

SKILL DEVELOPMENT COURSE

DIPLOMA COURSE IN RAILWAY SIGNALLING AND TELECOMMUNICATION

A Programme under

Department of Electronics and Telecommunication
Engineering
MIT College of Railway Engineering & Research, Barshi

In association with

Skill development center Punyshlok Ahilyadevi Holkar Solapur University, Solapur

		Diploma in Railway Signaling and Telecommunication					
1	Name of Course	Diploma in Railway Signaling and Telecommunication					
2	Max. no. of Students	30					
3	Duration	1 Year					
4	Course Type	Part Time					
5	No.of Days per week	3 Days					
6	No. of hours per day	2 Hrs					
7	Spacerequire	66 m ² classroom and 66 m ² Laboratory					
8	Entry qualification	Diploma / FE- Electronics and Telecommunication Engg, Electrical Engg, Electronics Engg,					
		Instrumentation and control Engg, Biomedical Electronics, Bsc/Msc. Electronics,					
9	Objective of syllabus	1. To make student realize different types of signals and signaling plan.					
		2. To make student understand principles of signals.					
		3. To make student understand work of different components and devices used in signaling					
		and telecommunication.					
		4. To introduce to student concepts of data preparation and Various communication systems					
		used in railways					
10	Employment opportunities	Students will get jobs in government as well as Private Railway Engineering companies.					
11	Teachers Qualification	ME/ M.Tech/PhD					

One month Internship is Compulsory.

Teaching Scheme:

Sr.No	Subject	Subject	C	Clock Hour/ Week
		Code	Theory	Practical
1	System Engineering	RST01	2	2
2	Principles of Signal Engineering	RST02	2	2
3	Application Engineering	RST03	2	2
4	Modern, Emerging and Telecommunication technologies	RST04	2	2
5	Reliability, Availability, Maintainability and Safety (RAMS) in Railway	RST05	2	2
6	Railway Project work	RST06	0	4

14 Examination Scheme – Final Examination will be based on syllabus of One years.

Paper	Subject	Subject	Theory			Practical			Total	
		Code	Duration (Hr.)	Max	Min	Duration (Hr.)	Max	Min	Min	Max
1	System Engineering	RST01	3	80	32	2	20	8	40	100
2	Principles of Signal Engineering	RST02	3	80	32	2	20	8	40	100
3	Application engineering	RST03	3	80	32	2	20	8	40	100
4	Modern, Emerging &Telecommunication technologies	RST04	3	80	32	2	20	8	40	100
5	Reliability, Availability, Maintainability and Safety (RAMS) in Railway	RST05	3	80	32	2	20	8	40	100
6	Railway Project Work	RST06				2	100	40	40	100
	Total		400	160		200	80	240	600	

NOTE :- COMBINE PASSING (BOTH THEORY & PRACTLCAL)

SYLLABUS

			- L	Name of Street, or other Designation of the last of th
Sr.No	Course Name	Diploma in	Railway Signaling and Telecommunication	Ingao!
1	Paper Title	System Eng	gineering	
2	Paper Number	RST01		
3	Objective of Paper	To make strand double To introduce Railways.	ce to students concept of block systems used on Indian	e line
4	Expected Outcome from Paper	Student ca Student ca Student ca	of this course, Students will be able to, n describe different types of signals. n plan signaling in railway signaling. n describe signaling plan for single line and double line. n describe about block system used in Indian Railways.	
		Unit	Content	Hour
	Content	Unit-I	Role of Signalling in Railway operation, Signalling Concepts, Fixed Signals, Kinds, Aspects & Indications, Designation of Signals, Location of Signals, Types of signals, Engineering plan, Signaling plan, Symbols	8
5		Unit-II	Subsidiary Signals, Repeaters, Indicators, Markers & Back Lights, Breaking Distance, Sighting Distance & Visibility of Signals, Isolation, Overlaps, Auto CAD basics, Simultaneous Reception and Despatch of Trains,	8
		Unit-III	Systems of working, Absolute Block System, Automatic Block System, Classification of Stations – Comparison of A, B & C. Comparision Of Class A, B And C Stations With Mauq & Mlq Operation Preparation of signaling, plans for single line and double line.	8
		Unit-IV	Inter Cabin control, Principles of Slotting, The purpose of slotting is twofold, Types of Controls Slots, Section capacity, Block systems used on Indian Railways	6
		P-1	Study Of Double Line Block Instruments	2
		P-2	Study Of Double Line Block Instrument And Its Circuits	2
	Practical (*Any five	P-3	Identify The Following External Parts Of The Frequency Modulated Token Less Single Line Block Instrument And Fill In The Brackets With The Identification Numbers On The Part	2
	experiments)	P-4	Study of Intermediate Block Signaling	2
		P-5	Study of Axle Counter Block working (Block Proving Axle Counter with Block Panel)	2
1				2

6	Reference Book	 Railway Signalling, edited by O.S. Nock, A & C Black Publishers Ltd, 1981. Hand Book on Railway Signalling in Indian Railways, by Vikas Srivastav, 2009 An Introduction to Railway Signalling & Equipment Andy Lawrence – 2011

			EER'SWI	
Sr.No	Course Name		Railway Signaling and Telecommunication	03/6/1
1	Paper Title		f Signal Engineering	70gaon, 60
2	Paper Number	RST02		
		To make Stu	udents realize concepts of points.	
		To make Sti	udents understand level crossing gates and classification.	
3	Objective of	To make stu	udents understand the principles of interlocking. e to students advantages, disadvantages and application o	of
	Paper		f signal engineering.	
		principles o	Signal engineering.	
		At the end	of this course, Students will be able to,	
			n describe concepts of points.	
	Expected	Student car	describes level crossing gates and classification.	
4	Outcome from	Student car	n describe the principles of interlocking.	
	Paper	Student car	n describe about advantages, disadvantages and application	on of
			of signal engineering	
		Unit	Content	Hour
			Principles of Signaling, Concepts of points. Location of	
		Unit-l	point and range of operation	
			Level crossing gates and classification, Location Of Lc	
			Gate , Protection of level crossing inside the station	8
			Limits, Level Crossings At Class `A' And `C' Stations,	
			Level crossing located within station limits in MAS	
			signaling, Control of level crossings in Automatic	
			Signaling sections Numbering of signaling plan, , Standards of	
			Interlocking, Minimum Equipment For Previous	
		Unit-II	Standards Of Interlocking, Parameter for setting of	8
5	Content	Offic-II	switches, Speed of train over point Standard wise,	
			Principles of interlocking,	
			Essentials of Interlocking, Essentials of Interlocking	
			,Layouts for Locking Table practice, Locking Diagrams ,	
		Unit-III	Testing of locking -Single wire lever frame , Application	7
			of interlocking principles	
			Route holding	
			Advantages, Disadvantages and application of	
			Principles of Signal Engineering, Signal Aspect Control	7
		Unit-IV	Circuit, Signal Indication Circuits, Triple Pole Lamps, Inner Distant Signal, LED Signal Units, Automatic	
			Colour Light Signalling	
			Study of Q- Series Plug In Type D.C. Relays (Non	
		1	Proved Type)	2
	Practical	2	Route Setting Type Relay Interlocking	2
	Fractical	3	Study Of Route Setting Type Relay Interlocking (British)	2
		4	Study Of Microlok-II Electronic Interlocking System	2
		7	Julian Julian State Stat	

		5	Case study on signaling operations at solapur railway station	2
6	Reference Book	2.	Railway Signalling, edited by O.S. Nock, A & C Black Publ Ltd, 1981. Hand Book on Railway Signalling in Indian Railways, by V Srivastav, 2009 An Introduction to Railway Signalling & Equipment Andy Lawrence – 2011	⁄ikas

1	Paper Title	Application	Engineering	* James and
2	Paper Number	RST03		
		To make Stu	udents realize Relay concepts and its types used in signalir	ng.
		To make Stu	udents understand the concept of signaling circuits and tr	ack
	al in the of	detecting de	evices.	
3	Objective of	To make stu	udents understand the various locking on signals and conc	ept of table
	Paper	of control.		
		To introduc	e to students power supply arrangement for signaling.	
			o. I	
		At the end	of this course, Students will be able to,	
		Student car	n describe Relay concepts and its types used in signaling.	cting
4	Expected	1	describes the concept of signaling circuits and track dete	Cuile
	Outcome from	devices.	the state of the s	ble of
	Paper	4	n describe the various locking on signals and concept of ta	
		control.	n describe about power supply arrangement for signaling.	
			Content	Hour
		Unit	Relays conceptsTypes of relays used in signalling.,	
			Various symbols ,Concepts of signalling circuits, Track	
		I Imita I	detecting devices , Introduction to Relay interlocking,	7
		Unit-l	Sequence of Operations on Panel, Signalling Plan-	
			Control Table	
		Unit-II	Signaling Plan- Control Table, Characteristics OF	
			Electro-Magnetic Relay , Classification Of Signaling	7
			Relay, marking of track circuits, Point control circuits.	'
5	Content		Point machines and their working.	
			Track locking, Various locking on signals, Various logic	
		Unit-III	circuits, Signal control circuits, Concept of table of	8
		Oille III	control Preparation and practice of table of control	
			Power supply arrangements for signaling, Various	
			cables and wires used for signaling, Concepts of relay	
		Unit-IV	room and cable layouts ,Cable laying practices,	8
			Concepts of location boxes. Signalling in railway	
			electrified area.Effects of electrification	2
		1	Study Of Integrated Power Supply System	2
		2	Study of Different Relays	2
		3	Study of Track detecting devices	2
	Practical	4	Study Of Microlok-Ii El Rack Layout And Relay Rack	
			Layout	2
		5	Industrial visit near by railway station

		5 7007		
Sr.No	Course Name	Diploma in	Railway Signaling and Telecommunication	3
1	Paper Title	Reliability, A	Availability, Maintainability and Safety (RAMS) in Railway	gach 8
2	Paper Number	RST05		
3	Objective of Paper	To make Stu To make stu To introduc To make Stu	udents realize concepts of RAMS in Railway udents understand System Engineering concepts. udents understand Safety Engineering and Technique. e to students the Railway Engineering Standards udents realize concepts of the system Assurance process. of this course, Students will be able to,	
4	Expected Outcome from Paper	Students ca Students ca Students ca	an describe concepts of RAMS in Railway an describe the System Engineering concepts. an describe the Railway Engineering Standards. an describe the system Assurance process.	
			Content	Hour
5	Content	Unit-l	Introduction of RAMS: RAM Mathematics ,Probability theory, Conditional probability, Venn Diagram ,Mutually exclusive and independent events, Boolean Algebra, Axioms and Theorems, RAM Basics, Detailed explanation of Reliability, Availability, Maintainability and associated parameters ,Relationship between different parameters, Constant failure rate model and bathtub curve, Different types of Maintenance, Different types of Availability, RAM Modeling, Reliability block diagrams, Series and parallel systems, Decomposition method of RBD solution, Markov chain analysis for repairable systems, Fault tolerance and Redundancy, Systematic and Random faults, Types of redundancy-Hardware and Software, Common cause failures, FMECA- RAM analysis, Software reliability ,Preliminary RAM analysis, RAM targets and their apportionment,Final RAM analysis,Availability Modelling.	10
		Unit-II	System Engineering Principles: Introduction of System, System engineering Elements of Systems, System Life cycle, Blackbox analysis, System engineering application to the railway, Whole life costs, Life cycle cost modelling, Value Engineering.	6
		Unit-III	Safety Engineering and Technique, Railway Standards: Hazard, Hazard Analysis and Risk Acceptance, System, product safety assessment, SIL levels, CENELEC	6

			standards and Common safety methods, Safety Engineering Techniques, Hazard Log Management, FMECA- Safety analysis, Fault tree analysis, Event tree analysis, Safety targets compliance, Risk acceptance through common safety methods	
		Unit-IV	Introduction to system assurance regime, Risk based assurance, Self assurance regime, Progressive Assurance, Planning of system assurance processes, System assurance audits, Assurance Management , System assurance attitude, System Assurance qualities- Safety consciousness, transparency, integrity, trust, Project stage based evidence maturity, Risk management through assurance, Commitment to reputation , Success through collaboration: Client, supplier and Assurance, Handover to O&M- process, Delivering efficiency through reliability centered maintenance	8
		P-1	Case Study RAM Management, Apportionment of RAMS to railway System.	2
	Practical	P-2	Designing for RAM in Railway Systems: An Application to the Railway Signaling Subsystem.	2
		P-3	Case study outline and system assurance regime- CBTC	2
		P-4	Case study- System Engineering	2
		P-5	Case study- RAM	2
6	Reference Book	2. RA M 3A	indbook of RAMS in Railway Systems Theory and Practice, ahboob Enrico Zio, CRC Press, Taylor and Francis Group. AMS and LCC Engineering for Railway Industry: Analysis, odelling and Optimization by Eduardo Calixto. dvances in RAMS Engineering, Karanki, Durga Rao, Vinod, Gividya, Ajit, Spinger	

			1
Sr. No	Course Name	Diploma in Railway Signaling and Telecommunication	yanngaon, l
1	Paper Title	Railway Project work	Agon
2	Paper Number	RST06	
3	Objective of Paper	To carry out a thematic design project in one of the specializations of Railway	
		Signaling and telecommunication.	
		To carry out a project that will make the students aware of the different	
		facets of Railway Signaling and telecommunication.	
		To explore the skill and abilities of student to work in team	
		Develop an ability to apply the basic knowledge of mathematics, science and	
4	Expected Outcome from Paper	engineering to real-life problems	
		Identify the real life problem and present the solution by conducting	
		experimental/ analytical study and in and off the laboratory	
		Apply modern tools such as different application software, modern	
		instrumentation for the most precise study of the project undertaken	
		Demonstrate a commitment to teamwork while working with other students	
		of diverse culture and different intellectual backgrounds	
		Student shall submit the report and prepare presentation for	Hour
5	Content Practical	defense.	
		The topic for the Project Work may be from Electronics and	
		telecommunication Engineering, Railway Signaling, Modern	
		communication technologies used in railway, Interlocking and	-
		inter-disciplinary area related to Railway Engineering.	
		Guidelines for Project contents:	
		a) Project Report:	
		Project report should be of 25 to 50 pages (More pages can be	
		used if needed).	
		Entire Report has to be segmented chapter wise as per the	
		requirement.	
		1. Introduction (History, Importance of Project Area, Problem	100
		identification, Objective of the Project)	40
		2. Literature Review	
		3. Design/ Experimentation/ Model/Actual work carried out for	
		the same.	-
		4. Observation/ Analysis/ Findings/Results	
		5. Discussion on Results and Conclusion	
		b) Presentation:	
		The group has to prepare a power point presentation on project	
		report and present it in front of the faculty of department along	
		with the demonstration of the project.	
		One copy of the report should be submitted to Institute/	
		Department, One copy to Guide and one copy should remain with	
		each student of the project group
