression?

a) It may be used for interpretation	b) It is used for prediction
c) It discovers causal relationships	d) It relates inputs to outputs
- 7) Reinforcement learning is _____.

a) Supervised Learning	b) Unsupervised Learning
c) Award-Based Learning	d) None of above

- 8) Which ONE of the following are regression tasks?
- a) Predict the age of a person
 - b) Predict the country from where the person comes from
 - c) Predict whether the price of petroleum will increase tomorrow
 - d) Predict whether a document is related to science
- 9) What is over fitting?
- a) Poor result in Training and poor result in test
 - b) Great result in Training and poor result in test
 - c) Great result in Training and Great result in test
 - d) Poor result in Training and Great result in test
- 10) Which one of the following statements is TRUE for a Decision Tree?
- a) Decision tree is only suitable for the classification problem statement
 - b) In a decision tree, the entropy of a node decreases as we go down a decision tree
 - c) In a decision tree, entropy determines purity
 - d) Decision tree can only be used for only numeric valued and continuous attributes
- 11) Which of the following is the centroid-based clustering method?
- a) K-means clustering
 - b) DBSCAN clustering
 - c) Hierarchical clustering
 - d) KNN Algorithm
- 12) Which of the following statement is TRUE about the Association rule method?
- a) It determines how strongly or how weakly two objects are connected
 - b) It determines the relation between two objects
 - c) Relation between particular objects
 - d) Relation between frequent item set
- 13) The most widely used metrics and tools to access a classification model are ____.
- a) Confusion Matrix
 - b) Cost Sensitive accuracy
 - c) Area under the ROC curve
 - d) All of the above
- 14) What is back propagation?
- a) It is another name given to the curvy function in the Perceptron
 - b) It is the transmission of error back through the network to allow weights to be adjusted so that the network can learn
 - c) It is another name given to the curvy function in the Perceptron
 - d) None of the above

- 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book page no 03 (Starting page of the Answer Book). Each question carries one mark.
 - 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 - 3) Figures to the right indicates full marks.
 - 4) Assume data wherever necessary.
 - 5) Use of non-programmable calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) TE mode is characterized by: _____.
 - a) $E_z = 0$
 - b) $H_z = 0$
 - c) $E_x = 0$
 - d) $E_y = 0$
- 2) For any mode of propagation in a rectangular waveguide, propagation occurs: _____.
 - a) Above the cut off frequency
 - b) Below the cut off frequency
 - c) Only at the cut-off frequency
 - d) Depends on the dimension of the waveguide
- 3) Dominant mode is defined as: _____.
 - a) Mode with the lowest cut off frequency
 - b) Mode with the highest cut off frequency
 - c) Any TEM mode is called a dominant mode
 - d) None of the mentioned
- 4) In TE₁₀ mode of wave propagation in a rectangular waveguide, if the broader dimension of the waveguide is 40 cm, then the cutoff wavelength for that mode is: _____.
 - a) 8 cm
 - b) 6 cm
 - c) 4 cm
 - d) 2 cm
- 5) Which mode of propagation is supported by a strip line?
 - a) TEM mode
 - b) TM mode
 - c) TE mode
 - d) None of the mentioned
- 6) A waveguide acts as a _____.
 - a) Low pass filter
 - b) Band pass filter
 - c) High pass filter
 - d) All of the above
- 7) If the reflection coefficient of a 2 port network is 0.5 then the return loss in the network is: _____.
 - a) 6.5 dB
 - b) 0.15 dB
 - c) 6.020 dB
 - d) 10 dB

- 8) The voltage equation for a 2 port network that can be represented as a matrix is: _____.
- a) $V_1=AV_2 + BI_2$ b) $V_1=CV_2 + DI_2$
c) $V_1=BV_2 + AI_2$ d) $V_1=DV_2 + CI_2$
- 9) The klystron tube used in a klystron amplifier is a _____ type beam amplifier.
- a) Linear beam b) Crossed field
c) Parallel field d) None of the mentioned
- 10) A major disadvantage of klystron amplifier is: _____.
- a) Low power gain b) Low bandwidth
c) High source power d) Design complexity
- 11) The resistance of the PIN diode with positive bias voltage: _____.
- a) Increase b) Decreases
c) Remains constant d) Insufficient data
- 12) When the applied electric field exceeds the threshold value, electrons absorb more energy from the field and become: _____.
- a) hot electrons b) cold electrons
c) emission electrons d) none of the mentioned
- 13) When a reverse bias voltage exceeding the breakdown voltage is applied to an IMPATT diode, it results in: _____.
- a) avalanche multiplication
b) break down of depletion region
c) high reverse saturation current
d) none of the mentioned
- 14) The electrodes of a Gunn diode are made of: _____.
- a) molybdenum b) GaAs
c) gold d) copper

Set P

**Fourth Y. (B.Tech.) (Sem-II) (New) (CBCS) Examination: March/April-2024
ELECTRONIC AND TELECOMMUNICATION ENGINEERING
Microwave Engineering (BTN06701)**

Day & Date: Wednesday, 15-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume data wherever necessary.

Section – I

Q.2 Attempt any four. 16

- What is the frequency ranges of microwave L-band, X-band and Ku-band? Write one application for each of the above bands for microwave communication.
- Explain the construction and operation of Magic Tee.
- Define coupling factor, directivity and isolation parameters of directional coupler.
- Explain the construction and operation of isolator.
- Write the properties of s-matrix.

Q.3 Attempt any Two 12

- Derive the field expressions for a rectangular waveguide for TE modes of propagation.
- Derive S matrix for H plane tee. Justify the statement “H plane tee acts as a 3 dB splitter”.
- Explain the construction and operation of Gyrator.

Section – II

Q.4 Attempt any four. 16

- What are limitations of conventional tubes at microwave frequencies?
- Explain working of two cavity Klystron with help of Applegate diagram.
- Explain Varactor diode. Discuss its constructional details.
- Write a short note on Schottky barrier diode.
- Explain the steps for frequency measurements

Q.5 Attempt any two 12

- Explain the construction and working of Magnetron.
- What is Avalanche transit time device? Explain the principal of operation of TRAPATT diode.
- Draw and explain any two techniques for measurement of VSWR.

Seat No.

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.
 4) Assume data wherever necessary.
 5) Use of non-programmable calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) The voltage equation for a 2 port network that can be represented as a matrix is: _____.

a) $V_1=AV_2 + Bl_2$	b) $V_1=CV_2 + Dl_2$
c) $V_1=BV_2 + Al_2$	d) $V_1=DV_2 + Cl_2$
- 2) The klystron tube used in a klystron amplifier is a _____ type beam amplifier.

a) Linear beam	b) Crossed field
c) Parallel field	d) None of the mentioned
- 3) A major disadvantage of klystron amplifier is: _____.

a) Low power gain	b) Low bandwidth
c) High source power	d) Design complexity
- 4) The resistance of the PIN diode with positive bias voltage: _____.

a) Increase	b) Decreases
c) Remains constant	d) Insufficient data
- 5) When the applied electric field exceeds the threshold value, electrons absorb more energy from the field and become: _____.

a) hot electrons	b) cold electrons
c) emission electrons	d) none of the mentioned
- 6) When a reverse bias voltage exceeding the breakdown voltage is applied to an IMPATT diode, it results in: _____.

a) avalanche multiplication	
b) break down of depletion region	
c) high reverse saturation current

ELECTRONIC AND TELECOMMUNICATION ENGINEERING
Microwave Engineering (BTN06701)

Day & Date: Wednesday, 15-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.
 4) Assume data wherever necessary.
 5) Use of non-programmable calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) A waveguide acts as a _____.
 a) Low pass filter b) Band pass filter
 c) High pass filter d) All of the above
- 2) If the reflection coefficient of a 2 port network is 0.5 then the return loss in the network is: _____.
 a) 6.5 dB b) 0.15 dB
 c) 6.020 dB d) 10 dB
- 3) The voltage equation for a 2 port network that can be represented as a matrix is: _____.
 a) $V_1=AV_2 + BI_2$ b) $V_1=CV_2 + DI_2$
 c) $V_1=BV_2 + AI_2$ d) $V_1=DV_2 + CI_2$
- 4) The klystron tube used in a klystron amplifier is a _____ type beam amplifier.
 a) Linear beam b) Crossed field
 c) Parallel field d) None of the mentioned
- 5) A major disadvantage of klystron amplifier is: _____.
 a) Low power gain b) Low bandwidth
 c) High source power d) Design complexity
- 6) The resistance of the PIN diode with positive bias voltage: _____.
 a) Increase b) Decreases
 c) Remains constant d) Insufficient data
- 7) When the applied electric field exceeds the threshold value, electrons absorb more energy from the field and become: _____.
 a) hot electrons b) cold electrons
 c) emission electrons d) none of the mentioned

- 8) When a reverse bias voltage exceeding the breakdown voltage is applied to an IMPATT diode, it results in: _____.
- avalanche multiplication
 - break down of depletion region
 - high reverse saturation current
 - none of the mentioned
- 9) The electrodes of a Gunn diode are made of: _____.
- molybdenum
 - GaAs
 - gold
 - copper
- 10) TE mode is characterized by: _____.
- $E_z = 0$
 - $H_z = 0$
 - $E_x = 0$
 - $E_y = 0$
- 11) For any mode of propagation in a rectangular waveguide, propagation occurs: _____.
- Above the cut off frequency
 - Below the cut off frequency
 - Only at the cut-off frequency
 - Depends on the dimension of the waveguide
- 12) Dominant mode is defined as: _____.
- Mode with the lowest cut off frequency
 - Mode with the highest cut off frequency
 - Any TEM mode is called a dominant mode
 - None of the mentioned
- 13) In TE₁₀ mode of wave propagation in a rectangular waveguide, if the broader dimension of the waveguide is 40 cm, then the cutoff wavelength for that mode is: _____.
- 8 cm
 - 6 cm
 - 4 cm
 - 2 cm
- 14) Which mode of propagation is supported by a strip line?
- TEM mode
 - TM mode
 - TE mode
 - None of the mentioned

Seat No.

Set S

**Fourth Y. (B.Tech.) (Sem-II) (New) (CBCS) Examination: March/April-2024
ELECTRONIC AND TELECOMMUNICATION ENGINEERING
Microwave Engineering (BTN06701)**

Day & Date: Wednesday, 15-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume data wherever necessary.

Section – I

Q.2 Attempt any four. 16

- What is the frequency ranges of microwave L-band, X-band and Ku-band? Write one application for each of the above bands for microwave communication.
- Explain the construction and operation of Magic Tee.
- Define coupling factor, directivity and isolation parameters of directional coupler.
- Explain the construction and operation of isolator.
- Write the properties of s-matrix.

Q.3 Attempt any Two 12

- Derive the field expressions for a rectangular waveguide for TE modes of propagation.
- Derive S matrix for H plane tee. Justify the statement “H plane tee acts as a 3 dB splitter”.
- Explain the construction and operation of Gyrator.

Section – II

Q.4 Attempt any four. 16

- What are limitations of conventional tubes at microwave frequencies?
- Explain working of two cavity Klystron with help of Applegate diagram.
- Explain Varactor diode. Discuss its constructional details.
- Write a short note on Schottky barrier diode.
- Explain the steps for frequency measurements

Q.5 Attempt any two 12

- Explain the construction and working of Magnetron.
- What is Avalanche transit time device? Explain the principal of operation of TRAPATT diode.
- Draw and explain any two techniques for measurement of VSWR.

Seat No.	
----------	--

Set **P**

Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
ELECTRONICS AND TELECOMMUNICATION ENGINEERING
Data Communication (BTN06702)

Day & Date: Thursday, 16-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) Which of the following layer of OSI model also called end-to-end layer?
 - a) Presentation layer
 - b) Network layer
 - c) Session layer
 - d) Transport layer
- 2) UDP is _____ type of Protocol.
 - a) Connection oriented
 - b) Control
 - c) Connectionless
 - d) None
- 3) A subnet mask separates _____.
 - a) Network ID and Host ID
 - b) Host ID
 - c) Work groups from each other
 - d) All of the above
- 4) How many bytes is an Ethernet address?
 - a) 3
 - b) 4
 - c) 5
 - d) 6
- 5) Which of the following standards used for CSMA/CD LAN?
 - a) IEEE 802.3
 - b) IEEE 802.2
 - c) IEEE 802.5
 - d) IEEE 802.4
- 6) IEEE 802.3 uses _____ cable.
 - a) 10Base5
 - b) 10Base2
 - c) 10BaseT
 - d) All of the above
- 7) How many levels of addressing is provided in TCP/IP protocol?
 - a) One
 - b) Two
 - c) Three
 - d) Four
- 8) IPv6 has _____ bit addresses.
 - a) 32
 - b) 64
 - c) 128
 - d) Variable

- 9) The _____ layer adds ahead to the packet coming from the upper layer that includes the logical addresses of the sender and receiver.
- a) physical
 - b) data link
 - c) network
 - d) none of the above
- 10) A port address in TCP/IP is _____ bits long.
- a) 32
 - b) 48
 - c) 16
 - d) none of the above
- 11) Identify the class of the following IP address: 191.1.2.3.
- a) Class A
 - b) Class B
 - c) Class C
 - d) none of the above
- 12) _____ is a dynamic mapping protocol in which a physical address is found for a given logical address.
- a) ARP
 - b) RARP
 - c) both a and b
 - d) none of the above
- 13) ICMP messages are divided into two broad categories: _____.
- a) query and error reporting messages
 - b) request and response messages
 - c) request and reply messages
 - d) none of the above
- 14) _____ allows you to connect and login to a remote computer.
- a) Telnet
 - b) FTP
 - c) HTTP
 - d) SMTP

Seat No.	
-----------------	--

Set P

Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
ELECTRONICS AND TELECOMMUNICATION ENGINEERING
Data Communication (BTN06702)

Day & Date: Thursday, 16-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

- Q.2 Solve any Three. 12**
- a) What do you mean by network topology? Discuss Star and Ring topology with its advantages and disadvantages.
 - b) What is the advantage of piggybacking of the acknowledgement?
 - c) Discuss stop and wait protocol for flow control.
 - d) Differentiate between circuit switching and packet switching.
- Q.3 Solve any Two. 16**
- a) With the help of frame format explain in detail IEEE802.3 Ethernet LAN Standard.
 - b) Draw OSI Layer model and discuss the function of each layer.
 - c) List the different framing methods and explain any one of them in detail.

Section – II

- Q.4 Solve any Three. 12**
- a) Discuss shortest path routing algorithm with suitable example.
 - b) Draw IPV4 header format and discuss the fields related to fragmentation and reassembly.
 - c) Draw and explain UDP header fields.
 - d) Write a short note on DNS (Domain Name System).
- Q.5 Solve any Two. 16**
- a) List and explain different ICMP Error messages.
 - b) Write a short note on ARP and RARP
 - c) Write short note on:
 - i) FTP
 - ii) TELNET

Seat No.

Fourth Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
ELECTRONICS & TELECOMMUNICATION ENGINEERING
VLSI Design (BTN06703)

Day & Date: Friday, 17-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No.1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Multiple Choice Questions (Each Question 1 marks)

14

- 1) Which of the following is a characteristic of Verilog HDL?
 - a) Strongly typed language
 - b) Better library
 - c) Case sensitive
 - d) Not portable
- 2) Which of the following loops are supported by Verilog?
 - a) if-else loop
 - b) for loop
 - c) while loop
 - d) All the above
- 3) @posedge means _____
 - a) Transition from x to 1
 - b) Transition from z to 1, x
 - c) Transition from 0 to 1, x or z
 - d) Transition from 1 to 0
- 4) To introduce delays in a circuit, we can use a _____
 - a) Buffer
 - b) Inverter
 - c) EXOR Gate
 - d) Flip-Flop
- 5) The power dissipation in Pseudo-nMOS is reduced to about _____ compared to nMOS device.
 - a) 50%
 - b) 30%
 - c) 60%
 - d) 70%
- 6) MOS transistors consist of which of the following?
 - a) Semiconductor layer
 - b) Metal layer
 - c) Layer of silicon-di-oxide
 - d) All of the mentioned
- 7) Why we needed HDLs while having many traditional Programming languages?
 - a) Traditional programming languages are complex
 - b) Some characteristics of digital hardware couldn't be captured by traditional
 - c) HDLs are complementary to traditional programming languages to complete the design process
 - d) HDLs offers more complexity than traditional programming languages

Set P

**Fourth Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
ELECTRONICS & TELECOMMUNICATION ENGINEERING
VLSI Design (BTN06703)**

Day & Date: Friday, 17-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicates full marks.

Section – I

Q.2 Solve any four of the following **16**

- Write a Verilog code for T Flip flop.
- List all the data types available in Verilog HDL. Explain any three data types with examples.
- Explain operators in Verilog.
- Explain the following control statement with an example.
 - if else statement
 - For loop
- Write a Verilog code for Full Adder.

Q.3 Solve any two of the following. **12**

- Explain Gate Propagation Delay in Verilog
- Which are the Styles of Description in Verilog.
- Write a Verilog code for output Y in Data Flow, Behavioral and Structural Style Modelling. Circuit diagram is as shown below

Section – II

Q.4 Solve any four of the following. **16**

- Design two input OR/NOR gate using complimentary pass transistor logic.
- What is accumulation, depletion and enhancement mode of E MOSFET?
- What is pseudo NMOS logic? Implement sum of full adder using this logic
- Differentiate between CPLD and FPGA Architecture.
- Draw and explain architecture of FPGA.

Q.5 Solve any two of the following. **12**

- What is static and dynamic power dissipation of CMOS inverter?
- How to obtain DC characteristics of CMOS inverter? What is effect of β_n/β_p on this characteristic?
- Design following equation using CMOS Logic.
$$Y = \overline{(AB + CD)}E$$

Marks: 14

Q.1 Multiple Choice Questions (Each Question 1 marks) 14

- 1) A Verilog code contains Keyword always, which style of modelling is used in this code?
 - a) Behavioral
 - b) Structural
 - c) Dataflow
 - d) None of these
- 2) Let $x = 4'b1010$ then $\&x$ and $|x$ will result in _____ and _____ respectively.
 - a) $1'b1$, $1'b1$
 - b) $1'b0$ and $1'b1$
 - c) $1'b0$, $'b1$
 - d) Can not be determined
- 3) Default value of a reg data type is _____.
 - a) 0
 - b) x
 - c) 1
 - d) z
- 4) VLSI technology uses _____ to form integrated circuit.
 - a) transistors
 - b) diodes
 - c) switches
 - d) buffers
- 5) Electrical charge flows from _____.
 - a) source to drain
 - b) source to ground
 - c) drain to source
 - d) source to gate
- 6) In Pseudo-nMOS logic, n transistor operates in _____.
 - a) cut off region
 - b) resistive region
 - c) saturation region
 - d) non saturation region
- 7) Most Lookup tables in FPGAs use _____ inputs, resulting in _____ possible outputs.
 - a) 4, 16
 - b) 8, 16
 - c) 4, 12
 - d) 6, 12
- 8) Which of the following is a characteristic of Verilog HDL?
 - a) Strongly typed language
 - b) Better library
 - c) Case sensitive
 - d) Not portable
- 9) Which of the following loops are supported by Verilog?
 - a) if-else loop
 - b) for loop
 - c) while loop
 - d) All the above

- 10)** @posedge means _____
- a) Transition from x to 1
 - b) Transition from z to 1, x
 - c) Transition from 0 to 1, x or z
 - d) Transition from 1 to 0
- 11)** To introduce delays in a circuit, we can use a _____
- a) Buffer
 - b) Inverter
 - c) EXOR Gate
 - d) Flip-Flop
- 12)** The power dissipation in Pseudo-nMOS is reduced to about _____ compared to nMOS device.
- a) 50%
 - b) 30%
 - c) 60%
 - d) 70%
- 13)** MOS transistors consist of which of the following?
- a) Semiconductor layer
 - b) Metal layer
 - c) Layer of silicon-di-oxide
 - d) All of the mentioned
- 14)** Why we needed HDLs while having many traditional Programming languages?
- a) Traditional programming languages are complex
 - b) Some characteristics of digital hardware couldn't be captured by traditional
 - c) HDLs are complementary to traditional programming languages to complete the design process
 - d) HDLs offers more complexity than traditional programming languages

**Fourth Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
ELECTRONICS & TELECOMMUNICATION ENGINEERING
VLSI Design (BTN06703)**

Day & Date: Friday, 17-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicates full marks.

Section – I

Q.2 Solve any four of the following **16**

- Write a Verilog code for T Flip flop.
- List all the data types available in Verilog HDL. Explain any three data types with examples.
- Explain operators in Verilog.
- Explain the following control statement with an example.
 - if else statement
 - For loop
- Write a Verilog code for Full Adder.

Q.3 Solve any two of the following. **12**

- Explain Gate Propagation Delay in Verilog
- Which are the Styles of Description in Verilog.
- Write a Verilog code for output Y in Data Flow, Behavioral and Structural Style Modelling. Circuit diagram is as shown below

Section – II

Q.4 Solve any four of the following. **16**

- Design two input OR/NOR gate using complimentary pass transistor logic.
- What is accumulation, depletion and enhancement mode of E MOSFET?
- What is pseudo NMOS logic? Implement sum of full adder using this logic
- Differentiate between CPLD and FPGA Architecture.
- Draw and explain architecture of FPGA.

Q.5 Solve any two of the following. **12**

- What is static and dynamic power dissipation of CMOS inverter?
- How to obtain DC characteristics of CMOS inverter? What is effect of β_n/β_p on this characteristic?
- Design following equation using CMOS Logic.
$$Y = \overline{(AB + CD)}E$$

Set **R**

Fourth Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
ELECTRONICS & TELECOMMUNICATION ENGINEERING
VLSI Design (BTN06703)

Day & Date: Friday, 17-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No.1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Multiple Choice Questions (Each Question 1 marks)

14

- 1) VLSI technology uses _____ to form integrated circuit.
 - a) transistors
 - b) diodes
 - c) switches
 - d) buffers
- 2) Electrical charge flows from _____.
 - a) source to drain
 - b) source to ground
 - c) drain to source
 - d) source to gate
- 3) In Pseudo-nMOS logic, n transistor operates in _____.
 - a) cut off region
 - b) resistive region
 - c) saturation region
 - d) non saturation region
- 4) Most Lookup tables in FPGAs use _____ inputs, resulting in _____ possible outputs.
 - a) 4, 16
 - b) 8, 16
 - c) 4, 12
 - d) 6, 12
- 5) Which of the following is a characteristic of Verilog HDL?
 - a) Strongly typed language
 - b) Better library
 - c) Case sensitive
 - d) Not portable
- 6) Which of the following loops are supported by Verilog?
 - a) if-else loop

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose correct Answer.**14**

- 1) What is the function of the input/output (I/O) module in a PLC?
 - a) To provide power to the PLC
 - b) To store the program
 - c) To interface with the input and output devices
 - d) To communicate with other PLCs
- 2) Which criteria should be prioritized when selecting a PLC for a high-speed manufacturing process?
 - a) Communication protocols
 - b) Processing speed of the PLC
 - c) Programming capabilities
 - d) Compatibility with existing systems
- 3) Current flows into the _____.
 - a) Input terminal of a sinking DC input module
 - b) Input terminal of a sinking output field device
 - c) Output terminal of a sinking input field device
 - d) All of the above
- 4) Which of the following is not a common specification of a PLC?

a) Number of inputs and outputs	b) Memory capacity
c) Processing speed	d) Operating system
- 5) Which of the following sensors is used to detect the presence or absence of an object?

a) Pressure sensor	b) Temperature sensor
c) Proximity sensor	d) Accelerometer
- 6) Which one of the following is a basic component of pneumatic power system?

a) Air tank	b) Compressor
c) Valves	d) All of the above
- 7) Electrical strain gauge works on the principle of _____.

a) variation of resistance	b) variation of capacitance
c) variation of inductance	d) variation of area

- 8) What is the purpose of using a stepper motor in a PLC system?
- a) To convert electrical energy into mechanical energy
 - b) To provide rotational motion to machinery
 - c) To control the position and speed of a motor
 - d) To provide feedback to the PLC system
- 9) What is a relay in PLC?
- a) A device that allows signals to be sent from one part of the PLC to another.
 - b) A device that controls the flow of electricity within the PLC.
 - c) A device that converts analog signals to digital signals in the PLC.
 - d) None of the above.
- 10) What is the use of PLC in traffic signal control?
- a) To control the timing of traffic lights
 - b) To monitor the traffic flow
 - c) To detect faults in the system
 - d) All of the above
- 11) What is the purpose of programming a PLC?
- a) To control and automate industrial processes
 - b) To communicate with external devices
 - c) To troubleshoot errors in the system
 - d) To monitor and collect data for analysis
- 12) What is the purpose of a PLC in a garage door application?
- a) To control the opening and closing of the garage door
 - b) To monitor the temperature inside the garage
 - c) To display the time, it takes for the garage door to open and close
 - d) To generate a warning alarm when the garage door is open
- 13) A automation system is related to _____.
- a) Distributed control system
 - b) Supervisory control and data acquisition system
 - c) Distinct control system
 - d) Both a and b
- 14) What is the primary function of an industrial controller?
- a) Data storage
 - b) Data transmission
 - c) Process control
 - d) Data visualization

Seat No.

**Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
ELECTRONICS & TELECOMMUNICATION ENGINEERING
PLC and Industrial Controllers (BTN06707)**

Day & Date: Saturday, 18-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

Instructions: 1) All questions are compulsory.
2) Figures to the right indicates full marks.

Section – I

Q.2 Attempt any Four of the following. 16

- a) With the help of block diagram explain the working of PLC.
- b) Explain the types of PLCs. List any six brands of PLCs available in the market.
- c) Describe Power supply of PLC with block diagram.
- d) What are different types proximity switches? Explain any one in detail.
- e) Explain Working of Potentiometer as sensor.

Q.3 Attempt any Two of following. 12

- a) Why different types of I/O modules are required to be interfaced with PLC?
Draw and describe the block diagram of discrete input module of PLC.
- b) What is Seeback effect. Explain working of Thermocouple with suitable diagram.
- c) Define Sensor. List different types of sensors. Explain IR sensor in detail.

Section – II

Q.4 Attempt any Four of the following. 16

- a) Draw symbol of NO & NC type pushbutton. Explain use of Emergency push button in PLC.
- b) What is Solenoid Valve. State different types of it. State one application of Solenoid valve.
- c) Explain use of down Counter instruction in PLC with example.
- d) Define industrial controller. List & explain key features of Industrial Controllers
- e) What is use of comparison instruction in PLC programming? Explain any two comparison instruction in detail.

Q.5 Attempt any Two of following. 12

- a) Explain working of DC motor with block diagram. List specification of it.
- b) List different Methods of Programming a PLC. Draw Ladder diagram for XOR Gate & XNOR gate.
- c) Draw a ladder diagram for two lamps RED & YELLOW having following conditions
 - i) When start button pressed RED & YELLOW lamp will be ON.
 - ii) When stop button pressed RED lamps will be OFF.
 - iii) After 10 second YELLOW lamp will be OFF.

 - c) To control the position and speed of a motor
 - d) To provide feedback to the PLC system
- 13) What is a relay in PLC?
- a) A device that allows signals to be sent from one part of the PLC to another.
 - b) A device that controls the flow of electricity within the PLC.
 - c) A device that converts analog signals to digital signals in the PLC.
 - d) None of the above.
- 14) What is the use of PLC in traffic signal control?
- a) To control the timing of traffic lights
 - b) To monitor the traffic flow
 - c) To detect faults in the system
 - d) All of the above

**Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
ELECTRONICS & TELECOMMUNICATION ENGINEERING
PLC and Industrial Controllers (BTN06707)**

Day & Date: Saturday, 18-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

Instructions: 1) All questions are compulsory.
2) Figures to the right indicates full marks.

Section – I

Q.2 Attempt any Four of the following. 16

- With the help of block diagram explain the working of PLC.
- Explain the types of PLCs. List any six brands of PLCs available in the market.
- Describe Power supply of PLC with block diagram.
- What are different types proximity switches? Explain any one in detail.
- Explain Working of Potentiometer as sensor.

Q.3 Attempt any Two of following. 12

- Why different types of I/O modules are required to be interfaced with PLC? Draw and describe the block diagram of discrete input module of PLC.
- What is Seeback effect. Explain working of Thermocouple with suitable diagram.
- Define Sensor. List different types of sensors. Explain IR sensor in detail.

Section – II

Q.4 Attempt any Four of the following. 16

- Draw symbol of NO & NC type pushbutton. Explain use of Emergency push button in PLC.
- What is Solenoid Valve. State different types of it. State one application of Solenoid valve.
- Explain use of down Counter instruction in PLC with example.
- Define industrial controller. List & explain key features of Industrial Controllers
- What is use of comparison instruction in PLC programming? Explain any two comparison instruction in detail.

Q.5 Attempt any Two of following. 12

- Explain working of DC motor with block diagram. List specification of it.
- List different Methods of Programming a PLC. Draw Ladder diagram for XOR Gate & XNOR gate.
- Draw a ladder diagram for two lamps RED & YELLOW having following conditions
 - When start button pressed RED & YELLOW lamp will be ON.
 - When stop button pressed RED lamps will be OFF.
 - After 10 second YELLOW lamp will be OFF.

Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
ELECTRONICS & TELECOMMUNICATION ENGINEERING
PLC and Industrial Controllers (BTN06707)

Day & Date: Saturday, 18-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose correct Answer.

14

- 1) Which one of the following is a basic component of pneumatic power system?
 - a) Air tank
 - b) Compressor
 - c) Valves
 - d) All of the above
- 2) Electrical strain gauge works on the principle of _____.
 - a) variation of resistance
 - b) variation of capacitance
 - c) variation of inductance
 - d) variation of area
- 3) What is the purpose of using a stepper motor in a PLC system?
 - a) To convert electrical energy into mechanical energy
 - b) To provide rotational motion to machinery
 - c) To control the position and speed of a motor
 - d) To provide feedback to the PLC system
- 4) What is a relay in PLC?
 - a) A device that allows signals to be sent from one part of the PLC to another.
 - b) A device that controls the flow of electricity within the PLC.
 - c) A device that converts analog signals to digital signals in the PLC.
 - d) None of the above.
- 5) What is the use of PLC in traffic signal control?
 - a) To control the timing of traffic lights
 - b) To monitor the traffic flow
 - c) To detect faults in the system
 - d) All of the above
- 6) What is the purpose of programming a PLC?
 - a) To control and automate industrial processes
 - b) To communicate with external devices
 - c) To troubleshoot errors in the system
 - d) To monitor and collect data for analysis

- 7) What is the purpose of a PLC in a garage door application?
- a) To control the opening and closing of the garage door
 - b) To monitor the temperature inside the garage
 - c) To display the time, it takes for the garage door to open and close
 - d) To generate a warning alarm when the garage door is open
- 8) A automation system is related to ____.
- a) Distributed control system
 - b) Supervisory control and data acquisition system
 - c) Distinct control system
 - d) Both a and b
- 9) What is the primary function of an industrial controller?
- a) Data storage
 - b) Data transmission
 - c) Process control
 - d) Data visualization
- 10) What is the function of the input/output (I/O) module in a PLC?
- a) To provide power to the PLC
 - b) To store the program
 - c) To interface with the input and output devices
 - d) To communicate with other PLCs
- 11) Which criteria should be prioritized when selecting a PLC for a high-speed manufacturing process?
- a) Communication protocols
 - b) Processing speed of the PLC
 - c) Programming capabilities
 - d) Compatibility with existing systems
- 12) Current flows into the ____.
- a) Input terminal of a sinking DC input module
 - b) Input terminal of a sinking output field device
 - c) Output terminal of a sinking input field device
 - d) All of the above
- 13) Which of the following is not a common specification of a PLC?
- a) Number of inputs and outputs
 - b) Memory capacity
 - c) Processing speed
 - d) Operating system
- 14) Which of the following sensors is used to detect the presence or absence of an object?
- a) Pressure sensor
 - b) Temperature sensor
 - c) Proximity sensor
 - d) Accelerometer

**Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
ELECTRONICS & TELECOMMUNICATION ENGINEERING
PLC and Industrial Controllers (BTN06707)**

Day & Date: Saturday, 18-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

Instructions: 1) All questions are compulsory.
2) Figures to the right indicates full marks.

Section – I

Q.2 Attempt any Four of the following. 16

- With the help of block diagram explain the working of PLC.
- Explain the types of PLCs. List any six brands of PLCs available in the market.
- Describe Power supply of PLC with block diagram.
- What are different types proximity switches? Explain any one in detail.
- Explain Working of Potentiometer as sensor.

Q.3 Attempt any Two of following. 12

- Why different types of I/O modules are required to be interfaced with PLC?
Draw and describe the block diagram of discrete input module of PLC.
- What is Seeback effect. Explain working of Thermocouple with suitable diagram.
- Define Sensor. List different types of sensors. Explain IR sensor in detail.

Section – II

Q.4 Attempt any Four of the following. 16

- Draw symbol of NO & NC type pushbutton. Explain use of Emergency push button in PLC.
- What is Solenoid Valve. State different types of it. State one application of Solenoid valve.
- Explain use of down Counter instruction in PLC with example.
- Define industrial controller. List & explain key features of Industrial Controllers
- What is use of comparison instruction in PLC programming? Explain any two comparison instruction in detail.

Q.5 Attempt any Two of following. 12

- Explain working of DC motor with block diagram. List specification of it.
- List different Methods of Programming a PLC. Draw Ladder diagram for XOR Gate & XNOR gate.
- Draw a ladder diagram for two lamps RED & YELLOW having following conditions
 - When start button pressed RED & YELLOW lamp will be ON.
 - When stop button pressed RED lamps will be OFF.
 - After 10 second YELLOW lamp will be OFF.

Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
ELECTRONICS AND TELECOMMUNICATION ENGINEERING
Mobile Communication (BTN06708)

Day & Date: Saturday, 18-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:**
- 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page No 03 (Starting page of the Answer Book). Each question carries one mark.
 - 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 - 3) Figures to the right indicates full marks.
 - 4) Assume data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) Actual radio coverage of a cell is called _____
 - a) Fingerprint
 - b) Footprint
 - c) Imprint
 - d) Matrix
- 2) What is the drawback of dynamic channel assignment?
 - a) Decrease channel utilization
 - b) Increase probability of blocked call
 - c) Cross talk
 - d) Increase storage and computational load on system
- 3) What is breathing cell effect?
 - a) Fixed coverage region
 - b) Dynamic and time varying coverage region
 - c) Large coverage region
 - d) Very small coverage region
- 4) Which of the following technology distributes the coverage of the cell and extends the cell boundary to hard-to-reach places?
 - a) Cell splitting
 - b) Scattering
 - c) Sectoring
 - d) Micro cell zone concept
- 5) Propagation model that characterizes rapid fluctuation is called _____
 - a) Hata model
 - b) Fading model
 - c) Large scale propagation model
 - d) Okumura model
- 6) Apparent shift in frequency in multipath wave is caused due to relative motion between _____
 - a) Base station and MSC
 - b) Mobile and surrounding objects
 - c) Mobile and MSC
 - d) Mobile and base station

- 7) The bandwidth of FDMA channel is _____
- a) Wide
 - b) Narrow
 - c) Large
 - d) Zero
- 8) Why is a cyclic prefix required in an OFDMA?
- a) To ensure symbol time is an integer number
 - b) To help overcome multipath and ISI
 - c) To maintain orthogonality
 - d) To make OFDMA scalable
- 9) Global Positioning System uses _____
- a) CDMA
 - b) TDMA
 - c) SDMA
 - d) FDMA
- 10) Which of the following is a CDMA standard of second generation network?
- a) IS-95
 - b) IS-136
 - c) ETACS
 - d) EDGE
- 11) What type of handovers is supported by LTE?
- a) Hard handover only
 - b) Soft handover only
 - c) Hard and soft handover
 - d) Hard, soft and softest handover
- 12) What is the average uploading speed of 4G LTE network?
- a) 1-3 Gbps
 - b) 2-5 Gbps
 - c) 1-3 Mbps
 - d) 2-5 Mbps
- 13) Which of the following are ways in which a subscriber can be identified in 5G?
- a) Permanent Identity
 - b) Concealed Identity
 - c) Temporary Identity
 - d) Hidden Identity
- 14) Which of the following characteristics best describe 4G Internet?
- a) High speed, low latency, and high capacity
 - b) Low speed, high latency, and low capacity
 - c) High speed, high latency, and low capacity
 - d) Low speed, low latency, and low capacity

Day & Date: Saturday, 18-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

- Q.2 Attempt any Four** **16**
- a) What is Handoff? Explain handoff mechanism.
 - b) Explain Cell Splitting & its types. Also comment on effect of Cell Splitting.
 - c) Explain effects due to multipath time delay spread.
 - d) Explain in detail TDMA.
 - e) Explain factors influencing small scale fading.

- Q.3 Attempt any Two** **12**
- a) Explain Umbrella Cell approach & cell dragging problems in handoff considerations.
 - b) Explain practical link budget design equation using path-loss model in detail.
 - c) Give comparison between FDMA, TDMA, CDMA & SDMA.

Section – II

- Q.4 Attempt any Four** **16**
- a) Explain call origination procedure in GSM.
 - b) Explain in short different GSM channels.
 - c) Explain Mobility & Radio Resource management in IS 95.
 - d) What are the key aspects of 4G technology?
 - e) Give classification of signaling relays.

- Q.5 Attempt any Two** **12**
- a) Draw & explain GSM network architecture.
 - b) Write detailed note on IMT 2020 & its capabilities.
 - c) Explain LTE architecture in detail.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) The main tasks of an AI agent are _____.
 - a) Input and Output
 - b) Moment and Humanly Actions
 - c) Perceiving, thinking, and acting on the environment
 - d) None of the above
- 2) The main function of problem-solving agent is to _____.
 - a) Solve the given problem and reach the goal
 - b) Find out which sequence of action will get it to the goal state.
 - c) Both a & b
 - d) None of these
- 3) The inference engine works on _____.

a) Forward Chaining	b) Backward Chaining
c) Both A and B	d) None of these
- 4) Web Crawler is an example of _____.

a) Intelligent Agent	b) Problem-solving Agent
c) Simple reflex Agent	d) Model-based Agent
- 5) The component of an Expert system is _____.

a) Knowledge Base	b) Inference Engine
c) User Interface	d) All of these
- 6) Which of the given statement is true for Conditional Probability?
 - a) Conditional Probability gives 100% accurate results.
 - b) Conditional Probability can be applied to a single event.
 - c) Conditional Probability has no effect or relevance on independent events.
 - d) None of the above.
- 7) The probabilistic reasoning depends upon _____.

a) Estimation	b) Observations
c) Likelihood	d) All of these

Q.2 Solve any four. 16

- a) State & Explain different types of Intelligent Agents.
- b) Explain Relaxation Labelling Methods in brief.
- c) Explain Man Vs Computers in brief.
- d) Explain in brief Computer Vision Representation.
- e) Explain Model based object Recognition in brief.

Q.3 Solve any two. 12

- a) Explain the major components of Intelligent System.
- b) Explain the Features of an Expert System and Existing expert systems in brief.
- c) Explain the Basic architecture of an Expert system

Section – II

Q.4 Solve any four 16

- a) Explain the Language Models of NLP in brief.
- b) Explain the Information Retrieval and Information Extraction in short.
- c) Explain the Structure Grammars, Syntactic Analysis (Parsing) in short.
- d) Discuss the Robotic Perception in brief.
- e) Explain the Passive Reinforcement Learning in brief.

Q.5 Solve any two. 12

- a) Explain the Speech Recognition and Machine Translation in NLP in detail.
- b) Explain the Robotic Software Architectures in brief.
- c) Discuss the Active Reinforcement in detail.

Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
ELECTRONICS AND TELECOMMUNICATION ENGINEERING
AI Applications (BTN06710)

Day & Date: Sunday, 19-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:**
- 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page No 03 (Starting page of the Answer Book). Each question carries one mark.
 - 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 - 3) Figures to the right indicates full marks.
 - 4) Assume data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) Who is known as the -Father of AI"?

a) Fisher Ada	b) Alan Turing
c) John McCarthy	d) Allen Newell
- 2) Which term describes the common-sense of the judgmental part of problem-solving?

a) Values-based	b) Critical
c) Analytical	d) Heuristic
- 3) Artificial Intelligence is about _____.
 - a) Playing a game on Computer
 - b) Making a machine Intelligent
 - c) Programming on Machine with your own Intelligence
 - d) Putting your intelligence in Machine.
- 4) An AI agent perceives and acts upon the environment using _____.

a) Sensors	b) Perceiver
c) Actuators	d) Both a and c
- 5) Which AI technique enables the computers to understand the associations and relationships between objects and events?

a) Heuristic Processing	b) Cognitive Science
c) Relative Symbolism	d) Pattern Matching
- 6) A technique that was developed to determine whether a machine could or could not demonstrate the artificial intelligence known as the _____.

a) Boolean Algebra	b) Turing Test
c) Logarithm	d) Algorithm
- 7) If a robot is able to change its own trajectory as per the external conditions, then the robot is considered as the _____.

a) Mobile	b) Non-Servo
c) Open Loop	d) Intelligent

- 8) The main tasks of an AI agent are _____.
a) Input and Output
b) Moment and Humanly Actions
c) Perceiving, thinking, and acting on the environment
d) None of the above
- 9) The main function of problem-solving agent is to _____.
a) Solve the given problem and reach the goal
b) Find out which sequence of action will get it to the goal state.
c) Both a & b
d) None of these
- 10) The inference engine works on _____.
a) Forward Chaining b) Backward Chaining
c) Both A and B d) None of these
- 11) Web Crawler is an example of _____.
a) Intelligent Agent b) Problem-solving Agent
c) Simple reflex Agent d) Model-based Agent
- 12) The component of an Expert system is _____.
a) Knowledge Base b) Inference Engine
c) User Interface d) All of these
- 13) Which of the given statement is true for Conditional Probability?
a) Conditional Probability gives 100% accurate results.
b) Conditional Probability can be applied to a single event.
c) Conditional Probability has no effect or relevance on independent events.
d) None of the above.
- 14) The probabilistic reasoning depends upon _____.
a) Estimation b) Observations
c) Likelihood d) All of these

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt Any Four.

16

- What is decision support system (DSS)? Explain representation of DSS in brief.
- What is data mining? List the real life application of data mining.
- Explain importance of effective & timely decision.
- What is ETL? Explain the process of extraction, transformation and loading of data in Data warehouse.
- What are dimension tables? What are Fact Tables? What is the schema in the following diagram? Identify the fact tables and dimension tables in this schema.

Q.3 Attempt Any Two.

12

- Explain the role of mathematical model in business intelligence.
- What is system? Explain a closed cycle marketing system with feedback effects.
- Explain the process of data mining with suitable diagram.

Section – II

Q.4 Attempt Any Four.

16

- What is a performance measurement system? How does it work?
- What is relational marketing? Describe the main stages during the customer lifetime with suitable diagram.
- Explain the concept of supply chain optimization and its significance in logistics.
- Describe any 4 types of charts used for visualization in BI.
- Describe the term market basket analysis in context to relational marketing.

Q.5 Attempt Any Two.

- a) What is Salesforce management? Elaborate decision processes in Salesforce management.
- b) Describe tactical planning and extra capacity in context to optimization models for logistic planning.
- c) What is meant by Business Performance Management (BPM)? List and briefly describe the four phases of the business performance management cycle.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) Which of the following is not a component of Relational Marketing?
 - a) Organization
 - b) BI and Data Mining
 - c) Technology
 - d) Fund
- 2) What is Six Sigma?
 - a) a letter in the Greek alphabet that statisticians use to measure process variability
 - b) a methodology aimed at reducing the number of defects in a business process
 - c) a methodology aimed at reducing the amount of variability in a business process
 - d) a methodology aimed at measuring the amount of variability in a business process
- 3) Which of the following is not a stage in "Lifetime of a Customer"
 - a) Acquisition
 - b) Cross/Up Selling
 - c) Bargaining
 - d) Retention
- 4) Which term refers to the process of presenting data in a visual format to facilitate understanding and decision-making?
 - a) Business Intelligence
 - b) Data Visualization
 - c) Data Analysis
 - d) Report Generation
- 5) Which of the following is False for Supply Chain
 - a) It is network of connected and interdependent organizational units
 - b) Strong Coordination is required
 - c) It improves flow of materials if it is effective
 - d) Suppliers are given priority
- 6) Which of the following is not an optimization model?
 - a) Extra Capacity
 - b) Maximum Fixed Cost
 - c) Backlogging
 - d) Multiple Plants
- 7) Which type of models are commonly used for logistics planning to determine the most cost-effective distribution routes and schedules?

 - 3) Figures to the right indicates full marks.
 - 4) Assume suitable data wherever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options.

14

- 1) When considering AWS cost optimization, what is the process of choosing the most cost-effective pricing model for a service?
 - a) Cost forecasting
 - b) Cost allocation
 - c) Cost analysis
 - d) Cost optimization
- 2) What factor should be considered when selecting an AWS region for hosting data that must comply with specific regulatory requirements?
 - a) Network latency
 - b) Cost optimization
 - c) Data sovereignty
 - d) Scalability
- 3) Which AWS service enables the automatic scaling of compute capacity based on traffic and demand?
 - a) Amazon CloudFront
 - b) AWS Lambda
 - c) Amazon Auto Scaling
 - d) Amazon Route 53
- 4) What is the primary objective of the Performance Efficiency pillar in the AWS Well-Architected Framework?
 - a) Minimizing costs
 - b) Ensuring high availability
 - c) Achieving optimal system performance
 - d) Maximizing security
- 5) Which AWS Well-Architected Framework pillar focuses on the ability to recover from infrastructure or service failures and dynamically scale to meet demand?
 - a) Security
 - b) Cost Optimization
 - c) Reliability
 - d) Performance Efficiency
- 6) What is the primary goal of Cost Optimization in the AWS Well-Architected Framework?
 - a) Achieving the highest performance possible
 - b) Minimizing costs without considering performance
 - c) Reducing complexity at all costs
 - d) Reducing costs while maintaining or improving performance

- 7) Which pillar of the AWS Well-Architected Framework emphasizes the importance of creating a well-structured and accountable team to manage cloud resources effectively?
- a) Operational Excellence
 - b) Organization
 - c) Prepare
 - d) Operate
- 8) In the AWS Well-Architected Framework, the Evolve pillar is focused on:
- a) Preparing for cloud migration
 - b) Continuous improvement and innovation
 - c) Compliance and governance
 - d) Initial setup and configuration
- 9) What is the primary objective of Detection in cloud security?
- a) Preventing all security incidents
 - b) Identifying security threats and vulnerabilities
 - c) Managing access to cloud resources
 - d) Protecting data at rest
- 10) In cloud security, Infrastructure Protection focuses on:
- a) Managing user access
 - b) Protecting the physical data centers
 - c) Detecting and responding to security incidents
 - d) Protecting the cloud infrastructure from attacks and vulnerabilities
- 11) What does Foundations address within the AWS Well-Architected Framework for Reliability?
- a) Building the architectural base for workloads
 - b) Managing changes to the workload
 - c) Monitoring workload performance
 - d) Handling operational issues
- 12) What aspect of Reliability in the AWS Well-Architected Framework focuses on maintaining system stability during changes or updates?
- a) Foundations
 - b) Workload Architecture
 - c) Change Management
 - d) Failure Management
- 13) In the context of the AWS Well-Architected Framework, what is the primary objective of Workload Architecture for ensuring Reliability?
- a) Defining an architectural blueprint for workloads
 - b) Managing changes to the workload
 - c) Assessing system failures
 - d) Addressing performance bottlenecks
- 14) What is the primary goal of performance efficiency in cloud financial management?
- a) Minimizing upfront costs
 - b) Maximizing resource utilization
 - c) Reducing security risks
 - d) Enhancing vendor lock-in

Set P

**Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
ELECTRONICS AND TELECOMMUNICATION ENGINEERING
IOT- Architecting IOT Solutions (BTN06715)**

Day & Date: Sunday, 19-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

Instructions: 1) All question are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any THREE. 12

- a) Describe the general architecture of AWS.
- b) What are the best practices for achieving Security in a cloud architecture according to the AWS Well-Architected Framework?
- c) Explain the key design principles associated with Operational Excellence in the AWS Well-Architected Framework.
- d) What are some key design principles that AWS follows in its framework?

Q.3 Attempt any TWO. 16

- a) Discuss the fundamental components of the AWS architecture, emphasizing their roles and interactions in a typical cloud environment.
- b) How can the AWS Well-Architected Framework assist organizations in balancing the trade-offs between different pillars, such as security versus cost optimization?
- c) What are some common challenges that organizations may face when striving for Operational Excellence in cloud operations, and how can they overcome these challenges?

Section – II

Q.4 Attempt any THREE. 12

- a) Describe the key strategies and measures for protecting the infrastructure in a cloud environment. What are some common infrastructure protection techniques?
- b) Explain how workload architecture plays a crucial role in achieving reliability in a cloud environment. What are some architectural best practices?
- c) What is the significance of Identity and Access Management (IAM) in cloud security, and how does it contribute to a secure cloud environment?
- d) Explain the process of resource selection in achieving Performance Efficiency within the cloud. What factors should organizations consider when selecting resources for their workloads?

Q.5 Attempt any TWO.

- a) Share best practices for practicing cloud financial management and maintaining a culture of expenditure and usage awareness within an organization's cloud operations.
- b) Provide real-world examples of organizations that have successfully achieved high reliability in their cloud-based systems. What strategies and practices did they implement to achieve this?
- c) How can organizations leverage security monitoring and auditing tools to enhance their cloud security posture and detect potential threats?

Seat No.

Set **Q**

Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
ELECTRONICS AND TELECOMMUNICATION ENGINEERING
IOT- Architecting IOT Solutions (BTN06715)

Day & Date: Sunday, 19-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:**
- 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.
 - 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 - 3) Figures to the right indicates full marks.
 - 4) Assume suitable data wherever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options.

14

- 1) In the AWS Well-Architected Framework, the Evolve pillar is focused on:
 - a) Preparing for cloud migration
 - b) Continuous improvement and innovation
 - c) Compliance and governance
 - d) Initial setup and configuration
- 2) What is the primary objective of Detection in cloud security?
 - a) Preventing all security incidents
 - b) Identifying security threats and vulnerabilities
 - c) Managing access to cloud resources
 - d) Protecting data at rest
- 3) In cloud security, Infrastructure Protection focuses on:
 - a) Managing user access
 - b) Protecting the physical data centers
 - c) Detecting and responding to security incidents
 - d) Protecting the cloud infrastructure from attacks and vulnerabilities
- 4) What does Foundations address within the AWS Well-Architected Framework for Reliability?
 - a) Building the architectural base for workloads
 - b) Managing changes to the workload
 - c) Monitoring workload performance
 - d) Handling operational issues
- 5) What aspect of Reliability in the AWS Well-Architected Framework focuses on maintaining system stability during changes or updates?

a) Foundations	b) Workload Architecture
c) Change Management	d) Failure Management

- 6) In the context of the AWS Well-Architected Framework, what is the primary objective of Workload Architecture for ensuring Reliability?
- a) Defining an architectural blueprint for workloads
 - b) Managing changes to the workload
 - c) Assessing system failures
 - d) Addressing performance bottlenecks
- 7) What is the primary goal of performance efficiency in cloud financial management?
- a) Minimizing upfront costs
 - b) Maximizing resource utilization
 - c) Reducing security risks
 - d) Enhancing vendor lock-in
- 8) When considering AWS cost optimization, what is the process of choosing the most cost-effective pricing model for a service?
- a) Cost forecasting
 - b) Cost allocation
 - c) Cost analysis
 - d) Cost optimization
- 9) What factor should be considered when selecting an AWS region for hosting data that must comply with specific regulatory requirements?
- a) Network latency
 - b) Cost optimization
 - c) Data sovereignty
 - d) Scalability
- 10) Which AWS service enables the automatic scaling of compute capacity based on traffic and demand?
- a) Amazon CloudFront
 - b) AWS Lambda
 - c) Amazon Auto Scaling
 - d) Amazon Route 53
- 11) What is the primary objective of the Performance Efficiency pillar in the AWS Well-Architected Framework?
- a) Minimizing costs
 - b) Ensuring high availability
 - c) Achieving optimal system performance
 - d) Maximizing security
- 12) Which AWS Well-Architected Framework pillar focuses on the ability to recover from infrastructure or service failures and dynamically scale to meet demand?
- a) Security
 - b) Cost Optimization
 - c) Reliability
 - d) Performance Efficiency
- 13) What is the primary goal of Cost Optimization in the AWS Well-Architected Framework?
- a) Achieving the highest performance possible
 - b) Minimizing costs without considering performance
 - c) Reducing complexity at all costs
 - d) Reducing costs while maintaining or improving performance
- 14) Which pillar of the AWS Well-Architected Framework emphasizes the importance of creating a well-structured and accountable team to manage cloud resources effectively?
- a) Operational Excellence
 - b) Organization
 - c) Prepare
 - d) Operate

2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options.

14

- 1) _____ for monitoring of stations, tracks and passengers.
 - a) Train Tracking
 - b) Train signaling
 - c) Train surveillance
 - d) Train Monitoring
- 2) The reception signal is _____.
 - a) outer signal only
 - b) starter only
 - c) neither (outer signal) nor (starter)
 - d) both (outer signal) and (starter)
- 3) The stations which do not have any signal are known as
 - a) A-class stations
 - b) B-class stations
 - c) Crossing stations
 - d) Terminal stations
- 4) UTS (Unreserved Ticketing System) is a mobile app developed by
 - a) IRCTC
 - b) CRIS
 - c) C-DAC
 - d) None of these
- 5) How many zones are there in Indian Railways?
 - a) 16
 - b) 22
 - c) 20
 - d) 18
- 6) What is the width of Broad Gauge Railway line in India?
 - a) 2 m
 - b) 1.67 m
 - c) 1.32 m
 - d) 1 m
- 7) The safety in Railway in India is looked after by _____.
 - a) Ministry of Railways
 - b) Commission of Railway Safety
 - c) Railway Board
 - d) Headquarter Office
- 8) Which is the fastest train in India 2020?
 - a) Duronto express
 - b) Vande Bharat Express
 - c) Shatabdi express
 - d) Tejas Express

- 9) Intermediate Block Signaling using MSDAC system consists of the following component:
- a) Axle Detectors
 - b) Electronics Field Units
 - c) Central Evaluator
 - d) All of the above
- 10) In railways, the disc signals are provided for the purpose of _____.
a) dead slow movement b) indicating busy platform
c) Shunting d) possible danger ahead
- 11) Shunting signals are known as _____.
a) Routing signals b) Starter signals
c) Ground signals d) Warner signals
- 12) IT tools and business systems in IR are _____.
a) Mobile Ticketing b) Web Ticketing
c) Kiosk-based Ticketing d) All of above
- 13) What is the full form of IRCTC?
a) Indian Railway Catering and Tourism Corporation
b) Indian Railway Corporation and Tourism Corporation
c) Indian Railway Catering and Tourist Corporation
d) Indian Railway Catering and Tourism Council
- 14) In railways the signal that also acts as a routing signal is _____.
a) home signal b) advance starter signal
c) outer signal d) starter signal

2) Figures to the right indicate full marks.

Section – I

- Q.2 Attempt Any Four** **16**
- a) What is railway signaling system?
 - b) Explain Introduction of IOT in Indian Railways.
 - c) Why is safety important in signaling?
 - d) Explain Modern Signaling Systems.
 - e) Explain the Role of the Signaling & Telecommunications Department.

- Q.3 Attempt Any Two** **12**
- a) Write note on Railway Track Circuit.
 - b) Write a note on Windows NT.
 - c) Write a note on Telecommunication for Train Operation.

Section – II

- Q.4 Attempt Any Four** **16**
- a) What is Networked PA System in railway? Explain.
 - b) Explain VoIP based Train Control communication System (TCCS).
 - c) Write a note on UHF Digital (License free band radio) Handheld Trans-receivers.
 - d) What is railway signaling equipment & communications systems?
 - e) Explain trains through two-way satellite communication.

- Q.5 Attempt Any Two** **12**
- a) Give Safety Slogans for Signal Department.
 - b) Give the advantages of IP based Video Surveillance System.
 - c) Write note on Technologies and processes to meet the challenges of signaling system maintenance.

 - a) Train Tracking
 - b) Train signaling
 - c) Train surveillance
 - d) Train Monitoring

- 9) The reception signal is _____.
a) outer signal only
b) starter only
c) neither (outer signal) nor (starter)
d) both (outer signal) and (starter)
- 10) The stations which do not have any signal are known as
a) A-class stations
b) B-class stations
c) Crossing stations
d) Terminal stations
- 11) UTS (Unreserved Ticketing System) is a mobile app developed by
a) IRCTC
b) CRIS
c) C-DAC
d) None of these
- 12) How many zones are there in Indian Railways?
a) 16
b) 22
c) 20
d) 18
- 13) What is the width of Broad Gauge Railway line in India?
a) 2 m
b) 1.67 m
c) 1.32 m
d) 1 m
- 14) The safety in Railway in India is looked after by _____.
a) Ministry of Railways
b) Commission of Railway Safety
c) Railway Board
d) Headquarter Office

**Fourth. Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Railway Engineering-Advanced Communication and Modern Signaling in
Railway (BTN06717)**

Day & Date: Sunday, 19-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

- Q.2 Attempt Any Four** **16**
- a) What is railway signaling system?
 - b) Explain Introduction of IOT in Indian Railways.
 - c) Why is safety important in signaling?
 - d) Explain Modern Signaling Systems.
 - e) Explain the Role of the Signaling & Telecommunications Department.

- Q.3 Attempt Any Two** **12**
- a) Write note on Railway Track Circuit.
 - b) Write a note on Windows NT.
 - c) Write a note on Telecommunication for Train Operation.

Section – II

- Q.4 Attempt Any Four** **16**
- a) What is Networked PA System in railway? Explain.
 - b) Explain VoIP based Train Control communication System (TCCS).
 - c) Write a note on UHF Digital (License free band radio) Handheld Trans-receivers.
 - d) What is railway signaling equipment & communications systems?
 - e) Explain trains through two-way satellite communication.

- Q.5 Attempt Any Two** **12**
- a) Give Safety Slogans for Signal Department.
 - b) Give the advantages of IP based Video Surveillance System.
 - c) Write note on Technologies and processes to meet the challenges of signaling system maintenance.

Seat No.

ELECTRONICS & TELECOMMUNICATION ENGINEERING
Railway Engineering-Advanced Communication and Modern Signaling in
Railway (BTN06717)

Day & Date: Sunday, 19-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.
 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options.

14

- 1) What is the width of Broad Gauge Railway line in India?
 - a) 2 m
 - b) 1.67 m
 - c) 1.32 m
 - d) 1 m
- 2) The safety in Railway in India is looked after by _____.
 - a) Ministry of Railways
 - b) Commission of Railway Safety
 - c) Railway Board
 - d) Headquarter Office
- 3) Which is the fastest train in India 2020?
 - a) Durgam express
 - b) Vande Bharat Express
 - c) Shatabdi express
 - d) Tejas Express
- 4) Intermediate Block Signaling using MSDAC system consists of the following component:
 - a) Axle Detectors
 - b) Electronics Field Units
 - c) Central Evaluator
 - d) All of the above
- 5) In railways, the disc signals are provided for the purpose of _____.
 - a) dead slow movement
 - b) indicating busy platform
 - c) Shunting
 - d) possible danger ahead
- 6) Shunting signals are known as _____.
 - a) Routing signals
 - b) Starter signals
 - c) Ground signals
 - d) Warner signals
- 7) IT tools and business systems in IR are _____.
 - a) Mobile Ticketing
 - b) Web Ticketing
 - c) Kiosk-based Ticketing
 - d) All of above
- 8) What is the full form of IRCTC?
 - a) Indian Railway Catering and Tourism Corporation
 - b) Indian Railway Corporation and Tourism Corporation
 - c) Indian Railway Catering and Tourist Corporation
 - d) Indian Railway Catering and Tourism Council

Day & Date: Monday, 20-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:**
- 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 - 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 - 3) Figures to the right indicates full marks.
 - 4) Assume data wherever necessary
 - 5) Use of nonprogrammable calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) What is the primary purpose of stating research objectives in a study?
 - a) To summarize the research findings
 - b) To provide a background of the research topic
 - c) To clarify the purpose and direction of the research
 - d) To list the research team members
- 2) Which type of research is typically conducted to solve practical problems or address specific issues?
 - a) Applied research
 - b) Fundamental research
 - c) Descriptive research
 - d) Analytical research
- 3) When reading a journal article, you should do what?
 - a) Use the same ideas for your project
 - b) Approach it with a questioning style
 - c) Read it as a way of obtaining more information
 - d) Accept their ideas after all they are published authors
- 4) What is a hypothesis in research?
 - a) A conclusion drawn from data analysis
 - b) A summary of research findings
 - c) A measurement of data accuracy
 - d) A statement of predicted relationship between variables
- 5) In order to pursue the research, which of the following is priorly required?
 - a) Developing a research design
 - b) Formulating a research question
 - c) Deciding about the data analysis procedure
 - d) Formulating a research hypothesis

- 6) What role does a literature review play in defining a research problem?
- It is optional and doesn't significantly impact problem definition.
 - It helps identify gaps in existing knowledge and informs problem formulation.
 - It only provides historical context but doesn't contribute to problem definition.
 - It eliminates the need for developing a hypothesis.
- 7) A complete list of all the sampling units is called:
- Sampling design
 - Sampling frame
 - Population frame
 - Cluster
- 8) Which feature is essential for a good research design?
- Completing the research quickly
 - Simplicity and ease of execution
 - Relying solely on secondary data
 - Ignoring ethical considerations
- 9) Deciding what data is best for your research analysis depends upon which of the following?
- The research question
 - The nature of the participants
 - The researcher's personal preferences
 - All of these
- 10) ANOVA is _____
- A government body which collects social statistics.
 - The name of a statistical software package.
 - A one-way analysis of variance.
 - A two-way analysis of variance.
- 11) Which of the following is not one of the seven major parts to the research report?
- Results
 - Abstract
 - Method
 - Footnotes
- 12) Which type of report aims to provide an overview of a specific topic, often for decision-makers?
- Research report
 - Technical report
 - Feasibility report
 - Progress report
- 13) Which basic ethical principle involves telling the truth and avoiding deception in research?
- Objectivity
 - Honesty
 - Efficiency
 - Accuracy
- 14) What is a "conflict of interest" in research ethics?
- A situation where researchers refuse to share their findings with colleagues
 - A situation where researchers have a personal or financial interest that may influence their research
 - A situation where researchers are not interested in the research topic
 - A situation where research results are too interesting to be true

Seat No.

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume data wherever necessary
4) Use of nonprogrammable calculator is allowed.

Section – I

- Q.2 Solve any Four of the Followings 16**
- a) What are the needs and objectives of research? Explain in detail.
 - b) Explain the Criteria for good Research.
 - c) Describe the important points to be considered for selecting a Research problem.
 - d) Discuss about research design.
 - e) What are the different strategic for good sample design?
- Q.3 Solve any two of the following 12**
- a) Why we need research Design? What are its features? Explain the Basic principle of research Design.
 - b) What are different types of research? Explain any four with suitable examples.
 - c) What is a research problem? Define the main issues which should receive the attention of the researcher in formulating the research problem. Give suitable examples to elucidate your points.

Section – II

- Q.4 Solve any Four of the following 16**
- a) Describe data analysis and explain in details any two types of data analysis.
 - b) Write short notes on ANOVA.
 - c) What are the issues that should be addressed while writing a research report?
 - d) Explain the Research and Publication ethics.
 - e) Write a comprehensive note on the “writing research proposal (synopsis)”.
- Q.5 Solve any two of the followings 12**
- a) What do you think about Plagiarism, Citation, Bibliography, referencing and footnotes?
 - b) Write about honestly, Objectivity, Efficiency and Accuracy of research.
 - c) Describe various data collection methods. Explain the Chi-square method for data processing and analysis.

 - c) Read it as a way of obtaining more information
 - d) Accept their ideas after all they are published authors
- 13) What is a hypothesis in research?
- a) A conclusion drawn from data analysis
 - b) A summary of research findings
 - c) A measurement of data accuracy
 - d) A statement of predicted relationship between variables
- 14) In order to pursue the research, which of the following is priorly required?
- a) Developing a research design
 - b) Formulating a research question
 - c) Deciding about the data analysis procedure
 - d) Formulating a research hypothesis

Set S

Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Research Methodology (BTN06704)

Day & Date: Monday, 20-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume data wherever necessary
4) Use of nonprogrammable calculator is allowed.

Section – I

- Q.2 Solve any Four of the Followings 16**
- a) What are the needs and objectives of research? Explain in detail.
 - b) Explain the Criteria for good Research.
 - c) Describe the important points to be considered for selecting a Research problem.
 - d) Discuss about research design.
 - e) What are the different strategic for good sample design?
- Q.3 Solve any two of the following 12**
- a) Why we need research Design? What are its features? Explain the Basic principle of research Design.
 - b) What are different types of research? Explain any four with suitable examples.
 - c) What is a research problem? Define the main issues which should receive the attention of the researcher in formulating the research problem. Give suitable examples to elucidate your points.

Section – II

- Q.4 Solve any Four of the following 16**
- a) Describe data analysis and explain in details any two types of data analysis.
 - b) Write short notes on ANOVA.
 - c) What are the issues that should be addressed while writing a research report?
 - d) Explain the Research and Publication ethics.
 - e) Write a comprehensive note on the “writing research proposal (synopsis)”.
- Q.5 Solve any two of the followings 12**
- a) What do you think about Plagiarism, Citation, Bibliography, referencing and footnotes?
 - b) Write about honestly, Objectivity, Efficiency and Accuracy of research.
 - c) Describe various data collection methods. Explain the Chi-square method for data processing and analysis.

Set **P**

**Fourth Y. (B.Tech.) (Sem - I) (Old) (CBCS) Examination: March/April-2024
ELECTRONICS AND TELECOMMUNICATION ENGINEERING
Machine Learning (197044701)**

Day & Date: Wednesday, 15-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page No 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) What is machine learning?
 - a) Selective acquisition of knowledge through the use of manual programs
 - b) Selective acquisition of knowledge through the use of computer programs
 - c) Autonomous acquisition of knowledge through the use of manual programs
 - d) Autonomous acquisition of knowledge through the use of computer programs

- 2) How can you handle missing or corrupted data in a dataset?
 - a) Drop missing rows or columns
 - b) Assign a unique category to missing values
 - c) Replace missing values with mean/median/mode
 - d) All of the above

- 3) Machine learning algorithms build a model based on sample data, known as _____.

a) Training Data	b) Transfer Data
c) Data Training	d) None of the above

- 4) _____ is the machine learning algorithms that can be used with labeled data.

a) Regression algorithms	b) Clustering algorithms
c) Association algorithms	d) All of the above

- 5) _____ is used as an input to the machine learning model for training and prediction purposes.

a) Feature	b) Feature Vector
c) Both a and b	d) None of the above

- 6) _____ is the scenario when the model fails to decipher the underlying trend in the input data.

a) Overfitting	b) Underfitting
c) Both a and b	d) None of the above

Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if required.

Section – I

- Q.2 Solve any four. 16**
- a) Explain data processing steps for ML in brief.
 - b) Explain Binary Classification with examples.
 - c) Explain Concept of Perceptron with neat diagram.
 - d) Explain Supervised type of learning with examples.
 - e) Explain the type of regression. Illustrate K means clustering algorithm with an example.
- Q.3 Solve any Two. 12**
- a) Distinguish between supervised learning and Reinforcement learning. Illustrate with an example.
 - b) Compare Classification with regression with an example.
 - c) Distinguish between overfitting and underfitting. How it can affect model generalization?

Section – II

- Q.4 Answer the following (Any Four) 16**
- a) Explain Feed Forward Network & Back Propagation Algorithm.
 - b) Explain naive bayes classification in brief.
 - c) Explain the terms: Gini Index
 - d) Describe the random forest algorithm in brief.
 - e) What is ANN? Explain different types of ANN.
- Q.5 Solve Any Two. 12**
- a) Explain Email Spam and Malware Filtering.
 - b) Differentiate between Deep learning vs Machine Learning.
 - c) Discuss decision tree algorithm with example. Mention its advantages and disadvantages.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) Which of the following is not a supervised learning?
 - a) PCA
 - b) Naive Bayesian
 - c) Linear Regression
 - d) Decision Tree
- 2) Real-Time decisions, Game AI, Learning Tasks, Skill acquisition, and Robot Navigation are applications of _____.
 - a) Reinforcement Learning
 - b) Supervised Learning: Classification
 - c) Unsupervised Learning: Regression
 - d) None of the above
- 3) _____ is a disadvantage of decision trees.
 - a) Decision trees are robust to outliers
 - b) Decision trees are prone to be overfit
 - c) Both a and b
 - d) None of the above
- 4) _____ is a part of machine learning that works with neural networks.
 - a) Artificial intelligence
 - b) Deep learning
 - c) Both a and b
 - d) None of the above
- 5) Which machine learning models are trained to make a series of decisions based on the rewards and feedback they receive for their actions?
 - a) Supervised learning
 - b) Unsupervised learning
 - c) Reinforcement learning
 - d) All of the above
- 6) The most common issue when using ML is _____.
 - a) Lack of skilled resources
 - b) Inadequate Infrastructure
 - c) Poor Data Quality
 - d) None of these

- 7) _____ is a widely used and effective machine learning algorithm based on the idea of bagging.
- a) Regression
 - b) Classification
 - c) Decision Tree
 - d) Radom Forest
- 8) What is machine learning?
- a) Selective acquisition of knowledge through the use of manual programs
 - b) Selective acquisition of knowledge through the use of computer programs
 - c) Autonomous acquisition of knowledge through the use of manual programs
 - d) Autonomous acquisition of knowledge through the use of computer programs

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) The OSI model consists of _____ layers.
 - a) Five
 - b) Seven
 - c) Eight
 - d) Nine
- 2) End-to-end connectivity is provided from host-to-host in.
 - a) Network layer
 - b) Session layer
 - c) Data link layer
 - d) Transport layer
- 3) What protocol is used between E-Mail servers?
 - a) FTP
 - b) SMTP
 - c) SNMP
 - d) POP3
- 4) CRC stands for _____.
 - a) Cyclic Redundancy Check
 - b) Code Repeat Check
 - c) Code Redundancy Check
 - d) Cyclic Repeat Check
- 5) Which of the following is the multiple access protocol for channel access control?
 - a) CSMA/CD
 - b) CSMA/CA
 - c) Both CSMA/CD & CSMA/CA
 - d) HDLC
- 6) The network layer is concerned with _____ of data.
 - a) bits
 - b) frames
 - c) packets
 - d) bytes
- 7) A 4-byte IP address consists of _____.
 - a) only network address
 - b) only host address
 - c) network address & host address
 - d) network address & MAC address
- 8) The network layer protocol for internet is _____.
 - a) Ethernet
 - b) internet protocol
 - c) hypertext transfer protocol
 - d) file transfer
- 9) Which of the following are transport layer protocols used in networking?
 - a) TCP and FTP
 - b) UDP and HTTP
 - c) TCP and UDP
 - d) HTTP and FTP

- 10)** Transport layer protocols deals with _____
- a) application to application communication
 - b) process to process communication
 - c) node to node communication
 - d) man to man communication
- 11)** Which is not a application layer protocol?
- a) HTTP
 - b) SMTP
 - c) FTP
 - d) TCP
- 12)** Application layer offers _____ service.
- a) End to end
 - b) Process to process
 - c) Both End to end and Process to process
 - d) None of the above
- 13)** Which is a time-sensitive service?
- a) File transfer
 - b) File download
 - c) E-mail
 - d) Internet telephony
- 14)** Electronic mail uses which Application layer protocol?
- a) SMTP
 - b) HTTP
 - c) FTP
 - d) SIP

- a) Explain distance vector routing with its limitations.
 - b) Differentiate between IPv4 and IPv6.
 - c) Elaborate Sub netting and Masking Protocol.

Section – II

- Q.4 Solve the following questions. 12**
- a) Describe Error detection and error correction Methods.
 - b) What is MAC? Explain different protocols of MAC.
 - c) Write difference between Bluetooth 5.1, 5.2.
 - d) Explain HTTP Protocol.
- Q.5 Solve any Two of the following questions. 16**
- a) Explain shortest path routing.
 - b) Explain TCP connection establishment, using three way handshaking.
 - c) Explain Flow control methods of Data link layer.

Set **R**

Fourth Y. (B.Tech.) (Sem-I) (Old) (CBCS) Examination: March/April-2024
ELECTRONICS AND TELECOMMUNICATION ENGINEERING
Data Communication (197044702)

Day & Date: Thursday, 16-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) Which is not a application layer protocol?
 - a) HTTP
 - b) SMTP
 - c) FTP
 - d) TCP
- 2) Application layer offers _____ service.
 - a) End to end
 - b) Process to process
 - c) Both End to end and Process to process
 - d) None of the above
- 3) Which is a time-sensitive service?
 - a) File transfer
 - b) File download
 - c) E-mail
 - d) Internet telephony
- 4) Electronic mail uses which Application layer protocol?
 - a) SMTP
 - b) HTTP
 - c) FTP
 - d) SIP
- 5) The OSI model consists of _____ layers.
 - a) Five
 - b) Seven
 - c) Eight
 - d) Nine
- 6) End-to-end connectivity is provided from host-to-host in.
 - a) Network layer
 - b) Session layer
 - c) Data link layer
 - d) Transport layer
- 7) What protocol is used between E-Mail servers?
 - a) FTP
 - b) SMTP
 - c) SNMP
 - d) POP3
- 8) CRC stands for _____.
 - a) Cyclic Redundancy Check
 - b) Code Repeat Check
 - c) Code Redundancy Check
 - d) Cyclic Repeat Check
- 9) Which of the following is the multiple access protocol for channel access control?
 - a) CSMA/CD
 - b) CSMA/CA
 - c) Both CSMA/CD & CSMA/CA
 - d) HDLC

- 10)** The network layer is concerned with _____ of data.
- a) bits
 - b) frames
 - c) packets
 - d) bytes
- 11)** A 4-byte IP address consists of _____
- a) only network address
 - b) only host address
 - c) network address & host address
 - d) network address & MAC address
- 12)** The network layer protocol for internet is _____
- a) Ethernet
 - b) internet protocol
 - c) hypertext transfer protocol
 - d) file transfer
- 13)** Which of the following are transport layer protocols used in networking?
- a) TCP and FTP
 - b) UDP and HTTP
 - c) TCP and UDP
 - d) HTTP and FTP
- 14)** Transport layer protocols deals with _____
- a) application to application communication
 - b) process to process communication
 - c) node to node communication
 - d) man to man communication

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct option from the following. 14

- 1) In the current market scenario, IoT captures the maximum share in which one of these?

a) Industry	b) Security
c) Healthcare	d) Home automation
- 2) M2M stands for _____.

a) MAC to MAC communication
b) Machine to MAC communication
c) Machine to machine communication
d) MAC to machine communication
- 3) Embedded C programming language support _____ instructions of normal "C" language.

a) All	b) Some
c) Specific	d) None
- 4) Cross Compiler converts

a) Program into C language into binary language.
b) Programming C language into another language.
c) Program in C language into program of another processors language.
d) Both a & b
- 5) The _____ registers are useful for temporarily disabling interrupts in timing-critical tasks.

a) PRIMASK	b) BASEPRI
c) Both a and b	d) None of the above
- 6) Which instruction set architecture is used in Raspberry Pi?

a) X86	b) MSP
c) AVR	d) ARM
- 7) What is the value of R1 after MVN R1, #7 is executed?

a) 0x00000007	b) 0xFFFFFFFF8
c) 0xFFFFFFFFFA	d) 0xFFFFFFFF9

Internet of Things (197044703)**

Day & Date: Friday, 17-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if required.

Section – I

- Q.2 Attempt any four questions. 16**
- a) Define IoT. What are the different components of an IoT system?
 - b) Explain different sensors used in IoT.
 - c) Explain the various embedded platforms used in IoT,
 - d) Write short note on ARM Cortex-M3 processor registers.
 - e) Discuss the operation modes and privilege levels supported in Cortex-M3 processor with neat diagram.
- Q.3 Attempt any two questions. 12**
- a) What are different applications of IoT in various domains?
 - b) What are the various IDEs used for embedded development.
 - c) State and explain any two data processing and arithmetic instructions of Cortex M3.

Section – II

- Q.4 Attempt any four questions. 16**
- a) What is a Bluetooth profile? Discuss a Bluetooth profile in detail.
 - b) Discuss with neat diagram Zigbee protocol.
 - c) Discuss IPv4 communication Protocols in details.
 - d) Explain framework and message format for MQTT.
 - e) Explain smart cities case study.
- Q.5 Attempt any two questions. 12**
- a) Discuss 6LoWPAN communication protocols in details.
 - b) Write the feature of COAP and draw the message frame format of CoAP.
 - c) With neat diagram discuss public, private and hybrid cloud models.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct option from the following. 14

- 1) The communication protocol used by Internet is:

a) HTTP	b) WWW
c) TCP/IP	d) FTP
- 2) RFID is an acronym for

a) Radio frequency Identification	b) Random frequency Identification
c) Radio frequency Identify	d) Random frequency identity
- 3) Publish command message is sent from _____

a) Only publisher to broker	b) Only broker to publisher
c) Publisher to broker and broker to publisher	d) Server to client
- 4) MQTT is _____ protocol.

a) Machine to Machine	b) Internet of Things
c) Machine to Machine and Internet of Things	d) Machine Things
- 5) Why is IPv6 preferred over IPv4 for IoT implementations?

a) Larger addressing range	b) More security
c) Both a and b	d) Neither a or b
- 6) IaaS stands for _____

a) Infrastructure as a Service	b) Infrastructure as a software
c) Internet as a Service	d) Internet as a software
- 7) Reduces the development and running cost of mobile applications on smartphone devices,

a) Infrastructure	b) Productive business
c) Software	d) Services

- 8) In the current market scenario, IoT captures the maximum share in which one of these?
- a) Industry
 - b) Security
 - c) Healthcare
 - d) Home automation
- 9) M2M stands for _____
- a) MAC to MAC communication
 - b) Machine to MAC communication
 - c) Machine to machine communication
 - d) MAC to machine communication
- 10) Embedded C programming language support _____ instructions of normal "C" language.
- a) All
 - b) Some

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) An E-R diagram can graphically represent the _____.
 - a) Physical structure
 - b) Logical structure
 - c) View structure
 - d) Virtual structure
- 2) An entity set that does not have sufficient attributes to form a primary key is a _____.
 - a) strong entity set
 - b) weak entity set
 - c) simple entity set
 - d) primary entity set
- 3) Non leaf nodes of B+- tree structure form a _____.
 - a) Multilevel clustered indices
 - b) Sparse indices
 - c) Multilevel dense indices
 - d) multilevel sparse indices
- 4) A collection of interrelated records is called a _____.
 - a) Database
 - b) Spreadsheet
 - c) Management information system
 - d) Text file
- 5) Data Manipulation Language (DML) is not to _____.
 - a) Create information table in the Database
 - b) Insertion of new information into the Database
 - c) Deletion of information in the Database
 - d) Modification of information in the Database
- 6) The minimal set of super key is called _____.
 - a) Primary key
 - b) Secondary key
 - c) Candidate key
 - d) Foreign key
- 7) A type of query that is placed within a WHERE or HAVING clause of another query is called _____.
 - a) Super query
 - b) Sub query
 - c) Master query
 - d) Multi-query

- 8) In SQL, which command is used to select only one copy of each set of duplicable rows _____
- a) SELECT DISTINCT b) SELECT UNIQUE
c) SELECT DIFFERENT d) All of the above
- 9) A _____ means that one record in a particular record type is related to only one record of another record type.
- a) One-to-one relationship
b) One-to-many relationship
c) Many-to-one relationship
d) Many-to-many relationship
- 10) In SQL, which command(s) is (are) used to enable/disable all triggers on a table?
- a) ALTER TRIGGERS
b) ALTER TABLE
c) MODIFY TRIGGERS IN TABLE
d) All of the above
- 11) In SQL, which command is used to changes data in a table?
- a) UPDATE b) INSERT
c) BROWSE d) APPEND
- 12) An indexing operation _____
- a) Sorts a file using a single key b) Sorts file using two keys
c) Establishes an index for a file d) Both (b) and (c)
- 13) What are ACID properties of Transactions?
- a) Atomicity, Consistency, Isolation, Database
b) Atomicity, Consistency, Isolation, Durability
c) Atomicity, Consistency, Inconsistent, Durability
d) Automatically, Concurrency, Isolation, Durability
- 14) A relation that has no partial dependencies is in which normal form _____
- a) First b) Second
c) Third d) BCNF

Set

P

Fourth Y. (B. Tech) (Sem-I) (Old) (CBCS) Examination: March/April-2024
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Database Management System (197044704)

Day & Date: Saturday 18-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
 2) Figures to the right indicate full marks.

Section – I**Q.2 Attempt any Four. 16**

- a) What is Entity set? and also define Relationship set. List and explain the symbols used to draw ER Diagram.
- b) Explain fundamental and additional relational algebra operations with example.
- c) Explain any four aggregate functions with example.
- d) Explain with example integrity Constraints.
- e) Explain the various transaction states with a neat transaction state diagram.

Q.3 Attempt any One. 06

- a) Write SQL statements for following:
 - 1) Student (Enrno, name, courseId, emailId, cellno)
 - 2) Course (courseId, course_nm, duration)
 - i) Add a column city in student table.
 - ii) Find out list of students who have enrolled in "computer" course.
 - iii) List name of all courses with their duration.
 - iv) List name of all students start with „a".
 - v) List email Id and cell no of all mechanical engineering students.
- b) Consider the following schema
 - 1) Employee (Empid, First_Name, Last_Name, Salary, Department)
 - 2) Write SQL Statements for following Queries.
 - i) Get employee details from employee table whose first name starts with 'J'.
 - ii) Get department, total salary with respect to a department from employee table order by total salary descending.
 - iii) Get First_name from employee table whose salary is more than 10000 and who is from sales department.
 - iv) Find the names of employees whose department and salary is same as employee "Albert king".

Q.4 Attempt the following. 06

What is concurrency control? Explain two-phase locking protocol in detail and list its two drawbacks.

Section – II

Q.5 Attempt any Four**16**

- What is Redundancy? Explain the anomalies in relational database.
- What is static hashing? What rules are followed for index selection?
- Explain difference between B tree and B+ tree indexing.
- What is BCNF? Explain a decomposition example.
- What Is Bigdata? Describe the main features of a big data in detail.

Q.6 Attempt any One.**06**

- Construct appropriate tables for the ER diagram.

E-R diagram for a Car-insurance company

- What is the need for indexing? Explain primary, clustering and secondary index.

Q.7 Attempt the following.**06**

What is Transaction? Explain ACID properties of Transaction in details.

Fourth Y. (B. Tech) (Sem-I) (Old) (CBCS) Examination: March/April-2024
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Database Management System (197044704)

Day & Date: Saturday 18-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) In SQL, which command is used to select only one copy of each set of duplicable rows _____
 - a) SELECT DISTINCT
 - b) SELECT UNIQUE
 - c) SELECT DIFFERENT
 - d) All of the above
- 2) A _____ means that one record in a particular record type is related to only one record of another record type.
 - a) One-to-one relationship
 - b) One-to-many relationship
 - c) Many-to-one relationship
 - d) Many-to-many relationship
- 3) In SQL, which command(s) is (are) used to enable/disable all triggers on a table?
 - a) ALTER TRIGGERS
 - b) ALTER TABLE
 - c) MODIFY TRIGGERS IN TABLE
 - d) All of the above
- 4) In SQL, which command is used to changes data in a table?
 - a) UPDATE
 - b) INSERT
 - c) BROWSE
 - d) APPEND
- 5) An indexing operation _____
 - a) Sorts a file using a single key
 - b) Sorts file using two keys
 - c) Establishes an index for a file
 - d) Both (b) and (c)
- 6) What are ACID properties of Transactions?
 - a) Atomicity, Consistency, Isolation, Database
 - b) Atomicity, Consistency, Isolation, Durability
 - c) Atomicity, Consistency, Inconsistent, Durability
 - d) Automatically, Concurrency, Isolation, Durability
- 7) A relation that has no partial dependencies is in which normal form _____
 - a) First
 - b) Second
 - c) Third
 - d) BCNF

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) In SQL, which command is used to changes data in a table?
 - a) UPDATE
 - b) INSERT
 - c) BROWSE
 - d) APPEND
- 2) An indexing operation _____
 - a) Sorts a file using a single key
 - b) Sorts file using two keys
 - c) Establishes an index for a file
 - d) Both (b) and (c)
- 3) What are ACID properties of Transactions?
 - a) Atomicity, Consistency, Isolation, Database
 - b) Atomicity, Consistency, Isolation, Durability
 - c) Atomicity, Consistency, Inconsistent, Durability
 - d) Automatically, Concurrency, Isolation, Durability
- 4) A relation that has no partial dependencies is in which normal form _____
 - a) First
 - b) Second
 - c) Third
 - d) BCNF
- 5) An E-R diagram can graphically represent the _____
 - a) Physical structure
 - b) Logical structure
 - c) View structure
 - d) Virtual structure
- 6) An entity set that does not have sufficient attributes to form a primary key is a _____.
 - a) strong entity set
 - b) weak entity set
 - c) simple entity set
 - d) primary entity set
- 7) Non leaf nodes of B+- tree structure form a _____.
 - a) Multilevel clustered indices
 - b) Sparse indices
 - c) Multilevel dense indices
 - d) multilevel sparse indices
- 8) A collection of interrelated records is called a _____.
 - a) Database
 - b) Spreadsheet
 - c) Management information system
 - d) Text file

- 9) Data Manipulation Language (DML) is not to _____
- a) Create information table in the Database
 - b) Insertion of new information into the Database
 - c) Deletion of information in the Database
 - d) Modification of information in the Database
- 10) The minimal set of super key is called _____
- a) Primary key
 - b) Secondary key
 - c) Candidate key
 - d) Foreign key
- 11) A type of query that is placed within a WHERE or HAVING clause of another query is called _____
- a) Super query
 - b) Sub query
 - c) Master query
 - d) Multi-query
- 12) In SQL, which command is used to select only one copy of each set of duplicable rows _____
- a) SELECT DISTINCT
 - b) SELECT UNIQUE
 - c) SELECT DIFFERENT
 - d) All of the above
- 13) A _____ means that one record in a particular record type is related to only one record of another record type.
- a) One-to-one relationship
 - b) One-to-many relationship
 - c) Many-to-one relationship
 - d) Many-to-many relationship
- 15) In SQL, which command(s) is (are) used to enable/disable all triggers on a table?
- a) ALTER TRIGGERS
 - b) ALTER TABLE

Database Management System (197044704)

Day & Date: Saturday 18-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
 2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any Four. **16**

- a) What is Entity set? and also define Relationship set. List and explain the symbols used to draw ER Diagram.
- b) Explain fundamental and additional relational algebra operations with example.
- c) Explain any four aggregate functions with example.
- d) Explain with example integrity Constraints.
- e) Explain the various transaction states with a neat transaction state diagram.

Q.3 Attempt any One. **06**

- a) Write SQL statements for following:
 - 1) Student (Enrno, name, courseId, emailId, cellno)
 - 2) Course (courseId, course_nm, duration)
 - i) Add a column city in student table.
 - ii) Find out list of students who have enrolled in "computer" course.
 - iii) List name of all courses with their duration.
 - iv) List name of all students start with „a".
 - v) List email Id and cell no of all mechanical engineering students.
- b) Consider the following schema
 - 1) Employee (Empid, First_Name, Last_Name, Salary, Department)
 - 2) Write SQL Statements for following Queries.
 - i) Get employee details from employee table whose first name starts with 'J'.
 - ii) Get department, total salary with respect to a department from employee table order by total salary descending.
 - iii) Get First_name from employee table whose salary is more than 10000 and who is from sales department.
 - iv) Find the names of employees whose department and salary is same as employee "Albert king".

Q.4 Attempt the following. **06**

What is concurrency control? Explain two-phase locking protocol in detail and list its two drawbacks.

Section – II

Q.5 Attempt any Four**16**

- What is Redundancy? Explain the anomalies in relational database.
- What is static hashing? What rules are followed for index selection?
- Explain difference between B tree and B+ tree indexing.
- What is BCNF? Explain a decomposition example.
- What Is Bigdata? Describe the main features of a big data in detail.

Q.6 Attempt any One.**06**

- Construct appropriate tales for the ER diagram.

E-R diagram for a Car-insurance company

- What is the need for indexing? Explain primary, clustering and secondary index.

Q.7 Attempt the following.**06**

What is Transaction? Explain ACID properties of Transaction in details.

Day & Date: Sunday, 19-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options.

14

- 1) What are the names of the various color image processing categories?
 - a) Pseudo-color and Multi-color processing
 - b) Half-color and pseudo-color processing
 - c) Full-color and pseudo-color processing
 - d) Half-color and full-color processing
- 2) Which of the following image processing approaches is the fastest, most accurate, and flexible?

a) Photographic	b) Electronic
c) Digital	d) Optical
- 3) Which of the following is the abbreviation of JPEG?
 - a) Joint Photographic Experts Group
 - b) Joint Photographs Expansion Group
 - c) Joint Photographic Expanded Group
 - d) Joint Photographic Expansion Group
- 4) Which of the following is/are considered as type(s) of lowpass filters?

a) Ideal	b) Butterworth
c) Gaussian	d) All of the mentioned
- 5) A continuous image is digitised at _____ points.

a) random	b) vertex
c) contour	d) sampling
- 6) The most familiar single sensor used for Image Acquisition is _____.

a) Microdensitometer	b) Photodiode
c) CMOS	d) None of the Mentioned
- 7) What is the method that is used to generate a processed image that have a specified histogram?

a) Histogram linearization	b) Histogram equalization
c) Histogram matching	d) Histogram processing

- 8) Gaussian shape function has no _____.
a) ones b) zeros
c) pixels d) coordinates
- 9) Streaming stored audio/video, files are compressed and stored on a _____.
a) IP b) Server
c) Domain d) Internet
- 10) What are the method for estimation of optical flow?
a) Bayesian method.
b) Gibbs random field motion estimation.
c) Optical flow equation and Second order derivatives of optical flow field.
d) All of above.
- 11) Scanner incorporates a special sort of camera which is made up of _____.
a) Sensor b) Chip
c) laser light d) charged coupled device
- 12) Purpose of restoration is to gain _____.
a) degraded image b) original image
c) pixels d) coordinates
- 13) Which of the following is method of estimating the degradation function?
a) Image observation b) Experimentation
c) Mathematical modeling d) All of above
- 14) 2-D motion, also called _____.
a) Rejected motion b) Projected motion
c) Optical flow motion d) None

Seat No.

**Fourth Y. (B.Tech.) (Sem-I) (Old) (CBCS) Examination: March/April-2024
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Image & Video Processing (197044707)**

Day & Date: Sunday, 19-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever and mention it clearly.

Section – I

- Q.2 Attempt any Four** **16**
- a) Explain in detail sampling and quantization.
 - b) Explain with neat diagram gray level slicing & bit plane slicing.
 - c) Explain Dilation & erosion with Example.
 - d) Explain Discrete Cosine Transform.
 - e) Explain Point, line and edge detection.
- Q.3 Attempt any Two** **12**
- a) Explain Gaussian and Butterworth filters for smoothing and sharpening.
 - b) Explain opening and closing with example.
 - c) Explain Averaging filters, order statistics filters in detail.

Section – II

- Q.4 Attempt any Four** **16**
- a) What are the types of noise models.
 - b) Explain method of Digital video quality measure.
 - c) Explain motion estimation criteria.
 - d) Draw Hierarchical blocks matching Algorithms and explain.
 - e) Explain interlaced scanning in video signals.
- Q.5 Attempt any Two** **12**
- a) Explain restoration using Weiner filters and Inverse filters.
 - b) Explain in detail with one example sampling in two dimensions and three dimensions.
 - c) Difference between 2-D motion Vs optical flow

- 9) Which of the following image processing approaches is the fastest, most accurate, and flexible?
- a) Photographic
 - b) Electronic
 - c) Digital
 - d) Optical
- 10) Which of the following is the abbreviation of JPEG?
- a) Joint Photographic Experts Group
 - b) Joint Photographs Expansion Group
 - c) Joint Photographic Expanded Group
 - d) Joint Photographic Expansion Group
- 11) Which of the following is/are considered as type(s) of lowpass filters?
- a) Ideal
 - b) Butterworth
 - c) Gaussian
 - d) All of the mentioned
- 12) A continuous image is digitised at _____ points.
- a) random
 - b) vertex
 - c) contour
 - d) sampling
- 13) The most familiar single sensor used for Image Acquisition is _____.
- a) Microdensitometer
 - b) Photodiode
 - c) CMOS
 - d) None of the Mentioned
- 14) What is the method that is used to generate a processed image that have a specified histogram?
- a) Histogram linearization
 - b) Histogram equalization
 - c) Histogram matching
 - d) Histogram processing

Set **R**

Fourth Y. (B.Tech.) (Sem-I) (Old) (CBCS) Examination: March/April-2024
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Image & Video Processing (197044707)

Day & Date: Sunday, 19-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options.**14**

- 1) Scanner incorporates a special sort of camera which is made up of _____.
a) Sensor
b) Chip
c) laser light
d) charged coupled device
- 2) Purpose of restoration is to gain _____.
a) degraded image
b) original image
c) pixels
d) coordinates
- 3) Which of the following is method of estimating the degradation function?
a) Image observation
b) Experimentation
c) Mathematical modeling
d) All of above
- 4) 2-D motion, also called _____.
a) Rejected motion
b) Projected motion
c) Optical flow motion
d) None
- 5) What are the names of the various color image processing categories?
a) Pseudo-color and Multi-color processing
b) Half-color and pseudo-color processing
c) Full-color and pseudo-color processing
d) Half-color and full-color processing
- 6) Which of the following image processing approaches is the fastest, most accurate, and flexible?
a) Photographic
b) Electronic
c) Digital
d) Optical
- 7) Which of the following is the abbreviation of JPEG?
a) Joint Photographic Experts Group
b) Joint Photographs Expansion Group
c) Joint Photographic Expanded Group
d) Joint Photographic Expansion Group
- 8) Which of the following is/are considered as type(s) of lowpass filters?
a) Ideal
b) Butterworth
c) Gaussian
d) All of the mentioned

Seat No.	
-----------------	--

**Fourth Y. (B.Tech.) (Sem-I) (Old) (CBCS) Examination: March/April-2024
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Image & Video Processing (197044707)**

Day & Date: Sunday, 19-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever and mention it clearly.

Section – I

- Q.2 Attempt any Four** **16**
- a) Explain in detail sampling and quantization.
 - b) Explain with neat diagram gray level slicing & bit plane slicing.
 - c) Explain Dilation & erosion with Example.
 - d) Explain Discrete Cosine Transform.
 - e) Explain Point, line and edge detection.
- Q.3 Attempt any Two** **12**
- a) Explain Gaussian and Butterworth filters for smoothing and sharpening.
 - b) Explain opening and closing with example.
 - c) Explain Averaging filters, order statistics filters in detail.

Section – II

- Q.4 Attempt any Four** **16**
- a) What are the types of noise models.
 - b) Explain method of Digital video quality measure.
 - c) Explain motion estimation criteria.
 - d) Draw Hierarchical blocks matching Algorithms and explain.
 - e) Explain interlaced scanning in video signals.
- Q.5 Attempt any Two** **12**
- a) Explain restoration using Wiener filters and Inverse filters.
 - b) Explain in detail with one example sampling in two dimensions and three dimensions.
 - c) Difference between 2-D motion Vs optical flow

Seat No.

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.
 4) Assume suitable data wherever and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options. 14

- 1) The most familiar single sensor used for Image Acquisition is _____.
 a) Microdensitometer b) Photodiode
 c) CMOS d) None of the Mentioned
- 2) What is the method that is used to generate a processed image that have a specified histogram?
 a) Histogram linearization b) Histogram equalization
 c) Histogram matching d) Histogram processing
- 3) Gaussian shape function has no _____.
 a) ones b) zeros
 c) pixels d) coordinates
- 4) Streaming stored audio/video, files are compressed and stored on a _____.
 a) IP b) Server
 c) Domain d) Internet
- 5) What are the method for estimation of optical flow?
 a) Bayesian method.
 b) Gibbs random field motion estimation.
 c) Optical flow equation and Second order derivatives of optical flow field.
 d) All of above.
- 6) Scanner incorporates a special sort of camera which is made up of _____.
 a) Sensor b) Chip
 c) laser light d) charged coupled device
- 7) Purpose of restoration is to gain _____.
 a) degraded image b) original image
 c) pixels d) coordinates
- 8) Which of the following is method of estimating the degradation function?
 a) Image observation b) Experimentation
 c) Mathematical modeling d) All of above

- 9) 2-D motion, also called _____.
a) Rejected motion b) Projected motion
c) Optical flow motion d) None
- 10) What are the names of the various color image processing categories?
a) Pseudo-color and Multi-color processing
b) Half-color and pseudo-color processing
c) Full-color and pseudo-color processing
d) Half-color and full-color processing
- 11) Which of the following image processing approaches is the fastest, most accurate, and flexible?
a) Photographic b) Electronic
c) Digital d) Optical
- 12) Which of the following is the abbreviation of JPEG?
a) Joint Photographic Experts Group
b) Joint Photographs Expansion Group
c) Joint Photographic Expanded Group
d) Joint Photographic Expansion Group
- 13) Which of the following is/are considered as type(s) of lowpass filters?
a) Ideal b) Butterworth
c) Gaussian d) All of the mentioned
- 14) A continuous image is digitised at _____ points.
a) random b) vertex
c) contour d) sampling

ELECTRONICS & TELECOMMUNICATION ENGINEERING
Wireless Sensor Network (197044708)**

Day & Date: Sunday, 19-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options. **14**

- 1) WSN are _____ dispersed.

a) Spatially	b) Specially
c) Equivalently	d) None
- 2) Following are application areas of wireless sensor network _____.
 - a) Asset and warehouse management
 - b) Automotive
 - c) Building monitoring and control
 - d) All of above
- 3) They can even use other services such as location tracking using the _____.

a) GPS	b) VPS
c) GPRS	d) GSM
- 4) WSN is built with _____.

a) Switches	b) Nodes
c) Wires	d) Radio
- 5) A radio transceiver in WSN contains which component internally?

a) Antenna	b) Wire
c) Electrode	d) None of the above
- 6) What is the routing algorithm used in MANETs?
 - a) Shortest Path First
 - b) Routing Information Protocol
 - c) Distance Vector Protocol
 - d) Ad hoc On -demand Distance vector protocol
- 7) The hidden terminal problem is known to degrade the throughput of wireless networks due to _____.

a) route break	b) transmission rate
c) delay time	d) collisions
- 8) A sensor node with a processing unit has _____ memory.

a) Limited	b) Minimum
c) Maximum	d) None

Seat No.

Fourth. Y. (B.Tech.) (Sem-I) (Old)(CBCS) Examination: March/April - 2024
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Wireless Sensor Network (197044708)

Day & Date: Sunday, 19-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

- Q.2 Attempt any four of the following** **16**
- a) What are the characteristics requirements of wireless sensor networks?
 - b) Explain various hardware components of single node architecture?
 - c) What are the various services offered by the localization?
 - d) Explain about time synchronization mechanism in wireless sensor network.
 - e) What is wireless sensor network explain in detail architecture?
 - f) Differentiate between active and passive sensors.
- Q.3 Attempt any two of the following** **12**
- a) Write a Note On
 - i) Dynamic energy and power management.
 - ii) Tiny OS
 - iii) Programming models in wireless sensor network.
 - b) What are the various applications of WSN? Explain any two in detail.
 - c) Explain in detail about the different topology control mechanism.

Section – II

- Q.4 Attempt any four of the following** **16**
- a) Explain anyone schedule best protocol.
 - b) What are the characteristics of IEEE 802.15.4?
 - c) What are the different aspects of EMC?
 - d) Explain use of MAC protocols in directional antennas.
 - e) What are the applications of WSN?
 - f) Explain use of WSN in medical applications.
- Q.5 Attempt any two of the following** **12**
- a) Explain concept of low duty cycle in MAC protocol.
 - b) Explain in brief to contention best protocols.
 - c) What are military applications of WSN?

Seat No.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options.

14

- 1) A sensor node with a processing unit has _____ memory.
 - a) Limited
 - b) Minimum
 - c) Maximum
 - d) None
- 2) Additional components of WSN are _____.
 - a) ASICs
 - b) RS232
 - c) USB
 - d) All the above
- 3) WSN communicates with _____ via gateway.
 - a) LAN
 - b) WAN
 - c) Both a and b
 - d) None of the above
- 4) Clock Parameters are _____.
 - a) Clock rate
 - b) Clock offset
 - c) Clock skew
 - d) All of the above
- 5) LEACH is example of _____.
 - a) Contention
 - b) Schedule
 - c) RFID
 - d) None of the above
- 6) Contention-Based Protocols focuses on _____.
 - a) Bandwidth reservation
 - b) Packet scheduling
 - c) Both a) and b)
 - d) None of these.
- 7) WSN in data logging _____ the data.
 - a) Collects
 - b) Monitors
 - c) Distributes
 - d) None of the above
- 8) WSN are _____ dispersed.
 - a) Spatially
 - b) Specially
 - c) Equivalently
 - d) None

- 9) Following are application areas of wireless sensor network _____.
a) Asset and warehouse management
b) Automotive
c) Building monitoring and control
d) All of above
- 10) They can even use other services such as location tracking using the _____.
a) GPS
b) VPS
c) GPRS
d) GSM
- 11) WSN is built with _____.
a) Switches
b) Nodes
c) Wires

 Time: 03:00 PM To 05:00 PM

Max. Marks: 50

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.
 4) Consider data whenever necessary.

MCQ/Objective Type Questions

Duration: 20 Minutes

Marks:10

Q.1 Choose the correct alternatives from the given options.

10

- 1) A Sensor Network must contain _____.
 - a) Battery
 - b) Communication Network
 - c) Memory
 - d) All of above
- 2) What are the application areas of WSN?
 - a) Warehouse Management
 - b) Automobile
 - c) Healthcare
 - d) All of above
- 3) AD-hoc Mode of WSN is known as _____ mode.
 - a) router
 - b) roaming
 - c) infrastructure
 - d) digital
- 4) Each Sensor Node is equipped with _____.
 - a) Only one sensing device
 - b) One or more sensing devices
 - c) Only more than one sensing device
 - d) No sensing devices attached
- 5) The challenges we faced in designing WSN system and applications including _____.
 - a) limited hardware
 - b) limited support for network
 - c) limited sources for software development
 - d) All of above
- 6) Malware means _____.
 - a) small software
 - b) instruction
 - c) block diagram
 - d) none
- 7) RFID Consists of _____.
 - a) RFID Reader
 - b) RFID Tag
 - c) Both a and b
 - d) None
- 8) What are the different kinds of RFID tags _____.
 - a) Active
 - b) Passive
 - c) Semi-Passive
 - d) All of above

- 9) Which RFID Tag has don't have its own power supply _____.
- a) Active
 - b) Passive
 - c) Semi-Passive
 - d) All of above
- 10) The directivity of an isotropic antenna is equal to _____.
- a) zero
 - b) infinity
 - c) one
 - d) None of these

ELECTRONICS & TELECOMMUNICATION ENGINEERING
Wireless Sensor Networks (BTN06802)

Day & Date: Thursday, 09-05-2024
Time: 03:00 PM To 05:00 PM

Max. Marks: 40

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Consider data whenever necessary.

Section – I

- Q.2 Attempt any two of the following. 08**
- a) Explain the challenges of Wireless Sensor Networks.
 - b) Explain Hardware components of Single Node architecture with suitable diagram.
 - c) Explain the Operating System for WSN.
- Q.3 Attempt any two of the following. 12**
- a) For Sensor Network Scenario, explain Single Hop and multiple Hop networks.
 - b) Explain Wireless sensor Network with suitable diagram.
 - c) Explain the applications of Wireless Sensor Networks.

Section – II

- Q.4 Attempt any two of the following. 08**
- a) Explain MAC layer in WSN.
 - b) Why energy management is required in WSN.
 - c) Explain RFID with suitable diagram.
- Q.5 Attempt any two of the following. 12**
- a) Explain Application of RFID in healthcare application with suitable example.
 - b) Explain the Aspects of EMC.
 - c) What is malicious Node? Explain it.

- 10)** The challenges we faced in designing WSN system and applications including _____.
- a) limited hardware
 - b) limited support for network
 - c) limited sources for software development
 - d) All of above

Seat No.	
-----------------	--

Set Q

Fourth Y. (B.Tech.) (Sem-II) (New) (CBCS) Examination: March/April-2024
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Wireless Sensor Networks (BTN06802)

Day & Date: Thursday, 09-05-2024
Time: 03:00 PM To 05:00 PM

Max. Marks: 40

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Consider data whenever necessary.

Section – I

- Q.2 Attempt any two of the following. 08**
- a) Explain the challenges of Wireless Sensor Networks.
 - b) Explain Hardware components of Single Node architecture with suitable diagram.
 - c) Explain the Operating System for WSN.
- Q.3 Attempt any two of the following. 12**
- a) For Sensor Network Scenario, explain Single Hop and multiple Hop networks.
 - b) Explain Wireless sensor Network with suitable diagram.
 - c) Explain the applications of Wireless Sensor Networks.

**Fourth Y. (B.Tech.) (Sem-II) (New) (CBCS) Examination: March/April-2024
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Wireless Sensor Networks (BTN06802)**

Day & Date: Thursday, 09-05-2024
Time: 03:00 PM To 05:00 PM

Max. Marks: 50

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Consider data whenever necessary.

MCQ/Objective Type Questions

Duration: 20 Minutes

Marks:10

Q.1 Choose the correct alternatives from the given options. 10

- 1) Which RFID Tag has don't have its own power supply _____.
 - a) Active
 - b) Passive
 - c) Semi-Passive
 - d) All of above
- 2) The directivity of an isotropic antenna is equal to _____.
 - a) zero
 - b) infinity
 - c) one
 - d) None of these
- 3) A Sensor Network must contain _____.
 - a) Battery
 - b) Communication Network
 - c) Memory
 - d) All of above
- 4) What are the application areas of WSN?
 - a) Warehouse Management
 - b) Automobile
 - c) Healthcare
 - d) All of above
- 5) AD-hoc Mode of WSN is known as _____ mode.
 - a) router
 - b) roaming
 - c) infrastructure
 - d) digital
- 6) Each Sensor Node is equipped with _____.
 - a) Only one sensing device
 - b) One or more sensing devices
 - c) Only more than one sensing device
 - d) No sensing devices attached
- 7) The challenges we faced in designing WSN system and applications including _____.
 - a) limited hardware
 - b) limited support for network
 - c) limited sources for software development
 - d) All of above
- 8) Malware means _____.
 - a) small software
 - b) instruction
 - c) block diagram
 - d) none

- 9)** RFID Consists of _____.
- | | |
|-----------------|-------------|
| a) RFID Reader | b) RFID Tag |
| c) Both a and b | d) None |
- 10)** What are the different kinds of RFID tags _____.
- | | |
|-----------------|-----------------|
| a) Active | b) Passive |
| c) Semi-Passive | d) All of above |

Seat No.

Set S

Fourth Y. (B.Tech.) (Sem-II) (New) (CBCS) Examination: March/April-2024
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Wireless Sensor Networks (BTN06802)

Day & Date: Thursday, 09-05-2024
Time: 03:00 PM To 05:00 PM

Max. Marks: 40

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Consider data whenever necessary.

Section – I

- Q.2 Attempt any two of the following. 08**
- a) Explain the challenges of Wireless Sensor Networks.
 - b) Explain Hardware components of Single Node architecture with suitable diagram.
 - c) Explain the Operating System for WSN.
- Q.3 Attempt any two of the following. 12**
- a) For Sensor Network Scenario, explain Single Hop and multiple Hop networks.
 - b) Explain Wireless sensor Network with suitable diagram.
 - c) Explain the applications of Wireless Sensor Networks.

Section – II

- Q.4 Attempt any two of the following. 08**
- a) Explain MAC layer in WSN.
 - b) Why energy management is required in WSN.
 - c) Explain RFID with suitable diagram.
- Q.5 Attempt any two of the following. 12**
- a) Explain Application of RFID in healthcare application with suitable example.
 - b) Explain the Aspects of EMC.
 - c) What is malicious Node? Explain it.

- 8) The carrier to noise ratio for a satellite depends upon _____.
- a) Effective Isotropic Radiated power
 - b) Bandwidth
 - c) Free space path losses
 - d) All of them
- 9) What is sidereal time?
- a) Sidereal time is time measured relative to the fixed stars. It will be seen that one complete rotation sidereal time relative to the sun .This is because the earth moves in its orbit around the sun.
 - b) Sidereal time is time measured relative to the variable stars. It will be seen that one complete rotation sidereal time relative to the sun .This is because the earth moves in its orbit around the sun.
 - c) Sidereal time is time measured relative to the fixed stars. It will be seen that one complete rotation sidereal time relative to the moon. This is because the earth moves in its orbit around the moon.
 - d) None of above
- 10) What is an EIRP?
- a) It is a measure of radiated or transmitted power of an antenna. It can be completed from the antenna gain & the power fed to the antenna input.
 - b) It is a measure of radiated or transmitted power of an antenna. It can be completed from the antenna gain & the power fed from the antenna output.
 - c) Either a or b
 - d) None of above

Set P

Fourth Y. (B.Tech.) (Sem-II) (New) (CBCS) Examination: March/April-2024
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Satellite Communication (BTN06803)

Day & Date: Thursday, 09-05-2024
Time: 03:00 PM To 05:00 PM

Max. Marks: 40

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any two of the following. 08

- a) Explain the Three Kepler Law of motion.
- b) Write a note on atmospheric Losses.
- c) Explain the Antenna look angles for satellite with a neat diagram.

Q.3 Attempt any two of the following. 12

- a) Explain in details Polar orbiting satellite.
- b) Write a note on Rain attenuation and other propagation Impairments for satellite.
- c) Explain the different Launching orbits of ISRO.

Section – II

Q.4 Attempt any two of the following. 08

- a) Explain the Spin satellite Stabilization Process.
- b) Write a note on different Transmission Losses.
- c) What is significant of Carrier to noise ratio in Link budget design explain in brief?

Q.5 Attempt any two of the following. 12

- a) Explain how to calculate the Link Power Budget for both uplink and downlink.
- b) Write a brief note on TT&C Sub-system of satellite.
- c) Explain Receive only Home TV system.

Seat No.

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 20 Minutes

Marks:10

Q.1 Choose the correct alternatives from the given options. 10

- 1) Calculate the radius of a circular orbit for which the period is 1 day?
 - a) 42.241 Km
 - b) 42.241 m
 - c) 4.241 Km
 - d) 2.241 Km
- 2) Ascending node?
 - a) The point longest from earth
 - b) The point closest approach to earth
 - c) The point where the orbit crosses the equatorial plane going from south to north
 - d) None of the above
- 3) The carrier to noise ratio for a satellite depends upon _____.
 - a) Effective Isotropic Radiated power
 - b) Bandwidth
 - c) Free space path losses
 - d) All of them
- 4) What is sidereal time?
 - a) Sidereal time is time measured relative to the fixed stars. It will be seen that one complete rotation sidereal time relative to the sun .This is because the earth moves in its orbit around the sun.
 - b) Sidereal time is time measured relative to the variable stars. It will be seen that one complete rotation sidereal time relative to the sun .This is because the earth moves in its orbit around the sun.
 - c) Sidereal time is time measured relative to the fixed stars. It will be seen that one complete rotation sidereal time relative to the moon. This is because the earth moves in its orbit around the moon.
 - d) None of above

- 5) What is an EIRP?
- a) It is a measure of radiated or transmitted power of an antenna. It can be completed from the antenna gain & the power fed to the antenna input.
 - b) It is a measure of radiated or transmitted power of an antenna. It can be completed from the antenna gain & the power fed from the antenna output.
 - c) Either a or b
 - d) None of above
- 6) The Height of Geostationary satellite is _____.
- a) 35930 Km
 - b) 45930
 - c) 55930
 - d) none of above
- 7) With reference to satellite orbit the perigee is _____.
- a) Point in an intermediate orbit
 - b) Highest point in the orbit
 - c) Lowest Point in orbit
 - d) None of above
- 8) A television (TV) transmission is an example of which type of transmission?
- a) Simplex
 - b) Half duplex
 - c) Full duplex
 - d) None of the above
- 9) INTELSAT stands?
- a) International Telecommunications Satellite
 - b) India Telecommunications Satellite
 - c) Inter Telecommunications Satellite
 - d) None of the above
- 10) For an elliptical orbit?
- a) $e < 0$
 - b) $0 < e < 1$
 - c) $e = 1$
 - d) None of the above

Seat No.

MCQ/Objective Type Questions

Duration: 20 Minutes

Marks: 10

Q.1 Choose the correct alternatives from the options. 10

- 1) EV and HEV has following components common except _____.
 - a) Battery
 - b) ECU
 - c) Generator
 - d) Internal Combustion Engine
- 2) A Plug-in Hybrid EV is different from Conventional Hybrid EV because it has _____.
 - a) Built in Battery Charger
 - b) Li Ox battery
 - c) more batteries
 - d) Bigger motor generator
- 3) EVSE stands for _____.
 - a) Electrical Vehicle Supply Equipment
 - b) Could be AC or DC
 - c) Used for charging
 - d) All
- 4) Latest EV launched by TATA motors _____.
 - a) Tigor EV
 - b) Kona
 - c) Chetak
 - d) Nexon EV
- 5) What affect do petrol and diesel engines have on the environment?
 - a) They help deplete natural resources and contribute to increasing CO₂ emissions
 - b) They help deplete natural resources and reduce CO₂ emissions
 - c) They contribute to increasing CO₂ emissions but help reduce global warming
 - d) None all of above
- 6) This battery is not suitable for EVs _____.
 - a) Li ion battery
 - b) Na Ni Cl battery
 - c) NaS battery
 - d) Lead Acid Battery
- 7) There are _____ methods of battery charging.
 - a) Three
 - b) Two
 - c) One
 - d) Four

- 8) Active Safety includes _____.
- a) Anti-Lock Breaking System (ABS)
 - b) Air bags
 - c) Headrest
 - d) All
- 9) Which of the following is common voltage of Battery?
- a) 2 V
 - b) 10 V
 - c) 12 V
 - d) 25 V
- 10) Which of the following is provided to charge the battery constantly?
- a) Generator
 - b) ECU
 - c) Ignition coil
 - d) Fuse box

Seat No.

Set P

Fourth Y. (B.Tech.) (Sem-II) (New) (CBCS) Examination: March/April-2024
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Electric Vehicles (BTN06805)

Day & Date: Saturday, 11-05-2024
Time: 03:00 PM To 05:00 PM

Max. Marks: 40

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Consider data whenever necessary.

Section – I

- Q.2 Attempt any two. 08**
a) Explain the Types of EVs.
b) Compare Patrol/ Diesel Vehicle and Electrical Vehicle.
c) Explain Brushless DC Electric Motor.
- Q.3 Attempt any two. 12**
a) Draw and explain Hybrid Electrical Vehicle with suitable diagram.
b) Explain Construction and working of Permanent magnet synchronous Motors with suitable diagram.
c) Give details of leading companies in two and four wheeler for EVS.

Section – II

- Q.4 Attempt any two. 08**
a) Explain with suitable diagram about Lead acid battery.
b) Explain the terms regarding EV - Safety, Testing
c) Give the selection Criteria for EVs.
- Q.5 Attempt any two. 12**
a) Explain with suitable diagram about Lithium-Ion Battery Management Systems.
b) Explain with suitable diagram about charging station and its requirements.
c) Explain in general the charger technology used in EV battery charger.

Seat No.	
----------	--

Set **Q**

**Fourth Y. (B.Tech.) (Sem-II) (New) (CBCS) Examination: March/April-2024
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Electric Vehicles (BTN06805)**

Day & Date: Saturday, 11-05-2024
Time: 03:00 PM To 05:00 PM

Max. Marks: 50

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Consider data whenever necessary.

MCQ/Objective Type Questions

Duration: 20 Minutes

Marks: 10

Q.1 Choose the correct alternatives from the options. **10**

- 1) This battery is not suitable for EVs _____.
 - a) Li ion battery
 - b) Na Ni Cl battery
 - c) NaS battery
 - d) Lead Acid Battery
- 2) There are _____ methods of battery charging.
 - a) Three
 - b) Two
 - c) One
 - d) Four
- 3) Active Safety includes _____.
 - a) Anti-Lock Breaking System (ABS)
 - b) Air bags
 - c) Headrest
 - d) All
- 4) Which of the following is common voltage of Battery?
 - a) 2 V
 - b) 10 V
 - c) 12 V
 - d) 25 V
- 5) Which of the following is provided to charge the battery constantly?
 - a) Generator
 - b) ECU
 - c) Ignition coil
 - d) Fuse box
- 6) EV and HEV has following components common except _____.
 - a) Battery
 - b) ECU
 - c) Generator
 - d) Internal Combustion Engine
- 7) A Plug-in Hybrid EV is different from Conventional Hybrid EV because it has _____.
 - a) Built in Battery Charger
 - b) Li Ox battery
 - c) more batteries
 - d) Bigger motor generator
- 8) EVSE stands for _____.
 - a) Electrical Vehicle Supply Equipment
 - b) Could be AC or DC
 - c) Used for charging
 - d) All

- 9) Latest EV launched by TATA motors _____.
- | | |
|-------------|-------------|
| a) Tigor EV | b) Kona |
| c) Chetak | d) Nexon EV |
- 10) What affect do petrol and diesel engines have on the environment?
- a) They help deplete natural resources and contribute to increasing CO₂ emissions
 - b) They help deplete natural resources and reduce CO₂ emissions
 - c) They contribute to increasing CO₂ emissions but help reduce global warming
 - d) None all of above

Seat No.

Set Q

Fourth Y. (B.Tech.) (Sem-II) (New) (CBCS) Examination: March/April-2024
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Electric Vehicles (BTN06805)

Day & Date: Saturday, 11-05-2024
Time: 03:00 PM To 05:00 PM

Max. Marks: 40

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Consider data whenever necessary.

Section – I

- Q.2 Attempt any two. 08**
a) Explain the Types of EVs.
b) Compare Petrol/ Diesel Vehicle and Electrical Vehicle.
c) Explain Brushless DC Electric Motor.
- Q.3 Attempt any two. 12**
a) Draw and explain Hybrid Electrical Vehicle with suitable diagram.
b) Explain Construction and working of Permanent magnet synchronous Motors with suitable diagram.
c) Give details of leading companies in two and four wheeler for EVs.

Section – II

- Q.4 Attempt any two. 08**
a) Explain with suitable diagram about Lead acid battery.
b) Explain the terms regarding EV - Safety, Testing
c) Give the selection Criteria for EVs.
- Q.5 Attempt any two. 12**
a) Explain with suitable diagram about Lithium-Ion Battery Management Systems.
b) Explain with suitable diagram about charging station and its requirements.
c) Explain in general the charger technology used in EV battery charger.

2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Consider data whenever necessary.

MCQ/Objective Type Questions

Duration: 20 Minutes

Marks: 10

Q.1 Choose the correct alternatives from the options. 10

- 1) Which of the following is common voltage of Battery?

a) 2 V	b) 10 V
c) 12 V	d) 25 V
- 2) Which of the following is provided to charge the battery constantly?

a) Generator	b) ECU
c) Ignition coil	d) Fuse box
- 3) EV and HEV has following components common except _____.

a) Battery	b) ECU
c) Generator	d) Internal Combustion Engine
- 4) A Plug-in Hybrid EV is different from Conventional Hybrid EV because it has _____.

a) Built in Battery Charger	b) Li Ox battery
c) more batteries	d) Bigger motor generator
- 5) EVSE stands for _____.

a) Electrical Vehicle Supply Equipment
b) Could be AC or DC
c) Used for charging
d) All
- 6) Latest EV launched by TATA motors _____.

a) Tigor EV	b) Kona
c) Chetak	d) Nexon EV
- 7) What affect do petrol and diesel engines have on the environment?

a) They help deplete natural resources and contribute to increasing CO ₂ emissions
b) They help deplete natural resources and reduce CO ₂ emissions
c) They contribute to increasing CO ₂ emissions but help reduce global warming
d) None all of above

- 8) This battery is not suitable for EVs _____.
- | | |
|-------------------|----------------------|
| a) Li ion battery | b) Na Ni Cl battery |

MCQ/Objective Type Questions

Duration: 20 Minutes

Marks:10

Q.1 Multiple Choice Questions.

10

- 1) A servo motor is a typical example of _____.
 - a) Electronics system
 - b) Mechanical system
 - c) Computer system
 - d) Mechatronics system
- 2) What is the function of an input signal conditioning unit?
 - a) To produce control signals
 - b) To amplify the signal and convert it into digital form
 - c) To perform mechanical work
 - d) To produce electrical signals
- 3) PLC Operates on following signals _____.
 - a) Digital
 - b) Impulse
 - c) Analog
 - d) Frequency
- 4) EQU, LES, LEQ instructions are examples of which of the following instructions?
 - a) Comparison Instructions
 - b) Sequencing Instructions
 - c) Data Handling Instructions
 - d) Composite Instructions
- 5) Micro-Electro-Mechanical Systems (MEMS) consists of _____.
 - a) microelectronic elements
 - b) actuators, sensors
 - c) mechanical structures
 - d) all of the above
- 6) Point out the wrong statement.
 - a) MEMS stands for micro-electro-mechanical-systems
 - b) MEMS as a class can be between 1000 and 100000 micrometers in size
 - c) Several MEMS are packaged in smartphones
 - d) All of the mentioned
- 7) Smallest change which a sensor can detect is _____.
 - a) Resolution
 - b) Accuracy
 - c) Precision
 - d) Scale

- 8) Thermocouple is a type of sensor that generate output voltage according to _____.
- | | |
|-----------------------|-------------|
| a) Circuit parameters | b) Humidity |
| c) Temperature | d) Voltage |
- 9) Where is the feedback generated by sensors in a mechatronics system given?
- | | |
|-------------------------|-------------------|
| a) Input sensors | b) Comparators |
| c) Mechanical actuators | d) Output sensors |
- 10) Which type of motion is transmitted by hydraulic actuators?
- | | |
|------------------|----------------------|
| a) linear motion | b) rotary motion |
| c) both a and b | d) none of the above |

**Fourth Y. (B.Tech.) (Sem-II) (New) (CBCS) Examination: March/April-2024
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Mechatronics (BTN06806)**

Day & Date: Saturday, 11-05-2024
Time: 03:00 PM To 05:00 PM

Max. Marks: 40

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve Any Two of the Following. 08

- Draw generalized block diagram of mechatronics systems and write short note on following key elements of system
i) Sensors ii) Actuators
- Draw and describe PLC architecture in detail
- What is MEMS? State advantages, disadvantages and applications of MEMS in brief.

Q.3 Solve Any Two of the Following. 12

- Describe the applications of Mechatronics in modern automobile industries with proper examples.
- Compare between PLC & PC Based control systems.
- Explain operation of PLC based bottle filling plant using ladder logic.

Section – II

Q.4 Solve Any Two of the Following. 08

- Compare between sensors & actuators
- Describe the various factors considered while selecting a sensor for a particular application.
- Classify Actuators and compare between Hydraulic and pneumatic actuators.

Q.5 Solve Any Two of the Following. 12

- Describe operating principle of AC servo motor with proper diagram and characteristics.
- Describe the operation of Gyroscope with Proper diagram. Also State its applications.
- What are piezoelectric actuators? How does it work? Enlist its various applications.

- a) linear motion
 - b) rotary motion
 - c) both a and b
 - d) none of the above
- 9) A servo motor is a typical example of _____.
- a) Electronics system
 - b) Mechanical system
 - c) Computer system
 - d) Mechatronics system
- 10) What is the function of an input signal conditioning unit?
- a) To produce control signals
 - b) To amplify the signal and convert it into digital form
 - c) To perform mechanical work
 - d) To produce electrical signals

Set S

Fourth Y. (B.Tech.) (Sem-II) (New) (CBCS) Examination: March/April-2024
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Mechatronics (BTN06806)

Day & Date: Saturday, 11-05-2024
Time: 03:00 PM To 05:00 PM

Max. Marks: 40

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve Any Two of the Following. 08

- Draw generalized block diagram of mechatronics systems and write short note on following key elements of system
i) Sensors ii) Actuators
- Draw and describe PLC architecture in detail
- What is MEMS? State advantages, disadvantages and applications of MEMS in brief.

Q.3 Solve Any Two of the Following. 12

- Describe the applications of Mechatronics in modern automobile industries with proper examples.
- Compare between PLC & PC Based control systems.
- Explain operation of PLC based bottle filling plant using ladder logic.

Section – II

Q.4 Solve Any Two of the Following. 08

- Compare between sensors & actuators
- Describe the various factors considered while selecting a sensor for a particular application.
- Classify Actuators and compare between Hydraulic and pneumatic actuators.

Q.5 Solve Any Two of the Following. 12

- Describe operating principle of AC servo motor with proper diagram and characteristics.
- Describe the operation of Gyroscope with Proper diagram. Also State its applications.
- What are piezoelectric actuators? How does it work? Enlist its various applications.

Seat No.	
-------------	--

Fourth Y. (B.Tech.) (Sem-II) (Old) (CBCS) Examination: March/April-2024
ELECTRONIC AND TELECOMMUNICATION ENGINEERING
Microwave Engineering (197044801)

Day & Date: Thursday 09-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
 2) Figures to the right indicate full marks.
 3) Assume suitable data if necessary.

Section – I

Q.2 Attempt any three questions. 12

- a) State the importance of scattering matrix and explain the properties of scattering matrix.
- b) State the significance of cut off frequency in rectangular waveguide. Derive the expression for cut off frequency.
- c) Find the ABCD parameters of a two port network consisting of a series impedance Z between ports 1 and 2.
- d) Explain in brief about parallel strip line and coplanar strip line.

Q.3 Attempt any two questions. 16

- a) Draw the construction of E plane Tee. Why it is called as E plane Tee? Explain working of E plane Tee with scattering matrix.
- b) Define TE mode in rectangular waveguide. State the conditions for TE mode. Derive the wave equation for TE mode.
- c) What is Faraday rotation principle? State microwave devices which make use of faraday rotation. Explain any one in detail.

Section – II

Q.4 Attempt any three questions. 12

- a) Draw and explain in brief working of Two cavity klystron amplifier with Applegate diagram.
- b) What is avalanche transit time effect? How it is achieved in IMPATT diode.
- c) State the methods used for attenuation measurement. Explain any one in detail.
- d) State the methods used for impedance measurement. Draw and explain the set up for impedance measurement using Reflectometer.

Q.5 Attempt any two questions.

- a) Why slow wave structures are required in TWT. Draw different slow wave structures used for travelling wave tube. Compare Two cavity klystron and TWT.
- b) Define negative resistance principle used for semiconductor microwave devices. State methods used to achieve negative resistance. Explain how negative resistance can be achieved using TED.
- c) A normal cylindrical magnetron has following operating parameters.
Inner Radius $a=0.15\text{m}$, Outer radius $b=0.45\text{m}$, Magnetic flux density $B_0=1.2\text{mwb/m}^2$
 - 1) Determine the Hull cut off voltage.
 - 2) Determine the cut off magnetic flux density if the beam voltage V_0 as 6000V .
 - 3) Determine the cyclotron frequency in GHz.

Seat No.	
----------	--

**Fourth Y. (B.Tech.) (Sem-II) (Old) (CBCS) Examination: March/April-2024
ELECTRONIC AND TELECOMMUNICATION ENGINEERING
Microwave Engineering (197044801)**

Day & Date: Thursday 09-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) In magnetron electric and magnetic field are _____ to each other.
 - a) Perpendicular
 - b) Parallel
 - c) Coupled
 - d) Synchronous
- 2) The optimum transit time in case of reflex klystron is _____.
 - a) $T = n + 3/2$
 - b) $T = n + 3/4$
 - c) $T = n + 1/4$
 - d) $T = 2n + 1/4$
- 3) The semiconductor diode which can be used in switching circuit at microwave range is _____.
 - a) PIN diode
 - b) Varactor diode
 - c) Tunnel diode
 - d) Gunn diode
- 4) For lossless network, impedance and admittance matrices are _____.
 - a) real
 - b) pure imaginary
 - c) complex
 - d) rational
- 5) The voltage equation for a 2 port network that can be represented as a matrix is _____.
 - a) $V_1 = AV_2 + BI_2$
 - b) $V_1 = CV_2 + DI_2$
 - c) $V_1 = BV_2 + AI_2$
 - d) $V_1 = DV_2 + CI_2$
- 6) S parameters are expressed as a ratio of:
 - a) Voltage and current
 - b) Impedance at different ports
 - c) Incident and the reflected voltage waves
 - d) None of the mentioned
- 7) Accurate measurement of attenuation can be done by _____ method.
 - a) Power Ratio
 - b) RF substitution
 - c) using magic Tee
 - d) using slotted line
- 8) E plane tee is called _____.
 - a) current divider
 - b) power device
 - c) 3 dB splitter
 - d) reciprocal device

- a) current divider
 - b) power device
 - c) 3 dB splitter
 - d) reciprocal device
- 11) The power between 10mw to 1w can be measured by _____ technique.
- a) Bolometer
 - b) Thermister
 - c) Calorimetric wattmeter
 - d) Caloremtric Technique
- 12) In Rectangular waveguide lower order modes are not present in _____.
- a) TE
 - b) TM
 - c) TEM
 - d) TE and TM
- 13) The spacing between the centers of two hole directional coupler must be _____.
- a) $(n + 1)\lambda/4$
 - b) $(n + 2)\lambda/4$
 - c) $(2n + 1)\lambda/4$
 - d) $n\lambda/4$
- 14) In TWT electron beam is _____ and RF field is _____.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) The drain current is varied by _____.
 - a) Gate to source voltage
 - b) Gate current
 - c) Source voltage
 - d) None of the mentioned
- 2) The n-MOSFET is working as accumulation mode when _____.
 - a) Gate is applied with positive voltage
 - b) Gate is grounded
 - c) Gate is applied with negative voltage
 - d) Gate is connected to source
- 3) CMOS inverter circuit has pair of transistors which are _____.
 - a) Two PMOS
 - b) Two BJT
 - c) Two NMOS
 - d) Two complementary CMOS
- 4) Threshold voltage of PMOS and NMOS in CMOS inverter is _____.
 - a) Equal in magnitude
 - b) Opposite in magnitude
 - c) Infinite in magnitude
 - d) Zero
- 5) CMOS inverter has _____ regions of operation.
 - a) Three
 - b) Four
 - c) Two
 - d) Five
- 6) If n transistor conducts and has large voltages between source & drain, then it is said to be in _____ region.
 - a) Linear
 - b) Saturation
 - c) None saturation
 - d) Cut off
- 7) Mobility depends upon _____.
 - a) Transverse electric field
 - b) V_g
 - c) V_{dd}
 - d) Channel length

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section – I

- Q.2 Attempt any Four. 16**
a) Explain the physical structure of MOS transistor with neat diagram.
b) Write MOS device design equations.
c) Explain MOS layers with neat diagram.
d) Explain the Technology Scaling in detail.
e) Write a short note in Retired logic.
- Q.3 Attempt any two. 12**
a) Draw and explain with neat graph accumulation, depletion and inversion modes.
b) Draw and explain stick diagram.
c) Explain with neat diagram pass transistor logic.

Section – II

- Q.4 Attempt any four. 16**
a) Explain in detail multiplexer based latches.
b) Explain static SR flip-flop.
c) Explain Timing classification.
d) Explain synchronous interconnect.
e) Explain designing fast multiplier.
- Q.5 Attempt any two. 12**
a) Explain static latches and register, write Bistability principle.
b) Write detail of synchronous design - clock skew, jitter.
c) Explain designing fast adder with neat diagram.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) CMOS inverter has _____ output impedance.
 - a) low
 - b) high
 - c) very high
 - d) None of mentioned
- 2) Increasing fan out _____ the propagation delay.
 - a) increases
 - b) decreases
 - c) does not affect
 - d) exponentially
- 3) If $\beta_n = \beta_p$, then V_{in} is equal to _____.
 - a) V_{dd}
 - b) V_{ss}
 - c) $2 V_{dd}$
 - d) $0.5 V_{dd}$
- 4) _____ are example of combinational circuit.
 - a) Shift register
 - b) Multiplexers
 - c) Counters
 - d) Flip-flops
- 5) As compared to TTL, CMOS logic has _____.
 - a) high speed of operation
 - b) higher power dissipation
 - c) smaller physical size
 - d) None of the above
- 6) The cross coupling of two inverter creates a _____ circuit called Hip Hop.
 - a) bistable
 - b) metastable
 - c) Both of above
 - d) None of above
- 7) When there is no clock signal is applied to CMOS logic circuit, are referred to as _____.
 - a) Complex CMOS logic circuit
 - b) Static CMOS logic circuits
 - c) NMOS transmission gate
 - d) Random PMOS logic circuit
- 8) The drain current is varied by _____.
 - a) Gate to source voltage
 - b) Gate current
 - c) Source voltage
 - d) None of the mentioned

- 9) The n-MOSFET is working as accumulation mode when _____.
a) Gate is applied with positive voltage
b) Gate is grounded
c) Gate is applied with negative voltage
d) Gate is connected to source
- 10) CMOS inverter circuit has pair of transistors which are _____.
a) Two PMOS
b) Two BJT
c) Two NMOS
d) Two complementary CMOS
- 11) Threshold voltage of PMOS and NMOS in CMOS inverter is _____.

 - a) Complex CMOS logic circuit
 - b) Static CMOS logic circuits
 - c) NMOS transmission gate
 - d) Random PMOS logic circuit
- 5) The drain current is varied by _____.
 - a) Gate to source voltage
 - b) Gate current
 - c) Source voltage
 - d) None of the mentioned
- 6) The n-MOSFET is working as accumulation mode when _____.
 - a) Gate is applied with positive voltage
 - b) Gate is grounded
 - c) Gate is applied with negative voltage
 - d) Gate is connected to source
- 7) CMOS inverter circuit has pair of transistors which are _____.
 - a) Two PMOS
 - b) Two BJT
 - c) Two NMOS
 - d) Two complementary CMOS
- 8) Threshold voltage of PMOS and NMOS is CMOS inverter is _____.
 - a) Equal in magnitude
 - b) Opposite in magnitude
 - c) Infinite in magnitude
 - d) Zero

Set R

**Fourth Y. (B.Tech.) (Sem-II) (Old) (CBCS) Examination: March/April-2024
ELECTRONICS AND TELECOMMUNICATION ENGINEERING
CMOSVLSI Design (197044802)**

Day & Date: Friday 10-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section – I

- Q.2 Attempt any Four. 16**
- a) Explain the physical structure of MOS transistor with neat diagram.
 - b) Write MOS device design equations.
 - c) Explain MOS layers with neat diagram.
 - d) Explain the Technology Scaling in detail.
 - e) Write a short note in Retired logic.
- Q.3 Attempt any two. 12**
- a) Draw and explain with neat graph accumulation, depletion and inversion modes.
 - b) Draw and explain stick diagram.
 - c) Explain with neat diagram pass transistor logic.

Section – II

- Q.4 Attempt any four. 16**
- a) Explain in detail multiplexer based latches.
 - b) Explain static SR flip-flop.
 - c) Explain Timing classification.
 - d) Explain synchronous interconnect.
 - e) Explain designing fast multiplier.
- Q.5 Attempt any two. 12**
- a) Explain static latches and register, write Bistability principle.
 - b) Write detail of synchronous design - clock skew, jitter.
 - c) Explain designing fast adder with neat diagram.

Seat No.	
----------	--

**Fourth Y. (B.Tech.) (Sem-II) (Old) (CBCS) Examination: March/April-2024
ELECTRONICS AND TELECOMMUNICATION ENGINEERING
CMOSVLSI Design (197044802)**

Day & Date: Friday 10-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:**
- 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 - 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 - 3) Figures to the right indicates full marks.
 - 4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) If n transistor conducts and has large voltages between source & drain, then it is said to be in _____ region.

a) Liner	b) Saturation
c) None saturation	d) Cut off
- 2) Mobility depends upon _____.

a) Transverse electric field	b) V_g
c) V_{dd}	d) Channel length
- 3) CMOS inverter has _____ output impedance.

a) low	b) high
c) very high	d) None of mentioned
- 4) Increasing fan out _____ the propagation delay.

a) increases	b) decreases
c) does not affect	d) exponentially
- 5) If $\beta_n = \beta_p$, then V_{in} is equal to _____.

a) V_{dd}	b) V_{ss}
c) $2 V_{dd}$	d) $0.5 V_{dd}$
- 6) _____ are example of combinational circuit.

a) Shift register	b) Multiplexers
c) Counters	d) Flip-flops
- 7) As compared to TTL, CMOS logic has _____.

a) high speed of operation	b) higher power dissipation
c) smaller physical size	d) None of the above
- 8) The cross coupling of two inverter creates a _____ circuit called Hip Hop.

a) bistable	b) metastable
c) Both of above	d) None of above

- 9) When there is no clock signal is applied to CMOS logic circuit, are referred to as _____.
- a) Complex CMOS logic circuit
 - b) Static CMOS logic circuits
 - c) NMOS transmission gate
 - d) Random PMOS logic circuit
- 10) The drain current is varied by _____.
- a) Gate to source voltage
 - b) Gate current
 - c) Source voltage
 - d) None of the mentioned
- 11) The n-MOSFET is working as accumulation mode when _____.
- a) Gate is applied with positive voltage
 - b) Gate is grounded
 - c) Gate is applied with negative voltage
 - d) Gate is connected to source
- 12) CMOS inverter circuit has pair of transistors which are _____
- a) Two PMOS
 - b) Two BJT
 - c) Two NMOS
 - d) Two complementary CMOS
- 13) Threshold voltage of PMOS and NMOS is CMOS inverter is _____.
- a) Equal in magnitude
 - b) Opposite in magnitude
 - c) Infinite in magnitude
 - d) Zero
- 14) CMOS inverter has _____ regions of operation.
- a) Three
 - b) Four
 - c) Two
 - d) Five

Fourth Y. (B. Tech) (Sem-II) (Old)(CBCS) Examination: March/April-2024
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Industrial IOT (197044804)

Day & Date: Saturday, 11-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if required

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) What are the benefits of IIoT?
 - a) Improves productivity
 - b) Enables remote diagnosis
 - c) Reduces operation time
 - d) All of the above
- 2) How many key elements are there in the industrial internet?
 - a) 5
 - b) 3
 - c) 2
 - d) None of there
- 3) Which of the following best describes a smart sensor?
 - a) Sensor with smart memory, processor and communication interface
 - b) Sensor with only memory
 - c) Sensor with LED
 - d) Sensor with buzzer
- 4) What is the frequency range in which 6LoWPAN works worldwide?
 - a) 2400 - 2483.5 MHz
 - b) 2300 - 2345 MHz
 - c) 2400 - 2843.5 MHz
 - d) 2400 - 2583.5 MHz
- 5) Mention some characteristics of IoT devices _____.
 - a) Low processing power
 - b) Smart in size
 - c) Energy constrained in nature
 - d) All of the above
- 6) What are three basic goals of IIoT security?
 - a) Adversity, integrity, central security
 - b) Adversity, integrity, confidentiality
 - c) Availability, instantaneous, confidentiality
 - d) Availability, integrity, confidentiality
- 7) Which of the following is/are considered to be the attack vectors observed in the network layer?
 - a) Misrouting
 - b) DDoS
 - c) Both a and b
 - d) None of these

- 8) What are the different communication protection techniques used in a secured IIoT?
- a) Security gateways
 - b) Network firewalls
 - c) Network access control
 - d) all of the above
- 9) Point out the wrong statement with reference to AWS _____.
- a) Amazon Machine Instances are sized at various levels and rented on a computing/hour basis
 - b) The metrics obtained by CloudWatch may be used to enable a feature called Auto Scaling
 - c) A number of tools are used to support EC2 services
 - d) None of these
- 10) Which of the following allows you to create instances of the MySQL database to support your web sites?
- a) Amazon Elastic Compute Cloud
 - b) Amazon Simple Queue Service
 - c) Amazon Relational Database Service
 - d) Amazon Simple Storage System
- 11) What are the different types of instances?
- a) General purpose
 - b) Computer Optimized
 - c) Storage Optimized
 - d) All of the above
- 12) How would you separate two or more cloud instances but manage them with one Keystone instance?
- a) Use Domains feature
 - b) Use Regions feature
 - c) Use availability zones
 - d) Each cloud instance should use own Keystone instance feature
- 13) Which of the following media files can BigQuery API upload in GCP?
- a) JPEG
 - b) PDF
 - c) All of these
 - d) MP4
- 14) BigQuery uses _____ tables to create smaller data sets by date.
- a) time-partitioned
 - b) template
 - c) external
 - d) date-bucket

Seat No.

Set P

**Fourth Y. (B. Tech) (Sem-II) (Old)(CBCS) Examination: March/April-2024
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Industrial IOT (197044804)**

Day & Date: Saturday, 11-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if required.

Section – I

- Q.2 Attempt Any Three** **12**
- a) Briefly explain what are the key IIoT Technology Catalysts and Precursors?
 - b) What are the important functional characteristics of connectivity in IIoT?
 - c) With a neat diagram, explain detailed IIC Industrial Internet Reference Architecture.
 - d) Explain in detail what is 6LoWPAN communication technology in IIoT.
- Q.3 Attempt any Two** **16**
- a) Discuss in detail the Industrial Internet Consortium Three-Tier Topology in IIoT.
 - b) Explain the types and methods of analytics in IIoT.
 - c) Discuss in detail the potential security issues at the system level of IIoT.

Section – II

- Q.4 Attempt Any Three** **12**
- a) Draw and explain the AWS architecture for IoT.
 - b) Explain with suitable example the two main components of Google Cloud IoT core.
 - c) Write note on the following components:
 - 1) Bare Metal
 - 2) Containers
 - d) Explain the following core projects of OpenStack ecosystem:
 - 1) Identity
 - 2) Compute
 - 3) Storage
- Q.5 Attempt Any Two** **16**
- a) Explain why Bigtable is ideal for applications that need very high throughput and scalability for key/value data.
 - b) Explain the four types of VPC architectures available in AWS with suitable diagram.
 - c) Briefly explain the modern architecture of open stack with appropriate diagram.

Section – I

- Q.2 Attempt Any Three** **12**
- a) Briefly explain what are the key IIoT Technology Catalysts and Precursors?
 - b) What are the important functional characteristics of connectivity in IIoT?
 - c) With a neat diagram, explain detailed IIC Industrial Internet Reference Architecture.
 - d) Explain in detail what is 6LoWPAN communication technology in IIoT.
- Q.3 Attempt any Two** **16**
- a) Discuss in detail the Industrial Internet Consortium Three-Tier Topology in IIoT.
 - b) Explain the types and methods of analytics in IIoT.
 - c) Discuss in detail the potential security issues at the system level of IIoT.

Section – II

- Q.4 Attempt Any Three** **12**
- a) Draw and explain the AWS architecture for IoT.
 - b) Explain with suitable example the two main components of Google Cloud IoT core.
 - c) Write note on the following components:
 - 1) Bare Metal
 - 2) Containers
 - d) Explain the following core projects of OpenStack ecosystem:
 - 1) Identity
 - 2) Compute
 - 3) Storage
- Q.5 Attempt Any Two** **16**
- a) Explain why Bigtable is ideal for applications that need very high throughput and scalability for key/value data.
 - b) Explain the four types of VPC architectures available in AWS with suitable diagram.
 - c) Briefly explain the modern architecture of open stack with appropriate diagram.

- 7) The Set of actions for a problem in a state space is formulated by a _____
- a) Intermediate states
 - b) Initial state
 - c) Successor function, which takes current action and returns next immediate state
 - d) None of the above
- 8) What is the major component/components for measuring the performance of problem solving?
- a) Completeness
 - b) Optimality
 - c) Time and Space complexity
 - d) All of the mentioned
- 9) Which search strategy is also called as blind search?
- a) Uninformed search
 - b) Informed search
 - c) Simple reflex search
 - d) All of the mentioned
- 10) Translate the following statement into FOL.
“For every a, if a is a philosopher, then a is a scholar”
- a) $\forall a$ philosopher(a) scholar(a)
 - b) $\exists a$ philosopher(a) scholar(a)
 - c) $\forall a$ philosopher(a) scholar(x)
 - d) $\exists a$ philosopher(x) scholar(a)
- 11) First Order Logic is also known as _____
- a) First Order Predicate Calculus
 - b) Quantification Theory
 - c) Lower Order Calculus
 - d) All of the mentioned
- 12) What is the primary goal of Natural Language Processing (NLP)?
- a) Understanding and processing human language
 - b) Simulating human-like conversation
 - c) Generating human language
 - d) Translating languages
- 13) What is the main advantage of using robots in healthcare?
- a) Providing companionship to patients
 - b) Reducing the need for healthcare professionals
 - c) Increasing medical errors
 - d) Assisting in surgeries and patient care
- 14) What is the primary purpose of Convolutional Neural Networks (CNNs) in computer vision?
- a) Image compression
 - b) Object recognition and classification
 - c) Text-to-image synthesis
 - d) Data augmentation techniques

Set **P**

Fourth Y. (B.Tech.) (Sem-II) (Old) (CBCS) Examination: March/April-2024
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Artificial Intelligence and Applications (197044805)

Day & Date: Saturday, 11-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
 2) Figures to the right indicate full marks.
 3) Assume suitable data where necessary.
 4) Use of calculator is allowed.

Section – I

- Q.2 Attempt ant THREE 12**
 a) Define Artificial Intelligence and what are the Applications of AI.
 b) Explain how a problem solving agent works.
 c) Differentiate Informed & Uninformed search. Give examples.
 d) Explain the reasoning with default.
- Q.3 Attempt any TWO 16**
 a) Explain First Order Logic and Description Logic.
 b) Explain the following search strategies
 a) Best first search
 b) A* search
 c) Explain Intelligent Agents with their types.

Section – II

- Q.4 Attempt ant THREE 12**
 a) What are probabilistic language models and what can language models do?
 b) Explain Ambiguity and Disambiguation with an example.
 c) Differentiate Deep Learning Vs. Machine learning
 d) Explain applications of Robots in AI.
- Q.5 Attempt any TWO 16**
 a) What is Deep learning Network and explain CNN in detail?
 b) Explain applications of NLP.
 c) Explain use of Robots and Space Robotics with AI approach.

Fourth Y. (B.Tech.) (Sem-II) (Old) (CBCS) Examination: March/April-2024
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Artificial Intelligence and Applications (197044805)

Day & Date: Saturday, 11-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.
 4) Assume suitable data where necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) What is the major component/components for measuring the performance of problem solving?
 - a) Completeness
 - b) Optimality
 - c) Time and Space complexity
 - d) All of the mentioned
- 2) Which search strategy is also called as blind search?
 - a) Uninformed search
 - b) Informed search
 - c) Simple reflex search
 - d) All of the mentioned
- 3) Translate the following statement into FOL.
 "For every a, if a is a philosopher, then a is a scholar"
 - a) $\forall a \text{ philosopher}(a) \text{ scholar}(a)$
 - b) $\exists a \text{ philosopher}(a) \text{ scholar}(a)$
 - c) $\forall a \text{ philosopher}(a) \text{ scholar}(x)$
 - d) $\exists a \text{ philosopher}(x) \text{ scholar}(a)$
- 4) First Order Logic is also known as _____
 - a) First Order Predicate Calculus
 - b) Quantification Theory
 - c) Lower Order Calculus
 - d) All of the mentioned
- 5) What is the primary goal of Natural Language Processing (NLP)?
 - a) Understanding and processing human language
 - b) Simulating human-like conversation
 - c) Generating human language
 - d) Translating languages
- 6) What is the main advantage of using robots in healthcare?
 - a) Providing companionship to patients
 - b) Reducing the need for healthcare professionals
 - c) Increasing medical errors
 - d) Assisting in surgeries and patient care

- 7) What is the primary purpose of Convolutional Neural Networks (CNNs) in computer vision?
- a) Image compression
 - b) Object recognition and classification
 - c) Text-to-image synthesis
 - d) Data augmentation techniques
- 8) An AT agent perceives and acts upon the environment using ____.
- a) Sensors
 - b) Perceiver
 - c) Actuators
 - d) Both a and c
- 9) Which rule is applied for the Simple reflex agent?
- a) Simple-action rule
 - b) Simple & Condition-action rule
 - c) Condition-action rule
 - d) None of the above
- 10) The exploration problem is where ____
- a) Agent contains the knowledge of State and actions.
 - b) Agent does not contain the knowledge of the State and actions.
 - c) Only actions are known to the agent.
 - d) None of the above
- 11) If a robot is able to change its own trajectory as per the external conditions, then the robot is considered as the ____
- a) Mobile
 - b) Non-Servo
 - c) Open loop
 - d) Intelligent
- 12) What is the main task of a problem-solving agent?
- a) Solve the given problem and reach to goal
 - b) To find out which sequence of action will get it to the goal state
 - c) All the mentioned
 - d) None of the mentioned
- 13) Search algorithm takes ____ as an input and returns ____ as an output.
- a) Input, output
 - b) Problem, solution
 - c) Solution, problem
 - d) Parameters, sequence of actions
- 14) The Set of actions for a problem in a state space is formulated by a ____
- a) Intermediate states
 - b) Initial state
 - c) Successor function, which takes current action and returns next immediate state
 - d) None of the above

 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct options.**14**

- 1) In SDSE plaintext block size is _____ bits.
 - a) 8
 - b) 10
 - c) 64
 - d) 128
- 2) What is the cipher text of "we will meet" using Caesar cipher assume k=3.
 - a) zhzlppphhp
 - b) zlzhooophhw
 - c) zhzloopphhw
 - d) zgzloopgggu
- 3) A _____ is a trusted third party that assigns a symmetric key to two parties.
 - a) KDC
 - b) CA
 - c) KDD
 - d) None of above
- 4) The _____ is the only cryptosystem that exhibits what is referred to as perfect secrecy.
 - a) Rail fence
 - b) One-time pad
 - c) Playfair
 - d) Caesar cipher
- 5) If the message includes a _____ the receiver is assured that the message has not been delayed beyond that normally expected for network transit.
 - a) Shared Key
 - b) Timestamp
 - c) Error detection code
 - d) Sequence number
- 6) In asymmetric key cryptography, the private key is kept by _____.
 - a) Sender
 - b) Receiver
 - c) Sender & Receiver
 - d) All the connected device to network
- 7) In the _____ mode, IPSec protects the whole IP packet, including the original IP header.
 - a) Transport
 - b) Tunnel
 - c) AH
 - d) ESP

- 8) In _____ the cryptographic algorithms and secrets are sent with the message.
- a) IPSec
 - b) SSL
 - c) TLS
 - d) PGP
- 9) The secure socket layer provides _____
- a) Encryption of messages sent by both client and server
 - b) Server authentication
 - c) Optional client authentication
 - d) All of these
- 10) Programs that multiply like viruses but spread from computer to computer are called as: _____
- a) Worms
 - b) Virus
 - c) Boot
 - d) None of these
- 11) What type of attack relies on the trusting nature of employees and the art of deception?
- a) Social Engineering
 - b) Fraud
 - c) Phishing
 - d) Dumpster Diving
- 12) The use of the Internet or other electronic means to stalk or harass an individual, a group of individuals, or an organization is termed: _____
- a) Cyberspace
 - b) Cyber stalking
 - c) Pornography
 - d) None of these
- 13) Which of the following is a cybercrime?
- a) Hacking
 - b) Worm attack
 - c) Virus attack
 - d) All of these
- 14) Encapsulating Security Payload (ESP) belongs to which Internet Security Protocol?
- a) Secure Socket Layer Protocol
 - b) Secure IP Protocol
 - c) Secure Http Protocol
 - d) Transport Layer Security Protocol

ELECTRONICS AND TELECOMMUNICATION ENGINEERING
Network Security (197044806)

Day & Date: Monday, 13-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct options.

14

- 1) What type of attack relies on the trusting nature of employees and the art of deception?
 - a) Social Engineering
 - b) Fraud
 - c) Phishing
 - d) Dumpster Diving
- 2) The use of the Internet or other electronic means to stalk or harass an individual, a group of individuals, or an organization is termed: _____
 - a) Cyberspace
 - b) Cyber stalking
 - c) Pornography
 - d) None of these
- 3) Which of the following is a cybercrime?
 - a) Hacking
 - b) Worm attack
 - c) Virus attack
 - d) All of these
- 4) Encapsulating Security Payload (ESP) belongs to which Internet Security Protocol?
 - a) Secure Socket Layer Protocol
 - b) Secure IP Protocol
 - c) Secure Http Protocol
 - d) Transport Layer Security Protocol
- 5) In SDSE plaintext block size is _____ bits.
 - a) 8
 - b) 10
 - c) 64
 - d) 128
- 6) What is the cipher text of "we will meet" using Caesar cipher assume k=3.
 - a) zhzlppphhp
 - b) zlzhooophhw
 - c) zhzloopphhw
 - d) zgzloopgggu
- 7) A _____ is a trusted third party that assigns a symmetric key to two parties.
 - a) KDC
 - b) CA
 - c) KDD
 - d) None of above
- 8) The _____ is the only cryptosystem that exhibits what is referred to as perfect secrecy.
 - a) Rail fence
 - b) One-time pad
 - c) Playfair
 - d) Caesar cipher

- 9) If the message includes a _____ the receiver is assured that the message has not been delayed beyond that normally expected for network transit.
- a) Shared Key
 - b) Timestamp
 - c) Error detection code
 - d) Sequence number
- 10) In asymmetric key cryptography, the private key is kept by _____.
- a) Sender
 - b) Receiver
 - c) Sender & Receiver
 - d) All the connected device to network
- 11) In the _____ mode, IPSec protects the whole IP packet, including the original IP header.
- a) Transport
 - b) Tunnel
 - c) AH
 - d) ESP
- 12) In _____ the cryptographic algorithms and secrets are sent with the message.
- a) IPSec
 - b) SSL
 - c) TLS
 - d) PGP
- 13) The secure socket layer provides _____
- a) Encryption of messages sent by both client and server
 - b) Server authentication
 - c) Optional client authentication
 - d) All of these
- 14) Programs that multiply like viruses but spread from computer to computer are called as: _____
- a) Worms
 - b) Virus
 - c) Boot
 - d) None of these

Seat No.	
-----------------	--

Set R

**Fourth Y. (B.Tech.) (Sem-II) (Old) (CBCS) Examination: March/April-2024
ELECTRONICS AND TELECOMMUNICATION ENGINEERING
Network Security (197044806)**

Day & Date: Monday, 13-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

- Q.2 Attempt any four of the following questions. 16**
- a) Explain the model of network security with diagram.
 - b) Explain the Rail fence transposition technique with example.
 - c) Explain with diagram Principles of public key cryptography.
 - d) Describe Secure Socket Layer.
 - e) Write short note on secure shell (SSH).
 - f) Explain in detail X.509 certificate.
- Q.3 Attempt any two of the following questions. 12**
- a) Describe RSA algorithm with help of example.
 - b) Explain the working of DES with diagram.
 - c) Explain network access control in detail.

Section – II

- Q.4 Attempt any four of the following question. 16**
- a) Explain the Functionality of S/MIME.
 - b) Write a short note on different applications of IPsecurity.
 - c) Explain in detail classifications of cybercrime.
 - d) What is Buffer overflow and how to minimize it?
 - e) Differentiate between Virus and Worm
 - f) Write a brief note on Wireless Security.
- Q.5 Attempt any two of the following questions. 12**
- a) Explain the Cybercrime: The legal and an Indian perspective
 - b) What is Phishing and Identity Theft explain in brief?
 - c) What is ESP? Give the format of ESP packet.

Seat No.

Set **S**

Fourth Y. (B.Tech.) (Sem-II) (Old) (CBCS) Examination: March/April-2024
ELECTRONICS AND TELECOMMUNICATION ENGINEERING
Network Security (197044806)

Day & Date: Monday, 13-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct options.**14**

- 1) In asymmetric key cryptography, the private key is kept by _____.
 a) Sender
 b) Receiver
 c) Sender & Receiver
 d) All the connected device to network
- 2) In the ____ mode, IPSec protects the whole IP packet, including the original IP header.
 a) Transport
 b) Tunnel
 c) AH
 d) ESP
- 3) In _____ the cryptographic algorithms and secrets are sent with the message.
 a) IPSec
 b) SSL
 c) TLS
 d) PGP
- 4) The secure socket layer provides _____.
 a) Encryption of messages sent by both client and server
 b) Server authentication
 c) Optional client authentication
 d) All of these
- 5) Programs that multiply like viruses but spread from computer to computer are called as: _____.
 a) Worms
 b) Virus
 c) Boot
 d) None of these
- 6) What type of attack relies on the trusting nature of employees and the art of deception?
 a) Social Engineering
 b) Fraud
 c) Phishing
 d) Dumpster Diving
- 7) The use of the Internet or other electronic means to stalk or harass an individual, a group of individuals, or an organization is termed: _____.
 a) Cyberspace
 b) Cyber stalking
 c) Pornography
 d) None of these

- 8) Which of the following is a cybercrime?
a) Hacking
b) Worm attack
c) Virus attack
d) All of these
- 9) Encapsulating Security Payload (ESP) belongs to which Internet Security Protocol?
a) Secure Socket Layer Protocol
b) Secure IP Protocol
c) Secure Http Protocol
d) Transport Layer Security Protocol
- 10) In SDSE plaintext block size is _____ bits.
a) 8
b) 10
c) 64
d) 128
- 11) What is the cipher text of "we will meet" using Caesar cipher assume $k=3$.
a) zhzlppphhp
b) zlzhooophhw
c) zhzloopphhw
d) zgzloopgggu
- 12) A _____ is a trusted third party that assigns a symmetric key to two parties.
a) KDC
b) CA
c) KDD
d) None of above
- 13) The _____ is the only cryptosystem that exhibits what is referred to as perfect secrecy.
a) Rail fence
b) One-time pad
c) Playfair
d) Caesar cipher
- 14) If the message includes a _____ the receiver is assured that the message has not been delayed beyond that normally expected for network transit.
a) Shared Key
b) Timestamp
c) Error detection code
d) Sequence number

Data Analytics (197044807)

Day & Date: Monday, 13-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) Data analytics refers to a _____
 - a) Analyzing Data
 - b) Scientific approach to get insights from the data or data sets
 - c) Find the hidden patterns from data
 - d) All of the mentioned above
- 2) Data analytics applies on _____
 - a) Raw Data
 - b) Algorithm
 - c) Scientific method
 - d) None of the mentioned above
- 3) _____ means how much the data is reliable.
 - a) Velocity
 - b) Volume
 - c) Value
 - d) Veracity
- 4) Amongst which of the following is/are the examples of structured data?
 - a) Videos
 - b) Employee's name, employee's id, employee's age
 - c) Audio files
 - d) All of the mentioned above
- 5) Descriptive statistics is used _____
 - a) To develop information regarding the product sample using the measured data
 - b) To measure the data for a sample
 - c) To draw conclusions about the population
 - d) To control the variation
- 6) What is KDD?
 - a) Knowledge Discovery Database
 - b) Knowledge Discovery Data
 - c) Knowledge Data Definition
 - d) Knowledge Data House

- 7) Examples of Nominal can be _____
- a) ID Numbers, eye color, zip codes
 - b) Rankings, taste of potato chips, grades, height
 - c) Calendar dates, temperatures in Celsius or Fahrenheit, phone numbers
 - d) The temperature in Kelvin, length, time, counts
- 8) Which are pros of data visualization?
- a) It can be accessed quickly by a wider audience
 - b) It can misrepresent information
 - c) It can be distracting
 - d) None of the above
- 9) _____ plot the number of occurrences of a given variable in a set of data.
- a) Treemaps
 - b) Histograms
 - c) Pie charts
 - d) None of the mentioned above
- 10) In a week the prices of a bag of rice were 350, 280, 340, 290, 320, 310, 300. The range is _____.
- a) 60
 - b) 90
 - c) 70
 - d) 100
- 11) What are some examples of data quality problems?
- a) Noise and outliers
 - b) Duplicate data
 - c) Missing values
 - d) All of the Above
- 12) In _____, the attribute data are scaled so as to fall within a smaller range, such as -1.0 to 1.0. or 0.0 to 1.0.
- a) Aggregation
 - b) Binning
 - c) Clustering
 - d) Normalization
- 13) In R language, a vector is defined that it can only contain objects of the _____
- a) Same class
 - b) Different class
 - c) Similar class
 - d) Any class
- 14) The correct command to load the library dplyr is _____
- a) library(dplyr)
 - b) Library("dplyr ")
 - c) install.library(dplyr)
 - d) install.library("dplyr ")

Seat No.

Set **P**

**Fourth Y. (B Tech) (Sem-II) (Old) (CBCS) Examination: March/April-2024
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Data Analytics (197044807)**

Day & Date: Monday, 13-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any four of the following.

16

- Compute Mean, Median, Inter Quartile Range, Standard deviation for the data relating to the marks of 8 students in an examination given below 25, 48, 32, 52, 21, 64, 29, and 57
- List and define Location univariate statistic parameters and dispersion univariate statistic parameters
- What are the most appropriate scales for the following examples? Also, Justify the choice.
 - university students' exam marks
 - level of urgency in the emergency room of a hospital
 - classification of the animals in a zoo
 - Carbon dioxide levels in the atmosphere
- Write a short note on Descriptive Univariate Statistics.
- With suitable example explain Conversion from the nominal scale to binary values.
- List and explain the characteristics of big data.

Q.3 Solve any two of the following.

12

- What insight of data we get from its Histogram? Draw a histogram for the "Weight" and Company attribute from Contact list Table 1 given below

Contact	Maxtemp	Weight	Height	Years	Gender	Company
Andrew	25	77	175	10	M	Good
Bernhard	31	110	195	12	M	Good
Carolina	15	70	172	2	F	Bad
Dennis	20	85	180	16	M	Good
Eve	10	65	168	0	F	Bad
Fred	12	75	173	6	M	Good
Gwyneth	16	75	180	3	F	Bad
Hayden	26	63	165	2	F	Bad
Irene	15	55	158	5	F	Bad
James	21	66	163	14	M	Good
Kevin	30	95	190	1	M	Bad
Lea	13	72	172	11	F	Good
Marcus	8	83	185	3	F	Bad
Nigel	12	115	192	15	M	Good

- b) Why dimensionality reduction is required as preprocessing? How PCA is used for dimensionality reduction.
- c) Discuss and give the solution for the following problem associated with data quality
- Missing Values
 - Redundant Data
 - Inconsistent data
 - Noisy data
 - Outliers

Section – II

Q.4 Solve any four of the following.

16

- a) Write a short note on Applications of Big data analytics
- b) Explain any four data types with an example in R.
- c) What are the objectives for using data visualization?
- d) Write R program to Create a matrix and show
- i) how items can be accessed from rows and columns?
 - ii) how to add rows and columns?
- e) A gardener collected data on two types of tomato. The box and whisker plot below shows data for the masses in grams of the tomatoes in the two samples. Compare and contrast the two types and advise the gardener which type of tomato he should grow in future.

- f) Write a short note on Applications of Big data analytics

Q.5 Solve any two of the following.

a) Write statement wise results for the following R Code

```
i <- 1
sport <- "football"
flag <- TRUE
class(i)
typeof(i)
class(sport)
typeof(sport)
class(flag)
typeof(flag)
is.vector(i)
is.vector(flag)
is.vector(sport)
u <- c("red", "yellow", "blue")
u
u[1]
v <- 1:5
v
sum(v)
w <- v * 2
w
w[3]
z <- v + w
z
z > 8
z[z > 8]
z[z > 8 | z < 5]
```

b) Explain four Data Visualization techniques Using R.

c) Draw and explain typical architecture of big data analytics.

Seat No.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) Which are pros of data visualization?
 - a) It can be accessed quickly by a wider audience
 - b) It can misrepresent information
 - c) It can be distracting
 - d) None of the above
- 2) _____ plot the number of occurrences of a given variable in a set of data.
 - a) Treemaps
 - b) Histograms
 - c) Pie charts
 - d) None of the mentioned above
- 3) In a week the prices of a bag of rice were 350, 280, 340, 290, 320, 310, 300. The range is _____.
 - a) 60
 - b) 90
 - c) 70
 - d) 100
- 4) What are some examples of data quality problems?
 - a) Noise and outliers
 - b) Duplicate data
 - c) Missing values
 - d) All of the Above
- 5) In _____, the attribute data are scaled so as to fall within a smaller range, such as -1.0 to 1.0. or 0.0 to 1.0.
 - a) Aggregation
 - b) Binning
 - c) Clustering
 - d) Normalization
- 6) In R language, a vector is defined that it can only contain objects of the _____.
 - a) Same class
 - b) Different class
 - c) Similar class
 - d) Any class
- 7) The correct command to load the library dplyr is _____.
 - a) library(dplyr)
 - b) Library("dplyr ")
 - c) install.library(dplyr)
 - d) install.library("dplyr ")
- 8) Data analytics refers to a _____.
 - a) Analyzing Data
 - b) Scientific approach to get insights from the data or data sets

Lea	13	72	172	11	F	Good
Marcus	8	83	185	3	F	Bad
Nigel	12	115	192	15	M	Good

- b) Why dimensionality reduction is required as preprocessing? How PCA is used for dimensionality reduction.
- c) Discuss and give the solution for the following problem associated with data quality
- Missing Values
 - Redundant Data
 - Inconsistent data
 - Noisy data
 - Outliers

Section – II

Q.4 Solve any four of the following.

16

- a) Write a short note on Applications of Big data analytics
- b) Explain any four data types with an example in R.
- c) What are the objectives for using data visualization?
- d) Write R program to Create a matrix and show
- i) how items can be accessed from rows and columns?
 - ii) how to add rows and columns?
- e) A gardener collected data on two types of tomato. The box and whisker plot below shows data for the masses in grams of the tomatoes in the two samples. Compare and contrast the two types and advise the gardener which type of tomato he should grow in future.

- f) Write a short note on Applications of Big data analytics

Q.5 Solve any two of the following.

a) Write statement wise results for the following R Code

```
i <- 1
sport <- "football"
flag <- TRUE
class(i)
typeof(i)
class(sport)
typeof(sport)
class(flag)
typeof(flag)
is.vector(i)
is.vector(flag)
is.vector(sport)
u <- c("red", "yellow", "blue")
u
u[1]
v <- 1:5
v
sum(v)
w <- v * 2
w
w[3]
z <- v + w
z
z > 8
z[z > 8]
z[z > 8 | z < 5]
```

b) Explain four Data Visualization techniques Using R.

c) Draw and explain typical architecture of big data analytics.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) What are some examples of data quality problems?
 - a) Noise and outliers
 - b) Duplicate data
 - c) Missing values
 - d) All of the Above
- 2) In _____, the attribute data are scaled so as to fall within a smaller range, such as -1.0 to 1.0. or 0.0 to 1.0.
 - a) Aggregation
 - b) Binning
 - c) Clustering
 - d) Normalization
- 3) In R language, a vector is defined that it can only contain objects of the _____.
 - a) Same class
 - b) Different class
 - c) Similar class
 - d) Any class
- 4) The correct command to load the library dplyr is _____.
 - a) library(dplyr)
 - b) Library("dplyr ")
 - c) install.library(dplyr)
 - d) install.library("dplyr ")
- 5) Data analytics refers to a _____.
 - a) Analyzing Data
 - b) Scientific approach to get insights from the data or data sets
 - c) Find the hidden patterns from data
 - d) All of the mentioned above
- 6) Data analytics applies on _____.
 - a) Raw Data
 - b) Algorithm
 - c) Scientific method
 - d) None of the mentioned above
- 7) _____ means how much the data is reliable.
 - a) Velocity
 - b) Volume
 - c) Value
 - d) Veracity

- 8) Amongst which of the following is/are the examples of structured data?
- Videos
 - Employee's name, employee's id, employee's age
 - Audio files
 - All of the mentioned above
- 9) Descriptive statistics is used _____
- To develop information regarding the product sample using the measured data
 - To measure the data for a sample
 - To draw conclusions about the population
 - To control the variation
- 10) What is KDD?
- Knowledge Discovery Database
 - Knowledge Discovery Data
 - Knowledge Data Definition
 - Knowledge Data House
- 11) Examples of Nominal can be _____
- ID Numbers, eye color, zip codes
 - Rankings, taste of potato chips, grades, height
 - Calendar dates, temperatures in Celsius or Fahrenheit, phone numbers
 - The temperature in Kelvin, length, time, counts
- 12) Which are pros of data visualization?
- It can be accessed quickly by a wider audience
 - It can misrepresent information
 - It can be distracting
 - None of the above
- 13) _____ plot the number of occurrences of a given variable in a set of data.
- Treemaps
 - Histograms
 - Pie charts
 - None of the mentioned above
- 14) In a week the prices of a bag of rice were 350, 280, 340, 290, 320, 310, 300. The range is _____.
- 60
 - 90
 - 70
 - 100

Set **R**

**Fourth Y. (B Tech) (Sem-II) (Old) (CBCS) Examination: March/April-2024
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Data Analytics (197044807)**

Day & Date: Monday, 13-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any four of the following.

16

- Compute Mean, Median, Inter Quartile Range, Standard deviation for the data relating to the marks of 8 students in an examination given below 25, 48, 32, 52, 21, 64, 29, and 57
- List and define Location univariate statistic parameters and dispersion univariate statistic parameters
- What are the most appropriate scales for the following examples? Also, Justify the choice.
 - university students' exam marks
 - level of urgency in the emergency room of a hospital
 - classification of the animals in a zoo
 - Carbon dioxide levels in the atmosphere
- Write a short note on Descriptive Univariate Statistics.
- With suitable example explain Conversion from the nominal scale to binary values.
- List and explain the characteristics of big data.

Q.3 Solve any two of the following.

12

- What insight of data we get from its Histogram? Draw a histogram for the "Weight" and Company attribute from Contact list Table 1 given below

Contact	Maxtemp	Weight	Height	Years	Gender	Company
Andrew	25	77	175	10	M	Good
Bernhard	31	110	195	12	M	Good
Carolina	15	70	172	2	F	Bad
Dennis	20	85	180	16	M	Good
Eve	10	65	168	0	F	Bad
Fred	12	75	173	6	M	Good
Gwyneth	16	75	180	3	F	Bad
Hayden	26	63	165	2	F	Bad
Irene	15	55	158	5	F	Bad
James	21	66	163	14	M	Good
Kevin	30	95	190	1	M	Bad
Lea	13	72	172	11	F	Good
Marcus	8	83	185	3	F	Bad
Nigel	12	115	192	15	M	Good

- b) Why dimensionality reduction is required as preprocessing? How PCA is used for dimensionality reduction.
- c) Discuss and give the solution for the following problem associated with data quality
- Missing Values
 - Redundant Data
 - Inconsistent data
 - Noisy data
 - Outliers

Section – II

Q.4 Solve any four of the following.

16

- a) Write a short note on Applications of Big data analytics
- b) Explain any four data types with an example in R.
- c) What are the objectives for using data visualization?
- d) Write R program to Create a matrix and show
- i) how items can be accessed from rows and columns?
 - ii) how to add rows and columns?
- e) A gardener collected data on two types of tomato. The box and whisker plot below shows data for the masses in grams of the tomatoes in the two samples. Compare and contrast the two types and advise the gardener which type of tomato he should grow in future.

- f) Write a short note on Applications of Big data analytics

Q.5 Solve any two of the following.

a) Write statement wise results for the following R Code

```
i <- 1
sport <- "football"
flag <- TRUE
class(i)
typeof(i)
class(sport)
typeof(sport)
class(flag)
typeof(flag)
is.vector(i)
is.vector(flag)
is.vector(sport)
u <- c("red", "yellow", "blue")
u
u[1]
v <- 1:5
v
sum(v)
w <- v * 2
w
w[3]
z <- v + w
z
z > 8
z[z > 8]
z[z > 8 | z < 5]
```

b) Explain four Data Visualization techniques Using R.

c) Draw and explain typical architecture of big data analytics.

Seat No.

Fourth Y. (B Tech) (Sem-II) (Old) (CBCS) Examination: March/April-2024
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Data Analytics (197044807)

Day & Date: Monday, 13-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) What is KDD?
 - a) Knowledge Discovery Database
 - b) Knowledge Discovery Data
 - c) Knowledge Data Definition
 - d) Knowledge Data House
- 2) Examples of Nominal can be _____
 - a) ID Numbers, eye color, zip codes
 - b) Rankings, taste of potato chips, grades, height
 - c) Calendar dates, temperatures in Celsius or Fahrenheit, phone numbers
 - d) The temperature in Kelvin, length, time, counts
- 3) Which are pros of data visualization?
 - a) It can be accessed quickly by a wider audience
 - b) It can misrepresent information
 - c) It can be distracting
 - d) None of the above
- 4) _____ plot the number of occurrences of a given variable in a set of data.
 - a) Treemaps
 - b) Histograms
 - c) Pie charts
 - d) None of the mentioned above
- 5) In a week the prices of a bag of rice were 350, 280, 340, 290, 320, 310, 300. The range is _____.
 - a) 60
 - b) 90
 - c) 70
 - d) 100
- 6) What are some examples of data quality problems?
 - a) Noise and outliers
 - b) Duplicate data
 - c) Missing values
 - d) All of the Above
- 7) In _____, the attribute data are scaled so as to fall within a smaller range, such as -1.0 to 1.0. or 0.0 to 1.0.
 - a) Aggregation
 - b) Binning
 - c) Clustering
 - d) Normalization

- 8) In R language, a vector is defined that it can only contain objects of the _____
- a) Same class
 - b) Different class
 - c) Similar class
 - d) Any class
- 9) The correct command to load the library dplyr is _____
- a) library(dplyr)
 - b) Library("dplyr ")
 - c) install.library(dplyr)
 - d) install.library("dplyr ")
- 10) Data analytics refers to a _____
- a) Analyzing Data
 - b) Scientific approach to get insights from the data or data sets
 - c) Find the hidden patterns from data
 - d) All of the mentioned above
- 11) Data analytics applies on _____
- a) Raw Data
 - b) Algorithm
 - c) Scientific method
 - d) None of the mentioned above
- 12) _____ means how much the data is reliable.
- a) Velocity
 - b) Volume
 - c) Value
 - d) Veracity
- 13) Amongst which of the following is/are the examples of structured data?
- a) Videos
 - b) Employee's name, employee's id, employee's age
 - c) Audio files
 - d) All of the mentioned above
- 14) Descriptive statistics is used _____
- a) To develop information regarding the product sample using the measured data
 - b) To measure the data for a sample
 - c) To draw conclusions about the population
 - d) To control the variation

Q.3 Solve any two of the following.

12

- What insight of data we get from its Histogram? Draw a histogram for the "Weight" and Company attribute from Contact list Table 1 given below

Contact	Maxtemp	Weight	Height	Years	Gender	Company
Andrew	25	77	175	10	M	Good
Bernhard	31	110	195	12	M	Good
Carolina	15	70	172	2	F	Bad
Dennis	20	85	180	16	M	Good
Eve	10	65	168	0	F	Bad
Fred	12	75	173	6	M	Good
Gwyneth	16	75	180	3	F	Bad
Hayden	26	63	165	2	F	Bad
Irene	15	55	158	5	F	Bad
James	21	66	163	14	M	Good
Kevin	30	95	190	1	M	Bad
Lea	13	72	172	11	F	Good
Marcus	8	83	185	3	F	Bad
Nigel	12	115	192	15	M	Good

- b) Why dimensionality reduction is required as preprocessing? How PCA is used for dimensionality reduction.
- c) Discuss and give the solution for the following problem associated with data quality
- Missing Values
 - Redundant Data
 - Inconsistent data
 - Noisy data
 - Outliers

Section – II

Q.4 Solve any four of the following.

16

- a) Write a short note on Applications of Big data analytics
- b) Explain any four data types with an example in R.
- c) What are the objectives for using data visualization?
- d) Write R program to Create a matrix and show
- i) how items can be accessed from rows and columns?
 - ii) how to add rows and columns?
- e) A gardener collected data on two types of tomato. The box and whisker plot below shows data for the masses in grams of the tomatoes in the two samples. Compare and contrast the two types and advise the gardener which type of tomato he should grow in future.

- f) Write a short note on Applications of Big data analytics

Q.5 Solve any two of the following.

a) Write statement wise results for the following R Code

```
i <- 1
sport <- "football"
flag <- TRUE
class(i)
typeof(i)
class(sport)
typeof(sport)
class(flag)
typeof(flag)
is.vector(i)
is.vector(flag)
is.vector(sport)
u <- c("red", "yellow", "blue")
u
u[1]
v <- 1:5
v
sum(v)
w <- v * 2
w
w[3]
z <- v + w
z
z > 8
z[z > 8]
z[z > 8 | z < 5]
```

b) Explain four Data Visualization techniques Using R.

c) Draw and explain typical architecture of big data analytics.

- 7) Round robin scheduling falls under the category of:
a) Non preemptive scheduling b) Preemptive scheduling
c) None of these d) Both (a) and (b)
- 8) What is the reusable resource?
a) that can be used by one process at a time and is not depleted by that use
b) that can be used by more than one process at a time
c) that can be shared between various threads
d) none of the mentioned
- 9) Which one of the following is the deadlock avoidance algorithm?
a) banker's algorithm
b) round-robin algorithm
c) elevator algorithm
d) kern's algorithm
- 10) CPU fetches the instruction from memory according to the value of _____
a) program counter b) status register
c) instruction register d) program status word
- 11) Which one of the following is the address generated by CPU?
a) physical address b) absolute address
c) logical address d) none of the mentioned
- 12) _____ is the concept in which a process is copied into main memory from the secondary memory according to the requirement.
a) Paging b) Demand paging
c) Segmentation d) Swapping
- 13) In FIFO page replacement algorithm, when a page must be replaced?
a) oldest page is chosen b) newest page is chosen
c) random page is chosen d) none of the mentioned
- 14) A process is thrashing if _____
a) it is spending more time paging than executing
b) it is spending less time paging than executing
c) page fault occurs
d) swapping cannot take place

T.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
INFORMATION TECHNOLOGY ENGINEERING
Operating Systems (BTN05502)

Day & Date: Tuesday, 14-05-2024
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

- Instructions:** 1) All Questions are compulsory.
 2) Figures to the right indicate full marks.
 3) Assume suitable data if necessary.

Section – I

Q.2 Attempt any three. 12

- a) Explain Priority Scheduling with example.
- b) What is a semaphore? Explain its operations.
- c) What is a process? Explain its state transition diagram.
- d) Explain Time-Sharing operating systems.
- e) Describe critical section problem. State the solution to CS problem.

Q.3 Attempt any Two. 16

- a) Consider the following set of processes with arrival time and burst time in milliseconds as given below.

P No.	AT	BT
1	0	7
2	1	5
3	2	3
4	3	1
5	4	2
6	5	1

- i] Draw Gantt chart that illustrate execution of processes in Pre-emptive SJF manner.
 - ii] Calculate average waiting time for Pre-emptive SJF scheduling algorithm.
 - iii] Calculate average Turnaround time for Pre-emptive SJF scheduling algorithm.
- b) What is process Scheduler? Describe long term, short-term and medium-term scheduler in detail.
 - c) Explain Monitor in detail.

Section – II

- Q.4 Solve any three.** **12**
- a) Explain deadlock prevention in detail.
 - b) Explain FIFO page replacement policy with example.
 - c) Explain Swapping with the help of diagram.
 - d) Write note on deadlock characterization.
 - e) Write short note on application I/O interface.
- Q.5 Attempt any two.** **16**
- a) Write and explain Banker's algorithm for deadlock avoidance with the help of example.
 - b) Explain Paging in detail.
 - c) What is virtual memory? Explain demand paging in detail.

 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Solve Multiple Choice Questions.

14

- 1) What is the reusable resource?
 - a) that can be used by one process at a time and is not depleted by that use
 - b) that can be used by more than one process at a time
 - c) that can be shared between various threads
 - d) none of the mentioned
- 2) Which one of the following is the deadlock avoidance algorithm?
 - a) banker's algorithm
 - b) round-robin algorithm
 - c) elevator algorithm
 - d) kern's algorithm
- 3) CPU fetches the instruction from memory according to the value of _____.
 - a) program counter
 - b) status register
 - c) instruction register
 - d) program status word
- 4) Which one of the following is the address generated by CPU?
 - a) physical address
 - b) absolute address
 - c) logical address
 - d) none of the mentioned
- 5) _____ is the concept in which a process is copied into main memory from the secondary memory according to the requirement.
 - a) Paging
 - b) Demand paging
 - c) Segmentation
 - d) Swapping
- 6) In FIFO page replacement algorithm, when a page must be replaced?
 - a) oldest page is chosen
 - b) newest page is chosen
 - c) random page is chosen
 - d) none of the mentioned
- 7) A process is thrashing if _____.
 - a) it is spending more time paging than executing
 - b) it is spending less time paging than executing
 - c) page fault occurs
 - d) swapping cannot take place

- 8) The following C program :
- ```
main()
{
fork(); fork(); printf("yes");
}
```
- prints yes:
- a) only once
  - b) twice
  - c) four times
  - d) eight times
- 9) The state of a process is defined by :
- a) the final activity of the process
  - b) the activity just executed by the process
  - c) next activity to be executed by the process
  - d) the current activity of the process
- 10) Which of the following do not belong to queues for processes?
- a) Job Queue
  - b) PCB queue
  - c) Device Queue
  - d) Ready Queue
- 11) Mutual exclusion can be provided by the \_\_\_\_\_
- a) mutex locks
  - b) binary semaphores
  - c) both (a) and (b)
  - d) None of the above
- 12) Cascading termination refers to termination of all child processes before the parent terminates \_\_\_\_\_
- a) Normally
  - b) Abnormally
  - c) Normally or abnormally
  - d) None of these
- 13) The TestAndSet instruction is executed:
- a) after a particular process
  - b) periodically
  - c) atomically
  - d) None of these
- 14) Round robin scheduling falls under the category of:
- a) Non preemptive scheduling
  - b) Preemptive scheduling
  - c) None of these
  - d) Both (a) and (b)

  - c) Segmentation
  - d) Swapping

- 8) In FIFO page replacement algorithm, when a page must be replaced?
- a) oldest page is chosen
  - b) newest page is chosen
  - c) random page is chosen
  - d) none of the mentioned
- 9) A process is thrashing if \_\_\_\_\_
- a) it is spending more time paging than executing
  - b) it is spending less time paging than executing
  - c) page fault occurs
  - d) swapping cannot take place
- 10) The following C program :
- ```
main()
{
fork(); fork(); printf("yes");
}
```
- prints yes:
- a) only once
 - b) twice
 - c) four times
 - d) eight times
- 11) The state of a process is defined by :
- a) the final activity of the process
 - b) the activity just executed by the process
 - c) next activity to be executed by the process
 - d) the current activity of the process
- 12) Which of the following do not belong to queues for processes?
- a) Job Queue
 - b) PCB queue
 - c) Device Queue
 - d) Ready Queue
- 13) Mutual exclusion can be provided by the _____
- a) mutex locks
 - b) binary semaphores
 - c) both (a) and (b)
 - d) None of the above
- 14) Cascading termination refers to termination of all child processes before the parent terminates _____
- a) Normally
 - b) Abnormally
 - c) Normally or abnormally
 - d) None of these

T.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
INFORMATION TECHNOLOGY ENGINEERING
Operating Systems (BTN05502)

Day & Date: Tuesday, 14-05-2024
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

- Instructions:** 1) All Questions are compulsory.
 2) Figures to the right indicate full marks.
 3) Assume suitable data if necessary.

Section – I

Q.2 Attempt any three. **12**

- a) Explain Priority Scheduling with example.
- b) What is a semaphore? Explain its operations.
- c) What is a process? Explain its state transition diagram.
- d) Explain Time-Sharing operating systems.
- e) Describe critical section problem. State the solution to CS problem.

Q.3 Attempt any Two. **16**

- a) Consider the following set of processes with arrival time and burst time in milliseconds as given below.

P No.	AT	BT
1	0	7
2	1	5
3	2	3
4	3	1
5	4	2
6	5	1

- i] Draw Gantt chart that illustrate execution of processes in Pre-emptive SJF manner.
 - ii] Calculate average waiting time for Pre-emptive SJF scheduling algorithm.
 - iii] Calculate average Turnaround time for Pre-emptive SJF scheduling algorithm.
- b) What is process Scheduler? Describe long term, short-term and medium-term scheduler in detail.
 - c) Explain Monitor in detail.

Section – II

- Q.4 Solve any three.** **12**
- a) Explain deadlock prevention in detail.
 - b) Explain FIFO page replacement policy with example.
 - c) Explain Swapping with the help of diagram.
 - d) Write note on deadlock characterization.
 - e) Write short note on application I/O interface.
- Q.5 Attempt any two.** **16**
- a) Write and explain Banker's algorithm for deadlock avoidance with the help of example.
 - b) Explain Paging in detail.
 - c) What is virtual memory? Explain demand paging in detail.

Set **P**

T. Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
INFORMATION TECHNOLOGY ENGINEERING
Economics (BTN05506)

Day & Date: Monday, 20-05-2024
 Time: 10:00 AM To 12:00 PM

Max. Marks: 50

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 20 Minutes

Marks: 10

Q.1 Choose the correct alternatives from the options. 10

- 1) Who gives a welfare definition of economics?

a) Adam Smith	b) Alfred Marshall
c) Lionel Robbins	d) Paul Samuelson
- 2) The type of equilibrium that deals with the determination of price and quantity of only one _____.

a) General equilibrium	b) Partial equilibrium
c) Zero equilibrium	d) Pareto efficiency
- 3) Who is known as father of economics?

a) Adam Smith	b) Prof. A. Samulson
c) Alfred Marshall	d) J. R. Hicks
- 4) Macroeconomic theory deals with _____.

a) The behavior of firms	b) The activities of individual units
c) Economic aggregates	d) The behavior of the electronics industry
- 5) Which of the following market types has all firms selling products so identical that buyers do not care from which firm they buy?

a) Perfect competition	b) Oligopoly
c) Monopolistic competition	d) Monopoly
- 6) Which of the following is the best example of a natural monopoly?

a) owning the only licensed taxicab in town	b) the United States Postal Service
c) ownership of the only ferry across Puget Sound for twenty miles	d) the cable television company in your hometown
- 7) Which of the following is not a regulatory institution in Indian financial system?

a) RBI	b) CIBIL
c) SEBI	d) IRDA

- 8) Money supply increases when inflation rises in the economy _____.
- a) Increase
 - b) Decrease
 - c) No change
 - d) None of the above
- 9) Market system means: _____.
- a) Socialism
 - b) Capitalism
 - c) A place where goods are traded
 - d) All of the above
- 10) _____ is the application of knowledge which redefines the boundaries of global business.
- a) Cultural Values
 - b) Society
 - c) Technology

 Time: 10:00 AM To 12:00 PM

Max. Marks: 50

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.
 4) Assume suitable data if required and state it clearly.

MCQ/Objective Type Questions

Duration: 20 Minutes

Marks: 10

Q.1 Choose the correct alternatives from the options. 10

- 1) Virtues are _____.
 - a) moral
 - b) ethics
 - c) values
 - d) positive and preferred values
- 2) One of the basic desires of every human being is to be always _____.
 - a) Happy
 - b) Sad
 - c) Laugh
 - d) Earn Money
- 3) Value and skills should go hand in hand _____.
 - a) True
 - b) False
 - c) Cannot tell
 - d) Wrong question
- 4) _____ are the basic Human aspirations.
 - a) Money
 - b) Relationship without money
 - c) Physical facility
 - d) Continuous happiness
- 5) Many complex social problems exist in the _____.
 - a) Industry/ Business
 - b) Society
 - c) Home
 - d) None of the above
- 6) What is Integrity?
 - a) Unity of thought
 - b) Word and deed
 - c) Open mindedness
 - d) All of these
- 7) Human values are essential for _____.
 - a) living in harmony with self, each other and nature
 - b) making life easier and happy
 - c) living with family and friends
 - d) making money to fulfill desires
- 8) Courage is the tendency to accept and face _____.
 - a) Self-confidence
 - b) Risks and difficult tasks in rational ways
 - c) Physical courage
 - d) Social courage

- 9) Commitment means _____.
- a) Alignment to goals
 - b) Adherence to ethical principles
 - c) Empathy
 - d) All the above
- 10) The objectives of professional ethics in engineering are _____.
- a) To understand the moral values that ought to guide the Engineering profession
 - b) To resolve the moral issues in the profession, and
 - c) To justify the moral judgment concerning the profession
 - d) All the above

Set P

T. Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
INFORMATION TECHNOLOGY ENGINEERING
Professional Ethics & Human Value (BTN05510)

Day & Date: Monday, 20-05-2024
Time: 10:00 AM To 12:00 PM

Max. Marks: 40

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Q.2 What is Ethics and explain three types of ethics or morality? **10**

OR

What are the objectives of Engineering Ethics? Explain in detail.

Q.3 Distinguish between Kohlberg's and Gilligan's approach to ethical (moral) judgments. **10**

OR

List and explain the skills required to handle moral problems in Engineering Ethics.

Q.4 Write short notes on any four. **20**

- a) Respect for others
- b) Intellectual Property Rights
- c) Spirituality
- d) Kohlberg's Theory
- e) Character
- f) Cooperation

Artificial Intelligence (BTN05601)

Day & Date: Tuesday, 21-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) What is Artificial intelligence?
 - a) Putting your intelligence into Computer
 - b) Programming with your own intelligence
 - c) Making a Machine intelligent
 - d) Putting more memory into Computer
- 2) Which is not the commonly used programming language for AI?
 - a) RPOLOG
 - b) Java
 - c) LISP
 - d) Perl
 - e) Java script
- 3) What is state space?
 - a) The whole problem
 - b) Your Definition to a problem
 - c) Problem you design
 - d) Representing your problem with variable and parameter
 - e) A space where You know the solution.
- 4) A production rule consists of _____
 - a) A set of Rule
 - b) A sequence of steps
 - c) Both (a) and (b)
 - d) Arbitrary representation to problem
 - e) Directly getting solution
- 5) Which search method takes less memory?
 - a) Depth-first search
 - b) Breadth-first search
 - c) Both (a) and (b)
 - d) Linear search
 - e) Optimal search

- 6) A heuristic is a way of trying _____.
 a) To discover something or an idea embedded in a program
 b) To search and measure how far a node in a search tree seems to be from a goal
 c) To compare two nodes in a search tree to see if one is better than the other
 d) Only (a) and (b)
 e) Only (a), (b) and (c)
- 7) A* algorithm is based on _____.
 a) Breadth-First-Search
 b) Depth-First-Search
 c) Best-First-Search
 d) Hill climbing
 e) Bulkworld Problem
- 8) Which is the best way to go for Game playing problem?
 a) Linear approach
 b) Heuristic approach
 c) Random approach
 d) Optimal approach
 e) Stratified approach
- 9) How do you represent "All dogs have tails"?
 a) $\forall x: \text{dog}(x) \rightarrow \text{tail}(x)$
 b) $\forall x: \text{dog}(x) \rightarrow \text{tail}(y)$
 c) $\forall x: \text{dog}(y) \rightarrow \text{tail}(x)$
 d) $\forall x: \text{dog}(x) \rightarrow \text{tail}(x)$
 e) $\forall x: \text{dog}(x) \rightarrow \text{tail}(y)$
- 10) Which is not a property of representation of knowledge?
 a) Representational Verification
 b) Representational Adequacy
 c) Inferential Adequacy
 d) Inferential Efficiency
 e) Acquisitional Efficiency
- 11) What are you predicating by the logic: $\forall x: \exists y: \text{loyalto}(x, y)$?
 a) Everyone is loyal to some one
 b) Everyone is loyal to all
 c) Everyone is not loyal to someone
 d) Everyone is loyal
 e) Everyone is not loyal
- 12) Which is not Familiar Connectives in First Order Logic?
 a) and
 b) iff
 c) or
 d) not
 e) either a or
- 13) Which is not a type of First Order Logic (FOL) Sentence?
 a) Atomic sentences
 b) Complex sentences
 c) Quantified sentence
 d) Quality Sentence
 e) Simple sentence
- 14) Which is not a Goal-based agent?
 a) Inference
 b) Search
 c) Planning
 d) Conclusion
 e) Dynamic search

T. Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: March/April - 2024
INFORMATION TECHNOLOGY ENGINEERING
Artificial Intelligence (BTN05601)

Day & Date: Tuesday, 21-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

- Q.2 Attempt any three** **12**
- a) What is Heuristic search? List the algorithms that use Heuristics.
 - b) A* may go into over and under estimations - Justify.
 - c) List the different Knowledge representation approaches.
 - d) Illustrate 'DFID' with an appropriate example.
 - e) What are AI systems? List their characteristics.
- Q.3 Attempt any two.** **08**
- a) Write and illustrate with an example the 'Hill Climbing' algorithm.
 - b) Compare and contrast between A* and AO* algorithms.
 - c) Compare between beam search and Taboo search algorithms.
- Q.4 Attempt any one.** **08**
- a) Illustrate the basic steps involved in designing an automatic "Teeth Brushing System" using an artificial intelligent approach.
 - b) What is beam stack search? How is it attained?

Section – II

- Q.5 Attempt any four. 12**
- a) Give the semantic network for 'Ragging is prohibited'.
 - b) Compare between monotonic and non-monotonic reasoning.
 - c) Where are measures of belief and disbelief used? Illustrate.
 - d) What are expert systems?
 - e) What are scripts? Write a brief script for an encounter.
- Q.6 Attempt any two 08**
- a) What is constraint satisfaction? State the steps involved.
 - b) Use the following statements
 - i) The custom officials searched everyone who entered the country who was not a VIP.
 - ii) Some of the drug pushers entered the country and they were only searched by drug pushers.
 - iii) No drug pusher was a VIP.Conclude using an appropriate AI method that - some of the officials were drug pushers
 - c) Illustrate the working of alpha and beta cuts in game tree.
- Q.7 Attempt any one. 08**
- a) State Baye's Theorem. How is it related to certainty factors?
 - b) Compare between procedure and declarative Knowledge.

T. Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2024
INFORMATION TECHNOLOGY ENGINEERING
Artificial Intelligence (BTN05601)

Day & Date: Tuesday, 21-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.
 4) Assume data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) A heuristic is a way of trying _____.
 - a) To discover something or an idea embedded in a program
 - b) To search and measure how far a node in a search tree seems to be from a goal
 - c) To compare two nodes in a search tree to see if one is better than the other
 - d) Only (a) and (b)
 - e) Only (a), (b) and (c)
- 2) A* algorithm is based on _____.

a) Breadth-First-Search	b) Depth-First-Search
c) Best-First-Search	d) Hill climbing
e) Bulkworld Problem	
- 3) Which is the best way to go for Game playing problem?

a) Linear approach	b) Heuristic approach
c) Random approach	d) Optimal approach
e) Stratified approach	
- 4) How do you represent "All dogs have tails"?

a) $\forall x: \text{dog}(x) \rightarrow \text{has tail}(x)$	b) $\forall x: \text{dog}(x) \rightarrow \text{has tail}(y)$
c) $\forall x: \text{dog}(y) \rightarrow \text{has tail}(x)$	d) $\forall x: \text{dog}(x) \rightarrow \text{has tail}(x)$
e) $\forall x: \text{dog}(x) \rightarrow \text{has tail}(y)$	
- 5) Which is not a property of representation of knowledge?
 - a) Representational Verification
 - b) Representational Adequacy
 - c) Inferential Adequacy
 - d) Inferential Efficiency
 - e) Acquisitional Efficiency

- 6) What are you predicating by the logic: $\forall x : \exists y: \text{loyalto}(x, y)$?
- Everyone is loyal to some one
 - Everyone is loyal to all
 - Everyone is not loyal to someone
 - Everyone is loyal
 - Everyone is not loyal
- 7) Which is not Familiar Connectives in First Order Logic?
- and
 - iff
 - or
 - not
 - either a or
- 8) Which is not a type of First Order Logic (FOL) Sentence?
- Atomic sentences
 - Complex sentences
 - Quantified sentence
 - Quality Sentence
 - Simple sentence
- 9) Which is not a Goal-based agent?
- Inference
 - Search
 - Planning
 - Conclusion
 - Dynamic search
- 10) What is Artificial intelligence?
- Putting your intelligence into Computer
 - Programming with your own intelligence
 - Making a Machine intelligent
 - Putting more memory into Computer
- 11) Which is not the commonly used programming language for AI?
- RPOLOG
 - Java
 - LISP
 - Perl
 - Java script
- 12) What is state space?
- The whole problem
 - Your Definition to a problem
 - Problem you design
 - Representing your problem with variable and parameter
 - A space where You know the solution.
- 13) A production rule consists of _____
- A set of Rule
 - A sequence of steps
 - Both (a) and (b)
 - Arbitrary representation to problem
 - Directly getting solution
- 14) Which search method takes less memory?
- Depth-first search
 - Breadth-first search
 - Both (a) and (b)
 - Linear search
 - Optimal search

Set S

T. Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: March/April - 2024
INFORMATION TECHNOLOGY ENGINEERING
Artificial Intelligence (BTN05601)

Day & Date: Tuesday, 21-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

- Q.2 Attempt any three** **12**
- a) What is Heuristic search? List the algorithms that use Heuristics.
 - b) A* may go into over and under estimations - Justify.
 - c) List the different Knowledge representation approaches.
 - d) Illustrate 'DFID' with an appropriate example.
 - e) What are AI systems? List their characteristics.
- Q.3 Attempt any two.** **08**
- a) Write and illustrate with an example the 'Hill Climbing' algorithm.
 - b) Compare and contrast between A* and AO* algorithms.
 - c) Compare between beam search and Taboo search algorithms.
- Q.4 Attempt any one.** **08**
- a) Illustrate the basic steps involved in designing an automatic "Teeth Brushing System" using an artificial intelligent approach.
 - b) What is beam stack search? How is it attained?

Section – II

- Q.5 Attempt any four.** **12**
- a) Give the semantic network for 'Ragging is prohibited'.
 - b) Compare between monotonic and non-monotonic reasoning.
 - c) Where are measures of belief and disbelief used? Illustrate.
 - d) What are expert systems?
 - e) What are scripts? Write a brief script for an encounter.
- Q.6 Attempt any two** **08**
- a) What is constraint satisfaction? State the steps involved.
 - b) Use the following statements
 - i) The custom officials searched everyone who entered the country who was not a VIP.
 - ii) Some of the drug pushers entered the country and they were only searched by drug pushers.
 - iii) No drug pusher was a VIP.Conclude using an appropriate AI method that - some of the officials were drug pushers
 - c) Illustrate the working of alpha and beta cuts in game tree.
- Q.7 Attempt any one.** **08**
- a) State Baye's Theorem. How is it related to certainty factors?
 - b) Compare between procedure and declarative Knowledge.

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2024
INFORMATION TECHNOLOGY ENGINEERING
Software Engineering (BTN05603)

Day & Date: Monday, 27-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.
 4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct option from the following.

14

- 1) What is the first step in the software development lifecycle?
 - a) System Design
 - b) Coding
 - c) System Testing
 - d) Preliminary Investigation and Analysis
- 2) Which of the following represents the life-cycle of software development?
 - a) Analysis -> Design -> Coding -> testing -> operations and maintenance
 - b) Analysis -> Design -> Coding -> operations and maintenance -> testing
 - c) Design -> Analysis -> Coding -> testing -> operations and maintenance
 - d) Design -> Analysis -> Coding -> operations and maintenance -> testing
- 3) Which parameters are essentially used while computing the software development cost?

a) Hardware and Software Costs	b) Effort Costs
c) Travel and Training Costs	d) All of the above
- 4) Which of the following is/are level/s of Testing?

a) Integration testing	b) Unit testing
c) System testing	d) All of the above
- 5) _____ begins after successful testing of the developed system.

a) System Design	b) Requirement Analysis
c) Deployment	d) None of the mentioned above
- 6) Testing beyond normal operational capacity is _____.

a) Load testing	b) Performance testing
c) Stress testing	d) All of these
- 7) Which technique is applied for usability testing?

a) White box	b) Black box
c) Grey box	d) Combination of all

- 8) Full Form of the COCOMO model is _____.
a) Common Cost Estimation Model.
b) Constructive Cost Estimation Model.
c) Complete Cost Estimation Model.
d) Comprehensive Cost Estimation Model
- 9) Agile Software Development is based on _____.
a) incremental development
b) iterative development
c) linear development
d) both incremental and iterative development
- 10) The working culture of an Agile team is _____?
a) Collective
b) Connective
c) Contemplative
d) Collaborative
- 11) Errors, Defects, Failures are synonymous.
a) True
b) False
- 12) Software quality is measured by functional as well as non functional attributes.
a) True
b) False
- 13) With reference to the waterfall model, each phase must be completed before the _____ can begin and there is no overlapping in the phases.
a) Previous phase
b) Next phase
c) Both A and B
d) None of the mentioned above
- 14) In Scrum, when is a Sprint Over?
a) When all the Sprint Backlog Items are completed
b) When the Product Owner suggests
c) When all the Sprint Backlog tasks are completed
d) When the time box expires

Seat No.

Software Engineering (BTN05603)

Day & Date: Monday, 27-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section – I

- Q.2 Attempt any Three. 12**
- a) Describe Iterative Development Process Model.
 - b) Write a short note on Component and Connector (C&C) architecture view.
 - c) Explain the Role of Software Architecture.
 - d) Describe the desired characteristics of the software process.
- Q.3 Attempt any Two. 16**
- a) Describe the Software Development process in detail.
 - b) Construct a DFD for workers payment system. Prepare the data dictionary of the system.
 - c) Describe the general structure of SRS.

Section – II

- Q.4 Attempt any Three. 12**
- a) Explain White-Box testing.
 - b) Write a short note on Configuration Management.
 - c) What do you mean by effort estimation? What are the methods of effort estimation?
 - d) Write a short note on Risk Management.
- Q.5 Attempt any Two. 16**
- a) Write a short note on Unit testing, Integration testing, System testing and Acceptance testing.
 - b) What is Agile Project Management? Explain its principles.
 - c) Explain Testing Process in detail.

Principles of Management: Practicing Ethics, Responsibility,
Sustainability (BTN05609)

Day & Date: Friday, 31-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 50

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 20 Minutes

Marks: 10

Q.1 Choose the correct option from the following. 10

- 1) _____ is the study of moral principles that governs a person's behaviour or conducting an activity.

a) Ethics	b) Kinesics
c) Proxemics	d) None
- 2) _____ can help engineers make correct decisions and become better professionals.

a) Study of English	b) Study of Math
c) Study of ethics	d) None
- 3) In how many types responsibilities can be distinguished?

a) 4	b) 2
c) 3	d) 1
- 4) How an engineer views her/his responsibilities, depends on the _____ basic attitudes towards responsibilities.

a) 3	b) 2
c) 1	d) 0
- 5) _____ view holds that engineers are responsible to conform to the standard procedures of their profession and fulfil the basic duties defined by the terms of their employment.

a) Beyond one's duty	b) Reasonable care
c) Minimalist	d) None
- 6) _____ refers to the principles of right and wrong behaviour.

a) Moral	b) Oral
c) Coral	d) None
- 7) In the _____ approach, the action provides the most good over least harm.

a) Utilitarian	b) Right
c) Fairness	d) Virtue

- 8) The list of moral rights include _____.
- a) To make one's own choices about what kind of life to lead
 - b) To be told the truth
 - c) Not to be injured
 - d) Above all
- 9) The _____ approach is based on the belief that all equal should be treated equally.
- a) Virtue
 - b) Fairness
 - c) Right
 - d) None
- 10) Which approach is a very ancient approach?
- a) Virtue
 - b) Right
 - c) Fairness
 - d) Utilitarian

T.Y. (B.Tech.) (Sem-II) (New) (CBCS) Examination: March/April-2024
INFORMATION TECHNOLOGY ENGINEERING
Principles of Management: Practicing Ethics, Responsibility,
Sustainability (BTN05609)

Day & Date: Friday, 31-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 40

Instructions: 1) All questions are compulsory.
 2) Figures to the right indicates full marks.

Section – I

- Q.2 Attempt any two** **10**
- a) What is Engineering Ethics? Why is it required to be studied by blooming engineers?
 - b) What are self directed virtues? How are they obtained?
 - c) Compare between Ethics and Morality.
- Q.3 Attempt any one** **10**
- a) Illustrate the various types of virtues with examples.
 - b) How moral autonomy is supported by theories?

Section – II

- Q.4 Attempt any two** **10**
- a) What is a resource? How can it be innovated and conserved?
 - b) How is switching out to renewable resources advantageous? Illustrate.
 - c) What is resource technology symbiosis related to? Illustrate
- Q.5 Attempt any one** **10**
- a) Give the basics of economic sustainability. Illustrate each
 - b) How is resource conservation carried out?

Seat No.	
----------	--

T.Y. (B.Tech.) (Sem-II) (New) (CBCS) Examination: March/April-2024
INFORMATION TECHNOLOGY ENGINEERING
Principles of Management: Practicing Ethics, Responsibility, Sustainability (BTN05609)

Day & Date: Friday, 31-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 50

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 20 Minutes

Marks: 10

Q.1 Choose the correct option from the following. 10

- 1) The _____ approach is based on the belief that all equal should be treated equally.

a) Virtue	b) Fairness
c) Right	d) None
- 2) Which approach is a very ancient approach?

a) Virtue	b) Right
c) Fairness	d) Utilitarian
- 3) _____ is the study of moral principles that governs a person's behaviour or conducting an activity.

a) Ethics	b) Kinesics
c) Proxemics	d) None
- 4) _____ can help engineers make correct decisions and become better professionals.

a) Study of English	b) Study of Math
c) Study of ethics	d) None
- 5) In how many types responsibilities can be distinguished?

a) 4	b) 2
c) 3	d) 1
- 6) How an engineer views her/his responsibilities, depends on the _____ basic attitudes towards responsibilities.

a) 3	b) 2
c) 1	d) 0
- 7) _____ view holds that engineers are responsible to conform to the standard procedures of their profession and fulfil the basic duties defined by the terms of their employment.

a) Beyond one's duty	b) Reasonable care
c) Minimalist	d) None

- 8) _____ refers to the principles of right and wrong behaviour.
- | | |
|----------|---------|
| a) Moral | b) Oral |
| c) Coral | d) None |
- 9) In the _____ approach, the action provides the most good over least harm.
- | | |
|----------------|-----------|
| a) Utilitarian | b) Right |
| c) Fairness | d) Virtue |
- 10) The list of moral rights include _____.
- | |
|--------------------------------------------------------------|
| a) To make one's own choices about what kind of life to lead |
| b) To be told the truth |
| c) Not to be injured |
| d) Above all |

Natural Language Processing (BTN05612)

Day & Date: Monday, 03-06-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.
 4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct option from the following.

14

- 1) _____ is the process of identifying and extracting opinions and emotions expressed in text data.

a) Text Classification	b) Sentiment Analysis
c) Speech Recognition	d) Text Summarization
- 2) Chatbots and virtual assistants use NLP to understand natural language and provide human-like responses to _____.
 - a) social media posts, and customer review
 - b) queries and requests
 - c) automatically identify and classify named entities
 - d) recognize and transcribe spoken language
- 3) Algorithms are often used in NLP applications to _____.
 - a) Predict solutions readily available
 - b) automatically learn patterns and relationships in language data
 - c) Fix language constructs
 - d) Decide language sequences
- 4) Speech processing is a complex and highly coordinated process that involves multiple areas of the _____ working together.

a) Heart	b) Brain
c) Soul	d) Mind
- 5) Sounds produced by the lower lip and upper teeth _____.

a) Bilabial	b) Labiodental
c) Alveolar	d) Palatal
- 6) Word boundary detection is the process of identifying the _____ between words in a stream of spoken or written language.

a) mean	b) boundary
c) median	d) variance

- 7) What is the main challenge/s of NLP?
a) Handling Ambiguity of Sentences
b) Handling Tokenization
c) Handling POS-Tagging
d) All of the mentioned
- 8) What is Morphological Segmentation?
a) Identify the class of the morphemes
b) Does Discourse Analysis
c) Is an extension of propositional logic
d) None of the mentioned Algorithms are often used in NLP
- 9) "Rohan Was With Her, They Both Go Together", In The Given Sentence Who Is Her Is Unclear, Specify The Type Of Ambiguity?
a) Anaphoric Ambiguity b) Semantic Ambiguity
c) Pragmatic Ambiguity d) Lexical Ambiguity
- 10) Which of the following technique is used to remove semantic ambiguity?
a) Word Sense Disambiguation b) Fuzzy Logic
c) Shallow Semantic Analysis d) Syntactic analysis
- 11) Which of these terms refer to the study of speech process?
a) Phonetics b) Phonetic substances
c) Phonology d) Semantics
- 12) Which of these terms refer to the study of hearing and perception of speech sounds?
a) Auditory phonetics b) Acoustic phonetics
c) Articulatory phonetics d) Laboratory phonetics
- 13) Which algorithm is used for solving temporal probabilistic reasoning?
a) Hill-climbing search b) Hidden markov model
c) Depth-first search d) Breadth-first search
- 14) Which algorithm works by first running the standard forward pass to compute?
a) Smoothing b) Modified smoothing
c) HMM d) Depth-first search algorithm

T.Y. (B.Tech.) (Sem-II) (New) (CBCS) Examination: March/April - 2024
INFORMATION TECHNOLOGY ENGINEERING
Natural Language Processing (BTN05612)

Day & Date: Monday, 03-06-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
 2) Figures to the right indicate full marks.

Section – I

- Q.2 Attempt any three.** **12**
- List the different theories w.r.t word analysis.
 - Illustrate Top -down parsing algorithm with an appropriate example.
 - What is speech processing? State the steps involved.
 - What are Worn-net? Give it's characteristics?
 - Give the advantage of using 'Word sense disambiguity'.
- Q.3 Attempt any two.** **08**
- Illustrate the various types of NLP.
 - How ML is used to generate a good NLP analytical structure?
 - List various applications of NLP. Illustrate any one
- Q.4 Attempt any One.** **08**
- Illustrate the morphology paradigms. How finite state machines help?
 - Give the basic characteristics of Morphological diversity in Indian languages

Section – II

- Q.5 Attempt any three.** **12**
- What is Labeling in NLP? Give the steps involved.
 - How are graphical models for sequences developed?
 - What is phonology? Illustrate.
 - Illustrate the terms 'Precision and Recall' How are they used to compute F- measure?
 - State the characteristics of Baum Welch Algorithm.
- Q.6 Attempt any two.** **08**
- What is Phonology? What are the methods to deal with it?
 - How are semantic relations dealt with in NLP? State various methods.
 - Illustrate the working of Sentiment with an example.
- Q.7 Attempt any One.** **08**
- What are the components of a Question Answering system in multilingual systems? Illustrate.
 - What is CLIR? How does it work?

- 5) Which of the following technique is used to remove semantic ambiguity?
 - a) Word Sense Disambiguation
 - b) Fuzzy Logic
 - c) Shallow Semantic Analysis
 - d) Syntactic analysis
- 6) Which of these terms refer to the study of speech process?
 - a) Phonetics
 - b) Phonetic substances
 - c) Phonology
 - d) Semantics
- 7) Which of these terms refer to the study of hearing and perception of speech sounds?
 - a) Auditory phonetics
 - b) Acoustic phonetics
 - c) Articulatory phonetics
 - d) Laboratory phonetics

- 8) Which algorithm is used for solving temporal probabilistic reasoning?
a) Hill-climbing search b) Hidden markov model
c) Depth-first search d) Breadth-first search
- 9) Which algorithm works by first running the standard forward pass to compute?
a) Smoothing b) Modified smoothing
c) HMM d) Depth-first search algorithm
- 10) _____ is the process of identifying and extracting opinions and emotions expressed in text data.
a) Text Classification b) Sentiment Analysis
c) Speech Recognition d) Text Summarization
- 11) Chatbots and virtual assistants use NLP to understand natural language and provide human-like responses to _____.
a) social media posts, and customer review
b) queries and requests
c) automatically identify and classify named entities
d) recognize and transcribe spoken language
- 12) Algorithms are often used in NLP applications to _____.
a) Predict solutions readily available
b) automatically learn patterns and relationships in language data
c) Fix language constructs
d) Decide language sequences
- 13) Speech processing is a complex and highly coordinated process that involves multiple areas of the _____ working together.
a) Heart b) Brain
c) Soul d) Mind
- 14) Sounds produced by the lower lip and upper teeth _____.
a) Bilabial b) Labiodental
c) Alveolar d) Palatal

T.Y. (B.Tech.) (Sem-II) (New) (CBCS) Examination: March/April - 2024
INFORMATION TECHNOLOGY ENGINEERING
Natural Language Processing (BTN05612)

Day & Date: Monday, 03-06-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

Instructions: 1) All questions are compulsory.
 2) Figures to the right indicate full marks.

Section – I

- Q.2 Attempt any three.** **12**
- List the different theories w.r.t word analysis.
 - Illustrate Top -down parsing algorithm with an appropriate example.
 - What is speech processing? State the steps involved.
 - What are Worn-net? Give it's characteristics?
 - Give the advantage of using 'Word sense disambiguity'.
- Q.3 Attempt any two.** **08**
- Illustrate the various types of NLP.
 - How ML is used to generate a good NLP analytical structure?
 - List various applications of NLP. Illustrate any one
- Q.4 Attempt any One.** **08**
- Illustrate the morphology paradigms. How finite state machines help?
 - Give the basic characteristics of Morphological diversity in Indian languages

Section – II

- Q.5 Attempt any three.** **12**
- What is Labeling in NLP? Give the steps involved.
 - How are graphical models for sequences developed?
 - What is phonology? Illustrate.
 - Illustrate the terms 'Precision and Recall' How are they used to compute F- measure?
 - State the characteristics of Baum Welch Algorithm.
- Q.6 Attempt any two.** **08**
- What is Phonology? What are the methods to deal with it?
 - How are semantic relations dealt with in NLP? State various methods.
 - Illustrate the working of Sentiment with an example.
- Q.7 Attempt any One.** **08**
- What are the components of a Question Answering system in multilingual systems? Illustrate.
 - What is CLIR? How does it work?

Seat No.

Set **P**

Fourth Y. (B.Tech.) (Sem-I) (Old) (CBCS) Examination: March/April-2024
INFORMATION TECHNOLOGY ENGINEERING
Machine Learning (197046701)

Day & Date: Wednesday, 15-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
 2) Figures to the right indicate full marks.
 3) Assume data wherever necessary.

Section – I

- Q.2 Attempt any four of the following** **12**
- Differentiate Supervised and Unsupervised Machine Learning.
 - Describe common terminologies of Decision Trees and Naive Bayes classification algorithm.
 - Explain any two business applications of machine learning.
 - How can we relate standard deviation and variance?
 - Why is validation necessary in machine learning?
- Q.3 Answer any One from the following questions** **08**
- With the help of an example describe in detail Decision Tree Algorithm. Explain the concepts of Entropy and Information gain.
 - What is Descending the Error Curve and what does it represent. Illustrate with an example.
- Q.4 Answer the following question.** **08**
- What is learning curve? To create a learning curve chart what are the points must be considered while implementing learning cure?

Section – II

- Q.5 Attempt any Four of the following questions.** **12**
- Explain the process of feature engineering.
 - What is the difference between in sample and out of sample?
 - Define bias, variance underfitting, overfitting, bias Vs. variance tradeoff.
 - What is standard deviation? Give the steps to find Standard Deviation.
 - Explain in detail the Machine Learning Cycle.
- Q.6 Answer any One from the following questions** **08**
- What is Cross Validation? Explain the process of implementing Cross validation methods.
 - What is feature extraction, feature construction, and feature selection? Explain with example.
- Q.7 Answer the following question** **08**
- A class of students took a math test. The scores for the test were 85, 86, 100, 76, 81, 93, 84, 99, 71, 69, 93, 85, 81, 87, and 89. Calculate the mean, variance and standard deviation and determine when the teacher knows that most students are performing around the same level

Set **Q**

Fourth Y. (B.Tech.) (Sem-I) (Old) (CBCS) Examination: March/April-2024
INFORMATION TECHNOLOGY ENGINEERING
Machine Learning (197046701)

Day & Date: Wednesday, 15-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.
 4) Assume data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) What does dimensionality reduction reduce?
 - a) Collinearity
 - b) Stochastic
 - c) Entropy
 - d) Performance
- 2) Some telecommunication company wants to segment their customers into distinct groups, this is an example of _____.
 - a) supervised learning
 - b) unsupervised learning
 - c) data extraction
 - d) reinforcement learning
- 3) Which of the following is the best machine learning method?
 - a) Accuracy
 - b) Scalable
 - c) Fast
 - d) All of above
- 4) In multiclass classification number of classes must be _____.
 - a) equals to two
 - b) less than two
 - c) greater than two
 - d) None
- 5) You are given seismic data and you want to predict next earthquake, this is an example of _____.
 - a) supervised learning
 - b) unsupervised learning
 - c) reinforcement learning
 - d) dimensionality reduction
- 6) Prediction is _____.
 - a) discipline in statistics used to find projections in multidimensional data
 - b) value entered in database by expert
 - c) the result of application of specific theory or rule in a specific case
 - d) independent of data
- 7) Impact of high variance on the training set?
 - a) underfitting
 - b) overfitting
 - c) both underfitting & overfitting
 - d) depends upon the dataset
- 8) If machine learning model output doesn't involve target variable, then that model is called as _____.
 - a) predictive model
 - b) descriptive model
 - c) reinforcement learning
 - d) all of the above

- 9) In what type of learning labelled training data is used _____.
- a) Supervised learning b) Unsupervised learning
c) Reinforcement learning d) Active learning
- 10) In the example of predicting number of babies based on stork's population, Number of babies is _____.
- a) Feature b) Observation
c) Outcome d) Attribute
- 11) Following are the descriptive models _____.
- a) Classification b) Clustering
c) Association rule d) Both a and b
- 12) In following type of feature selection method, we start with empty feature set _____.
- a) backward feature selection b) forward feature selection
c) All of above d) None of above
- 13) A person trained to interact with a human expert in order to capture their knowledge.
- a) knowledge developer b) knowledge programmer
c) knowledge engineer d) knowledge extractor
- 14) What characterize unlabeled examples in machine learning _____.
- a) there is plenty of confusing knowledge
b) there is prior knowledge
c) there is no confusing knowledge
d) there is no prior knowledge

Seat No.

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct option from the following.

14

- 1) Which of the following is/are White box technique?
 - a) Statement Testing
 - b) Decision Testing
 - c) Condition Coverage
 - d) All of the mentioned
- 2) Alpha testing is done at _____.
 - a) Developer's end
 - b) User's end
 - c) Developer's & User's end
 - d) None of the mentioned
- 3) What is error guessing in software testing?
 - a) Test control management techniques
 - b) Test verification techniques
 - c) Test execution techniques
 - d) Test case design/ data management techniques
- 4) _____ are the Testers of Unit Testing.
 - a) Developers
 - b) Business Analysts
 - c) Independent Testers
 - d) Customers
- 5) Which Test Document describes the Exit Criteria of Testing?
 - a) Test Case
 - b) Test Plan
 - c) Test Summary Report
 - d) Defect Report
- 6) _____ is not a Software Test Life Cycle Phase.
 - a) Requirements Gathering
 - b) Test Planning
 - c) Test Closure
 - d) Test Design
- 7) What is the relationship between testing and quality assurance?
 - a) QA is part of a complete testing process
 - b) Testing and QA are two terms for the same thing
 - c) Testing is a part of complete QA process
 - d) When Testing is over it becomes QA
- 8) Which of the following is not another name of white box testing?
 - a) Structural testing
 - b) Behavioral testing
 - c) Glass box testing
 - d) None of the mentioned

- 9) Which of the following is non-functional testing?
a) Black box testing b) Performance testing
c) Unit testing d) None of the mentioned
- 10) Unit testing is done by _____.
a) Users b) Developers
c) Customers d) Analyst
- 11) Which of the following is black box testing?
a) Basic path testing b) Boundary value analysis
c) Code path analysis d) None of the mentioned
- 12) Beta testing is done at _____.
a) User's end b) Developer's end
c) Both a & b d) None
- 13) Testing done without planning and Documentation is called _____.
a) Unit testing b) Regression testing
c) Adhoc testing d) None of the mentioned
- 14) Validation refers to the set of tasks that ensure that software correctly implements a specific function.
a) True b) False

Day & Date: Friday, 17-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary and mention it clearly.

Section – I

- Q.2 Answer any FOUR from the following questions** **12**
- a) Describe in short on following levels of Testing
 - i) Proposal Testing
 - ii) Requirement Testing
 - iii) Design Testing
 - iv) Code Review
 - v) Integration testing
 - b) Differentiate between following levels of Testing.
 - i) Unit testing and Module Testing
 - ii) White Box testing and Black Box testing
 - c) Describe Alpha, Beta, Gamma testing and Acceptance testing during each phase of Software development Testing.
 - d) Explain the concept Test Team Approach.
 - e) Which skills are expected in a good tester?
- Q.3 Answer any ONE from the following questions** **08**
- a) Describe in detail Defect management Process.
 - b) Explain in detail Testing Methodology.
- Q.4 Answer the following question.** **08**
- With a neat diagram explain the following levels of software testing.
- Note: Consider Internet Banking Modules.**
- i) Unit Testing
 - ii) Module Testing
 - iii) Integration Testing

Section – II

- Q.5 Answer any FOUR from the following questions. 12**
- a) What is Quality and Software Quality? Explain the Software Quality Dilemma?
 - b) What are the Benefits of Automation and Tools?
 - c) List out the ISO 9000 Quality Standards.
 - d) Describe various Goals and Metrics of Software Quality Assurance.
 - e) What are the steps of Writing and Tracking Test Cases?
- Q.6 Answer any ONE from the following questions. 08**
- a) Describe in detail the process of Capability Maturity Model (CMM).
 - b) Describe the White box testing techniques, Data Coverage and Code Coverage.
- Q.7 Answer the following question. 08**
- Discuss about The Goal of Test Case Planning and also explain Test Case Organization and Tracking.

 - d) Defect Report
- 13)** _____ is not a Software Test Life Cycle Phase.
- a) Requirements Gathering
 - b) Test Planning
 - c) Test Closure
 - d) Test Design
- 14)** What is the relationship between testing and quality assurance?
- a) QA is part of a complete testing process
 - b) Testing and QA are two terms for the same thing
 - c) Testing is a part of complete QA process
 - d) When Testing is over it becomes QA

Seat No.	
-----------------	--

Fourth. Y. (B.Tech.) (Sem-I) (Old) (CBCS) Examination: March/April-2024
INFORMATION TECHNOLOGY ENGINEERING
Software Testing and Quality Assurance (197046703)

Day & Date: Friday, 17-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
 2) Figures to the right indicate full marks.
 3) Assume suitable data wherever necessary and mention it clearly.

Section – I

- Q.2 Answer any FOUR from the following questions** **12**
- a) Describe in short on following levels of Testing
 - i) Proposal Testing
 - ii) Requirement Testing
 - iii) Design Testing
 - iv) Code Review
 - v) Integration testing
 - b) Differentiate between following levels of Testing.
 - i) Unit testing and Module Testing
 - ii) White Box testing and Black Box testing
 - c) Describe Alpha, Beta, Gamma testing and Acceptance testing during each phase of Software development Testing.
 - d) Explain the concept Test Team Approach.
 - e) Which skills are expected in a good tester?
- Q.3 Answer any ONE from the following questions** **08**
- a) Describe in detail Defect management Process.
 - b) Explain in detail Testing Methodology.
- Q.4 Answer the following question.** **08**
- With a neat diagram explain the following levels of software testing.
- Note: Consider Internet Banking Modules.**
- i) Unit Testing
 - ii) Module Testing
 - iii) Integration Testing

Section – II

- Q.5 Answer any FOUR from the following questions. 12**
- a) What is Quality and Software Quality? Explain the Software Quality Dilemma?
 - b) What are the Benefits of Automation and Tools?
 - c) List out the ISO 9000 Quality Standards.
 - d) Describe various Goals and Metrics of Software Quality Assurance.
 - e) What are the steps of Writing and Tracking Test Cases?
- Q.6 Answer any ONE from the following questions. 08**
- a) Describe in detail the process of Capability Maturity Model (CMM).
 - b) Describe the White box testing techniques, Data Coverage and Code Coverage.
- Q.7 Answer the following question. 08**
- Discuss about The Goal of Test Case Planning and also explain Test Case Organization and Tracking.

Fourth. Y. (B.Tech.) (Sem-I) (Old) (CBCS) Examination: March/April-2024
INFORMATION TECHNOLOGY ENGINEERING
Software Testing and Quality Assurance (197046703)

Day & Date: Friday, 17-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.
 4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct option from the following.

14

- 1) Which of the following is black box testing?
 - a) Basic path testing
 - b) Boundary value analysis
 - c) Code path analysis
 - d) None of the mentioned
- 2) Beta testing is done at _____.
 - a) User's end
 - b) Developer's end
 - c) Both a & b
 - d) None
- 3) Testing done without planning and Documentation is called _____.
 - a) Unit testing
 - b) Regression testing
 - c) Adhoc testing
 - d) None of the mentioned
- 4) Validation refers to the set of tasks that ensure that software correctly implements a specific function.
 - a) True
 - b) False
- 5) Which of the following is/are White box technique?
 - a) Statement Testing
 - b) Decision Testing
 - c) Condition Coverage
 - d) All of the mentioned
- 6) Alpha testing is done at _____.
 - a) Developer's end
 - b) User's end
 - c) Developer's & User's end
 - d) None of the mentioned
- 7) What is error guessing in software testing?
 - a) Test control management techniques
 - b) Test verification techniques
 - c) Test execution techniques
 - d) Test case design/ data management techniques
- 8) _____ are the Testers of Unit Testing.
 - a) Developers
 - b) Business Analysts
 - c) Independent Testers
 - d) Customers
- 9) Which Test Document describes the Exit Criteria of Testing?
 - a) Test Case
 - b) Test Plan
 - c) Test Summary Report
 - d) Defect Report

- 10) _____ is not a Software Test Life Cycle Phase.
- a) Requirements Gathering
 - b) Test Planning
 - c) Test Closure
 - d) Test Design
- 11) What is the relationship between testing and quality assurance?
- a) QA is part of a complete testing process
 - b) Testing and QA are two terms for the same thing
 - c) Testing is a part of complete QA process
 - d) When Testing is over it becomes QA
- 12) Which of the following is not another name of white box testing?
- a) Structural testing
 - b) Behavioral testing
 - c) Glass box testing
 - d) None of the mentioned
- 13) Which of the following is non-functional testing?
- a) Black box testing
 - b) Performance testing
 - c) Unit testing
 - d) None of the mentioned
- 14) Unit testing is done by _____.
- a) Users
 - b) Developers
 - c) Customers
 - d) Analyst

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct option from the following.

14

- 1) _____ is not a Software Test Life Cycle Phase.

a) Requirements Gathering	b) Test Planning
c) Test Closure	d) Test Design
- 2) What is the relationship between testing and quality assurance?

a) QA is part of a complete testing process
b) Testing and QA are two terms for the same thing
c) Testing is a part of complete QA process
d) When Testing is over it becomes QA
- 3) Which of the following is not another name of white box testing?

a) Structural testing	b) Behavioral testing
c) Glass box testing	d) None of the mentioned
- 4) Which of the following is non-functional testing?

a) Black box testing	b) Performance testing
c) Unit testing	d) None of the mentioned
- 5) Unit testing is done by _____.

a) Users	b) Developers
c) Customers	d) Analyst
- 6) Which of the following is black box testing?

a) Basic path testing	b) Boundary value analysis
c) Code path analysis	d) None of the mentioned
- 7) Beta testing is done at _____.

a) User's end	b) Developer's end
c) Both a & b	d) None
- 8) Testing done without planning and Documentation is called _____.

a) Unit testing	b) Regression testing

Max. Marks: 70

- Instructions:**
- 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 - 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 - 3) Figures to the right indicates full marks.
 - 4) Figures drawn by pencil, ruler only indicate full marks.
 - 5) Do not use pen to draw and label the diagrams.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the given options.

14

- 1) Which of the following is NOT a step in the KDD process?
 - a) Data cleaning and preprocessing
 - b) Data selection
 - c) Data transformation
 - d) Data visualization
- 2) Which of the following is NOT a potential issue in data mining related to the quality of the data?
 - a) Data may be incomplete
 - b) Data may be noisy or contain errors
 - c) Data may be outdated
 - d) Data may be perfectly clean and accurate
- 3) What is the main goal of data integration in data mining?
 - a) To combine data from multiple sources into a single dataset
 - b) To identify and remove duplicates in the data
 - c) To correct errors in the data
 - d) To improve the accuracy of data analysis
- 4) Market basket analysis is a technique used to identify:
 - a) Trending products in a store
 - b) Strong associations between items in a shopping basket
 - c) Weak associations between items in a shopping basket
 - d) Products with the highest sales volume
- 5) Which of the following techniques is commonly used in market basket analysis?

a) Decision trees	b) Neural networks
c) Association rule mining	d) K-means clustering

- 6) Which of the following is NOT a type of classification method in data mining?
- a) Decision tree
 - b) Logistic regression
 - c) Naive Bayes
 - d) Clustering
- 7) What does the "K" in K-nearest neighbors (KNN) classification stand for?
- a) The number of features in the data
 - b) The number of classes in the data
 - c) The number of nearest neighbors used to classify a data point
 - d) The number of dimensions in the data
- 8) Which of the following is NOT a type of clustering method?
- a) K-means
 - b) Density-based
 - c) Hierarchical
 - d) Regression
- 9) Which of the following is NOT a characteristic of hierarchical clustering?
- a) It is a top-down approach
 - b) It creates a tree-like structure
 - c) It is computationally efficient
 - d) It is sensitive to noise and outliers
- 10) What is the minimum support threshold in the Apriori algorithm?
- a) The minimum number of times an item must appear in the dataset for it to be considered for analysis
 - b) The minimum number of items that must be present in a transaction for it to be considered for analysis
 - c) The minimum probability that an association rule must meet to be considered valid
 - d) The minimum number of items that must be present in a transaction for it to be considered for association rule analysis
- 11) Which of the following is NOT a type of web mining?
- a) Web structure mining
 - b) Web content mining
 - c) Web usage mining
 - d) Web security mining
- 12) How is web content mining different from traditional data mining?
- a) Web content mining focuses on text data, while traditional data mining focuses on numerical data.
 - b) Web content mining is only applicable to the web, while traditional data mining can be applied to any data set
 - c) Web content mining requires specialized algorithms, while traditional data mining uses general.
 - d) Web content mining is more difficult to implement than traditional data mining.
- 13) Which of the following is NOT a potential application of web content mining?
- a) Sentiment analysis of online reviews
 - b) Extracting product information from e-commerce websites
 - c) Identifying trends in social media posts
 - d) Predicting stock prices based on news articles
- 14) What is the main goal of outlier detection in data mining?
- a) To identify patterns in data
 - b) To identify errors in data
 - c) To identify rare events in data
 - d) To identify relationship in data

Set **P**

Fourth Y. (B. Tech) (Sem - I) (Old) (CBCS) Examination: March/April-2024
INFORMATION TECHNOLOGY ENGINEERING
Data Mining (197046707)

Day & Date: Sunday, 19-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
 2) Figures to the right indicate full marks.
 3) Figures drawn by pencil; ruler only indicate full marks.
 3) Do not use pen to draw and label the diagrams.

Section – I

- Q.2 Attempt any three.** **12**
- a) Describe Data Mining and basic data mining tasks. List the main challenges and limitations of data mining?
 - b) In real-world data, tuples with missing values for some attributes are a common occurrence. Describe various methods for handling this problem.
 - c) Suppose a group of 12 sales price records has been sorted as follows: 5, 10, 11, 13, 15, 35, 50, 55, 72, 92, 204, 215. Partition them into three bins by each of the following methods,
 - i) equal-frequency (equi-depth) partitioning
 - ii) equal-width partitioning
 - iii) Clustering
 - d) What do you mean by data reduction? Why is it used? Write names of 3 data reduction strategies.
- Q.3 Attempt any One of the following.** **08**
- a) What are the steps involved in preparing the data for classification? Describe the data classification process with a neat diagram. How does the Naive Bayesian classification work?
OR
 - b) Discuss about constraint based association rule mining with examples and state how association mining to correlation analysis is dealt with.
- Q.4 Answer the following** **08**
- Describe KDD and the steps involved in data mining when viewed as a process of knowledge discovery in detail with diagram.

Section – II

- Q.5 Attempt any three of the following. 12**
- a) Differentiate between Clustering and Classification.
 - b) Define Outlier Detection? State briefly outlier detection methods.
 - c) Compare Data mining techniques and Web mining techniques.
 - d) Explain parallel and distributed algorithms.
- Q.6 Answer any one of the following 08**
- a) What is clustering? State with a suitable diagram the classification of clustering algorithms. Explain in detail about Agglomerative and Divisive Hierarchical Clustering.
- OR**
- b) What is the definition of the support and confidence measures used in the Apriori algorithm? Give an example for Apriori with transactions and explain Apriori-gen-algorithm.
- Q.7 Answer the following 08**
- What is web mining and how does it differ from traditional data mining? Discuss the following types of web mining:
- a) Web structure mining
 - b) Web content mining
 - c) Web usage mining

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the given options.

14

- 1) Which of the following is NOT a type of clustering method?

a) K-means	b) Density-based
c) Hierarchical	d) Regression
- 2) Which of the following is NOT a characteristic of hierarchical clustering?
 - a) It is a top-down approach
 - b) It creates a tree-like structure
 - c) It is computationally efficient
 - d) It is sensitive to noise and outliers
- 3) What is the minimum support threshold in the Apriori algorithm?
 - a) The minimum number of times an item must appear in the dataset for it to be considered for analysis
 - b) The minimum number of items that must be present in a transaction for it to be considered for analysis
 - c) The minimum probability that an association rule must meet to be considered valid
 - d) The minimum number of items that must be present in a transaction for it to be considered for association rule analysis
- 4) Which of the following is NOT a type of web mining?

a) Web structure mining	b) Web content mining
c) Web usage mining	d) Web security mining
- 5) How is web content mining different from traditional data mining?
 - a) Web content mining focuses on text data, while traditional data mining focuses on numerical data.
 - b) Web content mining is only applicable to the web, while traditional data mining can be applied to any data set
 - c) Web content mining requires specialized algorithms, while traditional data mining uses general.
 - d) Web content mining is more difficult to implement than traditional data mining.

- 6) Which of the following is NOT a potential application of web content mining?
- a) Sentiment analysis of online reviews
 - b) Extracting product information from e-commerce websites
 - c) Identifying trends in social media posts
 - d) Predicting stock prices based on news articles
- 7) What is the main goal of outlier detection in data mining?
- a) To identify patterns in data
 - b) To identify errors in data
 - c) To identify rare events in data
 - d) To identify relationship in data
- 8) Which of the following is NOT a step in the KDD process?
- a) Data cleaning and preprocessing
 - b) Data selection
 - c) Data transformation
 - d) Data visualization
- 9) Which of the following is NOT a potential issue in data mining related to the quality of the data?
- a) Data may be incomplete
 - b) Data may be noisy or contain errors
 - c) Data may be outdated
 - d) Data may be perfectly clean and accurate

 - c) Association rule mining
 - d) K-means clustering
- 10) Which of the following is NOT a type of classification method in data mining?
- a) Decision tree
 - b) Logistic regression
 - c) Naive Bayes
 - d) Clustering
- 11) What does the "K" in K-nearest neighbors (KNN) classification stand for?
- a) The number of features in the data
 - b) The number of classes in the data
 - c) The number of nearest neighbors used to classify a data point
 - d) The number of dimensions in the data
- 12) Which of the following is NOT a type of clustering method?
- a) K-means
 - b) Density-based
 - c) Hierarchical
 - d) Regression
- 13) Which of the following is NOT a characteristic of hierarchical clustering?
- a) It is a top-down approach
 - b) It creates a tree-like structure
 - c) It is computationally efficient
 - d) It is sensitive to noise and outliers
- 14) What is the minimum support threshold in the Apriori algorithm?
- a) The minimum number of times an item must appear in the dataset for it to be considered for analysis
 - b) The minimum number of items that must be present in a transaction for it to be considered for analysis
 - c) The minimum probability that an association rule must meet to be considered valid
 - d) The minimum number of items that must be present in a transaction for it to be considered for association rule analysis

Seat No.

Set **R**

Fourth Y. (B. Tech) (Sem - I) (Old) (CBCS) Examination: March/April-2024
INFORMATION TECHNOLOGY ENGINEERING
Data Mining (197046707)

Day & Date: Sunday, 19-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
 2) Figures to the right indicate full marks.
 3) Figures drawn by pencil; ruler only indicate full marks.
 3) Do not use pen to draw and label the diagrams.

Section – I

Q.2 Attempt any three. **12**

- a) Describe Data Mining and basic data mining tasks. List the main challenges and limitations of data mining?
- b) In real-world data, tuples with missing values for some attributes are a common occurrence. Describe various methods for handling this problem.
- c) Suppose a group of 12 sales price records has been sorted as follows:
 5, 10, 11, 13, 15, 35, 50, 55, 72, 92, 204, 215.
 Partition them into three bins by each of the following methods,
 - i) equal-frequency (equi-depth) partitioning
 - ii) equal-width partitioning
 - iii) Clustering
- d) What do you mean by data reduction? Why is it used? Write names of 3 data reduction strategies.

Q.3 Attempt any One of the following. **08**

- a) What are the steps involved in preparing the data for classification? Describe the data classification process with a neat diagram. How does the Naive Bayesian classification work?
- OR**
- b) Discuss about constraint based association rule mining with examples and state how association mining to correlation analysis is dealt with.

Q.4 Answer the following **08**

Describe KDD and the steps involved in data mining when viewed as a process of knowledge discovery in detail with diagram.

Section – II

- Q.5 Attempt any three of the following. 12**
- a) Differentiate between Clustering and Classification.
 - b) Define Outlier Detection? State briefly outlier detection methods.
 - c) Compare Data mining techniques and Web mining techniques.
 - d) Explain parallel and distributed algorithms.
- Q.6 Answer any one of the following 08**
- a) What is clustering? State with a suitable diagram the classification of clustering algorithms. Explain in detail about Agglomerative and Divisive Hierarchical Clustering.
- OR**
- b) What is the definition of the support and confidence measures used in the Apriori algorithm? Give an example for Apriori with transactions and explain Apriori-gen-algorithm.
- Q.7 Answer the following 08**
- What is web mining and how does it differ from traditional data mining? Discuss the following types of web mining:
- a) Web structure mining
 - b) Web content mining
 - c) Web usage mining

Seat No.

Fourth Y. (B. Tech) (Sem - I) (Old) (CBCS) Examination: March/April-2024
INFORMATION TECHNOLOGY ENGINEERING
Data Mining (197046707)

Day & Date: Sunday, 19-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:**
- 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 - 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 - 3) Figures to the right indicates full marks.
 - 4) Figures drawn by pencil, ruler only indicate full marks.
 - 5) Do not use pen to draw and label the diagrams.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the given options. 14

- 1) Which of the following is NOT a type of classification method in data mining?

a) Decision tree	b) Logistic regression
c) Naive Bayes	d) Clustering
- 2) What does the "K" in K-nearest neighbors (KNN) classification stand for?
 - a) The number of features in the data
 - b) The number of classes in the data
 - c) The number of nearest neighbors used to classify a data point
 - d) The number of dimensions in the data
- 3) Which of the following is NOT a type of clustering method?

a) K-means	b) Density-based
c) Hierarchical	d) Regression
- 4) Which of the following is NOT a characteristic of hierarchical clustering?
 - a) It is a top-down approach
 - b) It creates a tree-like structure
 - c) It is computationally efficient
 - d) It is sensitive to noise and outliers
- 5) What is the minimum support threshold in the Apriori algorithm?
 - a) The minimum number of times an item must appear in the dataset for it to be considered for analysis
 - b) The minimum number of items that must be present in a transaction for it to be considered for analysis
 - c) The minimum probability that an association rule must meet to be considered valid
 - d) The minimum number of items that must be present in a transaction for it to be considered for association rule analysis
- 6) Which of the following is NOT a type of web mining?

a) Web structure mining	b) Web content mining
c) Web usage mining	d) Web security mining

- 7) How is web content mining different from traditional data mining?
- a) Web content mining focuses on text data, while traditional data mining focuses on numerical data.
 - b) Web content mining is only applicable to the web, while traditional data mining can be applied to any data set
 - c) Web content mining requires specialized algorithms, while traditional data mining uses general.
 - d) Web content mining is more difficult to implement than traditional data mining.
- 8) Which of the following is NOT a potential application of web content mining?
- a) Sentiment analysis of online reviews
 - b) Extracting product information from e-commerce websites
 - c) Identifying trends in social media posts
 - d) Predicting stock prices based on news articles
- 9) What is the main goal of outlier detection in data mining?
- a) To identify patterns in data
 - b) To identify errors in data
 - c) To identify rare events in data
 - d) To identify relationship in data
- 10) Which of the following is NOT a step in the KDD process?
- a) Data cleaning and preprocessing
 - b) Data selection
 - c) Data transformation
 - d) Data visualization
- 11) Which of the following is NOT a potential issue in data mining related to the quality of the data?
- a) Data may be incomplete
 - b) Data may be noisy or contain errors
 - c) Data may be outdated
 - d) Data may be perfectly clean and accurate
- 12) What is the main goal of data integration in data mining?
- a) To combine data from multiple sources into a single dataset
 - b) To identify and remove duplicates in the data
 - c) To correct errors in the data
 - d) To improve the accuracy of data analysis
- 13) Market basket analysis is a technique used to identify:
- a) Trending products in a store
 - b) Strong associations between items in a shopping basket
 - c) Weak associations between items in a shopping basket
 - d) Products with the highest sales volume
- 14) Which of the following techniques is commonly used in market basket analysis?
- a) Decision trees
 - b) Neural networks
 - c) Association rule mining
 - d) K-means clustering

Seat No.

INFORMATION TECHNOLOGY ENGINEERING
Cyber Security (BTN05701)

Day & Date: Wednesday, 15-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:**
- 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 - 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 - 3) Figures to the right indicates full marks.
 - 4) Assume suitable data if necessary.
 - 5) Do not use pen to draw and label the diagrams.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the given options.

14

- 1) Caesar Cipher is an example of _____.

a) Poly-alphabetic Cipher	b) Mono-alphabetic Cipher
c) Multi-alphabetic Cipher	d) Bi-alphabetic Cipher
- 2) Select the right option _____.

I) Substitution cipher	i) Vigenere cipher
II) Transposition cipher	ii) Caesar cipher
III) Multiple letter encryption cipher	iii) Rail fence
IV) Poly alphabetic cipher	iv) Playfair cipher
a) I-i, II-iii, III-ii, IV-iv	b) I-ii, II-iii, III-iv, IV-i
c) I-ii, II-iv, III-iii, IV-i	d) I-i, II-ii, III-iii, IV-iv
- 3) Which legislation in India specifically addresses cybercrime and information security?
 - a) IPC (Indian Penal Code)
 - b) ITA 2000 (Information Technology Act, 2000)
 - c) CRPC (Code of Criminal Procedure)
 - d) FEMA (Foreign Exchange Management Act)
- 4) What is emphasized as the "Survival Mantra for the Netizens" in the Cybercrime Era?

a) Offline Communication	b) Digital Literacy
c) Ignoring Security Measures	d) Dependence on Government
- 5) What role do Botnets play in the context of cybercrime?
 - a) Cybercrime detection
 - b) Cyber security education
 - c) Fueling and supporting cybercrime activities
 - d) Government surveillance

INFORMATION TECHNOLOGY ENGINEERING
Cyber Security (BTN05701)

Day & Date: Wednesday, 15-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
 2) Figures to the right indicate full marks.
 3) Do not use pen to draw and label the diagrams.

Section – I

- Q.2 Attempt any three. 12**
- a) Describe Viruses. How do viruses get disseminated? Explain with diagrams.
 - b) Define cyber stalking and outline the different categories of stalkers in this digital context. Additionally, elaborate on the mechanisms and processes involved in the act of stalking within the online environment.
 - c) Describe with diagram the Model for Network Security.
 - d) Describe types of cyber-crimes against an individual in detail.
- Q.3 Attempt any One of the following. 08**
- a) Differentiate the following:
 - i) Substitution and Transposition techniques.
 - ii) Symmetric and Asymmetric Encryption Techniques

OR
 - b) In the context of cybercrimes, define Botnets and explain how these networks function as a critical element, detailing their specific role as the fuel for various types of cybercriminal activities.
- Q.4 Answer the following 08**
- Describe with diagram the Feistel Cipher structure and the actual parameters, design choices that determine the algorithm of Feistel cipher.

Section – II

- Q.5 Attempt any three of the following. 12**
- a) Discuss the role of digital signatures in The Indian IT Act. How do they contribute to ensuring security in digital transactions and communications
 - b) Describe with punishments the changes made to the Section 66C, 66D, 66E, 66F of the Indian IT Act 2000.
 - c) Describe cybercrimes rooted using:
 - i) SQL Injection
 - ii) DOS attack
 - d) Differentiate Proxy Server and an Anonymizer.

Q.6 Answer any one of the following

- a) Investigate the impact of cloud computing on the landscape of cyber offenses. How does the adoption of cloud technologies introduce new challenges and opportunities for cybercriminals? Discuss the security implications and measures organizations can take to enhance cloud computing security.

OR

- b) Examine the security challenges posed by mobile devices in the era of wireless computing. What are the major vulnerabilities, and how can organizations address these challenges to ensure the security of sensitive information?

Q.7 Answer the following

Describe SQL Injection and list the steps for SQL Injection attack. How to prevent SQL Injection Attack.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the given options. 14

- 1) What is the primary focus of the module "Proxy Servers and Anonymizers"?
 - a) Cyber security Policies
 - b) Online Privacy Tools
 - c) Social Media Platforms
 - d) Data Encryption Techniques
- 2) What is the term for unauthorized access to and manipulation of information on mobile phones?
 - a) Mobile Phishing
 - b) SIM Card Hacking
 - c) Mobile Hijacking
 - d) Mobile Attacks
- 3) In the context of organizational security policies for mobile computing, what is the focus of "Organizational Security Policies and Measures in Mobile Computing Era?
 - a) Limiting Employee Mobility
 - b) Enhancing Device Speed
 - c) Mitigating Security Risks
 - d) Reducing Mobile Device Adoption
- 4) _____ is the term for attacks that target mobile/cell phones to gain unauthorized access or extract sensitive information.
 - a) Mobile Phreaking
 - b) Phone Cloning
 - c) SIM Card Skimming
 - d) Mobile Exploitation
- 5) In the Indian context, what is emphasized as the need for Cyber laws?
 - a) Technological Advancements
 - b) Economic Development
 - c) Social Media Influence
 - d) Legal Enforcement
- 6) A _____ takes place when one entity pretends to be different entity.
 - a) Replay
 - b) Modification of messages
 - c) Denial of service
 - d) Masquerade

- 7) Which legislation in India specifically addresses Cybercrimes and Cyber security?
- IPC (Indian Penal Code)
 - ITA 2000 (Information Technology Act, 2000)
 - CRPC (Code of Criminal Procedure)
 - FEMA (Foreign Exchange Management Act)
- 8) Caesar Cipher is an example of _____.
- Poly-alphabetic Cipher
 - Mono-alphabetic Cipher
 - Multi-alphabetic Cipher
 - Bi-alphabetic Cipher

 - I-ii, II-iv, III-iii, IV-i
 - I-i, II-ii, III-iii, IV-iv
- 10) Which legislation in India specifically addresses cybercrime and information security?
- IPC (Indian Penal Code)
 - ITA 2000 (Information Technology Act, 2000)
 - CRPC (Code of Criminal Procedure)
 - FEMA (Foreign Exchange Management Act)
- 11) What is emphasized as the "Survival Mantra for the Netizens" in the Cybercrime Era?
- Offline Communication
 - Digital Literacy
 - Ignoring Security Measures
 - Dependence on Government
- 12) What role do Botnets play in the context of cybercrime?
- Cybercrime detection
 - Cyber security education
 - Fueling and supporting cybercrime activities
 - Government surveillance
- 13) What is the term used to describe targeted harassment through online platforms in the context of cybercrimes?
- Cyber Espionage
 - Cyber Bullying
 - Cyber Extortion
 - Cyber Vandalism
- 14) In Cyber security, what does the term "Social Cyber Stalking" specifically involve?
- Hacking Social Media Accounts
 - Social Engineering Attacks
 - Cyber security Conferences
 - Online Gaming Strategies

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the given options.

14

- 1) _____ is the term for attacks that target mobile/cell phones to gain unauthorized access or extract sensitive information.

a) Mobile Phreaking	b) Phone Cloning
c) SIM Card Skimming	d) Mobile Exploitation
- 2) In the Indian context, what is emphasized as the need for Cyber laws?

a) Technological Advancements	b) Economic Development
c) Social Media Influence	d) Legal Enforcement
- 3) A _____ takes place when one entity pretends to be different entity.

a) Replay	b) Modification of messages
c) Denial of service	d) Masquerade
- 4) Which legislation in India specifically addresses Cybercrimes and Cyber security?

a) IPC (Indian Penal Code)	b) ITA 2000 (Information Technology Act, 2000)
c) CRPC (Code of Criminal Procedure)	d) FEMA (Foreign Exchange Management Act)
- 5) Caesar Cipher is an example of _____.

a) Poly-alphabetic Cipher	b) Mono-alphabetic Cipher
c) Multi-alphabetic Cipher	d) Bi-alphabetic Cipher
- 6) Select the right option _____.

I) Substitution cipher	i) Vigenere cipher
II) Transposition cipher	ii) Caesar cipher
III) Multiple letter encryption cipher	iii) Rail fence
IV) Poly alphabetic cipher	iv) Playfair cipher
a) I-i, II-iii, III-ii, IV-iv	b) I-ii, II-iii, III-iv, IV-i
c) I-ii, II-iv, III-iii, IV-i	d) I-i, II-ii, III-iii, IV-iv

- 7) Which legislation in India specifically addresses cybercrime and information security?
- a) IPC (Indian Penal Code)
 - b) ITA 2000 (Information Technology Act, 2000)
 - c) CRPC (Code of Criminal Procedure)
 - d) FEMA (Foreign Exchange Management Act)
- 8) What is emphasized as the "Survival Mantra for the Netizens" in the Cybercrime Era?
- a) Offline Communication
 - b) Digital Literacy
 - c) Ignoring Security Measures
 - d) Dependence on Government
- 9) What role do Botnets play in the context of cybercrime?
- a) Cybercrime detection
 - b) Cyber security education
 - c) Fueling and supporting cybercrime activities
 - d) Government surveillance
- 10) What is the term used to describe targeted harassment through online platforms in the context of cybercrimes?
- a) Cyber Espionage
 - b) Cyber Bullying
 - c) Cyber Extortion
 - d) Cyber Vandalism
- 11) In Cyber security, what does the term "Social Cyber Stalking" specifically involve?
- a) Hacking Social Media Accounts
 - b) Social Engineering Attacks
 - c) Cyber security Conferences
 - d) Online Gaming Strategies
- 12) What is the primary focus of the module "Proxy Servers and Anonymizers"?
- a) Cyber security Policies
 - b) Online Privacy Tools
 - c) Social Media Platforms
 - d) Data Encryption Techniques
- 13) What is the term for unauthorized access to and manipulation of information on mobile phones?
- a) Mobile Phishing
 - b) SIM Card Hacking
 - c) Mobile Hijacking
 - d) Mobile Attacks
- 14) In the context of organizational security policies for mobile computing, what is the focus of "Organizational Security Policies and Measures in Mobile Computing Era?"

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the given options.

14

- 1) What is the term used to describe targeted harassment through online platforms in the context of cybercrimes?
 - a) Cyber Espionage
 - b) Cyber Bullying
 - c) Cyber Extortion
 - d) Cyber Vandalism
- 2) In Cyber security, what does the term "Social Cyber Stalking" specifically involve?
 - a) Hacking Social Media Accounts
 - b) Social Engineering Attacks
 - c) Cyber security Conferences
 - d) Online Gaming Strategies
- 3) What is the primary focus of the module "Proxy Servers and Anonymizers"?
 - a) Cyber security Policies
 - b) Online Privacy Tools
 - c) Social Media Platforms
 - d) Data Encryption Techniques
- 4) What is the term for unauthorized access to and manipulation of information on mobile phones?
 - a) Mobile Phishing
 - b) SIM Card Hacking
 - c) Mobile Hijacking
 - d) Mobile Attacks
- 5) In the context of organizational security policies for mobile computing, what is the focus of "Organizational Security Policies and Measures in Mobile Computing Era?
 - a) Limiting Employee Mobility
 - b) Enhancing Device Speed
 - c) Mitigating Security Risks
 - d) Reducing Mobile Device Adoption
- 6) _____ is the term for attacks that target mobile/cell phones to gain unauthorized access or extract sensitive information.
 - a) Mobile Phreaking
 - b) Phone Cloning
 - c) SIM Card Skimming
 - d) Mobile Exploitation

- 7) In the Indian context, what is emphasized as the need for Cyber laws?
- Technological Advancements
 - Economic Development
 - Social Media Influence
 - Legal Enforcement
- 8) A _____ takes place when one entity pretends to be different entity.
- Replay
 - Modification of messages
 - Denial of service
 - Masquerade
- 9) Which legislation in India specifically addresses Cybercrimes and Cyber security?
- IPC (Indian Penal Code)
 - ITA 2000 (Information Technology Act, 2000)
 - CRPC (Code of Criminal Procedure)
 - FEMA (Foreign Exchange Management Act)
- 10) Caesar Cipher is an example of _____.
- Poly-alphabetic Cipher
 - Mono-alphabetic Cipher
 - Multi-alphabetic Cipher
 - Bi-alphabetic Cipher
- 11) Select the right option _____.
- | | |
|----------------------------------------|---------------------|
| I) Substitution cipher | i) Vigenere cipher |
| II) Transposition cipher | ii) Caesar cipher |
| III) Multiple letter encryption cipher | iii) Rail fence |
| IV) Poly alphabetic cipher | iv) Playfair cipher |
- I-i, II-iii, III-ii, IV-iv
 - I-ii, II-iii, III-iv, IV-i
 - I-ii, II-iv, III-iii, IV-i
 - I-i, II-ii, III-iii, IV-iv
- 12) Which legislation in India specifically addresses cybercrime and information security?
- IPC (Indian Penal Code)
 - ITA 2000 (Information Technology Act, 2000)
 - CRPC (Code of Criminal Procedure)
 - FEMA (Foreign Exchange Management Act)
- 13) What is emphasized as the "Survival Mantra for the Netizens" in the Cybercrime Era?
- Offline Communication
 - Digital Literacy
 - Ignoring Security Measures
 - Dependence on Government
- 14) What role do Botnets play in the context of cybercrime?
- Cybercrime detection
 - Cyber security education
 - Fueling and supporting cybercrime activities
 - Government surveillance

Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
INFORMATION TECHNOLOGY ENGINEERING
Cyber Security (BTN05701)

Day & Date: Wednesday, 15-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Do not use pen to draw and label the diagrams.

Section – I

- Q.2 Attempt any three. 12**
- a) Describe Viruses. How do viruses get disseminated? Explain with diagrams.
 - b) Define cyber stalking and outline the different categories of stalkers in this digital context. Additionally, elaborate on the mechanisms and processes involved in the act of stalking within the online environment.
 - c) Describe with diagram the Model for Network Security.
 - d) Describe types of cyber-crimes against an individual in detail.

- Q.3 Attempt any One of the following. 08**
- a) Differentiate the following:
 - i) Substitution and Transposition techniques.
 - ii) Symmetric and Asymmetric Encryption Techniques

OR

- b) In the context of cybercrimes, define Botnets and explain how these networks function as a critical element, detailing their specific role as the fuel for various types of cybercriminal activities.

- Q.4 Answer the following 08**
- Describe with diagram the Feistel Cipher structure and the actual parameters, design choices that determine the algorithm of Feistel cipher.

Section – II

- Q.5 Attempt any three of the following. 12**
- a) Discuss the role of digital signatures in The Indian IT Act. How do they contribute to ensuring security in digital transactions and communications
 - b) Describe with punishments the changes made to the Section 66C, 66D, 66E, 66F of the Indian IT Act 2000.
 - c) Describe cybercrimes rooted using:
 - i) SQL Injection
 - ii) DOS attack
 - d) Differentiate Proxy Server and an Anonymizer.

Q.6 Answer any one of the following

- a) Investigate the impact of cloud computing on the landscape of cyber offenses. How does the adoption of cloud technologies introduce new challenges and opportunities for cybercriminals? Discuss the security implications and measures organizations can take to enhance cloud computing security.

OR

- b) Examine the security challenges posed by mobile devices in the era of wireless computing. What are the major vulnerabilities, and how can organizations address these challenges to ensure the security of sensitive information?

Q.7 Answer the following

Describe SQL Injection and list the steps for SQL Injection attack. How to prevent SQL Injection Attack.

Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
INFORMATION TECHNOLOGY ENGINEERING
Management Information Systems (BTN05702)

Day & Date: Thursday, 16-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) _____ is set of self-contained services that communicate with each other to create a working software application.
 - a) A service-based architecture
 - b) A service-oriented architecture
 - c) A service-dependent architecture
 - d) All of the above

- 2) _____ highlights specific activities in the business where competitive strategies can best be applied.
 - a) The chain value model
 - b) The value chain model
 - c) both a and b
 - d) none of the above

- 3) _____ is a computerized system that performs and records the daily routine transactions necessary to conduct business.
 - a) Management Information System
 - b) Decision Support System
 - c) Executive Support System
 - d) Transaction Processing System

- 4) _____ can be used to analyze the direct and indirect costs to help firms determine the actual cost of specific technology implementations.
 - a) Competitive Forces Model
 - b) Total Cost of Ownership Model
 - c) both a and b
 - d) none of these

- 5) The ability to offer individually tailored products or services using the same production resources as mass production is called _____.
 - a) Mass customization
 - b) Product customization
 - c) both a and b
 - d) none of the above

- 6) _____ refer to the set of logically related tasks and behavior of an organization.
 - a) Key processes
 - b) Work processes
 - c) Business processes
 - d) Source processes

- 7) _____ exists when one party in a transaction has more information that is important for the transaction than the other party.
- a) An information symmetry b) An information asymmetry
c) An information equality d) An information inequality
- 8) The most widely used model for understanding competitive advantage is _____.
- a) Michael Porter's model b) Competitive forces model
c) Both a and b d) none of the above
- 9) Information systems transform raw data into useful information through three basic activities: _____.
- a) input, processing, and output
b) leadership, strategy, behavior
c) collect, store, disseminate
d) All of the above
- 10) In _____, websites send visitors to other websites in return for a referral fee of revenue from any resulting sales.
- a) Sales Revenue Model b) Subscription Revenue Model
c) Freemium Revenue Model d) Affiliate Revenue Model
- 11) According to agency theory, the firm is viewed as a _____ among self-interested individuals rather than as a unified, profit maximizing entity.
- a) "nexus of agents" b) "nexus of contracts"
c) both a and b d) none of the above
- 12) _____ systems coordinate the business processes surrounding the firm's customers.
- a) Supply chain management
b) Customer relationship management
c) Knowledge management
d) All of the above
- 13) In a phenomenon called _____, some argue that large numbers of people can make better decisions about a wide range of topics than a single person.
- a) wisdom of crowds b) crowdsourcing
c) both a and b d) none of the above
- 14) Information systems are key instruments for _____, helping managers identify external changes that might require an organizational response.
- a) Environmental scanning b) Organizational scanning
c) both a and b d) none of the above

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any Three: **12**

- a) Which features of organizations do managers need to know about to build and use information systems successfully?
- b) Why are systems for collaboration and social business so important? What technologies do they use?
- c) What is the impact of information systems on organizations?
- d) What academic disciplines are used to study information systems, and how does each contribute to an understanding of information systems?

Q.3 Solve any Two: **16**

- a) How are information systems transforming business, and why are they essential for running and managing a business today?
- b) What are the challenges posed by strategic information systems, and how should they be addressed?
- c) What ethical, social, and political issues are raised by information systems?

Section – II

Q.4 Solve any Three: **12**

- a) What are the challenges of managing IT infrastructure and management solutions?
- b) What issues must be addressed when building an e-commerce presence?
- c) What are the problems of managing data resources in a traditional file environment?
- d) What are the components of an organizational framework for security and control?

Q.5 Solve any Two: **16**

- a) What is the role of m-commerce in business, and what are the most important m-commerce applications?
- b) What is IT infrastructure, and what are the stages and drivers of IT infrastructure evolution?
- c) What are the most important tools and technologies for safeguarding information resources?

Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
INFORMATION TECHNOLOGY ENGINEERING
Blockchain Technology (BTN05708)

Day & Date: Friday, 17-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.
 4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) What is the security incident when attackers gain control over the blockchain network resources?
 - a) Re-entrancy attack
 - b) 51% attack
 - c) Brute force attack
 - d) Invasion attack
- 2) A larger hash code cannot be decomposed into independent sub codes.
 - a) True
 - b) False
- 3) Which of the following statement is true about blockchain?
 - a) A blockchain is a decentralized, distributed, and oftentimes public, digital ledger consisting of records called blocks.
 - b) A blockchain database is managed autonomously using a peer-to-peer network and a distributed timestamping server.
 - c) A blockchain has been described as a value-exchange protocol.
 - d) All of these
- 4) What is a smart contract?
 - a) Programs stored on a blockchain that run when predetermined conditions are met
 - b) Online contract
 - c) Digital contract
 - d) All of these
- 5) What was the intended objective for creating blockchain?
 - a) Research project
 - b) Peer-to-peer electronic cash system
 - c) Open-source network for connecting banks
 - d) None of these
- 6) Which trees are responsible for storing all transactions in a block through digital signatures of the complete set of transactions?
 - a) Binary
 - b) Merkle
 - c) Red Black
 - d) AVL

Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
INFORMATION TECHNOLOGY ENGINEERING
Blockchain Technology (BTN05708)

Day & Date: Friday, 17-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

- Q.2 Attempt any THREE. 12**
- a) Illustrate with diagram transaction process in block chain.
 - b) State & illustrate the pros & cons of block chain.
 - c) Explain in detail decentralized identity management.
 - d) Extend in detail Digital Signatures and Public Keys as Identities.

- Q.3 Explain in detail the Mechanics of Bitcoin, Bitcoin Scripts, Storing and Using Bitcoins, Mining in Bitcoin. 08**

OR

Explain with example P2P systems, properties of P2P systems, P2P communication architecture.

- Q.4 Attempt any TWO. 08**
- a) When to use, and when not to use Blockchain
 - b) Centralized, Decentralized and Distributed Systems
 - c) Distributed Consensus

Section – II

- Q.5 Attempt any THREE. 12**
- a) Extend in detail the State and data structure in Ethereum.
 - b) Explain with example developing and executing smart contracts in Ethereum.
 - c) Illustrate the applications of blockchain in privacy and security, also IoT and smart cities.
 - d) Extend in detail the decentralized identity management & incentivizing and mining.

- Q.6 Explain with example Proof of storage, proof of stake, proof of deposit, and proof of burn. 08**

OR

Illustrate the enabling technologies & its applications with IoT and smart cities, Business and Industry, Data management, e-Governance.

- Q.7 Attempt any TWO. 08**
- a) Distributed applications in Hyperledger
 - b) Bitcoin vs Ethereum stack
 - c) State and data structure in Ethereum

Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
INFORMATION TECHNOLOGY ENGINEERING
Blockchain Technology (BTN05708)

Day & Date: Friday, 17-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.
 4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) What was the intended objective for creating blockchain?
 - a) Research project
 - b) Peer-to-peer electronic cash system
 - c) Open-source network for connecting banks
 - d) None of these
- 2) What type of hash is used when there is a fixed number of items to be hashed, such as the items in a block header, and we are verifying the composite block integrity?
 - a) Either
 - b) Complex hash
 - c) Simple Hash
 - d) Tree-structured Hash
- 3) The transaction Merkle Tree root value in a Bitcoin block is calculated using,
 - a) Hash of transactions
 - b) Previous block's hash
 - c) Number of transactions
 - d) None of these
- 4) What is Proof of Stake?
 - a) A certificate needed to use the blockchain
 - b) A password needed to access an exchange
 - c) How private keys are made
 - d) A transaction and Block Verification Protocol
- 5) Transactions per second (TPS) for Proof-of-Work Blockchain are approximate?
 - a) 24K per second
 - b) 175K per second
 - c) Only limited to the number of nodes on the network
 - d) 7-15 per second
- 6) What are the different types of tokens in blockchain?
 - a) Platform
 - b) Privacy
 - c) Currency
 - d) All of these
- 7) What is the term applied for splits in a blockchain network?
 - a) Mergers
 - b) Divisions
 - c) Forks
 - d) None of these

- 8) What is the security incident when attackers gain control over the blockchain network resources?
- a) Re-entrancy attack
 - b) 51% attack
 - c) Brute force attack
 - d) Invasion attack
- 9) A larger hash code cannot be decomposed into independent sub codes.
- a) True
 - b) False
- 10) Which of the following statement is true about blockchain?
- a) A blockchain is a decentralized, distributed, and oftentimes public, digital ledger consisting of records called blocks.
 - b) A blockchain database is managed autonomously using a peer-to-peer network and a distributed timestamping server.
 - c) A blockchain has been described as a value-exchange protocol.
 - d) All of these
- 11) What is a smart contract?
- a) Programs stored on a blockchain that run when predetermined conditions are met
 - b) Online contract
 - c) Digital contract
 - d) All of these
- 12) What was the intended objective for creating blockchain?
- a) Research project
 - b) Peer-to-peer electronic cash system
 - c) Open-source network for connecting banks
 - d) None of these
- 13) Which trees are responsible for storing all transactions in a block through digital signatures of the complete set of transactions?
- a) Binary
 - b) Merkle
 - c) Red Black
 - d) AVL
- 14) What is the name of the first block in a blockchain?
- a) Block one
 - b) Origin block
 - c) Genesis block
 - d) None of these

Seat No.

Set **Q**

Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
INFORMATION TECHNOLOGY ENGINEERING
Blockchain Technology (BTN05708)

Day & Date: Friday, 17-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

Instructions: 1) All questions are compulsory.
 2) Figures to the right indicate full marks.

Section – I

- Q.2 Attempt any THREE. 12**
- a) Illustrate with diagram transaction process in block chain.
 - b) State & illustrate the pros & cons of block chain.
 - c) Explain in detail decentralized identity management.
 - d) Extend in detail Digital Signatures and Public Keys as Identities.

- Q.3 Explain in detail the Mechanics of Bitcoin, Bitcoin Scripts, Storing and Using Bitcoins, Mining in Bitcoin. 08**

OR

Explain with example P2P systems, properties of P2P systems, P2P communication architecture.

- Q.4 Attempt any TWO. 08**
- a) When to use, and when not to use Blockchain
 - b) Centralized, Decentralized and Distributed Systems
 - c) Distributed Consensus

Section – II

- Q.5 Attempt any THREE. 12**
- a) Extend in detail the State and data structure in Ethereum.
 - b) Explain with example developing and executing smart contracts in Ethereum.
 - c) Illustrate the applications of blockchain in privacy and security, also IoT and smart cities.
 - d) Extend in detail the decentralized identity management & incentivizing and mining.

- Q.6 Explain with example Proof of storage, proof of stake, proof of deposit, and proof of burn. 08**

OR

Illustrate the enabling technologies & its applications with IoT and smart cities, Business and Industry, Data management, e-Governance.

- Q.7 Attempt any TWO. 08**
- a) Distributed applications in Hyperledger
 - b) Bitcoin vs Ethereum stack
 - c) State and data structure in Ethereum

Seat No.

**Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
INFORMATION TECHNOLOGY ENGINEERING
Blockchain Technology (BTN05708)**

Day & Date: Friday, 17-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) What is Proof of Stake?
 - a) A certificate needed to use the blockchain
 - b) A password needed to access an exchange
 - c) How private keys are made
 - d) A transaction and Block Verification Protocol
- 2) Transactions per second (TPS) for Proof-of-Work Blockchain are approximate?
 - a) 24K per second
 - b) 175K per second
 - c) Only limited to the number of nodes on the network
 - d) 7-15 per second
- 3) What are the different types of tokens in blockchain?

a) Platform	b) Privacy
c) Currency	d) All of these
- 4) What is the term applied for splits in a blockchain network?

a) Mergers	b) Divisions
c) Forks	d) None of these
- 5) What is the security incident when attackers gain control over the blockchain network resources?

a) Re-entrancy attack	b) 51% attack
c) Brute force attack	d) Invasion attack
- 6) A larger hash code cannot be decomposed into independent sub codes.

a) True	b) False
---------	----------
- 7) Which of the following statement is true about blockchain?
 - a) A blockchain is a decentralized, distributed, and oftentimes public, digital ledger consisting of records called blocks.
 - b) A blockchain database is managed autonomously using a peer-to-peer network and a distributed timestamping server.
 - c) A blockchain has been described as a value-exchange protocol.
 - d) All of these

- 8) What is a smart contract?
- a) Programs stored on a blockchain that run when predetermined conditions are met
 - b) Online contract
 - c) Digital contract
 - d) All of these
- 9) What was the intended objective for creating blockchain?
- a) Research project
 - b) Peer-to-peer electronic cash system
 - c) Open-source network for connecting banks
 - d) None of these
- 10) Which trees are responsible for storing all transactions in a block through digital signatures of the complete set of transactions?
- a) Binary
 - b) Merkle
 - c) Red Black
 - d) AVL
- 11) What is the name of the first block in a blockchain?
- a) Block one
 - b) Origin block
 - c) Genesis block
 - d) None of these
- 12) What was the intended objective for creating blockchain?
- a) Research project
 - b) Peer-to-peer electronic cash system
 - c) Open-source network for connecting banks

Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
INFORMATION TECHNOLOGY ENGINEERING
Big Data Analytics (BTN05710)

Day & Date: Saturday, 18-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.
 4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the given options.

14

- 1) The data node and name node in HADOOP are
 - a) Worker node and master node respectively
 - b) Master node and worker node respectively
 - c) Both worker nodes
 - d) Both master nodes
- 2) Which of the following are is component of Hadoop.
 - a) YARN
 - b) HDFS
 - c) Map Reduce
 - d) All these
- 3) Operational database with distributed systems and _____based system can harness the true potential with Big Data.
 - a) SQL
 - b) NoSQL
 - c) PL/SQL
 - d) None of these
- 4) Apache HBase is a non-relational database modeled after Google's _____.
 - a) BigTop
 - b) BigTable
 - c) Scanner
 - d) FoundationDB
- 5) Which among the following runs on top of HDFS and provides BigTable (Google) like capabilities to Hadoop.
 - a) HBase
 - b) Hive
 - c) Pig
 - d) HCatalog
- 6) Hbase is what type of database?
 - a) Schema-rigid
 - b) Schema-flexi
 - c) Schema-less
 - d) Not a database
- 7) In which year apache Pig was released.
 - a) 2005
 - b) 2006
 - c) 2007
 - d) 2008
- 8) Use the _____ command to run a Pig script that can interact with the Grunt shell (interactive mode).
 - a) Fetch
 - b) Declare
 - c) Run
 - d) Execute

- 9) Streaming supports streaming command options as well as _____ command options.
- a) Generic
 - b) Tool
 - c) library
 - d) Task
- 10) Which of the following Hadoop streaming command option parameter is required.
- a) output directoryname
 - b) mapper executable
 - c) input directoryname
 - d) all of the mentioned
- 11) Data in _____ bytes size is called big data.
- a) Meta
 - b) Giga
 - c) Tera
 - d) Peta
- 12) On which of the following platforms does Hadoop run?
- a) Debian
 - b) Cross-platform
 - c) Bare Metal
 - d) Unix-like
- 13) Which of the following is the only way of running mappers?
- a) MapReducer
 - b) MapRunner
 - c) MapRed
 - d) All of these
- 14) Apache _____ is a serialization framework that produces data in a compact binary format.
- a) Oozie
 - b) Impala
 - c) kafka
 - d) Avro

**Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
INFORMATION TECHNOLOGY ENGINEERING
Big Data Analytics (BTN05710)**

Day & Date: Saturday, 18-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

- Q.2 Attempt any four questions. 16**
- a) What is a Map reduce in Hadoop? When to use MapReduce with Big Data?
 - b) Write down the four computing resources of Big Data Storage.
 - c) What are the three modes in which hadoop can run.
 - d) Mention features of Apache scoop?
 - e) Explain Hadoop. List the core components of Hadoop.
- Q.3 Answer the following questions. 12**
- a) Explain in detail about Storage Considerations in Big Data.
 - b) Explain in detail about HDFS.

Section – II

- Q.4 Attempt any Four. 16**
- a) What are the different components of a HIVE structure? Explain the role of each component.
 - b) What are the key components of HBASE? Explain the role of each Component.
 - c) What are the key differences between HIVE and PIG?
 - d) What is supervised learning? Name special cases of supervised learning depending on whether the inputs/outputs are categorical, ordinal, or continuous?
 - e) What are the advantages and disadvantages of R programming
- Q.5 Answer the following questions. 12**
- a) Describe the following terms related to the HIVE.
 - i) Hive Shell
 - ii) Hive Services
 - iii) Hive MetaStore
 - iv) HiveQL,
 - b) Describe in detail execution modes of Pig.

 - b) 2006
 - c) 2007
 - d) 2008
- 12) Use the _____ command to run a Pig script that can interact with the Grunt shell (interactive mode).
- a) Fetch
 - b) Declare
 - c) Run
 - d) Execute
- 13) Streaming supports streaming command options as well as _____ command options.
- a) Generic
 - b) Tool
 - c) library
 - d) Task
- 14) Which of the following Hadoop streaming command option parameter is required.
- a) output directoryname
 - b) mapper executable
 - c) input directoryname
 - d) all of the mentioned

Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
INFORMATION TECHNOLOGY ENGINEERING
Big Data Analytics (BTN05710)

Day & Date: Saturday, 18-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
 2) Figures to the right indicate full marks.

Section – I

- Q.2 Attempt any four questions. 16**
- a) What is a Map reduce in Hadoop? When to use MapReduce with Big Data?
 - b) Write down the four computing resources of Big Data Storage.
 - c) What are the three modes in which hadoop can run.
 - d) Mention features of Apache scoop?
 - e) Explain Hadoop. List the core components of Hadoop.
- Q.3 Answer the following questions. 12**
- a) Explain in detail about Storage Considerations in Big Data.
 - b) Explain in detail about HDFS.

Section – II

- Q.4 Attempt any Four. 16**
- a) What are the different components of a HIVE structure? Explain the role of each component.
 - b) What are the key components of HBASE? Explain the role of each Component.
 - c) What are the key differences between HIVE and PIG?
 - d) What is supervised learning? Name special cases of supervised learning depending on whether the inputs/outputs are categorical, ordinal, or continuous?
 - e) What are the advantages and disadvantages of R programming
- Q.5 Answer the following questions. 12**
- a) Describe the following terms related to the HIVE.
 - i) Hive Shell
 - ii) Hive Services
 - iii) Hive MetaStore
 - iv) HiveQL,
 - b) Describe in detail execution modes of Pig.

INFORMATION TECHNOLOGY ENGINEERING
Big Data Analytics (BTN05710)**

Day & Date: Saturday, 18-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the given options.

14

- 1) Hbase is what type of database?

a) Schema-rigid	b) Schema-flexi
c) Schema-less	d) Not a database
- 2) In which year apache Pig was released.

a) 2005	b) 2006
c) 2007	d) 2008
- 3) Use the _____ command to run a Pig script that can interact with the Grunt shell (interactive mode).

a) Fetch	b) Declare
c) Run	d) Execute
- 4) Streaming supports streaming command options as well as _____ command options.

a) Generic	b) Tool
c) library	d) Task
- 5) Which of the following Hadoop streaming command option parameter is required.

a) output directoryname	b) mapper executable
c) input directoryname	d) all of the mentioned
- 6) Data in _____ bytes size is called big data.

a) Meta	b) Gita
c) Tera	d) Peta
- 7) On which of the following platforms does Hadoop run?

a) Debian	b) Cross-platform
c) Bare Metal	d) Unix-like
- 8) Which of the following is the only way of running mappers?

a) MapReducer	b) MapRunner
c) MapRed	d) All of these

- 9) Apache _____ is a serialization framework that produces data in a compact binary format.
- a) Oozie
 - b) Impala
 - c) kafka
 - d) Avro
- 10) The data node and name node in HADOOP are
- a) Worker node and master node respectively
 - b) Master node and worker node respectively
 - c) Both worker nodes
 - d) Both master nodes
- 11) Which of the following are is component of Hadoop.
- a) YARN
 - b) HDFS
 - c) Map Reduce
 - d) All these
- 12) Operational database with distributed systems and _____based system can harness the true potential with Big Data.
- a) SQL
 - b) NoSQL
 - c) PL/SQL
 - d) None of these
- 13) Apache HBase is a non-relational database modeled after Google's _____.
- a) BigTop
 - b) BigTable
 - c) Scanner
 - d) FoundationDB
- 14) Which among the following runs on top of HDFS and provides BigTable (Google) like capabilities to Hadoop.
- a) HBase
 - b) Hive
 - c) Pig
 - d) HCatalog

 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the given options. 14

- 1) Which of the following is a subset of machine learning?
 - a) Numpy
 - b) SciPy
 - c) Deep Learning
 - d) All of the above
- 2) The first layer in ANN is called the?
 - a) inner layer
 - b) outer layer
 - c) hidden layer
 - d) None of the above
- 3) Which neural network has only one hidden layer between the input and output?
 - a) Shallow neural network
 - b) Deep neural network
 - c) Feed-forward neural networks
 - d) Recurrent neural networks
- 4) Which of the following is/are Limitations of deep learning?
 - a) Data labeling
 - b) Obtain huge training datasets
 - c) Both A and B
 - d) None of the above
- 5) Deep learning algorithms are _____ more accurate than machine learning algorithm in image classification.
 - a) 33%
 - b) 37%
 - c) 40%
 - d) 41%
- 6) In which of the following applications can we use deep learning to solve the problem?
 - a) Protein structure prediction
 - b) Prediction of chemical reactions
 - c) Detection of exotic particles
 - d) All of the above
- 7) What is a tensor in Tensor Flow?
 - a) A machine learning model
 - b) A type of data structure
 - c) A database management system
 - d) A programming language

Time: 03:00 PM To 06:00 PM

Max. Marks: 56

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

- Q.2 Attempt any three.** **12**
- What are the different kinds of Learning? Show how Deep Learning is different.
 - What is Back propagation? Illustrate
 - What are the elements of a feed forward network? Give illustrations for each element.
 - How does the history of Deep learning help us to add on to technology that can generate better automation and prediction in solutions?
- Q.3 Attempt any one.** **08**
- Develop a complete schema to illustrate the Back propagation Algorithm with its characteristics.
 - With examples Illustrate the difference between AI, ML and DL
- Q.4 Attempt the following.** **08**
- Explain the use of activation functions and Regularization methods for Deep Learning with examples.

Section - II

- Q.5 Attempt any three** **12**
- What are Auto encoders? Illustrate.
 - Illustrate the working of LSTMs
 - Develop an environment for using RNNs.
 - What is sequential data? What are it's problems?
- Q.6 Attempt any one** **08**
- What are the components of Auto encoders? How are they formulated? Give detailed steps.
 - Illustrate different Recurrent Neural Network topologies.
- Q.7 Attempt the following** **08**
- Compare between Bidirectional LSTM's and RNNs.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the given options. 14

- 1) What is the default data type of Tensor Flow tensors?
 - a) int64
 - b) float32
 - c) Double
 - d) int32
- 2) What is a placeholder in Tensor Flow?
 - a) A variable that holds the output of a neural network
 - b) A variable that holds the input data for a neural network
 - c) A variable that holds the weights of a neural network
 - d) A variable that holds the bias of a neural network
- 3) How many backend engines does Keras consist of?
 - a) 2
 - b) 3
 - c) 4
 - d) 9
- 4) What is the primary purpose of a Convolutional Neural Network (CNN)?
 - a) Object detection
 - b) Image classification
 - c) Text generation
 - d) Reinforcement learning
- 5) What is the purpose of the stride parameter in a convolutional layer?
 - a) To determine the size of the receptive field
 - b) To control the step size of the convolution operation
 - c) To adjust the learning rate during training
 - d) None of the above
- 6) What is the primary purpose of a Recurrent Neural Network (RNN)?
 - a) Image classification
 - b) Text generation
 - c) Reinforcement learning
 - d) Object detection
- 7) Which layer type is typically used to capture sequential dependencies in an RNN?
 - a) Input layer
 - b) Hidden layer
 - c) Output layer
 - d) Activation layer
- 8) Which of the following is a subset of machine learning?
 - a) Numpy
 - b) SciPy

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the given options. 14

- 1) Which of the following are examples of predictive analytics?
 - a) Finding People's buying pattern
 - b) Pricing goods and services
 - c) Weather Forecast
 - d) All of these
- 2) _____ data derives from transactions and can be collected automatically.
 - a) Streamed
 - b) Behavioral
 - c) Attitudinal
 - d) Demographic data
- 3) The process of _____ involves spotting missing values, duplicate records, and outliers.
 - a) Data Preprocessing
 - b) Data Visualization
 - c) Data Analysis
 - d) Data Modeling
- 4) The nucleus that makes sense out of big data is called _____.
 - a) Big Data centre
 - b) smart data
 - c) Noise
 - d) sensible data
- 5) In flocking bird data representation, _____ rules means flock mates move average position of their flock mate.
 - a) Separation
 - b) Alignment
 - c) Cohesion
 - d) all of these
- 6) Visualizing data will help you in the very first steps of _____.
 - a) data collection
 - b) data preparation
 - c) data modeling
 - d) data testing
- 7) _____ is a method used to predict future numerical value of a variable.
 - a) Classification
 - b) Regression
 - c) Clustering
 - d) all of the above

- 8) _____ is used to predict category or group that a new and incoming data object belongs to.
- a) Data clustering
 - b) Data Classification
 - c) Data Regression
 - d) Data Association
- 9) Which algorithm is used for frequent itemset mining?
- a) Decision tree algorithm
 - b) K-nearest neighbors algorithm
 - c) Apriori algorithm
 - d) Naive Bayes algorithm
- 10) Stream of unstructured text data to structured data is example of property called _____.
- a) Data Variety
 - b) Data Velocity
 - c) Data Value
 - d) Data Veracity
- 11) _____ search is about discovering that right time to display the right results and to right user.
- a) keyword based
 - b) semantic based
 - c) contextual search
 - d) all of the above
- 12) Which of the following method can be used to combine different classifiers?
- a) Model stacking
 - b) Model combining
 - c) Model structuring
 - d) Model Ensembling
- 13) Deep learning algorithm improves ability of _____ algorithm to detect complex problems.
- a) Support vector machine
 - b) neural network
 - c) Naive bays
 - d) k means
- 14) In neural network, _____ layer encapsulates several complex functions that creates predictors.
- a) Input
 - b) Output
 - c) Hidden
 - d) none of these

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

- Q.2 Attempt any three. 12**
- a) Explain recommendation system and hybrid recommendation system.
 - b) For modeling customer's behaviour, which data of past is will be required?
 - c) Explain big data and smart data.
 - d) Explain uplift modeling.
- Q.3 Attempt any one. 08**
- a) Compare following data types based on various characteristics
 - i) structured and unstructured data
 - ii) Static and streamed data
 - iii) Attitudinal and Behavioral
 - b) Explain different ways of searching unstructured data.
- Q.4 Attempt the following. 08**
- What is collaborative filtering? Explain various types of collaborative filtering.

Section – II

- Q.5 Attempt any three 12**
- a) Explain hidden Markov model.
 - b) Explain steps of biologically inspired data clustering algorithms.
 - c) Explain clustering and classification model.
 - d) Explain deep learning.

Q.6 Attempt any one

a) Explain Support Vector Machine classification algorithm and ensemble mode.

b) Consider following dataset.

For given instance X = (Childless, old. and High), whether person will buy the car. Find out the prediction using Naive bays algorithm?

Type of family structure	Age group	Income status	Will they buy a car?
Nuclear	Young	Low	Yes
Extended	Old	Low	No
Childless	Middle-aged	Low	No
Childless	Young	Medium	Yes
Single Parent	Middle-aged	Medium	Yes
Childless	Young	Low	No
Nuclear	Old	High	Yes
Nuclear	Middle-aged	Medium	Yes
Extended	Middle-aged	High	Yes
Single Parent	Old	Low	No

Q.7 Attempt the following

Consider following transactions and find Association Rules using apriori algorithm with minimum support 50% and minimum confidence of 60%.

Set **Q**

Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
INFORMATION TECHNOLOGY ENGINEERING
Predictive Analytics (BTN05715)

Day & Date: Sunday, 19-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the given options. 14

- 1) _____ is used to predict category or group that a new and incoming data object belongs to.

a) Data clustering	b) Data Classification
c) Data Regression	d) Data Association
- 2) Which algorithm is used for frequent itemset mining?

a) Decision tree algorithm	b) K-nearest neighbors algorithm
c) Apriori algorithm	d) Naive Bayes algorithm
- 3) Stream of unstructured text data to structured data is example of property called _____.

a) Data Variety	b) Data Velocity
c) Data Value	d) Data Veracity
- 4) _____ search is about discovering that right time to display the right results and to right user.

a) keyword based	b) semantic based
c) contextual search	d) all of the above
- 5) Which of the following method can be used to combine different classifiers?

a) Model stacking	b) Model combining
c) Model structuring	d) Model Ensembling
- 6) Deep learning algorithm improves ability of _____ algorithm to detect complex problems.

a) Support vector machine	b) neural network
c) Naive bays	d) k means
- 7) In neural network, _____ layer encapsulates several complex functions that creates predictors.

a) Input	b) Output
c) Hidden	d) none of these

- 8) Which of the following are examples of predictive analytics?
- a) Finding People's buying pattern
 - b) Pricing goods and services
 - c) Weather Forecast
 - d) All of these
- 9) _____ data derives from transactions and can be collected automatically.
- a) Streamed
 - b) Behavioral
 - c) Attitudinal
 - d) Demographic data
- 10) The process of _____ involves spotting missing values, duplicate records, and outliers.
- a) Data Preprocessing
 - b) Data Visualization
 - c) Data Analysis
 - d) Data Modeling
- 11) The nucleus that makes sense out of big data is called _____.
- a) Big Data centre
 - b) smart data
 - c) Noise
 - d) sensible data
- 12) In flocking bird data representation, _____ rules means flock mates move average position of their flock mate.
- a) Separation
 - b) Alignment
 - c) Cohesion
 - d) all of these
- 13) Visualizing data will help you in the very first steps of _____.
- a) data collection
 - b) data preparation
 - c) data modeling
 - d) data testing
- 14) _____ is a method used to predict future numerical value of a variable.
- a) Classification
 - b) Regression
 - c) Clustering
 - d) all of the above

Seat No.	
-----------------	--

Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
INFORMATION TECHNOLOGY ENGINEERING
Predictive Analytics (BTN05715)

Day & Date: Sunday, 19-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

- Q.2 Attempt any three. 12**
- a) Explain recommendation system and hybrid recommendation system.
 - b) For modeling customer's behaviour, which data of past is will be required?
 - c) Explain big data and smart data.
 - d) Explain uplift modeling.
- Q.3 Attempt any one. 08**
- a) Compare following data types based on various characteristics
 - i) structured and unstructured data
 - ii) Static and streamed data
 - iii) Attitudinal and Behavioral
 - b) Explain different ways of searching unstructured data.
- Q.4 Attempt the following. 08**
- What is collaborative filtering? Explain various types of collaborative filtering.

Section – II

- Q.5 Attempt any three 12**
- a) Explain hidden Markov model.
 - b) Explain steps of biologically inspired data clustering algorithms.
 - c) Explain clustering and classification model.
 - d) Explain deep learning.

Q.6 Attempt any one

- a) Explain Support Vector Machine classification algorithm and ensemble mode.
- b) Consider following dataset.
For given instance $X = (\text{Childless, old. and High})$, whether person will buy the car. Find out the prediction using Naive bays algorithm?

Type of family structure	Age group	Income status	Will they buy a car?
Nuclear	Young	Low	Yes
Extended	Old	Low	No
Childless	Middle-aged	Low	No
Childless	Young	Medium	Yes
Single Parent	Middle-aged	Medium	Yes
Childless	Young	Low	No
Nuclear	Old	High	Yes
Nuclear	Middle-aged	Medium	Yes
Extended	Middle-aged	High	Yes
Single Parent	Old	Low	No

Q.7 Attempt the following

Consider following transactions and find Association Rules using apriori algorithm with minimum support 50% and minimum confidence of 60%.

TID	items
T1	I1,I2,I5
T2	I2,I4
T3	I2,I3
T4	I1,I2,I4
T5	I1,I3
T6	I2,I3
T7	I1,I3
T8	I1,I2,I3,I5
T9	I1,I2,I3

Seat No.

Natural Language Processing (197046807)

Day & Date: Monday 13-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.
 4) Assume data wherever necessary

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) _____ is the process of identifying and extracting opinions and emotions expressed in text data.

a) Text Classification	b) Sentiment Analysis
c) Speech Recognition	d) Text Summarization
- 2) Chatbots and virtual assistants use NLP to understand natural language and provide human-like responses to _____.
 - a) social media posts, and customer review
 - b) queries and requests
 - c) automatically identify and classify named entities
 - d) recognize and transcribe spoken language
- 3) Algorithms are often used in NLP applications to _____.
 - a) Predict solutions readily available
 - b) automatically learn patterns and relationships in language data
 - c) Fix language constructs
 - d) Decide language sequences
- 4) Speech processing is a complex and highly coordinated process that involves multiple areas of the _____ working together.

a) Heart	b) Brain
c) Soul	d) Mind
- 5) Sounds produced by the lower lip and upper teeth _____.

a) Bilabial	b) Labiodental
c) Alveolar	d) Palatal
- 6) Word boundary detection is the process of identifying the _____ between words in a stream of spoken or written language.

a) mean	b) boundary
c) median	d) variance

- 7) What is the main challenge/s of NLP?
- a) Handling Ambiguity of Sentences
 - b) Handling Tokenization
 - c) Handling POS-Tagging
 - d) All of the mentioned
- 8) What is Morphological Segmentation?
- a) identify the class of the morphemes
 - b) Does Discourse Analysis
 - c) Is an extension of propositional logic
 - d) None of the mentioned Algorithms are often used in NLP
- 9) "Rohan Was With Her, They Both Go Together", in the given sentence who is her is unclear, specify the type of Ambiguity?
- a) Anaphoric Ambiguity
 - b) Semantic Ambiguity
 - c) Pragmatic Ambiguity
 - d) Lexical Ambiguity
- 10) Which of the following technique is used to remove semantic ambiguity?
- a) Word Sense Disambiguation
 - b) Fuzzy Logic
 - c) Shallow Semantic Analysis
 - d) Syntactic analysis
- 11) Which of these terms refer to the study of speech process?
- a) Phonetics
 - b) Phonetic substances
 - c) Phonology
 - d) Semantics
- 12) Which of these terms refer to the study of hearing and perception of speech sounds?
- a) Auditory phonetics
 - b) Acoustic phonetics
 - c) Articulatory phonetics
 - d) Laboratory phonetics
- 13) Which algorithm is used for solving temporal probabilistic reasoning?
- a) Hill-climbing search
 - b) Hidden Markov model
 - c) Depth-first search
 - d) Breadth-first search
- 14) Which algorithm works by first running the standard forward pass to compute?
- a) Smoothing
 - b) Modified smoothing
 - c) HMM
 - d) Depth-first search algorithm

Set **P**

Fourth Y. (B Tech) (Sem-II) (Old) (CBCS) Examination: March/April-2024
INFORMATION TECHNOLOGY ENGINEERING
Natural Language Processing (197046807)

Day & Date: Monday 13-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

Instructions: 1) All questions are compulsory.
 2) Figures to the right indicate full marks.

Section – I

- Q.2 Attempt any three:** **12**
- a) List the different theories w.r.t. word analysis.
 - b) Illustrate Top -down parsing algorithm with an appropriate example.
 - c) What is speech processing? State the steps involved.
 - d) What are Worn-net? Give it's characteristics?
 - e) Give the advantage of using 'Word sense disambiguity'.
- Q.3 Attempt any two:** **08**
- a) Illustrate the various types of NLP.
 - b) How ML is used to generate a good NLP analytical structure?
 - c) List various applications of NLP. Illustrate any one.
- Q.4 Attempt any one:** **08**
- a) Illustrate the morphology paradigms. How finite state machines help?
 - b) Give the basic characteristics of Morphological diversity in Indian languages.

Section – II

- Q.5 Attempt any three:** **12**
- a) What is Labeling in NLP? Give the steps involved.
 - b) How are graphical models for sequences developed?
 - c) What is phonology? Illustrate.
 - d) Illustrate the terms 'Precision and Recall' How are they used to compute F- measure?
 - e) State the characteristics of Baum Welch Algorithm.
- Q.6 Attempt any two:** **08**
- a) What is Phonology? What are the methods to deal with it?
 - b) How are semantic relations dealt with in NLP? State various methods.
 - c) Illustrate the working of Sentiment with an example.
- Q.7 Attempt any one:** **08**
- a) What are the components of a Question Answering system in multilingual systems? Illustrate.
 - b) What is CLIR? How does it work?

 4) Assume data wherever necessary

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) Word boundary detection is the process of identifying the _____ between words in a stream of spoken or written language.
 - a) mean
 - b) boundary
 - c) median
 - d) variance
- 2) What is the main challenge/s of NLP?
 - a) Handling Ambiguity of Sentences
 - b) Handling Tokenization
 - c) Handling POS-Tagging
 - d) All of the mentioned
- 3) What is Morphological Segmentation?
 - a) identify the class of the morphemes
 - b) Does Discourse Analysis
 - c) Is an extension of propositional logic
 - d) None of the mentioned Algorithms are often used in NLP
- 4) "Rohan Was With Her, They Both Go Together", in the given sentence who is her is unclear, specify the type of Ambiguity?
 - a) Anaphoric Ambiguity
 - b) Semantic Ambiguity
 - c) Pragmatic Ambiguity
 - d) Lexical Ambiguity
- 5) Which of the following technique is used to remove semantic ambiguity?
 - a) Word Sense Disambiguation
 - b) Fuzzy Logic
 - c) Shallow Semantic Analysis
 - d) Syntactic analysis
- 6) Which of these terms refer to the study of speech process?
 - a) Phonetics
 - b) Phonetic substances
 - c) Phonology
 - d) Semantics
- 7) Which of these terms refer to the study of hearing and perception of speech sounds?
 - a) Auditory phonetics
 - b) Acoustic phonetics
 - c) Articulatory phonetics
 - d) Laboratory phonetics

- 8) Which algorithm is used for solving temporal probabilistic reasoning?
a) Hill-climbing search b) Hidden Markov model
c) Depth-first search d) Breadth-first search
- 9) Which algorithm works by first running the standard forward pass to compute?
a) Smoothing b) Modified smoothing
c) HMM d) Depth-first search algorithm
- 10) _____ is the process of identifying and extracting opinions and emotions expressed in text data.
a) Text Classification b) Sentiment Analysis
c) Speech Recognition d) Text Summarization
- 11) Chatbots and virtual assistants use NLP to understand natural language and provide human-like responses to _____.
a) social media posts, and customer review
b) queries and requests
c) automatically identify and classify named entities
d) recognize and transcribe spoken language
- 12) Algorithms are often used in NLP applications to _____.
a) Predict solutions readily available
b) automatically learn patterns and relationships in language data
c) Fix language constructs
d) Decide language sequences
- 13) Speech processing is a complex and highly coordinated process that involves multiple areas of the _____ working together.
a) Heart b) Brain
c) Soul d) Mind
- 14) Sounds produced by the lower lip and upper teeth _____.
a) Bilabial b) Labiodental
c) Alveolar d) Palatal

Set **S**

Fourth Y. (B Tech) (Sem-II) (Old) (CBCS) Examination: March/April-2024
INFORMATION TECHNOLOGY ENGINEERING
Natural Language Processing (197046807)

Day & Date: Monday 13-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

Instructions: 1) All questions are compulsory.
 2) Figures to the right indicate full marks.

Section – I

- Q.2 Attempt any three:** **12**
- a) List the different theories w.r.t. word analysis.
 - b) Illustrate Top -down parsing algorithm with an appropriate example.
 - c) What is speech processing? State the steps involved.
 - d) What are Worn-net? Give it's characteristics?
 - e) Give the advantage of using 'Word sense disambiguity'.
- Q.3 Attempt any two:** **08**
- a) Illustrate the various types of NLP.
 - b) How ML is used to generate a good NLP analytical structure?
 - c) List various applications of NLP. Illustrate any one.
- Q.4 Attempt any one:** **08**
- a) Illustrate the morphology paradigms. How finite state machines help?
 - b) Give the basic characteristics of Morphological diversity in Indian languages.

Section – II

- Q.5 Attempt any three:** **12**
- a) What is Labeling in NLP? Give the steps involved.
 - b) How are graphical models for sequences developed?
 - c) What is phonology? Illustrate.
 - d) Illustrate the terms 'Precision and Recall' How are they used to compute F- measure?
 - e) State the characteristics of Baum Welch Algorithm.
- Q.6 Attempt any two:** **08**
- a) What is Phonology? What are the methods to deal with it?
 - b) How are semantic relations dealt with in NLP? State various methods.
 - c) Illustrate the working of Sentiment with an example.
- Q.7 Attempt any one:** **08**
- a) What are the components of a Question Answering system in multilingual systems? Illustrate.
 - b) What is CLIR? How does it work?

Seat No.

T. Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING
Power System – III (BTN07501)

Day & Date: Monday, 13-05-2024
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.
 4) Assume suitable data whenever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) The PU impedance value of an alternator corresponding to base values of 13.2kv & 30 MVA is 0.2pu, the pu value for the base values of 36.4kv & 60 mva will be _____.

a) 0.2pu	b) 0.1pu
c) 0.4pu	d) 0.8pu
- 2) The ohmic impedance of a transmission line having pu impedance of 0.31pu on a base of 100 mva, 220kv is _____.

a) $j150 \Omega$	b) $j100 \Omega$
c) $j31 \Omega$	d) $j0.31 \Omega$
- 3) The constant impedance representation of loads is quite often used in _____.

a) load flow studies	b) stability study
c) security study	d) none of above
- 4) Which of the following reactance of a machine is the smallest?

a) leakage reactance	b) transient reactance
c) sub-transient reactance	d) steady state reactance
- 5) In case of 3-ph. short circuit in a system the power fed in to the system is _____.

a) mostly reactive	b) mostly active
c) active & reactive	d) reactive only
- 6) The time elapsed before the relays detect the fault current is called _____.

a) detection time	b) interrupting time
c) sleep time	d) none of above
- 7) The line current in a 3-ph. System are $I_r = 4 + j6$ $I_y = 2 + j2$ $I_b = -3 - j2$ then zero sequence current is _____.

a) $1 + j2$	b) $9 + j18$
c) $3 + j6$	d) $3 - j6$

- 8) In 3-ph. System the phasor sum of phase currents is zero. Then there will be no _____
- a) positive sequence components
 - b) negative sequence components
 - c) zero sequence components
 - d) none of above
- 9) In the absence of neutral in Y connections the zero sequence currents are _____
- a) maximum
 - b) minimum
 - c) zero
 - d) infinity
- 10) voltage sources are absent in case of _____
- a) positive sequence networks
 - b) negative sequence networks
 - c) zero sequence networks
 - d) both b & c
- 11) the fault where in positive, negative & zero sequence component currents are equal is a _____.
- a) LL fault
 - b) LLG fault
 - c) LG fault
 - d) 3L fault
- 12) For an LL fault the zero sequence current is _____.
- a) infinite
 - b) absent
 - c) $3I_{a1}$
 - d) zero
- 13) The swing equation can be solved using _____.
- a) Carry's EAC
 - b) Runge Kutta's method
 - c) Modified Euler's method
 - d) Step by step method
- 14) The torque angle keeps on increasing with time then the system is _____.
- a) unstable
 - b) marginally stable
 - c) stable
 - d) can't say

T. Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING
Power System – III (BTN07501)

Day & Date: Monday, 13-05-2024
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
 2) Figures to the right indicate full marks.
 3) Assume suitable data whenever necessary.

Section – I

Q.2 Solve any four **16**

- a) With a neat sketch explain the equivalent circuit model for induction motor.
- b) Derive an expression for formation of Ybus by direct method.
- c) Explain the transients on a transmission line due to short circuit.
- d) Draw the PU reactance of the power system the ratings of the components are
 Generator: 15 MVA, 6.6KV, sub transient reactance 12% Transformer: 20MVA, 6.6/66KV reactance 8%
 Transformer: 20MVA, 66/6.6KV reactance 8% motor 1&2: 5MVA, 6.6KV sub transient reactance 20% transmission line has reactance of $j60\Omega$.
- e) The positive, negative & zero sequence components of line currents are 20 L 10A, 6 L 60A & 3 L 30A respectively determine the line currents.

Q.3 Solve any two **12**

- a) Derive an expression for formation of Zbus adding impedance between two existing buses j & k.
- b) Derive an expression for complex power in terms of symmetrical components.
- c) A balanced star connected load takes 30A from a balanced 3-ph. 4 wire supply. If the fuses in two lines are removed, find the symmetrical components of the line currents before & after the fuses are removed.

Section – II

Q.4 Solve any four **16**

- a) Derive an expression for double line to ground fault on an unloaded generator.
- b) Explain the data required for the load flow analysis.
- c) Explain the methods for improving transient stability.
- d) The 3-ph. Generator with line-to-line voltages of 400v is subjected to an LLG fault. If $Z_1 = j2\Omega$, $Z_2 = j0.5\Omega$ and $Z_0 = j0.25\Omega$ determine fault current.
- e) Derive an expression for power flow equations in rectangular form for load flow analysis.

Q.5 Solve any two **12**

- a) Derive an expression for N-R Method for load flow analysis.
- b) Derive an expression for line-to-line fault on an unloaded generator through a fault impedance.
- c) A 3-ph. Generator with an open circuit voltage of 400v is subjected LG fault through a fault impedance of $j2\Omega$. Determine the fault current if $Z_1 = j4\Omega$, $Z_2 = j2\Omega$ & $Z_0 = j1\Omega$ repeat the problem for LLG fault.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the given options.

14

- 1) The Bode plot is applicable to _____ phase network
 - a) All
 - b) Maximum
 - c) Minimum
 - d) None of these
- 2) _____ increases the steady state accuracy.
 - a) Integrator
 - b) Differentiator
 - c) Phase lead compensator
 - d) Phase lag compensator
- 3) By which of the following the system response can be tested better?
 - a) Ramp input signal
 - b) Sinusoidal input signal
 - c) Unit impulse input signal
 - d) Exponentially decaying signal
- 4) Regenerative feedback implies feedback with
 - a) oscillations
 - b) step input
 - c) negative sign
 - d) positive sign
- 5) Which of the following should be done to make an unstable system stable?
 - a) The gain of the system should be decreased
 - b) The gain of the system should be increased
 - c) The number of poles to the loop transfer function should be increased
 - d) The number of zeros to the loop transfer function should be increased
- 6) By which of the following the system response can be tested better?
 - a) Ramp input signal
 - b) Sinusoidal input signal
 - c) Unit impulse input signal
 - d) Exponentially decaying signal
- 7) A controller, essentially, is a _____
 - a) sensor
 - b) clipper
 - c) comparator
 - d) amplifier
- 8) Static Error Coefficient are used as a measure of effectiveness of closed loop system for specified _____ input signals.
 - a) acceleration
 - b) velocity
 - c) position
 - d) all of above

Linear Control System (BTN07502)

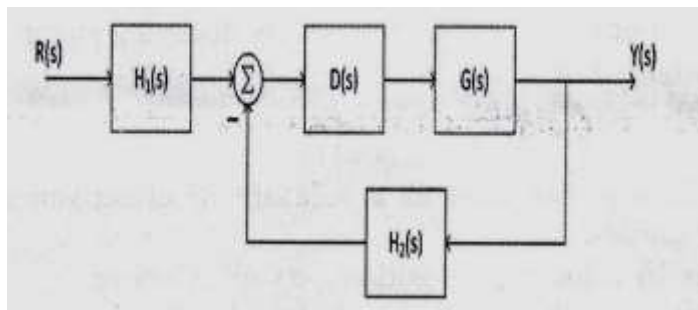

Day & Date: Tuesday, 14-05-2024
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

Instructions: 1) All questions are compulsory.
 2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any four of the following: 16
 a) Derive the transfer function by Using block diagram reduction technique

- b) Explain Force Voltage (F-V) Analogy with neat diagram.
- c) Write down the SFG terminologies.
- d) Derive the expression for transfer function of simple feedback system.
- e) Explain different types of control systems

Q.3 Attempt any two of the following: 12
 a) Using Block Diagram Reduction Technique for the system shown in fig a. Find the Transfer Function.

b) By using Mason's Gain formula find the transfer function of the system below.

c) Discuss the effect of parameter variations on control system.

Section – II

Q.4 Attempt any four of the following: **16**

- a) Name the test signals used in control system.
- b) The characteristic equation of a feedback control system is $s^4 + 8s^3 + 18s^2 + 16s + 5 = 0$ Comment on stability of the system
- c) What are the different types of controllers?
- d) How stability is related to location of pole? Explain in detail.
- e) The closed loop transfer function of unity feedback system is
$$\frac{C(s)}{R(s)} = \frac{600}{s^2 + 70s + 600}$$
 Determine nature of damping in the system and natural frequency of oscillations.

Q.5 Attempt any two of the following. **12**

- a) Sketch the root locus for the control system given below:

$$G(s)H(s) = \frac{k}{s(s+3)(s+6)}$$
 Comment on stability.
- b) Plot the Bode diagram for the following transfer function and obtain the Gain Margin and Phase Margin Comment on stability.

$$G(s)H(s) = \frac{4}{s(1 + 0.5s)(1 + 0.08s)}$$
- c) A unity feedback system has $G(s) = \frac{100(s+12)}{(s+4)(s+5)}$
 - i) Type of system
 - ii) All error constants
 - iii) Steady state Error when subjected to input '4t'

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the given options. 14

- 1) Static Error Coefficient are used as a measure of effectiveness of closed loop system for specified _____ input signals.
 - a) acceleration
 - b) velocity
 - c) position
 - d) all of above
- 2) Control systems are normally designed with damping factor _____.
 - a) Less than unity
 - b) of unity
 - c) of zero
 - d) more than unity
- 3) The angle condition used for checking whether any point lies on root locus or not is _____.
 - a) $\pm(2q + 1)180^\circ$
 - b) $\pm(2q)180^\circ$
 - c) $\pm(2q + 1)360^\circ$
 - d) $\pm(2q)360^\circ$
- 4) For a unity feedback system the position error coefficient is defined as _____.
 - a) $\lim_{s \rightarrow 0} G(s)$
 - b) $\lim_{s \rightarrow 0} SG(s)$
 - c) $\lim_{s \rightarrow 0} \frac{G(s)}{s}$
 - d) none of these
- 5) Slope of K in Bode Magnitude Plot is _____.
 - a) 90°
 - b) 0°
 - c) -90°
 - d) -180°
- 6) Which of the following terms is not a general specification of a control system?
 - a) Nyquist plot
 - b) Phase margin
 - c) Bandwidth
 - d) Time-response
- 7) A synchros is _____.
 - a) a frequency transformer
 - b) an electronic rectifier
 - c) an electromagnetic transducer
 - d) none of the above
- 8) The Bode plot is applicable to _____ phase network
 - a) All
 - b) Maximum
 - c) Minimum
 - d) None of these

- 9) _____ increases the steady state accuracy.
- a) Integrator
 - b) Differentiator
 - c) Phase lead compensator
 - d) Phase lag compensator
- 10) By which of the following the system response can be tested better?
- a) Ramp input signal
 - b) Sinusoidal input signal
 - c) Unit impulse input signal
 - d) Exponentially decaying signal
- 11) Regenerative feedback implies feedback with
- a) oscillations
 - b) step input
 - c) negative sign
 - d) positive sign
- 12) Which of the following should be done to make an unstable system stable?
- a) The gain of the system should be decreased
 - b) The gain of the system should be increased
 - c) The number of poles to the loop transfer function should be increased
 - d) The number of zeros to the loop transfer function should be increased
- 13) By which of the following the system response can be tested better?
- a) Ramp input signal
 - b) Sinusoidal input signal
 - c) Unit impulse input signal
 - d) Exponentially decaying signal
- 14) A controller, essentially, is a _____
- a) sensor
 - b) clipper
 - c) comparator
 - d) amplifier

Set	Q
-----	---

**T.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING
Linear Control System (BTN07502)**

Day & Date: Tuesday, 14-05-2024
Time: 10:00 AM To 01:00 PM

Max. Marks: 56

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any four of the following: **16**
a) Derive the transfer function by Using block diagram reduction technique

- b) Explain Force Voltage (F-V) Analogy with neat diagram.
- c) Write down the SFG terminologies.
- d) Derive the expression for transfer function of simple feedback system.
- e) Explain different types of control systems

Q.3 Attempt any two of the following: **12**
a) Using Block Diagram Reduction Technique for the system shown in fig a. Find the Transfer Function.

b) By using Mason's Gain formula find the transfer function of the system below.

c) Discuss the effect of parameter variations on control system.

Section – II

Q.4 Attempt any four of the following: **16**

- a) Name the test signals used in control system.
- b) The characteristic equation of a feedback control system is $s^4 + 8s^3 + 18s^2 + 16s + 5 = 0$ Comment on stability of the system
- c) What are the different types of controllers?
- d) How stability is related to location of pole? Explain in detail.
- e) The closed loop transfer function of unity feedback system is
$$\frac{C(s)}{R(s)} = \frac{600}{s^2 + 70s + 600}$$
 Determine nature of damping in the system and natural frequency of oscillations.

Q.5 Attempt any two of the following. **12**

- a) Sketch the root locus for the control system given below:

$$G(s)H(s) = \frac{k}{s(s+3)(s+6)}$$
 Comment on stability.
- b) Plot the Bode diagram for the following transfer function and obtain the Gain Margin and Phase Margin Comment on stability.

$$G(s)H(s) = \frac{4}{s(1 + 0.5s)(1 + 0.08s)}$$
- c) A unity feedback system has $G(s) = \frac{100(s+12)}{(s+4)(s+5)}$
 - i) Type of system
 - ii) All error constants
 - iii) Steady state Error when subjected to input '4t'

Seat No.	
----------	--

T.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING
Linear Control System (BTN07502)

Day & Date: Tuesday, 14-05-2024
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks
 4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the given options. 14

- 1) For a unity feedback system the position error coefficient is defined as _____
 - a) $\lim_{s \rightarrow 0} G(s)$
 - b) $\lim_{s \rightarrow 0} SG(s)$
 - c) $\lim_{s \rightarrow 0} \frac{G(s)}{s}$
 - d) none of these
- 2) Slope of K in Bode Magnitude Plot is _____
 - a) 90°
 - b) 0°
 - c) -90°
 - d) -180°
- 3) Which of the following terms is not a general specification of a control system?
 - a) Nyquist plot
 - b) Phase margin
 - c) Bandwidth
 - d) Time-response
- 4) A synchros is _____.
 - a) a frequency transformer
 - b) an electronic rectifier
 - c) an electromagnetic transducer
 - d) none of the above
- 5) The Bode plot is applicable to _____ phase network
 - a) All
 - b) Maximum
 - c) Minimum
 - d) None of these
- 6) _____ increases the steady state accuracy.
 - a) Integrator
 - b) Differentiator
 - c) Phase lead compensator
 - d) Phase lag compensator
- 7) By which of the following the system response can be tested better?
 - a) Ramp input signal
 - b) Sinusoidal input signal
 - c) Unit impulse input signal
 - d) Exponentially decaying signal
- 8) Regenerative feedback implies feedback with
 - a) oscillations
 - b) step input
 - c) negative sign
 - d) positive sign

- 9) Which of the following should be done to make an unstable system stable?
- The gain of the system should be decreased
 - The gain of the system should be increased
 - The number of poles to the loop transfer function should be increased
 - The number of zeros to the loop transfer function should be increased
- 10) By which of the following the system response can be tested better?
- Ramp input signal
 - Sinusoidal input signal
 - Unit impulse input signal
 - Exponentially decaying signal
- 11) A controller, essentially, is a _____
- sensor
 - clipper
 - comparator
 - amplifier
- 12) Static Error Coefficient are used as a measure of effectiveness of closed loop system for specified _____ input signals.
- acceleration
 - velocity
 - position
 - all of above
- 13) Control systems are normally designed with damping factor _____
- Less than unity
 - of unity
 - of zero
 - more than unity
- 14) The angle condition used for checking whether any point lies on root locus or not is _____.
- $\pm(2q + 1)180^\circ$
 - $\pm(2q)180^\circ$
 - $\pm(2q + 1)360^\circ$
 - $\pm(2q)360^\circ$

 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) For selection of banks the bits used are _____.
 a) PSW. 1 AND PSW. 0 b) PSW. 7 AND PSW. 6
 c) PSW. 3 AND PSW. 4 d) SCON. 4 AND SCON. 3
- 2) Internal pull up resistors are not available for _____.
 a) port 0 b) port 1
 c) port 2 d) port 3
- 3) An alternate function of port pin P3.3 in 8051 microcontroller is _____.
 a) Timer 0 b) Timer 1
 c) Interrupt 0 d) Interrupt 1
- 4) Which pin of the LCD is used for adjusting its contrast?
 a) pin no 1 b) pin no 2
 c) pin no 3 d) pin no
- 5) Address lines are required for accessing the data if memory capacity is 4KB bytes.
 a) 10 b) 11
 c) 12 d) 13
- 6) `MOVC A, @ A + PC` is an example of _____ addressing mode.
 a) Immediate b) Direct
 c) Indexed d) None of these
- 7) ISR ends with _____.
 a) END b) RET
 c) RI, TI d) None
- 8) Number of steps to rotate stepper motor for 180 degree at a step angle of 1.8 degree is _____.
 a) 200 b) 400
 c) 100 d) 300
- 9) JC, JNC instructions checked content of _____ register.
 a) DPTR b) B
 c) A d) PSW

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any four. 16

- Compare between microprocessor and microcontroller
- Draw and explain TMOD SFR of 8051 microcontroller.
- Explain with example the various addressing modes of 8051 microcontroller.
- Explain any four Arithmetic instruction of 8051 microcontroller.
- Write an ALP to perform multiplication of two 8-bit numbers stored at 20H and 21H memory location. Store result at 50H and 51H memory location.

Q.3 Solve any two. 12

- Explain IE and IP SFR's related with interrupt in 8051 microcontroller.
- Draw and explain internal memory Structure of RAM in 8051 microcontroller.
- Explain following pins of 8051 microcontroller.
 - EA
 - PSEN
 - ALE
 - RESET

Section – II

Q.4 Solve any four. 16

- Explain the features of PIC 16F877.
- Explain the architecture of ARM Processor.
- Draw the interfacing diagram of LM35 with 8051 Microcontroller.
- Draw and explain Status Register of PIC 16F877A.
- Explain following pins of LCD
 - RS
 - R/W
 - Enable
 - VEE

Q.5 Solve any two. 12

- Draw the interfacing diagram of 4KB data RAM with 8051 microcontroller also mention starting and ending addresses of interfaces memory.
- Draw and explain interfacing diagram of 8051 microcontroller with ADC 0809.
- Draw the interfacing diagram of stepper motor with 8051. Write an ALP to rotate the stepper motor one revolution in anticlockwise direction and then stop.

Seat No.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) LM35 has how many pins?

a) 2	b) 1
c) 3	d) 4
- 2) What is the standard form of ARM?

a) Advanced RISC Machine	b) Automatic RISC Machine
c) Automatic RISC Motor	d) None of the above
- 3) PIC 16F877 A consists of _____ KB flash program memory.

a) 2	b) 4
c) 8	d) None of these
- 4) For writing commands on an LCD, RS bit is _____.

a) set	b) reset
c) set & reset	d) none of the mentioned
- 5) For selection of banks the bits used are _____.

a) PSW. 1 AND PSW. 0	b) PSW. 7 AND PSW. 6
c) PSW. 3 AND PSW. 4	d) SCON. 4 AND SCON. 3
- 6) Internal pull up resistors are not available for _____.

a) port 0	b) port 1
c) port 2	d) port 3
- 7) An alternate function of port pin P3.3 in 8051 microcontroller is _____.

a) Timer 0	b) Timer 1
c) Interrupt 0	d) Interrupt 1
- 8) Which pin of the LCD is used for adjusting its contrast?

 - d) none of the mentioned

- 10)** For selection of banks the bits used are _____.
a) PSW. 1 AND PSW. 0 b) PSW. 7 AND PSW. 6
c) PSW. 3 AND PSW. 4 d) SCON. 4 AND SCON. 3
- 11)** Internal pull up resistors are not available for _____.
a) port 0 b) port 1
c) port 2 d) port 3
- 12)** An alternate function of port pin P3.3 in 8051 microcontroller is _____.
a) Timer 0 b) Timer 1
c) Interrupt 0 d) Interrupt 1
- 13)** Which pin of the LCD is used for adjusting its contrast?
a) pin no 1 b) pin no 2
c) pin no 3 d) pin no
- 14)** Address lines are required for accessing the data if memory capacity is 4KB bytes.
a) 10 b) 11
c) 12 d) 13

Set S

T. Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING
Advanced Microcontroller System (BTN07503)

Day & Date: Wednesday, 15-05-2024
Time: 10:00 AM To 01:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any four. 16

- Compare between microprocessor and microcontroller
- Draw and explain TMOD SFR of 8051 microcontroller.
- Explain with example the various addressing modes of 8051 microcontroller.
- Explain any four Arithmetic instruction of 8051 microcontroller.
- Write an ALP to perform multiplication of two 8-bit numbers stored at 20H and 21H memory location. Store result at 50H and 51H memory location.

Q.3 Solve any two. 12

- Explain IE and IP SFR's related with interrupt in 8051 microcontroller.
- Draw and explain internal memory Structure of RAM in 8051 microcontroller.
- Explain following pins of 8051 microcontroller.
 - EA
 - PSEN
 - ALE
 - RESET

Section – II

Q.4 Solve any four. 16

- Explain the features of PIC 16F877.
- Explain the architecture of ARM Processor.
- Draw the interfacing diagram of LM35 with 8051 Microcontroller.
- Draw and explain Status Register of PIC 16F877A.
- Explain following pins of LCD
 - RS
 - R/W
 - Enable
 - VEE

Q.5 Solve any two. 12

- Draw the interfacing diagram of 4KB data RAM with 8051 microcontroller also mention starting and ending addresses of interfaces memory.
- Draw and explain interfacing diagram of 8051 microcontroller with ADC 0809.
- Draw the interfacing diagram of stepper motor with 8051. Write an ALP to rotate the stepper motor one revolution in anticlockwise direction and then stop.

T. Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING
Electromagnetic Engineering (BTN07504)

Day & Date: Thursday, 16-05-2024
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.
 4) Assume data wherever necessary

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) Unit vector is having _____.
 - a) Direction with one magnitude
 - b) Magnitude is one but not direction
 - c) Not both magnitude and direction
 - d) None of above
- 2) The differential volume (dv) in cylindrical coordinate system is given by _____.
 - a) $rdrd\Phi dz$
 - b) $rdrd\Phi dz$
 - c) $rdrd\Phi$
 - d) $rd\Phi dz$
- 3) The potential difference in an open circuit is _____.
 - a) Zero
 - b) Unity
 - c) Infinity
 - d) Circuit does not exist
- 4) To convert spherical coordinate into Cartesian 'x' coordinate, we have relation _____.
 - a) $x = r \sin \theta \cos \varphi$
 - b) $x = r \sin \theta \sin \varphi$
 - c) $x = r \cos \theta \cos \varphi$
 - d) $x = \sin \theta \cos \varphi$
- 5) The relation between field intensity and potential is _____.
 - a) $E = \nabla V$
 - b) $E = -\nabla V$
 - c) $V = \nabla \times E$
 - d) $V = -(\nabla \times E)$
- 6) $A \times B$ is given as _____.
 - a) $A \cos \theta$
 - b) $AB \sin \theta \text{ an}$
 - c) AB
 - d) $AB \cos \theta \text{ an}$
- 7) The electric field intensity is defined a _____.
 - a) Force per unit charge
 - b) Force on a test charge
 - c) Force per unit charge on a test charge
 - d) Product of force and charge
- 8) Coulomb law is employed in _____.
 - a) Electrostatics
 - b) Magnetostatics
 - c) Electromagnetic
 - d) Maxwell theory

- 9) The units of capacitance are _____.
a) volts/coulomb b) coulombs/volt
c) ohms d) henry/Wb
- 10) Capacitance increases with _____.
a) increase in plate area and decrease in distance between the plates
b) increase in plate area and distance between the plates
c) decrease in plate area and value of applied voltage
d) reduction in plate area and distance between the plates
- 11) Magnetic vector potential for volume current is expressed as _____.
a) $B = \nabla \times A$ b) $A = \nabla \times B$
c) $B = \nabla \cdot A$ d) $A = \nabla \cdot B$
- 12) $\nabla \times H = J$ is known as _____.
a) Maxwell's equation b) Ampere's law
c) Ohm's law d) Gauss's law
- 13) Lorentz force equation is _____.
a) $F = Q \times [E + V \times B]$ b) $F = Q[E + V \times B]$
c) $F = QV + E \times B$ d) $F = Q[B + V \times E]$
- 14) The magnetic energy of a magnetic material is given by _____.
a) $BH/2$ b) $B/2H$
c) $H/2B$ d) B/H

T. Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING
Electromagnetic Engineering (BTN07504)

Day & Date: Thursday, 16-05-2024
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

Instructions: 1) All questions are compulsory.
 2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any Four: **16**

- If $\phi = 3x^2y - y^3z^2$ find the gradient of ϕ at point (1, -2, 1)
- Derive the relation between E and V.
- Derive continuity equation of a current.
- Parallel plate capacitor has conducting plates of area 0.04m^2 . The plates are separated by a dielectric material whose relative permittivity is 2 with plate separation of 1 cm.
Find:
 - Its capacitance
 - Charge on plates if $V = 10\text{V}$
- Transform $A = 3a_x + 4a_y + 5a_z$ to Spherical coordinate system at point (3, 4, 5)

Q.3 Solve any Two: **12**

- If $D = 4x^3a_x - 2ya_y + 2za_z$. Find total charge enclosed within the region $-1 \leq x, y, z \leq 1$.
- State Gauss law with mathematical expression and it's any two applications in detail.
- Three-point charges $Q_1 = 10^{-6}\text{C}$, $Q_2 = 10^{-6}\text{C}$, $Q_3 = 0.5 \times 10^{-6}\text{C}$, are located at corners of equilateral triangle of 50 cm side. Determine magnitude and direction of force on Q_3 .

Section – II

Q.4 Solve any Four: **16**

- A current filament of $3a_x$ lies along x axis. Find H component at P(-1, 3, 2).
- State and prove Ampere's circuital law in point form.
- Explain vector magnetic potential.
- Derive Maxwell's equation in point and integral form from Gauss law for static electric field.
- Derive expression for force on a wire carrying a current.

Q.5 Solve any Two: **12**

- Derive expression for boundary conditions in magnetic field.
- Evaluate both sides of Stroke's theorem for the field $H = (y^2z/x)a_x + (0.5y^2z^2/x^2)az$ and find current in a_y direction crossing the square surface in the plane $y = 2$, bounded by $x = z = 1$ and $x = z = 2$.
- Derive Magnetic field intensity due to finite length element.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options.

14

- 1) One approach to developing a personal set of ethics is to
 - a) Rely solely on one's personal character to determine what action to take
 - b) Stress the importance of rules
 - c) Ignore problems associated with the magnitude of consequences
 - d) Avoid examining the consequences of particular
- 2) Which of the following statements describes ethics?
 - a) Ethics are standard of behavior by which conduct is judged
 - b) Morals are a foundation for ethical behavior
 - c) Ethical values are situation specific and time oriented.
 - d) All of the statements describe ethics
- 3) _____ is a program that serves as an interface between application program and a Set of coordinated and integrated files called a database.

a) DDS	b) DBMS
c) MIS	d) Control
- 4) In _____ system the interaction between various subsystems cannot be defined with certainty.

a) Open System	b) Closed System
c) Deterministic System	d) Probabilistic System
- 5) SDLC stands for
 - a) System Development Life Cycle
 - b) Structure Design Life Cycle
 - c) System Design Life Cycle
 - d) Structure development Life Cycle
- 6) The dimension of the e-commerce that enables commerce across national boundaries called

a) Interactivity	b) Global reach
c) Richness	d) Ubiquity

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options.

14

- 1) The largest component of a web site budget is _____.
 - a) System maintenance
 - b) System development
 - c) Content design and development
 - d) Telecommunications
- 2) A security plan begins with a(n) is
 - a) Security policy
 - b) Risk assessment
 - c) Implementation plan
 - d) Security organization
- 3) Creating multiple versions of information goods & Selling essentially the same product to different market segment at different prices is called _____.
 - a) Versioning
 - b) Bundling
 - c) Transactive content
 - d) Price discrimination
- 4) What is an alternative name for a weak entity?
 - a) Dominant
 - b) Owner
 - c) Child
 - d) All of the above
- 5) Identify which of the following life cycle contains the phases: test case design, test execution, defect tracking, maintenance.
 - a) SDLC
 - b) STLC
 - c) SQLC
 - d) BCL
- 6) Identify the incorrect phase of STLC (Software Testing Life cycle).
 - a) Test closure
 - b) Coding
 - c) Requirement analysis
 - d) Test planning
- 7) Identify the simplest model of SDLC?
 - a) Agile
 - b) RAD
 - c) Waterfall
 - d) Spiral
- 8) One approach to developing a personal set of ethics is to
 - a) Rely solely on one's personal character to determine what action to take
 - b) Stress the importance of rules
 - c) Ignore problems associated with the magnitude of consequences
 - d) Avoid examining the consequences of particular

Set **R**

T. Y. (B.Tech.) (Sem- I) (New) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING
Information Technology & Management (BTN07512)

Day & Date: Friday, 17-05-2024
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.
 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options. **14**

- 1) What is an alternative name for a weak entity?
 - a) Dominant
 - b) Owner
 - c) Child
 - d) All of the above
- 2) Identify which of the following life cycle contains the phases: test case design, test execution, defect tracking, maintenance.
 - a) SDLC
 - b) STLC
 - c) SQLC
 - d) BCL
- 3) Identify the incorrect phase of STLC (Software Testing Life cycle).
 - a) Test closure
 - b) Coding
 - c) Requirement analysis
 - d) Test planning
- 4) Identify the simplest model of SDLC?
 - a) Agile
 - b) RAD
 - c) Waterfall
 - d) Spiral
- 5) One approach to developing a personal set of ethics is to
 - a) Rely solely on one's personal character to determine what action to take
 - b) Stress the importance of rules
 - c) Ignore problems associated with the magnitude of consequences
 - d) Avoid examining the consequences of particular
- 6) Which of the following statements describes ethics?
 - a) Ethics are standard of behavior by which conduct is judged
 - b) Morals are a foundation for ethical behavior
 - c) Ethical values are situation specific and time oriented.
 - d) All of the statements describe ethics
- 7) _____ is a program that serves as an interface between application program and a Set of coordinated and integrated files called a database.
 - a) DDS
 - b) DBMS
 - c) MIS
 - d) Control

- 8) In _____ system the interaction between various subsystems cannot be defined with certainty.
- a) Open System
 - b) Closed System
 - c) Deterministic System
 - d) Probabilistic System
- 9) SDLC stands for
- a) System Development Life Cycle
 - b) Structure Design Life Cycle
 - c) System Design Life Cycle
 - d) Structure development Life Cycle
- 10) The dimension of the e-commerce that enables commerce across national boundaries called
- a) Interactivity
 - b) Global reach
 - c) Richness
 - d) Ubiquity
- 11) The primary source of financing during the early years of e-commerce was _____.
- a) Bank loans
 - b) Large retail firms
 - c) Venture capital funds
 - d) Initial public offerings
- 12) The largest component of a web site budget is _____.
- a) System maintenance
 - b) System development
 - c) Content design and development
 - d) Telecommunications
- 13) A security plan begins with a(n) is
- a) Security policy
 - b) Risk assessment
 - c) Implementation plan
 - d) Security organization
- 14) Creating multiple versions of information goods & Selling essentially the same product to different market segment at different prices is called _____.
- a) Versioning
 - b) Bundling
 - c) Transactive content
 - d) Price discrimination

T.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING
Business Ethics (BTN07514)

Day & Date: Friday, 17-05-2024
Time: 10:00 AM To 01:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

- Q.2 Solve any four. 16**
- a) Explain the concept of business ethics.
 - b) Explain various principles of business Ethics.
 - c) Write short note on organization for business ethics management.
 - d) Explain in detail about models for decision making.
 - e) What is CSR and why it is needed in Indian business environment?
- Q.3 Solve any two. 12**
- a) Explain normative, descriptive and contemporary ethical theories.
 - b) Write short note on standards of ethical behavior.
 - c) Explain the objectives and importance of CSR.

Section – II

- Q.4 Solve the questions. 16**
- a) State and explain ethical issues in the firm-employee relationship.
 - b) Write short note on business ethics and environmental values.
 - c) Explain ethical issues and CSOs.
 - d) Explain ethical issues in the relation between business and government.
- Q.5 Solve any two. 12**
- a) Describe the IT code of conduct in detail.
 - b) Explain Globalization and CSOs e.
 - c) Write short note on ethical challenges of globalization.

T.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING
Managerial Economics (BTN07515)

Day & Date: Friday 17-05-2024
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct answer.

14

- 1) Barometric methods are used to forecast _____.
 a) seasonal variation b) secular trend
 c) cyclical variation d) irregular variation
- 2) Trend projection is an example of which kind of forecasting?
 a) Qualitative b) Time-series
 c) Barometric d) Econometric
- 3) Short run is a period of time over which at least one factor must _____.
 a) Remain flexible b) Remain fixed
 c) Variable d) None of the above
- 4) The relation between physical outputs of a production process to physical inputs is known as _____.
 a) Consumption function b) Utilization function
 c) Production function d) Sales function
- 5) Variable costs are _____.
 a) sunk costs
 b) multiplied by fixed costs
 c) costs that change with the level of production
 d) defined as the change in total cost resulting from the production of an additional unit of output
- 6) Which of the following is not an essential condition of pure competition?
 a) Large number of buyers and sellers
 b) Homogeneous product
 c) Freedom of entry
 d) Absence of transport cost
- 7) Which of the following is the least competitive market structure?
 a) Perfect competition b) Monopolistic competition
 c) Oligopoly d) Monopoly

- 8) Which of the following is the best definition of managerial economics?
Managerial economics is _____.
- a) a distinct field of economic theory
 - b) a field that applies economic theory and the tools of decision science
 - c) a field that combines economic theory and mathematics
 - d) none of the above
- 9) The first stage in the decision process described in the text is to _____.
- a) define the problem
 - b) select the best possible solution
 - c) determine the objective
 - d) identify possible solutions
- 10) The term Managerial economics also refers to _____.
- a) Principles of Management
 - b) Management Accounting
 - c) Applied economics
 - d) Consumer Behavior
- 11) Which of the following would NOT be a determinant of demand?
- a) the price of related goods
 - b) Income
 - c) Tastes
 - d) the prices of the inputs used to produce the good
- 12) When the price is higher than the equilibrium price, _____.
- a) a shortage will exist
 - b) buyers desire to purchase more than is produced
 - c) sellers desire to produce and sell more than buyers wish to purchase
 - d) quantity demanded equals quantity supplied
- 13) If the price elasticity of demand for a good is 0.75 i.e. (less than one), the demand for the good can be described as:
- a) normal
 - b) elastic
 - c) inferior
 - d) inelastic
- 14) Cross elasticity of demand is: _____.
- a) negative for complementary goods
 - b) negative for substitute goods
 - c) unitary for inferior goods
 - d) positive for inferior goods

Max. Marks: 56

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any four. 16

- Explain the measuring values of market exchange.
- Describe the concept elasticity of demand in detail.
- State and explain the factors affecting price elasticity.
- Explain the concept of economics and managerial economics.
- Explain economics contribution to managerial decision.
- Explain the following terms:
 - Demand
 - Market demand
 - Supply
 - Market equilibrium

Q.3 Solve any two. 12

- Explain the changes of demand and supply on market equilibrium.
- Explain the impact of price elasticity on total revenue and marginal revenue.
- State the difference between Microeconomics and Macroeconomics.

Section – II

Q.4 Solve any four. 16

- Explain breakeven analysis. Also state the limitations of breakeven analysis.
- Describe demand side of market and supply side of market.
- Explain Market Structure. Also state the objectives of market structure.
- Explain graphical method of trend projection demand forecasting.
- Explain Linear Programming (LP). Also state the advantages and limitations of LP Techniques.
- What is production? Explain the concept of production function?

Q.5 Solve any two. 12

- Explain the degree of competition in market.
- Describe Survey Methods for demand forecasting.
- Explain following costs of production:
 - Actual Cost and Opportunity Cost
 - Business and Full Costs
 - Explicit and Implicit/Imputed Costs

T. Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING
Smart Energy Management System (BTN07516)

Day & Date: Saturday, 18-05-2024
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:**
- 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No. 3 (starting page of the Answer Book). Each question carry one mark.
 - 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 - 3) Figures to the right indicates full marks.
 - 4) Assume data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) The smart grid will help electric company minimize service disruptions.

a) True	b) False
c) Other	d) None
- 2) The smart grid will help electric company restore power more quickly after an outage.

a) True	b) False
c) Other	d) None
- 3) One of the largest returns on investment pertaining to the deployment of advanced sensing and measurement technologies is the reduction of energy theft.

a) True	b) False
c) Other	d) None
- 4) Smart Grid goals include all but the following:
 - a) Potentially reducing our carbon footprint
 - b) Introducing advancements and efficiencies yet to be envisioned
 - c) Assimilate all cultures, all categories of consumers
 - d) Maintaining grid affordability
- 5) Electric vehicles plugged into the grid could potentially help stabilize grids during peak usage times.

a) True	b) False
c) Other	d) None
- 6) "Making the grid smarter" may be achieved by replacing traditional analog components with digital ones and incorporating the computing, IT, sensors and other equipment in electric supply system.

a) True	b) False
c) Other	d) None

- 7) Smart meter is an important element in building the smart grid. These advanced meters _____.
- a) Measure electricity usage in real time.
 - b) Can send data to and from electric companies and their customers.
 - c) Allows companies to give consumers more information about their electricity usage, and communicate current electricity prices.
 - d) All of the above
- 8) Smart Grid technologies are aimed at improvement of _____.
- a) Only Power Transmission System
 - b) Only Power Distribution system
 - c) Both Power Transmission & Distribution System
 - d) Neither Power Transmission nor Power Distribution system
- 9) Distributed intelligence is achieved by means of Sensors and other monitoring devices in remote locations intended for long-term operation in the field.
- a) True
 - b) False
 - c) Other
 - d) None
- 10) Net metering allows consumers who contribute power to the grid to receive credit for at least a portion of that electricity.
- a) True
 - b) False
 - c) Other
 - d) None
- 11) In a Smart Grid ECO System, a normal consumer is expected to be able to turn to _____.
- a) a non-consumer
 - b) a careful consumer
 - c) a Prosumer
 - d) Both careful consumer and Prosumer
- 12) Time of use (TOU) is an energy cost reduction measure that permits consumers to operate during off-peak hours.
- a) True
 - b) False
 - c) Other
 - d) None
- 13) Time of day rate is the rate charged to electric utility customers based on the varying costs of delivering service at different times throughout the day.
- a) True
 - b) False
 - c) Other
 - d) None
- 14) POWERGRID has demonstrated the Smart Grid Technology capabilities in collaboration with various solution providers at _____.
- a) Bengaluru
 - b) Mysore
 - c) Puducherry
 - d) New Delhi

Smart Energy Management System (BTN07516)

Day & Date: Saturday, 18-05-2024
Time: 10:00 AM To 01:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicates full marks.
3) Assume data wherever necessary.

Section – I

- Q.2 Solve any four** **16**
- a) Define smart grid concept and explain its necessity.
 - b) Explain the data mining techniques used in smart grid system.
 - c) Explain functions of smart grid components.
 - d) Explain how the automatic meter reading can make the system smarter.
 - e) Write DSM rules.
- Q.3 Solve any two** **12**
- a) Explain the smart substation.
 - b) Write a short note data mining techniques and its applications.
 - c) Explain the stages on evaluation of smart grid.

Section – II

- Q.4 Solve any four** **16**
- a) Explain the role of smart meters to make the system smart.
 - b) Explain smart metering and advantages of it.
 - c) Write the integrated approaches to smart city modeling.
 - d) Write the application of DSO.
 - e) Explain outage management system.
- Q.5 Solve any two** **12**
- a) Explain in briefly the characteristics of distribution grid.
 - b) What is the impact of smart grid component integration on distribution network operation?
 - c) Write a short note on need of Smart grid Management system.

 c) Other
 d) None
- 3) Net metering allows consumers who contribute power to the grid to receive credit for at least a portion of that electricity.
 a) True
 b) False
 c) Other
 d) None
- 4) In a Smart Grid ECO System, a normal consumer is expected to be able to turn to _____.
 a) a non-consumer
 b) a careful consumer
 c) a Prosumer
 d) Both careful consumer and Prosumer
- 5) Time of use (TOU) is an energy cost reduction measure that permits consumers to operate during off-peak hours.
 a) True
 b) False
 c) Other
 d) None
- 6) Time of day rate is the rate charged to electric utility customers based on the varying costs of delivering service at different times throughout the day.
 a) True
 b) False
 c) Other
 d) None

Set Q

**T. Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING**

Smart Energy Management System (BTN07516)

Day & Date: Saturday, 18-05-2024
Time: 10:00 AM To 01:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicates full marks.
3) Assume data wherever necessary.

Section – I

- Q.2 Solve any four** **16**
- a) Define smart grid concept and explain its necessity.
 - b) Explain the data mining techniques used in smart grid system.
 - c) Explain functions of smart grid components.
 - d) Explain how the automatic meter reading can make the system smarter.
 - e) Write DSM rules.
- Q.3 Solve any two** **12**
- a) Explain the smart substation.
 - b) Write a short note data mining techniques and its applications.
 - c) Explain the stages on evaluation of smart grid.

Section – II

- Q.4 Solve any four** **16**
- a) Explain the role of smart meters to make the system smart.
 - b) Explain smart metering and advantages of it.
 - c) Write the integrated approaches to smart city modeling.
 - d) Write the application of DSO.
 - e) Explain outage management system.
- Q.5 Solve any two** **12**
- a) Explain in briefly the characteristics of distribution grid.
 - b) What is the impact of smart grid component integration on distribution network operation?
 - c) Write a short note on need of Smart grid Management system.

Seat No.

T. Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING
Smart Energy Management System (BTN07516)

Day & Date: Saturday, 18-05-2024
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:**
- 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No. 3 (starting page of the Answer Book). Each question carry one mark.
 - 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 - 3) Figures to the right indicates full marks.
 - 4) Assume data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) In a Smart Grid ECO System, a normal consumer is expected to be able to turn to _____.
 - a) a non-consumer
 - b) a careful consumer
 - c) a Prosumer
 - d) Both careful consumer and Prosumer
- 2) Time of use (TOU) is an energy cost reduction measure that permits consumers to operate during off-peak hours.
 - a) True
 - b) False
 - c) Other
 - d) None
- 3) Time of day rate is the rate charged to electric utility customers based on the varying costs of delivering service at different times throughout the day.
 - a) True
 - b) False
 - c) Other
 - d) None
- 4) POWERGRID has demonstrated the Smart Grid Technology capabilities in collaboration with various solution providers at _____.
 - a) Bengaluru
 - b) Mysore
 - c) Puducherry
 - d) New Delhi
- 5) The smart grid will help electric company minimize service disruptions.
 - a) True
 - b) False
 - c) Other
 - d) None
- 6) The smart grid will help electric company restore power more quickly after an outage.
 - a) True
 - b) False
 - c) Other
 - d) None

- 7) One of the largest returns on investment pertaining to the deployment of advanced sensing and measurement technologies is the reduction of energy theft.
- a) True
 - b) False
 - c) Other
 - d) None
- 8) Smart Grid goals include all but the following:
- a) Potentially reducing our carbon footprint
 - b) Introducing advancements and efficiencies yet to be envisioned
 - c) Assimilate all cultures, all categories of consumers
 - d) Maintaining grid affordability
- 9) Electric vehicles plugged into the grid could potentially help stabilize grids during peak usage times.
- a) True
 - b) False
 - c) Other
 - d) None
- 10) “Making the grid smarter” may be achieved by replacing traditional analog components with digital ones and incorporating the computing, IT, sensors and other equipment in electric supply system.
- a) True
 - b) False
 - c) Other
 - d) None
- 11) Smart meter is an important element in building the smart grid. These advanced meters _____.
- a) Measure electricity usage in real time.
 - b) Can send data to and from electric companies and their customers.
 - c) Allows companies to give consumers more information about their electricity usage, and communicate current electricity prices.
 - d) All of the above
- 12) Smart Grid technologies are aimed at improvement of _____.
- a) Only Power Transmission System
 - b) Only Power Distribution system
 - c) Both Power Transmission & Distribution System
 - d) Neither Power Transmission nor Power Distribution system
- 13) Distributed intelligence is achieved by means of Sensors and other monitoring devices in remote locations intended for long-term operation in the field.
- a) True
 - b) False
 - c) Other
 - d) None
- 14) Net metering allows consumers who contribute power to the grid to receive credit for at least a portion of that electricity.
- a) True
 - b) False
 - c) Other
 - d) None

Electric Motors and Controls for Electric Vehicle (BTN07517)

Day & Date: Saturday, 18-05-2024
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:**
- 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No. 3 (starting page of the Answer Book). Each question carry one mark.
 - 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 - 3) Figures to the right indicates full marks.
 - 4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) In the method of phase control, the phase relationship between _____ & _____ is controlled by varying the firing angle.
 - a) supply current, supply voltage
 - b) end of the load current, end of the load voltage
 - c) start of the load current, start of the load voltage
 - d) load current, load voltage
- 2) In a hybrid electric vehicle one energy source is _____ & the other is a conversion of a _____.

a) combustion, energy to fuel	b) storage, energy to fuel
c) storage, energy to energy	d) storage, fuel to energy
- 3) Dual converters provide _____.

a) two quadrant operation	b) three quadrant operation
c) four quadrant operation	d) none of the mentioned
- 4) In pulse width modulation scheme, _____ is kept constant.

a) V_s	b) T_{on}
c) T	d) T_{off}
- 5) In series hybrid vehicle _____ is coupled with the Internal combustion engine to produce electricity for propulsion.

a) diesel engine	b) generator
c) gas engine	d) hydrogen engine
- 6) What is the duty cycle of a chopper?

a) T_{on}/T_{off}	b) T_{on}/T
c) T/T_{on}	d) $T_{off} \times T_{on}$
- 7) V/f is maintained constant in the following case of speed control of induction motor.
 - a) Below base speed with voltage control
 - b) Below the base speed with frequency control
 - c) Above base speed with frequency control
 - d) None of these

- 8) _____ method relies on keeping V/f ratio constant so as to maintain air gap flux at constant value.
- a) Scalar Control
 - b) Vector Control
 - c) Torque Control
 - d) none of the above
- 9) _____ is a technique that allows you to instantaneously control the motor magnetic flux and its electromagnetic torque in a decoupled way.
- a) Scalar Control
 - b) Vector Control
 - c) Direct Torque Control
 - d) none of the above
- 10) Space vector modulation is responsible for generating pulse width modulated signals to control the switches of an inverter.
- a) generating pulse width modulated signals to control the switches of an inverter
 - b) generating pulse width modulated signals only
 - c) control the switches of an inverter only
 - d) none of the above
- 11) _____ analysis of an IM allows decoupled analysis where the flux and torque component can be independently controlled.
- a) Scalar Control
 - b) Vector Control
 - c) V/F Control
 - d) none of the above
- 12) The Field Oriented Control (FOC) enables the induction machine being controlled alike the _____.
- a) Separately excited DC Machine
 - b) Permanent magnet DC Machine
 - c) Switched reluctance machine
 - d) Stepper motor
- 13) Power split mode of hybrid electric vehicle control uses _____.
- a) Series & Parallel control topology
 - b) Only Series control topology
 - c) Only Parallel control topology
 - d) none of the above
- 14) Which of the following control loops used by Direct torque control?
- a) speed control loop
 - b) torque control loop
 - c) both a & b
 - d) none of the above

Electric Motors and Controls for Electric Vehicle (BTN07517)

Day & Date: Saturday, 18-05-2024
Time: 10:00 AM To 01:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicates full marks.
3) Assume suitable data if necessary.

Section – I

Q.2 Solve any four. 16

- Explain power flow in Hybrid Electric Drive Train System with different modes.
- Explain Time Control Strategy (TRC) in case of Chopper Control.
- Explain with diagram Series Hybrid Electric Drive Train System.
- Describe single phase full wave converter feeding a separately excited dc motor with circuit diagram and waveform.
- Explain principle of phase control in rectifiers.
- Explain the operation of V/F control method of speed control of induction motor drive.

Q.3 Solve any two. 12

- Explain the four-quadrant operation of chopper DC motor drive with suitable waveforms for electric vehicle.
- Explain the procedure how electric motor can be selected for hybrid electric vehicle.
- Describe the use of three phase dual-converter for speed control of dc series motor with appropriate Waveforms.

Section – II

Q.4 Solve any four. 16

- Explain in detail Indirect/Feed forward vector control of induction machine.
- Explain principle of direct vector control of induction machine.
- Explain Vehicle supervisory control in detail.
- Describe the torque expression with stator and rotor fluxes in case of Direct Torque control of Induction machine.
- Explain the hybrid mode of control of electric vehicle.
- Describe space vector modulation control in case of induction machine.

Q.5 Solve any two. 12

- Explain different mode selection strategy of control of electric vehicle.
- Explain in detail theory and dc drive analogy of field oriented control of Induction Machine.
- Explain with block diagram Direct Torque of induction motor.

Q.4 Solve any four. 16

- Explain in detail Indirect/Feed forward vector control of induction machine.
- Explain principle of direct vector control of induction machine.
- Explain Vehicle supervisory control in detail.
- Describe the torque expression with stator and rotor fluxes in case of Direct Torque control of Induction machine.
- Explain the hybrid mode of control of electric vehicle.
- Describe space vector modulation control in case of induction machine.

Q.5 Solve any two. 12

- Explain different mode selection strategy of control of electric vehicle.
- Explain in detail theory and dc drive analogy of field oriented control of Induction Machine.
- Explain with block diagram Direct Torque of induction motor.

**T. Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING**

Electric Motors and Controls for Electric Vehicle (BTN07517)

Day & Date: Saturday, 18-05-2024
Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:**
- 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No. 3 (starting page of the Answer Book). Each question carry one mark.
 - 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 - 3) Figures to the right indicates full marks.
 - 4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) What is the duty cycle of a chopper?

a) Ton/Toff	b) Ton/T
c) T/Ton	d) Toff x Ton
- 2) V/f is maintained constant in the following case of speed control of induction motor.
 - a) Below base speed with voltage control
 - b) Below the base speed with frequency control
 - c) Above base speed with frequency control
 - d) None of these
- 3) _____ method relies on keeping V/f ratio constant so as to maintain air gap flux at constant value.

a) Scalar Control	b) Vector Control
c) Torque Control	d) none of the above
- 4) _____ is a technique that allows you to instantaneously control the motor magnetic flux and its electromagnetic torque in a decoupled way.

a) Scalar Control	b) Vector Control
c) Direct Torque Control	d) none of the above
- 5) Space vector modulation is responsible for generating pulse width modulated signals to control the switches of an inverter.
 - a) generating pulse width modulated signals to control the switches of an inverter
 - b) generating pulse width modulated signals only
 - c) control the switches of an inverter only
 - d) none of the above
- 6) _____ analysis of an IM allows decoupled analysis where the flux and torque component can be independently controlled.

a) Scalar Control	b) Vector Control
c) V/F Control	d) none of the above

- 7) The Field Oriented Control (FOC) enables the induction machine being controlled alike the _____.
a) Separately excited DC Machine
b) Permanent magnet DC Machine
c) Switched reluctance machine
d) Stepper motor
- 8) Power split mode of hybrid electric vehicle control uses _____.
a) Series & Parallel control topology
b) Only Series control topology
c) Only Parallel control topology
d) none of the above
- 9) Which of the following control loops used by Direct torque control?
a) speed control loop
b) torque control loop
c) both a & b
d) none of the above
- 10) In the method of phase control, the phase relationship between _____ & _____ is controlled by varying the firing angle.
a) supply current, supply voltage
b) end of the load current, end of the load voltage
c) start of the load current, start of the load voltage
d) load current, load voltage
- 11) In a hybrid electric vehicle one energy source is _____ & the other is a conversion of a _____.
a) combustion, energy to fuel
b) storage, energy to fuel
c) storage, energy to energy
d) storage, fuel to energy
- 12) Dual converters provide _____.
a) two quadrant operation
b) three quadrant operation
c) four quadrant operation
d) none of the mentioned
- 13) In pulse width modulation scheme, _____ is kept constant.
a) V_s
b) T_{on}
c) T
d) T_{off}
- 14) In series hybrid vehicle _____ is coupled with the Internal combustion engine to produce electricity for propulsion.
a) diesel engine
b) generator
c) gas engine
d) hydrogen engine

Set S

**T. Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING**

Electric Motors and Controls for Electric Vehicle (BTN07517)

Day & Date: Saturday, 18-05-2024
Time: 10:00 AM To 01:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicates full marks.
3) Assume suitable data if necessary.

Section – I

Q.2 Solve any four. 16

- Explain power flow in Hybrid Electric Drive Train System with different modes.
- Explain Time Control Strategy (TRC) in case of Chopper Control.
- Explain with diagram Series Hybrid Electric Drive Train System.
- Describe single phase full wave converter feeding a separately excited dc motor with circuit diagram and waveform.
- Explain principle of phase control in rectifiers.
- Explain the operation of V/F control method of speed control of induction motor drive.

Q.3 Solve any two. 12

- Explain the four-quadrant operation of chopper DC motor drive with suitable waveforms for electric vehicle.
- Explain the procedure how electric motor can be selected for hybrid electric vehicle.
- Describe the use of three phase dual-converter for speed control of dc series motor with appropriate Waveforms.

Section – II

Q.4 Solve any four. 16

- Explain in detail Indirect/Feed forward vector control of induction machine.
- Explain principle of direct vector control of induction machine.
- Explain Vehicle supervisory control in detail.
- Describe the torque expression with stator and rotor fluxes in case of Direct Torque control of Induction machine.
- Explain the hybrid mode of control of electric vehicle.
- Describe space vector modulation control in case of induction machine.

Q.5 Solve any two. 12

- Explain different mode selection strategy of control of electric vehicle.
- Explain in detail theory and dc drive analogy of field oriented control of Induction Machine.
- Explain with block diagram Direct Torque of induction motor.

T. Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING
Economics (BTN07506)

Day & Date: Monday, 20-05-2024
 Time: 10:00 AM To 12:00 PM

Max. Marks: 50

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 20 Minutes

Marks: 10

Q.1 Choose the correct alternatives from the options. 10

- 1) Who gives a welfare definition of economics?

a) Adam Smith	b) Alfred Marshall
c) Lionel Robbins	d) Paul Samuelson
- 2) The type of equilibrium that deals with the determination of price and quantity of only one _____.

a) General equilibrium	b) Partial equilibrium
c) Zero equilibrium	d) Pareto efficiency
- 3) Who is known as father of economics?

a) Adam Smith	b) Prof. A. Samulson
c) Alfred Marshall	d) J. R. Hicks
- 4) Macroeconomic theory deals with _____.

a) The behavior of firms	b) The activities of individual units
c) Economic aggregates	d) The behavior of the electronics industry
- 5) Which of the following market types has all firms selling products so identical that buyers do not care from which firm they buy?

a) Perfect competition	b) Oligopoly
c) Monopolistic competition	d) Monopoly
- 6) Which of the following is the best example of a natural monopoly?

a) owning the only licensed taxicab in town	b) the United States Postal Service
c) ownership of the only ferry across Puget Sound for twenty miles	d) the cable television company in your hometown
- 7) Which of the following is not a regulatory institution in Indian financial system?

a) RBI	b) CIBIL
c) SEBI	d) IRDA

- 8) Money supply increases when inflation rises in the economy _____.
- a) Increase
 - b) Decrease
 - c) No change
 - d) None of the above
- 9) Market system means: _____.
- a) Socialism
 - b) Capitalism
 - c) A place where goods are traded
 - d) All of the above
- 10) _____ is the application of knowledge which redefines the boundaries of global business.
- a) Cultural Values
 - b) Society
 - c) Technology
 - d) Economy

MCQ/Objective Type Questions

Duration: 20 Minutes

Marks: 10

Q.1 Choose the correct alternatives from the given options.

10

- 1) What is the term of Patent?

a) 35 years	b) 25 years
c) 20 years	d) 15 years
- 2) Intellectual Property Rights (IPR) protects the use of information and ideas that are of _____.

a) Ethical value	b) Moral value
c) Social value	d) Commercial value
- 3) Who fills the invention disclosure form (IDF)?

a) Inventor	b) Patent Attorney
c) Assignee	d) Patent Searcher
- 4) The following can be patented _____.

a) Machine	b) Process
c) Composition of matter	d) All of these
- 5) Trade mark _____.

a) is represented graphically	b) is capable of distinguishing the goods or services of one person from those of others
c) may include shapes of goods or combination of colors	d) All of the above
- 6) In India, the literary work is protected until _____.

a) Lifetime of author	b) 25 years after the death of author
c) 40 years after the death of author	d) 60 years after the death of author
- 7) Which is not a type of intellectual property?

a) Trade secrets	b) Trademarks
c) Home loans	d) Copyrights

- 8)** In which article is intellectual property rights outlined?
- | | |
|---------------|---------------|
| a) Article 15 | b) Article 27 |

 - c) Taking a mindful walk
 - d) All of the above
- 8) Which one is not considered as Environmental stressors?
- a) Weather
 - b) Traffic
 - c) Financial problems
 - d) Substandard housing
- 9) When a task appears overwhelming, it is best to _____.
- a) Put it aside till later
 - b) Drink alcohol to relax
 - c) Break it down into smaller task
 - d) Avoid the task
- 10) The word Stress is derived from Latin word 'Stringere' which means _____.
- a) Draw tight
 - b) Stimulus
 - c) Force
 - d) Attitude

Stress and Coping (BTN07509)

Day & Date: Monday, 20-05-2024
Time: 10:00 AM To 12:00 PM

Max. Marks: 40

Instructions: 1) Attempt any four questions from Q. no 2 to Q. no 7.
2) Figures to the right indicate full marks.

- Q.2** Explain in detail the various personality sources of stress. Explain Type A and Type B Personality factors causing stress. **10**
- Q.3** What do you mean by Stress? Describe the current & Historical status of stress in India. **10**
- Q.4** Comment on psychological & behavioral consequences of stress in brief. **10**
- Q.5** Explain various coping styles to deal with stress. **10**
- Q.6** Describe positive and negative effects of stress with examples. **10**
- Q.7** Discuss the nature of stress response. **10**

Professional Ethics & Human Value (BTN07510)

Day & Date: Monday, 20-05-2024
 Time: 10:00 AM To 12:00 PM

Max. Marks: 50

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.
 4) Assume suitable data if required and state it clearly.

MCQ/Objective Type Questions

Duration: 20 Minutes

Marks: 10

Q.1 Choose the correct alternatives from the options. 10

- 1) Virtues are _____.
 a) moral
 b) ethics
 c) values
 d) positive and preferred values
- 2) One of the basic desires of every human being is to be always _____.
 a) Happy
 b) Sad
 c) Laugh
 d) Earn Money
- 3) Value and skills should go hand in hand _____.
 a) True
 b) False
 c) Cannot tell
 d) Wrong question
- 4) _____ are the basic Human aspirations.
 a) Money
 b) Relationship without money
 c) Physical facility
 d) Continuous happiness
- 5) Many complex social problems exist in the _____.
 a) Industry/ Business
 b) Society
 c) Home
 d) None of the above
- 6) What is Integrity?
 a) Unity of thought
 b) Word and deed
 c) Open mindedness
 d) All of these
- 7) Human values are essential for _____.
 a) living in harmony with self, each other and nature
 b) making life easier and happy
 c) living with family and friends
 d) making money to fulfill desires
- 8) Courage is the tendency to accept and face _____.
 a) Self-confidence
 b) Risks and difficult tasks in rational ways
 c) Physical courage
 d) Social courage

- 9) Commitment means _____.
- a) Alignment to goals
 - b) Adherence to ethical principles
 - c) Empathy
 - d) All the above
- 10) The objectives of professional ethics in engineering are _____.
- a) To understand the moral values that ought to guide the Engineering profession
 - b) To resolve the moral issues in the profession, and
 - c) To justify the moral judgment concerning the profession
 - d) All the above

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 MCQ/Objective Type Questions

14

- 1) In case of D.C. machines, mechanical losses are primary function of _____.
 - a) current
 - b) voltage
 - c) speed
 - d) none of above
- 2) In D.C. generators, the cause of rapid brush wear may be _____.
 - a) Severe sparking
 - b) Rough commutator surface
 - c) Imperfect contact
 - d) Any of the above
- 3) With increase in voltage, the window space factor of transformer _____.
 - a) Decrease
 - b) Increase
 - c) Remains constant
 - d) Decrease or increase depending upon whether it is a distribution or power transformer
- 4) Multi stepped core is used in a transformer to _____.
 - a) Increase output
 - b) Decrease cost of core material
 - c) Decrease cost of copper
 - d) Increase efficiency
- 5) The hum in a transformer is due to _____.
 - a) Magneto striction
 - b) Vibration developed by lamination depending upon tightness of clamping
 - c) Mechanical vibration of the tank walls
 - d) All of the above
- 6) The no-load current drawn by transformer is usually what per cent of the full-load current?
 - a) 0.2 to 0.5 per cent
 - b) 2 to 5 percent
 - c) 12 to 15 per cent
 - d) 20 to 30 per cent

- 7) Specific electric loading is not governed by _____.
a) Heating or temperature rise b) Speed of machine
c) Magnetizing current d) Machine size
- 8) In dc machine increase in field mmf causes _____.
a) Increase in size and cost of the machines
b) Decrease in size and cost of the machines
c) Excessive sparking
d) None of these
- 9) Higher values of flux density can be taken while designing machines for _____.
a) Large rotor diameter b) Large output
c) Both a and b d) None of these
- 10) In induction motor specific electric loading is governed by _____.
a) Commutation b) Temperature rise
c) Overload capacity d) voltage
- 11) In case the air gap in an induction motor is increased _____.
a) the magnetizing current of the rotor will decrease
b) the power factor will decrease
c) speed of motor will increase
d) the wind age losses will increase
- 12) The stator core of turbo alternator is made of _____.
a) Segmental laminations of low loss silicon steel
b) Cold-rolled non oriented steel with about 3% silicon
c) Cold-rolled grain oriented steel with about 4% silicon
d) Both a and b
- 13) Use of higher B_{av} in synchronous machines caused increase in _____.
a) Iron loss b) Synchronizing power
c) Short circuit current d) All of these
- 14) When V is the applied voltage, then the breakdown torque of a synchronous motor varies as _____.
a) V b) $V/2$
c) V^2 d) $1/V$

T. Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: March/April - 2024
ELECTRICAL ENGINEERING
Electrical Machine Design (BTN07601)

Day & Date: Tuesday, 21-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

Instructions: 1) All questions are compulsory.
 2) Figures to right indicate full marks.

Section – I

Q.2 Answer any FOUR questions **16**

- a) Explain the design limitations.
- b) Derive an expression for square core.
- c) Explain the specific magnetic loading for dc machine.
- d) Determine suitable values for the D&L for a 1000kw, 500v, 10 poles, 300 rpm dc shunt generator assume $B_{av} = 1\text{wb/m}$ specific electric loading 400 amp.cond.
- e) Calculate the core & window area required for a 1000kva, 6600/400v, 50hz, 1-ph. Core type transformer assume $B_{max} = 1.25\text{wb/m}$ & current density is 2.5A/mm voltage /turn 30v, window space factor 0.32.

Q.3 Answer any TWO questions **12**

- a) Derive an expression for two stepped core.
- b) Derive an expression for output equation of dc machine.
- c) A 3-ph. 50hz, core type transformer has the following dimensions distance between the core centers 0.2m height of window 0.24m, $d = 0.14$, $B_{max} = 1.25\text{wb/m}$, current density 2.5A/mm assume window space factor 0.2 core area factor 0.56 the core is 2-stepped Estimate the kva rating of transformer.

Section – II

Q.4 Answer any FOUR questions. **16**

- a) Explain the specific magnetic loading for synchronous machine.
- b) Derive an expression for stator winding of IM.
- c) Derive an expression for rotor bars for IM.
- d) Determine the main dimensions of a 11kw, 400v, 3-ph.4pole 1425rpm delta connected IM $B_{av} = 0.45\text{wb/m}$, $a_c = 23000\text{ amp. Cond.}$ Full load efficiency 0.85 p.f.0.88, $L/\tau = 1$.
- e) The output coefficient of 1250kva, 300rpm synchronous generator is 200kva/m-rps $L/D = 0.2$, find the values of main dimensions when specific loading is decreased by 10%.

Q.5 Answer any TWO questions **12**

- a) Derive an expression for output equation of turbo alternator.
- b) Derive an expression for output equation of ac machine.
- c) A 20hp, 440v, 4pole 50hz, 3-ph.IM is built with a stator diameter of 0.25 m & core length of 0.16m $a_c = 23000\text{ amp. Cond.}$ Find magnetic loading of the machine assume efficiency 0.84 & p.f.0.82.

 c) Imperfect contact
 d) Any of the above
- 7) With increase in voltage, the window space factor of transformer _____.
 a) Decrease
 b) Increase
 c) Remains constant
 d) Decrease or increase depending upon whether it is a distribution or power transformer

- 8) Multi stepped core is used in a transformer to _____.
- Increase output
 - Decrease cost of core material
 - Decrease cost of copper
 - Increase efficiency
- 9) The hum in a transformer is due to _____.
- Magneto striction
 - Vibration developed by lamination depending upon tightness of clamping
 - Mechanical vibration of the tank walls
 - All of the above
- 10) The no-load current drawn by transformer is usually what per cent of the full-load current?
- 0.2 to 0.5 per cent
 - 2 to 5 percent
 - 12 to 15 per cent
 - 20 to 30 per cent
- 11) Specific electric loading is not governed by _____.
- Heating or temperature rise
 - Speed of machine
 - Magnetizing current
 - Machine size
- 12) In dc machine increase in field mmf causes _____.
- Increase in size and cost of the machines
 - Decrease in size and cost of the machines
 - Excessive sparking
 - None of these
- 13) Higher values of flux density can be taken while designing machines for _____.
- Large rotor diameter
 - Large output
 - Both a and b
 - None of these
- 14) In induction motor specific electric loading is governed by _____.
- Commutation
 - Temperature rise
 - Overload capacity
 - voltage

Set **R**

T. Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: March/April - 2024
ELECTRICAL ENGINEERING
Electrical Machine Design (BTN07601)

Day & Date: Tuesday, 21-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

Instructions: 1) All questions are compulsory.
 2) Figures to right indicate full marks.

Section – I

Q.2 Answer any FOUR questions **16**

- a) Explain the design limitations.
- b) Derive an expression for square core.
- c) Explain the specific magnetic loading for dc machine.
- d) Determine suitable values for the D&L for a 1000kw, 500v, 10 poles, 300 rpm dc shunt generator assume $B_{av} = 1 \text{ wb/m}$ specific electric loading 400 amp.cond.
- e) Calculate the core & window area required for a 1000kva, 6600/400v, 50hz, 1-ph. Core type transformer assume $B_{max} = 1.25 \text{ wb/m}$ & current density is 2.5A/mm voltage /turn 30v, window space factor 0.32.

Q.3 Answer any TWO questions **12**

- a) Derive an expression for two stepped core.
- b) Derive an expression for output equation of dc machine.
- c) A 3-ph. 50hz, core type transformer has the following dimensions distance between the core centers 0.2m height of window 0.24m, $d = 0.14$, $B_{max} = 1.25 \text{ wb/m}$, current density 2.5A/mm assume window space factor 0.2 core area factor 0.56 the core is 2-stepped Estimate the kva rating of transformer.

Section – II

Q.4 Answer any FOUR questions. **16**

- a) Explain the specific magnetic loading for synchronous machine.
- b) Derive an expression for stator winding of IM.
- c) Derive an expression for rotor bars for IM.
- d) Determine the main dimensions of a 11kw, 400v, 3-ph.4pole 1425rpm delta connected IM $B_{av} = 0.45 \text{ wb/m}$, $a_c = 23000 \text{ amp. Cond.}$ Full load efficiency 0.85 p.f.0.88, $L/\tau = 1$.
- e) The output coefficient of 1250kva, 300rpm synchronous generator is 200kva/m-rps $L/D = 0.2$, find the values of main dimensions when specific loading is decreased by 10%.

Q.5 Answer any TWO questions **12**

- a) Derive an expression for output equation of turbo alternator.
- b) Derive an expression for output equation of ac machine.
- c) A 20hp, 440v, 4pole 50hz, 3-ph.IM is built with a stator diameter of 0.25 m & core length of 0.16m $a_c = 23000 \text{ amp. Cond.}$ Find magnetic loading of the machine assume efficiency 0.84 & p.f.0.82.

Electrical Machine Design (BTN07601)

Day & Date: Tuesday, 21-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No.3 (starting page of the Answer Book). Each question carry one mark.
 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 MCQ/Objective Type Questions**14**

- 1) The no-load current drawn by transformer is usually what per cent of the full-load current?
 - a) 0.2 to 0.5 per cent
 - b) 2 to 5 percent
 - c) 12 to 15 per cent
 - d) 20 to 30 per cent
- 2) Specific electric loading is not governed by _____.
 - a) Heating or temperature rise
 - b) Speed of machine
 - c) Magnetizing current
 - d) Machine size
- 3) In dc machine increase in field mmf causes _____.
 - a) Increase in size and cost of the machines
 - b) Decrease in size and cost of the machines
 - c) Excessive sparking
 - d) None of these
- 4) Higher values of flux density can be taken while designing machines for _____.
 - a) Large rotor diameter
 - b) Large output
 - c) Both a and b
 - d) None of these
- 5) In induction motor specific electric loading is governed by _____.
 - a) Commutation
 - b) Temperature rise
 - c) Overload capacity
 - d) voltage
- 6) In case the air gap in an induction motor is increased _____.
 - a) the magnetizing current of the rotor will decrease
 - b) the power factor will decrease
 - c) speed of motor will increase
 - d) the wind age losses will increase
- 7) The stator core of turbo alternator is made of _____.
 - a) Segmental laminations of low loss silicon steel
 - b) Cold-rolled non oriented steel with about 3% silicon
 - c) Cold-rolled grain oriented steel with about 4% silicon
 - d) Both a and b

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) The efficiency of diesel locomotives is nearly _____.
 a) 20 - 25 percent b) 35 - 40 percent
 c) 50 - 55 percent d) 70 - 75 percent
- 2) The advantage of electric traction over other methods is _____.
 a) No pollution b) Faster acceleration
 c) Better braking action d) All of above
- 3) Which motor is used in tramways?
 a) AC single phase capacitor start motor
 b) AC three phase motor
 c) DC series motor
 d) DC shunt motor
- 4) When the speed of the train is estimated taking into account the time of stop at a station in addition to the actual running time between stops, is known as _____.
 a) Average speed b) Schedule speed
 c) Notching speed d) Free running speed
- 5) Overhead lines for power supply to tramcars are at a minimum height of _____.
 a) 2 m b) 5 m
 c) 10 m d) 15 m
- 6) An ideal traction system should have _____.
 a) High starting tractive effort
 b) Equipment capable of withstanding large temporary overloads
 c) Easy speed control
 d) All of the above
- 7) D.C. motors are used in _____.
 a) Mines b) Steel mills
 c) Paper mills d) Moist atmosphere

Time: 03:00 PM To 06:00 PM

Max. Marks: 56

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any four. 16

- Draw and explain speed time curve for main line services.
- Desirable characteristic of traction motors.
- Explain plugging braking system in traction system.
- Write short note on motor selection in textile industries.
- A train is required to run between two stations 1.6 km apart at an average speed of 40 kmph. The run is to be made to a simplified quadrilateral speed-time curve. If the maximum speed is limited to 64 kmph, acceleration to 2.0 kmphs, coasting and braking retardation to 0.16 kmphs and 3.2 kmphs, determine the duration of acceleration, coasting and braking periods.

Q.3 Solve any two. 12

- Derive an expression for Trapezoidal Speed-Time Curve.
- Explain series-parallel control of traction motors.
- Write note on motor selection in sugar mills.

Section – II

Q.4 Solve any four. 16

- Comparison between tungsten filament lamps and fluorescent tubes.
- State advantages and disadvantages electrical welding.
- Describe with the help of a neat diagram the construction and working of a high pressure mercury vapour lamp.
- Explain the laws of illumination.
- Write a note on Energy Conservation in Transport.

Q.5 Solve any two. 12

- Explain flood lighting.
- Explain Energy Conservation Planning.
- Explain direct resistance and indirect resistance heating.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) Which of the following applications of motor need to start with high acceleration?
 - a) Floor mill
 - b) Oil expeller
 - c) Centrifugal pump
 - d) Lifts and Hoists
- 2) Which of the following is of high value in case of induction heating?
 - a) Voltage
 - b) Current
 - c) Frequency
 - d) All of the above
- 3) Following welding are varieties of resistance welding.
 - a) Seam welding
 - b) Butt welding
 - c) Spot welding
 - d) All of the above
- 4) The welding transformer used in resistance welding will _____.
 - a) Step up current
 - b) Step down current
 - c) Step up voltage
 - d) Step up power
- 5) The unit of solid angle is _____.
 - a) solid angle
 - b) radian
 - c) steradian
 - d) candela
- 6) The unit of luminous flux is _____.
 - a) steradian
 - b) candela
 - c) lumen
 - d) lux
- 7) Which of the following is more energy efficient?
 - a) Incandescent Bulb
 - b) Fluorescent Tube light
 - c) CFL
 - d) None of these
- 8) The efficiency of diesel locomotives is nearly _____.
 - a) 20 - 25 percent
 - b) 35 - 40 percent

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct option from the following.

14

- 1) A TRIAC can be turned on with _____.
 a) Positive voltage at the gate terminal
 b) Negative voltage at the gate terminal
 c) Either (a) or (b)
 d) None of the above
- 2) Which of the following finds applications in speed control of a DC motor?
 a) FET
 b) NPN transistor
 c) SCR
 d) None of the above
- 3) The curve between V and I of SCR when anode is positive w.r.t cathode and when anode is negative w.r.t cathode are known as _____.
 a) both as forward characteristics
 b) both as reverse characteristics
 c) former as forward characteristics and later as reverse characteristics
 d) former as reverse characteristics and later as forward characteristics
- 4) Bidirectional semiconductor device is _____.
 a) Diode
 b) BJT
 c) SCR
 d) TRIAC
- 5) The IGBT resulted in higher switching speed and lower energy losses. It can be used for _____.
 a) Uninterruptible power supplies
 b) Induction heating system
 c) Constant voltage and frequency power supplies
 d) All of these
- 6) A thyristor controlled reactor is used to get _____.
 a) variable resistance
 b) variable capacitance
 c) variable inductance
 d) improved reactive power factor
- 7) Thyristor can be protected from over voltages by using _____.
 a) voltage clamping device
 b) fuse
 c) heat sink
 d) snubber circuit

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING
Power Electronics & Industrial Drives (BTN07603)

Day & Date: Monday, 27-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

Instructions: 1) All questions are compulsory.
 2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any four. **16**

- a) Draw and explain characteristics of DIAC and TRIAC.
- b) Explain overvoltage and overcurrent protection circuit of SCR.
- c) Explain Type D & type E chopper.
- d) Draw single phase full bridge inverter circuit, gate pulses, output voltage waveforms and explain the operation of circuit.
- e) A single-phase half wave diode rectifier feeds power to RL Load. Describe the working of this rectifier with relevant waveforms.

Q.3 Solve any two. **12**

- a) Explain the three phase fully controlled rectifier with the voltage and current waveforms.
- b) Explain the operation of three bridge inverters for 180 degree mode of operation with phase and line voltage waveforms.
- c) A step down dc chopper has resistive load of $R=15\ \Omega$ and input voltage is 200V when the chopper remains ON, its voltage drop is 3V the chopper frequency is 1 kHz. If the duty cycle is 75%, determine:
 - i) Average output voltage
 - ii) RMS Output voltage
 - iii) Chopper efficiency

Section – II

Q.4 Solve any four. **16**

- a) Derive the fundamental torque equation of electric drives.
- b) Explain stator voltage control of three phase induction motor with soft start.
- c) Explain the different parts of the electrical drive system.
- d) What are the different types of electrical braking system and explain any one of them in detail.
- e) Explain closed loop speed control of dc motor drives.

Q.5 Solve any two. **12**

- a) With a neat circuit diagram and waveform explain multiquadrant operation of chopper controlled dc motor drives.
- b) Explain the converter circuit for switched reluctance motor.

- c) A separately-excited d.c. motor has the following parameters:
 $R_a = 0.25 \Omega$, $K_e = 0.62 \text{ V/rpm}$, Φ (flux per pole) = 175 mWb
 The motor speed is controlled by a single-phase, full-wave bridge rectifier. The firing angle α is set at 45° , and the average speed is 1300 rpm . The applied a.c. Voltage to the bridge is 230 V at 50 Hz . Assuming the motor current is continuous; calculate the armature current drawn by the motor and the steady-state torque for the Fully-controlled bridge shown in figure(a)

Fig (a): Fully-controlled bridge

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING

Power Electronics & Industrial Drives (BTN07603)

Day & Date: Monday, 27-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct option from the following.

14

- 1) For high frequency chopper the device preferred is _____.
 - a) Thyristor
 - b) Transistor
 - c) GTO
 - d) IGBT
- 2) In which of the following applications ac drives are used _____.
 - a) fans
 - b) blowers
 - c) mill run out tables
 - d) All of these
- 3) During regenerative braking mode, back emf is _____ supply voltage.
 - a) less than
 - b) greater than
 - c) equal to
 - d) none
- 4) What is meant by drive?
 - a) Voltage control
 - b) Motion control
 - c) Power control
 - d) None of the above
- 5) For variable speed application the suitable motor is _____.
 - a) Squirrel cage I.M.
 - b) Slip ring I.M.
 - c) Both a and b
 - d) None
- 6) How many thyristor are required for load commutated inverter for a synchronous motor drive?
 - a) 3
 - b) 6
 - c) 12
 - d) 4
- 7) In a dual converter switch acts like a _____.
 - a) Forward motoring
 - b) Reverse motoring
 - c) Both a and b
 - d) None of these
- 8) A TRIAC can be turned on with _____.
 - a) Positive voltage at the gate terminal
 - b) Negative voltage at the gate terminal
 - c) Either (a) or (b)
 - d) None of the above

Seat No.

- 3) How many thyristor are required for load commutated inverter for a synchronous motor drive?
 - a) 3
 - b) 6
 - c) 12
 - d) 4
- 4) In a dual converter switch acts like a _____.
 - a) Forward motoring
 - b) Reverse motoring
 - c) Both a and b
 - d) None of these
- 5) A TRIAC can be turned on with _____.
 - a) Positive voltage at the gate terminal
 - b) Negative voltage at the gate terminal
 - c) Either (a) or (b)
 - d) None of the above
- 6) Which of the following finds applications in speed control of a DC motor?
 - a) FET
 - b) NPN transistor
 - c) SCR
 - d) None of the above
- 7) The curve between V and I of SCR when anode is positive w.r.t cathode and when anode is negative w.r.t cathode are known as _____.
 - a) both as forward characteristics
 - b) both as reverse characteristics
 - c) former as forward characteristics and later as reverse characteristics
 - d) former as reverse characteristics and later as forward characteristics
- 8) Bidirectional semiconductor device is _____.
 - a) Diode
 - b) BJT
 - c) SCR
 - d) TRIAC

- 9) The IGBT resulted in higher switching speed and lower energy losses. It can be used for _____.
- a) Uninterruptible power supplies
 - b) Induction heating system
 - c) Constant voltage and frequency power supplies
 - d) All of these
- 10) A thyristor controlled reactor is used to get _____.
- a) variable resistance
 - b) variable capacitance
 - c) variable inductance
 - d) improved reactive power factor
- 11) Thyristor can be protected from over voltages by using _____.
- a) voltage clamping device
 - b) fuse
 - c) heat sink
 - d) snubber circuit
- 12) For high frequency chopper the device preferred is _____.
- a) Thyristor
 - b) Transistor
 - c) GTO
 - d) IGBT
- 13) In which of the following applications ac drives are used _____.
- a) fans
 - b) blowers
 - c) mill run out tables
 - d) All of these
- 14) During regenerative braking mode, back emf is _____ supply voltage.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct option from the following.

14

- 1) A thyristor controlled reactor is used to get _____.
 a) variable resistance b) variable capacitance
 c) variable inductance d) improved reactive power factor
- 2) Thyristor can be protected from over voltages by using _____.
 a) voltage clamping device b) fuse
 c) heat sink d) snubber circuit
- 3) For high frequency chopper the device preferred is _____.
 a) Thyristor b) Transistor
 c) GTO d) IGBT
- 4) In which of the following applications ac drives are used _____.
 a) fans b) blowers
 c) mill run out tables d) All of these
- 5) During regenerative braking mode, back emf is _____ supply voltage.
 a) less than b) greater than
 c) equal to d) none
- 6) What is meant by drive?
 a) Voltage control b) Motion control
 c) Power control d) None of the above
- 7) For variable speed application the suitable motor is _____.
 a) Squirrel cage I.M. b) Slip ring I.M.
 c) Both a and b d) None
- 8) How many thyristor are required for load commutated inverter for a synchronous motor drive?
 a) 3 b) 6
 c) 12 d) 4
- 9) In a dual converter switch acts like a _____.
 a) Forward motoring b) Reverse motoring
 c) Both a and b d) None of these

- 10) A TRIAC can be turned on with _____.
a) Positive voltage at the gate terminal
b) Negative voltage at the gate terminal
c) Either (a) or (b)
d) None of the above
- 11) Which of the following finds applications in speed control of a DC motor?

 2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any four. **16**

- a) Draw and explain characteristics of DIAC and TRIAC.
- b) Explain overvoltage and overcurrent protection circuit of SCR.
- c) Explain Type D & type E chopper.
- d) Draw single phase full bridge inverter circuit, gate pulses, output voltage waveforms and explain the operation of circuit.
- e) A single-phase half wave diode rectifier feeds power to RL Load. Describe the working of this rectifier with relevant waveforms.

Q.3 Solve any two. **12**

- a) Explain the three phase fully controlled rectifier with the voltage and current waveforms.
- b) Explain the operation of three bridge inverters for 180 degree mode of operation with phase and line voltage waveforms.
- c) A step down dc chopper has resistive load of $R=15\ \Omega$ and input voltage is 200V when the chopper remains ON, its voltage drop is 3V the chopper frequency is 1 kHz. If the duty cycle is 75%, determine:
 - i) Average output voltage
 - ii) RMS Output voltage
 - iii) Chopper efficiency

Section – II

Q.4 Solve any four. **16**

- a) Derive the fundamental torque equation of electric drives.
- b) Explain stator voltage control of three phase induction motor with soft start.
- c) Explain the different parts of the electrical drive system.
- d) What are the different types of electrical braking system and explain any one of them in detail.
- e) Explain closed loop speed control of dc motor drives.

Q.5 Solve any two. **12**

- a) With a neat circuit diagram and waveform explain multiquadrant operation of chopper controlled dc motor drives.
- b) Explain the converter circuit for switched reluctance motor.

- c) A separately-excited d.c. motor has the following parameters:
 $R_a = 0.25 \Omega$, $K_e = 0.62 \text{ V/rpm}$, W_b, Φ (flux per pole) = 175 mWb
 The motor speed is controlled by a single-phase, full-wave bridge rectifier. The firing angle α is set at 45° , and the average speed is 1300 rpm . The applied a.c. Voltage to the bridge is 230 V at 50 Hz . Assuming the motor current is continuous; calculate the armature current drawn by the motor and the steady-state torque for the Fully-controlled bridge shown in figure(a)

T. Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING
Advanced Control Systems (BTN07604)

Day & Date: Wednesday, 29-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:**
- 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 - 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 - 3) Figures to the right indicates full marks.
 - 4) Draw neat diagrams wherever necessary.
 - 5) Assume suitable data if necessary.
 - 6) Use of no-programmable calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) The steady state error of a control system can be reduced by increasing _____.
 - a) gain constant of the system
 - b) time constant of the system
 - c) both gain and time constant of system
 - d) None of these

- 2) Assertion (A): The zeroes on the real axis near the origin are generally avoided in design.
 Reason (R): In a sluggish system introduction of zeroes can improve the transient response _____.
 - a) Both A and R are true and R is correct explanation of A
 - b) Both A and R are true but R is not correct explanation of A
 - c) A is true but R is false
 - d) A is false but R is true

- 3) The forward path transfer function of a unity feedback system is given by $G(s) = 1/(1 + s)^2$. What is the phase margin of the system?
 - a) $-\pi$ rad
 - b) 0 rad
 - c) $\pi/2$ rad
 - d) π rad

- 4) For the given matrix $\dot{x} = \begin{bmatrix} 0 & 1 & 0 & 0 \\ 0 & 0 & 1 & 0 \\ 0 & 0 & 0 & 1 \\ 0 & 0 & 0 & 1 \end{bmatrix} x$, the eigen values are _____.
 - a) 0,0,0,0
 - b) 1,1,1,1
 - c) 0,0,0,-1
 - d) 0,0,0,1

- 5) The eigen values of a linear system are the locations of _____.
 - a) finite poles
 - b) poles of the system
 - c) zeros of the system
 - d) None of the above

- 6) The property of phase lead compensation is that the _____.
- Overshoot is increased
 - Bandwidth of CL system is reduced
 - Rise-time of CL system is reduced
 - Gain margin is reduced
- 7) A cascaded lag-lead compensator used in linear control systems work as a _____.
- Low pass filter
 - High pass filter
 - Band stop filter
 - Band pass filter
- 8) The process of designing a closed loop control system in state space is by _____.
- regulator
 - lag compensation
 - pole placement
 - None of these
- 9) The eigenvalues of the matrix $(A-BK)$ are called _____.
- open loop poles
 - open loop zeros
 - regulator poles
 - None of these
- 10) The term backlash is associated with _____.
- Servomotors
 - Induction relays
 - Gear trains
 - Any of the above
- 11) The objective of introducing non-linearity in a control system is _____.
- To improve the performance
 - To reduce the cost
 - To make the system simpler
 - both a and b
- 12) The transfer function of zero order hold is _____.
- $1 - e^{Ts}$
 - $1 - e^{-Ts}$
 - $\frac{1 - e^{Ts}}{s}$
 - $\frac{1 - e^{-Ts}}{s}$
- 13) In phase plane _____.
- X1 is represented in x-axis, and X2 in y-axis
 - X2 is represented in x-axis, and X1 in y-axis
 - any one of above
 - None of the above
- 14) The describing function N of a nonlinear control system is a function of _____.
- amplitude of the input
 - frequency of the input
 - initial conditions of the output
 - both a) and b)

Seat No.

Set	P
-----	---

T. Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING
Advanced Control Systems (BTN07604)

Day & Date: Wednesday, 29-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:**
- 1) All questions are compulsory.
 - 2) Figures to the right indicate full marks.
 - 3) Assume suitable data if necessary.
 - 4) Use of no-programmable calculator is allowed.
 - 5) Draw neat diagrams wherever necessary.

Section – I

Q.2 Attempt Four of the following. **16**

- a) Derive the realization of lag compensator circuit with active network.
- b) Explain the procedure to design lead compensator using frequency response analysis.
- c) Explain the procedure to design lag-lead compensator using root locus method.
- d) Obtain state transition matrix for the following system matrix $A = \begin{bmatrix} 0 & -3 \\ 1 & -4 \end{bmatrix}$
- e) Consider a system having state model With $D = 0$, obtain the transfer function:

$$\begin{bmatrix} \dot{x}_1 \\ \dot{x}_2 \end{bmatrix} = \begin{bmatrix} -3 & 1 \\ 0 & -1 \end{bmatrix} \begin{bmatrix} x_1 \\ x_2 \end{bmatrix} + \begin{bmatrix} 1 \\ 1 \end{bmatrix} u(t) \quad Y = [1 \ 1] \begin{bmatrix} x_1 \\ x_2 \end{bmatrix}$$
- f) Obtain the state space representation of the system shown in fig. below:

Take $x_1=iL$ $x_2=V_{c1}$ $x_3=V_{c2}$ $V = u$ and $y=V_{c2}$

Q.3 Attempt Two of the following. **12**

- a) The forward path TF of a unity feedback control system is given by $G(s) = \frac{K}{s(s+2)(s+8)}$. Design a suitable lag compensator so that the system meets the following specifications,
 - 1) Percentage overshoot $\leq 16\%$ for unit step input
 - 2) Steady state error ≤ 0.125 for unit ramp input.
- b) For a unity feedback system with OLTF $G(s) = \frac{2}{s(s+1)(s+2)}$. Design a suitable lag compensator for the system so that the static velocity error constant K_v is 5 sec⁻¹, the PM is at least 40° and the gain margin is at least 10dB.
- c) Check the controllability and observability of the state model given below:

$$\begin{bmatrix} \dot{x}_1 \\ \dot{x}_2 \end{bmatrix} = \begin{bmatrix} -1 & 0 \\ 0 & -2 \end{bmatrix} \begin{bmatrix} x_1 \\ x_2 \end{bmatrix} + \begin{bmatrix} 0 \\ 1 \end{bmatrix} u(t) \quad Y = [1 \ 2] \begin{bmatrix} x_1 \\ x_2 \end{bmatrix}$$

Section – II

Q.4 Attempt Four of the following.**16**

- a) The closed-loop poles (eigenvalues) are to be located at $s = -3, s = -7$. Design a state variable feedback. Given that $A = \begin{bmatrix} 0 & 1 \\ -20 & -9 \end{bmatrix}$ and $B = \begin{bmatrix} 0 \\ 1 \end{bmatrix}$, $C = [1 \ 0]$.
- b) Explain the limit cycle phenomenon in the nonlinear control systems.
- c) Explain the delta method for the construction of phase trajectories.
- d) Describe the Substitution method for the evaluation of the observer gain matrix.
- e) Derive the pulse transfer function of the closed loop system.
- f) Determine the kind of singularity for the following differential equation.
 $\ddot{Y} - 8\dot{Y} + 17Y = 34$

Q.5 Attempt Two of the following.**12**

- a) Develop the state model in cascade form for the transfer function given below:
 $\frac{Y(s)}{U(s)} = \frac{1}{(s+5)(s+4)}$. Determine the feedback gain matrix for the application of state variable feedback such that the poles are located $s = (01 \pm j2)$.
- b) Derive the describing function of the relay with dead-zone nonlinearity.
- c) Check the stability of the sampled data control system represented by the equation.

$$z^3 - 0.2z^2 - 0.25z + 0.05 = 0$$

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) The process of designing a closed loop control system in state space is by _____.
 - a) regulator
 - b) lag compensation
 - c) pole placement
 - d) None of these
- 2) The eigenvalues of the matrix (A-BK) are called _____.
 - a) open loop poles
 - b) open loop zeros
 - c) regulator poles
 - d) None of these
- 3) The term backlash is associated with _____.
 - a) Servomotors
 - b) Induction relays
 - c) Gear trains
 - d) Any of the above
- 4) The objective of introducing non-linearity in a control system is _____.
 - a) To improve the performance
 - b) To reduce the cost
 - c) To make the system simpler
 - d) both a and b
- 5) The transfer function of zero order hold is _____.
 - a) $1 - e^{Ts}$
 - b) $1 - e^{-Ts}$
 - c) $\frac{1 - e^{Ts}}{s}$
 - d) $\frac{1 - e^{-Ts}}{s}$
- 6) In phase plane _____.
 - a) X1 is represented in x-axis, and X2 in y-axis
 - b) X2 is represented in x-axis, and X1 in y-axis
 - c) any one of above
 - d) None of the above
- 7) The describing function N of a nonlinear control system is a function of _____.
 - a) amplitude of the input
 - b) frequency of the input
 - c) initial conditions of the output
 - d) both a) and b)

- 8) The steady state error of a control system can be reduced by increasing ____.
- gain constant of the system
 - time constant of the system
 - both gain and time constant of system
 - None of these
- 9) Assertion (A): The zeroes on the real axis near the origin are generally avoided in design.
Reason (R): In a sluggish system introduction of zeroes can improve the transient response ____.
- Both A and R are true and R is correct explanation of A
 - Both A and R are true but R is not correct explanation of A
 - A is true but R is false
 - A is false but R is true
- 10) The forward path transfer function of a unity feedback system is given by $G(s) = 1/(1 + s)^2$. What is the phase margin of the system?
- $-\pi$ rad
 - 0 rad
 - $\pi/2$ rad
 - π rad
- 11) For the given matrix $\dot{x} = \begin{bmatrix} 0 & 1 & 0 & 0 \\ 0 & 0 & 1 & 0 \\ 0 & 0 & 0 & 1 \\ 0 & 0 & 0 & 1 \end{bmatrix} x$, the eigen values are ____.
- 0,0,0,0
 - 1,1,1,1
 - 0,0,0,-1
 - 0,0,0,1
- 12) The eigen values of a linear system are the locations of ____.
- finite poles
 - poles of the system
 - zeros of the system
 - None of the above
- 13) The property of phase lead compensation is that the ____.
- Overshoot is increased
 - Bandwidth of CL system is reduced
 - Rise-time of CL system is reduced
 - Gain margin is reduced
- 14) A cascaded lag-lead compensator used in linear control systems work as a ____.
- Low pass filter
 - High pass filter
 - Band stop filter
 - Band pass filter

T. Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING
Advanced Control Systems (BTN07604)

Day & Date: Wednesday, 29-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:**
- 1) All questions are compulsory.
 - 2) Figures to the right indicate full marks.
 - 3) Assume suitable data if necessary.
 - 4) Use of no-programmable calculator is allowed.
 - 5) Draw neat diagrams wherever necessary.

Section – I

Q.2 Attempt Four of the following. **16**

- a) Derive the realization of lag compensator circuit with active network.
- b) Explain the procedure to design lead compensator using frequency response analysis.
- c) Explain the procedure to design lag-lead compensator using root locus method.
- d) Obtain state transition matrix for the following system matrix $A = \begin{bmatrix} 0 & -3 \\ 1 & -4 \end{bmatrix}$
- e) Consider a system having state model With $D = 0$, obtain the transfer function:

$$\begin{bmatrix} \dot{x}_1 \\ \dot{x}_2 \end{bmatrix} = \begin{bmatrix} -3 & 1 \\ 0 & -1 \end{bmatrix} \begin{bmatrix} x_1 \\ x_2 \end{bmatrix} + \begin{bmatrix} 1 \\ 1 \end{bmatrix} u(t) \quad Y = [1 \ 1] \begin{bmatrix} x_1 \\ x_2 \end{bmatrix}$$
- f) Obtain the state space representation of the system shown in fig. below:

Take $x_1=iL$ $x_2=V_{c1}$ $x_3=V_{c2}$ $V = u$ and $y=V_{c2}$

Q.3 Attempt Two of the following. **12**

- a) The forward path TF of a unity feedback control system is given by $G(s) = \frac{K}{s(s+2)(s+8)}$. Design a suitable lag compensator so that the system meets the following specifications,
 - 1) Percentage overshoot $\leq 16\%$ for unit step input
 - 2) Steady state error ≤ 0.125 for unit ramp input.
- b) For a unity feedback system with OLTF $G(s) = \frac{2}{s(s+1)(s+2)}$. Design a suitable lag compensator for the system so that the static velocity error constant K_v is 5 sec⁻¹, the PM is at least 40° and the gain margin is at least 10dB.
- c) Check the controllability and observability of the state model given below:

$$\begin{bmatrix} \dot{x}_1 \\ \dot{x}_2 \end{bmatrix} = \begin{bmatrix} -1 & 0 \\ 0 & -2 \end{bmatrix} \begin{bmatrix} x_1 \\ x_2 \end{bmatrix} + \begin{bmatrix} 0 \\ 1 \end{bmatrix} u(t) \quad Y = [1 \ 2] \begin{bmatrix} x_1 \\ x_2 \end{bmatrix}$$

Section – II

Q.4 Attempt Four of the following.**16**

- a) The closed-loop poles (eigenvalues) are to be located at $s = -3, s = -7$.
Design a state variable feedback. Given that $A = \begin{bmatrix} 0 & 1 \\ -20 & -9 \end{bmatrix}$ and $B = \begin{bmatrix} 0 \\ 1 \end{bmatrix}$,
 $C = [1 \ 0]$.
- b) Explain the limit cycle phenomenon in the nonlinear control systems.
- c) Explain the delta method for the construction of phase trajectories.
- d) Describe the Substitution method for the evaluation of the observer gain matrix.
- e) Derive the pulse transfer function of the closed loop system.
- f) Determine the kind of singularity for the following differential equation.
 $\ddot{Y} - 8\dot{Y} + 17Y = 34$

Q.5 Attempt Two of the following.**12**

- a) Develop the state model in cascade form for the transfer function given below:
 $\frac{Y(s)}{U(s)} = \frac{1}{(s+5)(s+4)}$. Determine the feedback gain matrix for the application of state variable feedback such that the poles are located $s = (01 \pm j2)$.
- b) Derive the describing function of the relay with dead-zone nonlinearity.
- c) Check the stability of the sampled data control system represented by the equation.

$$z^3 - 0.2z^2 - 0.25z + 0.05 = 0$$

T. Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING
Advanced Control Systems (BTN07604)

Day & Date: Wednesday, 29-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:**
- 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 - 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 - 3) Figures to the right indicates full marks.
 - 4) Draw neat diagrams wherever necessary.
 - 5) Assume suitable data if necessary.
 - 6) Use of no-programmable calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) The objective of introducing non-linearity in a control system is _____.
 - a) To improve the performance
 - b) To reduce the cost
 - c) To make the system simpler
 - d) both a and b
- 2) The transfer function of zero order hold is _____.
 - a) $1 - e^{Ts}$
 - b) $1 - e^{-Ts}$
 - c) $\frac{1 - e^{Ts}}{s}$
 - d) $\frac{1 - e^{-Ts}}{s}$
- 3) In phase plane _____.
 - a) X1 is represented in x-axis, and X2 in y-axis
 - b) X2 is represented in x-axis, and X1 in y-axis
 - c) any one of above
 - d) None of the above
- 4) The describing function N of a nonlinear control system is a function of _____.
 - a) amplitude of the input
 - b) frequency of the input
 - c) initial conditions of the output
 - d) both a) and b)
- 5) The steady state error of a control system can be reduced by increasing _____.
 - a) gain constant of the system
 - b) time constant of the system
 - c) both gain and time constant of system
 - d) None of these
- 6) Assertion (A): The zeroes on the real axis near the origin are generally avoided in design.
 Reason (R): In a sluggish system introduction of zeroes can improve the transient response _____.
 - a) Both A and R are true and R is correct explanation of A
 - b) Both A and R are true but R is not correct explanation of A

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) The property of phase lead compensation is that the _____.
 a) Overshoot is increased
 b) Bandwidth of CL system is reduced
 c) Rise-time of CL system is reduced
 d) Gain margin is reduced
- 2) A cascaded lag-lead compensator used in linear control systems work as a _____.
 a) Low pass filter
 b) High pass filter
 c) Band stop filter
 d) Band pass filter
- 3) The process of designing a closed loop control system in state space is by _____.
 a) regulator
 b) lag compensation
 c) pole placement
 d) None of these
- 4) The eigenvalues of the matrix (A-BK) are called _____.
 a) open loop poles
 b) open loop zeros
 c) regulator poles
 d) None of these
- 5) The term backlash is associated with _____.
 a) Servomotors
 b) Induction relays
 c) Gear trains
 d) Any of the above
- 6) The objective of introducing non-linearity in a control system is _____.
 a) To improve the performance
 b) To reduce the cost
 c) To make the system simpler
 d) both a and b
- 7) The transfer function of zero order hold is _____.
 a) $1 - e^{Ts}$
 b) $1 - e^{-Ts}$
 c) $\frac{1 - e^{Ts}}{s}$
 d) $\frac{1 - e^{-Ts}}{s}$

- 8) In phase plane _____.
- X1 is represented in x-axis, and X2 in y-axis
 - X2 is represented in x-axis, and X1 in y-axis
 - any one of above
 - None of the above
- 9) The describing function N of a nonlinear control system is a function of ____.
- amplitude of the input
 - frequency of the input
 - initial conditions of the output
 - both a) and b)
- 10) The steady state error of a control system can be reduced by increasing ____.
- gain constant of the system
 - time constant of the system
 - both gain and time constant of system
 - None of these
- 11) Assertion (A): The zeroes on the real axis near the origin are generally avoided in design.
Reason (R): In a sluggish system introduction of zeroes can improve the transient response _____.
- Both A and R are true and R is correct explanation of A
 - Both A and R are true but R is not correct explanation of A
 - A is true but R is false
 - A is false but R is true
- 12) The forward path transfer function of a unity feedback system is given by $G(s) = 1/(1 + s)^2$. What is the phase margin of the system?
- $-\pi$ rad
 - 0 rad
 - $\pi/2$ rad
 - π rad

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) _____ is a program that acts as an intermediary between a user of a computer and the computer hardware.
 - a) An operating system
 - b) An Overview System
 - c) A Computer Organization
 - d) A Computer Graphics
- 2) The operating system acts as the _____ of these resources and allocates them to specific programs and users as necessary for tasks.
 - a) Manager
 - b) Conductor
 - c) Router
 - d) Orientor
- 3) As hardware costs have decreased, it has once again become feasible to have a computer system dedicated to a single user. These types of computer systems are usually referred to a _____.
 - a) personal computers (Pcs)
 - b) Mainframe Computers (Mcs)
 - c) Super Computers(SCs)
 - d) Babbage
- 4) _____: The process is being created.
 - a) New
 - b) Running
 - c) Waiting
 - d) Ready
- 5) _____: Instructions are being executed.
 - a) New
 - b) Running
 - c) Waiting
 - d) Ready
- 6) An I/O-bound program would typically have many very _____ - CPU bursts.
 - a) Short
 - b) Long
 - c) Medium
 - d) Perfect
- 7) Which process can be affected by other processes executing in the system?
 - a) cooperating process
 - b) child process
 - c) parent process
 - d) init process

2) Figures to the right indicate full marks.

Section – I

- Q.2 Attempt Any Three. 12**
- a) Explain Operating System with its goals Simple Batch System.
 - b) Explain Concept of Process along with its life cycle.
 - c) Explain Semaphores
 - d) Explain Multiple processor scheduling.
- Q.3 Attempt Any Two. 16**
- a) Explain Process Scheduling along with Long term scheduler, medium term scheduler, short term scheduler.
 - b) Explain Inter process Communication in detail.
 - c) Explain personal computer system, parallel system.

Section – II

- Q.4 Attempt Any Three. 12**
- a) Explain Deadlock along with System model.
 - b) Explain characterization of deadlock.
 - c) Explain Logical Versus Physical Address space.
 - d) Explain concept of Demand paging.
- Q.5 Attempt Any Two. 16**
- a) Explain Deadlock Which are the necessary conditions for Deadlock?
 - b) Explain page fault handling with neat diagram.
 - c) Explain the ways for prevention of deadlock.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) Which of the following condition is required for deadlock to be possible?
 - a) mutual exclusion
 - b) a process may hold allocated resources while awaiting assignment of other resources
 - c) no resource can be forcibly removed from a process holding it
 - d) all of the mentioned
- 2) Binding of instructions and data to memory addresses can be done at _____.
 - a) Compile time
 - b) Load time
 - c) Execution time
 - d) All of these
- 3) Dynamic loading is:
 - a) loading multiple routines dynamically
 - b) loading a routine only when it is called
 - c) loading multiple routines randomly
 - d) None of these
- 4) The advantage of dynamic loading is that:
 - a) a used routine is used multiple times
 - b) an unused routine is never loaded
 - c) CPU utilization increases
 - d) All of these
- 5) _____ is the concept in which a process is copied into main memory from the secondary memory according to the requirement.
 - a) Paging
 - b) Demand paging
 - c) Segmentation
 - d) Swapping
- 6) Swap space exists in _____.
 - a) primary memory
 - b) secondary memory
 - c) CPU
 - d) none of the mentioned
- 7) Effective access time is directly proportional to _____.
 - a) page-fault rate
 - b) hit ratio
 - c) memory access time
 - d) none of the mentioned

- 8) _____ is a program that acts as an intermediary between a user of a computer and the computer hardware.
- a) An operating system
 - b) An Overview System
 - c) A Computer Organization
 - d) A Computer Graphics
- 9) The operating system acts as the _____ of these resources and allocates them to specific programs and users as necessary for tasks.
- a) Manager
 - b) Conductor
 - c) Router
 - d) Orientor
- 10) As hardware costs have decreased, it has once again become feasible to have a computer system dedicated to a single user. These types of computer systems are usually referred to a _____.
- a) personal computers (Pcs)
 - b) Mainframe Computers (Mcs)
 - c) Super Computers(SCs)
 - d) Babbage
- 11) _____: The process is being created.
- a) New
 - b) Running
 - c) Waiting
 - d) Ready
- 12) _____: Instructions are being executed.
- a) New
 - b) Running
 - c) Waiting
 - d) Ready
- 13) An I/O-bound program would typically have many very _____ - CPU bursts.
- a) Short
 - b) Long
 - c) Medium
 - d) Perfect
- 14) Which process can be affected by other processes executing in the system?
- a) cooperating process
 - b) child process
 - c) parent process
 - d) init process

Seat No.

T. Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING
Operating Systems (BTN07606)

Day & Date: Friday, 31-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

- Q.2 Attempt Any Three.** **12**
- a) Explain Operating System with its goals Simple Batch System.
 - b) Explain Concept of Process along with its life cycle.
 - c) Explain Semaphores
 - d) Explain Multiple processor scheduling.
- Q.3 Attempt Any Two.** **16**
- a) Explain Process Scheduling along with Long term scheduler, medium term scheduler, short term scheduler.
 - b) Explain Inter process Communication in detail.
 - c) Explain personal computer system, parallel system.

Section – II

- Q.4 Attempt Any Three.** **12**
- a) Explain Deadlock along with System model.
 - b) Explain characterization of deadlock.
 - c) Explain Logical Versus Physical Address space.
 - d) Explain concept of Demand paging.
- Q.5 Attempt Any Two.** **16**
- a) Explain Deadlock Which are the necessary conditions for Deadlock?
 - b) Explain page fault handling with neat diagram.
 - c) Explain the ways for prevention of deadlock.

Seat No.

T. Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING
Operating Systems (BTN07606)

Day & Date: Friday, 31-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) The advantage of dynamic loading is that:
 - a) a used routine is used multiple times
 - b) an unused routine is never loaded
 - c) CPU utilization increases
 - d) All of these
- 2) _____ is the concept in which a process is copied into main memory from the secondary memory according to the requirement.
 - a) Paging
 - b) Demand paging
 - c) Segmentation
 - d) Swapping
- 3) Swap space exists in _____.
 - a) primary memory
 - b) secondary memory
 - c) CPU
 - d) none of the mentioned
- 4) Effective access time is directly proportional to _____.
 - a) page-fault rate
 - b) hit ratio
 - c) memory access time
 - d) none of the mentioned
- 5) _____ is a program that acts as an intermediary between a user of a computer and the computer hardware.
 - a) An operating system
 - b) An Overview System
 - c) A Computer Organization
 - d) A Computer Graphics
- 6) The operating system acts as the _____ of these resources and allocates them to specific programs and users as necessary for tasks.
 - a) Manager
 - b) Conductor
 - c) Router
 - d) Orientor
- 7) As hardware costs have decreased, it has once again become feasible to have a computer system dedicated to a single user. These types of computer systems are usually referred to a _____.
 - a) personal computers (Pcs)
 - b) Mainframe Computers (Mcs)
 - c) Super Computers(SCs)
 - d) Babbage

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) An I/O-bound program would typically have many very _____ - CPU bursts.
 - a) Short
 - b) Long
 - c) Medium
 - d) Perfect
- 2) Which process can be affected by other processes executing in the system?
 - a) cooperating process
 - b) child process
 - c) parent process
 - d) init process
- 3) Which of the following condition is required for deadlock to be possible?
 - a) mutual exclusion
 - b) a process may hold allocated resources while awaiting assignment of other resources
 - c) no resource can be forcibly removed from a process holding it
 - d) all of the mentioned
- 4) Binding of instructions and data to memory addresses can be done at _____.
 - a) Compile time
 - b) Load time
 - c) Execution time
 - d) All of these
- 5) Dynamic loading is:
 - a) loading multiple routines dynamically
 - b) loading a routine only when it is called
 - c) loading multiple routines randomly
 - d) None of these
- 6) The advantage of dynamic loading is that:
 - a) a used routine is used multiple times
 - b) an unused routine is never loaded
 - c) CPU utilization increases
 - d) All of these
- 7) _____ is the concept in which a process is copied into main memory from the secondary memory according to the requirement.
 - a) Paging
 - b) Demand paging
 - c) Segmentation
 - d) Swapping

 3) Figures to the right indicates full marks.
 4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct option from the following.

14

- 1) What is extraterrestrial radiation?
 - a) Intensity of sun at the top of earth's atmosphere
 - b) Intensity of sun at the top of its atmosphere
 - c) Energy of sun at the top of earth's atmosphere
 - d) Force of sun on earth
- 2) Sun generates _____ Calories/second.

a) 9×10^{25}	b) 01×10^{25}
c) 10×10^{25}	d) 4×10^{25}
- 3) Which of the following power plant is free from environmental pollution problem?

a) Thermal Power Plant	b) Nuclear Power Plant
c) Hydro Power Plant	d) Diesel Power Plant
- 4) What is the standard value of solar constant?

a) 1 KW/m ²	b) 1.367 KW/m ²
c) 1.5 KW/m ²	d) 5 KW/m ²
- 5) The current density of a photo voltaic cell ranges from _____.

a) 10 - 20 mA/cm ²	b) 40 - 50 mA/cm ²
c) 20 - 40 mA/cm ²	d) 60 - 100 mA/cm ²
- 6) If the speed of a wind stream remain unchanged while passing through the rotor then _____.
 - a) large power will be generated
 - b) Zero power will be generated
 - c) the Speed of the rotor will be extremely high
 - d) the flow is called as a stalled flow
- 7) Bio-diesel is _____.
 - a) Obtained from fermentation of sugars
 - b) Obtained from pyrolysis process
 - c) Exudates of plants
 - d) An upgraded vegetable oil

- 8) _____ is called as the bio gas.
- | | |
|----------------|----------------|
| a) Bio ethanol | b) Bio methane |
| c) Bio diesel | d) Bio butanol |
- 9) The geothermal energy is the _____ from the earth.
- | | |
|------------|------------|
| a) Heat | b) Light |
| c) Photons | d) Protons |
- 10) Two-basin tidal schemes _____.
- | |
|--------------------------------------------------|
| a) Are more economical than single basin schemes |
| b) Operate on ebb cycles in both basins |
| c) Produce less uniform power |
| d) Produce more uniform power |
- 11) The use of Pelton wheel is desirable for the conditions of _____.
- | |
|---------------------------------|
| a) Low head and high discharge |
| b) High head and low discharge |
| c) High head and high discharge |
| d) Low head and low discharge |
- 12) OTEC stands for _____.
- | |
|------------------------------------------|
| a) Ocean Thermal Energy Conversion |
| b) Ocean Thermal Energy Component |
| c) Ocean Thermodynamic Energy Conversion |
| d) Ocean Thermodynamic Energy Component |
- 13) In Carnot cycle the heat receive at _____ temperature.
- | | |
|-------------|----------------------|
| a) Lower | b) Higher |
| c) Constant | d) none of the above |
- 14) The molten rock within the earth is _____.
- | | |
|----------------|----------------|
| a) Igneous | b) Magma |
| c) Sedimentary | d) Metamorphic |

T.Y. (B.Tech.) (Sem-II) (New) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING
Renewable Energy Sources (BTN07607)

Day & Date: Friday, 31-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section – I

Q.2 Attempt any four. 16

- Differentiate between Conventional and Non-Conventional sources of energy.
- With the help of neat diagram explain terrestrial and extra-terrestrial solar radiation.
- With neat diagrams explain classification of concentrating type collectors.
- What is solar constant? Explain.
- Define the terms:
 - Tip speed ratio
 - swept area
 - solidity
 - cut-in, cut-out and rated speed
- Draw and describe horizontal axis wind mills.

Q.3 Attempt any two. 12

- Explain savonius and darrieus wind mill operation with diagram.
- Classify the instruments for measuring solar radiation. Explain any one in detail.
- Different methods of solar energy storage.

Section – II

Q.4 Attempt any four. 16

- Distinguish between fixed dome type & Floating drum type biogas plant.
- With the help of bacterial reactions explain principle of biogas generation.
- Explain the need for DEC.
- Explain the different types of geothermal resources.
- Draw and describe the working of open cycle OTEC system.
- Write short note on Carnot cycle.

Q.5 Attempt any two. 12

- Explain fixed drum type biogas plant.
- Describe the working of closed cycle OTEC system, also explain the advantages and disadvantages of Tidal power.
- Explain tidal energy conversion system with proper diagram.

Seat No.

 4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct option from the following.

14

- 1) _____ is called as the bio gas.
 - a) Bio ethanol
 - b) Bio methane
 - c) Bio diesel
 - d) Bio butanol
- 2) The geothermal energy is the _____ from the earth.
 - a) Heat
 - b) Light
 - c) Photons
 - d) Protons
- 3) Two-basin tidal schemes _____.
 - a) Are more economical than single basin schemes
 - b) Operate on ebb cycles in both basins
 - c) Produce less uniform power
 - d) Produce more uniform power
- 4) The use of Pelton wheel is desirable for the conditions of _____.
 - a) Low head and high discharge
 - b) High head and low discharge
 - c) High head and high discharge
 - d) Low head and low discharge
- 5) OTEC stands for _____.
 - a) Ocean Thermal Energy Conversion
 - b) Ocean Thermal Energy Component
 - c) Ocean Thermodynamic Energy Conversion
 - d) Ocean Thermodynamic Energy Component
- 6) In Carnot cycle the heat receive at _____ temperature.
 - a) Lower
 - b) Higher
 - c) Constant
 - d) none of the above
- 7) The molten rock within the earth is _____.
 - a) Igneous
 - b) Magma
 - c) Sedimentary
 - d) Metamorphic

- 8) What is extraterrestrial radiation?
- a) Intensity of sun at the top of earth's atmosphere
 - b) Intensity of sun at the top of its atmosphere
 - c) Energy of sun at the top of earth's atmosphere
 - d) Force of sun on earth
- 9) Sun generates _____ Calories/second.
- a) 9×10^{25}
 - b) 01×10^{25}
 - c) 10×10^{25}

Q.1 Choose the correct option from the following.

14

- 1) If the speed of a wind stream remain unchanged while passing through the rotor then _____.
 - a) large power will be generated
 - b) Zero power will be generated
 - c) the Speed of the rotor will be extremely high
 - d) the flow is called as a stalled flow
- 2) Bio-diesel is _____.
 - a) Obtained from fermentation of sugars
 - b) Obtained from pyrolysis process
 - c) Exudates of plants
 - d) An upgraded vegetable oil
- 3) _____ is called as the bio gas.

a) Bio ethanol	b) Bio methane
c) Bio diesel	d) Bio butanol
- 4) The geothermal energy is the _____ from the earth.

a) Heat	b) Light
c) Photons	d) Protons
- 5) Two-basin tidal schemes _____.
 - a) Are more economical than single basin schemes
 - b) Operate on ebb cycles in both basins
 - c) Produce less uniform power
 - d) Produce more uniform power
- 6) The use of Pelton wheel is desirable for the conditions of _____.
 - a) Low head and high discharge
 - b) High head and low discharge
 - c) High head and high discharge
 - d) Low head and low discharge

Section – II

Q.4 Attempt any four. 16

- a) Distinguish between fixed dome type & Floating drum type biogas plant.
- b) With the help of bacterial reactions explain principle of biogas generation.
- c) Explain the need for DEC.
- d) Explain the different types of geothermal resources.
- e) Draw and describe the working of open cycle OTEC system.
- f) Write short note on Carnot cycle.

Q.5 Attempt any two. 12

- a) Explain fixed drum type biogas plant.
- b) Describe the working of closed cycle OTEC system, also explain the advantages and disadvantages of Tidal power.
- c) Explain tidal energy conversion system with proper diagram.

T.Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING
Fiber Optic Communication (BTN07608)

Day & Date: Friday, 31-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) A LASER Means _____.
 - a) Light amplification some emit radiation
 - b) Light amplification by stimulated emission of radiation
 - c) Both a & b
 - d) Light activated stimulated emission of radiation
- 2) Optical fiber is the technology associated with data transmission using _____.
 - a) Air
 - b) Light pulses
 - c) Waves
 - d) Both a & c
- 3) Optical fiber is used by telecommunications companies to transmit _____.
 - a) Telephone signals
 - b) Telephone signals, Internet communication and cable television signals
 - c) Internet communication and cable television signals
 - d) None of the above
- 4) How do you measure bending losses in optical fiber?
 - a) By taking the logarithmic ratio of input power (P_i) to the output power (P_o)
 - b) By taking the logarithmic of Output power (P_o)
 - c) By taking the logarithmic of Input power (P_i)
 - d) Only Power
- 5) DWDM Means _____.
 - a) Data wavelength-division multiplexing
 - b) Dense wavelength-division multiplexing
 - c) Dense wavelength-diverted multiplexing
 - d) Dense wavelength-division manager
- 6) A light-emitting diode (LED) is a semiconductor device that emit light when _____.
 - a) Output reaches saturation level
 - b) Current flows through it
 - c) Output will be a sine waveform
 - d) Output will be a non-sinusoidal waveform

- 7) Fiber optic Ethernet transmits data signals over _____.
a) Fiber cables rather than the copper cables of traditional Ethernet wiring
b) Copper cables
c) Wired Cable
d) All of the mentioned
- 8) In an optical network, which topologies are used?
a) Ring
b) Star
c) Bus
d) All of the above
- 9) Dense wavelength division multiplexing (DWDM) is a _____.
a) Wired communication technique
b) fiber-optic transmission technique
c) Mixing techniques
d) Protocol
- 10) A major consideration with all types of fiber, fiber connection is the _____.
a) optical loss encountered at the interface
b) air loss
c) heat loss
d) None of the above
- 11) Fiber splicing is the process of _____.
a) Temporary joining of two fibers
b) permanently joining two fibers together
c) permanent and temporary joint
d) None of the above
- 12) An optical amplifier is a device that amplifies _____.
a) Electrical signal
b) an optical signal
c) Both a and b
d) None of the above
- 13) Wavelength division multiplexing (WDM) is a _____.
a) Technique of multiplexing multiple ray
b) Technique of multiplexing multiple optical carrier signals
c) Both a) and b)
d) None of the above
- 14) Optical modulators are widely used with superior performance _____.
a) Only Laboratory
b) including optical communications, signal processing, and optical measurements
c) time Measurement
d) None of the above

T.Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING
Fiber Optic Communication (BTN07608)

Day & Date: Friday, 31-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any four **16**

- a) Draw the block diagram of generalized optical fiber communication system. Explain.
- b) Write any 4 advantages & disadvantages of optical Fiber communication.
- c) What is scattering losses? Enlist its types. Explain any one in details.
- d) Explain optical emission in semiconductor.
- e) What is light modulation? Explain Shortly.

Q.3 Solve any two **12**

- a) Explain the process of light amplification in a LASER.
- b) Explain optical fiber waveguides.
- c) Explain LED structure.

Section – II

Q.4 Solve any four **16**

- a) What is the requirement of optical detectors? Explain.
- b) What is optical networking technology? Explain shortly.
- c) Explain PIN photodiode with diagram.
- d) Explain optical Ethernet.
- e) What is optical network mode? Explain.

Q.5 Solve any two **12**

- a) Explain optical Transmitter Design in details.
- b) Explain Fiber distributed data Interface in details.
- c) What is optical detection principle? Explain in details.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) Dead zone of an instrument is _____.
 - a) The largest change of input quantity for which there is no output of the instrument
 - b) The time required by an instrument to begin to respond to a change in measurand
 - c) The unmeasured quantity which exceeds the maximum range of the instrument
 - d) The time required by an instrument to warm up initial
- 2) The sensors are classified on the basis of _____.
 - a) Functions
 - b) Performance
 - c) Output
 - d) All of the above
- 3) Hall Effect transducer can be used to measure _____.
 - a) Magnetic field
 - b) Angular displacement
 - c) Linear displacement
 - d) All of the mentioned
- 4) Piezoelectric effect is when materials produce electric charges when _____.
 - a) Voltage is applied
 - b) Mechanical Stress is applied
 - c) Electric field is applied
 - d) Magnetic field is applied
- 5) The more correct a sensor can measure, the more _____ it is.
 - a) Accurate
 - b) Precise
 - c) Scaled
 - d) Extent
- 6) What is signal conditioning?
 - a) To analyse any signal
 - b) Conversion or modification is referred to as conditioning
 - c) Conversion from analog to digital is signal conditioning
 - d) Conversion from digital to analog is signal conditioning
- 7) Which of the following method is employed for ADC?
 - a) Ladder network
 - b) Successive approximation type
 - c) PWM type
 - d) None of the mentioned

- 8) Potentiometer as a displacement sensor works on the principle of _____.
a) Mutual Inductance
b) Self-Inductance
c) Variable Resistance Transduction
d) Hall Effect
- 9) Which type of position can be determined by a position sensor?
a) Mechanical position
b) Lateral position
c) Prone position
d) Lithotomy position
- 10) In wet etching material is removed by _____.
a) Absorption
b) Sublimation
c) Chemical reaction
d) The force exerted due to flow of solvent
- 11) The process of modifying a metal's properties is called _____.
a) Electrolysis
b) Electro deposition
c) Electro less plating
d) Electroplating
- 12) The force developed in hydraulic systems is high due to _____.
a) High pressure
b) More oil
c) Less pressure
d) Less oil
- 13) Which type of coil is a solenoid?
a) Electromagnetic
b) Electrical
c) Mechanical
d) Chemical
- 14) The direction control valve controls _____.
a) Direction of flow
b) Rate of flow
c) Moisture
d) Force and motion

Sensors & Applications (BTN07609)

Day & Date: Friday, 31-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any four. 16

- Define and explain the sensor with one example.
- Explain the principle of working of Hall effect sensor.
- State and explain the different types of batteries for low power sensors.
- Explain with neat sketch thermal expansion property of material
- What is a voltage follower? Give a practical use of a voltage follower.

Q.3 Solve any two. 12

- Define the temperature and explain the thermal properties of material
- State Characteristics of sensor and explain the transfer function characteristics.
- State different types of excitation circuits and explain any one of them in details.

Section – II

Q.4 Solve any four. 16

- State the different types of pressure sensor and explain any one of them.
- State the sensors used for occupancy and motion detector application and explain any one of them
- With neat sketch explain vacuum deposition method of surface processing.
- Explain the wet etching MEMS Technology.
- Write the Selection criteria of Actuators.

Q.5 Solve any two. 12

- State the different types of light detector and explain any one of them.
- State the different types of material used for fabrication of sensor and explain any one of them.
- State and explain the principle of operation of micro and nano actuator with advantages and disadvantages.

ELECTRICAL ENGINEERING
Sensors & Applications (BTN07609)

Day & Date: Friday, 31-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any four. 16

- Define and explain the sensor with one example.
- Explain the principle of working of Hall effect sensor.
- State and explain the different types of batteries for low power sensors.
- Explain with neat sketch thermal expansion property of material
- What is a voltage follower? Give a practical use of a voltage follower.

Q.3 Solve any two. 12

- Define the temperature and explain the thermal properties of material
- State Characteristics of sensor and explain the transfer function characteristics.
- State different types of excitation circuits and explain any one of them in details.

Section – II

Q.4 Solve any four. 16

- State the different types of pressure sensor and explain any one of them.
- State the sensors used for occupancy and motion detector application and explain any one of them
- With neat sketch explain vacuum deposition method of surface processing.
- Explain the wet etching MEMS Technology.
- Write the Selection criteria of Actuators.

Q.5 Solve any two. 12

- State the different types of light detector and explain any one of them.
- State the different types of material used for fabrication of sensor and explain any one of them.
- State and explain the principle of operation of micro and nano actuator with advantages and disadvantages.

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING
Sensors & Applications (BTN07609)

Day & Date: Friday, 31-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) What is signal conditioning?
 - a) To analyse any signal
 - b) Conversion or modification is referred to as conditioning
 - c) Conversion from analog to digital is signal conditioning
 - d) Conversion from digital to analog is signal conditioning
- 2) Which of the following method is employed for ADC?
 - a) Ladder network
 - b) Successive approximation type
 - c) PWM type
 - d) None of the mentioned
- 3) Potentiometer as a displacement sensor works on the principle of _____.
 - a) Mutual Inductance
 - b) Self-Inductance
 - c) Variable Resistance Transduction
 - d) Hall Effect
- 4) Which type of position can be determined by a position sensor?

a) Mechanical position	b) Lateral position
c) Prone position	d) Lithotomy position
- 5) In wet etching material is removed by _____.
 - a) Absorption
 - b) Sublimation
 - c) Chemical reaction
 - d) The force exerted due to flow of solvent
- 6) The process of modifying a metal's properties is called _____.

a) Electrolysis	b) Electro deposition
c) Electro less plating	d) Electroplating
- 7) The force developed in hydraulic systems is high due to _____.

a) High pressure	b) More oil
c) Less pressure	d) Less oil

- 8) Which type of coil is a solenoid?
a) Electromagnetic b) Electrical
c) Mechanical d) Chemical
- 9) The direction control valve controls _____.
a) Direction of flow b) Rate of flow
c) Moisture d) Force and motion
- 10) Dead zone of an instrument is _____.
a) The largest change of input quantity for which there is no output of the instrument
b) The time required by an instrument to begin to respond to a change in measurand
c) The unmeasured quantity which exceeds the maximum range of the instrument
d) The time required by an instrument to warm up initial
- 11) The sensors are classified on the basis of _____.
a) Functions b) Performance
c) Output d) All of the above
- 12) Hall Effect transducer can be used to measure _____.
a) Magnetic field b) Angular displacement
c) Linear displacement d) All of the mentioned
- 13) Piezoelectric effect is when materials produce electric charges when _____.
a) Voltage is applied b) Mechanical Stress is applied
c) Electric field is applied d) Magnetic field is applied
- 14) The more correct a sensor can measure, the more _____ it is.
a) Accurate b) Precise
c) Scaled d) Extent

ELECTRICAL ENGINEERING

Hybrid Electric Vehicle Design (BTN07610)

Day & Date: Monday, 03-06-2024
 Time: 10:00 AM To 12:00 PM

Max. Marks: 50

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 20 Minutes

Marks: 10

Q.1 Choose the correct option from the following. 10

- 1) The benefits of hybrid electric vehicle is/are, _____.
 - a) reducing emissions
 - b) improving gas mileage
 - c) high fuel consumption
 - d) a & b only
- 2) _____ are the engine that generates power by burning air and fuel (petrol, diesel, kerosene, etc.) in a closed chamber.
 - a) Internal Combustion engines
 - b) hybrid electric vehicle
 - c) Plug-in- hybrid electric vehicle
 - d) All of the above
- 3) The capacity of a battery is expressed in terms of _____.
 - a) Current rating
 - b) Voltage rating
 - c) Ampere hour rating
 - d) None of the above
- 4) Super capacitors are also known as _____.
 - a) Ultracapacitors
 - b) Fuel Cells
 - c) Battery
 - d) Flywheel
- 5) Which of the following converts energy from the combustion of fuel directly to the electrical energy?
 - a) Ni-Cd cell
 - b) Dynamo
 - c) Fuel cell
 - d) Electrolytic cell
- 6) The force required to stop a vehicle is dependent on _____.
 - a) the weight of vehicle
 - b) the deceleration rate
 - c) both (A) and (B)
 - d) None of the above
- 7) The uncontrolled skidding of vehicles while sudden brakes are applied is avoided through _____.
 - a) antilock brake system
 - b) Regenerative brake system
 - c) electric brake system
 - d) None of the above

- 8) Which of the following control scheme/s available for the induction motor drives?
- a) Scalar control
 - b) Vector control
 - c) Direct torque control
 - d) All of the above
- 9) Regenerative braking involves _____.
- a) nanofibers that repairs the surface of the brake pads
 - b) reducing the amount of friction necessary to slow the car
 - c) reclaiming heat from the brakes and using it for power
 - d) None of the above
- 10) Which strategy is not used in Energy management strategy system?
- a) Optimization based
 - b) Rule based
 - c) Global optimization strategy
 - d) Regression method

 - c) Time duration of current flow through the body
 - d) All of these
- 4) Who will ensure that you are using proper PPE (Personal Protective Equipment)?
 - a) You
 - b) Your Co-Worker
 - c) Your Safety Management
 - d) Company Owner
- 5) The minimum distance provided between two conducting points by air/gas/oil is Known as _____.
 - a) Clearances
 - b) Creepages
 - c) Clearances and Creepages
 - d) All of these
- 6) What are the followings will define Secondary electric Shock?
 - a) the low magnitude of the current
 - b) hair raising & tickling sensation
 - c) involuntary muscle reaction
 - d) All of these
- 7) _____ all electrical equipment before use.
 - a) Inspect
 - b) Clean
 - c) Label
 - d) Organize

Set S

T.Y. (B. Tech) (Sem– II) (New) (CBCS) Examination: March/April - 2024
ELECTRICAL ENGINEERING
Electrical Safety (BTN07611)

Day & Date: Monday, 03-06-2024
Time: 10:00 AM To 12:00 PM

Max. Marks: 40

Instructions: 1) All questions are compulsory.
2) Figures to the right indicates full marks.

Q.2 Answer the FOUR question: -

40

- a) Explain the procedure of permit to do the work on electrical equipment & give objectives of safety management.
- b) Explain the effect of electrical shock on human body & comment on safety clearances and creepages in electrical installation.
- c) What is electrical shock? Distinguish between primary shock and secondary shock.
- d) Explain the Cause of different type of electric fires. Comment on electrical installations regarding to fire.
- e) Explain the types of extinguishers used. & also write the methods of artificial respirations.

Seat No.

ELECTRICAL ENGINEERING**

Solar Photovoltaic System Design & Installation (BTN07612)

Day & Date: Monday, 03-06-2024
Time: 10:00 AM To 12:00 PM

Max. Marks: 50

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 20 Minutes

Marks:10

Q.1 Choose the correct alternatives from the given options.

10

- 1) Identify the adjacent module configuration.

a) Monocrystalline	b) Polycrystalline
c) Thin film	d) Any other
- 2) Identify the adjacent module configuration.

a) Monocrystalline	b) Polycrystalline
c) Thin film	d) Any other
- 3) Identify the adjacent module configuration.

a) Monocrystalline	b) Polycrystalline
c) Thin film	d) Any other
- 4) What is function of inverter?

a) Conversion of AC to DC	b) Conversion of DC to AC
c) Amplifying the sound	d) Step up the voltage
- 5) What is MPPT?

a) Maximum Photo Power Tracer	b) Maximum Power Point Tracer
c) Multi Point Power Tracer	d) None of the above
- 6) What is the smallest unit of solar photovoltaic system?

a) Solar Cell	b) Solar Array
c) Solar module	d) Solar panel
- 7) In P-N Junction solar cell, P-type semiconductor is connected to _____.

a) Cathode	b) Anode
c) Triode	d) Diode
- 8) In P-N Junction solar cell, N-type semiconductor is connected to _____.

a) Cathode	b) Anode
c) Triode	d) Diode
- 9) In P-type semiconductor are the majority carriers.

a) Holes	b) Electrons
c) Neutrons	d) All of the above

- 10)** In N-type semiconductor are the majority carriers.
- a) Holes
 - b) Electrons
 - c) Neutrons
 - d) All of the above

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) On Which law secondary cell works?
 - a) Lenz's law
 - b) Joule's law
 - c) Faradays laws of electrolysis
 - d) Faradays laws of electromagnetic induction
- 2) Cells are connected in parallel to _____.
 - a) increase the voltage output
 - b) increases the internal resistance
 - c) decreases the current capacity
 - d) increases the current capacity
- 3) What is the value of the specific gravity of a fully charged battery?

a) 1	b) 1.29
c) 0.5	d) 1.1
- 4) The capacity of a battery is expressed in terms of _____.

a) Current rating	b) Voltage rating
c) Ampere hour rating	d) None of the above
- 5) Which is the active material present on the negative plate in a lead-acid battery?

a) Lead dioxide	b) Lead peroxide
c) Spongy lead	d) Water
- 6) What is the unit of specific energy in a battery?

a) Watt-hour-Kg	b) Watt-hour/Kg
c) Watt-hour	d) None of the above
- 7) The plot between specific power & specific energy is known as _____.

a) Bournville's Plot	b) Pascal plot
c) Ragone Plot	d) None of the above

- 8) Which of the following meter is used in the open volt test?
a) Ammeter
b) Voltmeter
c) Galvanometer
d) Hydrometer
- 9) Generally, the most common battery cells are used in 3 or 4-wheeler Electric vehicles _____.
a) Cylindrical
b) Pouch
c) Prismatic
d) Both b and c
- 10) The most common communication protocol used in BMS:
a) CAN bus
b) SPI bus
c) 12 C bus
d) None of the above
- 11) Which among the following is not a factor affecting the charging of the battery?
a) State of charge
b) Gassing
c) Temperature
d) Discolouring of electrolyte
- 12) Which component is not related to the active cell balancing method _____.
a) Capacitor
b) Inductor
c) Resistor
d) None of the above
- 13) Hall effect used in which sensor _____.
a) Voltage sensor
b) Temperature sensor
c) Current sensor
d) None of these
- 14) Which materials can be recovered during battery recycling?
a) Metals (such as lithium, cobalt, and nickel)
b) Plastics
c) Electrolytes
d) All of the above

Energy Management System for Electric Vehicle (BTN07614)

Day & Date: Wednesday, 05-06-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Answer the following (Any Four) 16

- Explain operation of Metal Air battery also give its application.
- Explain Vehicle propulsion factors regarding performance criteria for Electric Vehicles batteries.
- Explain with chemical reactions charging process of a lead acid battery.
- Explain in detail hydraulic energy storage element.
- Explain with application operation of Zinc Chloride battery.
- Explain in short nominal parameters of a battery.

Q.3 Answer the following (Any Two) 12

- Explain operation with chemical reactions of Nickel-Iron and Nickel-Cadmium batteries during charging and discharging process.
- State and explain different types of batteries available in market.
- Explain general approach to modeling of batteries.

Section – II

Q.4 Answer the following (Any Four) 16

- Explain in detail requirement of battery monitoring.
- Explain methods of recycling of EV batteries.
- Explain the fundamentals of the battery pack development process.
- Explain Chemical & structure material properties for cell safety and battery design.
- Write a short note on Battery Standards & Tests.
- Describes the EV Battery testing methods.

Q.5 Answer the following (Any Two) 12

- Explain in detail selection of batteries for Electric Vehicle (EV) and hybrid electric vehicle (HEV).
- Explain Environment and Human Health impact assessments of batteries.
- Why is Battery Management System (BMS) important in Lithium-ion battery, and describes the core functions of BMS?

Seat No.

- Explain general approach to modeling of batteries.

Section – II

Q.4 Answer the following (Any Four) 16

- Explain in detail requirement of battery monitoring.
- Explain methods of recycling of EV batteries.
- Explain the fundamentals of the battery pack development process.
- Explain Chemical & structure material properties for cell safety and battery design.
- Write a short note on Battery Standards & Tests.
- Describes the EV Battery testing methods.

Q.5 Answer the following (Any Two) 12

- Explain in detail selection of batteries for Electric Vehicle (EV) and hybrid electric vehicle (HEV).
- Explain Environment and Human Health impact assessments of batteries.
- Why is Battery Management System (BMS) important in Lithium-ion battery, and describes the core functions of BMS?

T.Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING

Energy Management System for Electric Vehicle (BTN07614)

Day & Date: Wednesday, 05-06-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) What is the unit of specific energy in a battery?
 - a) Watt-hour-Kg
 - b) Watt-hour/Kg
 - c) Watt-hour
 - d) None of the above
- 2) The plot between specific power & specific energy is known as _____.
 - a) Bournville's Plot
 - b) Pascal plot
 - c) Ragone Plot
 - d) None of the above
- 3) Which of the following meter is used in the open volt test?
 - a) Ammeter
 - b) Voltmeter
 - c) Galvanometer
 - d) Hydrometer
- 4) Generally, the most common battery cells are used in 3 or 4-wheeler Electric vehicles _____.
 - a) Cylindrical
 - b) Pouch
 - c) Prismatic
 - d) Both b and c
- 5) The most common communication protocol used in BMS:
 - a) CAN bus
 - b) SPI bus
 - c) 12 C bus
 - d) None of the above
- 6) Which among the following is not a factor affecting the charging of the battery?
 - a) State of charge
 - b) Gassing
 - c) Temperature
 - d) Discolouring of electrolyte
- 7) Which component is not related to the active cell balancing method _____.
 - a) Capacitor
 - b) Inductor
 - c) Resistor
 - d) None of the above
- 8) Hall effect used in which sensor _____.
 - a) Voltage sensor
 - b) Temperature sensor
 - c) Current sensor
 - d) None of these

- 9) Which materials can be recovered during battery recycling?
- a) Metals (such as lithium, cobalt, and nickel)
 - b) Plastics
 - c) Electrolytes
 - d) All of the above
- 10) On Which law secondary cell works?
- a) Lenz's law
 - b) Joule's law
 - c) Faradays laws of electrolysis
 - d) Faradays laws of electromagnetic induction
- 11) Cells are connected in parallel to _____.
- a) increase the voltage output
 - b) increases the internal resistance
 - c) decreases the current capacity
 - d) increases the current capacity
- 12) What is the value of the specific gravity of a fully charged battery?
- a) 1
 - b) 1.29
 - c) 0.5
 - d) 1.1
- 13) The capacity of a battery is expressed in terms of _____.
- a) Current rating
 - b) Voltage rating
 - c) Ampere hour rating
 - d) None of the above
- 14) Which is the active material present on the negative plate in a lead-acid battery?
- a) Lead dioxide
 - b) Lead peroxide
 - c) Spongy lead
 - d) Water

Energy Management System for Electric Vehicle (BTN07614)

Day & Date: Wednesday, 05-06-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

- Q.2 Answer the following (Any Four) 16**
- a) Explain operation of Metal Air battery also give its application.
 - b) Explain Vehicle propulsion factors regarding performance criteria for Electric Vehicles batteries.
 - c) Explain with chemical reactions charging process of a lead acid battery.
 - d) Explain in detail hydraulic energy storage element.
 - e) Explain with application operation of Zinc Chloride battery.
 - f) Explain in short nominal parameters of a battery.
- Q.3 Answer the following (Any Two) 12**
- a) Explain operation with chemical reactions of Nickel-Iron and Nickel-Cadmium batteries during charging and discharging process.
 - b) State and explain different types of batteries available in market.
 - c) Explain general approach to modeling of batteries.

Section – II

- Q.4 Answer the following (Any Four) 16**
- a) Explain in detail requirement of battery monitoring.
 - b) Explain methods of recycling of EV batteries.
 - c) Explain the fundamentals of the battery pack development process.
 - d) Explain Chemical & structure material properties for cell safety and battery design.
 - e) Write a short note on Battery Standards & Tests.
 - f) Describes the EV Battery testing methods.
- Q.5 Answer the following (Any Two) 12**
- a) Explain in detail selection of batteries for Electric Vehicle (EV) and hybrid electric vehicle (HEV).
 - b) Explain Environment and Human Health impact assessments of batteries.
 - c) Why is Battery Management System (BMS) important in Lithium-ion battery, and describes the core functions of BMS?

ELECTRICAL ENGINEERING
Distributed Energy Integration (BTN07613)

Day & Date: Wednesday 05-06-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.
 4) Assume data wherever necessary

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) Distribution management systems:
 - a) Radial system
 - b) Tree system
 - c) Ring mains system
 - d) All are equally reliable
- 2) The energy strategies of companies have the principle of _____.
 - a) restoring and preserving the environment
 - b) reducing wastes and pollutants
 - c) reducing people about energy conservation
 - d) all of these
- 3) Energy management is a key component of _____.
 - a) Environmental management
 - b) Carbon management
 - c) Nitrogen management
 - d) Water management
- 4) In passive potential energy strategies, _____.
 - a) There is no systematic planning
 - b) Measures with low profitability are not considered
 - c) One should have high knowledge of the energy price
 - d) All of these
- 5) The area of cross-section of the neutral in a 3-wire D.C. system is generally _____ the area of cross-section of main conductor.
 - a) same as
 - b) One- fourth
 - c) One –half
 - d) Double
- 6) Which of the following is formed at the graphite electrode during the charging process of a battery when the lithium-ion moves through the separator?
 - a) Water
 - b) Graphite
 - c) Lithium hydroxide
 - d) Lithium carbide
- 7) In a distribution system, major cost is that of _____.
 - a) Earthing system
 - b) Distribution transformer
 - c) Conductors
 - d) Metres

- 8) The flywheel is accelerated when _____.
- a) Driving torque > Load torque
 - b) Driving torque < Load torque
 - c) Driving torque = Load torque
 - d) Any of the above
- 9) For the same conductor length, same amount of power, same losses and maximum voltage to earth, which system requires minimum conductor area?
- a) 3 wire AC
 - b) 2 wire AC
 - c) 2 wire DC
 - d) single phase
- 10) Cloud base energy management system provides the ability to _____.
- a) Remotely control HVAC
 - b) Collect real-time data
 - c) Generate intelligent, specific and real-time guidance
 - d) All of these
- 11) The null point of a uniformly loaded distributor feed at the equal voltage at both ends lies at _____.
- a) Midpoint
 - b) Either end
 - c) Two third distance from one end
 - d) One-fourth distance from one end
- 12) Why is compressed air in a storage system cooled before storage??
- a) Prevent heat loss during storage
 - b) Improve turn around efficiency
 - c) Reduces storage volume
 - d) Help in a hybrid system
- 13) What is the permissible limit of voltage variations allowed in the distribution systems?
- a) $\pm 2\%$
 - b) $\pm 5\%$
 - c) $\pm 10\%$
 - d) $\pm 6\%$
- 14) As compared to cables, the disadvantages of transmission lines is _____.
- a) inductive interference between power and communication circuits
 - b) exposure to lightning
 - c) exposure to atmospheric hazards like smoke, ice, etc.
 - d) all of the above

Distributed Energy Integration (BTN07613)

Day & Date: Wednesday 05-06-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

- Q.2 Answer the following (Any Four) 16**
- a) Write a short note on the security and reliability of distributed generation.
 - b) Discuss different integration issues in distributed generation.
 - c) Write a short note on the protection of DGs.
 - d) What are alternative frameworks for distribution tariff development?
 - e) Explain the role of microgrids in Energy Reliability.

- Q.3 Answer the following (Any Two) 12**
- a) Explain different Forecasting methods and their applications.
 - b) What are the Regulatory challenges in the interconnection of DGS to the power systems?
 - c) Write a short note on Loss reduction and Investment reduction.

Section – II

- Q.4 Answer the following (Any Four) 16**
- a) What are the different power quality issues in wind/PV systems?
 - b) Write an overview of technical regulations for the interconnection of DGs.
 - c) Discuss allocation of losses in distribution networks with DG.
 - d) Write a short note on DGs in distribution networks.
 - e) Describe the concept of microgrid & also its advantages & applications.

- Q.5 Answer the following (Any Two) 12**
- a) Discuss energy storage's role in Energy Security.
 - b) Explain the Virtual power plant in detail.
 - c) Explain the Viability of DG integration in the deregulated electricity market.

 3) Figures to the right indicates full marks.
 4) Assume data wherever necessary

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) Impulsive transient is _____ in polarity.
 - a) Bidirectional
 - b) Unidirectional
 - c) Both a & b
 - d) None of the above
- 2) Source of transient voltage _____.
 - a) Lightning
 - b) Switching loads ON or OFF
 - c) Interruption of fault circuits
 - d) All of the above
- 3) Full form of CBEMA.
 - a) Computer and Business Equipment Manufacturers' Association
 - b) Core and Business Equipment Manufacturers' Association
 - c) Computer and Board Equipment Manufacturers' Association
 - d) None of the above
- 4) Transformer draw _____ currents, when switched ON, that range between _____ times their normal full-load current.
 - a) surge, 10 to 15
 - b) inrush, 10 to 15
 - c) surge, 1 to 10
 - d) None of the above
- 5) Shunt compensation in EHV line is resorted to _____.
 - a) Improve voltage profile
 - b) Reduce fault current
 - c) Improve stability
 - d) Increase current
- 6) Lightning is a potent source of _____.
 - a) Low frequency transients
 - b) High frequency transients or Impulsive transients
 - c) Oscillatory transients
 - d) None of the above
- 7) What should be the value of sag for proper operation of overhead transmission line?
 - a) Anything
 - b) Neither too low nor too high
 - c) High
 - d) Low

- 8) FACTS provides _____.
- a) Power transfer capability and controllability
 - b) Phase sequence and comparability
 - c) Both a and b
 - d) None
- 9) K is _____.
- a) X/X_c
 - b) $1/X_c$
 - c) X
 - d) X_c/X
- 10) TSSC can be operated line _____.
- a) Continuous
 - b) Discrete
 - c) Step
 - d) None
- 11) Which are the shunt compensation devices?
- a) TCSC
 - b) SSSC
 - c) UPFC
 - d) SVC
- 12) Shunt compensation in an EHV line is used to _____.
- a) Improve stability
 - b) Reduce fault level
 - c) Improve voltage profile
 - d) Substitute for synchronous phase modifier
- 13) Series capacitor is used in a transmission line to _____.
- a) Compensate the voltage drop
 - b) Reduce line losses
 - c) Improve load power factor
 - d) None
- 14) In which IEEE standards recommended practice for electrical power distribution for industrial plants is given.
- a) IEEE 519
 - b) IEEE 1159
 - c) IEEE 518
 - d) IEEE 141

Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING
Power Quality and FACTS (BTN07701)

Day & Date: Wednesday, 15-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Answer the following (Any Four) 16

- Define power quality. Why power quality is important now a day? Explain in brief.
- Explain Harmonic sources from commercial and industrial loads.
- Explain different power quality monitoring and diagnostic techniques for various power quality problems.
- Define, explain the causes and effects of the following power quality problems:
 - Voltage sag
 - Voltage unbalance
- With neat diagram explain CBEMA and ITIC curve.

Q.3 Answer the following (Any Two) 12

- Explain the need of power quality standards. Explain power quality standards.
- With neat sketch explain the operation Flicker meters.
- Explain how to locate harmonic sources.

Section – II

Q.4 Answer the following (Any Four) 16

- Explain the FACTS, devices, and its importance in the transmission Network.
- Explain objectives of the series compensation with derivation.
- Explain Basic operating principles of IPFC.
- Explain Brief Description and Definition of FACTS controller.
- Explain switching converter type series compensators.

Q.5 Answer the following (Any Two) 12

- Explain Power flow in AC System.
- Explain Variable Impedance type series compensation.
- Explain overall control structure of UPFC.

Seat No.

Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING
Power Quality and FACTS (BTN07701)

Day & Date: Wednesday, 15-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.
 4) Assume data wherever necessary

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) FACTS provides _____.
 - a) Power transfer capability and controllability
 - b) Phase sequence and comparability
 - c) Both a and b
 - d) None
- 2) K is _____.

a) X/X_c	b) $1/X_c$
c) X	d) X_c/X
- 3) TSSC can be operated line _____.

a) Continuous	b) Discrete
c) Step	d) None
- 4) Which are the shunt compensation devices?

a) TCSC	b) SSSC
c) UPFC	d) SVC
- 5) Shunt compensation in an EHV line is used to _____.
 - a) Improve stability
 - b) Reduce fault level
 - c) Improve voltage profile
 - d) Substitute for synchronous phase modifier
- 6) Series capacitor is used in a transmission line to _____.
 - a) Compensate the voltage drop
 - b) Reduce line losses
 - c) Improve load power factor
 - d) None
- 7) In which IEEE standards recommended practice for electrical power distribution for industrial plants is given.

a) IEEE 519	b) IEEE 1159
c) IEEE 518	d) IEEE 141

Seat No.

- 4) In which IEEE standards recommended practice for electrical power distribution for industrial plants is given.
 - a) IEEE 519
 - b) IEEE 1159
 - c) IEEE 518
 - d) IEEE 141
- 5) Impulsive transient is _____ in polarity.
 - a) Bidirectional
 - b) Unidirectional
 - c) Both a & b
 - d) None of the above
- 6) Source of transient voltage _____.
 - a) Lightning
 - b) Switching loads ON or OFF
 - c) Interruption of fault circuits
 - d) All of the above
- 7) Full form of CBEMA.
 - a) Computer and Business Equipment Manufacturers' Association
 - b) Core and Business Equipment Manufacturers' Association
 - c) Computer and Board Equipment Manufacturers' Association
 - d) None of the above

- 8) Transformer draw _____ currents, when switched ON, that range between _____ times their normal full-load current.
- a) surge, 10 to 15 b) inrush, 10 to 15
c) surge, 1 to 10 d) None of the above
- 9) Shunt compensation in EHV line is resorted to _____.
- a) Improve voltage profile b) Reduce fault current
c) Improve stability d) Increase current
- 10) Lightning is a potent source of _____.
- a) Low frequency transients
b) High frequency transients or Impulsive transients
c) Oscillatory transients
d) None of the above
- 11) What should be the value of sag for proper operation of overhead transmission line?
- a) Anything b) Neither too low nor too high
c) High d) Low
- 12) FACTS provides _____.
- a) Power transfer capability and controllability
b) Phase sequence and comparability
c) Both a and b
d) None
- 13) K is _____.
- a) X/X_c b) $1/X_c$
c) X d) X_c/X
- 14) TSSC can be operated line _____.
- a) Continuous b) Discrete
c) Step d) None

 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.
 4) Assume data wherever necessary

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) Convolution is used to find _____.
 a) The impulse response of an LTI System
 b) Frequency response of a System
 c) The time response of a LTI system
 d) The phase response of a LTI system
- 2) If h_1 , h_2 and h_3 are cascaded, find the overall impulse response.
 a) $h_1 * h_2 * h_3$
 b) $h_1 + h_2 + h_3$
 c) 3
 d) all of the mentioned
- 3) Find the value of $h[n] * \delta[n - 1]$, $\delta[n]$ being the Delta function.
 a) $h[n - 2]$
 b) $h[n]$
 c) $h[n - 1]$
 d) $h[n + 1]$
- 4) Does the system $h(t) = \exp(-7t)$ correspond to a stable system?
 a) Yes
 b) No
 c) Marginally Stable
 d) No one of the above
- 5) All energy signals will have an average power.
 a) Infinite
 b) Zero
 c) Positive
 d) Cannot be calculated
- 6) The even part of a signal $x(t)$ is:
 a) $x(t) + x(-t)$
 b) $x(t) - x(-t)$
 c) $(1/2) * (x(t) + x(-t))$
 d) $(1/2) * (x(t) - x(-t))$
- 7) If sequence $y(n) = x(-n)$ then it is _____.
 a) Causal
 b) Non-Causal
 c) Depends on $x(-n)$
 d) None
- 8) The function $\delta(t - b)$ is _____.
 a) An impulse function
 b) A step function originating at $t = b$
 c) An impulse function originating at $t = b$
 d) no one of the above

- 9) If $x(z) = \{1, 2, 1, 2, 3\}$ ROC is _____.
 \uparrow
- Entire z- plane
 - Entire z-plane except $z = \infty$
 - Entire z-plane except $z = 0, z = \infty$
 - Entire z-plane except $z = 0$
- 10) The ROC must be _____.
 - Divided region
 - Connected region
 - Partly connected & partly divided
 - None
- 11) In DIF FFT algorithm input sequence is _____.
 - In natural order
 - bit reversed order
 - in ascending order
 - descending order
- 12) In DIT FFT algorithm, the number of complex multiplications is given by _____.
 - $N \log_2 (N/2)$
 - $N \log_2 (N/3)$
 - $(N/2) \log_2 N$
 - $N \log_2 (N)$
- 13) In DIF FFT algorithm, Exponent repeat factor (ERF) is given by _____.
 - 2^{M-m}
 - 2^{M-1}
 - 2^{m-M}
 - 2^{M-1}
- 14) The sufficient condition for the existence of DTFT is _____.
 - $\sum_{n=-\infty}^{\infty} |x(n)| < \infty$
 - $\sum_{n=-\infty}^{\infty} |x(n)| > \infty$
 - $\sum_{n=-\infty}^{\infty} |x(n)| = 0$
 - None of above

Fourth Y. (B Tech) (Sem-I) (New) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING
Signals and System (BTN07702)

Day & Date: Thursday, 16-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

Instructions: 1) All questions are compulsory.
 2) Figures to the right indicate full marks.

Section – I**Q.2 Answer any four of the following.****16**

- a) Define the terms w.r.t. signals.
 i) Even signal, Odd signal
 ii) Energy signal, Power signal
 iii) Causal and Non-causal signal
- b) Determine the energy and power of the signal.
 $X(n) = (0.5)^n \cdot u(n)$
- c) Explain elementary signal.
 i) Unit step
 ii) Unit Impulse
 iii) Unit Ramp
- d) Derive the expression for even & odd components of a CT signal.
- e) Check the following property of signal.
 i) Stable, unstable
 ii) Invertible, Non-Invertible
 If, $Y(t) = x(t) + x(t + 3)$

Q.3 Attempt any Two of the following.**12**

- a) Find the convolution of two signal as shown in below.

- b) Explain properties of CT-LTI system.
- c) A DT sequence $X[n]$ is shown below; sketch and label the following signals.
 i) $X[n + 2]$ ii) $X[n - 4]$ iii) $X[2n]$

Section – II

Q.4 Attempt Any Four of the following:**16**

- a) Find the Z-Transform and ROC of given signal.
 $x(n) = a^n \cdot u(n)$
- b) Determine the discrete time signal $x(n)$ whose Fourier transform is,

$$X(e^{j\omega}) = \begin{cases} 1, & -\omega_c < \omega < \omega_c \\ 0 & -\omega_c < |\omega| < \pi \end{cases}$$
- c) Explain the time scaling property of Fourier transform and hence find the Fourier transform of $f(t) = e^{-0.5t} u(t)$
- d) Explain the Continuous time Fourier series for a periodic signal.
- e) Explain Complex exponential Fourier series.

Q.5 Attempt Any Two of the following.**12**

- a) State the properties of Z-Transform and explain any two.
- b) Compute 8-point DFT of sequence using DIF FFT algorithm
 $x(n) = 1$ for $0 < n < 7$
 $= 0$ otherwise
- c) List properties of DFT and explain any two.

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) The function $\delta(t - b)$ is _____.
 - a) An impulse function
 - b) A step function originating at $t = b$
 - c) An impulse function originating at $t = b$
 - d) no one of the above
- 2) If $x(z) = \{1, 2, 1, 2, 3\}$ ROC is _____.

↑

 - a) Entire z- plane
 - b) Entire z-plane except $z = \infty$
 - c) Entire z-plane except $z = 0, z = \infty$
 - d) Entire z-plane except $z = 0$
- 3) The ROC must be _____.
 - a) Divided region
 - b) Connected region
 - c) Partly connected & partly divided
 - d) None
- 4) In DIF FFT algorithm input sequence is _____.

a) In natural order	b) bit reversed order
c) in ascending order	d) descending order
- 5) In DIT FFT algorithm, the number of complex multiplications is given by _____.

a) $N \log_2 (N/2)$	b) $N \log_2 (N/3)$
c) $(N/2) \log_2 N$	d) $N \log_2 (N)$
- 6) In DIF FFT algorithm, Exponent repeat factor (ERF) is given by _____.

a) 2^{M-m}	b) 2^{M-1}
c) 2^{m-M}	d) 2^{M-1}
- 7) The sufficient condition for the existence of DTFT is _____.

a) $\sum_{n=-\infty}^{\infty} x(n) < \infty$	b) $\sum_{n=-\infty}^{\infty} x(n) > \infty$
c) $\sum_{n=-\infty}^{\infty} x(n) = 0$	d) None of above

- 8) Convolution is used to find _____.
- a) The impulse response of an LTI System
 - b) Frequency response of a System
 - c) The time response of a LTI system
 - d) The phase response of a LTI system
- 9) If h_1 , h_2 and h_3 are cascaded, find the overall impulse response.
- a) $h_1 * h_2 * h_3$
 - b) $h_1 + h_2 + h_3$
 - c) 3
 - d) all of the mentioned
- 10) Find the value of $h[n] * \delta[n - 1]$, $\delta[n]$ being the Delta function.
- a) $h[n - 2]$
 - b) $h[n]$
 - c) $h[n - 1]$
 - d) $h[n + 1]$
- 11) Does the system $h(t) = \exp(-7t)$ correspond to a stable system?
- a) Yes
 - b) No

- 1) In DIF FFT algorithm input sequence is _____.
 - a) In natural order
 - b) bit reversed order
 - c) in ascending order
 - d) descending order
- 2) In DIT FFT algorithm, the number of complex multiplications is given by _____.
 - a) $N \log_2 (N/2)$
 - b) $N \log_2 (N/3)$
 - c) $(N/2) \log_2 N$
 - d) $N \log_2 (N)$
- 3) In DIF FFT algorithm, Exponent repeat factor (ERF) is given by _____.
 - a) 2^{M-m}
 - b) 2^{M-1}
 - c) 2^{m-M}
 - d) 2^{M-1}
- 4) The sufficient condition for the existence of DTFT is _____.
 - a) $\sum_{n=-\infty}^{\infty} |x(n)| < \infty$
 - b) $\sum_{n=-\infty}^{\infty} |x(n)| > \infty$
 - c) $\sum_{n=-\infty}^{\infty} |x(n)| = 0$
 - d) None of above
- 5) Convolution is used to find _____.
 - a) The impulse response of an LTI System
 - b) Frequency response of a System
 - c) The time response of a LTI system
 - d) The phase response of a LTI system
- 6) If h_1 , h_2 and h_3 are cascaded, find the overall impulse response.
 - a) $h_1 * h_2 * h_3$
 - b) $h_1 + h_2 + h_3$
 - c) 3
 - d) all of the mentioned
- 7) Find the value of $h[n] * \delta [n - 1]$, $\delta[n]$ being the Delta function.
 - a) $h[n - 2]$
 - b) $h[n]$
 - c) $h[n - 1]$
 - d) $h[n + 1]$
- 8) Does the system $h(t) = \exp(-7t)$ correspond to a stable system?
 - a) Yes
 - b) No
 - c) Marginally Stable
 - d) No one of the above
- 9) All energy signals will have an average power.
 - a) Infinite
 - b) Zero
 - c) Positive
 - d) Cannot be calculated

- 10) The even part of a signal $x(t)$ is:
- a) $x(t) + x(-t)$
 - b) $x(t) - x(-t)$
 - c) $(1/2) * (x(t) + x(-t))$
 - d) $(1/2) * (x(t) - x(-t))$
- 11) If sequence $y(n) = x(-n)$ then it is _____.
- a) Causal
 - b) Non-Causal
 - c) Depends on $x(-n)$
 - d) None
- 12) The function $\delta(t - b)$ is _____.
- a) An impulse function
 - b) A step function originating at $t = b$
 - c) An impulse function originating at $t = b$
 - d) no one of the above
- 13) If $x(z) = \{1, 2, 1, 2, 3\}$ ROC is _____.
- ↑
- a) Entire z - plane
 - b) Entire z -plane except $z = \infty$
 - c) Entire z -plane except $z = 0, z = \infty$
 - d) Entire z -plane except $z = 0$
- 14) The ROC must be _____.
- a) Divided region
 - b) Connected region
 - c) Partly connected & partly divided
 - d) None

Seat
No.

Fourth Y. (B Tech) (Sem-I) (New) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING
Signals and System (BTN07702)

Day & Date: Thursday, 16-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
 2) Figures to the right indicate full marks.

Section – I

Q.2 Answer any four of the following.

16

- a) Define the terms w.r.t. signals.
 i) Even signal, Odd signal
 ii) Energy signal, Power signal
 iii) Causal and Non-causal signal
- b) Determine the energy and power of the signal.
 $X(n) = (0.5)^n \cdot u(n)$
- c) Explain elementary signal.
 i) Unit step
 ii) Unit Impulse
 iii) Unit Ramp
- d) Derive the expression for even & odd components of a CT signal.
- e) Check the following property of signal.
 i) Stable, unstable
 ii) Invertible, Non-Invertible
 If, $Y(t) = x(t) + x(t + 3)$

Q.3 Attempt any Two of the following.

12

- a) Find the convolution of two signal as shown in below.

- b) Explain properties of CT-LTI system.
- c) A DT sequence $X[n]$ is shown below; sketch and label the following signals.
 i) $X[n + 2]$ ii) $X[n - 4]$ iii) $X[2n]$

Section – II

Q.4 Attempt Any Four of the following:**16**

- a) Find the Z-Transform and ROC of given signal.
 $x(n) = a^n \cdot u(n)$
- b) Determine the discrete time signal $x(n)$ whose Fourier transform is,
$$X(e^{j\omega}) = \begin{cases} 1, & -\omega_c < \omega < \omega_c \\ 0 & -\omega_c < |\omega| < \pi \end{cases}$$
- c) Explain the time scaling property of Fourier transform and hence find the Fourier transform of $f(t) = e^{-0.5t} u(t)$
- d) Explain the Continuous time Fourier series for a periodic signal.
- e) Explain Complex exponential Fourier series.

Q.5 Attempt Any Two of the following.**12**

- a) State the properties of Z-Transform and explain any two.
- b) Compute 8-point DFT of sequence using DIF FFT algorithm
 $x(n) = 1$ for $0 < n < 7$
 $= 0$ otherwise
- c) List properties of DFT and explain any two.

ELECTRICAL ENGINEERING
Signals and System (BTN07702)

Day & Date: Thursday, 16-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no. 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.
 4) Assume data wherever necessary

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) The even part of a signal $x(t)$ is:

a) $x(t) + x(-t)$	b) $x(t) - x(-t)$
c) $(1/2) * (x(t) + x(-t))$	d) $(1/2) * (x(t) - x(-t))$
- 2) If sequence $y(n) = x(-n)$ then it is _____.

a) Causal	b) Non-Causal
c) Depends on $x(-n)$	d) None
- 3) The function $\delta(t - b)$ is _____.

a) An impulse function
b) A step function originating at $t = b$
c) An impulse function originating at $t = b$
d) no one of the above
- 4) If $x(z) = \{1, 2, 1, 2, 3\}$ ROC is _____.

↑
a) Entire z- plane
b) Entire z-plane except $z = \infty$
c) Entire z-plane except $z = 0, z = \infty$
d) Entire z-plane except $z = 0$
- 5) The ROC must be _____.

a) Divided region
b) Connected region
c) Partly connected & partly divided
d) None
- 6) In DIF FFT algorithm input sequence is _____.

a) In natural order	b) bit reversed order
c) in ascending order	d) descending order
- 7) In DIT FFT algorithm, the number of complex multiplications is given by _____.

a) $N \log_2 (N/2)$	b) $N \log_2 (N/3)$
c) $(N/2) \log_2 N$	d) $N \log_2 (N)$

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) The most efficient torque producing actuating structure for the induction type relays is _____.
 - a) Shaded pole structure
 - b) Watt hour meter structure
 - c) Induction cup structure
 - d) Single induction loop structure
- 2) Discrimination between main and back up protection is provided by the use of relays which are _____.
 - a) Fast
 - b) Sensitive
 - c) Slow
 - d) None of the above
- 3) Protection by fuses is generally not used beyond _____.
 - a) 20 A
 - b) 50 A
 - c) 100 A
 - d) 200 A
- 4) By which of the following methods major portion of the heat generated in a H.R.C. fuse is dissipated?
 - a) Radiation
 - b) Convection
 - c) Conduction
 - d) All of the above
- 5) The fuse rating is expressed in terms of _____.
 - a) Current
 - b) Voltage
 - c) VAR
 - d) KVA
- 6) Admittance relay is:
 - a) Non-directional relay
 - b) Directional relay
 - c) Differential relay
 - d) All of the above
- 7) For ground fault, which of the relay is preferred:
 - a) Plain impedance relay
 - b) Directional relay
 - c) Reactance relay
 - d) Overcurrent relay
- 8) For which of the following protection from negative sequence currents is provided?
 - a) Generators
 - b) Motors
 - c) Transmission line
 - d) Transformers

- 9) To limit short-circuit current in a power system are used.
- a) Earth wires
 - b) Isolators
 - c) H.R.C. fuses
 - d) Reactors
- 10) Series reactors should have _____.
- a) Low resistance
 - b) High resistance
 - c) Low impedance
 - d) High impedance
- 11) Why the resistance switching is used in air blast circuit breaker?
- a) Reduce the magnitude of fault current.
 - b) Control the CB operating time.
 - c) Damp out the fast transient.
 - d) Change the fault current power factor.
- 12) Why is it difficult to interrupt a capacitive circuit?
- a) The current has a leading power factor.
 - b) The restriking voltage can be high.
 - c) Current magnitude is very small.
 - d) Stored energy in the capacitor is very high.
- 13) What is the main purpose of oil in oil circuit breakers?
- a) Provide insulation
 - b) Quenching arc.
 - c) Provide cooling of contacts
 - d) None of the above
- 14) The protection against over-voltage due to lightening is provided by _____.
- a) Use of surge diverters
 - b) Low tower footing resistance
 - c) Use of overhead ground wires
 - d) Any of the above

Section – I

- Q.2 Solve any FOUR. 16**
- a) What do you mean by zones of protection? Explain primary and backup protection.
 - b) Define the following
 - i) Pick up current
 - ii) Fusing factor
 - iii) Plug setting Multiplier
 - iv) Cut-off current
 - c) Explain how reactance relay is used for distance protection with its characteristics.
 - d) What are the factors affecting for selection of fuse?
 - e) Explain microprocessor based overcurrent relay with block diagram.
 - f) Explain simple differential relay with neat diagram.
- Q.3 Solve any TWO. 12**
- a) Derive torque equation for induction relay in detail.
 - b) Explain in brief PSM and TSM in detail.
 - c) Describe microprocessor based reactance relay with block diagram with its flow chart in detail.

Section – II

- Q.4 Solve any FOUR. 16**
- a) Explain differential protection scheme used for transformer.
 - b) Explain the phenomenon of capacitive current interruption with suitable waveforms.
 - c) Briefly describe MCB and MCCB.
 - d) With neat sketch explain metal oxide ZnO arrestors.
 - e) Explain different methods of testing of circuit breaker.
 - f) Explain protection of induction motor for different faults.
- Q.5 Solve any TWO. 12**
- a) With suitable diagram explain construction & operation of SF6 circuit breaker. Also state its advantages and disadvantages.
 - b) Explain protection of generator against motoring and excitation failure.
 - c) What is the phenomenon of arcing in circuit breaker? Explain the methods of arc extinction in detail.

a) Provide insulation	b) Quenching arc.
c) Provide cooling of contacts	d) None of the above

- 9) The protection against over-voltage due to lightning is provided by _____.
a) Use of surge diverters b) Low tower footing resistance
c) Use of overhead ground wires d) Any of the above
- 10) The most efficient torque producing actuating structure for the induction type relays is _____.
a) Shaded pole structure
b) Watt hour meter structure
c) Induction cup structure
d) Single induction loop structure
- 11) Discrimination between main and back up protection is provided by the use of relays which are _____.
a) Fast b) Sensitive
c) Slow d) None of the above
- 12) Protection by fuses is generally not used beyond _____.
a) 20 A b) 50 A
c) 100 A d) 200 A
- 13) By which of the following methods major portion of the heat generated in a H.R.C. fuse is dissipated?
a) Radiation b) Convection
c) Conduction d) All of the above
- 14) The fuse rating is expressed in terms of _____.
a) Current b) Voltage
c) VAR d) KVA

Set S

Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING
Switchgear and Protection (BTN07703)

Day & Date: Friday, 17-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicates full marks.

Section – I

- Q.2 Solve any FOUR. 16**
- a) What do you mean by zones of protection? Explain primary and backup protection.
 - b) Define the following
 - i) Pick up current
 - ii) Fusing factor
 - iii) Plug setting Multiplier
 - iv) Cut-off current
 - c) Explain how reactance relay is used for distance protection with its characteristics.
 - d) What are the factors affecting for selection of fuse?
 - e) Explain microprocessor based overcurrent relay with block diagram.
 - f) Explain simple differential relay with neat diagram.
- Q.3 Solve any TWO. 12**
- a) Derive torque equation for induction relay in detail.
 - b) Explain in brief PSM and TSM in detail.
 - c) Describe microprocessor based reactance relay with block diagram with its flow chart in detail.

Section – II

- Q.4 Solve any FOUR. 16**
- a) Explain differential protection scheme used for transformer.
 - b) Explain the phenomenon of capacitive current interruption with suitable waveforms.
 - c) Briefly describe MCB and MCCB.
 - d) With neat sketch explain metal oxide ZnO arrestors.
 - * e) Explain different methods of testing of circuit breaker.
 - f) Explain protection of induction motor for different faults.
- Q.5 Solve any TWO. 12**
- a) With suitable diagram explain construction & operation of SF6 circuit breaker. Also state its advantages and disadvantages.
 - b) Explain protection of generator against motoring and excitation failure.
 - c) What is the phenomenon of arcing in circuit breaker? Explain the methods of arc extinction in detail.

- 7) Formative time lag depends on the mechanism of the avalanche growth in gap the formative time lag is usually _____.
a) Much shorter than the statistical time lag
b) Much greater than the statistical time lag
c) Equal to the statistical time lag
d) None of these
- 8) The necessary condition for performing sphere gap test is _____.
a) Should be between 0.7 and 0.8?
b) The length of gap should be smaller than radius of sphere
c) The length of gap should be 4 times greater than radius of sphere
d) An impulse wave of 50000 kV should be applied Wave front time
- 9) Impulse testing of transformers is done using _____.
a) Full wave standard impulse
b) Chopped wave standard impulse
c) Half wave standard impulse
d) only (a) and (b)
- 10) In routine test, the cable is tested by applying an ac voltage _____.
a) 2 times the rated value b) 2.5 times the rated value
c) 3 times the rated value d) 3.5 times the rated value
- 11) A generating voltmeter is used to measure a.c. voltages if the angular frequency of voltage is _____.
a) Half the angular frequency of motor used
b) Twice the angular frequency of motor used
c) Thrice the angular frequency of the motor used
d) None of the above
- 12) Protective resistance to be connected between the sphere gap and the test equipment is required while measuring _____.
a) power frequency and higher frequency a.c. voltage
b) power frequency and impulse voltage
c) higher frequency a.c. voltages and impulse voltage
d) all kinds of voltages
- 13) For the measurement of radio interference voltages, the detector circuit is provided with a measuring device to measure:
a) Quasi-peak value b) Peak value
c) Average value d) All of the above
- 14) High frequency and impulse currents are measured using _____.
a) Resistive shunts
b) Inductive elements
c) Hall and Faraday effect devices
d) All of the above

Seat No.

Fourth. Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING
High Voltage Engineering (BTN07706)

Day & Date: Saturday, 18-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

- Q.2 Attempt any four of the following. 16**
- a) Explain estimation and control of electric stresses.
 - b) Explain post breakdown phenomena in gases along with glow arc discharge from neat drawn figure.
 - c) Write a short note on conduction and breakdown in commercial liquids.
 - d) Explain surge voltages and their distribution.
 - e) Explain practical considerations in using gases for insulation purposes.
- Q.3 Attempt any two of the following. 12**
- a) Explain post breakdown phenomena and applications.
 - b) State and derive Paschen's law and equation along with Explanations of V and Pd.
 - c) Write short on breakdown in solid dielectrics due to treeing and tracking

Section – II

- Q.4 Attempt any four of the following. 16**
- a) Explain cockroft - walton multiplier.
 - b) Explain briefly various tests to be carried out on a bushing.
 - c) Explain components of multistage impulse generator.
 - d) Explain resonant transformer its principle and operation.
 - e) Write a short note on grounding of impulse testing laboratories.
- Q.5 Attempt any two of the following. 12**
- a) Explain Generating voltmeter and Capacitance voltage Transformer.
 - b) Discuss various methods of measuring high d.c. and a.c. currents
 - c) Discuss the Test facilities, activity and studies in high voltage laboratories.

Seat No.

Fourth. Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING
High Voltage Engineering (BTN07706)

Day & Date: Saturday, 18-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the given options. 14

- 1) The necessary condition for performing sphere gap test is _____.
 - a) Should be between 0.7 and 0.8?
 - b) The length of gap should be smaller than radius of sphere
 - c) The length of gap should be 4 times greater than radius of sphere
 - d) An impulse wave of 50000 kV should be applied Wave front time
- 2) Impulse testing of transformers is done using _____.
 - a) Full wave standard impulse
 - b) Chopped wave standard impulse
 - c) Half wave standard impulse
 - d) only (a) and (b)
- 3) In routine test, the cable is tested by applying an ac voltage _____.

a) 2 times the rated value	b) 2.5 times the rated value
c) 3 times the rated value	d) 3.5 times the rated value
- 4) A generating voltmeter is used to measure a.c. voltages if the angular frequency of voltage is _____.
 - a) Half the angular frequency of motor used
 - b) Twice the angular frequency of motor used
 - c) Thrice the angular frequency of the motor used
 - d) None of the above
- 5) Protective resistance to be connected between the sphere gap and the test equipment is required while measuring _____.
 - a) power frequency and higher frequency a.c. voltage
 - b) power frequency and impulse voltage
 - c) higher frequency a.c. voltages and impulse voltage
 - d) all kinds of voltages
- 6) For the measurement of radio interference voltages, the detector circuit is provided with a measuring device to measure:

a) Quasi-peak value	b) Peak value
c) Average value	d) All of the above

- 7) High frequency and impulse currents are measured using _____.
- Resistive shunts
 - Inductive elements
 - Hall and Faraday effect devices
 - All of the above
- 8) The accepted value of dielectric strength of transformer oil is _____.
- 30 kV
 - 30 kV/cm
 - 30 kV/cm for one min.
 - None of the above
- 9) The conventional direction of electric field is _____.
- Positive to negative
 - Negative to positive
 - No specific direction
 - Direction cannot be determined
- 10) The requirement of gases for insulation purpose is _____.
- High dielectric strength and thermal stability
 - High dielectric strength only
 - High thermal stability only
 - None of the above
- 11) During reconditioning of transformer oil it is economical to use electrostatic filters if the water content of oil is _____.
- greater than 4 ppm
 - greater than 2 ppm
 - less than 2 ppm
 - electrostatic filters are never used
- 12) The intrinsic breakdown strength of solid dielectrics is about _____.
- 50 to 100 kV/mm
 - 500 to 1000 kV/mm
 - 5 to 10 kV/mm
 - 1 to 5 kV/mm
- 13) While conducting intrinsic dielectric strength on a specimen, its shape should be so prepared that _____.
- the electric stress is high at its centre
 - the electric stress is high at its corner
 - the electric stress is same all along the samples
 - No definite consideration
- 14) Formative time lag depends on the mechanism of the avalanche growth in gap the formative time lag is usually _____.
- Much shorter than the statistical time lag
 - Much greater than the statistical time lag
 - Equal to the statistical time lag
 - None of these

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the given options.

14

- 1) A generating voltmeter is used to measure a.c. voltages if the angular frequency of voltage is _____.
 - a) Half the angular frequency of motor used
 - b) Twice the angular frequency of motor used
 - c) Thrice the angular frequency of the motor used
 - d) None of the above
- 2) Protective resistance to be connected between the sphere gap and the test equipment is required while measuring _____.
 - a) power frequency and higher frequency a.c. voltage
 - b) power frequency and impulse voltage
 - c) higher frequency a.c. voltages and impulse voltage
 - d) all kinds of voltages
- 3) For the measurement of radio interference voltages, the detector circuit is provided with a measuring device to measure:

a) Quasi-peak value	b) Peak value
c) Average value	d) All of the above
- 4) High frequency and impulse currents are measured using _____.
 - a) Resistive shunts
 - b) Inductive elements
 - c) Hall and Faraday effect devices
 - d) All of the above
- 5) The accepted value of dielectric strength of transformer oil is _____.

a) 30 kV	b) 30 kV/cm
c) 30 kV/cm for one min.	d) None of the above
- 6) The conventional direction of electric field is _____.
 - a) Positive to negative
 - b) Negative to positive
 - c) No specific direction
 - d) Direction cannot be determined

- 7) The requirement of gases for insulation purpose is _____.
a) High dielectric strength and thermal stability
b) High dielectric strength only
c) High thermal stability only
d) None of the above
- 8) During reconditioning of transformer oil it is economical to use electrostatic filters if the water content of oil is _____.
a) greater than 4 ppm
b) greater than 2 ppm
c) less than 2 ppm
d) electrostatic filters are never used

Power System and Operation Control (BTN07707)

Day & Date: Saturday, 18-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) Incremental cost is defined as _____.
 - a) The rate of change of fuel cost with active power generation
 - b) The rate of change of running cost with active power generation
 - c) The rate of change of production cost with active power generation
 - d) The rate of change of fixed cost with active power generation
- 2) The units for heat rate are _____.
 - a) Kcal/KWh
 - b) KWh/kcal
 - c) Kcal/hour
 - d) KW
- 3) In dynamic programming method the cost function $F_N(X)$ represents _____.
 - a) Minimum Cost in Rs/hr of N MW by X number of unit
 - b) Minimum Cost in Rs/hr of X MW by N number of unit
 - c) Minimum Cost in Rs/hr of N MW by X^{th} unit
 - d) Minimum Cost in Rs/hr of X MW by N^{th} unit
- 4) The most efficient unit is loaded first then the less efficient unit follow, is called _____.
 - a) Priority ordering
 - b) Dynamic Programming
 - c) Patton's Security
 - d) None of these
- 5) In central AGC of a given control area, the change in frequency _____.
 - a) Volume control error
 - b) Area control error
 - c) Nonlinear control error
 - d) Optimal control error
- 6) Which of the VAR compensators can be used for both heavy and light load conditions?
 - a) SVC
 - b) Shunt Reactor
 - c) Shunt reactor
 - d) Series Capacitor
- 7) A security analysis program uses _____.
 - a) AC load flow
 - b) DC load flow
 - c) Both AC and DCload flow
 - d) None

**Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING**

Power System and Operation Control (BTN07707)

Day & Date: Saturday, 18-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any four questions.

16

- a) Explain with a mathematical formulation, optimum generation allocation without transmission losses.
b) Explain the different thermal unit constrains.
c) The incremental cost characteristics of two generators delivering 200 MW are as follows:

$$\frac{dF_1}{dP_1} = 0.1P_1 + 20Rs/MWhr$$

$$\frac{dF_2}{dP_2} = 0.2P_2 + 16Rs/MWhr$$

Find Out P1 and P2 for economic operation.

- d) What is mean by spinning reserve?
e) Explain speed governing system with neat sketch.

Q.3 Solve any two questions.

12

- a) What are methods of unit commitment? With a suitable example explain any one method of unit commitment.
b) The fuel input per hour of plant 1 & plant 2 are given as follows:

$$F_1 = 0.2P_1^2 + 40P_1 + 120 \text{ Rs/hr}$$

$$F_2 = 0.25P_2^2 + 30P_2 + 150 \text{ Rs/hr}$$

Determine the economic operating schedule and corresponding cost of generation if the maximum & minimum loading on each unit is 100MW & 25MW. The shared by both units demand is 180MW and transmission losses neglected. If load is equally shared by both units, determine saving obtained by loading the units as per equal incremental production cost.

- c) Explain with illustrative transfer function of the load frequency control of two area system. Draw the block diagram for single area system

Section – II

Q.4 Solve any four questions.

16

- a) Explain system state classification with neat diagram.
b) Explain the different methods of improving voltage stability.
c) Explain specifications of load compensator.
d) Explain the difference between voltage angle and voltage stability.
e) Explain the necessity of reactive power compensation.

Q.5 Solve any two questions.

- a) Write the advantages and dis-advantages of different types of compensating equipment for transmission system.
- b) Explain the necessity of power system security.
- c) Explain effective counter measures to prevent voltage instability & methods of improving voltage stability.

- 10) In dynamic programming method the cost function $F_N(X)$ represents _____.
a) Minimum Cost in Rs/hr of N MW by X number of unit
b) Minimum Cost in Rs/hr of X MW by N number of unit
c) Minimum Cost in Rs/hr of N MW by X^{th} unit
d) Minimum Cost in Rs/hr of X MW by N^{th} unit
- 11) The most efficient unit is loaded first then the less efficient unit follow, is called _____.
a) Priority ordering
b) Dynamic Programming
c) Patton's Security
d) None of these
- 12) In central AGC of a given control area, the change in frequency _____.
a) Volume control error
b) Area control error
c) Nonlinear control error
d) Optimal control error
- 13) Which of the VAR compensators can be used for both heavy and light load conditions?
a) SVC
b) Shunt Reactor
c) Shunt reactor

Set **Q**

**Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING**

Power System and Operation Control (BTN07707)

Day & Date: Saturday, 18-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any four questions.

16

- Explain with a mathematical formulation, optimum generation allocation without transmission losses.
- Explain the different thermal unit constrains.
- The incremental cost characteristics of two generators delivering 200 MW are as follows:

$$\frac{dF_1}{dP_1} = 0.1P_1 + 20Rs/MWhr$$

$$\frac{dF_2}{dP_2} = 0.2P_2 + 16Rs/MWhr$$

Find Out P1 and P2 for economic operation.

- What is mean by spinning reserve?
- Explain speed governing system with neat sketch.

Q.3 Solve any two questions.

12

- What are methods of unit commitment? With a suitable example explain any one method of unit commitment.
- The fuel input per hour of plant 1 & plant 2 are given as follows:

$$F_1 = 0.2P_1^2 + 40P_1 + 120 \text{ Rs/hr}$$

$$F_2 = 0.25P_2^2 + 30P_2 + 150 \text{ Rs/hr}$$

Determine the economic operating schedule and corresponding cost of generation if the maximum & minimum loading on each unit is 100MW & 25MW. The shared by both units demand is 180MW and transmission losses neglected. If load is equally shared by both units, determine saving obtained by loading the units as per equal incremental production cost.

- Explain with illustrative transfer function of the load frequency control of two area system. Draw the block diagram for single area system

Section – II

Q.4 Solve any four questions.

16

- Explain system state classification with neat diagram.
- Explain the different methods of improving voltage stability.
- Explain specifications of load compensator.
- Explain the difference between voltage angle and voltage stability.
- Explain the necessity of reactive power compensation.

Q.5 Solve any two questions.

- a) Write the advantages and dis-advantages of different types of compensating equipment for transmission system.
- b) Explain the necessity of power system security.
- c) Explain effective counter measures to prevent voltage instability & methods of improving voltage stability.

Seat No.

Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING
Power System and Operation Control (BTN07707)

Day & Date: Saturday, 18-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) Security assessment involves _____.
 - a) System monitoring
 - b) Contingency analysis
 - c) Both of above
 - d) Not divided
- 2) Thermal unit constraint considered in unit commitment problem is _____.
 - a) Minimum up-down time
 - b) Crew constraint
 - c) Start up cost
 - d) All of these
- 3) Power balance equation is _____ constraint.
 - a) Equality
 - b) Inequality
 - c) Security
 - d) Branch transfer capacity
- 4) The penalty factor _____.
 - a) Is always less than 1
 - b) Is always more than 1
 - c) May be more or less than 1
 - d) Is equal to or less than 1
- 5) Incremental cost is defined as _____.
 - a) The rate of change of fuel cost with active power generation
 - b) The rate of change of running cost with active power generation
 - c) The rate of change of production cost with active power generation
 - d) The rate of change of fixed cost with active power generation
- 6) The units for heat rate are _____.
 - a) Kcal/KWh
 - b) KWh/kcal
 - c) Kcal/hour
 - d) KW
- 7) In dynamic programming method the cost function $F_N(X)$ represents _____.
 - a) Minimum Cost in Rs/hr of N MW by X number of unit
 - b) Minimum Cost in Rs/hr of X MW by N number of unit
 - c) Minimum Cost in Rs/hr of N MW by X^{th} unit
 - d) Minimum Cost in Rs/hr of X MW by N^{th} unit
- 8) The most efficient unit is loaded first then the less efficient unit follow, is called _____.
 - a) Priority ordering
 - b) Dynamic Programming
 - c) Patton's Security
 - d) None of these

- 9) In central AGC of a given control area, the change in frequency ____.
- a) Volume control error b) Area control error
c) Nonlinear control error d) Optimal control error
- 10) Which of the VAR compensators can be used for both heavy and light load conditions?
- a) SVC b) Shunt Reactor
c) Shunt reactor d) Series Capacitor
- 11) A security analysis program uses ____.
- a) AC load flow b) DC load flow
c) Both AC and DC load flow d) None
- 12) Power system static security level are ____.
- a) 4 b) 5
c) 6 d) 2
- 13) Voltage stability problem normally occurs ____.
- a) Heavily stressed system b) Medium stressed system
c) Low stressed system d) None of these
- 14) Voltage stability is basically ____.
- a) Generator stability b) Load stability
c) Transformer stability d) None

2) Figures to the right indicate full marks.

Section – I

- Q.2 Solve any four. 16**
- a) Explain the definition and basics of PLC.
 - b) What is ladder diagram? How it is different than the normal circuit diagram?
 - c) Explain Solid State Memory.
 - d) Write a short note on PLC input and output model.
 - e) Explain advantages and disadvantages of PLC.
- Q.3 Solve any Two. 12**
- a) Explain input on/off Switching devices & analog input devices.
 - b) Explain the Boolean logic and relay logic and analysis of rungs.
 - c) Explain Power Supplies in PLC also explain selection criteria for PLC.

Section – II

- Q.4 Solve any four. 16**
- a) Explain the definition and basics of SCADA.
 - b) Explain SCADA Configuration and Energy management system.
 - c) Explain the overview of Open Systems Interconnections.
 - d) Explain Profibus Protocol System.
 - e) Explain desirable properties of SCADA System.
- Q.5 Solve any Two. 12**
- a) Write the security implementation of the SCADA protocols.
 - b) Explain seven layers of OSI model and their functions. Compare OSI Model with TCP/IP Model.
 - c) Explain how SCADA system is used in electric power generation.

- 9) The standard form of MMI is _____.
a) Main Machine Interface b) Master Machine Interface
c) Man Machine Interface d) None of the above
- 10) In modular type PLC, the PLC's are classified into _____.
a) Relay output PLC b) Transistor output PLC
c) Triac output PLC d) All of the above
- 11) The programmable logic controllers are used in _____.
a) Manufacturing b) Automation
c) Both a and b d) None of the above
- 12) What are the components that make the programmable logic controller work?
a) Input and output module b) CPU
c) Power supply d) All of the above
- 13) How many levels does complex SCADA system have?
a) One b) Two
c) Three d) Four
- 14) In fixed programmable logic controller _____.
a) Input is fixed b) Output is fixed
c) Both a and b d) None of the above

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the given options. 14

- 1) The current generation of SCADA uses _____ architecture.

a) Networked	b) Monolithic
c) Distributed	d) All of the above

- 2) PLCs are designed for use in the control of a wide variety of manufacturing machines and systems _____.

a) Special-Purpose Industrial Computers
b) Personal computers
c) Electromechanical systems
d) All of the above

- 3) Data Collection and Data Transfer is the function of _____.

a) SCADA software	b) SCADA hardware
c) a) and b)	d) None of the above

- 4) _____ who monitor the SCADA system and perform supervisory control functions for the remote plant.

a) Operator	b) MTU
c) RTU	d) Communications

- 5) The visual programming language is also called as _____.

a) Relay Logic	b) Ladder Logic
c) Control Logic	d) None

- 6) The standard form of MMI is _____.

a) Main Machine Interface	b) Master Machine Interface
c) Man Machine Interface	d) None of the above

- 7) In modular type PLC, the PLC's are classified into _____.

a) Relay output PLC	b) Transistor output PLC
c) Triac output PLC	d) All of the above

- 8) The programmable logic controllers are used in _____.

a) Manufacturing	b) Automation
c) Both a and b	d) None of the above

- 9) What are the components that make the programmable logic controller work?
- a) Input and output module
 - b) CPU
 - c) Power supply
 - d) All of the above
- 10) How many levels does complex SCADA system have?
- a) One

Neural Networks & Fuzzy Logic Control (BTN07710)

Day & Date: Saturday, 18-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.
4) Consider data when, if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct answer**14**

- 1) What is auto association task in neural networks?
 - a) predicting the future inputs
 - b) related to storage & recall task
 - c) find relation between 2 consecutive inputs
 - d) All of the above
- 2) $A \cup (A \cap B) = A$ represents _____

a) Law of excluded middle	b) Law of absorption
c) Demorgans law	d) Law of contradiction
- 3) What is the purpose of the membership function in a fuzzy control system?
 - a) To define the shape and boundaries of fuzzy sets.
 - b) To calculate the centroid of the fuzzy set.
 - c) To determine the output of the control system.
 - d) To establish the rules for fuzzy inference.
- 4) Positive sign of weight indicates?
 - a) excitatory input
 - b) inhibitory input
 - c) can be either excitatory or inhibitory as such
 - d) none of the mentioned
- 5) What is true regarding backpropagation rule?
 - a) it is also called generalized delta rule
 - b) error in output is propagated backwards only to determine weight updates
 - c) there is no feedback of signal at any stage
 - d) all of the mentioned
- 6) Heteroassociative memory is also known as _____
 - a) unidirectional memory
 - b) bidirectional memory
 - c) multidirectional associative memory
 - d) temporal associative memory

- 7) What consist of Boltzmann machine?
a) Fully connected network with both hidden and visible units
b) Asynchronous operation
c) Stochastic update
d) All of the mentioned
- 8) What is the nature of general feedback given in competitive neural networks?
a) Self excitatory
b) Self inhibitory
c) Self excitatory or self inhibitory
d) None of the mentioned
- 9) In Hopfield network with symmetric weights, energy at each state may?
a) increase
b) decrease
c) decrease or remain same
d) decrease or increase
- 10) Which of the following is perceptron?
a) A neural network that contains feedback
b) An auto-associative neural network
c) A double layer auto-associative neural network
d) A single layer feed-forward neural network with pre-processing
- 11) Which of the following is true for neural networks?
a) It has a set of nodes and connections
b) Each node computes its weighted input
c) A node could be in an excited state or non-excited state
d) All of these
- 12) The output at each node is called _____.
a) Node value
b) Weight
c) Neurons
d) Axons
- 13) Fuzzy logic is usually represented as _____.
a) IF-THEN-ELSE rules
b) IF-THEN rules
c) Both IF-THEN-ELSE rules & IF-THEN rules
d) None of the mentioned
- 14) Fuzzy Logic can be implemented in?
a) Hardware
b) Software
c) Both a and b
d) None of above

**Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING**

Neural Networks & Fuzzy Logic Control (BTN07710)

Day & Date: Saturday, 18-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicates full marks.
3) Consider data whenever necessary.

Section – I

- Q.2 Attempt the following (Any Four) 16**
- a) Describe Fuzzy set theory.
 - b) Compare & contrast the difference between biological neuron & artificial neural network.
 - c) Differentiate between fuzzy sets and crisp sets.
 - d) State & Prove perceptron convergence theorem.
 - e) Explain in detail any application of neural network.
- Q.3 Attempt the following (Any Two) 12**
- a) Explain the working of a Hopfield network with a neat sketch of its architecture.
 - b) Explain Bidirectional associative memory in detail.
 - c) Explain in detail about Hetero-Associative memory & Auto-Associative memory.

Section – II

- Q.4 Attempt the following (Any Four) 16**
- a) Explain application and analysis of ART1 & ART2.
 - b) Differentiate fuzzy and neural systems.
 - c) Draw and explain basic architecture of adaptive resonance theory.
 - d) Explain briefly the back propagation technique.
 - e) Explain Neocognitron in neural network in detail.
- Q.5 Attempt the following (Any Two) 12**
- a) What is associative memory? Explain associative memory with example.
 - b) What are counter propagation networks (CPN)? Explain any one application.
 - c) Explain fuzzy system architecture.

Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING

Neural Networks & Fuzzy Logic Control (BTN07710)

Day & Date: Saturday, 18-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicate full marks.
 4) Consider data when, if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct answer**14**

- 1) What is the nature of general feedback given in competitive neural networks?
 - a) Self excitatory
 - b) Self inhibitory
 - c) Self excitatory or self inhibitory
 - d) None of the mentioned
- 2) In Hopfield network with symmetric weights, energy at each state may?
 - a) increase
 - b) decrease
 - c) decrease or remain same
 - d) decrease or increase
- 3) Which of the following is perceptron?
 - a) A neural network that contains feedback
 - b) An auto-associative neural network
 - c) A double layer auto-associative neural network
 - d) A single layer feed-forward neural network with pre-processing
- 4) Which of the following is true for neural networks?
 - a) It has a set of nodes and connections
 - b) Each node computes its weighted input
 - c) A node could be in an excited state or non-excited state
 - d) All of these
- 5) The output at each node is called _____.
 - a) Node value
 - b) Weight
 - c) Neurons
 - d) Axons
- 6) Fuzzy logic is usually represented as _____.
 - a) IF-THEN-ELSE rules
 - b) IF-THEN rules
 - c) Both IF-THEN-ELSE rules & IF-THEN rules
 - d) None of the mentioned
- 7) Fuzzy Logic can be implemented in?
 - a) Hardware
 - b) Software
 - c) Both a and b
 - d) None of above

- 8) What is auto association task in neural networks?
- predicting the future inputs
 - related to storage & recall task
 - find relation between 2 consecutive inputs
 - All of the above
- 9) $A \cup (A \cap B) = A$ represents _____
- Law of excluded middle
 - Law of absorption
 - Demorgans law
 - Law of contradiction
- 10) What is the purpose of the membership function in a fuzzy control system?
- To define the shape and boundaries of fuzzy sets.
 - To calculate the centroid of the fuzzy set.
 - To determine the output of the control system.
 - To establish the rules for fuzzy inference.
- 11) Positive sign of weight indicates?
- excitatory input
 - inhibitory input
 - can be either excitatory or inhibitory as such
 - none of the mentioned
- 12) What is true regarding backpropagation rule?
- it is also called generalized delta rule
 - error in output is propagated backwards only to determine weight updates
 - there is no feedback of signal at any stage
 - all of the mentioned
- 13) Heteroassociative memory is also known as _____
- unidirectional memory
 - bidirectional memory
 - multidirectional associative memory
 - temporal associative memory
- 14) What consist of Boltzmann machine?
- Fully connected network with both hidden and visible units
 - Asynchronous operation
 - Stochastic update
 - All of the mentioned

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) WAMS is _____.
 - a) Wide area Automation and Management System
 - b) Wide Area Measurement System
 - c) Wide Area Management System
 - d) West Automatic Management System
- 2) The main responsibility of Application layer in TCP/IP protocol architecture is _____.
 - a) Routing packets from source to destination across multiple layers
 - b) Allow users to access network resources
 - c) Transmits raw bits as signals between nodes
 - d) Provides reliable and application independent process to process delivery of Messages
- 3) Power quality is the ability of a system _____.
 - a) To operate causing disturbance or damage to loads and components
 - b) To operate without causing disturbance or damage to loads and components
 - c) To lose synchronism of the synchronous machines
 - d) None of the above
- 4) Which statement from the following is not true for OMS?
 - a) Prediction of location of transformer, fused, recloses or breaker that opened upon failure
 - b) Prioritizing restoration efforts and managing resources based upon criteria such as locations of emergency facilities, size of outages, and duration of outages.
 - c) Providing information on extent of outages and number of customers impacted to management, media and regulators.
 - d) It is a networking system using mesh topology to interact with consumers and utilities.

- 5) _____ supply the required data for the smart grid which helps the grid in providing an automated response.
- a) Smart meters
 - b) Sensors
 - c) Actuators
 - d) PLC
- 6) Power quality is a major concern because of the _____.
- a) Sensitivity of digital and modem control equipment to distortion/PQ deterioration
 - b) It does not cause disturbance or damage to loads and components
 - c) Synchronous machines operate in synchronism
 - d) Bus voltages are maintained
- 7) Which of the following is not a property associated with power quality of smart grids?
- a) Self-healing
 - b) Frequency monitoring and control
 - c) Load forecasting
 - d) Asset management
- 8) Fiber optic is an example for _____.
- a) Home Area Networks
 - b) Industry Area Networks (IAN)
 - c) Wide Area Networks (WAN)
 - d) Neighborhood Area Networks
- 9) In smart grid PLM means _____.
- a) Peak Load Management
 - b) Plant Load Management
 - c) Power Leakage Management
 - d) Plant Leakage Management
- 10) The boundaries of the customer domain typically consider which type of meters _____.
- a) Energy services load
 - b) Energy services interface
 - c) Energy services demand
 - d) Wattmeter
- 11) The conversion efficiency of a photo crystalline silicon solar cell is _____.
- a) 12.5 to 15%
 - b) 11 to 14%
 - c) 10 to 13%
 - d) 9 to 12%
- 12) The following Type of inverter may not be suitable for grid connected mode?
- a) Grid feeding converters
 - b) Grid Forming converters
 - c) Grid supporting Converters
 - d) None of the above
- 13) The unit where the meter signals are collected prior to onward transmission to the Central Monitoring Station (CMS) is called _____.
- a) Data Control Unit
 - b) Data Monitoring Unit
 - c) Data Concentrator Unit
 - d) Data Processing Unit
- 14) The concept of national grid is based on maintaining _____.
- a) Demand-supply relationship
 - b) Generation-supply relationship
 - c) Demand-generation relationship
 - d) None of the above

Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING
Smart Grid Technology (BTN07721)

Day & Date: Saturday, 18-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any Four of the following. 16

- What is the need of Smart Grid? What will be the components of Smart Grid?
- What are smart energy meters? Explain its function in smart grid.
- Explain role of AMI in Smart Grid.
- What is Geographic Information System (GIS)? Explain the components of GIS.
- Explain functions of smart grid components.

Q.3 Solve any Two of the following. 12

- What is the Smart Grid? Overview of how Indian power market is organized.
- Explain EMC and its importance in smart grid.
- Explain how automatic meter reading can make the system Smarter.

Section – II

Q.4 Solve any Four of the following. 16

- Explain the concept of Power Quality and EMC in Smart Grid.
- Describe web Based Power Quality Monitoring.
- What is difference between STATCOM and DSTATCOM?
- Describe the power quality issues of grid connected renewable energy resources.
- What are the Visualization Techniques used in Smart Grid system?

Q.5 Solve any Two of the following. 12

- Explain Voltage source converters and Current source converters.
- What is distribution system state the function of the distribution system? What are the methods of energy management?
- Where are power electronic converters used? Why power electronics technology is important in the grid connected system?

Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING
Smart Grid Technology (BTN07721)

Day & Date: Saturday, 18-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any Four of the following. 16

- What is the need of Smart Grid? What will be the components of Smart Grid?
- What are smart energy meters? Explain its function in smart grid.
- Explain role of AMI in Smart Grid.
- What is Geographic Information System (GIS)? Explain the components of GIS.
- Explain functions of smart grid components.

Q.3 Solve any Two of the following. 12

- What is the Smart Grid? Overview of how Indian power market is organized.
- Explain EMC and its importance in smart grid.
- Explain how automatic meter reading can make the system Smarter.

Section – II

Q.4 Solve any Four of the following. 16

- Explain the concept of Power Quality and EMC in Smart Grid.
- Describe web Based Power Quality Monitoring.
- What is difference between STATCOM and DSTATCOM?
- Describe the power quality issues of grid connected renewable energy resources.
- What are the Visualization Techniques used in Smart Grid system?

Q.5 Solve any Two of the following. 12

- Explain Voltage source converters and Current source converters.
- What is distribution system state the function of the distribution system? What are the methods of energy management?
- Where are power electronic converters used? Why power electronics technology is important in the grid connected system?

Set **R**

Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING
Smart Grid Technology (BTN07721)

Day & Date: Saturday, 18-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No.1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) The conversion efficiency of a photo crystalline silicon solar cell is _____.
 - a) 12.5 to 15%
 - b) 11 to 14%
 - c) 10 to 13%
 - d) 9 to 12%
- 2) The following Type of inverter may not be suitable for grid connected mode?
 - a) Grid feeding converters
 - b) Grid Forming converters
 - c) Grid supporting Converters
 - d) None of the above
- 3) The unit where the meter signals are collected prior to onward transmission to the Central Monitoring Station (CMS) is called _____.
 - a) Data Control Unit
 - b) Data Monitoring Unit
 - c) Data Concentrator Unit
 - d) Data Processing Unit
- 4) The concept of national grid is based on maintaining _____.
 - a) Demand-supply relationship
 - b) Generation-supply relationship
 - c) Demand-generation relationship
 - d) None of the above
- 5) WAMS is _____.
 - a) Wide area Automation and Management System
 - b) Wide Area Measurement System
 - c) Wide Area Management System
 - d) West Automatic Management System
- 6) The main responsibility of Application layer in TCP/IP protocol architecture is _____.
 - a) Routing packets from source to destination across multiple layers
 - b) Allow users to access network resources
 - c) Transmits raw bits as signals between nodes
 - d) Provides reliable and application independent process to process delivery of Messages

- 7) Power quality is the ability of a system _____.
a) To operate causing disturbance or damage to loads and components
b) To operate without causing disturbance or damage to loads and components
c) To lose synchronism of the synchronous machines
d) None of the above
- 8) Which statement from the following is not true for OMS?
a) Prediction of location of transformer, fused, recloses or breaker that opened upon failure
b) Prioritizing restoration efforts and managing resources based upon criteria such as locations of emergency facilities, size of outages, and duration of outages.
c) Providing information on extent of outages and number of customers impacted to management, media and regulators.
d) It is a networking system using mesh topology to interact with consumers and utilities.
- 9) _____ supply the required data for the smart grid which helps the grid in providing an automated response.
a) Smart meters
b) Sensors
c) Actuators
d) PLC
- 10) Power quality is a major concern because of the _____.
a) Sensitivity of digital and modem control equipment to distortion/PQ deterioration
b) It does not cause disturbance or damage to loads and components
c) Synchronous machines operate in synchronism
d) Bus voltages are maintained
- 11) Which of the following is not a property associated with power quality of smart grids?
a) Self-healing
b) Frequency monitoring and control
c) Load forecasting
d) Asset management
- 12) Fiber optic is an example for _____.
a) Home Area Networks
b) Industry Area Networks (IAN)
c) Wide Area Networks (WAN)
d) Neighborhood Area Networks
- 13) In smart grid PLM means _____.
a) Peak Load Management
b) Plant Load Management
c) Power Leakage Management
d) Plant Leakage Management
- 14) The boundaries of the customer domain typically consider which type of meters _____.
a) Energy services load
b) Energy services interface
c) Energy services demand
d) Wattmeter

Set R

Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING
Smart Grid Technology (BTN07721)

Day & Date: Saturday, 18-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any Four of the following. 16

- What is the need of Smart Grid? What will be the components of Smart Grid?
- What are smart energy meters? Explain its function in smart grid.
- Explain role of AMI in Smart Grid.
- What is Geographic Information System (GIS)? Explain the components of GIS.
- Explain functions of smart grid components.

Q.3 Solve any Two of the following. 12

- What is the Smart Grid? Overview of how Indian power market is organized.
- Explain EMC and its importance in smart grid.
- Explain how automatic meter reading can make the system Smarter.

Section – II

Q.4 Solve any Four of the following. 16

- Explain the concept of Power Quality and EMC in Smart Grid.
- Describe web Based Power Quality Monitoring.
- What is difference between STATCOM and DSTATCOM?
- Describe the power quality issues of grid connected renewable energy resources.
- What are the Visualization Techniques used in Smart Grid system?

Q.5 Solve any Two of the following. 12

- Explain Voltage source converters and Current source converters.
- What is distribution system state the function of the distribution system? What are the methods of energy management?
- Where are power electronic converters used? Why power electronics technology is important in the grid connected system?

Set **S**

**Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING
Smart Grid Technology (BTN07721)**

Day & Date: Saturday, 18-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No.1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) Power quality is a major concern because of the _____.
 - a) Sensitivity of digital and modem control equipment to distortion/PQ deterioration
 - b) It does not cause disturbance or damage to loads and components
 - c) Synchronous machines operate in synchronism
 - d) Bus voltages are maintained
- 2) Which of the following is not a property associated with power quality of smart grids?
 - a) Self-healing
 - b) Frequency monitoring and control
 - c) Load forecasting
 - d) Asset management
- 3) Fiber optic is an example for _____.

a) Home Area Networks	b) Industry Area Networks (IAN)
c) Wide Area Networks (WAN)	d) Neighborhood Area Networks
- 4) In smart grid PLM means _____.

a) Peak Load Management	b) Plant Load Management
c) Power Leakage Management	d) Plant Leakage Management
- 5) The boundaries of the customer domain typically consider which type of meters _____.

a) Energy services load	b) Energy services interface
c) Energy services demand	d) Wattmeter
- 6) The conversion efficiency of a photo crystalline silicon solar cell is _____.

a) 12.5 to 15%	b) 11 to 14%
c) 10 to 13%	d) 9 to 12%
- 7) The following Type of inverter may not be suitable for grid connected mode?

a) Grid feeding converters	b) Grid Forming converters
c) Grid supporting Converters	d) None of the above

- 8) The unit where the meter signals are collected prior to onward transmission to the Central Monitoring Station (CMS) is called _____.
a) Data Control Unit b) Data Monitoring Unit
c) Data Concentrator Unit d) Data Processing Unit
- 9) The concept of national grid is based on maintaining _____.
a) Demand-supply relationship
b) Generation-supply relationship
c) Demand-generation relationship
d) None of the above
- 10) WAMS is _____.
a) Wide area Automation and Management System
b) Wide Area Measurement System
c) Wide Area Management System
d) West Automatic Management System
- 11) The main responsibility of Application layer in TCP/IP protocol architecture is _____.
a) Routing packets from source to destination across multiple layers
b) Allow users to access network resources
c) Transmits raw bits as signals between nodes
d) Provides reliable and application independent process to process delivery of Messages
- 12) Power quality is the ability of a system _____.
a) To operate causing disturbance or damage to loads and components
b) To operate without causing disturbance or damage to loads and components
c) To lose synchronism of the synchronous machines
d) None of the above
- 13) Which statement from the following is not true for OMS?
a) Prediction of location of transformer, fused, recloses or breaker that opened upon failure
b) Prioritizing restoration efforts and managing resources based upon criteria such as locations of emergency facilities, size of outages, and duration of outages.
c) Providing information on extent of outages and number of customers impacted to management, media and regulators.
d) It is a networking system using mesh topology to interact with consumers and utilities.

ELECTRICAL ENGINEERING
Power System Planning (BTN07711)

Day & Date: Sunday, 19-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) Which load having constant power demand.
 - a) Residential load
 - b) Commercial load
 - c) Industrial load
 - d) Other loads
- 2) The correlation technique relates system load to
 - a) Various demographic factors
 - b) Economic factors
 - c) Both a and b
 - d) None of the above
- 3) Factors affecting load forecasting are _____.
 - a) Weather condition
 - b) Time factors
 - c) Special events
 - d) All of these
- 4) For Long term planning time period is _____.
 - a) 0-2 years
 - b) 2-5 years
 - c) 5-10 years
 - d) All above
- 5) The demand side management can be achieved by the technique of
 - a) Time of day pricing and metering
 - b) Multi - utility power exchange model
 - c) Load management
 - d) All of these
- 6) The capital cost of a power plant depends on _____.
 - a) Total installed capacity only
 - b) Total number of units only
 - c) Both Total installed capacity and Total number of units
 - d) None of these
- 7) What is the modern trend in electric power generation?
 - a) To have a large number of small size thermal plants located at different places.
 - b) To have large size thermal plants near load centre.
 - c) To have large size thermal plants located near coal fields.
 - d) None of the above

Fourth Y. (B. Tech) (Sem-I) (New) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING
Power System Planning (BTN07711)

Day & Date: Sunday, 19-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

- Q.2 Solve any Four** **16**
- a) Give the classification of load and explain its characteristics in brief.
 - b) Elaborate total forecasting
 - c) Explain Long term Planning in detail.
 - d) What are the Objectives of system planning and Explain factors affecting the system planning.
 - e) Write a short note on generation sources.
- Q.3 Solve any Two** **12**
- a) What do you mean by Distribution Automation? Explain tools of distribution automation.
 - b) Explain generation system model and Cost analysis.
 - c) Describe different methodologies used for load forecasting.

Section – II

- Q.4 Solve any Four** **16**
- a) What are the Objectives of transmission planning?
 - b) Explain the Data required for Composite System Reliability and quality.
 - c) Explain the objectives of generation planning. What are factors affecting this?
 - d) Explain in detail the TOD charges.
 - e) What do you mean by Energy audit?
- Q.5 Solve any Two.** **12**
- a) Explain the concept of demand side management. Discuss the steps involved in DSM planning.
 - b) Explain New algorithms and methods relating to power system planning.
 - c) Discuss the possibilities of energy conservation in various sectors.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) The main problem in implanting Distri-bution Automation in metros is _____.
 - a) RTUs
 - b) Communication
 - c) D.A.S
 - d) Control computer
- 2) Size and cost of generating plant installation depends upon
 - a) Average load
 - b) Maximum demand
 - c) (Average load)²
 - d) (Peak load)²
- 3) Need based energy management would include
 - a) plan power generation as per forecast
 - b) monitor matching of need with supply
 - c) identify the needs of various consumers
 - d) all of the above
- 4) RTU is a _____.
 - a) transmitter
 - b) receiver
 - c) trans-receiver
 - d) any of the above
- 5) Which among the following is the pronged approach to energy management?
 - a) Capacity utilization
 - b) Fine turning of equipment
 - c) Technology up gradation
 - d) All of these
- 6) Energy conservation Usually requires
 - a) New investment in more efficient equipments
 - b) Replace old instruments
 - c) Small decrease in convineance or comfort also tolerated
 - d) All above
- 7) Annual operating cost of a generating plant consists of
 - a) Fixed charges
 - b) Semi fixed charges
 - c) Operating or running charges
 - d) All of these

- 8) Which load having constant power demand.
- a) Residential load
 - b) Commercial load
 - c) Industrial load
 - d) Other loads
- 9) The correlation technique relates system load to
- a) Various demographic factors
 - b) Economic factors
 - c) Both a and b

Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

- Q.2 Solve any Four** **16**
- a) Give the classification of load and explain its characteristics in brief.
 - b) Elaborate total forecasting
 - c) Explain Long term Planning in detail.
 - d) What are the Objectives of system planning and Explain factors affecting the system planning.
 - e) Write a short note on generation sources.
- Q.3 Solve any Two** **12**
- a) What do you mean by Distribution Automation? Explain tools of distribution automation.
 - b) Explain generation system model and Cost analysis.
 - c) Describe different methodologies used for load forecasting.

Section – II

- Q.4 Solve any Four** **16**
- a) What are the Objectives of transmission planning?
 - b) Explain the Data required for Composite System Reliability and quality.
 - c) Explain the objectives of generation planning. What are factors affecting this?
 - d) Explain in detail the TOD charges.
 - e) What do you mean by Energy audit?
- Q.5 Solve any Two.** **12**
- a) Explain the concept of demand side management. Discuss the steps involved in DSM planning.
 - b) Explain New algorithms and methods relating to power system planning.
 - c) Discuss the possibilities of energy conservation in various sectors.

Fourth Y. (B.Tech.) (Sem - I) (New)(CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING
Extra High Voltage AC Transmission (BTN07712)

Day & Date: Sunday, 19-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) The function of steel wire in an ACSR conductor is to
 - a) Compensate for skin effect
 - b) Take care of surges
 - c) Provide additional mechanical strength
 - d) Reduce inductance
- 2) The percentage power loss in 750 kV transmission line is nearly equal to

a) 3.27	b) 4.76
c) 0.78	d) 2.5
- 3) First mode of propagation is called as

a) Line to ground	b) Line to line
c) Homopolar	d) both a & c
- 4) Which type of corona discharge gives interference to radio broadcast

a) Pulse type	b) Pulse less type
c) Glow corona	d) None of these
- 5) The measurement of electrostatic field of an e.h.v. line is done by

a) Dipole	b) Spherical Dipole
c) Parallel plate	d) All of the above
- 6) A sphere-sphere gap is used in HV laboratories for
 - a) Measurement of EHV
 - b) Calibrating other measuring apparatus
 - c) Both a and b
 - d) None of these
- 7) In lossless transmission line theoretically have

a) $r = 1 = 0$	b) $1 = g = 0$
c) $g = c = 0$	d) $r = g = 0$

ELECTRICAL ENGINEERING
Extra High Voltage AC Transmission (BTN07712)

Day & Date: Sunday, 19-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

Instructions: 1) All questions are compulsory.
 2) Figures to the right indicates full marks.

Section – I

Q.2 Solve Any Four **16**

- a) Explain in detail the sequence inductance and capacitance.
- b) Describe attenuation of travelling waves on transmission line.
- c) Explain in detail merits and demerits of high voltage.
- d) How the audible noise is generated and what are the characteristics?
- e) Derive equation for line energization with trapped charge voltage.
- f) Derive differential equations and solutions for general case in travelling waves.

Q.3 Solve Any Two **12**

- a) A power of 11000 MW is required to be transmitted over a distance of 1000 km. At voltage levels of 400 kV determine:
 - i) Possible no. of circuits required with equal magnitudes for sending and receiving end voltages with 30° phase difference.
 - ii) The currents transmitted; and
 - iii) The total line losses
 Assume the value of $x = 0.327$ ohm/km and $r = 0.031$ ohm/km for 400 kV.
- b) Explain reflection and refraction of travelling waves.
- c) Derive the expression $P_c = \frac{1}{2} KC (V_m^2 - V_0^2)$ for the energy loss from charge-voltage diagram.

Section – II

Q.4 Solve Any Four **16**

- a) Describe the methods for reduction of switching surges on EHV systems.
- b) Explain the causes of over voltages.
- c) Explain sub-synchronous resonance problem and counter measures.
- d) Explain the term power circle diagram and its use.
- e) Explain the conductor-tower, conductor-ground and conductor-conductor clearances for the design of EHV lines.
- f) Explain the factors considered under steady state in design of EHV lines.

Q.5 Solve Any Two **12**

- a) Explain line insulation design based upon transient overvoltages in detail.
- b) Explain the concept of sinusoidal excitation lumped parameter circuit.
- c) Derive the expressions for generalized constants of transmission line.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) Reflection coefficient of voltage (K_r) for open circuit is

a) 0	b) +2
c) +1	d) -1
- 2) The most accurate and versatile method of achieving reactive power compensation is by using
 - a) Switched capacitors
 - b) Fixed capacitor with controlled reactor
 - c) Saturable reactor with capacitor bank
 - d) Switched capacitor with controlled reactor
- 3) Switching over-voltages are more hazardous than lightning surges in case of _____.

a) Low voltage systems	b) 11 kV systems
c) Unbalanced systems	d) EHV and UHV systems
- 4) Which of the following method may be used to inject reactive power in the transmission line?

a) Series capacitor	b) Synchronous capacitors
c) Both a and b	d) None of these
- 5) For 100% series compensation, resonance occur at

a) Power frequency	b) 50% of Power frequency
c) 40% of Power frequency	d) None of these
- 6) The conductors of an EHV line is selected on the basis of

a) Current carrying capacity	b) Corona and RI performance
c) Line voltage	d) None of these
- 7) The power loss is important for the design of

a) Generator	b) Motor
c) Feeder	d) Transmission line
- 8) The function of steel wire in an ACSR conductor is to
 - a) Compensate for skin effect
 - b) Take care of surges
 - c) Provide additional mechanical strength

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the given options.

14

- 1) The operating speed of a synchronous motor can be changed to new fixed value by _____.
 - a) Changing the load
 - b) Changing the supply voltage
 - c) Changing frequency
 - d) Using brakes
- 2) A four quadrant operation requires _____.
 - a) Two full converters in series
 - b) Two full converters connected in parallel
 - c) Two full converter connected in back to back
 - d) Two semi converters connected in back to back
- 3) For high frequency choppers the device that is preferred is _____.
 - a) Thyristor
 - b) TRIAC
 - c) Transistor
 - d) GTO
- 4) During the starting of a slip ring induction motor using rotor resistance starter, the insertion of resistance in the rotor circuit causes: _____.
 - a) Stator current to increase and torque to decrease
 - b) Stator current to decrease and torque to increase
 - c) Stators current to increase and power factor to decrease
 - d) Power factor to decrease and torque to increase
- 5) Which duty cycle is preferred if the load requires a constant power for short period of time and rest for sufficient longer duration?
 - a) Short Time duty
 - b) Intermittent duty
 - c) Intermittent duty with starting
 - d) Intermittent duty with starting and braking
- 6) The slip of an induction motor normally does not depends on _____.
 - a) rotor speed
 - b) synchronous speed
 - c) both a) and b)
 - d) None of these
- 7) Efficiency by using rotor resistance control in IM is _____.
 - a) High
 - b) Low
 - c) Very high
 - d) Very low

- 8) Speed control by variation of field flux results in _____.
a) Constant power drive b) Constant torque drive
c) Variable power drive d) None of the above
- 9) Full-converter can be used in DC motor for regenerative braking in _____.
a) Constant Operation b) Variable Operation
c) Inversion Operation d) Opposite Operation
- 10) Reluctance motor is a _____.
a) Variable torque motor
b) Low torque variable speed motor
c) Self starting type synchronous motor
d) Low noise, slow speed motor
- 11) Cycloconverter drive has applications in _____.
a) Low power and low speed operations
b) High power and high speed operations
c) Low power and high speed operations
d) High power and low speed operations
- 12) Applications of dc motor is restricted to a few load speed applications because of _____.
a) cost of motor is high
b) mechanical commutation problems
c) maintenance problem
d) all of above
- 13) Stepper motor is popular for _____.
a) Speed control b) Position control
c) Torque control d) Both a and b
- 14) Which of the following method is employed when regenerative braking is necessary?
a) DC Chopper b) Variable Resistor
c) Inverter Rectifier d) Motor-generator

 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

Instructions: 1) All questions are compulsory.
 2) Figures to the right indicate full marks.

Section – I

- Q.2 Solve any Four. 16**
- a) Describe in details dynamics of Electric Drives.
 - b) Describe in details Characteristics of DC motors.
 - c) Explain the working of phase controlled converter fed DC drives.
 - d) Explain stator voltage control of an induction motor with speed torque characteristics.
 - e) Explain the chopper fed DC separately excited motor in motoring mode.

- Q.3 Solve any Two. 12**
- a) Derive fundamental torque equations and components of load torque.
 - b) Explain the static Kramer method and static schrebius method of speed control of three phase induction motor.
 - c) Describe in details dual-converter control of DC drive.

Section – II

- Q.4 Solve any Four. 16**
- a) Explain Losses in electrical drive system.
 - b) Draw and explain variable frequency control for synchronous motors.
 - c) Explain with circuit diagram converter circuit for switched reluctance motor.
 - d) Describe in details Energy efficient operation of drives.
 - e) Explain drive circuit for stepper motor with neat sketch.

- Q.5 Solve any Two. 12**
- a) Describe in details improvement of power factor and quality of supply.
 - b) With neat sketch explain VSI fed induction motor drive also draw block diagram for closed loop control.
 - c) Draw a neat diagram & explain the Cycloconverter control for synchronous motors.

a) Thyristor
b) TRIAC
c) Transistor
d) GTO
- 11) During the starting of a slip ring induction motor using rotor resistance starter, the insertion of resistance in the rotor circuit causes: _____.
a) Stator current to increase and torque to decrease
b) Stator current to decrease and torque to increase
c) Stators current to increase and power factor to decrease
d) Power factor to decrease and torque to increase
- 12) Which duty cycle is preferred if the load requires a constant power for short period of time and rest for sufficient longer duration?
a) Short Time duty
b) Intermittent duty
c) Intermittent duty with starting
d) Intermittent duty with starting and braking
- 13) The slip of an induction motor normally does not depends on _____.
a) rotor speed
b) synchronous speed
c) both a) and b)
d) None of these
- 14) Efficiency by using rotor resistance control in IM is _____.
a) High
b) Low
c) Very high
d) Very low

Set **Q**

Fourth Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING
Advanced Electrical Drives (BTN07714)

Day & Date: Sunday, 19-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

Instructions: 1) All questions are compulsory.
 2) Figures to the right indicate full marks.

Section – I

- Q.2 Solve any Four. 16**
- a) Describe in details dynamics of Electric Drives.
 - b) Describe in details Characteristics of DC motors.
 - c) Explain the working of phase controlled converter fed DC drives.
 - d) Explain stator voltage control of an induction motor with speed torque characteristics.
 - e) Explain the chopper fed DC separately excited motor in motoring mode.
- Q.3 Solve any Two. 12**
- a) Derive fundamental torque equations and components of load torque.
 - b) Explain the static Kramer method and static schrebius method of speed control of three phase induction motor.
 - c) Describe in details dual-converter control of DC drive.

Section – II

- Q.4 Solve any Four. 16**
- a) Explain Losses in electrical drive system.
 - b) Draw and explain variable frequency control for synchronous motors.
 - c) Explain with circuit diagram converter circuit for switched reluctance motor.
 - d) Describe in details Energy efficient operation of drives.
 - e) Explain drive circuit for stepper motor with neat sketch.
- Q.5 Solve any Two. 12**
- a) Describe in details improvement of power factor and quality of supply.
 - b) With neat sketch explain VSI fed induction motor drive also draw block diagram for closed loop control.
 - c) Draw a neat diagram & explain the Cycloconverter control for synchronous motors.

Seat No.

Fourth Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING
Advanced Electrical Drives (BTN07714)

Day & Date: Sunday, 19-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the given options.

14

- 1) Cycloconverter drive has applications in _____.
 - a) Low power and low speed operations
 - b) High power and high speed operations
 - c) Low power and high speed operations
 - d) High power and low speed operations
- 2) Applications of dc motor is restricted to a few load speed applications because of _____.
 - a) cost of motor is high
 - b) mechanical commutation problems
 - c) maintenance problem
 - d) all of above
- 3) Stepper motor is popular for _____.

a) Speed control	b) Position control
c) Torque control	d) Both a and b
- 4) Which of the following method is employed when regenerative braking is necessary?

a) DC Chopper	b) Variable Resistor
c) Inverter Rectifier	d) Motor-generator
- 5) The operating speed of a synchronous motor can be changed to new fixed value by _____.

a) Changing the load	b) Changing the supply voltage
c) Changing frequency	d) Using brakes
- 6) A four quadrant operation requires _____.
 - a) Two full converters in series
 - b) Two full converters connected in parallel
 - c) Two full converter connected in back to back
 - d) Two semi converters connected in back to back
- 7) For high frequency choppers the device that is preferred is _____.

a) Thyristor	b) TRIAC
c) Transistor	d) GTO

- 8) During the starting of a slip ring induction motor using rotor resistance starter, the insertion of resistance in the rotor circuit causes: _____.
- Stator current to increase and torque to decrease
 - Stator current to decrease and torque to increase
 - Stators current to increase and power factor to decrease
 - Power factor to decrease and torque to increase
- 9) Which duty cycle is preferred if the load requires a constant power for short period of time and rest for sufficient longer duration?
- Short Time duty
 - Intermittent duty
 - Intermittent duty with starting
 - Intermittent duty with starting and braking
- 10) The slip of an induction motor normally does not depends on _____.
- rotor speed
 - synchronous speed
 - both a) and b)
 - None of these
- 11) Efficiency by using rotor resistance control in IM is _____.
- High
 - Low
 - Very high
 - Very low
- 12) Speed control by variation of field flux results in _____.
- Constant power drive
 - Constant torque drive
 - Variable power drive
 - None of the above
- 13) Full-converter can be used in DC motor for regenerative braking in _____.
- Constant Operation
 - Variable Operation
 - Inversion Operation
 - Opposite Operation
- 14) Reluctance motor is a _____.
- Variable torque motor
 - Low torque variable speed motor
 - Self starting type synchronous motor
 - Low noise, slow speed motor

Fourth Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING
Advanced Electrical Drives (BTN07714)

Day & Date: Sunday, 19-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

Instructions: 1) All questions are compulsory.
 2) Figures to the right indicate full marks.

Section – I

- Q.2 Solve any Four. 16**
- a) Describe in details dynamics of Electric Drives.
 - b) Describe in details Characteristics of DC motors.
 - c) Explain the working of phase controlled converter fed DC drives.
 - d) Explain stator voltage control of an induction motor with speed torque characteristics.
 - e) Explain the chopper fed DC separately excited motor in motoring mode.
- Q.3 Solve any Two. 12**
- a) Derive fundamental torque equations and components of load torque.
 - b) Explain the static Kramer method and static schrebius method of speed control of three phase induction motor.
 - c) Describe in details dual-converter control of DC drive.

Section – II

- Q.4 Solve any Four. 16**
- a) Explain Losses in electrical drive system.
 - b) Draw and explain variable frequency control for synchronous motors.
 - c) Explain with circuit diagram converter circuit for switched reluctance motor.
 - d) Describe in details Energy efficient operation of drives.
 - e) Explain drive circuit for stepper motor with neat sketch.
- Q.5 Solve any Two. 12**
- a) Describe in details improvement of power factor and quality of supply.
 - b) With neat sketch explain VSI feed induction motor drive also draw block diagram for closed loop control.
 - c) Draw a neat diagram & explain the Cycloconverter control for synchronous motors.

- 9) Which of the following method is employed when regenerative braking is necessary?
- a) DC Chopper
 - b) Variable Resistor
 - c) Inverter Rectifier
 - d) Motor-generator
- 10) The operating speed of a synchronous motor can be changed to new fixed value by _____.
- a) Changing the load
 - b) Changing the supply voltage
 - c) Changing frequency
 - d) Using brakes
- 11) A four quadrant operation requires _____.
- a) Two full converters in series
 - b) Two full converters connected in parallel
 - c) Two full converter connected in back to back
 - d) Two semi converters connected in back to back
- 12) For high frequency choppers the device that is preferred is _____.
- a) Thyristor
 - b) TRIAC
 - c) Transistor
 - d) GTO
- 13) During the starting of a slip ring induction motor using rotor resistance starter, the insertion of resistance in the rotor circuit causes: _____.
- a) Stator current to increase and torque to decrease
 - b) Stator current to decrease and torque to increase
 - c) Stators current to increase and power factor to decrease
 - d) Power factor to decrease and torque to increase
- 14) Which duty cycle is preferred if the load requires a constant power for short period of time and rest for sufficient longer duration?
- a) Short Time duty
 - b) Intermittent duty
 - c) Intermittent duty with starting
 - d) Intermittent duty with starting and braking

Advanced Applications in Solar Energy Technology (BTN07715)

Day & Date: Sunday, 19-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Multiple Choice Questions

14

- 1) In a natural circulation water heating system, heat is transferred by:
 - a) Conduction
 - b) Convection
 - c) Radiation
 - d) Compression
- 2) What is the purpose of overhangs or shading devices in passive solar architecture?
 - a) To block all sunlight
 - b) To maximize solar gain
 - c) To control and optimize heat gain
 - d) To increase glare inside the building
- 3) What is the primary advantage of using a rack-type dryer over other drying methods?
 - a) Lower energy efficiency
 - b) Faster drying times
 - c) Limited capacity
 - d) Minimal control over the drying process
- 4) Which of the following is NOT a typical component of a standalone solar PV system?
 - a) Inverter
 - b) Charge controller
 - c) Grid connection
 - d) Battery bank
- 5) What is the purpose of an inverter in a solar power system?
 - a) To store excess energy
 - b) To convert DC to AC
 - c) To regulate panel temperature
 - d) To track the sun's movement
- 6) How does scaling affect the efficiency of a water heating system?
 - a) Increases efficiency
 - b) No impact on efficiency
 - c) Decreases efficiency
 - d) Improves heat transfer
- 7) What impact does shading have on the performance of a rooftop solar system?
 - a) No impact
 - b) Improved efficiency
 - c) Reduced efficiency
 - d) Increased battery life

- 8) What is Tri-ethylene Glycol primarily used for?
- a) As a refrigerant to cool the air
 - b) As a fuel to generate heat
 - c) As an absorbent to capture heat from the solar collectors
 - d) As a coolant for the solar panels
- 9) What is the role of the desiccant material?
- a) To heat the incoming air
 - b) To absorb and remove moisture from the incoming air
 - c) To cool the indoor air
 - d) To filter the air
- 10) How does a wick-type solar still function?
- a) By using mirrors to concentrate sunlight
 - b) By absorbing sunlight with photovoltaic cells
 - c) By using a wick to transport water for evaporation
 - d) By converting sunlight into heat directly
- 11) In solar desalination, what process is commonly used to separate freshwater from saltwater?
- a) Reverse osmosis
 - b) Distillation
 - c) Filtration
 - d) Electrolysis
- 12) What is the primary factor that influences the efficiency of a solar drying system?
- a) Wind speed
 - b) Ambient temperature
 - c) Moon phase
 - d) Soil composition
- 13) Which factor is crucial for determining the efficiency of a solar PV rooftop system?
- a) Roof color
 - b) Panel Orientation
 - c) Building height
 - d) Local population density
- 14) In a passive solar building, what is the primary purpose of shading devices?
- a) To block all sunlight from entering the building
 - b) To reduce glare
 - c) To control heat gain and prevent overheating
 - d) To create a dark interior environment

Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

- Q.2 Attempt Any Three. 12**
- a) Explain
 - i) Freezing
 - ii) Boiling
 - b) Explain the principle of cooling by dehumidification.
 - c) Explain the basics of absorption cooling.
 - d) Discuss with a neat diagram the working of the Trombe wall.
- Q.3 Attempt Any Two. 16**
- a) Explain swimming pool heating with its advantages.
 - b) Explain any two methods of passive cooling of a building.
 - c) Describe the LiBr- H₂O absorption system.

Section – II

- Q.4 Attempt Any Three. 12**
- a) Explain simple solar still.
 - b) Describe the Box type of solar dryer.
 - c) What is net metering in a rooftop system?
 - d) Discuss hot air industrial applications.
- Q.5 Attempt Any Two. 16**
- a) Explain the concept of wick-type solar still and active solar still.
 - b) Explain the type of grain dryer and solar timber drying.
 - c) Describe the concept of solar PV street lighting system with its advantages.

**Fourth Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING**

Advanced Applications in Solar Energy Technology (BTN07715)

Day & Date: Sunday, 19-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

- Q.2 Attempt Any Three. 12**
- a) Explain
 - i) Freezing
 - ii) Boiling
 - b) Explain the principle of cooling by dehumidification.
 - c) Explain the basics of absorption cooling.
 - d) Discuss with a neat diagram the working of the Trombe wall.
- Q.3 Attempt Any Two. 16**
- a) Explain swimming pool heating with its advantages.
 - b) Explain any two methods of passive cooling of a building.
 - c) Describe the LiBr- H₂O absorption system.

Section – II

- Q.4 Attempt Any Three. 12**
- a) Explain simple solar still.
 - b) Describe the Box type of solar dryer.
 - c) What is net metering in a rooftop system?
 - d) Discuss hot air industrial applications.
- Q.5 Attempt Any Two. 16**
- a) Explain the concept of wick-type solar still and active solar still.
 - b) Explain the type of grain dryer and solar timber drying.
 - c) Describe the concept of solar PV street lighting system with its advantages.

Seat No.	
-----------------	--

**Fourth Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING****Testing & Certification of Electric & Hybrid vehicles (BTN07719)**

Day & Date: Monday, 20-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Multi choice Question

14

- 1) What are the main types of vehicle homologation?
 - a) Internal and external homologation
 - b) National and international homologation
 - c) Type approval and individual approval
 - d) Safety and performance homologation
- 2) What is the primary purpose of a demist test in a vehicle?
 - a) To evaluate the vehicle's audio system
 - b) To assess the effectiveness of the demisting system in clearing condensation and fog from the windshield
 - c) To measure the vehicle's fuel efficiency
 - d) To check the tire pressure
- 3) In which country are FMVSS regulations primarily enforced?
 - a) Canada
 - b) Germany
 - c) United States
 - d) Japan
- 4) CMVR regulations are administered by which government authority in India?
 - a) Ministry of Transport and Highways
 - b) Ministry of Road Safety
 - c) Ministry of Environment and Forests
 - d) Ministry of Urban Development
- 5) What is the primary purpose of a Type Approval Scheme?
 - a) To provide insurance coverage for products
 - b) To regulate product pricing
 - c) To certify that products meet specified standards and regulations
 - d) To promote product advertising
- 6) What is the primary goal of CoP?
 - a) Maximizing production output
 - b) Minimizing production costs
 - c) Ensuring consistent product quality and compliance with standards
 - d) Reducing product innovation

- 7) What does a spectrometer measure in testing?
a) Pressure
b) Light intensity and wavelength
c) Sound frequency
d) Electrical resistance
- 8) Which instrument is commonly used to measure the speed of a rotating object, such as a vehicle's wheel?
a) Thermometer
b) Hygrometer
c) Tachometer
d) Manometer
- 9) Which type of test track is designed for testing a vehicle's ability to handle various road surfaces, including gravel, mud, and uneven terrain?
a) High-speed test track
b) Durability test track
c) Off-road test track
d) Handling test track
- 10) What is the primary purpose of Hardware-in-the-Loop (HiL) testing in the context of EVs and HEVs?
a) Testing physical hardware components of vehicles
b) Simulating vehicle behavior in a virtual environment
c) Charging the vehicle's battery
d) Conducting emissions testing
- 11) Which instrument is commonly used to measure tire tread depth accurately?
a) Tire pressure gauge
b) Vernier caliper
c) Tread depth gauge
d) Barometer
- 12) What is the primary purpose of installing a horn in a vehicle?
a) To play music
b) To alert other road users and pedestrians
c) To improve fuel efficiency
d) To control vehicle speed
- 13) Which tell-tale should you test to ensure proper functioning of the vehicle's charging system?
a) Oil pressure warning light
b) Brake system warning light
c) Battery warning light
d) Temperature warning light
- 14) What is the primary function of the accelerator pedal in an M1 vehicle?
a) To engage and disengage the engine
b) To slow down or stop the vehicle
c) To control the vehicle's speed and acceleration
d) To engage the parking brake

Seat No.

**Fourth Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING****Testing & Certification of Electric & Hybrid vehicles (BTN07719)**

Day & Date: Monday, 20-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I**Q.2 Solve any Four 16**

- Discuss some reasons, why a temporary cabin is required for drive-away chassis.
- Explain grade ability and its significance.
- Describe brake performance anti-lock braking system test.
- What do you understand by M, N, and O layouts of vehicle classification? Explain.
- Discuss about constant speed fuel consumption testing.
- Explain vehicle homologation process and its types in detail.

Q.3 Solve any Two 12

- Explain the various types of test tracks and common instruments used for testing on test-tracks.
- What do you understand by Tell Tales? Discuss about the common tell tales used in a vehicle.
- What do you understand by interior noise in a vehicle? Discuss some interior noise reduction strategies.

Section – II**Q.4 Solve Any Four 16**

- Describe the horn testing process.
- Explain crash test with dummies.
- Describe the bumper impact test.
- Explain about the safety requirements of traction batteries.
- Explain the defrost test.
- Describe air bag testing process in-detail.

Q.5 Attempt any two of the following: 12

- Describe the test for electric vehicle conductive DC charging system.
- Discuss about the tests conducted on the electric propulsion kit which is intended for vehicle conversion into hybrid electric vehicle.
- Discuss about the various interior fittings of a vehicle and its testing.

Seat No.

AI Application to Power System Management (BTN07717)

Day & Date: Monday, 20-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct option from the following.

14

- 1) In how many category processes is Artificial Intelligence classified in?
 - a) Depends on the input nature
 - b) 5
 - c) 2
 - d) 3
- 2) Which of the following is the common language for Artificial Intelligence?
 - a) Python
 - b) Java
 - c) Lisp
 - d) PHP
- 3) Among the given options, which is not the required property of Knowledge representation?
 - a) Inferential Efficiency
 - b) Inferential Adequacy
 - c) Representational Verification
 - d) Representational Adequacy
- 4) Which AI technique enables the computers to understand the associations and relationships between objects and events?
 - a) Heuristic Processing
 - b) Cognitive Science
 - c) Relative Symbolism
 - d) Pattern Matching
- 5) Automatic Reasoning tool is used in _____.
 - a) Personal Computers
 - b) Microcomputers
 - c) LISP Machines
 - d) All of the above
- 6) A hybrid Bayesian Network consist _____.
 - a) Discrete variables only
 - b) Discontinuous Variable
 - c) Both Discrete and Continuous variables
 - d) Continuous Variable only
- 7) What is perceptron?
 - a) A single layer feed-forward neural network with pre-processing
 - b) An auto-associative neural network
 - c) A double layer auto-associative neural network
 - d) A neural network that contains feedback

- 8) Which is true for neural networks?
- a) It has set of nodes and connections
 - b) Each node computes its weighted input
 - c) Node could be in excited state or non-excited state
 - d) All of the mentioned
- 9) Why do we need biological neural networks?
- a) To make smart human interactive & user friendly system
 - b) To apply heuristic search methods to find solutions of problem
 - c) To solve tasks like machine vision & natural language processing
 - d) All the Above
- 10) Which of the following is an advantage of using an expert system development tool?
- a) Imposed structure
 - b) Knowledge engineering assistance
 - c) Rapid prototyping
 - d) All of the mentioned
- 11) An expert system is a _____ which has the ability of decision-making like a human expert.
- a) Computer system
 - b) Operating system
 - c) Transaction processing system
 - d) None of these
- 12) The expert systems are incapable of _____.
- a) Producing accurate output for inadequate knowledge base
 - b) Substituting human decision makers
 - c) Both a and b
 - d) None of these
- 13) Improved _____ are key benefits of an Expert System.
- a) Decision quality
 - b) Consistency
 - c) Reliability
 - d) All of the mentioned above
- 14) What is the objective of back propagation algorithm?
- a) To develop learning algorithm for multilayer feed forward neural network
 - b) To develop learning algorithm for single layer feed forward neural network
 - c) To develop learning algorithm for multilayer feed forward neural network, so that network can be trained to capture the mapping implicitly
 - d) None of the mentioned

AI Application to Power System Management (BTN07717)

Day & Date: Monday, 20-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

- Q.2 Solve any four of the following** **16**
- a) Explain briefly the various problem characteristics.
 - b) What is Artificial Intelligence? Give its applications.
 - c) What Dempster-Shafer Theory? Give Characteristics.
 - d) Difference between Forward and Backward Reasoning in AI.
 - e) What is Feature Selection? What are Different Feature Selection Models explain any one.

- Q.3 Solve any two of the following** **12**
- a) What is knowledge representation and issues in knowledge representation? What are the rules of knowledge representation?
 - b) What is Scripts? What is the Component of Script? Also give advantages and disadvantages of Script.
 - c) Describe in brief the various feature extraction and selection methods in pattern recognition.

Section – II

- Q.4 Solve any four of the following.** **16**
- a) What are the types of Artificial Neural Networks?
 - b) What is Neural Network? Give Applications of Artificial Neural Networks.
 - c) Explain Expert System in Artificial Intelligence.
 - d) Difference between Artificial Neural Network and Biological Neural Network.
 - e) What are the phases of system design in expert system?

- Q.5 Solve any two of the following.** **12**
- a) Explain in detail of single layer and multilayer neural nets in Artificial Neural Network.
 - b) Explain in detail components of an Expert System.
 - c) Compare supervised and unsupervised learning.

Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct option from the following.

14

- 1) Which is true for neural networks?
 - a) It has set of nodes and connections
 - b) Each node computes its weighted input
 - c) Node could be in excited state or non-excited state
 - d) All of the mentioned
- 2) Why do we need biological neural networks?
 - a) To make smart human interactive & user friendly system
 - b) To apply heuristic search methods to find solutions of problem
 - c) To solve tasks like machine vision & natural language processing
 - d) All the Above
- 3) Which of the following is an advantage of using an expert system development tool?
 - a) Imposed structure
 - b) Knowledge engineering assistance
 - c) Rapid prototyping
 - d) All of the mentioned
- 4) An expert system is a _____ which has the ability of decision-making like a human expert.
 - a) Computer system
 - b) Operating system
 - c) Transaction processing system
 - d) None of these
- 5) The expert systems are incapable of _____.
 - a) Producing accurate output for inadequate knowledge base
 - b) Substituting human decision makers
 - c) Both a and b
 - d) None of these
- 6) Improved _____ are key benefits of an Expert System.

a) Decision quality	b) Consistency
c) Reliability	d) All of the mentioned above

- 7) What is the objective of back propagation algorithm?
- To develop learning algorithm for multilayer feed forward neural network
 - To develop learning algorithm for single layer feed forward neural network
 - To develop learning algorithm for multilayer feed forward neural network, so that network can be trained to capture the mapping implicitly
 - None of the mentioned
- 8) In how many category processes is Artificial Intelligence classified in?
- Depends on the input nature
 - 5
 - 2
 - 3
- 9) Which of the following is the common language for Artificial Intelligence?
- Python
 - Java
 - Lisp
 - PHP
- 10) Among the given options, which is not the required property of Knowledge representation?
- Inferential Efficiency
 - Inferential Adequacy
 - Representational Verification
 - Representational Adequacy
- 11) Which AI technique enables the computers to understand the associations and relationships between objects and events?
- Heuristic Processing
 - Cognitive Science
 - Relative Symbolism
 - Pattern Matching
- 12) Automatic Reasoning tool is used in _____.
- Personal Computers
 - Microcomputers
 - LISP Machines
 - All of the above
- 13) A hybrid Bayesian Network consist _____.
- Discrete variables only
 - Discontinuous Variable
 - Both Discrete and Continuous variables
 - Continuous Variable only
- 14) What is perceptron?
- A single layer feed-forward neural network with pre-processing
 - An auto-associative neural network
 - A double layer auto-associative neural network
 - A neural network that contains feedback

Set **Q**

Fourth Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING

AI Application to Power System Management (BTN07717)

Day & Date: Monday, 20-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
 2) Figures to the right indicate full marks.

Section – I

- Q.2 Solve any four of the following** **16**
- a) Explain briefly the various problem characteristics.
 - b) What is Artificial Intelligence? Give its applications.
 - c) What Dempster-Shafer Theory? Give Characteristics.
 - d) Difference between Forward and Backward Reasoning in AI.
 - e) What is Feature Selection? What are Different Feature Selection Models explain any one.

- Q.3 Solve any two of the following** **12**
- a) What is knowledge representation and issues in knowledge representation? What are the rules of knowledge representation?
 - b) What is Scripts? What is the Component of Script? Also give advantages and disadvantages of Script.
 - c) Describe in brief the various feature extraction and selection methods in pattern recognition.

Section – II

- Q.4 Solve any four of the following.** **16**
- a) What are the types of Artificial Neural Networks?
 - b) What is Neural Network? Give Applications of Artificial Neural Networks.
 - c) Explain Expert System in Artificial Intelligence.
 - d) Difference between Artificial Neural Network and Biological Neural Network.
 - e) What are the phases of system design in expert system?

- Q.5 Solve any two of the following.** **12**
- a) Explain in detail of single layer and multilayer neural nets in Artificial Neural Network.
 - b) Explain in detail components of an Expert System.
 - c) Compare supervised and unsupervised learning.

3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct option from the following. 14

- 1) An expert system is a _____ which has the ability of decision-making like a human expert.
 - a) Computer system
 - b) Operating system
 - c) Transaction processing system
 - d) None of these
- 2) The expert systems are incapable of _____.
 - a) Producing accurate output for inadequate knowledge base
 - b) Substituting human decision makers
 - c) Both a and b
 - d) None of these
- 3) Improved _____ are key benefits of an Expert System.

a) Decision quality	b) Consistency
c) Reliability	d) All of the mentioned above
- 4) What is the objective of back propagation algorithm?
 - a) To develop learning algorithm for multilayer feed forward neural network
 - b) To develop learning algorithm for single layer feed forward neural network
 - c) To develop learning algorithm for multilayer feed forward neural network, so that network can be trained to capture the mapping implicitly
 - d) None of the mentioned
- 5) In how many category processes is Artificial Intelligence classified in?

a) Depends on the input nature	b) 5
c) 2	d) 3
- 6) Which of the following is the common language for Artificial Intelligence?

a) Python	b) Java
c) Lisp	d) PHP
- 7) Among the given options, which is not the required property of Knowledge representation?

a) Inferential Efficiency	b) Inferential Adequacy
c) Representational Verification	d) Representational Adequacy

- 8) Which AI technique enables the computers to understand the associations and relationships between objects and events?
- a) Heuristic Processing
 - b) Cognitive Science

Set P

Fourth Y. (B.Tech.) (Sem-I) (Old) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING
Industrial Drives Control (197045701)

Day & Date: Wednesday, 15-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume data wherever necessary.

Section – I

Q.2 Answer the following (Any four) 16

- Draw the block diagram of electrical drive system and explain.
- Draw and explain single phase half-controlled rectifier fed separately excited D.C. motor.
- Write the classification of drives with examples.
- Explain regenerative braking in separately excited dc motor also draw speed torque characteristics.
- Explain the chopper fed DC separately excited motor in motoring mode.

Q.3 Answer the following (Any Two) 12

- Explain the closed loop speed control of Multimotor drives.
- A 220 V, 1500 rpm, 10A separately excited dc motor is fed from a 1 phase fully controlled rectifier with an ac source voltage of 230V, 50Hz, $R_a=2 \Omega$. conduction can be assumed to be continuous, calculate firing for
 - Half the rated motor torque at 500 rpm
 - rated motor torque at (-1000) rpm
- A 230 V, 960 rpm and 200 A separately excited dc motor has an armature resistance of 0.02Ω . The motor is operated in dynamic braking with chopper control. The braking resistance has value of 2Ω .
 - Calculate duty ratio of chopper for motor speed of 600 rpm & braking torque equal to twice rated value.
 - What will be motor speed for duty ratio of 0.6 & motor torque equal to twice its rated value.

Section – II

Q.4 Answer the following (Any Four) 16

- Explain stator voltage control of an induction motor with speed torque characteristics.
- Explain with circuit diagram converter circuit for switched reluctance motor.
- Explain the static Schrebius method of speed control of three phase induction motor.
- With neat sketch explain VSI feed induction motor drive.
- Explain the operation of Chopper controlled rotor resistance control drive.

Q.5 Answer the following (Any Two)

- a) What are the different types of stepper motors are there? Explain their operation.
- b) A 400 V, star connected, 3 phase, 6 pole, 50 Hz induction motor has following parameter referred to stator $R_s = R_r' = 1$ ohm, $X_s = X_r' = 2$ ohm, for regenerative braking operation of motor, Find
- Maximum torque it can hold and range for safe operation
 - Speed at which it will hold load with torque 100 N-m
- c) A 2.8 kw, 400v, 50Hz, 4 pole, 1370 rpm delta connected squirrel cage induction motor has following parameter referred to stator $R_s = 2$ ohm, $R_r' = 5$ ohm, $X_s = X_r' = 5$ ohm, $X_m = 80$ ohm motor speed is controlled by stator voltage control. When driving a fan load it run at a speed rated speed at a rated voltage calculate
- Motor terminal voltage, current and torque at 1200 rpm.
 - Motor speed, current and torque for terminal voltage of 300v.

 4) Assume data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct options.

14

- 1) Cycloconverter drive has applications in _____.
 - a) Low power and low speed operations
 - b) High power and high speed operations
 - c) Low power and high speed operations
 - d) High power and low speed operations
- 2) Which of the following method is employed when regenerative braking is necessary?
 - a) DC Chopper
 - b) Variable Resistor
 - c) Inverter Rectifier
 - d) Motor-generator
- 3) A synchronous motor is a useful industrial machine due to its property of _____.
 - a) Improving the power factor
 - b) Speed is constant
 - c) Can always be adjusted to operate at unity power factor
 - d) All of the above
- 4) Stepper motor is popular for _____.
 - a) Speed control
 - b) Position control
 - c) Torque control
 - d) Both a and b
- 5) For high frequency choppers the device that is preferred is _____.
 - a) Thyristor
 - b) TRIAC
 - c) Transistor
 - d) GTO
- 6) When quick speed reversal is a consideration, the motor preferred is _____.
 - a) Synchronous Motor
 - b) Squirrel cage Induction Motor
 - c) Wound Rotor induction motor
 - d) DC Motor
- 7) The operating speed of a synchronous motor can be changed to new fixed value by _____.
 - a) Changing the load
 - b) Changing the supply voltage
 - c) Changing frequency
 - d) Using brakes

- 8) Which duty cycle is preferred if the load requires a constant power for short period of time and rest for sufficient longer duration?
- a) Short Time duty
 - b) Intermittent duty
 - c) Intermittent duty with starting
 - d) Intermittent duty with starting and braking
- 9) The equilibrium speed of a motor load system is obtained _____
- a) When motor torque equals the load torque
 - b) When motor torque is less than the load torque
 - c) When motor torque is more than the load torque
 - d) None of these
- 10) The slip of an induction motor normally does not depend on _____
- a) Rotor speed
 - b) Synchronous speed
 - c) Shaft torque
 - d) Core loss component
- 11) Speed control by variation of field flux results in _____.
- a) Constant power drive
 - b) Constant torque drive
 - c) Variable power drive
 - d) None of the above
- 12) Efficiency by using rotor resistance control in IM is _____.
- a) High
 - b) Low
 - c) Very high
 - d) Very low
- 13) Full-converter can be used in DC motor for regenerative braking in _____.
- a) Constant Operation
 - b) Variable Operation
 - c) Inversion Operation
 - d) Opposite Operation
- 14) Reluctance motor is a _____.
- a) Variable torque motor
 - b) Low torque variable speed motor
 - c) Self-starting type synchronous motor
 - d) Low noise, slow speed motor

 - c) Changing frequency
 - d) Using brakes
- 13) Which duty cycle is preferred if the load requires a constant power for short period of time and rest for sufficient longer duration?
- a) Short Time duty
 - b) Intermittent duty
 - c) Intermittent duty with starting
 - d) Intermittent duty with starting and braking
- 14) The equilibrium speed of a motor load system is obtained ____.
- a) When motor torque equals the load torque
 - b) When motor torque is less than the load torque
 - c) When motor torque is more than the load torque
 - d) None of these

Set S

Fourth Y. (B.Tech.) (Sem-I) (Old) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING
Industrial Drives Control (197045701)

Day & Date: Wednesday, 15-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume data wherever necessary.

Section – I

Q.2 Answer the following (Any four) 16

- Draw the block diagram of electrical drive system and explain.
- Draw and explain single phase half-controlled rectifier fed separately excited D.C. motor.
- Write the classification of drives with examples.
- Explain regenerative braking in separately excited dc motor also draw speed torque characteristics.
- Explain the chopper fed DC separately excited motor in motoring mode.

Q.3 Answer the following (Any Two) 12

- Explain the closed loop speed control of Multimotor drives.
- A 220 V, 1500 rpm, 10A separately excited dc motor is fed from a 1 phase fully controlled rectifier with an ac source voltage of 230V, 50Hz, $R_a=2 \Omega$. conduction can be assumed to be continuous, calculate firing for
 - Half the rated motor torque at 500 rpm
 - rated motor torque at (-1000) rpm
- A 230 V, 960 rpm and 200 A separately excited dc motor has an armature resistance of 0.02Ω . The motor is operated in dynamic braking with chopper control. The braking resistance has value of 2Ω .
 - Calculate duty ratio of chopper for motor speed of 600 rpm & braking torque equal to twice rated value.
 - What will be motor speed for duty ratio of 0.6 & motor torque equal to twice its rated value.

Section – II

Q.4 Answer the following (Any Four) 16

- Explain stator voltage control of an induction motor with speed torque characteristics.
- Explain with circuit diagram converter circuit for switched reluctance motor.
- Explain the static Schrebius method of speed control of three phase induction motor.
- With neat sketch explain VSI feed induction motor drive.
- Explain the operation of Chopper controlled rotor resistance control drive.

Q.5 Answer the following (Any Two)

- a) What are the different types of stepper motors are there? Explain their operation.
- b) A 400 V, star connected, 3 phase, 6 pole, 50 Hz induction motor has following parameter referred to stator $R_s = R_r' = 1$ ohm, $X_s = X_r' = 2$ ohm, for regenerative braking operation of motor, Find
- Maximum torque it can hold and range for safe operation
 - Speed at which it will hold load with torque 100 N-m
- c) A 2.8 kw, 400v, 50Hz, 4 pole, 1370 rpm delta connected squirrel cage induction motor has following parameter referred to stator $R_s = 2$ ohm, $R_r' = 5$ ohm, $X_s = X_r' = 5$ ohm, $X_m = 80$ ohm motor speed is controlled by stator voltage control. When driving a fan load it run at a speed rated speed at a rated voltage calculate
- Motor terminal voltage, current and torque at 1200 rpm.
 - Motor speed, current and torque for terminal voltage of 300v.

Set **P**

Fourth Y. (B Tech) (Sem - I) (Old) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING
Power System and Operation Control (197045702)

Day & Date: Thursday, 16-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.
 4) Assume the suitable data whenever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Tick the correct options**14**

- 1) In a power system with long transmission lines, economic dispatch means _____.
 - a) Equal incremental costs at generator buses
 - b) Equal incremental costs at load buses
 - c) Equal load on all generators
 - d) That generators share the load proportional to their rating
- 2) In dynamic programming method the cost function $F_N(y)$ represents _____.
 - a) Cost of generation of N MW by y number of unit
 - b) Cost of generation of y MW by N number of unit
 - c) Cost of generation of y MW by N^{th} unit
 - d) Cost of generation of N MW by y^{th} unit
- 3) Governors for speed control of generating units provide _____.
 - a) Flat speed load characteristic
 - b) An increase of speed unit's increase of load
 - c) A decrease of speed with increase of load
 - d) Either (b) or (c) depending on size of generator
- 4) In central AGC of a given control area, the change in frequency _____.
 - a) Volume control error
 - b) Area control error
 - c) Nonlinear control error
 - d) Optimal control error
- 5) Two generating plants feed a load centre through a transmission network. For maximum Economy _____.
 - a) The incremental fuel cost should be the same for the two stations.
 - b) The two stations should share the load in the ratio of their installed capacities.
 - c) The more efficient plant should supply more load.
 - d) The incremental cost of power delivered at the load centre should be the same for both the plants.
- 6) The units for heat rate are _____.
 - a) Kcal/KWh
 - b) KWh/kcal
 - c) Kcal/hour
 - d) KW

- 7) In power system reactive power is necessary _____
- a) For power transmission
 - b) For stabilizing voltage level
 - c) For stabilizing frequency
 - d) For counter acting the effect of reactance in the transmission system
- 8) At times of peak load a power system needs _____
- a) Injection of lagging vars
 - b) injection of leading vars
 - c) Injection of lagging or leading vars
 - d) None of the above
- 9) The changes in reactive power at a bus have a great effect on the voltage magnitude _____
- a) of that bus
 - b) of distant busses
 - c) of all the busses
 - d) None of the above
- 10) Contingency definition gives list of components outages _____
- a) Which includes the contingencies with high probability of occurrence
 - b) Which provide the contingency in decreasing order of severity
 - c) For outage simulation
 - d) Any of the above
- 11) If a power system observes an accumulated time error, it should correct it by _____
- a) Increasing its own generation
 - b) Decreasing its own generation
 - c) Coordinating time error correction with other interconnected systems
 - d) Any of above
- 12) A security analysis program uses _____
- a) AC load flow
 - b) DC load flow
 - c) Both AC and DC load flow
 - d) None
- 13) Voltage stability problem normally occurs _____
- a) Heavily stressed system
 - b) Medium stressed system
 - c) Low stressed system
 - d) None of these
- 14) Energy control centre is supposed to perform the following security functions _____
- a) System Monitoring
 - b) Contingency analysis
 - c) Corrective action analysis
 - d) All of these

Set **P**

Fourth Y. (B Tech) (Sem - I) (Old) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING
Power System and Operation Control (197045702)

Day & Date: Thursday, 16-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

Instructions: 1) All questions are compulsory.
 2) Figures to the right indicate full marks.

Section – I**Q.2 Solve any Four:** **16**

- a) What is mean by unit commitment? Explain the necessity of it.
- b) What do you understand loading? Briefly introduce different types of loading?
- c) Explain with mathematical formulation the economic load dispatch neglecting transmission losses.
- d) Draw block diagram, with illustrative transfer function of the load frequency control of Two area system. Explain function of each block of control system.
- e) Define and explain the terms:
 - i) Control area and
 - ii) Area control error
- f) What are the major control loops in a large generator?

Q.3 Solve any Two **12**

- a) Explain the dynamic programming method for unit commitment with suitable example.
- b) A system having two generating units connected through a line has following loss coefficient $B_{11} = 0.1 \times 10^{-2} \text{ MW}^{-1}$, $B_{12} = -0.1 \times 10^{-2} \text{ MW}^{-1}$, $B_{22} = 0.13 \times 10^{-2} \text{ MW}^{-1}$ Power is being dispatched economically with $P_1 = 120 \text{ MW}$ and $P_2 = 200 \text{ MW}$. To raise the system load by 1 MW, it costs additional Rs. 40 per hour.

Find:

- i) Penalty factor for plant 1
 - ii) The additional cost per hour to increase the output of plant 1 by 1 MW.
- c) Explain the hydrothermal scheduling.

Section – II**Q.4 Solve any Four:** **16**

- a) Define power angle and voltage stability.
- b) How to prevent voltage collapse problem? Explain.
- c) Write a short note on sensitivity factor.
- d) Explain effective counter measure to prevent voltage instability.
- e) Give the comparison between the different compensating schemes.

Q.5 Solve any Two: **12**

- a) What is the requirement of reactive power compensation in transmission system?
- b) Explain the mathematical formulation of voltage stability problem.
- c) Explain the different types of static compensator. Briefly introduce each compensator with neat diagram.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the options. 14

- 1) Which of the following provides highest energy conversion efficiency in non-concentrating solar collectors?
 - a) Flat plate collectors
 - b) Evacuated flat plate collectors
 - c) Evacuated-tube collectors
 - d) Parabolic collectors
- 2) Which of the following power plant is free from environmental pollution problem?
 - a) Thermal Power Plant
 - b) Nuclear Power Plant
 - c) Hydro Power Plant
 - d) Geothermal Power Plant
- 3) Winds having following speed are suitable to operate wind turbines.
 - a) 5 - 25m/s
 - b) 10 - 35m/s
 - c) 20 - 45m/s
 - d) 30 - 55m/s
- 4) The amount of energy available in the wind at any instant is proportional to _____ of the wind speed.
 - a) Square root power of two
 - b) Square root power of three
 - c) Square power
 - d) Cube power
- 5) The current density of a photo voltaic cell ranges from
 - a) 10 - 20 mA/cm²
 - b) 40 - 50 mA/cm²
 - c) 20 - 40 mA/cm²
 - d) 60 - 100 mA/cm²
- 6) Solar constant is _____.
 - a) 140Wm⁻²
 - b) 1.4Wm⁻²
 - c) 1.4 kWm⁻²
 - d) 1.4 MWm⁻²
- 7) What is extraterrestrial radiation?
 - a) Intensity of the sun at the top of earth's atmosphere.
 - b) Intensity of the sun at the top of its atmosphere.
 - c) Energy of the sun at the top of earth's atmosphere.
 - d) Force of the sun on earth.
- 8) Sun generates _____ Calories/second.
 - a) 9×10^{25}
 - b) 01×10^{25}
 - c) 10×10^{25}
 - d) 0.9×10^{25}

Fourth Y. (B.Tech.) (Sem-I) (Old) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING
Renewable Energy Sources (197045703)

Day & Date: Friday, 17-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any FOUR. 16

- What is Solar constant? Explain.
- Differentiate between conventional and non-conventional sources of energy.
- Explain briefly components of a wind energy system.
- What are the advantages and disadvantages of concentrating collectors over flat plate collectors?
- Write a note on Betz criterion.

Q.3 Attempt any TWO. 12

- Explain terrestrial and extra-terrestrial radiations with neat diagrams.
- Explain briefly components of a wind energy system; also explain horizontal types of wind mills.
- Write a note on parabolic trough.

Section – II

Q.4 Attempt Any FOUR. 16

- Explain different types of geothermal resources.
- Explain the need of DEC.
- Classify the instruments for measuring solar radiation. Explain any one in detail.
- Write a note on latent heat storage.
- Explain Carnot Cycle.

Q.5 Attempt Any TWO. 12

- Draw and describe the binary cycle geothermal power plant.
- Explain tidal energy conversion system with proper diagram.
- Explain fixed drum type biogas plant.

Seat No.	
----------	--

Fourth Y. (B.Tech.) (Sem-I) (Old) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING
Renewable Energy Sources (197045703)

Day & Date: Friday, 17-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No.1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the options. 14

- 1) Sun generates _____ Calories/second.
 - a) 9×10^{25}
 - b) 01×10^{25}
 - c) 10×10^{25}
 - d) 0.9×10^{25}
- 2) Biomass is used in the production of _____.
 - a) Fibers
 - b) Chemicals
 - c) Transportation fuels
 - d) Biochemical
- 3) This is also called a biogas _____.
 - a) Biobutanol
 - b) Biodiesel
 - c) Bioethanol
 - d) Biomethane
- 4) What does OTEC stands for?
 - a) Ocean thermal energy cultivation
 - b) Ocean thermal energy conversion
 - c) Ocean thermal energy consumption
 - d) Ocean techno energy conservation
- 5) The molten rock within the earth is _____.
 - a) Igneous
 - b) Magma
 - c) Sedimentary
 - d) Metamorphic
- 6) The following is (are) type(s) of Geothermal resource.
 - a) Hydrothermal
 - b) Hot dry rock
 - c) Geopressurised
 - d) All of the above
- 7) In Carnot cycle the heat receive at _____ temperature.
 - a) Lower
 - b) Higher
 - c) Constant
 - d) None of the above
- 8) Which of the following provides highest energy conversion efficiency in non-concentrating solar collectors?
 - a) Flat plate collectors
 - b) Evacuated flat plate collectors
 - c) Evacuated-tube collectors
 - d) Parabolic collectors

- 9) Which of the following power plant is free from environmental pollution problem?
- a) Thermal Power Plant b) Nuclear Power Plant
c) Hydro Power Plant d) Geothermal Power Plant
- 10) Winds having following speed are suitable to operate wind turbines.
- a) 5 - 25m/s b) 10 - 35m/s
c) 20 - 45m/s d) 30 - 55m/s
- 11) The amount of energy available in the wind at any instant is proportional to _____ of the wind speed.
- a) Square root power of two b) Square root power of three
c) Square power d) Cube power
- 12) The current density of a photo voltaic cell ranges from
- a) 10 - 20 mA/cm² b) 40 - 50 mA/cm²
c) 20 - 40 mA/cm² d) 60 - 100 mA/cm²
- 13) Solar constant is _____.
- a) 140Wm⁻² b) 1.4Wm⁻²
c) 1.4 kWm⁻² d) 1.4 MWm⁻²
- 14) What is extraterrestrial radiation?
- a) Intensity of the sun at the top of earth's atmosphere.
b) Intensity of the sun at the top of its atmosphere.
c) Energy of the sun at the top of earth's atmosphere.
d) Force of the sun on earth.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct answer

14

- 1) On what factor does the operating speed of the relay depend?
 - a) Rate of flux built up
 - b) Armature core air gap
 - c) Spring tension
 - d) All of these
- 2) The relay with inverse time characteristic will operate within _____
 - a) 1.5 sec
 - b) 5 to 10 sec
 - c) 5 to 20 sec
 - d) 20 to 30 sec
- 3) The operation speed of a relay depends on _____
 - a) Rate of flux buildup
 - b) Armature core air gap
 - c) Spring tension
 - d) All the above
- 4) What is the relation between the fusing current and the diameter of the wire?
 - a) $I = k d^3$
 - b) $I = k d^{3/2}$
 - c) $I = k d^2$
 - d) $I = k d^{2/3}$
- 5) Differential relays are used for the protection of equipment's against _____
 - a) Internal faults
 - b) Over-current
 - c) Reverse current
 - d) Reverse
- 6) Relay is preferred for phase fault on short transmission line.
 - a) Induction type
 - b) Reactance
 - c) Impedance
 - d) None of the above
- 7) Which of the following relay has inherent directional characteristics?
 - a) Mho relay
 - b) Impedance relay
 - c) Reactance relay
 - d) Distance
- 8) Which of the following ratings of the transformer differential protection is recommended?
 - a) Above 30 kVA
 - b) Equal to and above 5 MVA
 - c) Equal to and above 25 MVA
 - d) None of the above

- 9) In a single bus-bar system there will be complete shut down when _____
- a) Fault occurs on the bus itself
 - b) Fault occurs on neutral line
 - c) Two or more faults occur simultaneously
 - d) Fault occurs with respect to earthing
- 10) Rate of rise of restriking voltage depend on _____
- a) Type of circuit breaker
 - b) Capacitance of the system
 - c) Inductance of the system
 - d) Both (b) and (c)
- 11) What is the arc voltage in a circuit breaker?
- a) In phase with the arc current
 - b) Lagging the arc current by 90°
 - c) Leading the arc current by 90°
 - d) Lagging the arcing current by 180°
- 12) Circuit breakers usually operate under _____
- a) Steady short circuit current
 - b) Sub transient state of short circuit current
 - c) Transient state of short circuit current
 - d) None of these
- 13) What is the advantage of using oil as the arc quenching medium?
- a) Good cooling properties
 - b) High dielectric strength
 - c) Acts as an insulator
 - d) All of these
- 14) The protection against over-voltage due to lightening is provided by _____
- a) Use of surge diverters
 - b) Low tower footing resistance
 - c) Use of overhead ground wires
 - d) Any of the above

Switchgear and Protection (197045704)

Day & Date: Saturday, 18-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
 2) Figures to the right indicate full marks.
 3) Assume suitable data if necessary.

Section – I

Q.2 Solve any Four. **16**

- a) What are the advantages of static relay over electromagnetic relay?
- b) What do you mean by zones of protection? Explain primary and backup protection.
- c) What are the factors affecting the selection of fuse?
- d) Explain the following terms
 - i) Fuse element
 - ii) Fusing factor
 - iii) Arcing and pre arcing time
 - iv) Cut-off current
- e) Explain how reactance relay is used for distance protection? Draw its characteristics on R-X diagram.
- f) Describe microprocessor based reactance relay with block diagram.

Q.3 Solve any Two. **12**

- a) Describe microprocessor based mho & offset mho relay with block diagram.
- b) With a neat sketch explain electromagnetic induction relay.
- c) Determine the time of operation of an IDMT relay rating 5A and having setting of 125% and TSM = 0.5. The relay is connected through C.T. of 400/5A. The fault current is 4000A. The operating time for PSM of 8 is 3.2 Second.

Section – II

Q.4 Solve any Four. **16**

- a) Explain differential protection scheme used for transformer.
- b) Explain restricted earth fault protection scheme used for generator.
- c) Explain current zero interruption method of arc in circuit breaker.
- d) Explain arcing phenomenon in circuit breaker.
- e) With suitable diagram explain construction & operation of vacuum circuit breaker.
- f) Explain the causes of over voltages in power system.

Q.5 Solve any Two. **12**

- a) Explain differential protection of bus bar with neat diagram.
- b) With suitable diagram explain construction & operation of SF6 circuit breaker. Also state its advantages and disadvantages.
- c) Explain the phenomenon of capacitive current interruption in circuit breaker with suitable waveforms.

Seat No.

Fourth Y. (B. Tech) (Sem-I) (Old) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING
Switchgear and Protection (197045704)

Day & Date: Saturday, 18-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
 2) Figures to the right indicate full marks.
 3) Assume suitable data if necessary.

Section – I

Q.2 Solve any Four. **16**

- a) What are the advantages of static relay over electromagnetic relay?
- b) What do you mean by zones of protection? Explain primary and backup protection.
- c) What are the factors affecting the selection of fuse?
- d) Explain the following terms
 - i) Fuse element
 - ii) Fusing factor
 - iii) Arcing and pre arcing time
 - iv) Cut-off current
- e) Explain how reactance relay is used for distance protection? Draw its characteristics on R-X diagram.
- f) Describe microprocessor based reactance relay with block diagram.

Q.3 Solve any Two. **12**

- a) Describe microprocessor based mho & offset mho relay with block diagram.
- b) With a neat sketch explain electromagnetic induction relay.
- c) Determine the time of operation of an IDMT relay rating 5A and having setting of 125% and TSM = 0.5. The relay is connected through C.T. of 400/5A. The fault current is 4000A. The operating time for PSM of 8 is 3.2 Second.

Section – II

Q.4 Solve any Four. **16**

- a) Explain differential protection scheme used for transformer.
- b) Explain restricted earth fault protection scheme used for generator.
- c) Explain current zero interruption method of arc in circuit breaker.
- d) Explain arcing phenomenon in circuit breaker.
- e) With suitable diagram explain construction & operation of vacuum circuit breaker.
- f) Explain the causes of over voltages in power system.

Q.5 Solve any Two. **12**

- a) Explain differential protection of bus bar with neat diagram.
- b) With suitable diagram explain construction & operation of SF6 circuit breaker. Also state its advantages and disadvantages.
- c) Explain the phenomenon of capacitive current interruption in circuit breaker with suitable waveforms.

Fourth Y. (B. Tech) (Sem-I) (Old) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING
Switchgear and Protection (197045704)

Day & Date: Saturday, 18-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct answer

14

- 1) Relay is preferred for phase fault on short transmission line.
 - a) Induction type
 - b) Reactance
 - c) Impedance
 - d) None of the above
- 2) Which of the following relay has inherent directional characteristics?
 - a) Mho relay
 - b) Impedance relay
 - c) Reactance relay
 - d) Distance
- 3) Which of the following ratings of the transformer differential protection is recommended?
 - a) Above 30 kVA
 - b) Equal to and above 5 MVA
 - c) Equal to and above 25 MVA
 - d) None of the above
- 4) In a single bus-bar system there will be complete shut down when _____.
 - a) Fault occurs on the bus itself
 - b) Fault occurs on neutral line
 - c) Two or more faults occur simultaneously
 - d) Fault occurs with respect to earthing
- 5) Rate of rise of restriking voltage depend on _____.
 - a) Type of circuit breaker
 - b) Capacitance of the system
 - c) Inductance of the system
 - d) Both (b) and (c)
- 6) What is the arc voltage in a circuit breaker?
 - a) In phase with the arc current
 - b) Lagging the arc current by 90°
 - c) Leading the arc current by 90°
 - d) Lagging the arcing current by 180°
- 7) Circuit breakers usually operate under _____.
 - a) Steady short circuit current
 - b) Sub transient state of short circuit current
 - c) Transient state of short circuit current
 - d) None of these
- 8) What is the advantage of using oil as the arc quenching medium?
 - a) Good cooling properties
 - b) High dielectric strength
 - c) Acts as an insulator
 - d) All of these

- 9) The protection against over-voltage due to lightning is provided by _____
a) Use of surge diverters b) Low tower footing resistance
c) Use of overhead ground wires d) Any of the above
- 10) On what factor does the operating speed of the relay depend?
a) Rate of flux built up b) Armature core air gap
c) Spring tension d) All of these
- 11) The relay with inverse time characteristic will operate within _____
a) 1.5 sec b) 5 to 10 sec
c) 5 to 20 sec d) 20 to 30 sec
- 12) The operation speed of a relay depends on _____
a) Rate of flux buildup b) Armature core air gap
c) Spring tension d) All the above
- 13) What is the relation between the fusing current and the diameter of the wire?
a) $I = k d^3$ b) $I = k d^{3/2}$
c) $I = k d^2$ d) $I = k d^{2/3}$
- 14) Differential relays are used for the protection of equipment's against _____
a) Internal faults b) Over-current
c) Reverse current d) Reverse

2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the given options.**14**

- 1) In the given options, the non-commercial source of energy is _____.
 - a) Coal
 - b) Lignite
 - c) Firewood
 - d) Refined petroleum products
- 2) Reactive power is measured in terms of _____.
 - a) KW
 - b) KVA
 - c) KVAR
 - d) None of these
- 3) One unit of electricity is equivalent to _____ kcal heat units.
 - a) 800
 - b) 860
 - c) 400
 - d) 680
- 4) Which instrument is used to monitor O₂, CO in flue gas?
 - a) Combustion analyzer
 - b) Power analyzer
 - c) Pyrometer
 - d) Fyrite
- 5) Non-contact speed measurements can be carried out by _____.
 - a) Tachometer
 - b) Stroboscope
 - c) Oscilloscope
 - d) Speedometer
- 6) Sankey diagram shows in graphics _____.
 - a) Energy input
 - b) Energy output
 - c) Energy balance
 - d) All of the above
- 7) The support for energy management is expressed in a formal written declaration of commitment. This is called _____.
 - a) Company policy
 - b) Management policy
 - c) Energy policy
 - d) Energy efficiency
- 8) The force field analysis in energy action planning deals with barrier having _____.
 - a) Positive force only
 - b) Negative force only
 - c) Both negative and positive force
 - d) No force

- 9) Energy manager should be well versed with _____.
a) Manufacturing and processing skills
b) Managerial and technical skills
c) Technical and marketing skills
d) Managerial and Commercial Skills
- 10) The judicious and effective use of energy to maximize profits and enhance competitive positions". This can be the definition of _____.
a) Energy conservation
b) Energy management
c) Energy policy
d) Energy Audit
- 11) Acid rain is caused by the release of the following components from combustion of fuels.
a) SO_x and NO_x
b) SO_x and CO₂
c) CO₂ and NO_x
d) H₂O
- 12) Power factor of a load can be improved by using _____.
a) Static capacitors
b) Synchronous condenser
c) neither a) or b)
d) All of the above
- 13) The capital cost of generating equipment, transmission system and distribution system comes under _____.
a) Fixed capital
b) Running capital
c) Both fixed and running capital
d) All of these
- 14) Demand Side Management is required to _____.
a) Reduce overall cost of installed capacity
b) Reduce needs of peaking station
c) Ensure quality and equity of supply
d) All of the above

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.
 4) Assume suitable data wherever needed and mention it clearly.
 5) Separate answer books for each section.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options and rewrite the sentence. 14

- 1) Autocorrelation is defined with _____.
 a) $\sum_{h=-\infty}^{\infty} x(h)y(h-l)$ b) $\sum_{h=-\infty}^{\infty} x(n)x(n-l)$
 c) $\sum_{h=-\infty}^{\infty} x(k)y(h-k)$ d) None of the above
- 2) $X(0)$ value of 5 point sequence $x(n) = \{1, 4, 6, 8, 10\}$ is _____.
 a) 21 b) 22
 c) 29 d) None
- 3) Multiplication is required to compute N point DFT _____.
 a) N b) $N(N-1)$
 c) N^2 d) N^3
- 4) With zero padding DFT is used as _____.
 a) Circular filtering b) Linear filtering
 c) FFT calculations d) Overlap add method
- 5) The size of input data blocks in the overlap-add method is _____.
 a) L b) $L+M$
 c) $L+M+1$ d) $L+M-1$
- 6) If the sequence $x(n)$ is real & odd the its corresponding DFT values are _____.
 a) Imaginary and odd b) Imaginary and even
 c) Real and Even d) None
- 7) When a sequence is circularly shifted in time by 5 units, the magnitude response _____.
 a) Increase by 5 b) Remain unchanged
 c) Shift by 5 units d) None

- 8) The frequency sampling structure is efficient because _____.
 a) Sample points are less
 b) Some sampled DFT coefficients are zero when the filter is a narrow band
 c) Some sampled values can be assumed zero
 d) Parallel structures are efficient
- 9) For the impulse response of the FIR filter to satisfy constant group delay, the phase is given by _____.
 a) $\theta(w) = -\alpha w$
 b) $\theta(w) = \alpha w$
 c) $\theta(w) = \beta - \alpha w$
 d) $\theta(w) = 0$
- 10) FIR filter is always stable because _____.
 a) All its poles are at origin
 b) All its zeros are at origin
 c) $h(n) = h(N - 1 - n)$
 d) None
- 11) Which of the following mapping is true between the s-plane and z-domain?
 a) Points in LHP of the s-plane into points inside the circle in the z-domain
 b) Points in RHP of the s-plane into points outside the circle in the z-domain
 c) Points on the imaginary axis of the s-plane into points onto the circle in z-domain
 d) All of the mentioned
- 12) Poles of Butterworth filter lies on _____.
 a) Ellipse
 b) Circle
 c) Parabola
 d) None
- 13) The mapping of s-plane to z-plane in bilinear transformation is _____.
 a) $S = \frac{2}{3T} \left[\frac{1 - z^{-1}}{1 + z^{-1}} \right]$
 b) $S = \frac{2}{T} \left[\frac{1 - z^{-1}}{1 + z^{-1}} \right]$
 c) $S = \frac{2}{T} \left[\frac{1 + z^{-1}}{1 - z^{-1}} \right]$
 d) None
- 14) In the IIR system, which of the following structure will give direct relation between the time domain and Z domain.
 a) Direct form I
 b) Direct form II
 c) Cascade form
 d) Parallel form

Fourth Y. (B. Tech) (Sem - I) (Old) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING
Digital Signal Processing (197045708)

Day & Date: Sunday, 19-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
 2) Figures to the right indicate full marks.
 3) Draw neat diagrams whenever necessary.
 4) Assume suitable data if necessary.
 5) Separate answer books for each section.

Section – I

Q.2 Attempt any Four of the following. 16

- Find cross-correlation of sequence $x(n) = \{1, 2, 1, 1, -1\}$ and $y(n) = \{1, 1, 2, 1\}$
- The first 5 points of the 8-point DFT of a real-valued sequence are $\{28, -4 + j9.565, -4 + j4, -4 + j1.656, -4\}$ Determine the remaining 3 Points.
- Find IDFT of $X(k) = \{16, -4 + 2j, -4, -4, -2j\}$
- List the properties of DFT & explain the circular convolution properties of DFT.
- Explain DSP Architecture and how it can be used for the measurement of electrical quantities.

Q.3 Attempt any Two of the following. 12

- Find linear convolution Using the overlap save method, of the following sequence $x(n) = \{3, 0, -2, 0, 2, 1, 0, -2, -1, 0, 4, 6, 7\}$ $h(n) = \{2, 2, 1\}$
- Write in detail the properties of Discrete Wavelet Transform
- Write a note on DWT.

Section – II

Q.4 Attempt any Four of the following. 16

- List down the design steps in implementing the IIR filter.
- What are finite word length effects in the FIR filter?
- State the advantage of digital filter over Analog filter.
- What is the warping effect? What is its effect on magnitude and phase response?
- Write a note on the LMS Algorithm.

Q.5 Attempt any Two of the following 12

- Explain in detail Adaptive Signal Processing.
- Design seven coefficients FIR LPF using frequency sampling method with the following specifications $H_d(e^{jw}) = e^{-j(N-1)w/2}$ for $0 \leq w \leq \pi/2$
 $= 0$ for $\pi/2 \leq w \leq \pi$
- Using Bilinear transformation obtain $H(z)$ if $\frac{2}{(s+2)(s+1)}$ and $T = 1$ sec.

Fourth Y. (B. Tech) (Sem - I) (Old) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING
Digital Signal Processing (197045708)

Day & Date: Sunday, 19-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.
 4) Assume suitable data wherever needed and mention it clearly.
 5) Separate answer books for each section.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options and rewrite the sentence. 14

- 1) The frequency sampling structure is efficient because _____.
 - a) Sample points are less
 - b) Some sampled DFT coefficients are zero when the filter is a narrow band
 - c) Some sampled values can be assumed zero
 - d) Parallel structures are efficient
- 2) For the impulse response of the FIR filter to satisfy constant group delay, the phase is given by _____.
 - a) $\theta(\omega) = -\alpha\omega$
 - b) $\theta(\omega) = \alpha\omega$
 - c) $\theta(\omega) = \beta - \alpha\omega$
 - d) $\theta(\omega) = 0$
- 3) FIR filter is always stable because _____.
 - a) All its poles are at origin
 - b) All its zeros are at origin
 - c) $h(n) = h(N - 1 - n)$
 - d) None
- 4) Which of the following mapping is true between the s-plane and z-domain?
 - a) Points in LHP of the s-plane into points inside the circle in the z-domain
 - b) Points in RHP of the s-plane into points outside the circle in the z-domain
 - c) Points on the imaginary axis of the s-plane into points onto the circle in z-domain
 - d) All of the mentioned
- 5) Poles of Butterworth filter lies on _____.
 - a) Ellipse
 - b) Circle
 - c) Parabola
 - d) None
- 6) The mapping of s-plane to z-plane in bilinear transformation is _____.
 - a) $S = \frac{2}{3T} \left[\frac{1 - z^{-1}}{1 + z^{-1}} \right]$
 - b) $S = \frac{2}{T} \left[\frac{1 - z^{-1}}{1 + z^{-1}} \right]$
 - c) $S = \frac{2}{T} \left[\frac{1 + z^{-1}}{1 - z^{-1}} \right]$
 - d) None

- 7) In the IIR system, which of the following structure will give direct relation between the time domain and Z domain.
- | | |
|------------------|-------------------|
| a) Direct form I | b) Direct form II |
| c) Cascade form | d) Parallel form |
- 8) Autocorrelation is defined with _____.
- | | |
|-------------------------------------------|-------------------------------------------|
| a) $\sum_{h=-\infty}^{\infty} x(h)y(h-l)$ | b) $\sum_{h=-\infty}^{\infty} x(n)x(n-l)$ |
| c) $\sum_{h=-\infty}^{\infty} x(k)y(h-k)$ | d) None of the above |
- 9) $X(0)$ value of 5 point sequence $x(n) = \{1, 4, 6, 8, 10\}$ is _____.
- | | |
|-------|---------|
| a) 21 | b) 22 |
| c) 29 | d) None |
- 10) Multiplication is required to compute N point DFT _____.
- | | |
|----------|-------------|
| a) N | b) $N(N-1)$ |
| c) N^2 | d) N^3 |
- 11) With zero padding DFT is used as _____.
- | | |
|-----------------------|-----------------------|
| a) Circular filtering | b) Linear filtering |
| c) FFT calculations | d) Overlap add method |
- 12) The size of input data blocks in the overlap-add method is _____.
- | | |
|------------|------------|
| a) L | b) $L+M$ |
| c) $L+M+1$ | d) $L+M-1$ |
- 13) If the sequence $x(n)$ is real & odd the its corresponding DFT values are _____.
- | | |
|----------------------|-----------------------|
| a) Imaginary and odd | b) Imaginary and even |
| c) Real and Even | d) None |
- 14) When a sequence is circularly shifted in time by 5 units, the magnitude response _____.
- | | |
|---------------------|---------------------|
| a) Increase by 5 | b) Remain unchanged |
| c) Shift by 5 units | d) None |

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the given options.

14

- 1) The PLC was invented by _____
- | | |
|----------------|-------------------|
| a) Bills Gates | b) Dick Morley |
| c) Bill Landis | d) Tod Cunningham |
- 2) Figure shows the ladder logic for _____

- | | |
|---------------|----------------|
| a) NAND Gate | b) Ex-NOR Gate |
| c) Ex-OR Gate | d) OR Gate |
- 3) The integral control _____
- | |
|--------------------------------------|
| a) Increases the steady state error |
| b) Decreases the steady state error |
| c) Increases the noise and stability |
| d) Decreases the damping coefficient |
- 4) Which of the following are layers in the TCP/IP model?
1. Application
 2. Session
 3. Transport
 4. Internet
 5. Data Link
 6. Physical
- | | |
|---------------|---------------|
| a) 1 and 2 | b) 1, 3 and 4 |
| c) 2, 3 and 5 | d) 3, 4 and 5 |
- 5) In OSI model layer No. 4 consist of _____
- | | |
|-------------------|--------------------|
| a) Physical layer | b) Data link layer |
| c) Network layer | d) Transport layer |
- 6) To develop a logical AND gate the NO switch should be connected.
- | | |
|----------------|-------------------------|
| a) In series | b) Series & parallel |
| c) In parallel | d) Neither of the above |

- 7) Analog I/O modules deals with _____
- a) Continuously Variables Analog signals
 - b) Discrete Analog Signals
 - c) Continuously Variables digital signals
 - d) Discrete digital Signals
- 8) OSI stands for _____
- a) Open system interconnection
 - b) Operating system interface
 - c) Optical service implementation
 - d) None of the above
- 9) SCADA system is _____
- a) Software
 - b) Hardware
 - c) Combination of Software & Hardware
 - d) None of the above
- 10) Input with a particular terminal number can be used.
- a) Many times in a Program
 - b) Only once in a Program
 - c) Only once in a Rung
 - d) None of the above
- 11) Which of the following protocol used for HVAC control, building automation?
- a) Modbus
 - b) Device Net
 - c) DNP 3.0
 - d) BAC Net
- 12) Ethernet frame consists of _____
- a) MAC address
 - b) IP address
 - c) Both a) and b)
 - d) None of the mentioned
- 13) How do the variations in an average value get affected by PWM period?
- a) Longer the PWM period, faster will be the variation in an average value
 - b) Shorter the PWM period, faster will be the variation in an average value
 - c) Shorter the PWM period, slower will be the variation in an average value
 - d) Longer the PWM period, slower will be the variation in an average value
- 14) A down counter CTD undergoes a count action _____
- a) Each time a rung is true; decreases the accumulated value by one
 - b) Each time a rung is false; decreases the accumulated value by one
 - c) Each time a rung is true; increases the accumulated value by one
 - d) None of these

Fourth Y. (B. Tech) (Sem - I) (Old) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING
Programmable Logic Control and SCADA (197045709)

Day & Date: Sunday, 19-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
 2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any Four of the following. **16**

- a) Define programmable logic controller. Explain central processing unit in detail along with the three important parts in it.
- b) Explain brief history of PLC along with some important names.
- c) Explain Speed control of DC motor with DC Source.
- d) What are the different programming languages used in PLC? Explain each in detail.
- e) Differentiate clearly between ON delay timer and OFF delay timer.
- f) Draw and Explain AND, EX-OR gate using Truth Table.

Q.3 Solve any Two of the following. **12**

- a) Compare merits of ladder logic with relay logic.
- b) Draw the ladder and relay logic diagram for the following table :
 Input - I1, I2
 Output – Q1, Q2, Q3, Q4

I1	I2	Q1	Q2	Q3	Q4
0	0	1	1	1	0
0	1	0	1	1	1
1	0	1	0	1	1
1	1	1	1	0	1

- c) Develop PLC Logic for DC Motor In Forward & Reverse Direction.
 - i) Forward stop Reverse starter
 - ii) Forward Reverse Starter

Section – II

Q.4 Solve any Four of the following. **16**

- a) Explain Device Net protocol in detail.
- b) Explain Second generation SCADA architecture.
- c) Explain IEC61850 layered architecture protocol.
- d) Enlist various application of SCADA in industries Explain any one in details.
- e) What is DNP3 protocol? Explain.

Q.5 Solve any Two of the following. **12**

- a) What is open system Interconnection Protocols? Explain function of each layer in detail. What is the difference between OSI and TCP/ IP Model?
- b) Draw and explain SCADA system in water purification system.
- c) Explain block Diagram of RTU and its functions.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the given options.

14

- 1) OSI stands for _____
 - a) Open system interconnection
 - b) Operating system interface
 - c) Optical service implementation
 - d) None of the above
- 2) SCADA system is _____
 - a) Software
 - b) Hardware
 - c) Combination of Software & Hardware
 - d) None of the above
- 3) Input with a particular terminal number can be used.
 - a) Many times in a Program
 - b) Only once in a Program
 - c) Only once in a Rung
 - d) None of the above
- 4) Which of the following protocol used for HVAC control, building automation?
 - a) Modbus
 - b) Device Net
 - c) DNP 3.0
 - d) BAC Net
- 5) Ethernet frame consists of _____
 - a) MAC address
 - b) IP address
 - c) Both a) and b)
 - d) None of the mentioned
- 6) How do the variations in an average value get affected by PWM period?
 - a) Longer the PWM period, faster will be the variation in an average value
 - b) Shorter the PWM period, faster will be the variation in an average value
 - c) Shorter the PWM period, slower will be the variation in an average value
 - d) Longer the PWM period, slower will be the variation in an average value
- 7) A down counter CTD undergoes a count action _____
 - a) Each time a rung is true; decreases the accumulated value by one
 - b) Each time a rung is false; decreases the accumulated value by one
 - c) Each time a rung is true; increases the accumulated value by one
 - d) None of these
- 8) The PLC was invented by _____
 - a) Bills Gates
 - b) Dick Morley
 - c) Bill Landis
 - d) Tod Cunningham

9) Figure shows the ladder logic for _____

- a) NAND Gate
b) Ex-NOR Gate
c) Ex-OR Gate
d) OR Gate
- 10) The integral control _____
a) Increases the steady state error
b) Decreases the steady state error
c) Increases the noise and stability
d) Decreases the damping coefficient
- 11) Which of the following are layers in the TCP/IP model?
1. Application
2. Session
3. Transport
4. Internet
5. Data Link
6. Physical
a) 1 and 2
b) 1, 3 and 4
c) 2, 3 and 5
d) 3, 4 and 5
- 12) In OSI model layer No. 4 consist of _____
a) Physical layer
b) Data link layer
c) Network layer
d) Transport layer
- 13) To develop a logical AND gate the NO switch should be connected.
a) In series
b) Series & parallel
c) In parallel
d) Neither of the above
- 14) Analog I/O modules deals with _____
a) Continuously Variables Analog signals
b) Discrete Analog Signals
c) Continuously Variables digital signals
d) Discrete digital Signals

Set Q

Fourth Y. (B. Tech) (Sem - I) (Old) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING
Programmable Logic Control and SCADA (197045709)

Day & Date: Sunday, 19-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

Instructions: 1) All questions are compulsory.
 2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any Four of the following. **16**

- Define programmable logic controller. Explain central processing unit in detail along with the three important parts in it.
- Explain brief history of PLC along with some important names.
- Explain Speed control of DC motor with DC Source.
- What are the different programming languages used in PLC? Explain each in detail.
- Differentiate clearly between ON delay timer and OFF delay timer.
- Draw and Explain AND, EX-OR gate using Truth Table.

Q.3 Solve any Two of the following. **12**

- Compare merits of ladder logic with relay logic.
- Draw the ladder and relay logic diagram for the following table :
 Input - I1, I2
 Output – Q1, Q2, Q3, Q4

I1	I2	Q1	Q2	Q3	Q4
0	0	1	1	1	0
0	1	0	1	1	1
1	0	1	0	1	1
1	1	1	1	0	1

- Develop PLC Logic for DC Motor In Forward & Reverse Direction.
 - Forward stop Reverse starter
 - Forward Reverse Starter

Section – II

Q.4 Solve any Four of the following. **16**

- Explain Device Net protocol in detail.
- Explain Second generation SCADA architecture.
- Explain IEC61850 layered architecture protocol.
- Enlist various application of SCADA in industries Explain any one in details.
- What is DNP3 protocol? Explain.

Q.5 Solve any Two of the following. **12**

- What is open system Interconnection Protocols? Explain function of each layer in detail. What is the difference between OSI and TCP/ IP Model?
- Draw and explain SCADA system in water purification system.
- Explain block Diagram of RTU and its functions.

Seat No.	
----------	--

Fourth Y. (B. Tech) (Sem - I) (Old) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING
Programmable Logic Control and SCADA (197045709)

Day & Date: Sunday, 19-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the given options. 14

- 1) Which of the following protocol used for HVAC control, building automation?
 - a) Modbus
 - b) Device Net
 - c) DNP 3.0
 - d) BAC Net
- 2) Ethernet frame consists of _____
 - a) MAC address
 - b) IP address
 - c) Both a) and b)
 - d) None of the mentioned
- 3) How do the variations in an average value get affected by PWM period?
 - a) Longer the PWM period, faster will be the variation in an average value
 - b) Shorter the PWM period, faster will be the variation in an average value
 - c) Shorter the PWM period, slower will be the variation in an average value
 - d) Longer the PWM period, slower will be the variation in an average value
- 4) A down counter CTD undergoes a count action _____
 - a) Each time a rung is true; decreases the accumulated value by one
 - b) Each time a rung is false; decreases the accumulated value by one
 - c) Each time a rung is true; increases the accumulated value by one
 - d) None of these
- 5) The PLC was invented by _____
 - a) Bills Gates
 - b) Dick Morley
 - c) Bill Landis
 - d) Tod Cunningham
- 6) Figure shows the ladder logic for _____

- a) NAND Gate
- b) Ex-NOR Gate
- c) Ex-OR Gate
- d) OR Gate

- 7) The integral control _____
- a) Increases the steady state error
 - b) Decreases the steady state error
 - c) Increases the noise and stability
 - d) Decreases the damping coefficient
- 8) Which of the following are layers in the TCP/IP model?
- 1. Application
 - 2. Session
 - 3. Transport
 - 4. Internet
 - 5. Data Link
 - 6. Physical
- a) 1 and 2
 - b) 1, 3 and 4
 - c) 2, 3 and 5
 - d) 3, 4 and 5
- 9) In OSI model layer No. 4 consist of _____
- a) Physical layer
 - b) Data link layer
 - c) Network layer
 - d) Transport layer
- 10) To develop a logical AND gate the NO switch should be connected.
- a) In series
 - b) Series & parallel
 - c) In parallel
 - d) Neither of the above
- 11) Analog I/O modules deals with _____
- a) Continuously Variables Analog signals
 - b) Discrete Analog Signals
 - c) Continuously Variables digital signals
 - d) Discrete digital Signals
- 12) OSI stands for _____
- a) Open system interconnection
 - b) Operating system interface
 - c) Optical service implementation
 - d) None of the above
- 13) SCADA system is _____
- a) Software
 - b) Hardware
 - c) Combination of Software & Hardware
 - d) None of the above
- 14) Input with a particular terminal number can be used.
- a) Many times in a Program
 - b) Only once in a Program
 - c) Only once in a Rung
 - d) None of the above

Seat No.

Set **R**

Fourth Y. (B. Tech) (Sem - I) (Old) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING
Programmable Logic Control and SCADA (197045709)

Day & Date: Sunday, 19-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
 2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any Four of the following. **16**

- a) Define programmable logic controller. Explain central processing unit in detail along with the three important parts in it.
- b) Explain brief history of PLC along with some important names.
- c) Explain Speed control of DC motor with DC Source.
- d) What are the different programming languages used in PLC? Explain each in detail.
- e) Differentiate clearly between ON delay timer and OFF delay timer.
- f) Draw and Explain AND, EX-OR gate using Truth Table.

Q.3 Solve any Two of the following. **12**

- a) Compare merits of ladder logic with relay logic.
- b) Draw the ladder and relay logic diagram for the following table :
 Input - I1, I2
 Output – Q1, Q2, Q3, Q4

I1	I2	Q1	Q2	Q3	Q4
0	0	1	1	1	0
0	1	0	1	1	1
1	0	1	0	1	1
1	1	1	1	0	1

- c) Develop PLC Logic for DC Motor In Forward & Reverse Direction.
 - i) Forward stop Reverse starter
 - ii) Forward Reverse Starter

Section – II

Q.4 Solve any Four of the following. **16**

- a) Explain Device Net protocol in detail.
- b) Explain Second generation SCADA architecture.
- c) Explain IEC61850 layered architecture protocol.
- d) Enlist various application of SCADA in industries Explain any one in details.
- e) What is DNP3 protocol? Explain.

Q.5 Solve any Two of the following. **12**

- a) What is open system Interconnection Protocols? Explain function of each layer in detail. What is the difference between OSI and TCP/ IP Model?
- b) Draw and explain SCADA system in water purification system.
- c) Explain block Diagram of RTU and its functions.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the given options. 14

- 1) To develop a logical AND gate the NO switch should be connected.
 - a) In series
 - b) Series & parallel
 - c) In parallel
 - d) Neither of the above
- 2) Analog I/O modules deals with _____
 - a) Continuously Variables Analog signals
 - b) Discrete Analog Signals
 - c) Continuously Variables digital signals
 - d) Discrete digital Signals
- 3) OSI stands for _____
 - a) Open system interconnection
 - b) Operating system interface
 - c) Optical service implementation
 - d) None of the above
- 4) SCADA system is _____
 - a) Software
 - b) Hardware
 - c) Combination of Software & Hardware
 - d) None of the above
- 5) Input with a particular terminal number can be used.
 - a) Many times in a Program
 - b) Only once in a Program
 - c) Only once in a Rung
 - d) None of the above
- 6) Which of the following protocol used for HVAC control, building automation?
 - a) Modbus
 - b) Device Net
 - c) DNP 3.0
 - d) BAC Net
- 7) Ethernet frame consists of _____
 - a) MAC address
 - b) IP address
 - c) Both a) and b)
 - d) None of the mentioned
- 8) How do the variations in an average value get affected by PWM period?
 - a) Longer the PWM period, faster will be the variation in an average value
 - b) Shorter the PWM period, faster will be the variation in an average value
 - c) Shorter the PWM period, slower will be the variation in an average value
 - d) Longer the PWM period, slower will be the variation in an average value

- 9) A down counter CTD undergoes a count action _____
- Each time a rung is true; decreases the accumulated value by one
 - Each time a rung is false; decreases the accumulated value by one
 - Each time a rung is true; increases the accumulated value by one
 - None of these
- 10) The PLC was invented by _____
- Bills Gates
 - Dick Morley
 - Bill Landis
 - Tod Cunningham
- 11) Figure shows the ladder logic for _____

- NAND Gate
 - Ex-NOR Gate
 - Ex-OR Gate
 - OR Gate
- 12) The integral control _____
- Increases the steady state error
 - Decreases the steady state error
 - Increases the noise and stability
 - Decreases the damping coefficient
- 13) Which of the following are layers in the TCP/IP model?
- Application
 - Session
 - Transport
 - Internet
 - Data Link
 - Physical
- 1 and 2
 - 2, 3 and 5
 - 1, 3 and 4
 - 3, 4 and 5
- 14) In OSI model layer No. 4 consist of _____
- Physical layer
 - Data link layer
 - Network layer
 - Transport layer

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any Four of the following. **16**

- a) Define programmable logic controller. Explain central processing unit in detail along with the three important parts in it.
- b) Explain brief history of PLC along with some important names.
- c) Explain Speed control of DC motor with DC Source.
- d) What are the different programming languages used in PLC? Explain each in detail.
- e) Differentiate clearly between ON delay timer and OFF delay timer.
- f) Draw and Explain AND, EX-OR gate using Truth Table.

Q.3 Solve any Two of the following. **12**

- a) Compare merits of ladder logic with relay logic.
- b) Draw the ladder and relay logic diagram for the following table :
Input - I1, I2
Output – Q1, Q2, Q3, Q4

I1	I2	Q1	Q2	Q3	Q4
0	0	1	1	1	0
0	1	0	1	1	1
1	0	1	0	1	1
1	1	1	1	0	1

- c) Develop PLC Logic for DC Motor In Forward & Reverse Direction.
 - i) Forward stop Reverse starter
 - ii) Forward Reverse Starter

Section – II

Q.4 Solve any Four of the following. **16**

- a) Explain Device Net protocol in detail.
- b) Explain Second generation SCADA architecture.
- c) Explain IEC61850 layered architecture protocol.
- d) Enlist various application of SCADA in industries Explain any one in details.
- e) What is DNP3 protocol? Explain.

Q.5 Solve any Two of the following. **12**

- a) What is open system Interconnection Protocols? Explain function of each layer in detail. What is the difference between OSI and TCP/ IP Model?
- b) Draw and explain SCADA system in water purification system.
- c) Explain block Diagram of RTU and its functions.

ELECTRICAL ENGINEERING
High Voltage Engineering (197045710)**

Day & Date: Sunday, 19-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct answer:

14

- 1) As compared to air the relative dielectric strength of Sulphur hexafluoride is nearly _____
 - a) 1.5 times
 - b) 2.5 times
 - c) 4.0 times
 - d) 5.0 times
- 2) Formative time lag depends on the mechanism of the avalanche growth in gap the formative time lag is usually.
 - a) Much shorter than the statistical time lag
 - b) Much greater than the statistical time lag
 - c) Equal to the statistical time lag
 - d) None of these
- 3) The conventional direction of electric field is _____
 - a) Positive to negative
 - b) Negative to positive
 - c) No specific direction
 - d) Direction cannot be determined
- 4) For the high voltage conductors at high pressures, if the voltage is positive then the corona appears as a _____
 - a) Uniform bluish white sheath
 - b) Reddish glowing spots
 - c) Uniform greenish spots
 - d) None of these
- 5) The intrinsic breakdown strength of solid dielectrics is about _____
 - a) 50 to 100 kV/mm
 - b) 500 to 1000 kV/mm
 - c) 5 to 10 kV/mm
 - d) 1 to 5 kV/mm
- 6) Electrochemical breakdown & deterioration of insulating material is due to _____
 - a) Temperature rise
 - b) Oxidation, hydrolysis or some other chemical action
 - c) Only due to hydrolysis and moisture effects
 - d) none of the above

- 7) The necessary condition for performing sphere gap test is _____
- Should be between 0.7 μ s and 0.8 μ s
 - The length of gap should be smaller than radius of sphere
 - The length of gap should be 4 times greater than radius of sphere
 - D. An impulse wave of 50000 kV should be applied Wave front time
- 8) Van de Graff generators are useful for _____
- Very high voltage and low current applications
 - Very high voltage and high current applications
 - High voltage pulses only
 - Constant high voltage and current applications
- 9) The generating voltmeter is driven by _____ which _____ energy from measuring source.
- Constant speed motor, absorbs
 - Variable speed motor, doesn't absorb
 - Constant speed motor, doesn't absorb
 - Variable speed motor, absorbs
- 10) For the measurement of radio interference voltages, the detector circuit is provided with a measuring device to measure:
- Quasi-peak value
 - Peak value
 - Average value
 - All of the above
- 11) Impulse testing of transformers is done using _____
- Full wave standard impulse
 - Chopped wave standard impulse
 - Half wave standard impulse
 - only (a) and (b)
 - None of these
- 12) A small high-voltage laboratory usually will have _____
- Ac, dc test sources with ratings less than 100 KV, 10kVA/KW and impulse of voltage 400kv, 5kJ
 - Ac, dc test sources of 500 kV, 100 kVA/kW, and impulse of 1 MV 10KJ
 - Ac, voltage sources of 300 kV, 10 kVA, and impulse voltage of 1 MV, 15KJ
 - Ac, dc sources only
- 13) The clearances normally adopted in by laboratories for ac and impulse voltages are _____
- 100 to 200 kv/m for ac and 500 kV/m for impulse
 - 300 kv/ m for ac and 500 kV/m for impulse
 - 30 kV/m for ac and 50 kV/m for impulse
 - 10 kV/m for ac and 50 kV/m for impulse
- 14) In routine test, the cable is tested by applying an ac voltage _____
- 2 times the rated value
 - 2.5 times the rated value
 - 3 times the rated value
 - 3.5 times the rated value

Fourth Y. (B. Tech) (Sem - I) (Old) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING
High Voltage Engineering (197045710)

Day & Date: Sunday, 19-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt Any Four of the following. 16

- Write a short note on Gas/Vacuum as insulators.
- Write a short note on characteristics liquid insulators.
- State & derive Paschen's law and equation along with Explanations of V and Pd.
- Explain estimation and control of electric stresses.
- Write short note on breakdown in solid dielectrics due to treeing and tracking.

Q.3 Attempt Any Two of the following. 12

- Explain electrochemical breakdown and thermal breakdown.
- Explain post breakdown phenomena and applications.
- Write short note on Townsend's current growth equation and its secondary ionization process with current equation.

Section – II

Q.4 Attempt Any Four of the following. 16

- Write a short note on CRO for impulse voltage and current measurement
- Explain briefly various tests to be carried out on abushing.
- Explain Cockcroft-Walton multiplier.
- Write a short note on grounding of impulse testing laboratories.
- What is the necessary arrangement required for arrangement required for testing of insulators.

Q.5 Attempt Any Two of the following 12

- Explain sphere gap.
- Discuss the classification of high voltage laboratories, size and ratings of high voltage laboratories.
- Write short note on analysis of impulse generator circuit of series RL-C circuit.

**Fourth Y. (B. Tech) (Sem - I) (Old) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING
High Voltage Engineering (197045710)**

Day & Date: Sunday, 19-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct answer:

14

- 1) Van de Graff generators are useful for _____
 - a) Very high voltage and low current applications
 - b) Very high voltage and high current applications
 - c) High voltage pulses only
 - d) Constant high voltage and current applications
- 2) The generating voltmeter is driven by _____ which _____ energy from measuring source.
 - a) Constant speed motor, absorbs
 - b) Variable speed motor, doesn't absorb
 - c) Constant speed motor, doesn't absorb
 - d) Variable speed motor, absorbs
- 3) For the measurement of radio interference voltages, the detector circuit is provided with a measuring device to measure:
 - a) Quasi-peak value
 - b) Peak value
 - c) Average value
 - d) All of the above
- 4) Impulse testing of transformers is done using _____
 - a) Full wave standard impulse
 - b) Chopped wave standard impulse
 - c) Half wave standard impulse
 - d) only (a) and (b)
 - e) None of these
- 5) A small high-voltage laboratory usually will have _____
 - a) Ac, dc test sources with ratings less than 100 KV, 10kVA/KW and impulse of voltage 400kv, 5kJ
 - b) Ac, dc test sources of 500 kV, 100 kVA/kW, and impulse of 1 MV 10KJ
 - c) Ac, voltage sources of 300 kV, 10 kVA, and impulse voltage of 1 MV, 15KJ
 - d) Ac, dc sources only

- 5) The clearances normally adopted in by laboratories for ac and impulse voltages are _____
- 100 to 200 kv/m for ac and 500 kv/m for impulse
 - 300 kv/ m for ac and 500 kv/m for impulse
 - 30 kv/m for ac and 50 kv/m for impulse
 - 10 kv/m for ac and 50 kv/m for impulse
- 7) In routine test, the cable is tested by applying an ac voltage _____
- 2 times the rated value
 - 2.5 times the rated value
 - 3 times the rated value
 - 3.5 times the rated value
- 8) As compared to air the relative dielectric strength of Sulphur hexafluoride is nearly _____
- 1.5 times
 - 2.5 times
 - 4.0 times
 - 5.0 times
- 9) Formative time lag depends on the mechanism of the avalanche growth in gap the formative time lag is usually.
- Much shorter than the statistical time lag
 - Much greater than the statistical time lag
 - Equal to the statistical time lag
 - None of these
- 10) The conventional direction of electric field is _____
- Positive to negative
 - Negative to positive
 - No specific direction
 - Direction cannot be determined
- 11) For the high voltage conductors at high pressures, if the voltage is positive then the corona appears as a _____
- Uniform bluish white sheath
 - Reddish glowing spots
 - Uniform greenish spots
 - None of these
- 12) The intrinsic breakdown strength of solid dielectrics is about _____
- 50 to 100 kv/mm
 - 500 to 1000 kv/mm
 - 5 to 10 kv/mm
 - 1 to 5 kv/mm
- 13) Electrochemical breakdown & deterioration of insulating material is due to _____
- Temperature rise
 - Oxidation, hydrolysis or some other chemical action
 - Only due to hydrolysis and moisture effects
 - none of the above
- 14) The necessary condition for performing sphere gap test is _____
- Should be between 0.7 ?s and 0.8 ?
 - The length of gap should be smaller than radius of sphere
 - The length of gap should be 4 times greater than radius of sphere
 - D. An impulse wave of 50000 kv should be applied Wave front time

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct answer:

14

- 1) Impulse testing of transformers is done using _____
 - a) Full wave standard impulse
 - b) Chopped wave standard impulse
 - c) Half wave standard impulse
 - d) only (a) and (b)
 - e) None of these
- 2) A small high-voltage laboratory usually will have _____
 - a) Ac, dc test sources with ratings less than 100 KV, 10kVA/KW and impulse of voltage 400kv, 5kJ
 - b) Ac, dc test sources of 500 kV, 100 kVA/kW, and impulse of 1 MV 10KJ
 - c) Ac, voltage sources of 300 kV, 10 kVA, and impulse voltage of 1 MV, 15KJ
 - d) Ac, dc sources only
- 3) The clearances normally adopted in by laboratories for ac and impulse voltages are _____
 - a) 100 to 200 kv/m for ac and 500 kV/m for impulse
 - b) 300 kv/ m for ac and 500 kV/m for impulse
 - c) 30 kV/m for ac and 50 kV/m for impulse
 - d) 10 kV/m for ac and 50 kV/m for impulse
- 4) In routine test, the cable is tested by applying an ac voltage _____
 - a) 2 times the rated value
 - b) 2.5 times the rated value
 - c) 3 times the rated value
 - d) 3.5 times the rated value
- 5) As compared to air the relative dielectric strength of Sulphur hexafluoride is nearly _____

a) 1.5 times	b) 2.5 times
c) 4.0 times	d) 5.0 times

- 6) Formative time lag depends on the mechanism of the avalanche growth in gap the formative time lag is usually.
- Much shorter than the statistical time lag
 - Much greater than the statistical time lag
 - Equal to the statistical time lag
 - None of these
- 7) The conventional direction of electric field is _____
- Positive to negative
 - Negative to positive
 - No specific direction
 - Direction cannot be determined
- 8) For the high voltage conductors at high pressures, if the voltage is positive then the corona appears as a _____
- Uniform bluish white sheath
 - Reddish glowing spots
 - Uniform greenish spots
 - None of these
- 9) The intrinsic breakdown strength of solid dielectrics is about _____
- 50 to 100 kV/mm
 - 500 to 1000 kV/mm
 - 5 to 10 kV/mm
 - 1 to 5 kV/mm
- 10) Electrochemical breakdown & deterioration of insulating material is due to _____
- Temperature rise
 - Oxidation, hydrolysis or some other chemical action
 - Only due to hydrolysis and moisture effects
 - none of the above
- 11) The necessary condition for performing sphere gap test is _____
- Should be between 0.7 μ s and 0.8 μ s
 - The length of gap should be smaller than radius of sphere
 - The length of gap should be 4 times greater than radius of sphere
 - D. An impulse wave of 50000 kV should be applied Wave front time
- 12) Van de Graff generators are useful for _____
- Very high voltage and low current applications
 - Very high voltage and high current applications
 - High voltage pulses only
 - Constant high voltage and current applications
- 13) The generating voltmeter is driven by _____ which _____ energy from measuring source.
- Constant speed motor, absorbs
 - Variable speed motor, doesn't absorb
 - Constant speed motor, doesn't absorb
 - Variable speed motor, absorbs
- 14) For the measurement of radio interference voltages, the detector circuit is provided with a measuring device to measure:
- Quasi-peak value
 - Peak value
 - Average value
 - All of the above

Seat No.

Fourth Y. (B. Tech) (Sem - I) (Old) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING
High Voltage Engineering (197045710)

Day & Date: Sunday, 19-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt Any Four of the following. 16

- Write a short note on Gas/Vacuum as insulators.
- Write a short note on characteristics liquid insulators.
- State & derive Paschen's law and equation along with Explanations of V and Pd.
- Explain estimation and control of electric stresses.
- Write short note on breakdown in solid dielectrics due to treeing and tracking.

Q.3 Attempt Any Two of the following. 12

- Explain electrochemical breakdown and thermal breakdown.
- Explain post breakdown phenomena and applications.
- Write short note on Townsend's current growth equation and its secondary ionization process with current equation.

Section – II

Q.4 Attempt Any Four of the following. 16

- Write a short note on CRO for impulse voltage and current measurement
- Explain briefly various tests to be carried out on abushing.
- Explain Cockcroft-Walton multiplier.
- Write a short note on grounding of impulse testing laboratories.
- What is the necessary arrangement required for arrangement required for testing of insulators.

Q.5 Attempt Any Two of the following 12

- Explain sphere gap.
- Discuss the classification of high voltage laboratories, size and ratings of high voltage laboratories.
- Write short note on analysis of impulse generator circuit of series RL-C circuit.

Seat No.

**Fourth Y. (B. Tech) (Sem - I) (Old) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING
High Voltage Engineering (197045710)**

Day & Date: Sunday, 19-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct answer: 14

- 1) Electrochemical breakdown & deterioration of insulating material is due to ____
 - a) Temperature rise
 - b) Oxidation, hydrolysis or some other chemical action
 - c) Only due to hydrolysis and moisture effects
 - d) none of the above
- 2) The necessary condition for performing sphere gap test is ____
 - a) Should be between 0.7 μ s and 0.8 μ s
 - b) The length of gap should be smaller than radius of sphere
 - c) The length of gap should be 4 times greater than radius of sphere
 - d) D. An impulse wave of 50000 kV should be applied Wave front time
- 3) Van de Graff generators are useful for ____
 - a) Very high voltage and low current applications
 - b) Very high voltage and high current applications
 - c) High voltage pulses only
 - d) Constant high voltage and current applications
- 4) The generating voltmeter is driven by ____ which ____ energy from measuring source.
 - a) Constant speed motor, absorbs
 - b) Variable speed motor, doesn't absorb
 - c) Constant speed motor, doesn't absorb
 - d) Variable speed motor, absorbs
- 5) For the measurement of radio interference voltages, the detector circuit is provided with a measuring device to measure:

a) Quasi-peak value	b) Peak value
c) Average value	d) All of the above
- 6) Impulse testing of transformers is done using ____
 - a) Full wave standard impulse
 - b) Chopped wave standard impulse
 - c) Half wave standard impulse
 - d) only (a) and (b)
 - e) None of these

- 7) A small high-voltage laboratory usually will have _____
- a) Ac, dc test sources with ratings less than 100 KV, 10kVA/KW and impulse of voltage 400kv, 5kJ
 - b) Ac, dc test sources of 500 kV, 100 kVA/kW, and impulse of 1 MV 10KJ
 - c) Ac, voltage sources of 300 kV, 10 kVA, and impulse voltage of 1 MV, 15KJ
 - d) Ac, dc sources only
- 8) The clearances normally adopted in by laboratories for ac and impulse voltages are _____
- a) 100 to 200 kv/m for ac and 500 kV/m for impulse
 - b) 300 kv/ m for ac and 500 kV/m for impulse
 - c) 30 kV/m for ac and 50 kV/m for impulse
 - d) 10 kV/m for ac and 50 kV/m for impulse
- 9) In routine test, the cable is tested by applying an ac voltage _____
- a) 2 times the rated value
 - b) 2.5 times the rated value
 - c) 3 times the rated value
 - d) 3.5 times the rated value
- 10) As compared to air the relative dielectric strength of Sulphur hexafluoride is nearly _____
- a) 1.5 times
 - b) 2.5 times
 - c) 4.0 times
 - d) 5.0 times

ELECTRICAL ENGINEERING
Electrical Energy Audit and Management (BTN07805)

Day & Date: Saturday, 11-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 50

- Instructions:**
- 1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 - 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 - 3) Figures to the right indicates full marks.
 - 4) Assume additional data if required and mention it clearly.

MCQ/Objective Type Questions

Duration: 20 Minutes

Marks: 10

Q.1 Choose the correct alternatives from the given options.

10

- 1) Which of the following agreements aimed to address the issue of global climate change by setting binding emission reduction targets for developed countries?
 - a) United Nations Framework Convention on Climate Change (UNFCCC)
 - b) Global Climate Change Treaty
 - c) Kyoto Protocol
 - d) Clean Development Mechanism (CDM)
- 2) Which initiative in India sets mandatory energy performance standards for new commercial buildings and large energy-consuming establishments to promote energy efficiency and sustainability?
 - a) Green Building Certification Program
 - b) Energy Conservation Building Code (ECBC)
 - c) Indian Energy Efficiency Initiative (IEEI)
 - d) Sustainable Development Goals (SDGs)
- 3) Which of the following skills is essential for an effective energy manager?
 - a) Financial management expertise
 - b) Technical knowledge of energy systems
 - c) Marketing and sales skills
 - d) Human resource management proficiency
- 4) What is the fundamental principle underlying effective energy management?
 - a) Maximizing energy consumption
 - b) Minimizing energy efficiency
 - c) Continuous improvement in energy performance
 - d) Ignoring energy conservation practices.
- 5) In which sector can Demand Side Management (DSM) be particularly effective for reducing energy consumption?

a) Industrial	b) Residential
c) Transportation	d) Educational

- 6) What is one of the primary barriers to implementing Demand Side Management (DSM)?
- a) High initial investment costs
 - b) Opposition from energy suppliers
 - c) Lack of available technology
 - d) Limited awareness among consumers
- 7) What are the types of energy audits commonly conducted in industries?
- a) Initial audit and follow-up audit
 - b) Daytime audit and nighttime audit
 - c) Visual audit and auditory audit
 - d) Internal audit and external audit
- 8) Which procedure should be followed during an energy audit?
- a) Record energy consumption data only during peak hours
 - b) Include only energy-consuming equipment in the audit
 - c) Use standardized procedures and checklists
 - d) Rely solely on visual inspection without instrumentations
- 9) What type of drive system adjusts the speed of a motor according to the load requirements?
- a) Fixed-speed drive
 - b) Variable-frequency drive
 - c) Direct drive
 - d) Belt drive
- 10) Which parameter is used to measure the efficiency of illumination in a lighting system?
- a) Voltage
 - b) Power factor
 - c) Luminous efficacy
 - d) Resistance

Fourth Y. (B.Tech.) (Sem-II) (New) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING
Electrical Energy Audit and Management (BTN07805)

Day & Date: Saturday, 11-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 40

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume additional data if required and mention it clearly.

Section – I

- Q.2 Attempt any Two. 08**
a) What are the necessary Skills of energy Manager?
b) How the power factor penalties and incentives help in DSM?
c) Write a note on supply side management.
- Q.3 Attempt any Two. 12**
a) Explain the role of FACTS, VAR compensation in supply side management.
b) What are the Duties and Responsibilities of energy Manager?
c) Explain the Indian Electricity Act, 2003.

Section – II

- Q.4 Attempt any Two. 08**
a) Write a short note on CUSUM techniques with diagram.
b) Explain the need of Energy Audit.
c) Explain the opportunities for energy conservation in illumination.
- Q.5 Attempt any Two. 12**
a) Explain various instruments with function of each used to carryout energy Audit.
b) Explain energy audit report writing in prescribed form.
c) What is internal and external benchmarking? What are the benefits of benchmarking energy?

b) Explain the need of Energy Audit.
c) Explain the opportunities for energy conservation in illumination.
- Q.5 Attempt any Two. 12**
a) Explain various instruments with function of each used to carryout energy Audit.
b) Explain energy audit report writing in prescribed form.
c) What is internal and external benchmarking? What are the benefits of benchmarking energy?

Fourth Y. (B. Tech.) (Sem-II) (New)(CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING
High Voltage DC Transmission (BTN07806)

Day & Date: Saturday, 11-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 50

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in answer book page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.
 4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 20 Minutes

Marks: 10

Q.1 Choose the correct alternatives from the given options. 10

- 1) The HVDC transmission line is classified on the basis of _____.
 a) Poles
 b) Earth system
 c) Intermediate system
 d) Both a & b
- 2) The insulated line between HVDC substation and the earth electrode is known as _____.
 a) Station earth
 b) Earth electrode line
 c) Substation earth
 d) one of the above
- 3) Which of the following is Multi terminal HVDC system?
 a) Monopolar
 b) Bipolar
 c) Homopolar
 d) Both (a) and (b)
- 4) HVDC-VSC scheme employs _____.
 a) IGBT valves
 b) light or optically triggered thyristor valves
 c) mercury arc valves
 d) MOSFETs and GTO valves
- 5) 12-pulse converters are used in modern converters because of _____.
 a) reduced current
 b) reduced ripple
 c) increased voltage and reduced harmonics
 d) both (b) and (c)
- 6) IGBT converters operate on the principle of _____.
 a) voltage source converter
 b) current source converter
 c) power source converter
 d) either (a) or (b)
- 7) Which among these is a part of HVDC link?
 a) Two earth electrodes
 b) Converter valves
 c) Bipolar DC line
 d) None of these

Set P**Fourth Y. (B. Tech.) (Sem-II) (New) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING****High Voltage DC Transmission (BTN07806)**

Day & Date: Monday, 11-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 40

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume the suitable data whenever necessary.

Q.2 Solve any FOUR of the following. 20

- Mention the importance of multi-terminal DC links?
- Explain the harmonic instability problems.
- Define SCR and pulse number.
- Write the special features of converter transformers?
- Discuss about the over voltages due to disturbances on DC side.

Q.3 Solve any TWO of the following. 20

- Develop a mathematical model for quantifying the amount of harmonics present in a HVDC network. Also highlight the main sources of harmonic generation.
- Derive the expressions for average dc voltage, AC current and reactive power absorbed by the converter.
- Describe the following operational problems in HVDC Transmission Systems
(i) Converter Transformer (ii) Flashover performance of HVDC Converter Stations Insulators (iii) Valve Hall Fires (iv) Problems of Ground Return.

MCQ/Objective Type Questions

Duration: 20 Minutes

Marks: 10

Q.1 Choose the correct alternatives from the given options. 10

- 1) IGBT converters operate on the principle of _____.
 a) voltage source converter b) current source converter
 c) power source converter d) either (a) or (b)
- 2) Which among these is a part of HVDC link?
 a) Two earth electrodes b) Converter valves
 c) Bipolar DC line d) None of these
- 3) The rating of monopolar HVDC system is _____ to that of bipolar HVDC system.
 a) $\frac{1}{2}$ b) $\sqrt{2}$
 c) 2 d) $\sqrt{3}$
- 4) The two conductor in the Homo polar HVDC system is _____.
 a) Positive polarity b) Negative polarity
 c) Same polarity d) Any of the above
- 5) The main advantage of HVDC-VSC schemes is _____.
 a) both active and reactive powers can be controlled
 b) does not require DC filters
 c) can be used for very high power more than 1500 MW
 d) all of the above
- 6) The HVDC transmission line is classified on the basis of _____.
 a) Poles b) Earth system
 c) Intermediate system d) Both a & b
- 7) The insulated line between HVDC substation and the earth electrode is known as _____.
 a) Station earth b) Earth electrode line
 c) Substation earth d) one of the above

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) Source of voltage sags _____.
 - a) Motor starting
 - b) Arc furnace
 - c) Electric heaters
 - d) All of the above
- 2) The most common way to calculate voltage sag is from _____.
 - a) Apparent power
 - b) Peak voltage
 - c) RMS voltage
 - d) Average Voltage
- 3) Most of the power quality problems are related to _____.
 - a) Transmission Issue
 - b) Grounding Issue
 - c) Distribution Issue
 - d) All of the above
- 4) Passive filter is used to control _____.
 - a) voltage
 - b) frequency
 - c) current
 - d) harmonics
- 5) The voltage harmonic distortion is used to _____.
 - a) THD
 - b) TDD
 - c) UTD
 - d) None of these
- 6) The current harmonic distortion is used to _____.
 - a) THD
 - b) TDD
 - c) UTD
 - d) SD
- 7) Harmonic problem combined with _____ power factor.
 - a) lead
 - b) unity
 - c) lag
 - d) None of these
- 8) A shunt connected, thyristor switches inductor whose effective reactance is varied in a _____.
 - a) Stepwise manner
 - b) Continuous manner
 - c) Linear manner
 - d) None of above
- 9) Which are the shunt compensation devices?
 - a) TCSC
 - b) SSSC
 - c) UPFC
 - d) SVC

- 10) SVC stands for _____.
a) Static Var Compensator b) Static Voltage Controller
c) Static Var Converter d) Static Voltage Converter
- 11) The salient features of STATCOM are _____.
a) Compact size b) Dynamic response
c) Wide range control d) All of the above
- 12) UPFC is an example of _____.
a) combined series-shunt controller
b) combined series-series controller
c) series controller
d) shunt controller
- 13) UPFC is combination of _____.
a) STATCOM and SSSC b) TCPAR-TCR
c) Series and series d) All of the above
- 14) The fastest operation of compensator is _____.
a) TSSC b) TCSC

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve Any Four. 16

- What is the importance of Power Quality and what are the impacts of Power Quality?
- Explain the International Standards of power quality.
- Explain the active and passive filter control harmonic distortion.
- Explain Power System Response Characteristics.
- Explain Spectrum analysers and harmonic Analysers.

Q.3 Attempt Any Two. 12

- Explain short duration voltage variations with causes.
- Write short note on Monitoring and Diagnostic Techniques for PQ problems.
- Explain Harmonic sources from Commercial and Industrial loads.

Section – II

Q.4 Attempt Any Four. 16

- Enlist the objectives of Static shunt compensator.
- Explain in details STATCOM & SVC.
- Explain the functional control scheme for the GCSC.
- Explain the characteristics of Series Compensator.
- Explain the hybrid phase angle regulator.

Q.5 Attempt Any Two. 12

- Write short note on basic operating principle of IPFC.
- Explain:
 - TSSC
 - SSSC
- Explain the basic types of FACTS Controllers & Benefits of FACTS controller in detail.

Section – I

Q.2 Solve Any Four. 16

- What is the importance of Power Quality and what are the impacts of Power Quality?
- Explain the International Standards of power quality.
- Explain the active and passive filter control harmonic distortion.
- Explain Power System Response Characteristics.
- Explain Spectrum analysers and harmonic Analysers.

Q.3 Attempt Any Two. 12

- Explain short duration voltage variations with causes.
- Write short note on Monitoring and Diagnostic Techniques for PQ problems.
- Explain Harmonic sources from Commercial and Industrial loads.

Section – II

Q.4 Attempt Any Four. 16

- Enlist the objectives of Static shunt compensator.
- Explain in details STATCOM & SVC.
- Explain the functional control scheme for the GCSC.
- Explain the characteristics of Series Compensator.
- Explain the hybrid phase angle regulator.

Q.5 Attempt Any Two. 12

- Write short note on basic operating principle of IPFC.
- Explain:
 - TSSC
 - SSSC
- Explain the basic types of FACTS Controllers & Benefits of FACTS controller in detail.

**Fourth Y. (B. Tech) (Sem-II) (New/Old) (CBCS) Examination:
March/April-2024**

ELECTRICAL ENGINEERING

Extra High Voltage AC Transmission (197045802)

Day & Date: Friday 10-05-2024

Max. Marks: 56

Time: 03:00 PM To 06:00 PM

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

- Q.2 Write short Note. (Any Four) 16**
- a) Attenuation of travelling wave
 - b) Effect of bundled conductors on its inductance
 - c) Characteristics and generation of audible noise
 - d) Corona loss using Q-V diagram of corona
 - e) Tower footing resistance
- Q.3 Solve any Two. 12**
- a) How the audible noise is generated and what are the characteristics?
 - b) Derive the expression for resistance and inductance of ground return.
 - c) An overhead conductor of 1.6 cm radius is 10 m above ground (230 KV line to line). The switching surge experienced is 3.5 pu Taking $k = 0.7$. Calculate energy loss per km of line assume smooth conductor.

Section – II

- Q.4 Write short Note. (Any Four) 16**
- a) Sub-synchronous resonance in series capacitor compensated lines
 - b) Valve type lightning arrester
 - c) Static reactive compensating
 - d) Cascade connection of components by shunt and series compensation
 - e) Ferroresonance voltage
 - f) Sinusoidal excitation lumped parameter circuit
- Q.5 Solve any Two. 12**
- a) Explain design of EHV lines under steady state.
 - b) Brief the static reactive compensation system by different SVC schemes.
 - c) What are the factors under steady state in design of EHV lines.

Seat No.

ELECTRICAL ENGINEERING

Extra High Voltage AC Transmission (197045802)

Day & Date: Friday 10-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) The conductor used in EHV transmission in recent developments is _____.
 - a) ACSR
 - b) ACAR
 - c) AAAC
 - d) All of the above
- 2) The peak value of current related to pulse properties during positive and negative pulse is respectively _____.
 - a) 100 mA, 10 mA
 - b) 100 mA, 100 mA
 - c) 10 mA, 10 mA
 - d) None of these
- 3) The effect of resistance in EHV lines is _____.
 - a) I^2R loss
 - b) Reduced current carrying capacity of conductors in high ambient temperature region
 - c) Affects the attenuation of travelling waves
 - d) All of the above
- 4) The measurement of electrostatic field of an EHV line is done by _____.
 - a) Dipole
 - b) Spherical Dipole
 - c) Parallel plates
 - d) All of the above
- 5) When surge propagates on transmission lines they suffer attenuation or decrease in amplitude due to energy lost in the _____.
 - a) Conductor resistance
 - b) Ground resistance
 - c) Corona
 - d) All of the above
- 6) Operating 750 KV line gives An at a level of _____.
 - a) 50 dB
 - b) 52 dB
 - c) 55.4 dB
 - d) 58.5 dB
- 7) The crest time of pulse properties for positive cycle is _____.
 - a) 20 ns
 - b) 30 ns
 - c) 40 ns
 - d) 50 ns
- 8) Using a uniform field spark gap, the breakdown voltage for 10 mm gap length is _____.
 - a) 34.25 KV
 - b) 30.30 KV
 - c) 36.25 KV
 - d) 32.73 KV

- 9) A generating voltmeter _____.
a) Generating voltage b) Generates current
c) Is a variable capacitor device d) Both (b) and (c)
- 10) The transmission line voltage increased to 345 KV during the year in western countries _____.
a) 1942 b) 1945
c) 1950 d) 1954
- 11) The breakdown voltage of a specimen is 65 KV at STP. The breakdown voltage at 73 cm Hg pressure and 35° C is _____.
a) 69 KV b) 63.25 KV
c) 64.33 KV d) 60.39 KV
- 12) The type of EHV cable is _____.
a) High pressure oil filled b) Cross linked polythene
c) Gas insulated lines d) AU of the above
- 13) In a transmission system, the feeder supplies power to a _____.
a) Transformer sub-station b) Service mains
c) Distributors d) All of the above
- 14) The positive sequence reactance per phase in ohm/km in 750 transmission line is _____.
a) 0.272 b) 0.227
c) 0.722 d) None of these

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) For flour mills, power consumed is _____.
 - a) 10-15 KW
 - b) 100-200 W
 - c) 200 W
 - d) 7 KW
- 2) The capital cost of a power plant depends on _____.
 - a) Total installed capacity only
 - b) Total number of units only
 - c) Both a and b
 - d) None of these
- 3) What is the modern trend in electric power generation?
 - a) To have a large number of small size thermal plants located at different places.
 - b) To have large size thermal plants near load centre.
 - c) To have large size thermal plants located near coal fields.
 - d) None of the above
- 4) Planning for power systems is essentially a projection of _____.
 - a) how the system should grow over a specific period of time
 - b) Judgment about the future loads and the size of investment in generating capacity additions
 - c) transmission facilities expansion and reinforcements
 - d) All above
- 5) Transmission efficiency of line increases with the _____.
 - a) Decrease in power factor and voltage
 - b) Increase in power factor and voltage
 - c) Increase in power factor but Decrease in voltage
 - d) Increase in Voltage but Decrease in power factor
- 6) What is the commercial unit of Energy?
 - a) electron volt
 - b) W/s
 - c) KWh
 - d) Joule

- 7) Energy conservation means _____.
a) Using Energy more efficiently
b) Reducing wastage of Energy
c) New investment in more efficient equipments
d) All above
- 8) In order to have a lower cost of electrical energy generation _____.
a) The load factor and diversity factor should be low
b) The load factor should be low but diversity factor should be high
c) The load factor should be high but diversity factor should be low
d) The load factor and diversity factor should be high
- 9) The objective of energy management includes _____.
a) Minimising energy costs
b) Minimising waste
c) Minimising environmental degradation
d) All the above
- 10) The demand side management can be achieved by the technique of _____.
a) Time of day pricing and metering
b) Multi - utility power exchange model
c) Load management
d) All of these
- 11) The reduction of utility load primarily during peak demand is known as _____.
a) Peak clipping
b) Load shifting
c) Valley filling
d) MTP analysis
- 12) Distribution automation is used for _____.
a) Electrical quantities only
b) Physical quantities only
c) Both of the above
d) All of the above
- 13) The main problem in implanting Distribution Automation in metros is _____.
a) RTUs
b) Communication
c) D.A.S.
d) Control computers
- 14) Distribution SCADA means _____.
a) data acquisition
b) man - machine interface
c) data archiving
d) all of the above

Q.3 Solve any Two **12**

- a) Which are the different techniques for load forecasting?
- b) What do you understand by system planning? Explain main aims of different types of system planning.
- c) Write note on Cost Analysis.

Section – II

Q.4 Solve any Four **16**

- a) What do you mean by Energy audit?
- b) What do you mean by Demand side Management?
- c) Explain New algorithms and methods relating to Load Forecasting.
- d) Explain the objectives of generation planning. What are factors affecting this?
- e) What is Transmission Planning?

Q.5 Solve any Two **12**

- a) Explain the Data required for Composite System Reliability and quality.
- b) Write short note on listing of energy conservation opportunities (ECOs).
- c) Explain New algorithms and methods relating to power system planning.

**Fourth Y. (B Tech) (Sem-II) (New) (Old) (CBCS) Examination:
March/April-2024**

**ELECTRICAL ENGINEERING
Power System Planning (197045804)**

Day & Date: Saturday, 11-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) What is the commercial unit of Energy?
 - a) electron volt
 - b) W/s
 - c) KWh
 - d) Joule
- 2) Energy conservation means _____.
 - a) Using Energy more efficiently
 - b) Reducing wastage of Energy
 - c) New investment in more efficient equipments
 - d) All above
- 3) In order to have a lower cost of electrical energy generation _____.
 - a) The load factor and diversity factor should be low
 - b) The load factor should be low but diversity factor should be high
 - c) The load factor should be high but diversity factor should be low
 - d) The load factor and diversity factor should be high
- 4) The objective of energy management includes _____.
 - a) Minimising energy costs
 - b) Minimising waste
 - c) Minimising environmental degradation
 - d) All the above
- 5) The demand side management can be achieved by the technique of _____.
 - a) Time of day pricing and metering
 - b) Multi - utility power exchange model
 - c) Load management
 - d) All of these
- 6) The reduction of utility load primarily during peak demand is known as _____.
 - a) Peak clipping
 - b) Load shifting
 - c) Valley filling
 - d) MTP analysis
- 7) Distribution automation is used for _____.
 - a) Electrical quantities only
 - b) Physical quantities only
 - c) Both of the above
 - d) All of the above

Day & Date: Saturday, 11-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

- Q.2 Solve any Four** **16**
- a) What do you mean by Distribution Automation? Explain tools of distribution automation.
 - b) What is generation planning? What are factors affecting this?
 - c) Explain the objectives of generation planning.
 - d) Define the term load forecasting. Categorize loads in power system.
 - e) Describe different methodologies used for load forecasting.

- Q.3 Solve any Two** **12**
- a) Which are the different techniques for load forecasting?
 - b) What do you understand by system planning? Explain main aims of different types of system planning.
 - c) Write note on Cost Analysis.

Section – II

- Q.4 Solve any Four** **16**
- a) What do you mean by Energy audit?
 - b) What do you mean by Demand side Management?
 - c) Explain New algorithms and methods relating to Load Forecasting.
 - d) Explain the objectives of generation planning. What are factors affecting this?

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options. 14

- 1) In which of the following methods, the data and power both are transferred with the same conductor?
 - a) Fibre optic communications
 - b) Cognitive radio
 - c) Power line communication
 - d) Cellular communication systems
- 2) According to IRIG B, Time synchronization accuracy requirement is upto _____.
 - a) 0.5 μ s
 - b) 1 μ s
 - c) 2 μ s
 - d) μ s
- 3) The boundaries of the customer domain typically consider which type of meters _____.
 - a) Energy Services Load
 - b) Energy Services Interface
 - c) Energy Services Demand
 - d) Wattmeter
- 4) Service Provider communicates with which domain?
 - a) Bulk generation
 - b) Distribution
 - c) Transmission
 - d) Customer
- 5) The transmission network is typically operated by _____.
 - a) Load Dispatch Centers
 - b) Distribution Company
 - c) Regional Load Dispatch Center
 - d) Generation Company
- 6) Energy Services Interface (ESI) communicates with other domain via: _____.
 - a) AMI infrastructure or Internet
 - b) Home Area Network
 - c) Local Area Network
 - d) None of the above

- 7) In the following which standard represent the Practice for Interconnecting Distributed Resources with Electric Power Systems Distribution Secondary Networks?
- a) IEEE Standard 1547.3 b) IEEE Standard 1547.4
c) IEEE Standard 1547.5 d) IEEE Standard 1547.6
- 8) What is the role of Gateway in smart grid architecture of IoT?
- a) Store data b) Manage data
c) Collect data d) Security
- 9) What is the role of Cloud in smart grid architecture of IoT?
- a) Store data b) Manage data
c) Collect data d) Security
- 10) Which protocol is used to link all the devices in the IoT?
- a) TCP/IP b) Network
c) UDP d) HTTP
- 11) The process by which the faulty of the system gets isolated from healthy part is called _____.
- a) Islanding b) Earthing
c) Isolating d) Detecting
- 12) Self-Healing can be done using _____.
- a) Damping unwanted power oscillations
b) Avoiding flow of the unwanted current from the grid
c) Rerouting power flow in order to avoid overloading in transmission line
d) All of the above
- 13) The main difference between Conventional Grid & Smart Grid _____.
- a) Unidirectional Flow of Power
b) Unidirectional and bidirectional flow of power and information respectively
c) Bidirectional flow of information
d) Bidirectional & Unidirectional flow of power
- 14) Functions of Smart Grid is _____.
- a) Technology maturity and risk in implementation
b) Efficiency and reliability of power system
c) Lack of awareness for consumers
d) All of the above

- a) What is Broadband over power line? Explain working and feature of broadband over power Line.
- b) Write a note on, "Real Time Pricing".
- c) Explain role of AMI in Smart Grid.

- 9) Two transformers operating in parallel will share the load depending upon Their _____
- a) leakage reactance b) per unit impedance
c) Efficiency d) rating
- 10) Polarization index is greater than _____ for class A insulation
- a) 1 b) 1.5
c) 2 d) 2.5
- 11) For good transformer oil, as per IS density should be equal to _____
- a) 0.5 gm/cm^3 b) 0.65 gm/cm^3
c) 0.89 gm/cm^3 d) 1.15 gm/cm^3
- 12) The arc voltage in C.B. is _____
- a) in the phase of arc current b) lagging the arc current by 90°
c) leading the arc current by 90° d) lagging the arc current by 180°
- 13) Depth of foundation is dependent on _____
- a) Cost of equipment b) Frequency
c) H.P. rating d) None of these
- 14) An isolator is installed _____
- a) to isolate one portion of circuit from another
b) usually on both sides of circuit breakers
c) as a substitute for a circuit breaker
d) both a) and b)

ELECTRICAL ENGINEERING

Electrical Estimation and Installation (197045809)

Day & Date: Monday, 13-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any four: **16**

- a) Illustrate different factors for getting electric shock by the body of Electrical machines.
- b) Explain the concept of Tolerance? What are the different types of testing?
- c) Explain the various steps considered for estimation in detail.
- d) Why maintenance of electrical machine is necessary? Explain its categories
- e) State different factors on which severity of electric shock depends.

Q.3 Solve any two: **12**

- a) What are the precautions will you take if the person gets an electrical shock?
- b) Explain the necessity of conducting temp rise test and given limits of temp rise for different parts of 3 ph I.M. as per ISS.
- c) A room is to be wired for single phase ac. Supply directly taken from mains which has declared voltage of 200 volts. The length of the wire from the main switch to sight and plug points is 30 meters. lithe wire is to carry 5 amps determine the size of conductor.

Section – II

Q.4 Solve any four: **16**

- a) State the factors affecting preventive maintenance schedule along with its advantages.
- b) State the various methods of revarnishing. Explain the neat sketch vacuum impregnation method of varnishing.
- c) Explain the factors involved in designing the machine foundation.
- d) What are the effects of mis-alignment?
- e) Write the different factors affecting for the life of insulating materials.

Q.5 Solve any two: **12**

- a) Explain the procedure for conducting HV test on transformers?
- b) Prepare trouble shooting chart for transformer.
- c) Write the procedure for alignment for direct coupled drive.

Table 14.1
Current ratings and voltage drop for vulcanised rubber
PVC or polythene insulated or tough Rubber PVC lead
sheathed single core aluminum wires or cables

<i>Size of Conductor</i>		<i>2 Cables d.c. or Single-phase a.c.</i>		<i>3 or 4 cables of balanced 3-phase</i>		<i>4 Cables d.c.</i>

ELECTRICAL ENGINEERING

Electrical Estimation and Installation (197045809)

Day & Date: Monday, 13-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume the suitable data wherever necessary

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternative from the options. 14

- 1) While conducting the short circuit test on transformer following side is short circuited _____
 - a) HV side
 - b) LV side
 - c) Primary side
 - d) Secondary Side
- 2) Two transformers operating in parallel will share the load depending upon Their _____
 - a) leakage reactance
 - b) per unit impedance
 - c) Efficiency
 - d) rating
- 3) Polarization index is greater than _____ for class A insulation
 - a) 1
 - b) 1.5
 - c) 2
 - d) 2.5
- 4) For good transformer oil, as per IS density should be equal to _____
 - a) 0.5 gm/cm³
 - b) 0.65 gm/cm³
 - c) 0.89 gm/cm³
 - d) 1.15 gm/cm³
- 5) The arc voltage in C.B. is _____
 - a) in the phase of arc current
 - b) lagging the arc current by 90°
 - c) leading the arc current by 90°
 - d) lagging the arc current by 180°
- 6) Depth of foundation is dependent on _____
 - a) Cost of equipment
 - b) Frequency
 - c) H.P. rating
 - d) None of these
- 7) An isolator is installed _____
 - a) to isolate one portion of circuit from another
 - b) usually on both sides of circuit breakers
 - c) as a substitute for a circuit breaker
 - d) both a) and b)
- 8) Severity of electric shock is mainly depend on _____
 - a) Voltage
 - b) Current
 - c) Type of supply
 - d) All of these

Set **Q**

**Fourth Y. (B.Tech.) (Sem - II) (New/Old) (CBCS) Examination:
March/April 2024**

ELECTRICAL ENGINEERING

Electrical Estimation and Installation (197045809)

Day & Date: Monday, 13-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any four: **16**

- a) Illustrate different factors for getting electric shock by the body of Electrical machines.
- b) Explain the concept of Tolerance? What are the different types of testing?
- c) Explain the various steps considered for estimation in detail.
- d) Why maintenance of electrical machine is necessary? Explain its categories
- e) State different factors on which severity of electric shock depends.

Q.3 Solve any two: **12**

- a) What are the precautions will you take if the person gets an electrical shock?
- b) Explain the necessity of conducting temp rise test and given limits of temp rise for different parts of 3 ph I.M. as per ISS.
- c) A room is to be wired for single phase ac. Supply directly taken from mains which has declared voltage of 200 volts. The length of the wire from the main switch to sight and plug points is 30 meters. lithe wire is to carry 5 amps determine the size of conductor.

Section – II

Q.4 Solve any four: **16**

- a) State the factors affecting preventive maintenance schedule along with its advantages.
- b) State the various methods of revarnishing. Explain the neat sketch vacuum impregnation method of varnishing.
- c) Explain the factors involved in designing the machine foundation.
- d) What are the effects of mis-alignment?
- e) Write the different factors affecting for the life of insulating materials.

Q.5 Solve any two: **12**

- a) Explain the procedure for conducting HV test on transformers?
- b) Prepare trouble shooting chart for transformer.
- c) Write the procedure for alignment for direct coupled drive.

Table 14.1
Current ratings and voltage drop for vulcanised rubber
PVC or polythene insulated or tough Rubber PVC lead
sheathed single core aluminum wires or cables

Size of Conductor		2 Cables d.c. or Single-phase a.c.		3 or 4 cables of balanced 3-phase		4 Cables d.c.	
Normal area sq. mm.	Number and diameter of wire in mm.	Current rating in amperes	Approx length of run for volt-drop in meters	Current rating in amperes	Approx length of run for volt-drop in meters	Current rating in amperes	Approx length of run for volt-drop in meters

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternative from the options. 14

- 1) Iron losses are considered to be the constant losses. It depends on _____
 - a) Voltage
 - b) Frequency
 - c) Both (a) and (b)
 - d) None of these
- 2) The rotational losses in d.c. machine is equal to the _____
 - a) Kinetic energy of armature
 - b) Half of the kinetic energy of armature
 - c) Square of the kinetic energy of armature
 - d) Rate of change of kinetic energy
- 3) While conducting the short circuit test on transformer following side is short circuited _____
 - a) HV side
 - b) LV side
 - c) Primary side
 - d) Secondary Side
- 4) Two transformers operating in parallel will share the load depending upon Their _____
 - a) leakage reactance
 - b) per unit impedance
 - c) Efficiency
 - d) rating
- 5) Polarization index is greater than _____ for class A insulation
 - a) 1
 - b) 1.5
 - c) 2
 - d) 2.5
- 6) For good transformer oil, as per IS density should be equal to _____
 - a) 0.5 gm/cm³
 - b) 0.65 gm/cm³
 - c) 0.89 gm/cm³
 - d) 1.15 gm/cm³
- 7) The arc voltage in C.B. is _____
 - a) in the phase of arc current
 - b) lagging the arc current by 90°
 - c) leading the arc current by 90°
 - d) lagging the arc current by 180°
- 8) Depth of foundation is dependent on _____
 - a) Cost of equipment
 - b) Frequency
 - c) H.P. rating
 - d) None of these

- 9) An isolator is installed _____
a) to isolate one portion of circuit from another
b) usually on both sides of circuit breakers
c) as a substitute for a circuit breaker
d) both a) and b)
- 10) Severity of electric shock is mainly depend on _____
a) Voltage
b) Current
c) Type of supply
d) All of these
- 11) Which section in the IE Act deals with the 'theft of energy'?
a) Section 39
b) Section 40
c) Section 43
d) Section 44
- 12) For what range is the underground service lines used?
a) Distance more than 25 m
b) Distance more than 100 m
c) Distance less than 1 km
d) Distance more than 1 km
- 13) The torque of induction motor is _____
a) Directly proportional to V
b) Directly proportional to V^2
c) Inversely proportional to V
d) Inversely proportional to V^2
- 14) Swinburne test is also called as _____
a) Load test
b) brake test
c) no load test
d) full load test

Marks:14

Q.1 Solve All MCQ Questions.

14

- 1) Which of the following is correct for proximity sensors?
 - a) Inductive type
 - b) Capacitive type
 - c) Ultrasonic wave type
 - d) All of the mentioned
- 2) Which of the following work is done by General purpose robot?
 - a) Part picking
 - b) Welding
 - c) Spray painting
 - d) All of the above
- 3) The following drive is used for lighter class of Robot _____.
 - a) Pneumatic drive
 - b) Hydraulic drive
 - c) Electric drive
 - d) All of the above
- 4) State model representation is possible using _____.
 - a) Physical variable
 - b) Phase variables
 - c) Canonical state variables
 - d) All of the mentioned
- 5) A sensor is a device that converts _____.
 - a) Physical quantity into measurable signals
 - b) Physical quantity into mechanical signal
 - c) Electrical signal into physical quantity
 - d) Physical quantity into electric signal only
- 6) In the modem controller, derivative action is applied only to the:
 - a) Error
 - b) Measurement
 - c) Setpoint
 - d) Integral circuit
- 7) Which among the following are the interconnected units of state diagram representation?
 - a) Scalars
 - b) Adders
 - c) Integrators
 - d) All of the above
- 8) A Robot is a _____.
 - a) Programmable
 - b) multi-functional manipulator
 - c) Both a) and b)
 - d) None of the above

- 2) Automatic controllers operate on the difference between set point and measurement, which is called _____.
 - a) Offset
 - b) Bias
 - c) Error
 - d) Feedback
- 3) The main objective of a process control is _____.
 - a) To control physical parameters
 - b) To control mechanical parameters
 - c) To control optical parameters
 - d) To control electrical parameters
- 4) The input of a controller is _____.
 - a) Sensed signal
 - b) Error signal
 - c) Desired variable value
 - d) Signal of fixed amplitude not dependent on desired variable value
- 5) A properly designed feedforward control system:
 - a) Should be applied to every process
 - b) Should be employed when its use can be justified economically and technologically
 - c) Is always easier to adjust than a feedback system
 - d) Will always result in more economical process operation
- 6) Internal state sensors are used for measuring _____ of the end effector.
 - a) Position
 - b) Position & Velocity
 - c) Velocity & Acceleration
 - d) Position, Velocity & Acceleration
- 7) Which of the motions in actuators are preferred?
 - a) Rotary

March/April-2024**

ELECTRICAL ENGINEERING

Instrumentation Process Control & Robotics (197045810)

Day & Date: Monday, 13-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

- Q.2 Attempt any four:** **16**
- a) Explain Ratio control with neat sketch.
 - b) Explain operation of PD control with neat sketch.
 - c) Explain cascade control with block diagram.
 - d) Explain split range control with block diagram.
 - e) Write a note on Controller Tuning.
- Q.3 Attempt any two:** **12**
- a) Explain Multiloop control with block diagram.
 - b) What are the different methods available for tuning of PID controller?
Explain relay feedback method in details.
 - c) Explain feed forward control loop with neat sketch

Section – II

- Q.4 Attempt any Four:** **16**
- a) Explain laws of robotics.
 - b) Write a short note on Direct and inverse kinematics problems.
 - c) Explain the Accuracy and repeatability characteristics of Robotics
 - d) Explain strain gauge-based force-torque sensors with neat sketch.
 - e) Explain advantages & dis-advantages of robot.
- Q.5 Attempt any Two:** **12**
- a) What is purpose of sensors? Explain internal and external sensors.
 - b) Explain in details Tractrix based approach for fixed and free robots and multi- body system.
 - c) List different types of Actuators and Explain any two in details.

ELECTRICAL ENGINEERING

Instrumentation Process Control & Robotics (197045810)

Day & Date: Monday, 13-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Solve All MCQ Questions.

14

- 1) In the modem controller, derivative action is applied only to the:
 - a) Error
 - b) Measurement
 - c) Setpoint
 - d) Integral circuit
- 2) Which among the following are the interconnected units of state diagram representation?
 - a) Scalars
 - b) Adders
 - c) Integrators
 - d) All of the above
- 3) A Robot is a _____.
 - a) Programmable
 - b) multi-functional manipulator
 - c) Both a) and b)
 - d) None of the above
- 4) Automatic controllers operate on the difference between set point and measurement, which is called _____.
 - a) Offset
 - b) Bias
 - c) Error
 - d) Feedback
- 5) The main objective of a process control is _____.
 - a) To control physical parameters
 - b) To control mechanical parameters
 - c) To control optical parameters
 - d) To control electrical parameters
- 6) The input of a controller is _____.
 - a) Sensed signal
 - b) Error signal
 - c) Desired variable value
 - d) Signal of fixed amplitude not dependent on desired variable value
- 7) A properly designed feedforward control system:
 - a) Should be applied to every process
 - b) Should be employed when its use can be justified economically and technologically
 - c) Is always easier to adjust than a feedback system
 - d) Will always result in more economical process operation

- 8) Internal state sensors are used for measuring _____ of the end effector.
- a) Position
 - b) Position & Velocity
 - c) Velocity & Acceleration
 - d) Position, Velocity & Acceleration
- 9) Which of the motions in actuators are preferred?
- a) Rotary
 - b) Stationary
 - c) Non-Stationary
 - d) Translator
- 10) Which of the following is correct for proximity sensors?
- a) Inductive type
 - b) Capacitive type
 - c) Ultrasonic wave type
 - d) All of the mentioned
- 11) Which of the following work is done by General purpose robot?
- a) Part picking
 - b) Welding
 - c) Spray painting
 - d) All of the above
- 12) The following drive is used for lighter class of Robot _____.
- a) Pneumatic drive
 - b) Hydraulic drive
 - c) Electric drive
 - d) All of the above
- 13) State model representation is possible using _____.
- a) Physical variable
 - b) Phase variables
 - c) Canonical state variables
 - d) All of the mentioned
- 14) A sensor is a device that converts _____.
- a) Physical quantity into measurable signals
 - b) Physical quantity into mechanical signal
 - c) Electrical signal into physical quantity
 - d) Physical quantity into electric signal only

Power System Dynamics and Stability (197045811)

Day & Date: Monday, 13-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

Q.1 Choose the correct alternatives from the given options.

14

- 1) How can we check upon the transient stability of a power system?
 - a) By checking variation in load angle
 - b) By checking variation of real power with load angle
 - c) Checking variation in load angle and real power
 - d) Checking variation in load angle or real power
- 2) How can we improve the steady state stability of the synchronous generator for a better performance?
 - a) Increasing the excitation
 - b) Increasing reactance
 - c) Decreasing moment of inertia
 - d) Increasing moment of inertia
- 3) What does the steady state stability of a power system signify?
 - a) Maintaining the rated voltage
 - b) Maintaining rated frequency
 - c) Maintaining a synchronism between machines and tie-lines
 - d) All of the mentioned
- 4) By using which component can the transient stability limit of a power system be improved?
 - a) Series resistance
 - b) Series capacitor
 - c) Series inductor
 - d) Shunt resistance
- 5) Which among these is a classification of power system stability?
 - a) Frequency stability
 - b) Voltage stability
 - c) Rotor angle stability
 - d) All of these
- 6) The Power Systems are operated with power angle around _____
 - a) 10°
 - b) 30°
 - c) 70°
 - d) 80°

- 7) Which one of the following enhances the transient stability of a system the most?
- proper choice of make and break capabilities of the circuit breakers
 - installation of 3-pole auto-reclose circuit breakers
 - installation of single pole auto-reclose circuit breakers
 - None of the Above
- 8) In a single connected to infinite bus bar system, alternator voltage is 1.5 pu and its reactance is 1.0 pu are connected through a line reactance of 0.3 pu. The maximum steady state power transfer is _____
- 1.154 pu
 - 5.0 pu
 - 1.5 pu
 - 0.76 pu
- 9) Equal area criteria and Swing equation are used for stability respectively.
- Steady state, Transient
 - Transient, Steady state
 - Both are used for steady state stability
 - Both are used for transient stability
- 10) The angle δ in the swing equation of a synchronous generator is the _____
- angle between stator voltage and current.
 - angular displacement of the rotor with respect to the stator
 - angular displacement of the stator mmf with respect to a synchronously rotating axis.
 - angular displacement of an axis fixed to the rotor with respect to a synchronously rotating axis.
- 11) Mechanical governors have _____ moving parts than hydraulic governors.
- less
 - more
 - equal
 - none of the mentioned
- 12) In Park's transformation _____
- stator variables are transformed to a synchronously rotating reference frame fixed in the rotor
 - rotor variables are transformed to a stationary reference frame fixed in the rotor
 - stator variables are transformed to an arbitrary reference frame
 - rotor variables are transformed to an arbitrary reference frame
- 13) Which one of the following is true?
- Steady State Stability limit is greater than Transient Stability limit
 - Steady State Stability limit is equal to Transient Stability limit
 - Steady State Stability limit is less than Transient Stability limit
 - None of the above
- 14) Hydraulic governors are sensitive when compared to mechanical governors.
- Less
 - More
 - Equal
 - none of the mentioned

Power System Dynamics and Stability (197045811)

Day & Date: Monday, 13-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any four of the following. 16

- a) Why Park's transformation is required? Apply it to transform electrical and mechanical equations of synchronous machine.
- b) Explain with example need of reduced model in stability analysis.
- c) Distinguish between transient and dynamic stability.
- d) Draw and explain functional block diagram of an excitation control system.
- e) Formulate sub-transient and transient inductances and also write about time constants.

Q.3 Solve any two of the following. 12

- a) State types and explain with basic diagrams of following:
 - i) Exciters
 - ii) Voltage regulators
- b) Explain with block diagram typical excitation system configuration.
- c) Explain in detail importance of stability in power system operation and control.

Section – II

Q.4 Solve any four of the following. 16

- a) Compare: coherent and non-coherent machines.
- b) Explain mechanical-hydraulic governor for a hydro turbine with schematic diagram.
- c) Explain the role of auto reclosing circuit breaker in stability enhancement.
- d) Explain in detail function of speed governing system.
- e) A 50 Hz, four pole turbo-generator rated 100 MVA, 11 kV has an inertia constant of 8.0 MJ/MVA.
 - i) Find the stored energy in the rotor at synchronous speed.
 - ii) If the mechanical input is suddenly raised to 80 MW for an electrical load of 50 MW, find rotor acceleration, neglecting mechanical and electrical losses.

Q.5 Solve any two of the following.

- a) Develop the swing equation of synchronous machine with its linearization.
- b) List various methods are used to improve steady state stability and any one method in detail.
- c) Differentiate between steady state stability and transient stability of a power system. Discuss the factors that affect
 - i) steady state stability and
 - ii) transient stability of a power system

Day & Date: Sunday, 19-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book Page No. 3 (starting page of the Answer Book). Each question carry one mark.
 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
 3) Figures to the right indicates full marks.
 4) Draw flow charts wherever necessary

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options.

14

- 1) What is the role of the catalyst in a fuel cell?
 - a) It conducts electrons from the cathode to the anode.
 - b) It facilitates the reaction between hydrogen and oxygen.
 - c) It blocks the flow of protons through the membrane.
 - d) It stores energy for later use.
- 2) What is the primary function of a fuel cell?
 - a) To store energy
 - b) To convert fuel into heat
 - c) To convert chemical potential energy into electrical energy
 - d) To generate mechanical power
- 3) Which component in an electric vehicle's traction control system is responsible for processing data from various sensors and making real-time control decisions?

a) Battery pack	b) Electric motor
c) Traction control module	d) Headlights
- 4) Which of the following is NOT a potential benefit of traction control in electric vehicles?

a) Improved safety	b) Enhanced efficiency
c) Extended battery life	d) Better handling and control
- 5) What is the minimum voltage required to trigger a thyristor into the conducting state?

a) 0V	b) Half the supply voltage
c) Equal to the supply voltage	d) Double the supply voltage
- 6) Which semiconductor device is often referred to as a "latching" or "snap-action" switch and is commonly used in applications like motor control and lighting?

a) Diode	b) Thyristor
c) BJT	d) MOSFET

- 7) What is path control in the context of robotics and automation?
- a) Managing road traffic signals
 - b) Navigating through GPS coordinates
 - c) Manipulating objects along a predefined trajectory
 - d) Controlling the speed of a vehicle
- 8) What is one advantage of using machine learning algorithms for path control in autonomous systems?
- a) Limited adaptability to changing environments
 - b) Dependence on human intervention
 - c) Improved adaptability and learning from experience
 - d) Slower decision-making compared to traditional algorithms
- 9) What does ADAS technology aim to reduce in driving?
- a) Fuel efficiency
 - b) Driver distraction
 - c) Vehicle maintenance costs
 - d) Traffic congestion
- 10) Which of the following is an advantage of regenerative braking in electric vehicles?
- a) Increased brake pad wear
 - b) Improved energy efficiency and extended range
 - c) Reduced battery capacity
 - d) Higher energy consumption
- 11) When it comes to electric vehicle safety, what should first responders be trained to do?
- a) Approach the vehicle without protective gear
 - b) Assume that EV accidents are identical to accidents involving traditional vehicles
 - c) Identify and follow proper shutdown procedures for the high-voltage system
 - d) Open the vehicle's battery compartment to check for damage
- 12) What is the primary focus of intra-vehicle security measures?
- a) Protecting the vehicle from external threats
 - b) Protecting the vehicle's occupants and systems from internal threats
 - c) Ensuring vehicle performance
 - d) Enhancing fuel efficiency
- 13) What advantage does battery swap offer in terms of charging time compared to traditional plug-in charging?
- a) Battery swap takes longer to complete
 - b) Battery swap is faster and typically takes just a few minutes
 - c) Battery swap requires the EV to be stationary for hours
 - d) Battery swap reduces the vehicle's driving range
- 14) How does wireless charging technology for EVs work?
- a) It uses high-pressure hoses to transfer electricity
 - b) It relies on physical connections through cables
 - c) It uses electromagnetic fields to transfer power between a charging pad and the vehicle
 - d) It requires the EV to be stationary for hours during charging

Seat No.

**Fourth Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING**

Advanced Topics in Electric Vehicles (BTN02717)

Day & Date: Sunday, 19-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) Answer any two questions from each section.
2) Assume suitable data if necessary.
3) Figures to right indicate full marks.

Section – I

- Q.2 Answer the following question (Any Two) 14**
- Describe the consumption process of fuel and oxidation in a fuel cell, mentioning the reactions that occur at the anode and cathode
 - Explain the purpose of antilock braking systems (ABS). How do they prevent skidding and enhance braking performance during emergencies?
 - How do converters and inverters play a crucial role in power management and conversion in various electronic systems?
- Q.3 Answer the following question (Any Two) 14**
- What are some of the obstacles or challenges faced in the widespread adoption of fuel cells in various industries?
 - What is adaptive cruise control, and how does it differ from traditional cruise control systems? How does it contribute to both safety and convenience for drivers?
 - Discuss the potential risks associated with working on high-voltage systems, especially in automotive applications. What are the key safety precautions to be taken?
- Q.4 Answer the following questions. (Any Two) 14**
- List and explain at least three factors that can significantly affect the performance and efficiency of a fuel cell.
 - How does active suspension control improve ride comfort and handling?
 - What types of sensors are commonly used in autonomous electric vehicles (EVs) to perceive their surroundings?

Section – II

- Q.5 Answer the following questions. (Any Two) 14**
- What is path control in the context of autonomous vehicles? How do algorithms and sensors work together to ensure accurate path following and obstacle avoidance?
 - List and explain three advantages of electric vehicles (EVs) over traditional internal combustion engine vehicles.
 - Explain the concept of wireless charging for electric vehicles and its benefits compared to traditional plug-in charging.

Q.6 Answer the following questions. (Any Two)

- a) Define an Unmanned Ground Vehicle (UGV) and its primary applications. How does a UGV differ from a conventional human-operated vehicle in terms of control and functionality?
- b) Define intra-vehicle security in the context of electric vehicles. What are some potential vulnerabilities that could be exploited by unauthorized access?
- c) What are the key technological advancements expected to drive the future of electric cars?

Q.7 Answer the following questions. (Any Two)

- a) Explain the concept of layers of autonomy in autonomous vehicles. What are the typical levels or layers, and how do they progress from minimal to full automation?
- b) Explain how Autocrypt V2G benefits both EV owners and the power grid in terms of energy management and sustainability.
- c) Discuss the maintenance challenges specific to EVs, such as battery degradation and replacement costs.

Set R

Fourth Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING
Electrical Estimation, Installation, and Testing (BTN07802)

Day & Date: Thursday, 09-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 40

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Q.2 Answer any Five questions.

40

- a) What do you mean by preventive maintenance? State advantage of it.
- b) What are the types of fire extinguishers? State their applications.
- c) Give maintenance schedule for distribution transformers as per ISS 1886-1967.
- d) What are the requirements of foundations for installing rotating electrical machines as per IS 900-1992?
- e) What are type tests of 3ph transformers as per ISS? Explain any one in detail.
- f) What are the effects of mis-alignment?
- g) Write the different properties of transformer oil in detail.

Fourth Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING

Electrical Estimation, Installation, and Testing (BTN07802)

Day & Date: Thursday, 09-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 50

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 20 Minutes

Marks: 10

Q.1 Choose the correct options.

10

- 1) Which insulating material is used for low voltage cables?
 - a) Impregnated paper
 - b) Rubber
 - c) Silk and cotton
 - d) Vulcanised Indian rubber
- 2) Brake test is _____ method of testing machine.
 - a) Regenerative
 - b) Direct
 - c) Indirect
 - d) All of these
- 3) The impulse test level is determined by operating level is _____ times normal operating value.
 - a) 1 to 2
 - b) 2 to 2.5
 - c) 4 to 5
 - d) 7 to 9
- 4) As per I.E.C. for 66 kv system voltage, the impulse withstand voltage is _____.
 - a) 100kv
 - b) 150kv
 - c) 220kv
 - d) 325kv
- 5) For class A insulating material, maximum operating temperature is _____.
 - a) 60°C
 - b) 90°C
 - c) 95°C
 - d) 105°C
- 6) Polarization index is greater than _____ for class A insulation.
 - a) 1
 - b) 1.5
 - c) 2
 - d) 2.5
- 7) While installing electrical machines, checking of foundation for correct level is to be carried out then, we use _____.
 - a) Spirit level
 - b) Dial indicator
 - c) Bearing puller
 - d) Filler gauge
- 8) Thermal relays are used for the protection of motors against over-current owing to: _____.
 - a) Short circuit
 - b) Heavy loads
 - c) Earth fault
 - d) All the above
- 9) Do's and Don'ts are observed carefully in safety precautions as per _____.
 - a) IS 5216-1962
 - b) IS 5216-1964
 - c) IS 5216-1966
 - d) IS 5216-1969

- 10) In fire extinguisher we use _____.
- a) CO_2
 - b) SO_2
 - c) O_2
 - d) H_2O

Seat No.

Fourth Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING
Electrical Estimation, Installation, and Testing (BTN07802)

Day & Date: Thursday, 09-05-2024
Time: 03:00 PM To 06:00 PM

Max. Marks: 40

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Q.2 Answer any Five questions.

40

- a) What do you mean by preventive maintenance? State advantage of it.
- b) What are the types of fire extinguishers? State their applications.
- c) Give maintenance schedule for distribution transformers as per ISS 1886-1967.
- d) What are the requirements of foundations for installing rotating electrical machines as per IS 900-1992?
- e) What are type tests of 3ph transformers as per ISS? Explain any one in detail.
- f) What are the effects of mis-alignment?
- g) Write the different properties of transformer oil in detail.

- 8) Which of the following is a disadvantage of most of the renewable energy sources?
- a) Highly polluting
 - b) High waste disposal cost
 - c) Unreliable supply
 - d) High running cost
- 9) Although solar-PV-generated electricity as a power source is cleaner than burning fossil fuels, the problem with this electricity is that it _____.
- a) is dangerous if stored too long
 - b) cannot be stored easily in large quantities for use when and where it is needed
 - c) is not sufficiently understood
 - d) is less efficient than fossil fuel
- 10) The range of wind speed suitable for wind power generators is _____.
- a) 0 to 5 m/s
 - b) 5 to 25 m/s
 - c) 25 to 50 m/s
 - d) 50 to 75 m/s

Fourth Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING
Alternate Energy Systems (BTN07804)

Day & Date: Thursday, 09-05-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 40

- Instructions:** 1) All questions are compulsory.
 2) Figures to the right indicate full marks.
 3) Assume suitable data if necessary.
 4) Draw neat diagrams whenever necessary.

Section – I

- Q.2 Attempt any Two of the following. 08**
 a) Explain PV system design for various applications.
 b) Explain PV System Components of solar energy.
 c) Explain Site selection criteria of wind energy.
- Q.3 Attempt any Two of the following. 12**
 a) Explain Electrical characteristics of Silicon PV Cells and Modules.
 b) Draw and explain Power-Speed and Torque-Speed characteristics of wind energy.
 c) With the help of neat diagram explain terrestrial and an extra-terrestrial solar radiation.

Section – II

- Q.4 Attempt any Two of the following. 08**
 a) Explain fixed dome type biogas plant.
 b) Explain Integration of RES with grid.
 c) Explain Anaerobic Digestion process in Biomass energy.
- Q.5 Attempt any Two of the following. 12**
 a) Explain in details Economics of RES.
 b) Explain Biogas Technologies and their factor affecting Biogas Production.
 c) Explain Biomass Resources and their Energy Potential.

4) Assume suitable data if necessary.
5) Draw neat diagrams whenever necessary.

MCQ/Objective Type Questions

Duration: 20 Minutes

Marks: 10

Q.1 Choose the correct options.**10**

- 1) The radiation we receive on the earth's surface is _____.
a) terrestrial
b) extra-terrestrial
c) diffuse
d) beam
- 2) What is the standard value of solar constant?
a) 1 KW/m²
b) 1.367 KW/m²
c) 1.5 KW/m²
d) 5 KW/m²
- 3) Which of the following is a disadvantage of most of the renewable energy sources?
a) Highly polluting
b) High waste disposal cost
c) Unreliable supply
d) High running cost
- 4) Although solar-PV-generated electricity as a power source is cleaner than burning fossil fuels, the problem with this electricity is that it _____.
a) is dangerous if stored too long
b) cannot be stored easily in large quantities for use when and where it is needed
c) is not sufficiently understood
d) is less efficient than fossil fuel
- 5) The range of wind speed suitable for wind power generators is _____.
a) 0 to 5 m/s
b) 5 to 25 m/s
c) 25 to 50 m/s
d) 50 to 75 m/s
- 6) A two-blade wind turbine produces maximum power when the tip speed ratio is equal to _____.
a) π
b) 2π
c) 3π
d) 0.593
- 7) Compared to a petrol-operated engine, an ethanol-operated engine _____.
a) Produces 50% more power
b) produces 20% more power
c) Produces a comparable amount of power
d) produces 20% less power

- 8) Increasing the pressure inside a biogas plant _____.
- a) increases the gas production
 - b) decreases the gas production
 - c) has no effect on gas production
 - d) causes explosion
- 9) Which of the following is not a bio-mass source?
- a) Gobar gas
 - b) Coal
 - c) Wood
 - d) Nuclear Energy
- 10) The wind speed is measured using an instrument called
- a) Pyranometer
 - b) Manometer
 - c) Anemometer
 - d) Wind vane

 5) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options and rewrite the sentence. 14

- 1) The system is casual when the current output sample depends upon _____.
 a) current input sample
 b) current or next & past input samples
 c) current and/or past input samples and/or past output samples
 d) Next or past input sample or past output samples.
- 2) A necessary & sufficient condition for the LTI system to be BIBO stable is _____.
 a) $\sum_{n=-\infty}^{n=\infty} h > \infty$
 b) $\sum_{n=-\infty}^{n=\infty} h(n) < \infty$
 c) $\sum_{n=-\infty}^{n=\infty} h(n) = \infty$
 d) None
- 3) Multiplication is required to compute N point DFT _____.
 a) N
 b) N(N-1)
 c) N²
 d) N³
- 4) With zero padding DFT is used as _____.
 a) Circular filtering
 b) Linear filtering
 c) FFT calculations
 d) Overlap add method
- 5) Section convolution is performed if one of the sequences is much larger than the other to overcome _____.
 a) Long delay in getting output
 b) Larger memory space requirement
 c) both a & b
 d) None
- 6) The algorithm used for the computation of DFT based on the decomposition of N-point DFT is known as _____.
 a) Phase algorithm
 b) Overlap save
 c) Divide and Conquer
 d) None

ELECTRICAL ENGINEERING
Digital Signal Processing (197045708)

Day & Date: Wednesday, 05-06-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
 2) Figures to the right indicate full marks.
 3) Draw neat diagrams whenever necessary.
 4) Assume suitable data if necessary.

Section – I

Q.2 Attempt any four of the following. 16

- Compute autocorrelation of the sequence $x(n) = \{4, 2, 5, 6, 3\}$
- The first 5 points of the 8-point DFT of a real-valued sequence are $\{28, -4 + j9.565, -4 + j4, -4 + j1.656, -4\}$ Determine the remaining 3 Points.
- Find IDFT of $X(k) = \{16 - 4 + 2j - 4 - 4 - 2j\}$
- Compare Wavelet Transform and Discrete Wavelet Transform.
- Explain DSP Architecture and how it can be used for the measurement of electrical quantities.

Q.3 Attempt any two of the following. 12

- Find linear convolution Using the overlap save method, of the following sequence.
 $x(n) = \{1, 2, 0, -3, 2, 2, 1, 0, -1, -1, 0, 1, 5, 7, 3\}$ $h(n) = \{1, 2, 2, 1\}$
- Explain the application of DSP in Power systems.
- Write in detail the properties of Discrete Wavelet Transform.

Section – II

Q.4 Attempt any four of the following. 16

- List down the design steps in implementing the IIR filter.
- What are finite word length effects in the FIR filter?
- State the advantage of digital filter over Analog filter.
- What is the warping effect? What is its effect on magnitude and phase response?
- Write a note on LMS Algorithm.

Q.5 Attempt any two of the following. 12

- Explain in detail Adaptive Signal Processing.
- Design seven coefficients FIR LPF using frequency sampling method with the following specifications.

$$H_d(e^{jw}) = e^{-j(N-1)w/2} \quad \text{for } 0 \leq w \leq \pi/2$$

$$= 0 \quad \text{for } \pi/2 \leq w \leq \pi$$
- Using Bilinear transformation obtain $H(z)$ if $\frac{1}{(s+1)^2}$ and $T = 0.1 \text{ Sec}$

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options and rewrite the sentence. 14

- 1) The frequency sampling structure is efficient because _____.
 - a) sample points are less
 - b) some sampled DFT coefficients are zero when the filter is a narrow band
 - c) some sampled values can be assumed zero
 - d) parallel structures are efficient
- 2) The overall impulse response of two LTI systems connected in a cascade is equal to _____.
 - a) Sum of two impulse response
 - b) Multiplication of two impulse response
 - c) Convolution of the individual impulse response
 - d) None
- 3) Which of the following criterion can be used to optimize the M+1 filter coefficients?
 - a) Pade approximation method
 - b) Least squares error criterion
 - c) Least squares error criterion & Pade approximation method
 - d) None of the mentioned
- 4) Which of the following mapping is true between the s-plane and z-domain?
 - a) Points in LHP of the s-plane into points inside the circle in z-domain
 - b) Points in RHP of the s-plane into points outside the circle in z-domain
 - c) Points on the imaginary axis of the s-plane into points onto the circle in z-domain
 - d) All of the mentioned

- 6) A necessary & sufficient condition for the LTI system to be BIBO stable is _____.
 - a) $\sum_{n=-\infty}^{n=\infty} h > \infty$
 - b) $\sum_{n=-\infty}^{n=\infty} h(n) < \infty$
 - c) $\sum_{n=-\infty}^{n=\infty} h(n) = \infty$
 - d) None

Seat No.

Set **R**

T. Y. (B.Tech.) (Sem-II) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING
Digital Signal Processing (197045708)

Day & Date: Wednesday, 05-06-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.
 2) Figures to the right indicate full marks.
 3) Draw neat diagrams whenever necessary.
 4) Assume suitable data if necessary.

Section – I

Q.2 Attempt any four of the following. 16

- Compute autocorrelation of the sequence $x(n) = \{4, 2, 5, 6, 3\}$
- The first 5 points of the 8-point DFT of a real-valued sequence are $\{28, -4 + j9.565, -4 + j4, -4 + j1.656, -4\}$ Determine the remaining 3 Points.
- Find IDFT of $X(k) = \{16 - 4 + 2j - 4 - 4 - 2j\}$
- Compare Wavelet Transform and Discrete Wavelet Transform.
- Explain DSP Architecture and how it can be used for the measurement of electrical quantities.

Q.3 Attempt any two of the following. 12

- Find linear convolution Using the overlap save method, of the following sequence.
 $x(n) = \{1, 2, 0, -3, 2, 2, 1, 0, -1, -1, 0, 1, 5, 7, 3\}$ $h(n) = \{1, 2, 2, 1\}$
- Explain the application of DSP in Power systems.
- Write in detail the properties of Discrete Wavelet Transform.

Section – II

Q.4 Attempt any four of the following. 16

- List down the design steps in implementing the IIR filter.
- What are finite word length effects in the FIR filter?
- State the advantage of digital filter over Analog filter.
- What is the warping effect? What is its effect on magnitude and phase response?
- Write a note on LMS Algorithm.

Q.5 Attempt any two of the following. 12

- Explain in detail Adaptive Signal Processing.
- Design seven coefficients FIR LPF using frequency sampling method with the following specifications.

$$H_d(e^{jw}) = e^{-j(N-1)w/2} \quad \text{for } 0 \leq w \leq \pi/2$$

$$= 0 \quad \text{for } \pi/2 \leq w \leq \pi$$
- Using Bilinear transformation obtain $H(z)$ if $\frac{1}{(s+1)^2}$ and $T = 0.1 \text{ Sec}$

T. Y. (B.Tech.) (Sem-II) (CBCS) Examination: March/April-2024
ELECTRICAL ENGINEERING
Digital Signal Processing (197045708)

Day & Date: Wednesday, 05-06-2024
 Time: 03:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:**
- 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
 - 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
 - 3) Figures to the right indicates full marks.
 - 4) Draw neat diagrams whenever necessary.
 - 5) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

Q.1 Choose the correct alternatives from the options and rewrite the sentence. 14

- 1) The algorithm used for the computation of DFT based on the decomposition of N-point DFT is known as _____.
 - a) Phase algorithm
 - b) Overlap save
 - c) Divide and Conquer
 - d) None
- 2) When a sequence is circularly shifted in time by 5 units, the magnitude response _____.
 - a) Increase by 5
 - b) Remain unchanged
 - c) Shift by 5 units
 - d) None
- 3) The frequency sampling structure is efficient because _____.
 - a) sample points are less
 - b) some sampled DFT coefficients are zero when the filter is a narrow band
 - c) some sampled values can be assumed zero
 - d) parallel structures are efficient
- 4) The overall impulse response of two LTI systems connected in a cascade is equal to _____.
 - a) Sum of two impulse response
 - b) Multiplication of two impulse response
 - c) Convolution of the individual impulse response
 - d) None
- 5) Which of the following criterion can be used to optimize the M+1 filter coefficients?
 - a) Pade approximation method
 - b) Least squares error criterion
 - c) Least squares error criterion & Pade approximation method
 - d) None of the mentioned

- 6) Which of the following mapping is true between the s-plane and z-domain?
 a) Points in LHP of the s-plane into points inside the circle in z-domain
 b) Points in RHP of the s-plane into points outside the circle in z-domain
 c) Points on the imaginary axis of the s-plane into points onto the circle in z-domain
 d) All of the mentioned
- 7) The mapping of bilinear transformation is _____.
 a) many-to-many mapping b) many-to-one mapping
 c) one-to-one mapping d) None
- 8) In the IIR system, which of the following structures will give a direct relation between the time domain and Z domain.
 a) Direct form I b) Direct form II
 c) Cascade form d) Parallel form
- 9) To avoid aliasing of frequency components which method is useful in designing filter _____.
 a) impulse invariant b) bilinear transformation
 c) windowing techniques d) None
- 10) The system is casual when the current output sample depends upon _____.
 a) current input sample
 b) current or next & past input samples
 c) current and/or past input samples and/or past output samples
 d) Next or past input sample or past output samples.
- 11) A necessary & sufficient condition for the LTI system to be BIBO stable is _____.
 a) $\sum_{n=-\infty}^{n=\infty} h > \infty$ b) $\sum_{n=-\infty}^{n=\infty} h(n) < \infty$
 c) $\sum_{n=-\infty}^{n=\infty} h(n) = \infty$ d) None
- 12) Multiplication is required to compute N point DFT _____.
 a) N b) N(N-1)
 c) N² d) N³
- 13) With zero padding DFT is used as _____.
 a) Circular filtering b) Linear filtering
 c) FFT calculations d) Overlap add method
- 14) Section convolution is performed if one of the sequences is much larger than the other to overcome _____.
 a) Long delay in getting output
 b) Larger memory space requirement
 c) both a & b
 d) None

Seat No.
